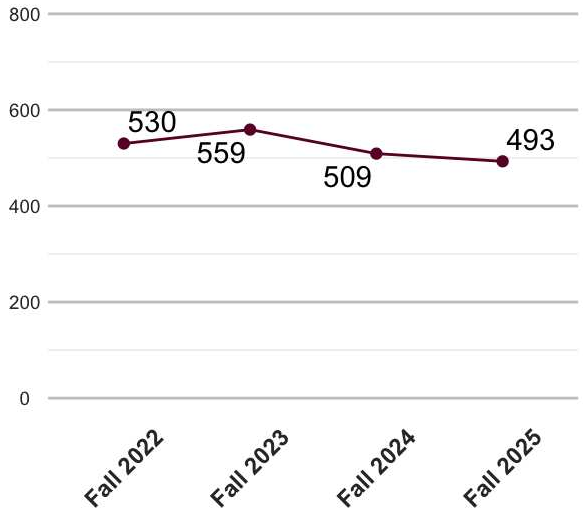
SPRING 2025-2026 ACADEMIC PERFORMANCE REPORT

Overview

	2022-23	2023-24	2024-25	2025-26
English Language Learner	48.3%	50.8%	55.0%	56.2%
Special Education	8.7%	8.9%	7.9%	8.9%
Free/Reduced Lunch	88.3%	99.6%	100.0%	99.8%
Students of Color	26.8%	29.0%	27.9%	30.8%
Enrolled 3 or More Years	63.4%	57.8%	66.4%	67.1%

Enrollment



Where Students Come From

Assigned District	Students
Ypsilanti Community Schools (81020)	296
Ann Arbor Public Schools (81010)	182
Van Buren Public Schools (82430)	3
Whitmore Lake Public School District (81140)	3
Wayne-Westland Community School District (82160)	2
Williamston Community Schools (33230)	2
Eastpointe Community Schools (50020)	1
Hamtramck, School District of the City of (82060)	1
Lincoln Consolidated School District (81070)	1
Other	2

SPRING 2025-2026 ACADEMIC PERFORMANCE REPORT

NWEA MAP Growth Assessment

The 2025-2026 School Year administration of the NWEA MAP Growth Assessment utilizes the 2025 Norms. Additionally, beginning in the 2023-2024 school year MAP began using NWEA's enhanced item-selection algorithm. Changes in year-over-year Achievement and Growth scores should be interpreted with these two changes in mind. **Please refer to the current Guidance Document for additional details.**

Achievement

The 2025 NWEA national norms in mathematics and reading provide us with a benchmark for how students typically perform within grade level. The percent of students meeting national norms informs us of the proportion of students achieving at or above the 50th percentile (typical achievement). The primary achievement target in the Academy's Charter Contract is that at least 50% of students in grades 3-8 enrolled for at least one year earn assessment scores at or above their spring, grade-level, national norm. If the Academy has less than 50% of its students achieving at grade level, the Academy is expected to improve over time. Improvement over time is measured by the Trend Score which is defined as the score in the current year minus the average of the last three years (CY - AVG(PY1 + PY2 + PY3)).

2025-2026 - Percent of Students Meeting Spring National Achievement Norms

Mathematics	Trend Score	Reading	Trend Score
35%	-1	40%	+6

Growth

A Conditional Growth Percentile (CGP), or simply Growth Percentile, is a student's percentile rank for growth among their academic peers. A CGP of 50 means that the student's growth was higher than 50 percent of their academic peers. At the school level, we aggregate this measure in two ways. First, the percentage of students with a CGP of 50 or greater is displayed. The second measure (Median Growth Percentile, MGP) identifies the midpoint of growth percentiles for students in the school. The primary growth target contained in the Charter Contract is that the Academy's MGP should be greater than or equal to 50. If the Academy fails to meet this target, they are expected to show improvement over time. Improvement over time is measured by the Trend Score which is defined as the score in the current year minus the average of the last three years (CY - AVG(PY1 + PY2 + PY3)).

2025-2026 - Percent of Students with a Fall-to-Spring Growth Percentile of 50 or Greater

Mathematics	Trend Score	Reading	Trend Score
55%	-2	57%	+8

2025-2026 - Fall-to-Spring Median Growth Percentile

Mathematics	Reading
54th	55th

SPRING 2025-2026 ACADEMIC PERFORMANCE REPORT

Michigan Student Test of Educational Progress (M-STEP)

The Michigan Student Test of Educational Progress (M-STEP) is an assessment given during the spring of each school year. The state of Michigan requires that the Academy assess all students in grades 3-7 using the M-STEP in English Language Arts (ELA) and Mathematics. While the primary performance standards outlined in the Charter Contract do not contain expectations regarding state assessment performance, the M-STEP is still a consideration in the Charter Contract. For schools that do not meet the primary standards on the NWEA assessments in achievement and growth, the Center utilizes the M-STEP to compare each Academy's performance to traditional districts where students would otherwise attend if not enrolled at the Academy. The Center uses a weighted average to calculate the performance of a "composite district" representing all districts where students at the Academy would otherwise attend. This "district" is called the Composite Resident District (CRD).

Achievement

M-STEP is the state of Michigan's summative assessment that measures how well students are mastering state academic standards. The proportion of students in the Academy who are either Advanced or Proficient shows us how well students achieve against the standards.

2025-2026 - Percent of Students Advanced or Proficient on M-STEP Mathematics and English Language Arts

Mathematics	1 year change	ELA	1 year change
17%	-1	14%	-4

Comparative Achievement (CRD) - M-STEP

The percentage of advanced or proficient students is compared to the Academy's CRD percentage. This shows how the Academy is helping students master state standards compared to the schools they would attend based on residency. The metric presented displays the difference between the percentage of the Academy's students that meet the benchmark and the percentage of the CRD's students that meet the benchmark.

2025-2026 - Percent of Students Advanced or Proficient on M-STEP vs. CRD

Mathematics	ELA
-13	-21

SPRING 2025-2026 ACADEMIC PERFORMANCE REPORT

Scholastic Aptitude Test (SAT)

The state of Michigan requires that each student take the Scholastic Aptitude Test (SAT) in 11th grade. For Academies that serve high school students, the Charter Contract contains goals related to SAT performance. The primary goal associated with the SAT is that the percentage of students who meet the College and Career Readiness Benchmarks (CCR) in Reading & Writing, and in Mathematics meets or exceeds the statewide percentage of students who meet those same benchmarks. If an Academy does not meet the primary target, they can demonstrate progress toward meeting the target by exhibiting a positive trend, over time. The Center also compares each Academy's performance to traditional districts where students would otherwise attend if not enrolled at the Academy. The Center uses a weighted average to calculate the performance of a "composite district" representing all districts where students at the Academy would otherwise attend. This "district" is called the Composite Resident District (CRD).

Achievement

SAT (grade 11) in Reading & Writing and Mathematics help us measure whether students are 'on-track' towards college readiness. The percentage of students meeting or surpassing grade level college readiness benchmarks on the SAT gives us a sense of how the school is performing towards this goal.

2025-2026 - Percent of Students at the Academy Who Meet SAT College and Career Readiness (CCR) Benchmarks

Mathematics	Trend Score	Reading & Writing	Trend Score
16%	+3	19%	-4

Due to changes in the mode of test administration for PSAT/SAT, year-over-year comparisons between 2022-2023 and 2023-2024 are not reliable. **Please see the Guidance Document for more information.**

Comparative Achievement (CRD) - SAT

The percentage of students meeting or surpassing grade level on-track benchmarks is compared to the school's CRD percentage. This illustrates to us how the school is performing in preparing students for college and career readiness compared to the schools where students would attend based on residency. The metric presented displays the difference between the percentage of the Academy's students that meet the benchmark and the percentage of the CRD's students that meet the benchmark.

2025-2026 - Percent of Students at the Academy Who Meet SAT College and Career Readiness (CCR) Benchmarks vs. CRD

Mathematics	Reading & Writing
-6	-18

SPRING 2025-2026 ACADEMIC PERFORMANCE REPORT

Scholastic Aptitude Test (SAT)

The SAT is a standardized test started in 1926 by The College Board. Michigan students take the SAT with Essay administration during the Michigan Merit Examination in the spring of 11th grade. The Reading & Writing and the Mathematics portions of the SAT each have a scale range of 200-800. The Total Score which is often reported as a students SAT Score is the summation of these two scores (range: 400-1600.) The Center uses a weighted average to calculate the performance of a "composite district" representing all districts where students at the Academy would otherwise attend. This "district" is called the Composite Resident District (CRD).

Achievement

SAT (grade 11) in Reading & Writing and Mathematics help us measure whether students are 'on-track' towards college readiness. The average scale score of students on the SAT gives us a sense of how the school is performing versus the benchmark scores.

2025-2026 - Average Scale Score of Students at the Academy

Mathematics	Benchmark	Reading & Writing	Benchmark
427	530	392	480

Due to changes in the mode of test administration for PSAT/SAT, year-over-year comparisons between 2022-2023 and 2023-2024 are not reliable. **Please see the Guidance Document for more information.**

Comparative Achievement (CRD) - SAT

The average scale score of students at the academy is compared to the school's CRD average scale score. This illustrates to us how the school is performing in preparing students for college and career readiness compared to the schools where students would attend based on residency. The metric presented displays the difference between the average scale score of the Academy's students and the average scale score of the CRD's students.

2025-2026 - Average Scale Score of Students at the Academy vs. CRD

Mathematics	Reading & Writing
+0	-62
