REAUTHORIZING RESOLUTION

REAUTHORIZATION OF SCHOOL OF EXCELLENCE**South Arbor Charter Academy**

Recitals:

1. At its April 14, 2011, meeting this board reauthorized the issuance of a contract to charter as a School of Excellence to South Arbor Charter Academy. On July 14, 2011, the contract was effective.
2. The contract of this academy expires June 30, 2016.
3. The Governor John Engler Center for Charter Schools has completed its evaluation and assessment of the operation and performance of South Arbor Charter Academy.
4. The university president or designee has recommended the reissuance of a contract to charter as a School of Excellence to South Arbor Charter Academy. The term of the contract is recommended for a term not to exceed ten (10) years.

BE IT RESOLVED, That this board approves and authorizes the execution of a contract to charter as a School of Excellence to South Arbor Charter Academy for a term not to exceed ten (10) years and authorizes the chair of the board to execute a contract to charter as a School of Excellence and related documents between South Arbor Charter Academy and the Central Michigan University Board of Trustees, provided that, before execution of the contract, the university president or designee affirms that all terms of the contract have been agreed upon and South Arbor Charter Academy is able to comply with all terms and conditions of the contract.

Public School Academy Board of Directors: Method of Selection, Appointment, and Removal

The Central Michigan University Board of Trustees declares that the method of selection, length of term, and number of board members shall be as follows.

Method of Selection and Appointment

The Central Michigan University Board of Trustees ("University Board") shall prescribe the method of appointment for members of an academy's board of directors. The director of the charter schools office is authorized to develop and administer an academy board selection and appointment process that includes an *Application for Public School Academy Board Appointment* and is in accord with these policies:

- a. The University Board shall appoint the initial and subsequent academy board of directors by resolution, except as prescribed by subparagraph d. The director of the charter schools office shall recommend qualified individuals to the University Board.
- b. The academy board of directors, by resolution and majority vote, shall nominate its subsequent members, except as provided otherwise. The academy board of directors shall recommend to the director of the charter schools office at least one nominee for each vacancy. Nominees shall submit the *Application for Public School Academy Board Appointment* for review by the charter schools office. The director of the charter schools office may or may not recommend the appointment of a nominee submitted by the academy board. If the director of the charter schools office does not recommend the appointment of a nominee submitted by the academy board, he/she may select and recommend another nominee or may request the academy board submit a new nominee for consideration.
- c. An individual appointed to fill a vacancy created other than by the expiration of a term shall be appointed for the unexpired term of that vacant position.
- d. Under exigent conditions, and with the approval of the University Board's chair and the president, the director of the charter schools office may appoint a qualified individual to an academy's board of directors. All appointments made under this provision must be presented to the University Board for final determination at its next regularly scheduled meeting. The University Board reserves the right to review, rescind, modify, ratify, or approve any appointments made under this provision.

Length of Term

The director of an academy board shall serve at the pleasure of the University Board. Terms of the initial positions of the academy board of directors which shall be staggered in accordance with *The Academy Board of Directors Table of Staggered Terms and Appointments* established and administered by the director of the charter schools office. Subsequent appointments shall be for a term of office not to exceed of four (4) years, except as prescribed by *The Academy Board of Directors Table of Staggered Terms and Appointments*.

Removal and Suspension

If the University Board determines that an academy board member's service in office is no longer necessary, then the University Board may remove an academy board member with or without cause and shall specify the date when the academy board member's service ends. An academy board member may also be removed from office by a two-thirds (2/3) vote of the academy's board for cause.

With the approval of the University Board's chair and the president, the director of the charter schools office may suspend an academy board member's service, if in his/her judgment the person's continued presence would constitute a risk to persons or property, or would seriously impair the operation of the academy. Any suspension made under this provision must be presented to the University Board for final determination at its next regularly scheduled meeting. The University Board reserves the right to review, rescind, modify, ratify, or approve any suspensions made under this provision.

Number of Directors

The number of members of the academy board of directors shall not be less than five (5) nor more than nine (9). If the academy board of directors fails to maintain its full membership by making appropriate and timely nominations, the University Board or its designee may deem that failure an exigent condition.

Qualifications of Academy Board Members

To be qualified to serve on an academy's board of directors, a person shall, among other things: (a) be a citizen of the United States; (b) be a resident of the state of Michigan; (c) submit all materials requested by the charter schools office including, but not limited to, the *Application for Public School Academy Board Appointment* which must include authorization to process a criminal background check; and (d) annually submit a conflict of interest disclosure as prescribed by the charter schools office.

The members of an academy board of directors shall not include: (a) employees of the academy; (b) any director, officer, or employee of a service provider or management company that contracts with the academy; (c) a Central Michigan University official or employee, as a representative of Central Michigan University.

Oath of Public Office

All members of the academy board of directors must take the constitutional oath of office and sign the *Oath of Public Office* before beginning their service. No appointment shall be effective prior to the filing of The *Oath of Public Office* shall be filed with the charter schools office.

Note: These provisions shall be implemented with new charter contracts and shall be phased in as existing charter contracts are reissued or amended. The charter schools office is authorized to negotiate changes in the terms and conditions of charter contracts to fully implement these provisions.

Amended by CMU Board of Trustees: 06-1207.

Adopted by CMU Board of Trustees: 98-0918.

WHEREAS, the People of Michigan through their Constitution have provided that schools and the means of education shall forever be encouraged and have authorized the Legislature to maintain and support a system of free public elementary and secondary schools; and

WHEREAS, all public schools are subject to the leadership and general supervision of the State Board of Education; and

WHEREAS, the Legislature has authorized an alternative form of public school designated a "public school academy" to be created to serve the educational needs of pupils and has provided that pupils attending these schools shall be eligible for support from the State School Aid Fund; and

WHEREAS, the Legislature has delegated to the governing boards of state public universities, community college boards, intermediate school district boards and local school district boards, the responsibility for authorizing the establishment of schools of excellence; and

WHEREAS, pursuant to Part 6e of the Revised School Code ("Code"), the Central Michigan University Board of Trustees ("University Board") has considered and has approved the issuance of a contract to South Arbor Charter Academy ("the Academy");

NOW, THEREFORE, pursuant to the Code, the University Board issues a contract conferring certain rights, franchises, privileges, and obligations and confirms the Academy's status as a school of excellence. In addition, the parties agree that the issuance of this Contract is subject to the following terms and conditions:

ARTICLE I DEFINITIONS

Section 1.1. Certain Definitions. For purposes of this Contract, and in addition to the terms defined throughout this Contract, each of the following words or expressions, whenever initially capitalized, shall have the meaning set forth in this section:

- (a) "Academy" means the Michigan nonprofit corporation named South Arbor Charter Academy which is established as a school of excellence pursuant to this Contract.
- (b) "Academy Board" means the Board of Directors of the Academy.
- (c) "Applicable Law" means all state and federal law applicable to a school of excellence.
- (d) "Application" means the school of excellence application and supporting documentation submitted to the University for the establishment of the Academy.
- (e) "Code" means the Revised School Code, Act No. 451 of the Public Acts of 1976, as amended, being Sections 380.1 to 380.1852 of the Michigan Compiled Laws.

- (f) "Contract" means, in addition to the definition set forth in the Code, these Terms and Conditions, the Conversion Resolution, the Method of Selection, Appointment, and Removal Resolution, the Schedules, the Educational Service Provider Policies, the Master Calendar and the Application.
- (g) "Director" means a person who is a member of the Academy Board of Directors.
- (h) "Educational Service Provider" or "ESP" means an educational management organization, or employee leasing company, as defined under section 553c of the Code, MCL 380.553c.
- (i) "Educational Service Provider Policies" means the Educational Service Provider Policies, as may be amended, issued by The Governor John Engler Center for Charter Schools at Central Michigan University.
- (j) "Management Agreement or ESP Agreement" means an agreement as defined under section 553c of the Code, MCL 380.553c.
- (k) "Master Calendar" means the Master Calendar of Reporting Requirements annually issued by The Governor John Engler Center for Charter Schools at Central Michigan University setting forth reporting and document submission requirements for the Academy.
- (l) "Method of Selection, Appointment, and Removal Resolution" means the policy adopted by resolution of the University Board on July 14, 2011, establishing the standard method of selection and appointment, length of term, removal and suspension, number of directors and qualifications of academy board members for schools of excellence issued a Contract by the University Board.
- (m) "Reauthorization Resolution" means the resolution adopted by the University Board on December 17, 2015, approving the issuance of a Contract to the Academy.
- (n) "Schedules" means the following Contract documents of the Academy: Schedule 1: Restated Articles of Incorporation, Schedule 2: Amended Bylaws, Schedule 3: Fiscal Agent Agreement, Schedule 4: Oversight, Compliance and Reporting Agreement, Schedule 5: Description of Staff Responsibilities, Schedule 6: Physical Plant Description, Schedule 7: Required Information for a School of Excellence, and Schedule 8: Information Available to the Public and the Center.
- (o) "State Board" means the State Board of Education, established pursuant to Article 8, Section 3 of the 1963 Michigan Constitution and MCL 388.1001 et seq.
- (p) "State School Aid Fund" means the State School Aid Fund established pursuant to Article IX, Section 11 of the Michigan Constitution of 1963, as amended.

- (q) "Terms and Conditions" means this document entitled "Terms and Conditions of Contract, Dated July 1, 2016, Issued by the Central Michigan University Board of Trustees Confirming the Status of South Arbor Charter Academy as a School of Excellence."
- (r) "The Governor John Engler Center for Charter Schools" or "The Center" means the office designated by the University Board as the initial point of contact for public school academy and school of excellence applicants and public school academies and schools of excellence authorized by the University Board. The Center is also responsible for administering the University Board's responsibilities with respect to the Contract.
- (s) "The Governor John Engler Center for Charter Schools Director" or "The Center Director" means the person designated at the University to administer the operations of The Center.
- (t) "University" means Central Michigan University, established pursuant to Article 8, sections 4 and 6 of the 1963 Michigan Constitution and MCL 390.551 et seq.
- (u) "University Board" means the Central Michigan University Board of Trustees.
- (v) "University Charter Schools Hearing Panel" or "Hearing Panel" means such persons as designated by the University President.
- (w) "University President" means the President of Central Michigan University or his or her designee. In section 1.1(v) above, "University President" means the President of Central Michigan University.

Section 1.2. Captions. The captions and headings used in this Contract are for convenience only and shall not be used in construing the provisions of this Contract.

Section 1.3. Gender and Number. The use of any gender in this Contract shall be deemed to be or include the other genders, including neuter, and the use of the singular shall be deemed to include the plural (and vice versa) wherever applicable.

Section 1.4. Statutory Definitions. Statutory terms defined in the Code shall have the same meaning in this Contract.

Section 1.5. Schedules. All Schedules to this Contract are incorporated into, and made part of, this Contract.

Section 1.6. Application. The Application submitted to the University Board for the establishment of the Academy is incorporated into, and made part of, this Contract. To the extent there is a difference between the Contract and the Application, the Contract shall control.

Section 1.7. Conflicting Contract Provisions. In the event that there is a conflict between language contained in the provisions of this Contract, the Contract shall be interpreted as follows:

(i) the Method of Selection, Appointment, and Removal Resolution shall control over any other conflicting language in the Contract; (ii) the Conversion Resolution shall control over any other conflicting language in the Contract with the exception of language in the Method of Selection, Appointment, and Removal Resolution; (iii) the Terms and Conditions shall control over any other conflicting language in the Contract with the exception of language in the Method of Selection, Appointment, and Removal Resolution and the Conversion Resolution; and (iv) the Restated Articles of Incorporation shall control over any other conflicting language in the Contract with the exception of language in the Method of Selection, Appointment, and Removal Resolution, Conversion Resolution and these Terms and Conditions.

ARTICLE II

RELATIONSHIP BETWEEN THE ACADEMY AND THE UNIVERSITY BOARD

Section 2.1. Constitutional Status of Central Michigan University. Central Michigan University is a constitutionally established body corporate operating as a state public university. In approving this Contract, the University Board voluntarily exercises additional powers given to the University Board to authorize schools of excellence. Nothing in this Contract shall be deemed to be any waiver of Central Michigan University's autonomy or powers and the Academy shall not be deemed to be a part of Central Michigan University.

Section 2.2. Independent Status of the Academy. The Academy is a body corporate and governmental entity authorized by the Code. It is organized and shall operate as a school of excellence and a nonprofit corporation. It is not a division or part of Central Michigan University. The relationship between the Academy and the University Board is based solely on the applicable provisions of the Code and the terms of this Contract or other agreements between the University Board and the Academy.

Section 2.3. Financial Obligations of the Academy Are Separate From the State of Michigan, University Board and the University. Any contract, mortgage, loan or other instrument of indebtedness entered into by the Academy and a third party shall not in any way constitute an obligation, either general, special, or moral, of the State of Michigan, the University Board, or the University. Neither the full faith and credit nor the taxing power of the State of Michigan or any agency of the State, nor the full faith and credit of the University Board or the University shall ever be pledged for the payment of any Academy contract, mortgage, loan or other instrument of indebtedness.

Section 2.4. Academy Has No Power To Obligate or Bind the State of Michigan, the University Board or the University. The Academy has no authority whatsoever to enter into any contract or other agreement that would financially obligate the State of Michigan, the University Board or the University, nor does the Academy have any authority whatsoever to make any representations to lenders or third parties, that the State of Michigan, the University Board or the University in any way guarantee, are financially obligated, or are in any way responsible for any contract, mortgage, loan or other instrument of indebtedness entered into by the Academy.

ARTICLE III

ROLE OF THE UNIVERSITY BOARD AS AUTHORIZING BODY

Section 3.1. University Board Resolutions. The University Board has adopted a policy by resolution, Method of Selection, Appointment, and Removal Resolution, providing for the method of selection and appointment, length of term, removal and suspension, number of Directors and the qualifications of Directors. The University Board has adopted a Conversion Resolution which approves the issuance of this Contract. The Conversion Resolution and the Method of Selection, Appointment, and Removal Resolution are hereby incorporated into this Contract. The University Board may, from time to time, amend the Method of Selection, Appointment, and Removal Resolution changing the method of selection, length of term, number of Directors and the qualifications of Directors. Any subsequent resolution of the University Board changing the Method of Selection, Appointment, and Removal Resolution shall automatically be incorporated into this Contract without the need for an amendment under Article IX of the Terms and Conditions.

Section 3.2. University Board as Fiscal Agent for the Academy. The University Board is the fiscal agent for the Academy. As fiscal agent, the University Board assumes no responsibility for the financial condition of the Academy. The University Board is not liable for any debt or liability incurred by or on behalf of the Academy Board, or for any expenditure approved by or on behalf of the Academy Board. Except as provided in the Oversight, Compliance and Reporting Agreement and Article X of these Terms and Conditions, the University Board shall promptly, within ten (10) business days of receipt, forward to the Academy all state school aid funds or other public or private funds received by the University Board for the benefit of the Academy. The responsibilities of the University Board, the State of Michigan, and the Academy are set forth in the Fiscal Agent Agreement incorporated herein as Schedule 3.

Section 3.3. Oversight Responsibilities of the University Board. The University Board has the responsibility to oversee the Academy's compliance with the Contract and all Applicable Law. The responsibilities of the Academy and the University Board are set forth in the Oversight, Compliance and Reporting Agreement and incorporated herein as Schedule 4.

Section 3.4. University Board Administrative Fee. The Academy shall pay the University Board an administrative fee to compensate the University Board for overseeing the Academy's compliance with the Contract and all Applicable Law.

Section 3.5. University Board Approval of Condemnation. In the event that the Academy desires to acquire property pursuant to the Uniform Condemnation Procedures Act or other applicable statutes, it shall obtain express written permission for such acquisition from the University Board. The Academy shall submit a written request to The Center describing the proposed acquisition and the purpose for which the Academy desires to acquire the property. Provided the Academy Board submits the written request to The Center at least sixty (60) days before the University Board's next regular meeting, the University Board may vote on whether to give express written permission for the acquisition at its next regular meeting.

Section 3.6. Authorization to Employ or Contract. The University Board authorizes the

Academy Board to employ or contract for personnel according to the position information outlined in Schedule 5. The Academy Board shall prohibit any individual from being employed by the Academy or an Educational Service Provider in more than one (1) full-time position and simultaneously being compensated at a full-time rate for each of these positions. An employee hired by the Academy shall be an employee of the Academy for all purposes and not an employee of the University for any purpose. With respect to Academy employees, the Academy shall have the power and responsibility to (i) select and engage employees; (ii) pay their wages, benefits, and applicable taxes; (iii) dismiss employees; and (iv) control the employees' conduct, including the method by which the employee carries out his or her work. The Academy Board shall be responsible for carrying workers' compensation insurance and unemployment insurance for its employees.

The Academy Board may contract with an Educational Service Provider to provide comprehensive educational, administrative, management, or instructional services or staff to the Academy. Before entering into a Management Agreement with an Educational Service Provider, the Academy Board shall first comply with the Educational Service Provider Policies issued by The Center. Any Management Agreement entered into by the Academy shall also comply with Section 11.2 and 12.10 of these Terms and Conditions. A copy of the Management Agreement between the Academy Board and the Educational Service Provider shall be incorporated into this Contract under Schedule 5 and in accordance with Article IX, as applicable.

Section 3.7. Teacher Certification and Teaching Methods. Except as otherwise provided by law, the Academy shall use certificated teachers according to state board rule. The Academy may use noncertificated individuals to teach as follows:

- (1) The Academy may use, as a classroom teacher in any grade, a faculty member who is employed full-time by the University and who has been granted institutional tenure, or has been designated as being on tenure track by the University.
- (2) In any other situation in which a school district is permitted under the Code to use noncertificated teachers.

The Academy may develop and implement new teaching techniques or methods or significant revisions to known teaching techniques or methods, and shall report those to The Center and state board to be made available to the public. The Academy may use any instructional technique or delivery method that may be used by a school district.

ARTICLE IV

REQUIREMENT THAT THE ACADEMY ACT SOLELY AS GOVERNMENTAL ENTITY

Section 4.1. Limitation on Actions in Performance of Governmental Functions. The Academy shall act exclusively as a governmental entity and shall not undertake any action inconsistent with its status as a body corporate authorized to receive state school aid funds pursuant

to Section 11 of Article IX of the State Constitution of 1963.

Section 4.2. Other Permitted Activities.

- (a) Nothing in this Contract shall prohibit the Academy from engaging in other lawful activities that are not in derogation of the Academy's status as a public school or that would not jeopardize the eligibility of the Academy for state school aid funds. Except as provided for the agreements identified below in paragraph (b) of this Section 4.2, the Academy may enter into agreements with other public schools, governmental units, businesses, community and nonprofit organizations where such agreements contribute to the effectiveness of the Academy or advance education in this state.
- (b) The Academy shall submit to The Center for prior review the following agreements:
 - (i) In accordance with The Center's Educational Service Provider Policies, as may be amended, a draft copy of any Educational Service Provider Management Agreement and any amendments to such Management Agreements;
 - (ii) In accordance with the Master Calendar, a draft copy of any Academy deed or lease, amendments to existing leases or any new leasing agreements for any Academy facility; and
 - (iii) In accordance with the Master Calendar, draft long-term or short-term financing closing documents and intercept requests.

Section 4.3. Academy Board Members Serve In Their Individual Capacity. All Directors of the Academy Board shall serve in their individual capacity, and not as a representative or designee of any other person or entity. A person who does not serve in their individual capacity, or who serves as a representative or designee of another person or entity, shall be deemed ineligible to continue to serve as a Director of the Academy Board. A Director who violates this section shall be removed from office, in accordance with the removal provisions found in the Method of Selection, Appointment and Removal Resolution and Contract Schedule 2: Amended Bylaws.

Section 4.4. Incompatible Public Offices and Conflicts of Interest Statutes. The Academy shall comply with the Incompatible Public Offices statute, being MCL 15.181 et seq. of the Michigan Compiled Laws, and the Contracts of Public Servants with Public Entities statute, being MCL 15.321 et seq. of the Michigan Compiled Laws. The Academy Board shall ensure compliance with Applicable Law relating to conflicts of interest. Notwithstanding any other provision of this Contract, the following shall be deemed prohibited conflicts of interest for purposes of this Contract:

- (a) An individual simultaneously serving as an Academy Board member and an owner, officer, director, employee or consultant of an educational service provider or an employee leasing company that has an agreement with the Academy;

- (b) An individual simultaneously serving as an Academy Board member and an Academy employee;
- (c) An individual simultaneously serving as an Academy Board member and an independent contractor to the Academy;
- (d) An individual simultaneously serving as an Academy Board member and a member of the governing board of another public school; and
- (e) An individual simultaneously serving as an Academy Board member and a University official, employee, or paid consultant, as a representative of the University.

Section 4.5. Prohibition of Identified Family Relationships. The Academy Board shall prohibit specifically identified family relationships pursuant to applicable law and the Terms and Conditions of this Contract. Notwithstanding any other provision of this Contract, the following shall be deemed prohibited familial relationships for the purposes of this Contract:

- (a) No person shall be appointed or reappointed to serve as an Academy Board member if the person's mother, mother-in-law, father, father-in-law, son, son-in-law, daughter, daughter-in-law, sister, sister-in-law, brother, brother-in-law, spouse or same-sex domestic partner:
 - (i) Is employed by the Academy;
 - (ii) Works at or is assigned to the Academy; or
 - (iii) Has an ownership, officer, policymaking, managerial, administrative non-clerical, or other significant role with the Academy's educational service provider or employee leasing company.

Section 4.6. Oath of Public Office. Before entering upon the duties of a public school board member, each Academy Board member shall take the constitutional oath of office as required by the Code and as set forth in the Method of Selection, Appointment and Removal Resolution.

ARTICLE V CORPORATE STRUCTURE OF THE ACADEMY

Section 5.1. Nonprofit Corporation. The Academy shall be organized and operate as a school of excellence corporation organized under the Michigan Nonprofit Corporation Act, as amended, Act No. 162 of the Public Acts of 1982, being Sections 450.2101 to 450.3192 of the Michigan Compiled Laws. Notwithstanding any provision of the Michigan Nonprofit Corporation Act, as amended, the Academy shall not take any action inconsistent with the provisions of Part 6E of the Code or other Applicable Law.

Section 5.2. Articles of Incorporation. The Restated Articles of Incorporation of the

Terms and Conditions - 11 South Arbor Charter Academy

Academy, as set forth in Schedule 1, shall be the Articles of Incorporation of the Academy.

Section 5.3. Bylaws. The Amended Bylaws of the Academy, as set forth in Schedule 2, shall be the Bylaws of the Academy.

ARTICLE VI OPERATING REQUIREMENTS

Section 6.1. Governance Structure. The Academy shall be organized and administered under the direction of the Academy Board and pursuant to the Governance Structure as set forth in Schedule 7a. The Academy shall have four officers: President, Vice-President, Secretary and Treasurer. The officer positions shall be filled by persons who are members of the Academy Board. A description of their duties is included in Schedule 2.

Section 6.2. Educational Goal and Related Measures. The Academy shall achieve or demonstrate measurable progress toward the achievement of the educational goal and related measures identified in Schedule 7b and the results of the academic assessments identified in Schedule 7e. Upon request, the Academy shall provide The Center with a written report, along with supporting data, assessing the Academy's progress toward achieving this goal.

Section 6.3. Educational Programs. The Academy shall implement, deliver and support the educational programs identified in Schedule 7c.

Section 6.4. Curriculum. The Academy shall implement, deliver and support the curriculum identified in Schedule 7d.

Section 6.5. Methods of Pupil Assessment. The Academy shall properly administer the academic assessments identified in Schedule 7e and in accordance with the requirements detailed in the Master Calendar annually issued by The Center. The Academy shall provide The Center direct access to the results of these assessments, along with any other measures of academic achievement reasonably requested by The Center.

Section 6.6. Application and Enrollment of Students. The Academy shall comply with the application and enrollment requirements identified in Schedule 7f.

Section 6.7. School Calendar and School Day Schedule. The Academy shall comply with the school calendar and school day schedule requirements as set forth in Schedule 7g.

Section 6.8. Age or Grade Range of Pupils. The Academy shall comply with the age or grade ranges as stated in Schedule 7h.

Section 6.9. Collective Bargaining Agreements. Collective bargaining agreements, if any, with employees of the Academy shall be the responsibility of the Academy.

Section 6.10. Accounting Standards. The Academy shall at all times comply with

generally accepted public sector accounting principles, and accounting system requirements that comply with the State School Aid Act of 1979, as amended, the Uniform Budgeting and Accounting Act, MCL 141.421', *et seq.*, and applicable State Board and Michigan Department of Education rules.

Section 6.11. Annual Financial Statement Audit. The Academy shall conduct an annual financial statement audit prepared and reviewed by an independent certified public accountant. The Academy shall submit the annual financial statement audit and auditor's management letter to The Center in accordance with the Master Calendar. The Academy Board shall provide to The Center a copy of any responses to the auditor's management letter in accordance with the Master Calendar.

Section 6.12. Address and Description of Physical Plant. The address and description of the physical plant for the Academy is set forth in Schedule 6. With the approval of the University Board, the Academy Board may operate the same configuration of age or grade levels at more than one (1) site if each configuration of age or grade levels and each site identified in Schedule 6 are under the direction and control of the Academy Board. University Board consideration regarding requests to add additional site(s) shall include, but not be limited to, the Academy Board's demonstration that it meets all statutory requirements under the Code.

Section 6.13. Contributions and Fund Raising. The Academy may solicit and receive contributions and donations as permitted by law. No solicitation shall indicate that a contribution to the Academy is for the benefit of Central Michigan University.

Section 6.14. Disqualified Organizational or Contractual Affiliations. The Academy shall comply with all state and federal law applicable to public schools concerning church-state issues. To the extent disqualified under the state or federal constitutions, the Academy shall not be organized by a church or other religious organization and shall not have any organizational or contractual affiliation with or constitute a church or other religious organization. Nothing in this Section shall be deemed to diminish or enlarge the civil and political rights, privileges and capacities of any person on account of his or her religious belief.

Section 6.15. Method for Monitoring Academy's Compliance with Applicable Law and its Targeted Educational Outcomes. The Academy shall perform the compliance certification duties required by the University Board as outlined in the Oversight, Compliance and Reporting Agreement set forth as Schedule 4. In addition to the University Board's oversight responsibilities and other Academy compliance and reporting requirements set forth in this Contract, the Academy's compliance with the annual Master Calendar shall serve as one means by which the University will monitor the Academy's compliance with Applicable Law.

Section 6.16. Matriculation Agreements. Before the Academy Board approves a matriculation agreement with another public school, the Academy shall provide a draft copy of the agreement to The Center for review. Any matriculation agreement entered into by the Academy shall be added to the Schedules through a contract amendment approved in accordance with the Contract. Until the matriculation agreement is incorporated into the Contract, the Academy is

prohibited from granting an enrollment priority to any student pursuant to that matriculation agreement.

ARTICLE VII TUITION PROHIBITED

Section 7.1. Tuition Prohibited; Fees and Expenses. The Academy shall not charge tuition. The Academy may impose fees and require payment of expenses for activities of the Academy where such fees and payments are not prohibited by law.

ARTICLE VIII COMPLIANCE WITH STATE AND FEDERAL LAWS

Section 8.1. State Laws. The Academy shall comply with applicable state laws. Nothing in this Contract shall be deemed to apply any other state law to the Academy.

Section 8.2. Federal Laws. The Academy shall comply with applicable federal laws. Nothing in this Contract shall be deemed to apply any other federal law to the Academy.

ARTICLE IX AMENDMENT

Section 9.1. Amendments. The University Board and the Academy acknowledge that the operation and administration of a school of excellence and the improvement of educational outcomes over time will require appropriate amendment of this Contract. In order to assure a proper balance between the need for independent development of the Academy and the statutory responsibilities of the University Board as an authorizing body, the parties have established a flexible process for amending this Contract.

Section 9.2. Process for Amendment Initiated by the Academy. The Academy, by a majority vote of its Board of Directors, may, at any time, propose specific changes in this Contract or may propose a meeting to discuss potential revision of this Contract. The proposal will be made to the University Board through its designee. The University Board delegates to The Center Director the review and approval of changes or amendments to this Contract. In the event that a proposed change is not accepted by The Center Director, the University Board may consider and vote upon a change proposed by the Academy following an opportunity for a presentation to the University Board by the Academy.

Section 9.3. Process for Amendment Initiated by the University Board. The University Board, or an authorized designee, may, at any time, propose specific changes in this Contract or may propose a meeting to discuss potential revision of this Contract. The University Board delegates to The Center Director the review and approval of changes or amendments to this

Contract. The Academy Board may delegate to a Director of the Academy the review and negotiation of changes or amendments to this Contract. The Contract shall be amended as requested by the University Board upon a majority vote of the Academy Board.

Section 9.4. Final Approval of Amendments. Amendments to this Contract take effect only after they have been approved by the Academy Board and by the University Board or The Center Director. If the proposed amendment conflicts with any of the University Board's general policies on public school academies, the proposed amendment shall take effect only after approval by the Academy Board and the University Board.

Section 9.5. Change in Existing Law. If, after the effective date of this Contract, there is a change in Applicable Law which alters or amends the responsibilities and obligations of either the Academy or the University Board, this Contract shall be altered or amended to reflect the change in existing law as of the effective date of such change. To the extent possible, the responsibilities and obligations of the Academy and the University Board shall conform to and be carried out in accordance with the change in Applicable Law.

ARTICLE X

CONTRACT REVOCATION, TERMINATION, AND SUSPENSION

Section 10.1. Statutory Grounds for Revocation. In addition to the other grounds for revocation in Section 10.2 and the automatic revocation in Section 10.3 of these Terms and Conditions, the University Board may revoke this Contract, pursuant to the procedures set forth in Section 10.7, upon a determination that one or more of the following has occurred:

- (a) Failure of the Academy to demonstrate improved pupil academic achievement for all groups of pupils or abide by and meet the educational goals and related measures set forth in this Contract;
- (b) Failure of the Academy to comply with all Applicable Law;
- (c) Failure of the Academy to meet generally accepted public sector accounting principles and to demonstrate sound fiscal stewardship; or
- (d) The existence of one or more other grounds for revocation as specified in this Contract.

Section 10.2. Other Grounds for Revocation. In addition to the statutory grounds for revocation set forth in Section 10.1 and the grounds for an automatic revocation set forth in Section 10.3, the University Board may revoke this Contract, pursuant to the procedures set forth in Section 10.7, upon a determination that one or more of the following has occurred:

- (a) The Academy fails to achieve or demonstrate measurable progress toward achieving the educational goals and related measures identified in this Contract;
- (b) The Academy fails to properly implement, consistently deliver, and support the educational programs or curriculum identified in this Contract;
- (c) The Academy is insolvent, has been adjudged bankrupt, or has operated for two or more school fiscal years with a fund balance deficit;
- (d) The Academy has insufficient enrollment to successfully operate a school of excellence, or the Academy has lost more than fifty percent (50%) of its student enrollment from the previous school year;
- (e) The Academy fails to fulfill the compliance and reporting requirements or defaults in any of the terms, conditions, promises or representations contained in or incorporated into this Contract;
- (f) The Academy files amendments to its Articles of Incorporation with the Michigan Department of Licensing and Regulatory Affairs, Bureau of Commercial Services without first obtaining The Center's approval;
- (g) The Center Director discovers grossly negligent, fraudulent or criminal conduct by the Academy's applicant(s), directors, officers, employees or agents in relation to their performance under this Contract; or
- (h) The Academy's applicant(s), directors, officers, employees or agents have provided false or misleading information or documentation to The Center in connection with the University Board's approval of the Application, the issuance of this Contract, or the Academy's reporting requirements under this Contract or Applicable Law.

Section 10.3. Automatic Amendment or Revocation and Procedures Initiated by State of Michigan. If the University is notified by the Superintendent of Public Instruction that the Academy is subject to closure under the Code ("State's Automatic Closure Notice"), and the Academy is currently not undergoing a reconstitution as part of a Plan of Correction developed under Section 10.7(c), then this Contract shall automatically be amended to eliminate the Academy's authority to operate certain age and grade levels at the site or sites identified in the State's Automatic Closure Notice at the end of the current fiscal year. If the State's Automatic Closure Notice includes all of the Academy's existing sites, then this Contract shall automatically be revoked at the end of the current fiscal year in which the notice is received without any further action of the University Board or the Academy. The University Board's revocation procedures set forth in Section 10.7(c) do not apply to an automatic revocation initiated by the State.

Following the receipt of the State's Automatic Closure Notice, The Center Director shall forward a copy of the State's Automatic Closure Notice to the Academy Board and may request a meeting with the Academy to discuss plans and procedures for the elimination of certain age or grade levels at the identified site or sites, or if all of the Academy's existing sites are included in the State's Automatic Closure Notice, then wind-up and dissolution of the Academy corporation

at the end of the fiscal year in which the notice was received. All Academy inquiries and requests for reconsideration of the State's Automatic Revocation Notice shall be directed to the Superintendent of Public Instruction, in a form and manner determined by that office or the Michigan Department of Education.

Section 10.4. Material Breach of Contract and Automatic Termination Caused by Placement of Academy in State School Reform/Redesign School District. The issuance of an order by the Superintendent of Public Instruction, pursuant to the Code, placing the Academy under the supervision of the State School Reform/Redesign Officer, shall constitute a material breach of this Contract. Following the issuance of the order, The Center Director shall send notice to the Academy Board of the material breach of this Contract. The Academy shall develop a corrective action plan that is acceptable to The Center Director, which may remedy the material breach. In addition to other matters, the corrective action plan shall include the Academy's redesign plan pursuant to the Code. The development of a corrective action plan under this Section 10.4 shall not in any way limit the rights of the University Board to revoke, suspend, or terminate this Contract. Placement in the State School Reform/Redesign School District pursuant to the Code may result in the University Board terminating this Contract at the end of the current fiscal year in which the Academy was placed in the State School Reform/Redesign School District. If this Contract is terminated pursuant to this Section 10.4, the revocation procedures in Section 10.7 shall not apply.

Section 10.5. Grounds and Procedures for Academy Termination of Contract. The Academy Board, by majority vote of its Directors, may, at any time and for any reason, request termination of this Contract. The Academy Board's request for termination shall be made to The Center Director not less than ten (10) calendar months in advance of the Academy's proposed effective date of termination. Upon receipt of an Academy request for termination, The Center Director shall present the Academy Board's request for termination to the University Board. A copy of the Academy Board's resolution approving of the Contract termination, including a summary of the reasons for terminating the Contract, shall be included with the Academy Board's request for termination. Upon receipt of the Academy Board's request for termination, the University Board shall consider and vote on the proposed termination request. The University Board may, in its sole discretion, waive the ten (10) month advance notice requirement for terminating this Contract.

Section 10.6. Grounds and Procedures for University Termination of Contract. The University Board, in its sole discretion, reserves the right to terminate the Contract for any reason or for no reason provided that such termination shall not take place less than ten (10) months from the date of the University Board's action. The Center Director shall provide notice of the termination to the Academy. If during the period between the University Board action to terminate and the effective date of termination, the Academy has violated the Contract or Applicable Law, the Contract may be revoked or suspended sooner pursuant to this Article X. Following issuance of this Contract, if there is a change in Applicable Law that the University Board, in its sole discretion, determines impairs its rights and obligations under the Contract or requires the University Board to make changes in the Contract that are not in the best interest of the University Board or the University, then the University Board may terminate the Contract at the end of the Academy's fiscal year in which the University Board's decision to terminate is adopted. If this Contract is terminated pursuant to this Section 10.6, the revocation procedures in

Section 10.7 shall not apply.

Section 10.7. University Board Procedures for Revoking Contract. Except for the automatic revocation and procedures initiated by the State of Michigan set forth in Section 10.3, the University Board's process for revoking the Contract is as follows:

- (a) Notice of Intent to Revoke. The Center Director, upon reasonable belief that grounds for revocation of the Contract exist, shall notify the Academy Board of such grounds by issuing the Academy Board a Notice of Intent to Revoke for non-compliance with the Contract or Applicable Law. The Notice of Intent to Revoke shall be in writing and shall set forth in sufficient detail the alleged grounds for revocation.
- (b) Academy Board's Response. Within thirty (30) days of receipt of the Notice of Intent to Revoke, the Academy Board shall respond in writing to the alleged grounds for revocation. The Academy Board's response shall be addressed to The Center Director, and shall either admit or deny the allegations of non-compliance. If the Academy's response includes admissions of non-compliance with the Contract or Applicable Law, the Academy Board's response must also contain a description of the Academy Board's plan and time line for correcting the non-compliance with the Contract or Applicable Law. If the Academy's response includes a denial of non-compliance with the Contract or Applicable Law, the Academy's response shall include sufficient documentation or other evidence to support a denial of non-compliance with the Contract or Applicable Law. A response not in compliance with this Section shall be deemed to be non-responsive. As part of its response, the Academy Board may request that a meeting be scheduled with The Center Director prior to a review of the Academy Board's response.
- (c) Plan of Correction. Within fifteen (15) days of receipt of the Academy Board's response or after a meeting with Academy Board representatives, The Center Director shall review the Academy Board's response and determine whether a reasonable plan for correcting the deficiencies can be formulated. If The Center Director determines that a reasonable plan for correcting the deficiencies set forth in the Notice of Intent to Revoke can be formulated, The Center Director shall develop a plan for correcting the non-compliance ("Plan of Correction") which may include Reconstitution per 10.7(d) of these Terms and Conditions. In developing a Plan of Correction, The Center Director is permitted to adopt, modify or reject some or all of the Academy Board's response for correcting the deficiencies outlined in the Notice of Intent to Revoke. The Notice of Intent to Revoke shall be closed if The Center Director determines any of the following: (i) the Academy Board's denial of non-compliance is persuasive; (ii) the non-compliance set forth in the Notice of Intent to Revoke has been corrected by the Academy Board; or (iii) the Academy Board has successfully completed the Plan of Correction.
- (d) University Board's Contract Reconstitution Provision. The Center Director may reconstitute the Academy in an effort to improve student educational performance or to avoid interruption of the educational process. Reconstitution may include, but is not limited to, one of the following actions: (i) removal of 1 or more members of the

- Academy Board; (ii) termination of at-will board appointments of 1 or more Academy Board members in accordance with the *Method of Selection, Appointment and Removal Resolution*; (iii) withdrawing approval of a contract under Section 506 of the Code; or (iv) the appointment of a new Academy Board of Directors or a trustee to take over operations of the Academy. If the Academy is at risk for closure under Part 6a of the Code, then the Center shall notify the Superintendent of Public Instruction of any Plan of Correction that includes a reconstitution of the Academy to ensure that the Academy is not included on the list of school buildings subject to automatic closure under the Code.
- (e) Request for Revocation Hearing. The Center Director may initiate a revocation hearing before the University Charter Schools Hearing Panel if The Center Director determines that any of the following has occurred:
- (i) the Academy Board has failed to respond to the Notice of Intent to Revoke as set forth in Section 10.7(b);
 - (ii) the Academy Board's response to the Notice of Intent to Revoke is non-responsive;
 - (iii) the Academy Board's response admits violations of the Contract or Applicable Law which The Center Director deems cannot be remedied or cannot be remedied in an appropriate period of time, or for which The Center Director determines that a Plan of Correction cannot be formulated;
 - (iv) the Academy Board's response contains denials that are not supported by sufficient documentation or other evidence showing compliance with the Contract or Applicable Law;
 - (v) the Academy Board has not complied with part or all of a Plan of Correction established in Section 10.7(c);
 - (vi) the Academy Board has engaged in actions that jeopardize the financial or educational integrity of the Academy; or
 - (vii) the Academy Board has been issued multiple or repeated Notices of Intent to Revoke.

The Center Director shall send a copy of the request for revocation hearing to the Academy Board at the same time the request is sent to the Hearing Panel. The request for revocation shall identify the reasons for revoking the Contract.

- (f) Hearing before the University Charter Schools Hearing Panel. Within thirty (30) days of receipt of a request for revocation hearing, the Hearing Panel shall convene a revocation hearing. The Hearing Panel shall provide a copy of the notice of hearing to The Center and the Academy Board at least ten (10) days before the hearing. The purpose of the Hearing Panel is to gather facts surrounding The Center Director's request for Contract

revocation, and to make a recommendation to the University Board on whether the Contract should be revoked. The revocation hearing shall be held at a location, date and time as determined by The Center Director and shall not last more than three hours. The hearing shall be transcribed and the cost shall be divided equally between the University and the Academy. The Center Director or his or her designee, and the Academy Board or its designee, shall each have equal time to make their presentation to the Hearing Panel. Although each party is permitted to submit affidavits and exhibits in support of their positions, the Hearing Panel will not hear testimony from any witnesses for either side. The Hearing Panel may, however, question The Center Director and the Academy Board. Within thirty (30) days of the revocation hearing, the Hearing Panel shall make a recommendation to the University Board concerning the revocation of the Contract. For good cause, the Hearing Panel may extend any time deadline set forth in this subsection. A copy of the Hearing Panel's recommendation shall be provided to The Center and the Academy Board at the same time that the recommendation is sent to the University Board.

- (g) University Board Decision. If the Hearing Panel's recommendation is submitted to the University Board at least fourteen (14) days before the University Board's next regular meeting, the University Board shall consider the Hearing Panel's recommendation at its next regular meeting and vote on whether to revoke the Contract. The University Board reserves the right to modify, reject or approve all or any part of the Hearing Panel's recommendation. The University Board shall have available to it copies of the Hearing Panel's recommendation and the transcript from the hearing. The University Board may waive the fourteen (14) day submission requirement or hold a special board meeting to consider the Hearing Panel's recommendation. A copy of the University Board's decision shall be provided to The Center, the Academy Board and the Michigan Department of Education.
- (h) Effective Date of Revocation. If the University Board votes to revoke the Contract, the revocation shall be effective on the date of the University Board's act of revocation, or at a later date as determined by the University Board.
- (i) Disposition of State School Aid Funds. Notwithstanding any other provision of the Contract, any state school aid funds received by the University Board after a recommendation is made by the Hearing Panel to revoke the Contract, or a decision by the University Board to revoke the Contract, may be withheld by the University Board or returned to the Michigan Department of Treasury upon request.

Section 10.8. Contract Suspension. The University Board's process for suspending the Contract is as follows:

- (a) The Center Director Action. If The Center Director determines, in his or her sole discretion, that certain conditions or circumstances exist such that the Academy Board
 - (i) has placed staff or students at risk;
 - (ii) is not properly exercising its fiduciary obligations to protect and preserve the Academy's public funds and property;

- (iii) has lost its right to occupancy of the physical facilities described in Schedule 6, and cannot find another suitable physical facility for the Academy prior to the expiration or termination of its right to occupy its existing physical facilities;
 - (iv) has failed to secure or has lost the necessary fire, health, and safety approvals as required by Schedule 6;
 - (v) has willfully or intentionally violated this Contract or Applicable Law; or
 - (vi) has violated Section 10.2(h) or (i), then The Center Director may immediately suspend the Contract, pending completion of the procedures set forth in Section 10.7. A copy of the suspension notice, setting forth the grounds for suspension, shall be sent to the Academy Board and to the Hearing Panel. If this subsection is implemented, the notice and hearing procedures set forth in Section 10.7 shall be expedited as much as possible.
- (b) Disposition of State School Aid Funds. Notwithstanding any other provision of the Contract, any state school aid funds received by the University Board after a decision by The Center Director to suspend the Contract, shall be retained by the University Board for the Academy until the Contract is reinstated, or shall be returned to the Michigan Department of Treasury upon the State's request.
- (c) Immediate Revocation Proceeding. If the Academy Board, after receiving a notice of Contract suspension from The Center Director, continues to engage in conduct or activities that are covered by the suspension notice, the Hearing Panel may immediately convene a revocation hearing in accordance with the procedures set forth in section 10.7(e) of this Contract. The Hearing Panel has the authority to accelerate the time line for revoking the Contract, provided that notice of the revocation hearing shall be provided to The Center and the Academy Board at least five (5) days before the hearing. If the Hearing Panel determines that the Academy Board has continued to engage in conduct or activities that are covered by the suspension notice, the Hearing Panel may recommend revocation of the Contract. The University Board shall proceed to consider the Hearing Panel's recommendation in accordance with sections 10.7(f) through (h).

ARTICLE XI

PROVISIONS RELATING TO SCHOOLS OF EXCELLENCE

Section 11.1. The Academy Budget. The Academy Board is responsible for establishing, approving, and amending an annual budget in accordance with the Uniform Budgeting and Accounting Act, MCL 141.421, *et seq.* The Academy Board shall submit to The Center a copy of its annual budget for the upcoming fiscal year in accordance with the Master Calendar. The budget must detail budgeted expenditures at the object level as described in the Michigan Department of Education's Michigan School Accounting Manual. In addition, the Academy Board is responsible for approving all revisions and amendments to the annual budget. In

accordance with the Master Calendar, revisions or amendments to the Academy's budget shall be submitted to The Center following Academy Board approval.

Section 11.2. Insurance. The Academy Board shall secure and maintain in its own name, as the "first named insured," insurance coverage as required by the University's insurance carrier.

The insurance must be obtained from a licensed mutual, stock, or other responsible company licensed to do business in the State of Michigan. The Academy may join with other schools of excellence to obtain insurance if the Academy Board finds that such an association provides economic advantages to the Academy, provided that each Academy maintains its identity as first named insured. The Academy shall list the University on the insurance policies as an additional insured as required by the University's insurance carrier. The coverage provided to the University as an additional covered person or organization will be primary and non-contributory with the University's insurance carrier. The Academy shall have a provision included in all policies requiring notice to the University, at least thirty (30) days in advance, upon termination or non-renewal of the policy for any reason other than nonpayment which would require a ten (10) day advance notice to the University. In addition, the Academy shall provide The Center copies of all insurance policies required by this Contract.

When changing insurance programs or carriers, the Academy must provide copies of the proposed policies to The Center at least thirty (30) days prior to the proposed change. The Academy shall not cancel or change its existing carrier without the prior review of The Center.

The University's insurance carrier periodically reviews the types and amounts of insurance coverage that the Academy must secure in order for the University to maintain insurance coverage for the authorization and oversight of the Academy. In the event that the University's insurance carrier requests additional changes in coverage identified in this Section 11.2, the Academy agrees to comply with any additional changes in the types and amounts of coverage requested by the University's insurance carrier within thirty (30) days after notice of the insurance coverage change.

The Academy may expend funds for payment of the cost of participation in an accident or medical insurance program to insure protection for pupils while attending school or participating in a school program or activity. Other insurance policies and higher minimums may be required depending upon academic offerings and program requirements.

Pursuant to Section 3.6 of these Terms and Conditions, the University requires that any educational service provider or employee leasing company that enters into a contract with the Academy must obtain insurance coverage similar to the insurance coverage that is currently required for the Academy. Accordingly, any agreement between the Academy and an educational service provider or employee leasing company shall contain a provision requiring the educational service provider or employee leasing company to comply with the coverage requirements recommended by the University's insurance carrier. Furthermore, the agreement between the educational service provider or employee leasing company and the Academy shall contain a provision stating that "in the event that the University's insurance carrier recommends any change in coverage by the educational service provider or employee leasing company, the educational service provider or employee leasing company agrees to comply with any changes in the type and

amount of coverage as requested by the University or the University's insurance carrier within thirty (30) days after notice of the insurance coverage change."

Section 11.3. Legal Liabilities and Covenant Against Suit. The Academy acknowledges and agrees that it has no authority to extend the faith and credit of the University or to enter into a contract that would bind the University. The Academy also is limited in its authority to contract by the amount of funds obtained from the state school aid fund, as provided hereunder, or from other independent sources. The Academy hereby covenants not to sue the University Board, the University or any of its Trustees, officers, employees, agents or representatives for any matters that arise under this Contract. The University does not assume any obligation with respect to any director, employee, agent, parent, guardian, student, or independent contractor of the Academy, and no such person shall have the right or standing to bring suit against the University Board, the University or any of its Trustees, employees, agents, or independent contractors as a result of the issuance, non-issuance, oversight, revocation, termination or suspension of this Contract.

Section 11.4. Lease or Deed for Proposed Site. The Academy shall provide to The Center copies of its proposed lease or deed for the premises in which the Academy shall operate. Following The Center's review, a copy of the Academy's lease or deed shall be incorporated into this Contract under Schedule 6 and in accordance with Article IX, as applicable.

Section 11.5. Certificate(s) of Use and Occupancy. The Academy Board shall: (i) ensure that the Academy's physical facilities comply with all fire, health and safety standards applicable to schools; and (ii) possess the necessary occupancy certificates for the Academy's physical facilities. The Academy Board shall not occupy or use any facility until approved for occupancy by the Michigan Department of Licensing and Regulatory Affairs, Bureau of Construction Codes. Copies of these Certificate(s) of Use and Occupancy shall be incorporated into this Contract under Schedule 6 and in accordance with Article IX, as applicable.

Section 11.6. Criminal Background and History Checks; Disclosure of Unprofessional Conduct. The Academy shall comply with section 1230 and 1230a of the Code concerning criminal background and criminal history checks for its teachers, school administrator(s), and for any other position requiring State Board approval. In addition, the Academy shall comply with section 1230b of the Code concerning the disclosure of unprofessional conduct by persons applying for Academy employment. This Section 11.6 shall apply to such persons irrespective of whether they are employed by the Academy or employed by another entity contracting with the Academy.

Section 11.7. Special Education. Pursuant to Section 1701a of the Code, the Academy shall comply with Article III, Part 29 of the Code, MCL 380.1701 et seq., concerning the provision of special education programs and services at the Academy as referenced in Contract Schedule 7c.

Section 11.8. Information Available to the Public and The Center.

(a) Information to be provided by the Academy. In accordance with Applicable Law, the Academy shall make information concerning its operation and management, including without limitation information in Schedule 8, available to the public and The Center.

- (b) Information to be provided by Educational Service Provider. The agreement between the Academy and the Educational Service Provider shall contain a provision requiring the Educational Service Provider to make information concerning the operation and management of the Academy, including the information in Schedule 8, available to the Academy as deemed necessary by the Academy Board in order to enable the Academy to fully satisfy its obligations under paragraph 11.8 (a) above.

ARTICLE XII GENERAL TERMS

Section 12.1. Notices. Any and all notices permitted or required to be given hereunder shall be deemed duly given: (i) upon actual delivery, if delivery is by hand; or (ii) upon receipt by the transmitting party of confirmation or answer back if delivery is by facsimile or electronic mail; or (iii) upon delivery into United States mail if delivery is by postage paid first class mail. Each such notice shall be sent to the respective party at the address indicated below or to any other address or person as the respective party may designate by notice delivered pursuant hereto:

If to the University Board: The Governor John Engler Center for Charter Schools
Attn: Executive Director
Central Michigan University
EHS 200
Mt. Pleasant, MI 48859

Mt. Pleasant, MI 48859

If to the Academy: Academy Board President
South Arbor Charter Academy
8200 Carpenter Road
Ypsilanti, MI 48197

Section 12.2. Severability. If any provision in this Contract is held to be invalid or unenforceable, it shall be ineffective only to the extent of the invalidity, without affecting or impairing the validity and enforceability of the remainder of the provision or the remaining provisions of this Contract. If any provision of this Contract shall be or become in violation of any local, state or federal law, such provision shall be considered null and void, and all other provisions shall remain in full force and effect.

Section 12.3. Successors and Assigns. The terms and provisions of this Contract are

binding on and shall inure to the benefit of the parties and their respective successors and permitted assigns.

Section 12.4. Entire Contract. Except as specifically provided in this Contract, this Contract sets forth the entire agreement between the University Board and the Academy with respect to the subject matter of this Contract. All prior contracts, representations, statements, negotiations, understandings, and undertakings are superseded by this Contract.

Section 12.5. Assignment. This Contract is not assignable by the Academy.

Section 12.6. Non-Waiver. Except as provided herein, no term or provision of this Contract shall be deemed waived and no breach or default shall be deemed excused, unless such waiver or consent shall be in writing and signed by the party claimed to have waived or consented. No consent by any party to, or waiver of, a breach or default by the other, whether expressed or implied, shall constitute consent to, waiver of, or excuse for any different or subsequent breach or default.

Section 12.7. Governing Law. This Contract shall be governed and controlled by the laws of the State of Michigan as to interpretation, enforcement, validity, construction, and effect, and in all other respects.

Section 12.8. Counterparts. This Contract may be executed in any number of counterparts. Each counterpart so executed shall be deemed an original, but all such counterparts shall together constitute one and the same instrument.

Section 12.9. Term of Contract. This Contract is for a fixed term and shall terminate at the end of the Contract term without any further action of either the University Board or the Academy. This Contract shall commence on the date first set forth above and shall remain in full force and effect for a period of ten (10) academic years and shall terminate on June 30, 2026, unless sooner revoked, terminated, or suspended pursuant to Article X of these Terms and Conditions. Prior to the end of the Contract term, the Academy may request to be considered for reauthorization. Pursuant to University Board policy, the standards by which the Academy may be considered for the issuance of a new contract will be guided by the following core questions:

Is the Academy's academic program successful?

Is the Academy's organization viable?

Is the Academy demonstrating good faith in following the terms of its charter and applicable law?

The Center shall establish the process and timeline for considering the Academy's reauthorization request. The standards for the issuance of a new Contract shall include increases in academic achievement for all groups of pupils as measured by assessments and other objective criteria established by the University Board as the most important factor of whether to issue or not issue a new Contract. Consistent with the Code, the University Board in its sole discretion may elect to issue or not issue a new contract to the Academy.

Section 12.10. Indemnification of University. As a condition to receiving a grant of authority from the University Board to operate a public school pursuant to the Terms and Conditions of this Contract, the Academy agrees to indemnify, defend and hold harmless the University Board, the University and its officers, employees, agents or representatives from and against all demands, claims, actions, suits, causes of action, losses, judgments, liabilities, damages, fines, penalties, forfeitures, or any other liabilities or losses of any kind whatsoever, including costs and expenses (not limited to reasonable attorney fees, expert and other professional fees) settlement and prosecution imposed upon or incurred by the University, and not caused by the sole negligence of the University, which arise out of or are in any manner connected with the University Board's approval of the school of excellence application, the University Board's consideration of or issuance of a Contract, the Academy's preparation for or operation of a public school, or which are incurred as a result of the reliance by the University Board, the University and its officers, employees, agents or representatives upon information supplied by the Academy, or which arise out of the Academy's failure to comply with this Contract or Applicable Law. The foregoing provision shall not be deemed a relinquishment or waiver of any kind of Section 7 of the Governmental Liability for Negligence Act, being Act No. 170, Public Acts of Michigan, 1964.

Section 12.11. Construction. This Contract shall be construed fairly as to both parties and not in favor of or against either party, regardless of which party prepared the Contract.

Section 12.12. Force Majeure. If any circumstances occur which are beyond the control of the parties, which delay or render impossible the obligations of one or both of the parties, the parties' obligations to perform such services shall be postponed for an equivalent period of time or shall be canceled, if such performance has been rendered impossible by such circumstances.

Section 12.13. No Third Party Rights. This Contract is made for the sole benefit of the Academy and the University Board. Except as otherwise expressly provided, nothing in this Contract shall create or be deemed to create a relationship between the parties hereto, or either of them, and any third person, including a relationship in the nature of a third party beneficiary or fiduciary.

Section 12.14. Non-agency. It is understood that the Academy is not the agent of the University.

Section 12.15. University Board or The Center's General Policies on Schools of Excellence Shall Apply. Notwithstanding any provision of this Contract to the contrary, and with the exception of existing University Board or The Center policies regarding public school academies which shall apply immediately, University Board or The Center general policies clarifying procedure and requirements applicable to schools of excellence under this Contract, as from time to time adopted or amended, will automatically apply to the Academy, provided they are not inconsistent with provisions of this Contract. Before issuing general policies under this section, the University Board or The Center shall provide a draft of the proposed policies to the Academy Board. The Academy Board shall have at least thirty (30) days to provide comment to The Center on the proposed policies before such policies shall become effective.

Section 12.16. Survival of Provisions. The terms, provisions, and representations

contained in Section 11.2, Section 11.3, Section 11.8, Section 12.10, Section 12.13 and any other provisions of this Contract that by their sense and context are intended to survive termination of this Contract shall survive.

Section 12.17. Termination of Responsibilities. Upon termination or revocation of the Contract, the University Board or its designee shall have no further obligations or responsibilities under this Contract to the Academy or any other person or persons in connection with this Contract.

As the designated representative of the Central Michigan University Board of Trustees, I hereby issue this Contract to the Academy on the date set forth above.

CENTRAL MICHIGAN UNIVERSITY BOARD OF TRUSTEES

By: *Sarah R. Opperman*
Sarah R. Opperman, Chair

Date: *June 20, 2016*

As the authorized representative of the Academy, I hereby certify that the Academy is able to comply with the Contract and all Applicable Law, and that the Academy, through its governing board, has approved and agreed to comply with and be bound by the terms and conditions of this Contract.

RESTATEMENT OF ARTICLES OF INCORPORATION
For Use by Domestic Nonprofit Corporations

OF

SOUTH ARBOR CHARTER ACADEMY

Pursuant to the provisions of the Michigan Nonprofit Corporation Act of 1982, as amended (the "Act"), being MCL 450.2101 et seq. and Part 6E of the Revised School Code (the "Code") as amended, being Sections 380.551 to 380.561 of the Michigan Compiled Laws, the undersigned corporation executes the following Articles:

ARTICLE I

The name of the corporation is: **South Arbor Charter Academy.**

The authorizing body for the corporation is: Central Michigan University Board of Trustees.

FC

ARTICLE II

The purpose or purposes for which the corporation is organized are:

1. The corporation is organized for the purpose of operating as a school of excellence in the state of Michigan pursuant to Part 6E of the Code, being Sections 380.551 to 380.561 of the Michigan Compiled Laws.

2. The corporation, including all activities incident to its purposes, shall at all times be conducted so as to be a governmental entity pursuant to Section 115 of the United States Internal Revenue Code ("IRC") or any successor law. Notwithstanding any other provision of these Articles, the corporation shall not carry on any other activity not permitted to be carried on by a governmental instrumentality exempt from federal income tax under Section 115 of the IRC or by a nonprofit corporation organized under the laws of the State of Michigan and subject to a Contract issued by the Central Michigan University Board of Trustees ("Contract") authorized under the Code.

ARTICLE III

The corporation is organized on a non-stock, directorship basis.

The value of assets which the corporation possesses is:

Real Property: \$10,125.02 (playground)

Personal Property: \$0.00

The corporation is to be financed under the following general plan:

- a. State school aid payments received pursuant to the State School Aid Act of 1979 or any successor law.
- b. Federal funds.
- c. Donations.
- d. Fees and charges permitted to be charged by schools of excellence.
- e. Other funds lawfully received.

ARTICLE IV

The address of the registered office is: ~~Law Office of LaRae G. Munk, P.C.~~, 1650 Sanctuary Circle, Howell, MI 48855.

The mailing address of the registered office is the same: Law Office of LaRae G. Munk, P.C. 1650 Sanctuary Circle, Howell, MI 48855.

The name of the resident agent at the registered office is: LaRae G. Munk

ARTICLE V

~~The name and address of the incorporator is as follows:~~

~~Edward Fadden
4294 Cordova Dr.
Milan, Michigan 48163~~

ARTICLE VI

The corporation is a governmental entity.

ARTICLE VII

The corporation and its incorporators, board members, officers, employees, and volunteers have governmental immunity as provided in section 7 of Act No. 170 of the Public Acts of 1964, being section 691.1407 of the Michigan Compiled Laws.

ARTICLE VIII

Before execution of a contract to charter a school of excellence between the corporation and Central Michigan University Board of Trustees (the "University Board"), the method of selection, length of term, and the number of members of the Board of Directors of the corporation shall be approved by a resolution of the University Board as required by the Code.

ARTICLE IX

The Board of Directors shall have all the powers and duties permitted by law to manage the business, property and affairs of the corporation.

ARTICLE X

The officers of the corporation shall be a President, Vice-President, Secretary and a Treasurer, each of whom shall be a member of the Board of Directors and shall be selected by the Board of Directors. The Board of Directors may select one or more assistants to the Secretary or Treasurer, and may also appoint such other agents as it may deem necessary for the transaction of the business of the corporation.

ARTICLE XI

No part of the net earnings of the corporation shall inure to the benefit of or be distributable to its board, directors, officers or other private persons, or organization organized and operated for a profit (except that the corporation shall be authorized and empowered to pay reasonable compensation for services rendered and to make payments and distributions in the furtherance of

the purposes set forth in Article II hereof). Notwithstanding any other provision of these Articles, the corporation shall not carry on any other activities not permitted to be carried on by a governmental entity exempt from federal income tax under section 115 of the IRC, or comparable provisions of any successor law.

To the extent permitted by law, upon the dissolution of the corporation, the board shall after paying or making provision for the payment of all of the liabilities of the corporation, dispose of all of the assets of the corporation to the University Board for forwarding to the state school aid fund established under article IX, section 11 of the Constitution of the State of Michigan of 1963, as amended.

ARTICLE XII

These Articles of Incorporation shall not be amended except by the process provided in Article IX of the Terms and Conditions incorporated as part of the Contract. This process is as follows:

The corporation, by a majority vote of its Board of Directors, may, at any time, propose specific changes to these Articles of Incorporation or may propose a meeting to discuss potential revision to these Articles of Incorporation. The proposal will be made to the University Board through its designee. The University Board delegates to the Director of The Center for Charter Schools ("The Center Director") the review and approval of changes or amendments to these Articles of Incorporation. In the event that a proposed change is not accepted by The Center Director, the University Board may consider and vote upon a change proposed by the corporation following an opportunity for a written and oral presentation to the University Board by the corporation.

At any time and for any reason, the University Board or an authorized designee may propose specific changes to these Articles of Incorporation or may propose a meeting to discuss potential revision. The corporation's Board of Directors may delegate to an officer of the corporation the review and negotiation of changes or amendments to these Articles of Incorporation. The Articles of Incorporation shall be amended as requested by the University Board or an authorized designee upon a majority vote of the corporation's Board of Directors.

Amendments to these Articles of Incorporation take effect only after they have been approved by the corporation's Board of Directors and by the University Board or The Center Director, and the amendments are filed with the Michigan Department of Licensing and Regulatory Affairs Bureau of Commercial Services. In addition, the corporation shall file with the amendment a copy of the University Board's or The Center Director's approval of the amendment.

ARTICLE XII

The definitions set forth in the Terms and Conditions incorporated as part of the Contract shall have the same meaning in these Restated Articles of Incorporation.

These Restated Articles of Incorporation were duly adopted on the 2nd day of June, 2011, in accordance with the provisions of Section 642 of the Act. These Restated Articles of Incorporation restate, integrate, and do further amend the provisions of the Articles of Incorporation, and were duly adopted by the directors at an open meeting. The necessary number of votes was cast in favor of these Restated Articles of Incorporation.

Signed this 2nd day of June, 2011.

CERTIFICATION	11

AMENDED BYLAWS
OF
SOUTH ARBOR CHARTER ACADEMY

ARTICLE I
NAME

This organization shall be called South Arbor Charter Academy (the "Academy" or the "corporation").

ARTICLE II
FORM OF ACADEMY

The Academy is organized as a non-profit, non-stock, directorship corporation.

ARTICLE III
OFFICES

Section 1. Principal Office. The principal office of the Academy shall be located in the State of Michigan.

Section 2. Registered Office. The registered office of the Academy may be the same as the principal office of the Academy, but in any event must be located in the State of Michigan, and be the business office of the resident agent, as required by the Michigan Non-Profit Corporation Act. Changes in the resident agent and registered address of the Academy must be reported to the Michigan Department of Licensing and Regulatory Affairs and to The Center for Charter Schools at Central Michigan University.

ARTICLE IV
BOARD OF DIRECTORS

Section 1. General Powers. The business, property and affairs of the Academy shall be managed by the Academy Board of Directors ("Academy Board"). The Academy Board may exercise any and all of the powers granted to it under the Michigan Non-Profit Corporation Act or pursuant to Part 6E of the Revised School Code ("Code"). The Academy Board may delegate such powers to the officers and committees of the Academy Board as it deems necessary, so long as such delegation is consistent with the Articles, these Bylaws, the Contract and Applicable Law.

Section 2. Method of Selection and Appointment. The Central Michigan University Board of Trustees ("University Board") shall prescribe the method of appointment for members of an

academy's board of directors. The Center Director is authorized to develop and administer an academy board selection and appointment process that includes an *Application for Public School Academy Board Appointment* and is in accord with these policies:

- a. The University Board shall appoint the initial and subsequent Academy Board by resolution, except as prescribed by subparagraph d. The Center Director shall recommend qualified individuals to the University Board.
- b. The Academy Board, by resolution and majority vote, shall nominate its subsequent members, except as provided otherwise. The Academy Board shall recommend to The Center Director at least one nominee for each vacancy. Nominees shall submit the *Application for Public School Academy Board Appointment* for review by The Center. The Center Director may or may not recommend the appointment of a nominee submitted by the academy board. If The Center Director does not recommend the appointment of a nominee submitted by the Academy Board, he/she may select and recommend another nominee or may request the Academy Board submit a new nominee for consideration.
- c. An individual appointed to fill a vacancy created other than by the expiration of a term shall be appointed for the unexpired term of that vacant position.
- d. Under exigent conditions, and with the approval of the University Board's chair and the president, The Center Director may appoint a qualified individual to an academy's board of directors. All appointments made under this provision must be presented to the University Board for final determination at its next regularly scheduled meeting. The University Board reserves the right to review, rescind, modify, ratify, or approve any appointments made under this provision.

Section 3. Length of Term. The Director of an Academy Board shall serve at the pleasure of the University Board. Terms of the initial positions of the Academy Board shall be staggered in accordance with *The Academy Board of Directors Table of Staggered Terms and Appointments* established and administered by The Center Director. Subsequent appointments shall be for a term of office not to exceed four (4) years, except as prescribed by *The Academy Board of Directors Table of Staggered Terms and Appointments*.

Section 4. Number of Director Positions. The number of director positions on the Academy Board shall not be less than five (5) nor more than nine (9) as determined by the University Board. If the Academy Board fails to maintain its full membership by making appropriate and timely nominations, The Center Director may deem that failure an exigent condition.

Section 5. Qualifications of Academy Board Members. To be qualified to serve on the Academy Board, a person shall, among other things: (a) be a citizen of the United States; (b) be a resident of the State of Michigan; (c) submit all materials requested by The Center including, but not limited to, the *Application for Public School Academy Board Appointment* which must

include authorization to process a criminal background check; and (d) annually submit a conflict of interest disclosure as prescribed by The Center.

The members of the Academy Board shall not include (a) employees of the academy; (b) any director, officer, or employee of a service provider or management company that contracts with the academy; (c) a Central Michigan University official or employee, as a representative of Central Michigan University.

Section 6. Oath of Public Office. All members of the Academy Board must take the constitutional oath of office and sign the *Oath of Public Office* before beginning their service. The *Oath of Public Office* shall be filed with The Center.

Section 7. Tenure. Each Academy Board Director shall hold office until the Director's replacement, death, resignation, removal or until the expiration of the term, whichever occurs first.

Section 8. Removal and Suspension. If the University Board determines that an Academy Board member's service in office is no longer necessary, then the University Board may remove an academy board member with or without cause and shall specify the date when the academy board member's service ends. An academy board member may also be removed from office for cause by a two-thirds (2/3) vote of the Academy's Board.

With the approval of the University Board's chair and the president, The Center Director may suspend an Academy Board member's service, if in his/her judgment the person's continued presence would constitute a risk to persons or property, or would seriously impair the operation of the Academy. Any suspension made under this provision must be presented to the University Board for final determination at its next regularly scheduled meeting. The University Board reserves the right to review, rescind, modify, ratify, or approve any suspensions made under this provision.

Section 9. Resignation. Any Director may resign at any time by providing written notice to the corporation or by communicating such intention (orally or in writing) to The Center. Notice of resignation will be effective upon receipt or at a subsequent time if designated in a written notice. A successor shall be appointed as provided in Section 2 of this Article.

Section 10. Board Vacancies. A Board of Director vacancy shall occur because of death, resignation, removal, failure to maintain residency in the State of Michigan, disqualification or as otherwise specified in the Code. Any vacancy shall be filled as provided in Section 2 of this Article.

Section 11. Compensation. A Director of the Academy shall serve as a volunteer Director. By resolution of the Academy Board, the Directors may be reimbursed for their reasonable expenses incident to their duties.

ARTICLE V MEETINGS

Section 1. Annual and Regular Meetings. The Academy Board shall hold an annual meeting each year. The Academy Board must provide, by resolution, the time and place, within the State of Michigan, for the holding of regular monthly meetings. The Academy Board shall provide notice of the annual and all regular meetings as required by the Open Meetings Act.

Section 2. Special Meetings. Special meetings of the Academy Board may be called by or at the request of any Director. The person or persons authorized to call special meetings of the Academy Board may fix the place within the State of Michigan for holding any special meeting of the Academy Board called by them, and, if no other place is fixed, the place of meeting shall be the principal business office of the corporation in the state of Michigan. The corporation shall provide notice of all special meetings as required by the Open Meetings Act.

Section 3. Notice; Waiver. The Academy Board must comply with the notice provisions of the Open Meetings Act. In addition, notice of any meeting shall be given to each Director stating the time and place of the meeting, delivered personally, mailed, sent by facsimile or electronic mail to the Director's business address. Any Director may waive notice of any meeting by written statement, facsimile or electronic mail sent by the Director, signed before or after the holding of the meeting. The attendance of a Director at a meeting constitutes a waiver of notice of such meeting, except where a Director attends a meeting for the express purpose of objecting to the transaction of any business because the meeting is not lawfully called or convened.

Section 4. Quorum. In order to legally transact business, the Academy Board shall have a quorum physically present at a duly called meeting of the Academy Board. A "quorum" shall be defined as follows:

<u># of Academy Board Positions</u>	<u># Required for Quorum</u>
Five (5)	Three (3)
Seven (7)	Four (4)
Nine (9)	Five (5)

Section 5. Manner of Acting. The act of the majority of the Directors present at a meeting at which a quorum is present shall be the act of the Academy Board. No member of the Board of Directors may vote by proxy, by way of a telephone conference or any other electronic means of communication.

Section 6. Open Meetings Act. All meetings of the Academy Board, shall at all times be in compliance with the Open Meetings Act.

Section 7. Presumption of Assent. A Director of the Academy Board who is present at a meeting of the Academy Board at which action on any corporate matter is taken shall be presumed to have assented to the action taken unless that Director's dissent shall be entered in the minutes of the meeting or unless that Director shall file a written dissent to such action with the person acting as the Secretary of the meeting before the adjournment thereof or shall forward such dissent by registered mail to the Secretary of the corporation immediately after the adjournment of the meeting. This right to dissent shall not apply to a Director who voted in favor of such action.

ARTICLE VI COMMITTEES

Section 1. Committees. The Academy Board, by resolution, may designate one or more committees. Each committee is to consist of one or more Directors selected by the Academy Board. As provided in the resolution as initially adopted, and as thereafter supplemented or amended by further resolution, the committees shall have such powers as delegated by the Academy Board, except (i) filling of vacancies in the officers of the Academy Board or committees created pursuant to this Section; (ii) amending the Articles of Incorporation or Bylaws; or (iii) any action the Academy Board cannot lawfully delegate under the Articles, Bylaws or Applicable Law. All committee meetings shall at all times be in compliance with the Open Meetings Act. Each committee shall fix its own rules governing the conduct of its activities and shall make such reports to the Academy Board of its activities as the Academy Board may request.

ARTICLE VII OFFICERS OF THE BOARD

Section 1. Number. The officers of the Academy shall be a President, Vice-President, Secretary, Treasurer, and such assistant Treasurers and assistant Secretaries as may be selected by the Academy Board.

Section 2. Election and Term of Office. The Academy Board shall elect the initial officers at its first duly noticed meeting. Thereafter, the officers of the Academy shall be elected annually by the Academy Board. If the election of officers is not held at the annual meeting, the election shall be held as soon thereafter as may be convenient. Each officer shall hold office while qualified or until the officer resigns or is removed in the manner provided in Section 3.

Section 3. Removal. Any officer or agent elected or appointed by the Academy Board may be removed by the Academy Board whenever in its judgment the best interests of the corporation would be served thereby.

Section 4. Vacancies. A vacancy in any office shall be filled by appointment by the Academy Board for the unexpired portion of the term.

Section 5. President. The President of the Academy shall be a member of the Academy Board. The President of the corporation shall preside at all meetings of the Academy

Board. If there is not a President, or if the President is absent, then the Vice-President shall preside. If the Vice-President is absent, then a temporary chair, chosen by the members of the Academy Board attending the meeting shall preside. The President shall, in general, perform all duties incident to the office of President of the Board as may be prescribed by the Academy Board from time to time.

Section 6. Vice-President. The Vice-President of the Academy shall be a member of the Academy Board. In the absence of the President or in the event of the President's death, inability or refusal to act, the Vice-President shall perform the duties of President, and when so acting, shall have all the powers of and be subject to all the restrictions upon the President. The Vice-President shall perform such other duties as from time to time may be assigned to the Vice-President by the President or by the Academy Board.

Section 7. Secretary. The Secretary of the Academy shall be a member of the Academy Board. The Secretary shall: (a) keep the minutes of the Academy Board meetings in one or more books provided for that purpose; (b) see that all notices, including those notices required under the Open Meetings Act, are duly given in accordance with the provisions of these Bylaws or as required by law; (c) be custodian of the corporate records and of the seal of the corporation and see that the seal of the corporation is affixed to all authorized documents; (d) keep a register of the post office address of each Director; and (e) perform all duties incident to the office of Secretary and other duties assigned by the President or the Academy Board.

Section 8. Treasurer. The Treasurer of the Academy shall be a member of the Academy Board. The Treasurer shall: (a) have charge and custody of and be responsible for all funds and securities of the corporation; (b) keep accurate books and records of corporate receipts and disbursements; (c) deposit all moneys and securities received by the corporation in such banks, trust companies or other depositories as shall be selected by the Board; (d) complete all required corporate filings; (e) assure that the responsibilities of the fiscal agent to the corporation are properly carried out; and (f) in general perform all of the duties incident to the office of Treasurer and such other duties as from time to time may be assigned by the President or by the Academy Board.

Section 9. Assistants and Acting Officers. The Assistants to the officers, if any, selected by the Academy Board, shall perform such duties and have such authority as shall from time to time be delegated or assigned to them by the Secretary or Treasurer or by the Academy Board. The Academy Board shall have the power to appoint any member of the Academy Board to perform the duties of an officer whenever, for any reason, it is impractical for such officer to act personally. Such acting officer so appointed shall have the powers of and be subject to all the restrictions upon the officer to whose office the acting officer is so appointed except as the Academy Board may by resolution otherwise determine.

Section 10. Salaries. Officers of the Board, as Directors of the corporation, may not be compensated for their services. By resolution of the Academy Board, officers may be reimbursed for reasonable expenses incident to their duties.

Section 11. Filling More Than One Office. Subject to the statute concerning the Incompatible Public Offices, Act No. 566 of the Public Acts of 1978, being Sections 15.181 to

15.185 of the Michigan Compiled Laws, any two offices of the corporation except those of President and Vice-President may be held by the same person, but no officer shall execute, acknowledge or verify any instrument in more than one capacity.

ARTICLE VIII

CONTRACTS, LOANS, CHECKS AND DEPOSITS; SPECIAL CORPORATE ACTS

Section 1. Contracts. The Academy Board may authorize any officer or officers, agent or agents, to enter into any contract, to execute and deliver any instrument, or to acknowledge any instrument required by law to be acknowledged in the name of and on behalf of the corporation. Such authority may be general or confined to specific instances, but the appointment of any person other than an officer to acknowledge an instrument required by law to be acknowledged should be made by instrument in writing. When the Academy Board authorizes the execution of a contract or of any other instrument in the name of and on behalf of the corporation, without specifying the executing officers, the President or Vice-President, and the Secretary or Treasurer may execute the same and may affix the corporate seal thereto. No contract entered into, by or on behalf of the Academy Board, shall in any way bind Central Michigan University or impose any liability on Central Michigan University, its trustees, officers, employees or agents.

Section 2. Loans. No loans shall be contracted on behalf of the Academy and no evidences of indebtedness shall be issued in its name unless authorized by a prior resolution of the Academy Board. Such authority shall be confined to specific instances. No loan, advance, overdraft or withdrawal by an officer or Director of the corporation, shall be made or permitted unless approved by the Academy Board. No loan entered into, by or on behalf of the Academy Board, shall in any way be considered a debt or obligation of Central Michigan University or impose any liability on Central Michigan University, its trustees, officers, employees or agents.

Section 3. Checks, Drafts, etc. All checks, drafts or other orders for the payment of money, notes or other evidences of indebtedness issued in the name of the Academy, shall be signed by such officer or officers of the corporation and in such manner as shall from time to time be determined by resolution of the Academy Board.

Section 4. Deposits. All funds of the Academy shall be deposited from time to time to the credit of the corporation in such banks, trust companies or other depositories as the Academy Board may select, provided that such financial institution is eligible to be a depository of surplus funds under Section 1221 of the Revised School Code, being Section 380.1221 of the Michigan Compiled Laws.

Section 5. Voting of Gifted, Bequested or Transferred Securities Owned by this Corporation. Subject always to the specific directions of the Academy Board, any shares or other securities issued by any other corporation and owned or controlled by this corporation may be voted at any meeting of security holders of such other corporation by the President of this corporation or by proxy appointed by the President, or in the absence of the President and the President's proxy, by the Secretary or Treasurer of this corporation or by proxy appointed by the Secretary or Treasurer. Such proxy or consent in respect to any shares or other securities issued

by any other corporation and owned by this corporation shall be executed in the name of this corporation by the President, the Secretary or the Treasurer of this corporation without necessity of any authorization by the Academy Board, affixation of corporate seal or countersignature or attestation by another officer. Any person or persons designated in the manner above stated as the proxy or proxies of this corporation shall have full right, power and authority to vote the shares or other securities issued by such other corporation and owned by this corporation the same as such shares or other securities might be voted by this corporation. This section shall in no way be interpreted to permit the corporation to invest any of its surplus funds in any shares or other securities issued by any other corporation. This section is intended to apply, however, to all gifts, bequests or other transfers of shares or other securities issued by any other corporation which are received by the corporation.

Section 6. Contracts Between Corporation and Related Persons. As required by Applicable Law, any Director, officer or employee of the Academy, who enters into a contract with the Academy, that meets the definition of contract under the statute on Contracts of Public Servants with Public Entities, Act No. 317 of the Public Acts of 1968, being sections 15.321 to 15.330 of the Michigan Compiled Laws, shall comply with the public disclosure requirements set forth in Section 3 of the statute.

The University Board authorizes the Academy Board to employ or contract for personnel according to the position information outlined in Schedule 5. However, the Academy Board shall prohibit any individual from being employed by the Academy, an educational service provider or an employee leasing company involved in the operation of the Academy, in more than one (1) full-time position and simultaneously being compensated at a full-time rate for each of these positions. An employee hired by the Academy shall be an employee of the Academy for all purposes and not an employee of the University for any purpose. With respect to Academy employees, the Academy shall have the power and responsibility to (i) select and engage employees; (ii) pay their wages, benefits, and applicable taxes; (iii) dismiss employees; and (iv) control the employees' conduct, including the method by which the employee carries out his or her work. The Academy Board shall be responsible for carrying workers' compensation insurance and unemployment insurance for its employees. The Academy Board may contract with an educational service provider or an employee leasing company to provide services or to provide personnel to perform services or work at the Academy. Before entering into an agreement with an educational service provider or an employee leasing company to perform services or to provide personnel to perform services or work at the Academy, the Academy Board must first comply with the Educational Service Provider Policies issued by The Center. A copy of the agreement between the Academy Board and the educational service provider or employee leasing company shall be included as part of Schedule 5.

The Academy shall comply with the Incompatible Public Offices statute, Act No. 566 of the Public Acts of 1978, being MCL 15.181 to 15.185 of the Michigan Compiled Laws, and the Contracts of Public Servants With Public Entities statute, Act No. 371 of the Public Acts of 1968, being MCL 15.321 to 15.330 of the Michigan Compiled Laws. The Academy Board shall ensure compliance with Applicable Law relating to conflicts of interest. The following shall be deemed prohibited conflicts of interest:

- (a) An individual simultaneously serving as an Academy Board member and an owner, officer, director, employee or consultant of an educational service provider or an employee leasing company that has an agreement with the Academy;
- (b) An individual simultaneously serving as an Academy Board member and an Academy employee;
- (c) An individual simultaneously serving as an Academy Board member and an independent contractor to the Academy;
- (d) An individual simultaneously serving as an Academy Board member and a member of the governing board of another public school; and
- (e) An individual simultaneously serving as an Academy Board member and a University official, employee, or paid consultant, as a representative of the University.

No person shall be appointed or reappointed to serve as an Academy Board member if the person's mother, mother-in-law, father, father-in-law, son, son-in-law, daughter, daughter-in-law, sister, sister-in-law, brother, brother-in-law, spouse or same-sex domestic partner:

- (a) Employed by the Academy;
- (b) Works at or is assigned to the Academy;
- (c) Has an ownership, officer, policymaking, managerial, administrative non-clerical or other significant role with the Academy's educational service provider or employee leasing company.

ARTICLE IX INDEMNIFICATION

To the extent permitted by Applicable Law, each person who is or was a Director, officer or member of a committee of the Academy and each person who serves or has served at the request of the Academy as a trustee, director, officer, partner, employee or agent of any other corporation, partnership, joint venture, trust or other enterprise, may be indemnified by the

Academy. The corporation may purchase and maintain insurance on behalf of any such person against any liability asserted against and incurred by such person in any such capacity or arising out of his status as such, whether or not the corporation would have power to indemnify such person against such liability under the preceding sentence. The corporation may, to the extent authorized from time to time by the Board, grant rights to indemnification to any employee or agent of the corporation.

ARTICLE X FISCAL YEAR

The fiscal year of the corporation shall begin on the first day of July in each year.

ARTICLE XI AMENDMENTS

These Amended Bylaws may be altered, amended or repealed and new Amended Bylaws may be adopted by obtaining (a) the affirmative vote of a majority of the Academy Board at any regular or special meeting of the Academy Board, if a notice setting forth the terms of the proposal has been given in accordance with the notice requirements of these Amended Bylaws and applicable law, and (b) the written approval of the changes or amendments by The Center Director. In the event that a proposed change is not accepted by The Center Director, the University Board may consider and vote upon a change proposed by the corporation following an opportunity for a written presentation to the University Board by the Academy Board. These Amended Bylaws and any amendments to them take effect only after they have been approved by both the Academy Board and by the Center Director.

ARTICLE XII TERMS AND CONDITIONS DEFINITIONS

The definitions set forth in the Terms and Conditions incorporated as part of the Contract shall have the same meaning in these Amended Bylaws.

CERTIFICATION

The Board certifies that these Amended Bylaws were adopted as and for the Bylaws of a Michigan corporation in an open and public meeting, by the Academy Board on the 8 day of June, 2016.

Secretary

CONTRACT SCHEDULE 3
FISCAL AGENT AGREEMENT

SCHEDULE 3

FISCAL AGENT AGREEMENT

This Agreement is part of the Contract issued by the Central Michigan University Board of Trustees ("University Board"), an authorizing body as defined by the Revised School Code, as amended (the "Code"), to South Arbor Charter Academy ("Academy"), a school of excellence.

Preliminary Recitals

WHEREAS, pursuant to the Code and the Contract, the University Board, as authorizing body, is the fiscal agent for the Academy, and

WHEREAS, the University Board is required by law to forward any State School Aid Payments received from the State of Michigan ("State") on behalf of the Academy to the Academy,

NOW, THEREFORE, in consideration of the premises set forth below, the parties agree to the following:

ARTICLE I

DEFINITIONS AND INTERPRETATIONS

Section 1.01. Definitions. Unless otherwise provided, or unless the context requires otherwise, the following terms shall have the following definitions:

"Academy Account" means an account established by the Academy Board for the receipt of State School Aid Payments at a bank, savings and loan association, or credit union which has not been deemed ineligible to be a depository of surplus funds under Section 6 Act No. 105 of the Public Acts of 1855, being Section 21.146 of the Michigan Compiled Laws.

"Agreement" means this Fiscal Agent Agreement.

"Fiscal Agent" means the University Board or an officer or employee of Central Michigan University as designated by the University Board.

"Other Funds" means any other public or private funds which the Academy receives and for which the University Board voluntarily agrees to receive and transfer to the Academy.

"State School Aid Payment" means any payment of money the Academy receives from the State School Aid Fund established pursuant to Article IX, Section 11 of the Michigan Constitution of 1963 or under the State School Aid Act of 1979, as amended.

"State" means the State of Michigan.

"State Treasurer" means the office responsible for issuing funds to schools of excellence for State School Aid Payments pursuant to the State School Aid Act of 1979, as amended.

ARTICLE II

FISCAL AGENT DUTIES

Section 2.01. Receipt of State School Aid Payments and Other Funds. The University Board is the Fiscal Agent for the Academy for the limited purpose of receiving State School Aid Payments. By separate agreement, the University Board and the Academy may also agree that the University will receive Other Funds for transfer to the Academy. The Fiscal Agent will receive State School Aid Payments from the State, as provided in Section 3.02.

Section 2.02. Transfer to Academy. Except as provided in Article X of the Terms and Conditions and in the Oversight Agreement, the Fiscal Agent shall transfer all State School Aid Payments and all Other Funds received on behalf of the Academy to the Academy within ten (10) business days of receipt or as otherwise required by the provisions of the State School Aid Act of 1979 or applicable State Board rules. The State School Aid Payments and all Other Funds shall be transferred into the Account designated by a resolution of the Board of Directors of the Academy and by a method of transfer acceptable to the Fiscal Agent.

Section 2.03. Limitation of Duties. The Fiscal Agent has no responsibilities or duties to verify the Academy's pupil membership count, as defined in the State School Aid Act of 1979, as amended, or to authorize, to approve or to determine the accuracy of the State Aid School Payments received on behalf of the Academy from the State Treasurer. The duties of the Fiscal Agent are limited to the receipt and transfer to the Academy of State School Aid Payments and Other Funds received by the Academy. The Fiscal Agent shall have no duty to monitor, account for or approve expenditures made by the Academy Board.

Section 2.04. Academy Board Requests for Direct Intercept of State School Aid Payments. If the Academy Board (i) authorizes a direct intercept of a portion of its State School Aid Payments from the State to a third party account for the payment of Academy debts and liabilities; or (ii) assigns or directs that a portion of its State School Aid Payments be forwarded by the Fiscal Agent to a third party account for the payment of Academy debts and liabilities, then Academy shall submit to The Center for Charter Schools at Central Michigan University for review and consideration: (i) a copy of the Academy Board's resolution authorizing the direct intercept or the assignment or direction of State School Aid Payments; (ii) a State School Aid Payment Agreement and Direction document that is in a form and content acceptable to the Fiscal Agent; and (iii) other documents as required. The Center reserves the right to not acknowledge in writing any State School Aid Payment Agreement and Direction that is not in a form and content acceptable to the Fiscal Agent.

ARTICLE III

STATE DUTIES

Section 3.01 Eligibility for State School Aid Payments. The State, through its Department of Education, has sole responsibility for determining the eligibility of the Academy to receive State School Aid Payments. The State, through its Department of Education, has sole responsibility for determining the amount of State School Aid Payments, if any, the Academy shall be entitled to receive.

Section 3.02. Method of Payment. Each State School Aid Payment for the Academy will be made to the Fiscal Agent by the State Treasurer by issuing a warrant and delivering the warrant to the Fiscal Agent by electronic funds transfer into an account specified by the Fiscal Agent, or by such other means deemed acceptable to the Fiscal Agent. The State shall make State School Aid Payments at the times specified in the State School Aid Act of 1979, as amended.

ARTICLE IV

ACADEMY DUTIES

Section 4.01. Compliance with State School Aid Act. In order to assure that funds are available for the education of pupils, an Academy shall comply with all applicable provisions of the State School Aid Act of 1979, as amended.

Section 4.02. Academy Account. The Academy is authorized to establish an Account in the name of the Academy. Signatories to the Account shall be current Academy Board members and properly designated Academy Board employees, if applicable. The Academy Board is authorized to approve withdrawals and transfers from any Account established in the name of the Academy. Any authorization approved by the Academy Board for automatic withdrawals or transfers from an Academy Account may only be terminated or amended by the Academy Board.

Section 4.03. Expenditure of Funds. The Academy may expend funds that it receives from the State School Aid Fund for any purpose permitted by the State School Aid Act of 1979 and may enter into contracts and agreements determined by the Academy as consistent with the purposes for which the funds were appropriated.

Section 4.04. Mid-Year Transfers. Funding for students transferring into or out of the Academy during the school year shall be in accordance with the State School Aid Act of 1979 or applicable State Board rules.

Section 4.05. Repayment of Overpayment. The Academy shall be directly responsible for reimbursing the State for any overpayments of State School Aid Payments. At its option, the State may reduce subsequent State School Aid Payments by the amount of the overpayment or may seek collection of the overpayment from the Academy.

ARTICLE V

RECORDS AND REPORTS

Section 5.01. Records. The Fiscal Agent shall keep books of record and account of all transactions relating to the receipts, disbursements, allocations and application of the State School Aid Payments and Other Funds received, deposited or transferred for the benefit of the Academy, and these books shall be available for inspection at reasonable hours and under reasonable conditions by the Academy and the State.

Section 5.02. Reports. Annually, the Fiscal Agent shall prepare and send to the Academy within thirty (30) days of September 1, a written report dated as of August 31. This report shall summarize all receipts, deposits and transfers made on behalf or for the benefit of the Academy during the period beginning on the latter of the date hereof or the date of the last such written report and ending on the date of the report, including without limitation, State School Aid Payments received on behalf of the Academy from the State Treasurer and any Other Funds which the University Board receives under this Agreement.

ARTICLE VI

CONCERNING THE FISCAL AGENT

Section 6.01. Representations. The Fiscal Agent represents that it has all necessary power and authority to enter into this Agreement and undertake the obligations and responsibilities imposed upon it in this Agreement and that it will carry out all of its obligations under this Agreement.

Section 6.02. Limitation on Liability. The liability of the Fiscal Agent to transfer funds to the Academy shall be limited to the amount of State School Aid Payments as are from time to time delivered by the State and the amount of Other Funds as delivered by the source of those funds.

The Fiscal Agent shall not be liable for any action taken or neglected to be taken by it in good faith in any exercise of reasonable care and believed by it to be within the discretion or power conferred upon it by this Agreement, nor shall the Fiscal Agent be responsible for the consequences of any error of judgment; and the Fiscal Agent shall not be answerable except for its own action, neglect or default, nor for any loss unless the same shall have been through its gross negligence or willful default.

The Fiscal Agent shall not be liable for any deficiency in the State School Aid Payments received from the State Treasurer to which the Academy was properly entitled. The Fiscal Agent shall not be liable for any State School Aid overpayments made by the State Treasurer to the Academy for which the State subsequently seeks reimbursement.

Acknowledgment of Receipt

The undersigned, on behalf of the State of Michigan, Department of Treasury, acknowledges receipt of the foregoing Fiscal Agent Agreement that is part of the Contract issued by the Central Michigan University Board of Trustees to South Arbor Charter Academy

BY: Mary G. Martin
Mary G. Martin, Director
Bureau of State and Authority Finance
Michigan Department of Treasury

Date: 2-17, 2016

CONTRACT SCHEDULE 4

OVERSIGHT, COMPLIANCE
AND REPORTING AGREEMENT

SCHEDULE 4

OVERSIGHT, COMPLIANCE AND REPORTING AGREEMENT

This Agreement is part of the Contract issued by the Central Michigan University Board of Trustees ("University Board"), an authorizing body as defined by the Revised School Code, as amended (the "Code"), to South Arbor Charter Academy ("Academy"), a school of excellence.

Preliminary Recitals

WHEREAS, the University Board, subject to the leadership and general supervision of the State Board of Education over all public education, is responsible for overseeing the Academy's compliance with the Contract and all Applicable Law.

NOW, THEREFORE, in consideration of the premises set forth below, the parties agree to the following:

ARTICLE I

DEFINITIONS AND INTERPRETATIONS

Section 1.1. Definitions. Unless otherwise provided, or unless the context requires otherwise, the following terms shall have the following definitions:

"Agreement" means this Oversight, Compliance and Reporting Agreement.

"Oversight Responsibilities" means the University Board's oversight responsibilities set forth in Section 2.01 of this Agreement.

"Compliance and Reporting Duties" means the Academy's duties set forth in Section 2.02 of this Agreement.

"State School Aid Payment" means any payment of money the Academy receives from the state school aid fund established pursuant to Article IX, Section 11 of the Michigan Constitution of 1963 or under the State School Aid Act of 1979, as amended.

ARTICLE II

OVERSIGHT, COMPLIANCE AND REPORTING RESPONSIBILITIES

Section 2.1. Oversight Responsibilities. The Center for Charter Schools ("The Center") at Central Michigan University, as it deems necessary to fulfill the University Board's Oversight Responsibilities, may undertake the following:

- a. Monitor and evaluate if the Academy Board is properly governing the Academy and following the Amended Bylaws set forth in the Contract.
- b. Monitor and evaluate the Academy's academic performance and progress toward achieving the educational goal and related measures set forth in Contract Schedule 7b.
- c. Monitor and evaluate the Academy's implementation, delivery, and support of the educational program and curriculum as set forth in Contract Schedules 7c and 7d, respectively.
- d. Monitor and evaluate the Academy's application and enrollment procedures as set forth in Contract Schedule 7f.
- e. Monitor and evaluate the Academy's organizational and financial viability.
- f. Monitor and evaluate the Academy's fiscal stewardship and use of public resources.
- g. Monitor and evaluate the records, internal controls or operations of the Academy.
- h. Monitor and evaluate if the Academy is staffed with qualified personnel and that appropriate background checks have been conducted.
- i. Monitor and evaluate if the Academy is providing a safe learning environment.
- j. Request evidence that the Academy has obtained the necessary permits and certificates to operate as a public school from the applicable governmental agencies, including, without limitation, the Michigan Department of Licensing and Regulatory Affairs' Bureau of Construction Codes and local health departments.
- k. Conduct comprehensive on-site reviews to assess and/or evaluate the Academy's performance.
- l. Monitor and evaluate if the Academy is demonstrating good faith in complying with the Contract, the Revised School Code, and all other Applicable Law.
- m. Request periodic reports from the Academy regarding any aspect of its operation, including, but not limited to, information identified in Schedule 8 of the Contract.
- n. Initiate action to amend, revoke, terminate or suspend the Contract.
- o. Provide information and support to the Academy.

Section 2.2. Compliance and Reporting Duties. The Academy agrees to fulfill the following Compliance and Reporting Duties:

- a. Adopt and properly maintain governing board policies in accordance with Applicable Law.
- b. Comply with the reporting and document submission requirements set forth in the Master Calendar of Reporting Requirements issued annually by The Center.
- c. Comply with any Academy specific reporting and document submission requirements established by The Center.
- d. Comply with the insurance requirements set forth in Article XI, Section 11.2 of the Terms and Conditions of the Contract.
- e. Comply with The Center's Educational Service Provider Policies dated July 15, 1999, as may be amended.
- f. Report any litigation or formal proceedings to The Center, including, but not limited to, litigation initiated by or against the Academy alleging violation of any Applicable Law. If the University is a named party, notify the general counsel for the University Board as set forth in Article XII, Section 12.1 of the Terms and Conditions.
- g. The Academy shall not occupy or use any school facility set forth in Schedule 6 of the Contract until such facility has received all fire, health and safety approvals required by Applicable Law and has been approved for occupancy by the Michigan Department of Licensing and Regulatory Affairs' Bureau of Construction Codes.
- h. Permit The Center to inspect the records, internal controls, operations or premises of the Academy at any reasonable time.
- i. Authorize The Center to perform audit and evaluation studies using Academy data including, but not limited to, personally identifiable information about the Academy's students and staff submitted by the Academy to agencies including, but not limited to, Center for Educational Performance and Information ("CEPI"), Office of Educational Assessment and Accountability ("OEAA") and the Michigan Department of Education ("MDE"). Pursuant to this authorization, The Center shall abide by the regulations that govern the use of student data within the Family Educational Rights and Privacy Act (FERPA - 34 CFR Part 99), the Michigan Identity Theft Protection Act of 2004, and the Privacy Act of 1974.
- j. Upon request, the Academy Board shall provide The Center with a written report, along with supporting data, assessing the Academy's progress toward achieving the educational goal and related measures outlined in Contract Schedule 7b.
- k. Upon request, provide The Center with copies or view access to data, documents or information submitted to the Michigan Department of Education, the

Superintendent of Public Instruction, the State Board of Education, the Center for Educational Performance and Information, or any other state or federal agency.

1. If the Academy operates an online or other distance learning program, it shall submit a monthly report to the Michigan Department of Education, in the form and manner prescribed by the Michigan Department of Education, that reports the number of pupils enrolled in the online or other distance learning program, during the immediately preceding month.

Section 2.3. Waiver of Compliance and Reporting Duties. The University Board, or The Center Director as its authorized designee, may modify or waive any of the Academy's Compliance and Reporting Duties.

ARTICLE III

RECORDS AND REPORTS

Section 3.1. Records. The Academy will keep complete and accurate records and reports of its governance and operations. These records and reports shall be available for inspection by The Center at reasonable hours and under reasonable conditions.

ARTICLE IV

MISCELLANEOUS

Section 4.1. Administrative Fee. The Academy agrees to pay to the University Board an administrative fee of 3% of the Academy's State School Aid Payments. This fee shall be retained by the University Board from each State School Aid Payment received for forwarding to the Academy. This fee shall compensate the University Board for overseeing the Academy's compliance with the Contract and all Applicable Law and other related activities for which compensation is permissible. By agreement between The Center and the Academy, the University may charge additional fees beyond the administrative fees for services rendered.

Section 4.2. Time of the Essence. Time shall be of the essence in the performance of obligations from time to time imposed upon the Academy and the University Board by this Agreement.

CONTRACT SCHEDULE 5

DESCRIPTION OF STAFF RESPONSIBILITIES

DESCRIPTION OF STAFF RESPONSIBILITIES

Pursuant to Applicable Law and the Terms and Conditions of this Contract, including Article III, Section 3.6., the Academy is authorized to employ or contract for personnel according to the position information outlined in this schedule. Before entering into an agreement with an educational service provider or an employee leasing company to provide services or to provide personnel to perform services or work at the Academy, the Academy Board must first comply with the Educational Service Provider Policies adopted by The Governor John Engler Center for Charter Schools.

Job Title: Principal
Department: School Administration
Reports To: Director of School Quality
Employed By: National Heritage Academies, Inc. ("NHA")

SUMMARY

The Principal is dedicated to achieving the Academy's mission. He or she will hold the unwavering belief that all children can and will learn given the right opportunities. Qualified individuals will have a proven track record of achieving significant rates of student growth. Strong leadership and management skills are also required as is the ability to provide instructional support to teachers. To these ends, the Principal must be committed to and capable of developing Academy culture, promoting student achievement and implementing seamless Academy operations.

ESSENTIAL DUTIES

The duties include working with students, families and staff to create a thriving Academy community focused on achieving results. The Principal must be able to effectively direct and coordinate educational, administrative and counseling activities; formulate policy at the Academy level; make hiring and termination decisions; set salaries; evaluate teacher performance; and plan for his or her own succession.

QUALIFICATIONS

To perform this job successfully, an individual must be able to perform each essential duty satisfactorily. The requirements listed below are representative of the knowledge, skill and/or ability required. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

A qualified individual has between four and ten years of school leadership experience in working with diverse student populations. The Principal will be able to demonstrate achievements in student proficiency and growth that can be specifically linked to their leadership and interventions. The ability to interpret student performance data and to develop strategies that differentiate learning based on assessment results is key. Dedication to ongoing professional development is important and the Principal should be familiar with education journals, research and current trends in education. As a building leader, the Principal should also be comfortable working with financial reports and legal documents.

Both oral and written communication skills are key to success as the Principal. The Principal will be able to respond aptly to common inquiries from parents, the community and the authorizer and to present information to the Academy Board. He or she will have the ability to problem solve and to draft correspondence appropriate to the circumstances. The Principal will support and always seek to fulfill the guiding concepts for the Academy embodied in the mission and the Academy's moral focus program.

The employee must have an acceptable criminal background check result. To the extent this position is deemed to be an administrator of instructional programs (including the supervisor of certified teachers) and/or a chief business official, this position is required to meet one of the following: (1) if the individual held a school administrator position before January 4, 2010, then

evidence of maintaining continuing education is required; or (2) if the individual was hired as school administrator after January 4, 2010, then either: (a) an Administrator Certificate is required; OR (b) enrollment in a Michigan Department of Education (“MDE”)-approved Principal Preparation Program within 6 months of employment (and completion within 3 years) is required. [Public Act 205 section 380.1246].

SUPERVISORY RESPONSIBILITIES

A Principal will directly supervise a group of employees, not to exceed 15. This group includes Deans and front office staff and may in some circumstances include paraprofessional staff, special education and/or specials teachers. The Principal will carry out supervisory responsibilities in accordance with the organization's policies and applicable laws. Responsibilities include interviewing, hiring and training employees; planning, assigning and directing work; appraising performance; rewarding and disciplining employees; addressing complaints and resolving problems.

PHYSICAL DEMANDS

The physical demands described here are representative of those that must be met by an employee to successfully perform the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential physical functions.

While performing the duties of this job, the employee is regularly required to talk or hear. The employee frequently is required to sit; use hands to handle; and reach with hands and arms. The employee is occasionally required to stand and walk. The employee must occasionally lift and/or move up to 25 pounds. Specific vision abilities required by this job include close vision, distance vision, color vision, peripheral vision, depth perception and ability to adjust focus.

WORK ENVIRONMENT

The work environment characteristics described here are representative of those an employee encounters while performing the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

While performing the duties of this job, the employee is occasionally exposed to wet and/or humid conditions and outside weather conditions. The noise level in the work environment is usually moderate.

Job Title: Dean
Department: School Administration
Reports To: Principal
Employed By: NHA

SUMMARY

Deans hold leadership positions within the Academy and must share their colleagues' commitment to achieving the mission of the Academy. They must possess an unrelenting drive to change lives, make a difference, transfer knowledge and create opportunity. Deans will effectively manage people, develop teachers, demonstrate the ability to build culture and aspire to model the virtues adopted in the moral focus program.

ESSENTIAL DUTIES

Deans are responsible for management oversight and will hold specifically defined roles within the leadership structure. As such, they will manage a subset of the Academy staff and provide primary responsibility for various areas of leadership across the building. Like the Principal, these responsibilities require individuals who can respond to common inquiries from parents and the community and who are able to problem solve and communicate effectively.

QUALIFICATIONS

To perform this job successfully, an individual must be able to perform each essential duty satisfactorily. The requirements listed below are representative of the knowledge, skill and/or ability required. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

Qualified individuals possess a bachelor's degree or higher and a minimum of three to five years of experience in teaching. As instructional leaders, Deans will demonstrate success in leading, motivating and coaching a team of teachers who have mastered instructional best practices and who are continuously seeking new and better approaches to teaching and learning.

The employee must have an acceptable criminal background check result. To the extent this position is deemed to be an administrator of instructional programs (including the supervisor of certified teachers) and/or a chief business official, this position is required to meet one of the following: (1) if the individual held a school administrator position before January 4, 2010, then evidence of maintaining continuing education is required; or (2) if the individual was hired as school administrator after January 4, 2010, then either: (a) an Administrator Certificate is required; OR (b) enrollment in an MDE-approved Principal Preparation Program within 6 months of employment (and completion within 3 years) is required. [Public Act 205 section 380.1246].

SUPERVISORY RESPONSIBILITIES

Directly supervises a subset of instructional employees in the Academy, to include teachers and special education and paraprofessional staff. He/she will carry out supervisory responsibilities in accordance with the organization's policies and applicable laws. Deans, with the assistance of the Principal, are involved in the interviewing, hiring and training of employees. Responsibilities include planning, assigning and directing of work; appraising performance; rewarding and disciplining employees; addressing complaints and resolving problems.

PHYSICAL DEMANDS

The physical demands described here are representative of those that must be met by an employee to successfully perform the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential physical functions.

While performing the duties of this job, the employee is regularly required to talk or hear. The employee frequently is required to sit; use hands to handle; and reach with hands and arms. The employee is occasionally required to stand and walk. The employee must occasionally lift and/or move up to 25 pounds. Specific vision abilities required by this job include close vision, distance vision, color vision, peripheral vision, depth perception and ability to adjust focus.

WORK ENVIRONMENT

The work environment characteristics described here are representative of those an employee encounters while performing the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

While performing the duties of this job, the employee is occasionally exposed to wet and/or humid conditions and outside weather conditions. The noise level in the work environment is usually moderate.

Job Title: Teacher
Department: Teaching Staff
Reports To: Dean
Employed By: NHA

SUMMARY

Teachers at the Academy are committed to the mission and possess an unwavering dedication to promoting high expectations and academic growth. Teachers do not work independently in their classrooms but collaborate with their grade-level teams in planning lessons, honing instructional techniques and achieving learning objectives. Teachers are able to participate collaboratively and professionally with other staff, as well as with parents, volunteers and the community. Teachers will promote and always seek to fulfill the guiding concepts for the Academy, including its mission, moral focus program and vision.

ESSENTIAL DUTIES

Teachers will be responsible for creating, managing and participating in a variety of learning environments and activities that provide opportunities for students to develop to their fullest potential and achieve their learning objectives. Teachers will have the ability to apply knowledge of current research and theory to the instructional program and to plan and implement lessons based on Academy objectives and the needs and abilities of students.

QUALIFICATIONS

To perform this job successfully, an individual must be able to perform each essential duty satisfactorily. The requirements listed below are representative of the knowledge, skill and/or ability required. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

EDUCATION and/or EXPERIENCE

Bachelor's degree is required along with appropriate licensure/certification. Teaching experience, preferably at the elementary school level, is desired.

LANGUAGE SKILLS

Ability to read, analyze and interpret general business periodicals, professional journals, technical procedures and governmental regulations. Ability to write reports, business correspondence and procedure manuals. Ability to establish and maintain effective working relationships with students, peers, parents and community; ability to speak clearly and concisely in written and oral communication.

MATHEMATICAL SKILLS

Ability to add, subtract, multiply and divide all units of measure, using whole numbers, common fractions and decimals. Ability to compute rate, ratio and percent and to draw and interpret graphs. Ability to work with mathematical concepts such as probability and statistical inference and fundamentals of plane and solid geometry and trigonometry. Ability to apply mathematical concepts to practical situations.

REASONING ABILITY

Ability to define problems, collect data, establish facts and draw valid conclusions. Ability to deal with a variety of abstract and concrete variables in situations where only limited standardization exists. Ability to interpret a variety of instructions furnished in written, oral, diagram or schedule form.

CERTIFICATES, LICENSES, REGISTRATIONS

Shall possess a valid State of Michigan Teaching Certificate with the appropriate endorsement(s) for all subject area(s) being taught. Must have evidence of meeting highly qualified requirements, as defined by No Child Left Behind.

OTHER SKILLS AND ABILITIES

Ability to apply knowledge of current research and theory to instructional program; ability to plan and implement lessons based on Academy objectives and the needs and abilities of students. Ability to establish and maintain effective relationships with students, peers and parents; skill in oral and written communication. Ability to perform duties with awareness of all NHA requirements and Academy Board policies. Ability to use technology for instructional purposes and to teach current technology skills and the use of technology tools for grade level. Ability to apply knowledge about legal issues to the work setting.

The employee must have an acceptable criminal background check result.

PHYSICAL DEMANDS

The physical demands described here are those that must be met by an employee to successfully perform this job. Reasonable accommodations may be made to enable qualified individuals with disabilities to perform the essential physical functions.

While performing the duties of this job, the employee is regularly required to talk and hear. The employee frequently is required to sit; use hands to handle; and reach with hands and arms. The employee is occasionally required to stand and walk. The employee must occasionally lift and/or move up to 25 pounds. Specific vision abilities required by this job include close vision, distance vision, color vision, peripheral vision, depth perception and ability to adjust focus.

WORK ENVIRONMENT

The work environment characteristics described here are representative of those an employee encounters while performing the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

While performing the duties of this job, the employee is occasionally exposed to wet and/or humid conditions and outside weather conditions. The noise level in the work environment is usually moderate.

Job Title: Library Technology Specialist
Department: School Staff
Reports To: Principal
Employed By: NHA

SUMMARY

The Library Technology Specialist at the Academy will ascribe to the Academy's mission and share his or her colleagues' commitment to providing an unparalleled educational opportunity to its students. The Library Technology Specialist will be passionate about introducing students to classic and contemporary literature, instilling them with a life-long love of reading and instructing them in information literacy. He or she will support and aspire to model the mission of the Academy and the virtues emphasized in the moral focus program.

ESSENTIAL DUTIES

The Library Technology Specialist will work with classroom teachers to help plan and integrate lessons and provide resources. Students will use technology to research, compose and present information related to topics studied in other content area classes. He or she must possess the leadership capacity and expertise necessary to ensure that the library and educational technology programs are an integral part of the instructional program of the Academy.

QUALIFICATIONS

To perform this job successfully, an individual must be able to perform each essential duty satisfactorily. The requirements listed below are representative of the knowledge, skill and/or ability required. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

The Academy will seek an individual with a bachelor's degree and a valid State of Michigan Teaching Certificate with the appropriate endorsement(s) for all subject area(s) being taught. The individual must have evidence of meeting highly qualified requirements, as defined by No Child Left Behind. Preference is given to individuals with prior experience teaching in a library/media center and a master's level endorsement in educational technology or library science. As a staff member who is likely to interact regularly with every student, teacher and administrator, the Library Technology Specialist must possess excellent communication skills, be able to establish and manage effective working relationships and readily assume the responsibilities of leader, trainer, manager, teacher and information specialist.

The employee must have an acceptable criminal background check result.

While performing the duties of this job, the employee is occasionally exposed to wet and/or humid conditions and outside weather conditions. The noise level in the work environment is usually moderate.

Job Title: Special Education Teacher
Department: Teaching Staff
Reports To: Dean
Employed By: NHA

SUMMARY

Special Education Teachers at the Academy are committed to the Academy's mission and aspire to model the virtues of the moral focus program. He or she will possess unwavering dedication to changing lives, creating educational opportunity for students and instilling a life-long love of learning. In a position that requires working with students of various academic, physical and emotional needs, the Special Education Teacher must be able to adapt, prioritize and work collaboratively with other teachers at the Academy.

ESSENTIAL DUTIES

The Special Education Teacher is responsible to work with students in the K-8 program that experience emotional, learning and physical disabilities and are eligible for special education programs and services as determined by an Individualized Educational Program ("IEP") committee. While working with these special education students, the Special Education Teacher may also work with At-Risk students within the general education population and in the general education classroom in conjunction with the support they are providing to students with special needs.

QUALIFICATIONS

To perform this job successfully, an individual must be able to perform each essential duty satisfactorily. The requirements listed below are representative of the knowledge, skill and/or ability required. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

The Academy will seek an individual with a bachelor's degree with certification in at least one disability area, experience working with special education students and a high level of verbal communication and interpersonal skills. The Special Education Teacher shall possess a valid State of Michigan Teaching Certificate with the appropriate endorsement(s) for all subject area(s) being taught. Must have evidence of meeting highly qualified requirements, as defined by No Child Left Behind. He or she will possess discretion, integrity and flexibility and have a clear understanding of issues of confidentiality.

The employee must have an acceptable criminal background check result.

While performing the duties of this job, the employee is occasionally exposed to wet and/or humid conditions and outside weather conditions. The noise level in the work environment is usually moderate.

Job Title: Academic Specialist
Department: Teaching Staff
Reports To: Dean
Employed By: NHA

SUMMARY

Create, manage and participate in a variety of learning environments and activities in the four core content areas that provide opportunities for students to achieve learning objectives as stated in student educational plans. Participate collaboratively and professionally with parents and other faculty to promote the general well-being of the company and the Academy. Support and seek always to fulfill the guiding concepts for the school embodied in the mission, moral focus and vision adopted by NHA.

Note: Positions funded by entitlement grants must work within published federal and state guidelines to ensure compliance. Contact your school's Grants Administrator to determine entitlement grant status and acceptable job duties and responsibilities.

ESSENTIAL DUTIES

-
- Ensure effective two-way communication at all levels of responsibility. Provide out-of-class communication opportunities with parents and students. Participate in grade level, Academy and company meetings as appropriate. Represent the Academy to external constituencies as appropriate. Seek always to promote a spirit of collegiality in dealings with staff.
- Participate in on-going professional development.
- Participate in all other aspects of class and Academy planning and in the establishment of goals and objectives.
- Establish and maintain high standards of student behavior.
- Participate in Academy processes designed to recruit and retain students.
- Model the characteristics of behavior as outlined in NHA's Moral Focus Curriculum.
- Instruct effectively with technology and teach tools of technology within coursework.
- Modify instruction to accommodate the unique learning styles of students.
- Confer with students, parents and Academy staff/administrator to resolve student concerns.
- Other duties may be assigned.

If government funding allows, the following duties may be performed:

- Lead professional development activities in the four core content areas as requested by the Principal.
- Serve as a resource in the four core content areas for Paraprofessionals, teachers and administrators.
- Provide direction and demonstrate lessons as needed.
- Assist teachers, Paraprofessionals and administrators in using assessment to plan instruction for all students.
- Communicate assessment information to a variety of audiences including, but not limited to, Academy Board members, social workers, clinical specialists, teachers, administrators and parents for accountability and instructional purposes.

QUALIFICATIONS

To perform this job successfully, an individual must be able to perform each essential job function satisfactorily. The requirements listed below are the education, licensing, knowledge, skill and/or ability required. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

EDUCATION and/or EXPERIENCE

Bachelor's degree required along with appropriate licensure/certification; master's degree preferred. Considerable teaching experience, preferably at the elementary school level, is desired.

LANGUAGE SKILLS

Ability to read, analyze and interpret general business periodicals, professional journals, technical procedures and governmental regulations. Ability to write reports, business correspondence and procedure manuals. Ability to establish and maintain effective working relationships with students, peers, parents and community. Ability to speak clearly and concisely in written and oral communication.

MATHEMATICAL SKILLS

Ability to add, subtract, multiply and divide all units of measure, using whole numbers, common fractions and decimals. Ability to compute rate, ratio and percent and to draw and interpret graphs. Ability to apply mathematical concepts to practical situations.

REASONING ABILITY

Ability to solve practical problems and deal with a variety of concrete variables in situations where only limited standardization exists. Ability to interpret a variety of instructions furnished in written, oral, diagram or schedule form.

CERTIFICATES, LICENSES, REGISTRATIONS

Shall possess a valid State of Michigan Teaching Certificate. Additionally, if providing direct instruction, must have the appropriate endorsement(s) for the subject area(s) being taught and must provide evidence of meeting highly qualified requirements, as defined by No Child Left Behind.

OTHER SKILLS AND ABILITIES

Ability to apply knowledge of current research and theory to instructional program; ability to plan and implement lessons based on Academy objectives and the needs and abilities of students. Ability to establish and maintain effective relationships with students, peers and parents; skilled in oral and written communication. Ability to perform duties with awareness of all NHA requirements and Academy Board policies. Ability to use technology for instructional purposes and to teach current technology skills and the use of technology tools for grade level. Ability to apply knowledge about legal issues to the work setting.

The employee must have an acceptable criminal background check result.

PHYSICAL DEMANDS

The physical demands described here are those that must be met by an employee to successfully perform this job. Reasonable accommodations may be made to enable qualified individuals with disabilities to perform the essential physical functions.

While performing the duties of this job, the employee is regularly required to talk and hear. The employee frequently is required to sit; use hands to handle; and reach with hands and arms. The employee is occasionally required to stand and walk. The employee must occasionally lift and/or move up to 25 pounds. Specific vision abilities required by this job include close vision, distance vision, color vision, peripheral vision, depth perception and ability to adjust focus.

WORK ENVIRONMENT

The work environment characteristics described here are representative of those an employee encounters while performing the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions. The noise level in the work environment is usually moderate.

Job Title: Substitute Teacher
Department: Administration
Reports To: Dean
Employed By: NHA

SUMMARY

Responsible for carrying out the lesson plans of the teacher for whom he/she is substituting.

ESSENTIAL DUTIES include the following. Other duties may be assigned.

- Follow the lesson plan provided by the teacher for whom he/she is substituting in accordance with the Academy's philosophy, goals and objectives.
- Maintain appropriate records such as attendance and grades, as directed by the teacher or by school administration.
- Establish and maintain order in the classroom.
- Maintain a classroom environment conducive to effective learning.
- Take all necessary and reasonable precautions to protect the safety and security of students, materials, equipment and facilities.
- Assist in upholding and enforcing school rules and administrative regulations.

QUALIFICATIONS

To perform this job successfully an individual must be able to perform each essential duty satisfactorily. The requirements listed below are the education, licensing, knowledge, skill and/or ability required to be qualified for this position. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

EDUCATION and/or EXPERIENCE

Educational credentials as required by the state in which the Academy is located; bachelor's degree preferred.

LANGUAGE SKILLS

Ability to communicate and work effectively with staff and students.

MATHEMATICAL SKILLS

Ability to apply concepts such as fractions, percentages, ratios and proportions to practical situations.

REASONING ABILITY

Ability to define problems, collect data, establish facts and draw valid conclusions.

CERTIFICATES, LICENSES, REGISTRATIONS

Shall possess a valid State of Michigan Teaching Certificate with the appropriate endorsement(s) for all subject area(s) being taught (preferred) or a valid Substitute Permit. Must have evidence of meeting highly qualified requirements, as defined by No Child Left Behind. If not licensed/certified, must meet the requirements to be eligible for a temporary/substitute credential according to state requirements.

The employee must have an acceptable criminal background check result.

PHYSICAL DEMANDS

The physical demands described here are those that must be met by an employee to successfully perform this job. Reasonable accommodations may be made to enable qualified individuals with disabilities to perform the essential physical functions.

While performing the duties of this job the employee is regularly required to talk and hear. The employee frequently is required to sit; use hands to handle; and reach with hands and arms. The employee is occasionally required to stand and walk. The employee must occasionally lift and/or move up to 25 pounds. The work environment characteristics described here are representative of those an employee encounters while performing the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions. The noise level in the work environment is usually moderate.

Job Title: Instructional Coach
Department: Teaching Staff
Reports To: Principal
Employed By: NHA

SUMMARY

The Instructional Coach will provide professional learning opportunities and guidance to all staff members in the areas of effective instructional practices, curriculum implementation and data application in order to build capacity for improved instruction and increased student achievement.

ESSENTIAL DUTIES

Provide consistent instructional support and guidance to Academy staff.

- Conduct individual bi-weekly meetings with each classroom teacher.
- Participate in bi-weekly team meetings at each grade level.
- Execute classroom visits and supply feedback concerning curriculum, instruction and assessment.
- Monitor and guide curriculum implementation and model lesson execution.
- Promote and support the use of assessment data to increase student achievement.
- Guide teachers in the collection and analysis of formative and summative assessment data.
- Guide teachers in the use of assessment data to direct instructional decisions.
- Assist teachers in establishing professional and individual student goals which correspond with the School Improvement Plan and assessment data.
- Facilitate professional learning opportunities.
- Plan and promote professional learning opportunities for the Academy staff based on needs defined in the School Improvement Plan.
- Serve as a resource in the areas of curriculum delivery, instructional practice, assessment and data interpretation.
- Other duties may be assigned.

QUALIFICATIONS

To perform this job successfully, an individual must be able to perform each essential duty satisfactorily. The requirements listed below are the education, knowledge, skill and/or ability required to be qualified for this position. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

Preference will be given to candidates with five years of teaching experience and a valid Michigan administrator license with a proven record of leadership and high student performance.

- Bachelor's degree required; valid Michigan teaching certificate preferred.
- Exhibit excellent interpersonal skills: openness, approachability, receptivity and tactfulness.
- Possess excellent oral and written communication skills.
- Demonstrate the ability to motivate others.
- Highly organized and detail oriented.
- Demonstrate both adaptability and follow through with regard to scheduling of intervention services.

- Exhibit the ability to function as part of a team.
- Possess a thorough understanding of research-based instructional practices, the NHA curricular resources and the application of data to enhance student learning.

The employee must have an acceptable criminal background check result.

IDENTIFICATION AND RECRUITING

The Instructional Coach is identified by the Principal. Efforts will be made to select an Instructional Coach from current Academy staff; however, if a qualified internal candidate cannot be identified, one may be recruited from another NHA school.

APPOINTMENTS

Recommendations for appointment to the Instructional Coach position are made by the Principal. The Principal, in conjunction with the Director of School Quality, determines to whom the offer of employment shall be extended.

TRAINING AND SUPPORT

During the academic calendar year, the Instructional Coach participates in a series of professional learning opportunities focusing on coaching and observation, data analysis, adult learning theory and research-based instructional strategies.

The Instructional Coach receives guidance and support in the establishment and maintenance of an effective coaching schedule. Regular communication with a member of the Instructional Support Services (“ISS”) team and other Instructional Coaches via conference calls and e-mail provides additional support. When necessary, a member of the ISS team visits a school to assist with program implementation.

TOOLS

To assist the Instructional Coach in efficiently and effectively completing essential duties and responsibilities, the following tools will be available:

- Rank/Growth Target Report
- Common external assessment – to track student progress
- Template of Customized Academic Plan (“CAP”)
- Sample of Student Growth Summary Report
- Monthly Progress-on-Goals Report

PHYSICAL DEMANDS

The physical demands described here are representative of those that must be met by an employee to successfully perform the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential physical functions of this position.

While performing the duties of this job, the employee is regularly required to talk and hear. The employee frequently is required to sit; use hands to handle; and reach with hands and arms. The employee is occasionally required to stand and walk. The employee must occasionally lift and/or

move up to 25 pounds. Specific vision abilities required by this job include close vision, distance vision, color vision, peripheral vision, depth perception and ability to adjust focus.

WORK ENVIRONMENT

The work environment characteristics described here are representative of those that an employee encounters while performing the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions of this position. The noise level in the work environment is usually moderate.

Job Title: School Social Worker
Department: Intervention Services
Reports To: Principal
Employed By: NHA

SUMMARY

The School Social Worker is responsible for working with students who experience difficulty in the Academy and community setting as a result of social-emotional or family issues that result in educational time loss or other challenges to academic achievement.

ESSENTIAL DUTIES

Reasonable accommodations may be made to enable qualified individuals with disabilities to perform the essential job functions.

- Provide direct social work services to students based on early identification to determine problems or situations that may interfere with a child's ability to achieve.
- Commit to and implement regular communication between the Academy, home, community and local agencies.
- Serve as a resource/consultant to Academy staff on effective techniques for modifying student behavior through the development of Functional Behavior Assessments and Behavior Intervention Plans.
- Provide general education in-service and training to promote classroom interventions that address normal student concerns.
- Identify and coordinate accommodations and modifications of the Academy environment for a student to obtain access to general education curriculum and instruction.
- Provide support to facilitate successful transitions in areas that affect student learning opportunities.
- Provide crisis prevention, planning and intervention services, including assessments of the impact of trauma on development, learning and Academy performance.
- Provide comprehensive written reports of assessments and evaluations of students that specifically address the reasons for referral.
- Utilize multiple methods of collecting data and provide appropriate measurable goals for intervention and anticipated outcomes from service.
- Other duties may be assigned from time to time.

QUALIFICATIONS

To perform this job successfully, an individual must be able to perform each essential job function satisfactorily. The requirements listed below are the education, licensing, knowledge, skill and/or ability required to be qualified for this position. Reasonable accommodations may be made to enable qualified individuals with disabilities to perform the essential functions.

EDUCATION and/or EXPERIENCE

The School Social Worker will have completed a master's degree in school social work/school psychology and will have proven time management and organizational skills.

LANGUAGE SKILLS

Ability to read, analyze and interpret general business periodicals, professional journals, technical procedures and governmental regulations. Ability to write reports, business correspondence and procedure manuals. Ability to establish and maintain effective working relationships with students, peers, parents and community; ability to speak clearly and concisely in written and oral communication.

Job Title: Speech and Language Pathologist
Department: Special Education
Reports To: Principal (Support from Director of Special Education)
Employed By: NHA

SUMMARY

The Speech and Language Pathologist is responsible to work with students in the K–8 program who experience speech and language delays and impairments and have been diagnosed as needing special education support. These students should hold a current IEP. While working with these speech and language students, the Speech and Language Pathologist may also work with at-risk students within the general education population. Works in collaboration with the Special Education Teacher in the formation of daily schedules, testing schedules and annual meetings. Supplies the Special Education Teacher with current speech and language student lists so he/she can maintain a master special education list.

ESSENTIAL DUTIES

- Provide training and consultation for general education staff in speech and language areas.
- Provide pre-referral strategies and interventions to general educators.
- Carry out the screening and evaluating deemed necessary for at-risk students.
- Deliver maximum levels of instruction in the minimal amount of time.
- Plan and implement IEP meetings in a timely manner.
- Maintain complete and ongoing records for all students.
- Maintain log of parent and community contacts.
- Maintain a comfortable learning environment for students whether in pull-out situation or inclusion setting.
- Adapt materials pertaining to the speech and language areas within the K–8 curriculum to meet needs of students served.
- Utilize instructional materials which meet special learning needs of students.
- Demonstrate creativity in reaching, challenging and exciting student learning.
- Utilize technology to promote learning.
- Demonstrate professionalism in dealing with confidentiality issues.
- Promote corporation and Academy mission to community.
- Utilize strategies and techniques to modify unacceptable behavior.
- Evaluate student records for current IEP needs as those records are forwarded from the Special Education Supervisor.
- Serve as a cooperative and contributing member of the NHA Special Education team.
- Demonstrate knowledge of Academy policies and procedures.
- Demonstrate willingness to keep updated on issues and research by pursuing professional development.
- Demonstrate general knowledge of disability areas in special education; specific knowledge in the area of learning disabilities and emotional impairments.
- Hold parent/teacher meetings or attend scheduled meetings with general educators.
- Perform other job related duties as assigned by Director of Special Education and the Principal.

QUALIFICATIONS

To perform this job successfully, an individual must be able to perform each essential duty satisfactorily. The requirements listed below are the education, licensing, knowledge, skill and/or ability required to be qualified for this position. Reasonable accommodations may be made to enable qualified individuals with disabilities to perform the essential functions.

EDUCATION and/or EXPERIENCE

Master's degree in speech and language pathology.

LANGUAGE SKILLS

High level of verbal communication and interpersonal skills such as discretion, integrity and flexibility to interact effectively with students, administrators, peers, constituent districts, parents and the general public.

MATHEMATICAL SKILLS

Ability to interpret test scores as they relate to the Speech and Language Pathologist's area of expertise.

REASONING ABILITY

Clear understanding of confidentiality issues related to the special education program; ability to prioritize tasks appropriately and interpret a variety of instructions furnished in written, oral, diagram and schedule form.

CERTIFICATES, LICENSES, REGISTRATIONS

Certificate of Clinical Competence ("CCC") from the American Speech-Language-Hearing Association ("ASHA") and Speech Language Pathology license issued by Department of Licensing and Regulatory Affairs.

The employee must have an acceptable criminal background check result.

PHYSICAL DEMANDS

The physical demands described here are those that must be met by an employee to successfully perform this job. Reasonable accommodations may be made to enable qualified individuals with disabilities to perform the essential physical functions.

While performing the duties of this job, the employee is regularly required to talk and hear. The employee frequently is required to sit; use hands to handle; and reach with hands and arms. The employee is occasionally required to stand and walk. The employee must occasionally lift and/or move up to 25 pounds. Specific vision abilities required by this job include close vision, distance vision, color vision, peripheral vision, depth perception and ability to adjust focus.

WORK ENVIRONMENT

The work environment characteristics described here are representative of those an employee encounters while performing the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions. The noise level in the work environment is usually moderate.

Job Title: Paraprofessional
Department: Instructional Support
Reports To: Dean or Principal
Employed By: NHA

SUMMARY

Under the supervision of a classroom teacher, Paraprofessionals provide instructional assistance to students in need of academic intervention services. The services provided should lead to a significant growth in student test results.

Note: Positions funded by entitlement grants must work within published federal and state guidelines to ensure compliance.

ESSENTIAL DUTIES

Prepare daily lesson plans for students under the direction of immediate supervisor and/or classroom teacher.

- Provide individual and small group instruction.
- Provide instructional assistance for students during workshops as directed by the classroom teacher and designated instructional leader.
- Participate in weekly planning sessions with classroom teachers and immediate supervisor.

Other Job Requirements:

- Complete daily logs.
- Attend articulation meetings with classroom teachers.
- Attend professional development activities as required.
- Ensure availability for afternoon and evening parent-teacher conferences.
- Exemplary attendance and tardiness record.
- Other duties may be assigned from time to time.

QUALIFICATIONS

To perform this job successfully, an individual must be able to perform each essential job function satisfactorily. The requirements listed below are the education, licensing, knowledge, skill and/or ability required to be qualified for this position. Reasonable accommodations may be made to enable qualified individuals with disabilities to perform the essential functions.

Paraprofessionals will be of good personal character and will have knowledge of and the ability to assist in teaching reading, writing and mathematics; or reading, writing and mathematics readiness. In addition, Paraprofessionals should meet one or more of the following requirements:

EDUCATION and/or EXPERIENCE

- Complete at least two years of study at an institution of higher education (equal to 60 semester hours); or obtain an associate's degree (or higher); or meet a rigorous standard of quality and demonstrate, through a formal state or local academic assessment:
 - Knowledge of and the ability to assist in, instructing reading, writing and mathematics; or

- Knowledge of and the ability to assist in, instructing reading readiness, writing readiness and mathematics readiness, as appropriate.

LANGUAGE SKILLS

Ability to read, analyze and interpret general business periodicals, professional journals, technical procedures and governmental regulations. Ability to write reports, business correspondence and procedure manuals. Ability to establish and maintain effective working relationships with students, peers, parents and community; ability to speak clearly and concisely in written and oral communication.

MATHEMATICAL SKILLS

Ability to work with mathematical concepts such as probability and statistical inference and fundamentals of plane and solid geometry and trigonometry. Ability to apply mathematical concepts to practical situations.

REASONING ABILITY

Ability to define problems, collect data, establish facts and draw valid conclusions. Ability to deal with a variety of abstract and concrete variables in situations where only limited standardization exists. Ability to interpret a variety of instructions furnished in written, oral, diagram or schedule form.

CERTIFICATES, LICENSES, REGISTRATIONS

None.

They employee must have an acceptable criminal background check result.

PHYSICAL DEMANDS

The physical demands described here are representative of those that must be met by an employee to successfully perform the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential physical functions.

While performing the duties of this job, the employee is regularly required to talk or hear. The employee occasionally is required to sit; use hands to handle; and reach with hands and arms. The employee is frequently required to stand and walk. The employee must occasionally lift and/or move up to 25 pounds. Specific vision abilities required by this job include close vision, distance vision, color vision, peripheral vision, depth perception and ability to adjust focus.

WORK ENVIRONMENT

The work environment characteristics described here are representative of those an employee encounters while performing the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

While performing the duties of this job, the employee is occasionally exposed to wet and/or humid conditions and outside weather conditions. The noise level in the work environment is usually moderate.

Job Title: Library Technology Aide
Reports To: Principal
Employed By: NHA

SUMMARY

The Library Technology Aide shall work cooperatively with and carry out tasks under the direction of the Library Technology Specialist. The Library Technology Aide must exhibit the ability to work with students and a willingness to support the staff.

ESSENTIAL DUTIES include the following. Other duties may be assigned.

- Communicate effectively with children, parents and staff.
- Assist students and staff in using library and technology resources to locate and retrieve information.
- Maintain appropriate technology skills needed to assist students and staff in the use of all technology equipment available in the Academy.
- Assist the Library Technology Specialist, NHA's IT team and other Academy personnel with duties and tasks related to the technology program.
- Troubleshoot difficulties with technology equipment as needed.
- Oversee student use of the Internet and technology according to NHA's Acceptable Use Policy.
- Work within Library Media Center policies and rules of student conduct.
- Gain knowledge of the operational procedures of the library media center.
- Function within the schedule of the Academy.

QUALIFICATIONS

To perform this job successfully, an individual must be able to perform each essential duty satisfactorily. The requirements listed below are the education, licensing, knowledge, skill and/or ability required to be qualified for this position. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

EDUCATION and/or EXPERIENCE

- Two years of college (60 semester credit hours); or
- An associate's degree or higher; or
- Successful completion of a state paraprofessional exam.

LANGUAGE SKILLS

Ability to read, analyze and interpret general business periodicals, professional journals, technical procedures and governmental regulations. Ability to write reports, business correspondence and procedure manuals. Ability to establish and maintain effective working relationships with students, peers, parents and community; ability to speak clearly and concisely in written and oral communication.

MATHEMATICAL SKILLS

Ability to add, subtract, multiply and divide all units of measure, using whole numbers, common fractions and decimals. Ability to compute rate, ratio and percent and to draw and interpret graphs. Ability to work with mathematical concepts such as probability and

statistical inference and fundamentals of plane and solid geometry and trigonometry. Ability to apply mathematical concepts to practical situations.

REASONING ABILITY

Ability to define problems, collect data, establish facts and draw valid conclusions. Ability to deal with a variety of abstract and concrete variables in situations where only limited standardization exists. Ability to interpret a variety of instructions furnished in written, oral, diagram or schedule form.

CERTIFICATES, LICENSES, REGISTRATIONS

None.

The employee must have an acceptable criminal background check result.

PHYSICAL DEMANDS

The physical demands described here are representative of those that must be met by an employee to successfully perform the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential physical functions.

While performing the duties of this job the employee is regularly required to talk or hear. The employee frequently is required to sit; use hands to handle; and reach with hands and arms. The employee is occasionally required to stand and walk. The employee must occasionally lift and/or move up to 25 pounds. Specific vision abilities required by this job include close vision, distance vision, color vision, peripheral vision, depth perception and ability to adjust focus.

WORK ENVIRONMENT

The work environment characteristics described here are representative of those an employee encounters while performing the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions. The noise level in the work environment is usually moderate.

Job Title: Registrar
Department: Office Staff
Reports To: Principal
Employed By: NHA

SUMMARY

The Registrar at the Academy must be committed to the mission of the Academy, seek to fulfill the virtues of the moral focus program and be a dedicated team player. The Academy will seek an individual who can communicate effectively with parents, students, Academy staff and the community and is able to supervise Academy volunteers. The Registrar will often be the first representative of the Academy with whom parents and others interact and thus must be able to create a customer-centered, professional environment.

ESSENTIAL DUTIES

The Registrar is accountable for the organization and daily functioning of student enrollment management; maintaining student information in the AtSchool database, including course schedules; and ensuring compliance with People Services policies.

QUALIFICATIONS

To perform this job successfully, an individual must be able to perform each essential duty satisfactorily. The requirements listed below are representative of the knowledge, skill and/or ability required. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

The Registrar will possess an associate's degree and two to four years of experience in an office or school administrative position or a combination of education and experience that would produce the skills necessary to perform the job functions. Must be proficient with PCs and basic Microsoft Office software.

The employee must have an acceptable criminal background check result.

PHYSICAL DEMANDS

The physical demands described here are representative of those that must be met by an employee to successfully perform the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential physical functions.

While performing the duties of this job, the employee is regularly required to talk or hear. The employee frequently is required to sit; use hands to handle; and reach with hands and arms. The employee is occasionally required to stand and walk. The employee must occasionally lift and/or move up to 25 pounds. Specific vision abilities required by this job include close vision, distance vision, color vision, peripheral vision, depth perception and ability to adjust focus.

WORK ENVIRONMENT

The work environment characteristics described here are representative of those an employee encounters while performing the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

While performing the duties of this job, the employee is occasionally exposed to wet and/or humid conditions and outside weather conditions. The noise level in the work environment is usually moderate.

Job Title: Office Administrator
Department: Administrative Support Staff
Reports To: Principal
Employed By: NHA

SUMMARY

The Office Administrator is accountable for customer service and efficient front office operation including management of attendance, health and safety compliance and support of the Principal.

ESSENTIAL DUTIES

The Office Administrator will act as the Academy's receptionist, order supplies and accurately process facilities work orders. Other accountabilities include maintenance of required attendance records in AtSchool, supporting the Principal as required and health and safety compliance. Other responsibilities may be assigned. These duties are not inclusive, but represent the essential duties of the Office Administrator. Below are the areas of responsibility:

- Administration:
 - Maintain and update bookkeeping at the Academy and be accountable for the accounting process including purchase orders, check requests, employee expense reports, tuition assistance, budget worksheets and weekly bank deposits.
 - Oversee the receptionist responsibilities of the Academy and support an office environment that is professional, customer service-oriented and supportive to visitors, parents and students. Answer phones, direct questions and inquiries, distribute mail and provide any and all enrollment information necessary to parents interested in the Academy. Ensure that sign-in and security procedures are strictly followed by all visitors.
 - Accurate use of facilities work order system.
- Reporting/Compliance:
 - Health and safety compliance including maintenance of the following documents:
 - Pest Management Plan and Annual Notification Letters
 - AHERA Plan and Annual notification/inspection documentations
 - Health and Safety Manual and annual training sign-in sheet
 - BowMac Crisis Management Plan with current information
 - Material Safety Data Sheets in binder for all products in the Academy
 - Monthly playground inspections
- Student Services:
 - Distribute medication/attend to incidental needs of students.
- Staff Support:
 - Order and maintain supplies as needed for office and Academy staff. Complete purchase requisitions for supplies, books and materials.
 - Complete correspondence, memoranda and reports for the Academy Principal as well as maintain calendar and appointments for Academy leadership.

QUALIFICATIONS

To perform this job successfully, an individual must have a working knowledge of how to perform each essential duty satisfactorily. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions. The individual must be proficient on PC and basic MS Office programs. This team member must be able to multi-task, have the ability to organize and be detailed-oriented. This team member must also create and maintain a customer-focused atmosphere within the administrative functions. The requirements listed below are representative of the knowledge, skill and/or ability required.

EDUCATION and/or EXPERIENCE

Possess an associate's degree and two to four years of experience in an office or school-related administrative position or a combination of education and experience that would produce the skills necessary to perform the job functions. Experience with Microsoft Office products.

LANGUAGE SKILLS

Ability to respond to common inquiries or complaints from parents. Ability to communicate and work effectively with students, parents, the Principal and teachers. Ability to write using proper grammar, spelling and sentence structure.

MATHEMATICAL SKILLS

Ability to apply concepts such as fractions, percentages, ratios and proportions to practical situations.

REASONING ABILITY

Ability to define problems, collect data, establish facts and draw valid conclusions. Ability to interpret an extensive variety of technical instructions in mathematical or diagram form and deal with several abstract and concrete variables.

CERTIFICATES, LICENSES, REGISTRATIONS

None.

The employee must have an acceptable criminal background check result.

PHYSICAL DEMANDS

The physical demands described here are representative of those that must be met by an employee to successfully perform the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential physical functions.

While performing the duties of this job, the employee is regularly required to talk or hear. The employee frequently is required to sit; use hands to handle; and reach with hands and arms. The employee is occasionally required to stand and walk. The employee must occasionally lift and/or move up to 25 pounds. Specific vision abilities required by this job include close vision, distance vision, color vision, peripheral vision, depth perception and ability to adjust focus.

WORK ENVIRONMENT

The work environment characteristics described here are representative of those an employee encounters while performing the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions. The noise level in the work environment is usually moderate.

Job Title: Office Assistant
Department: Administrative Support Staff
Reports To: Principal
Employed By: NHA

SUMMARY

The Office Assistant is accountable for administrative, customer service and efficient front office operation.

ESSENTIAL DUTIES are indicated below. Other responsibilities may be assigned. These duties are not inclusive, but represent the essential duties of the Office Assistant.

- Copy, fax and type documents.
- Organize and maintain files; file correspondence and other records.
- Answer phones, direct questions and inquiries, distribute mail and greet visitors.
- Track and maintain student attendance records; contact parents of truant students; report truant students.
- Support the Office Administrator and Registrar as needed.
- Assist with the student enrollment process.

QUALIFICATIONS

To perform this job successfully, an individual must have a working knowledge of how to perform each essential duty satisfactorily. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions. Additionally, the individual must be proficient on PC and basic MS Office programs. The Office Assistant must be able to multi-task, have the ability to organize and be detailed-oriented. The Office Assistant must also create and maintain a customer-focused atmosphere within the administrative functions. The requirements listed below are representative of the knowledge, skill and/or ability required.

EDUCATION and/or EXPERIENCE

High school diploma and/or some experience in office or school-related administration. Experience with Microsoft Office products. Ability to use office equipment including, but not limited to, computer, multi-line phone, copy machine, fax machine and printer.

LANGUAGE SKILLS

Ability to respond to common inquiries or complaints from parents. Ability to communicate and work effectively with students, parents, Principal and teachers. Ability to write using proper grammar, spelling and sentence structure.

MATHEMATICAL SKILLS

Ability to apply concepts such as fractions, percentages, ratios and proportions to practical situations.

REASONING ABILITY

Ability to define problems, collect data, establish facts and draw valid conclusions. Ability to interpret an extensive variety of technical instructions in mathematical or diagram form and deal with several abstract and concrete variables.

CERTIFICATES, LICENSES, REGISTRATIONS

None.

The employee must have an acceptable criminal background check result.

While performing the duties of this job, the employee is regularly required to talk or hear. The employee frequently is required to sit; use hands to handle; and reach with hands and arms. The employee is occasionally required to stand and walk. The employee must occasionally lift and/or move up to 25 pounds. Specific vision abilities required by this job include close vision, distance vision, color vision, peripheral vision, depth perception and ability to adjust focus.

Job Title: Recess Aide
Department: Support Staff
Reports To: Principal
Employed By: NHA

SUMMARY

The Recess Aide will provide supervision to students in the lunchroom and on the playground during the noon hour and appointed recess hours; monitor and advise students as to safe practices in both situations; assist children in organizing games and other activities; monitor student behavior; provide encouragement and discipline as appropriate; support the conduct policies of the Academy; report to the Principal or designee as assigned.

ESSENTIAL DUTIES

Will be able to demonstrate the following knowledge, skills and abilities:

- Understand child development, both socially and physically.
- Work and communicate effectively with 5-14 year old children.
- Work outdoors during all seasons.
- Maintain a respectful posture at all times.
- Work with administrators and staff to ensure a safe and positive recess period.
- Maintain confidentiality of information as appropriate.
- Work as a team member, as well as function individually in making decisions about safety and discipline.
- Receive appropriate training, including basic first aid.
- Support the policies and goals of the Academy.

QUALIFICATIONS

To perform this job successfully, an individual must be able to perform each essential duty satisfactorily. The requirements listed below are the education, licensing, knowledge, skill and/or ability required to be qualified for this position. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

Qualified applicants will have prior experience supervising children ages 5 to 14 and organizing recreation activities for children.

The employee must have an acceptable criminal background check result.

PHYSICAL DEMANDS

The physical demands described here are those that must be met by an employee to successfully perform this job. Reasonable accommodations may be made to enable qualified individuals with disabilities to perform the essential physical functions.

While performing the duties of this job the employee is regularly required to talk and hear. The employee frequently is required to sit; use hands to handle; and reach with hands and arms. The employee is occasionally required to stand and walk. The employee must occasionally lift and/or move up to 25 pounds. Specific vision abilities required by this job include close vision, distance vision, color vision, peripheral vision, depth perception and ability to adjust focus.

WORK ENVIRONMENT

The work environment characteristics described here are representative of those an employee encounters while performing the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

While performing the duties of this job, the employee is occasionally exposed to wet, cold and/or humid conditions and outside weather conditions. The noise level in the work environment is usually moderate.

SERVICES AGREEMENT

THIS SERVICES AGREEMENT ("**Agreement**") by and between National Heritage Academies, Inc., a Michigan corporation ("**NHA**"), and South Arbor Charter Academy, a body corporate and school of excellence (the "**School**") is effective the 1st day of July, 2016 (the "**Effective Date**"). For purposes of this Agreement, NHA and the School shall be referred to collectively as the "**Parties**."

RECITALS

WHEREAS, the School was issued a Charter Contract by the Central Michigan University Board of Trustees (the "**Authorizer**") to operate a school of excellence pursuant to the Michigan Revised School Code (the "**Authorizing Law**"); and

WHEREAS, the Parties desire to work together to promote educational excellence and innovation based on NHA's school design, comprehensive educational program and management principles; and

WHEREAS, the Parties desire to set forth the terms and conditions of such a relationship in this Agreement; and

NOW, THEREFORE, for good and valuable consideration, including the mutual promises and benefits contained in this Agreement, the receipt and sufficiency of which are hereby acknowledged, the Parties agree as follows:

ARTICLE I

CONTRACTING RELATIONSHIP

A. Services. Subject to the terms and conditions of this Agreement, and as permitted by applicable law, the School hereby contracts with NHA for the provision of certain educational, business administration, facility, and management services, including without limitation, all labor, equipment, and materials necessary for the provision of the same, as set forth herein (collectively, the "**Services**").

B. Charter. This Agreement shall: (i) be subject to and comply with the terms and conditions of the Charter Contract and the School's Charter Application (collectively, the "**Charter**"); and (ii) not be construed to interfere with the constitutional, statutory, or fiduciary duties of the School's Board of Directors (the "**Board**"). NHA agrees to perform its duties and responsibilities under this Agreement in a manner that is consistent with the School's obligations under the Charter issued by the Authorizer. The provisions of the School's Charter shall supersede any competing or conflicting provisions contained in this Agreement.

C. Independent Contractor. NHA shall provide the Services as an independent contractor, and not as an employee, partner, agent, or associate of the School. This independent contractor relationship shall extend to the officers, directors, employees, and representatives of

NHA. Consistent with the status of an independent contractor, NHA reserves to itself the right to designate the means and methods of accomplishing the objectives and purposes of this Agreement consistent with Board policy, applicable law and the Charter. NHA shall be solely responsible for its acts and the acts of its agents, employees and subcontractors. The relationship between the Parties is based solely on the terms and conditions of this Agreement, and the terms and conditions of any other written agreement between the Parties.

D. Designations and Appointments.

1. The Board shall by Board resolution appoint the Board Treasurer, or such other officer as determined by the Board, to serve as the chief administrative officer of the School (the “**CAO**”) under the Uniform Budgeting and Accounting Act, MCL 141.421 *et seq.* (the “**Budgeting and Accounting Act**”) Notwithstanding any other provision of the Agreement to the contrary, the Board resolution shall designate NHA’s chief financial officer, or such other NHA officer or employee as is mutually agreed upon by NHA and the School, as the designated agent of the CAO to assist the CAO with the performance of the CAO’s duties under the Budgeting and Accounting Act.

2. NHA, including its directors, officers, and employees are hereby designated as “School Officials” for purposes of the Family Educational Right and Privacy Act, and its implementing regulations, 20 U.S.C. §1232g *et seq.* (FERPA); 34 CFR § 99.31(a)(1)(i)(B). Additionally:

(a) NHA agrees that it shall observe Board policies and applicable law regarding the confidentiality of Covered Data and Information. Covered Data and Information (“**CDI**”) includes paper and electronic student education record information and includes, without limitation, “education records” as defined under FERPA, 34 CFR § 99.1. CDI also includes any new records created and maintained by NHA under this Agreement using CDI.

(b) NHA shall not use or disclose CDI received from or on behalf of the School except as permitted or required by this Agreement and/or applicable law.

(c) Upon termination or other conclusion of this Agreement, NHA shall return all CDI to the School.

(d) NHA shall develop, implement, maintain and use appropriate administrative, technical and physical security measures to preserve the confidentiality, integrity and availability of all CDI received from, or on behalf of, the School or its students. These measures will be extended by contract to include subcontractors used by the NHA.

(e) NHA, within two business days of discovery, shall report to the Board any use or disclosure of CDI not authorized by this Agreement. NHA’s report shall identify: (i) the nature of the unauthorized use or disclosure, (ii) the CDI used or disclosed, (iii) who made the unauthorized use or received the unauthorized disclosure, (iv) what NHA has done or shall do to mitigate any deleterious effect of the unauthorized use or disclosure, and (v) what corrective action NHA has taken or shall take to prevent future similar unauthorized use or

disclosure. NHA shall provide such other information, including a written report, as reasonably requested by the Board.

3. NHA, its directors, officers, and employees may be designated by the School for other purposes by a written resolution of the Board.

ARTICLE II

TERM & TERMINATION

A. Term. This Agreement shall commence on the Effective Date, and unless terminated as set forth herein, shall continue until the revocation, termination or expiration of the Charter currently in effect expiring June 30, 2026 (the “**Term**”). The parties acknowledge that the Authorizer, as part of any reauthorization or renewal, may require that the School and NHA submit an amended or restated Agreement for review by the Authorizer. The first school year of this Agreement shall commence July 1, 2016 to June 30, 2017, and each school year thereafter shall commence on July 1 and end on June 30 of the following year.

B. Termination.

1. By NHA. NHA may terminate this Agreement prior to the end of the Term if the Board fails to remedy a material breach of this Agreement within thirty (30) days after receiving a notice from NHA of such breach. For purposes of this Subsection, a material breach (which for the sake of clarity is a default hereunder) includes, but is not limited to: (i) NHA’s failure to timely receive any compensation or reimbursement required by this Agreement; or (ii) a suspension, termination, revocation, or non-renewal of the Charter.

2. By the School. The School may terminate this Agreement prior to the end of the Term if NHA fails to remedy a material breach of this Agreement within (30) days after receiving notice from the School of such breach. For purposes of this Subsection, a material breach includes, but is not limited to: (i) NHA’s failure to account for expenditures or pay operating costs pursuant to the Budget (as defined below); (ii) NHA’s failure to follow policies, procedures, rules, regulations or curriculum adopted by the Board, provided they do not violate the Charter, applicable law, or this Agreement; (iii) a receipt by the Board of an unsatisfactory report from NHA or an independent education consultant retained by the Board regarding the Services or the School’s performance, provided the unsatisfactory performance cannot be adequately corrected or explained; (iv) a determination that this Agreement or its implementation would serve as grounds for suspension, termination, revocation, or non-renewal of the Charter; (v) a determination that this Agreement or its implementation would jeopardize material tax exemptions of the School or its non-profit status; or (vi) any action or inaction by NHA that places the Charter in jeopardy of termination, suspension or revocation.

3. By Either Party. Either party may terminate this Agreement prior to the end of the Term, with or without cause, by providing the other party with at least ninety (90) days’ prior written notice.

4. Revocation or Termination of Charter. If the School's Charter issued by the Authorizer is revoked, terminated or a new Charter is not issued to the School after expiration of the School's Charter, this Agreement shall automatically terminate on the same date as the School's Charter is revoked, terminated or expires without further action of the parties.

5. If this Agreement is terminated prior to the end of the Term other than as provided for in Article II(B)(4) of this Agreement, and unless otherwise agreed by the Parties, such termination will not become effective until the end of the then-current school year.

C. Effect of Termination. Upon the effective date of termination or expiration of this Agreement:

1. Subject to any provisions contained in a lease between the Parties, the Parties shall have the right to remove from the School any equipment or other assets owned or leased by the respective Party;

2. The School shall pay or reimburse NHA through the Fee (as defined below) for the prepaid portion of any expenses or liabilities incurred by NHA pursuant to the Budget as of the date of such termination or expiration, provided NHA supplies the School with documentation of all such expenses and liabilities;

3. NHA may agree, in its sole discretion, to assist the School for a reasonable amount of time, not to exceed ninety (90) days, and for a reasonable fee, with the School's transition to another administrative, managerial, or services arrangement;

4. NHA shall, if applicable, reasonably assist the School in the execution of a closure and dissolution plan and cooperate in the closure and dissolution process, including without limitation, in any audits and court or other proceedings related thereto; and

5. The party to whom Confidential Information (as defined below) has been disclosed shall, upon request and at the direction of the disclosing party: (i) return such Confidential Information within thirty (30) days, including any copies thereof, and cease its use; or (ii) destroy such Confidential Information and certify such destruction to the disclosing party, except for a single copy thereof which may be retained for the sole purpose of determining the scope of any obligations incurred under this Agreement, and except where disclosure or retention is required by applicable law.

ARTICLE III

OBLIGATIONS OF NHA

A. Manager at Risk. NHA shall be responsible and accountable to the Board for providing the Services. During the Term, NHA shall provide the Services regardless of whether actual revenue meets the level projected in the Budget, and NHA hereby assumes the risk of

funding shortfalls during the Term. Notwithstanding the foregoing, NHA shall not be required to expend funds on Services in excess of the amount set forth in the Budget.

B. Comprehensive Educational Program. The School has determined to adopt NHA's proprietary educational and academic programs and goals, as set forth in the Charter (the "**Educational Program**"). Subject to the oversight of the Board, NHA shall implement and administer the Educational Program. In the event that NHA reasonably determines that it is necessary or advisable to make material changes to the Educational Program, NHA shall inform the Board of the proposed changes and obtain the Board's approval before making such changes, as well as the Authorizer's approval if required by the Charter or applicable law. The Parties acknowledge and agree that an essential principle of the Educational Program is its flexibility, adaptability and capacity to change in the interest of continuous improvement and efficiency. Not less than annually or as reasonably requested by the Board, NHA shall provide the Board with a report detailing progress made on each of the educational goals set forth in the Educational Program. The school year calendar and the school day schedule shall be approved by the Board as required under the Charter.

C. All Children Welcome. NHA places a high value on diversity, and the School shall welcome students of all races, ethnicity, religion, gender and economic backgrounds.

D. Services to Students with Disabilities. NHA welcomes students with disabilities at the School. NHA shall provide special education and related services, in conformity with the requirements of applicable law, to students who attend the School.

E. Educational and Administrative Services. Subject to the oversight of the Board, NHA shall implement operational practices and procedures that are consistent with Board policy, the Charter and applicable law. Such practices and procedures shall include, but are not limited to:

1. Student recruitment and student admissions.
2. Student assessments, including testing, promotion, and retention.
3. The acquisition of instructional materials, equipment and supplies, and the administration of any and all extra-curricular and co-curricular activities and programs approved by the Board and NHA.
4. Employment of personnel working at the School and management of all personnel functions, as set forth herein.
5. All aspects of the School's business administration.
6. All aspects of the School's accounting operation, including general ledger management, financial reporting, payroll, employee benefits and payroll tax compliance.
7. Food service and transportation approved by the Board and NHA.
8. All aspects of facilities administration and maintenance.

9. Student behavior management and discipline.

F. Location of Services. Other than instruction, and unless prohibited by the Charter or applicable law, NHA may provide the Services, including but not limited to, purchasing, professional development and administrative services, off-site.

G. Subcontracts. NHA reserves the right to subcontract any and all aspects of the Services. NHA shall not subcontract the oversight of the Educational Program, except as specifically permitted in this Agreement or with prior written approval of the Board. Notwithstanding the foregoing, the Board specifically acknowledges and agrees that from time to time NHA may use third parties or independent contractors to assist in the creation and development of Educational Materials (as defined below) that may be used as a part of the Educational Program.

H. Pupil Performance Standards and Evaluation. NHA shall implement pupil performance evaluations that permit evaluation of the academic progress of each School student. NHA shall be responsible and accountable to the Board for the academic performance of students who are enrolled at the School. NHA shall utilize assessment strategies required by the Charter and applicable law. The Board and NHA shall cooperate in good faith to identify academic goals and methods to assess such academic performance. NHA shall provide the Board with timely reports regarding student performance.

I. Unusual Events. NHA shall timely notify the Board and the Administrator (as defined below) of any anticipated or known material: (i) health or safety issues, including all mandatory reporting required by applicable law; (ii) labor, employee or funding issues; or (iii) other issues that may reasonably and adversely impact the School's ability to comply with the Charter, applicable law or this Agreement.

J. School Records. The financial and education records pertaining to the School (collectively, the "**School Records**"), are property of the School. Except as may be prohibited or limited by the Charter or applicable law, the School Records shall be available to the Board and the Authorizer for their review, and are subject to inspection and copying to the same extent that records of public schools are subject to inspection and copying pursuant to applicable law. All School Records shall be physically or electronically available at the School's physical facility upon request made by the Board or the Authorizer. NHA shall provide the Board on a timely basis all information that is required to be disclosed under section 22f of the State School Aid Act of 1979, MCL 388.1622f.

On an annual basis, NHA agrees to provide the Board the same information that a school district is required to disclose under section 18(2) of the State School Aid Act of 1979, MCL 388.1618, for the most recent school fiscal year for which the information is available. Within thirty (30) days of receipt of this information, the Board shall make the information available on the School's website homepage, in a form and manner prescribed by the Michigan Department of Education. The defined terms in section 503c and 553c of the Code, MCL 380.503c and MCL 380.553c, whichever is applicable, shall have the same meaning in this Agreement.

NHA shall make information concerning the operation and management of the School, including without limitation the information described in the Charter, available to the School as deemed necessary by the Board in order to enable the School to fully satisfy its obligations under the Charter.

K. Facility. NHA shall use reasonable efforts to secure a facility to be leased or otherwise provided to the School on terms mutually agreeable to NHA and the Board. Obligations of the Board created under the terms of such lease are to be fulfilled by NHA unless otherwise agreed to in writing by NHA and the Board. The facility shall comply with the requirements of the Charter and applicable law. NHA shall also use reasonable efforts to cause the facility to be furnished with equipment and technology as is reasonably necessary to implement the Educational Program.

L. Legal Compliance. NHA will implement and enforce rules, regulations and procedures applicable to the School that are consistent with adopted Board policy, if any, and the Educational Program in accordance with the Charter and applicable law, including without limitation, rules, regulations, and policies regarding non-discrimination, discipline, special education, confidentiality and access to records.

M. Rules and Procedures. NHA will recommend to the Board reasonable rules, regulations, policies and/or procedures applicable to the School. The Board hereby authorizes and directs NHA to enforce such rules, regulations and procedures consistent with Board policy.

N. Assistance to the Board. NHA shall cooperate with the Board and, to the extent consistent with the Charter and applicable law, timely furnish the Board with all documents and information necessary for the Board to properly perform its responsibilities under this Agreement.

ARTICLE IV

OBLIGATIONS OF THE BOARD

A. Board Policies. The Board shall be responsible for the fiscal and academic policies of the School. The Board shall exercise good faith in considering the recommendations of NHA, including but not limited to, NHA's recommendations regarding policies, rules, regulations and the Budget (as defined below).

B. Academy Budget. The Board is responsible for establishing, approving and amending the Budget in accordance with the Budgeting and Accounting Act.

C. Governance Oversight. The Board shall provide governance level oversight of the School in accordance with the Charter and applicable law. The Board shall cooperate with NHA and, to the extent consistent with applicable law, timely furnish NHA all documents and information necessary for NHA to properly perform its responsibilities under this Agreement.

D. Unusual Events. The Board shall timely notify NHA of any anticipated or known material: (i) health or safety issues; (ii) labor, employee or funding issues; or (iii) other issues that

may reasonably and adversely impact NHA's ability to comply with the Charter, applicable law, or this Agreement.

E. Office Space. The Board shall provide NHA with suitable office space at the School, provided the requested space is: (i) available and can be provided without materially prejudicing the Educational Program; and (ii) used only for activities related to the School. The space shall be provided at no cost to NHA.

F. Retained Authority. The Board shall retain the authority to adopt reasonable policies in accordance with applicable law relative to anything necessary for the proper establishment, maintenance, management, and operation of the School.

ARTICLE V

INTELLECTUAL PROPERTY

A. Definitions.

1. **"Educational Materials"** means all curriculum, print and electronic textbooks, instructional materials, lesson plans, teacher guides, workbooks, tests, and other curriculum-related materials licensed, developed or otherwise owned by the School or NHA.

2. **"Confidential Information"** means any confidential and non-public trade, technical or business knowledge, information and materials regarding the School or NHA (or their respective affiliates), which is given by one party to the other, or any of their respective representatives, in any form, whether printed, written, oral, visual, electronic or in any other media or manner. Confidential Information includes, but is not limited to, research, operations and procedures, financial projections, pricing, sales, expansion plans and strategies, services data, trade secrets and other intellectual property, or the results of any mediation or private adjudication, as well as information with respect to each party's or its affiliates' plans for market expansion, except for information which a party can show by contemporaneous written records was developed or formulated independently of work or services performed for, or in connection with performance of, this Agreement. Notwithstanding the foregoing, the disclosure of the other party's Confidential Information as required to be disclosed by law, rule or regulation or by reason of subpoena, court order or government action shall not constitute a breach of this Agreement; however, in such event the party required to disclose such information will reasonably cooperate with the party whose information is required to be disclosed in order to obtain a protective order applicable to such disclosure. All Confidential Information will remain the sole property of the party disclosing such information or data.

B. School Materials. The School shall own all right, title and interest in and to Educational Materials that are: (i) licensed or owned by the School as of the Effective Date; or (ii) licensed, developed, characterized, conceived, derived, generated, identified, or otherwise made by the School during the Term, provided such materials do not reference the NHA Materials (as defined below), or incorporate any Confidential Information of NHA (collectively, the **"School**

Materials”). The School Materials shall include all intellectual property rights associated therewith.

C. NHA Materials. NHA shall own all right, title and interest in and to Educational Materials that are: (i) licensed or owned by NHA as of the Effective Date; (ii) licensed, developed, characterized, conceived, derived, generated, identified, or otherwise made by NHA during the Term, provided such materials do not reference School Materials or incorporate any Confidential Information of the School; and (iii) any and all Educational Materials and non-curriculum materials provided to the School by NHA relating to the Educational Program, including all changes and derivatives thereof (collectively, the “**NHA Materials**”).

D. Derivative Works. The Parties acknowledge that to the extent any Educational Materials created by the School are derivative of the NHA Materials, use of such derivative materials during the Term is subject to the license granted herein, and the license to use such derivative materials shall cease as of the date of expiration or termination of this Agreement.

E. No Transfer or Sale. The School acknowledges and agrees that NHA is not transferring or selling, and the School is not receiving, purchasing or acquiring, any intellectual property or proprietary rights in or to the NHA Materials.

F. Licenses. NHA hereby grants the School a non-exclusive, non-transferable license (without the right to sublicense) to use the NHA Materials, and any Educational Materials created by the School which are derivative of the NHA Materials, solely in furtherance of the Educational Program during the Term, including without limitation, the right to reproduce, publicly display, distribute and create derivative works of the same, in hard copy format or electronically, within the United States. The School represents and warrants that during the Term, and following the expiration or termination of this Agreement, the School will not exploit or assist any third party to exploit any of the NHA Materials for commercial purposes. Subject to applicable law, the School grants NHA a non-exclusive, non-transferable license (without the right to sublicense) to use the School Materials, solely in furtherance of the Educational Program during the Term, including without limitation, the right to reproduce, publicly display, distribute and create derivative works of the same, in hard copy format or electronically, within the United States.

G. NHA Marks. During the Term, NHA grants the School a non-exclusive, revocable, non-transferable license (without the right to sublicense) to use NHA’s trade name(s) and NHA’s trademark(s) (the “**NHA Marks**”) solely for the purposes of promoting and advertising the School. NHA shall have the opportunity to review and approve all artwork, copy or other materials utilizing the NHA Marks prior to any production or distribution thereof. All uses of the NHA Marks require NHA’s prior written permission. The School shall acquire no rights in or to the NHA Marks, and all goodwill associated with the NHA Marks shall inure to the benefit of and remain with NHA. Upon expiration or termination of this Agreement, the School shall immediately discontinue use of the NHA Marks and shall remove the NHA Marks from its locations, vehicles, websites, telephone directory listings and all other written or electronic promotional materials.

H. Assignment. Each party shall, and hereby does assign to the other, with full title guarantee and without additional compensation, such right, title and interest in and to any

intellectual property as is necessary to fully affect the ownership provisions set out herein, and any accrued rights of action in respect thereof. Each party shall, if so requested by the other, execute all such documents and do all such other acts and things as may be reasonably required to comply with this Agreement to vest in the appropriate party all rights in the relevant intellectual property and shall procure execution by any named inventor of all such documents as may reasonably be required by the other party in connection with any related patent application.

ARTICLE VI

SOLICITATION AND USE OF PRIVATE FUNDS

NHA shall seek the Board's approval prior to soliciting any non-governmental grants, donations or contributions on behalf of the School. Any such funds received shall be used solely in accordance with the purpose for which they were solicited, applicable donor restrictions, or as otherwise approved by the Board. Subject to applicable donor restrictions, the Board shall determine the allocation of any such funds subject to this Article that remain unexpended following completion of the project or purpose for which they were originally designated.

ARTICLE VII

FINANCIAL ARRANGEMENTS

A. Revenues. Except as provided herein, all monies received by the School shall be deposited in the School's depository account within three (3) business days with a financial institution acceptable to the Board; provided, however, that upon receipt of a notice from NHA, the School shall pay all such funds owing under this Agreement directly to the account or party specified in such notice. The signatories on the School Board's accounts shall solely be Board members or properly designated Board employees (if any). Interest income earned on the School's accounts shall accrue to the School. Except as specifically excluded by this Agreement, the term "**Revenues**" shall include all funds received by or on behalf of the School, including but not limited to:

1. Funding for public school students enrolled at the School.
2. Special education funding provided by the federal and/or state government that is directly allocable to special education students enrolled at the School.
3. Gifted and talented funding provided by the federal and/or state government that is directly allocable to gifted and talented students enrolled at the School.
4. At-risk funding provided by the federal and/or state government that is directly allocable to at-risk students enrolled at the School.

5. Funding provided by the federal and/or state government that is directly allocable to students enrolled at the School with limited English proficiency.

6. All other federal and/or state grant sources, including, but not limited to, Title I and any start-up funding allocable to the School.

7. Grants and donations received by the School to support or carry out programs at the School (except to the extent NHA is not required or involved in soliciting, administering or managing the contribution and/or donation, in which case such funds shall be deposited in the Board Spending Account (as defined below)).

8. Fees charged to students as permitted by law for extra services provided by NHA as approved by the Board.

The expenditure of any Revenues received from governmental entities shall be consistent with all applicable regulations and policies. The expenditure of any Revenues received from non-governmental grants, contributions and donations shall be made consistent with the provisions of Article VI.

B. Budget. NHA shall provide the Board with an annual proposed Budget prepared and maintained in accordance with the Charter, the Michigan Budgeting and Accounting Act, and applicable law (the “**Budget**”). The Budget shall include all of the School’s projected revenues and expenses at the object level as described in the Michigan Department of Education’s Michigan School Accounting Manual. For the School’s first school year, the Budget shall be submitted prior to the beginning of the school year. Thereafter, the Budget shall be submitted to the Board prior to June 1 for the next school year.

C. Review and Approval of Budget. The Board shall be responsible for reviewing and approving the Budget in accordance with the Charter and applicable law. At the direction of either NHA or the Board, with the approval of the Board, the Budget shall be amended from time to time as necessary.

D. Board Spending Account. Notwithstanding any other provision of this Agreement to the contrary, each school year during the Term, NHA shall allocate to an account controlled by the Board an amount equal to the lesser of: (i) 2% of state per pupil aid reflected in the Budget for that respective school year, or (ii) \$35,000 (the “**Board Spending Account**”). The aforesaid amount shall be deposited by NHA into the Board Spending Account pro-rata during the course of the School’s school year as Revenues are received. All funds in the Board Spending Account are the property of the School and may be used by the School at the discretion of the Board. Funds in the Board Spending Account that are not spent by the School during the school year shall carryover annually. Items purchased by NHA for the School and paid for by the School with funds from the Board Spending Account, such as non-proprietary instructional and/or curriculum materials, books, supplies and equipment, shall be the property of the School. The property of the School excludes items leased, financed or purchased by NHA with the Fee (as defined below). NHA agrees not to add any fees or charges to the cost of equipment, materials or supplies purchased by NHA at the request of or on behalf of the School with funds from the Board Spending

Account. NHA, in making such purchases for the School pursuant to this subsection, shall comply with applicable law, as if the School were making such purchases itself from a third party, and shall provide the Board, upon request, available documentation evidencing the costs associated with such purchases. NHA shall maintain a listing of all assets owned by the School and shall provide the list to the Board annually upon request.

E. Fee. NHA shall receive all Revenues as its services fee (the “**Fee**”), from which it shall pay all operating costs of the School as detailed in the Budget. NHA and the Board acknowledge that operating costs includes an administrative fee payable to the Authorizer as set forth in the Charter. Payment of the Fee shall be made on the same frequency that the School receives its Revenues. NHA shall be entitled to retain as compensation for the Services the difference, if any, between the Fee and the amount actually expended by NHA in operation and/or management of the School during the School’s fiscal year. NHA agrees not to add any fees or charges to the cost of equipment, materials or supplies purchased by NHA at the request of or on behalf of the School.

F. No Loans. NHA shall not make or extend loans to the Board.

G. Other Schools. The School acknowledges that NHA has entered into similar services agreements with other schools. NHA shall maintain separate accounts for expenses incurred in the operation of the School and other schools assisted by NHA, and shall reflect in the School’s financial records only those expenses incurred in the operation of the School. If NHA incurs expenses that are for both the benefit of the School and other schools assisted by NHA, then NHA shall allocate, to the extent permitted by law, such expenses among all such affected schools, including the School, on a prorated basis based upon the number of enrolled students, the number of classrooms, or the number of teachers at the affected schools, or on such other equitable basis as is reasonably determined by NHA. In no event shall marketing and development costs incurred solely for the benefit of NHA (and not the School) be allocated to the School. Costs shall be allocated to, or reimbursed by, the School and reported by NHA in accordance with applicable law.

H. Financial Reporting. NHA shall provide the Board with:

1. At least annually, the Budget as required by this Agreement.
2. Monthly, financial statements no more than forty-five (45) days in arrears and at least one week prior to each Board meeting. These financial statements will include a Balance Sheet, Statement of Revenues, Expenditures and Changes in Fund Balance at object level detail with a comparison of budget to actual revenue and expenditures and explanations of variances and cash flow statement.
3. Quarterly, or as reasonably requested by the Board, a report on School operations and student performance.
4. As reasonably requested, other information to enable the Board to: (i) evaluate the quality of the Services; and (ii) timely provide all reports and information that are required by the Charter and applicable law.

I. Access to Financial Records. NHA shall keep accurate financial records pertaining to its operation of the School, together with all School financial records prepared by or in possession of NHA, and shall retain all of the aforementioned records according to the Charter and applicable law to which such books, accounts, and records relate. NHA and the Board shall maintain the proper confidentiality of personnel, students, and other records as required by law. All records shall be kept in accordance with applicable state and federal requirements.

J. Accounting Standards; Annual Audit.

1. The School shall at all times comply with generally accepted public sector accounting principles, accounting system requirements of the State School Aid Act of 1979, as amended, applicable Michigan Department of Education rules, and applicable law.

2. The Board shall select and retain an independent auditor to conduct an annual audit of the School's financial matters in accordance with the Charter and applicable law.

3. Subject to applicable law, all records in the possession or control of NHA that relate to the School, including but not limited to, financial records, shall be made available to the School and the School's independent auditor. The expense of the annual audit shall be included in the Budget.

K. Start-up Funds; Contributions; Repayment.

1. NHA shall provide start-up funds for: (i) the development of curriculum, a technology system and a school operations plan; (ii) recruiting, selecting and training of staff members; and (iii) to the extent necessary as reasonably determined by NHA, cleaning, renovating and equipping of the School facility (the "**Start-Up Funds**").

2. NHA shall make contributions to the School in the event School expenses for the Services exceed Revenues (the "**Contributions**"). The Contributions, if any, shall be in amounts acceptable to the Parties and, once made, shall be included in the Budget.

3. The School shall not be legally obligated to repay NHA for the Start-Up Funds or the Contributions. NHA's agreement to make such Contributions shall not be deemed to negate or mitigate the need for the School to apply for or solicit state or federal start-up funds, grants or sub-grants which the School, as a public school, may be eligible to receive.

ARTICLE VIII

PERSONNEL & TRAINING

A. Qualified Personnel. NHA shall select and hire qualified personnel to perform the Services. NHA shall have the responsibility and authority, subject to this Article, to select, hire, evaluate, assign, discipline, transfer, and terminate personnel consistent with the Budget, the Charter and applicable law. Personnel working at the School shall be employees of NHA unless

otherwise expressly agreed by NHA and the Board. NHA and the Board each shall be responsible for their respective employees. However, the compensation of all employees working at the School shall be included in the Budget. Upon Board request, NHA shall disclose to the Board the level of compensation and fringe benefits provided by NHA to NHA employees working at the School. A criminal background check and unprofessional conduct search in compliance with applicable law shall be conditions for the hiring of or services provided by any person assigned by NHA under this Agreement to regularly and continuously work in any of the School's facilities or at program sites where the School delivers Services. NHA shall pay all salaries, wages, benefits, payroll and other taxes to or on account of its employees. The Academy shall not be liable for the payment of any such salaries, wages, benefits, payroll or taxes thereon for or on behalf of any NHA employee, contractor or agent. NHA acknowledges and agrees that it is the sole and exclusive responsibility of NHA to make the requisite tax filings, deductions and payments to the appropriate federal, state and local tax authorities for and on behalf of all persons employed or engaged by NHA to provide Services under this Agreement. As applicable, NHA shall conduct employee evaluations consistent with Section 1249 and 1250 of the Code.

B. School Administrator. The School administrator (the "**Administrator**") shall be an employee of NHA and not the Board. The duties and terms of the Administrator's employment shall be determined by NHA. The Administrator shall work with NHA in the operation and management of the School. The Administrator shall attend meetings of the Board and shall provide reports to the Board. The accountability of NHA to the School is an essential foundation of this Agreement. NHA shall have the authority, consistent with this Article, to select, hire, evaluate, assign, discipline, transfer and terminate the Administrator, and to hold the Administrator accountable for the performance of the School. Without limiting the foregoing, NHA shall consult with the Board prior to the placement and/or removal of the Administrator. Absent compelling circumstances, the consultation shall commence at least ninety (90) days prior to NHA placing and/or removing the Administrator. NHA shall give due consideration to the input of the Board or the Board's designated representative prior to making a final decision regarding placement and/or removal of the Administrator. NHA shall remove the Administrator if the Board is reasonably dissatisfied with the Administrator's performance. Absent compelling circumstances, however, the Board shall give NHA and the Administrator six (6) months to correct the basis for the Board's reasonable dissatisfaction. The parties agree that the purpose of the above provisions is not to deny the Administrator the opportunity for growth and/or promotion within NHA. Notwithstanding any of the foregoing, the placement of the initial Administrator for the School in its first year of operation shall be made by NHA.

As the employer, NHA shall be solely responsible for the performance evaluation of the Administrator. NHA shall seek feedback from the Board prior to completing an annual Administrator performance evaluation.

C. Teachers. NHA shall, consistent with this Article, assign to perform Services at the School, teachers qualified to teach their assigned subjects and grade level. The curriculum taught by the teachers shall be consistent with the Educational Program. The teachers may, at the discretion of NHA, be assigned to work at the School on a full or part time basis. If assigned to work at the School on a part time basis, the teacher(s) may also be assigned to work at other schools for which NHA provides services. The cost for such teacher(s) shall be shared proportionately among the schools at which NHA has assigned the teacher(s) to work. Each teacher assigned to

work at the School shall hold a valid teaching certificate issued by the state board of education or applicable state agency to the extent required by the Authorizing Law.

D. Support Staff. NHA shall, consistent with this Article, assign to perform Services at the School, qualified support staff as needed for NHA to operate the School in an efficient manner. The support staff may, at the discretion of NHA, be assigned to work at the School on a full or part time basis. If assigned to work at the School on a part time basis, the support staff may be assigned to work at other schools for which NHA provides services. The cost for such support staff shall be shared proportionately among the schools at which NHA has assigned the support staff to work. An individual assigned to work at the School that is not teaching, but for which a license is required under applicable law, shall have the appropriate license.

E. Training. NHA shall provide or procure training in its methods, curriculum, program, and technology to all teaching personnel on a regular basis. Instructional personnel shall be required to obtain at least the minimum hours of professional development as required by applicable law. Non-instructional personnel shall receive training as NHA determines reasonable and necessary under the circumstances.

F. Background Checks and Qualifications. NHA shall comply with applicable law regarding background checks, unprofessional conduct searches and certification/licensure, as applicable, for all persons working in the School, the costs of which shall be included in the Budget.

G. Terms of Employment. No member of the staff at the School shall be subject to any covenant not to compete or other employment restriction as part of the terms of his or her employment with NHA for the Services.

H. Limitations on Discretion. All decisions made by NHA, and any discretion exercised by NHA, in its selection, hiring, evaluation, assignment, discipline, transfer, and termination of personnel, shall be consistent with the Budget, the Charter, the parameters adopted and included in the Educational Program, and applicable law.

ARTICLE IX

INDEMNIFICATION

A. Indemnification of Parties. To the extent not prohibited by the Charter or applicable law, the Parties hereby agree to indemnify, defend, and hold the other (the “**Indemnified Party**”), harmless from and against any and all third-party claims, actions, damages, expenses, losses or awards which arise out of (i) the negligence or intentional misconduct of the indemnifying party, (ii) any action taken or not taken by the indemnifying party, or (iii) any noncompliance or breach by the indemnifying party of any of the terms, conditions, warranties, representations, or undertakings contained in or made pursuant to this Agreement. As used herein, Indemnified Party shall include the party’s trustees, directors, officers, employees, agents, representatives and attorneys. The Parties may purchase general liability, property, or other insurance policies. Notwithstanding anything in this Agreement to the contrary, the Board shall not be precluded by

the terms of this Agreement from asserting or declining to assert a claim of governmental immunity.

B. Indemnification of Authorizer. The Parties acknowledge and agree that the Authorizer, its Board of Trustees, and its members, officers, employees, agents or representatives (collectively “**University**”) are deemed to be third party beneficiaries for purposes of this Agreement. As third party beneficiaries, NHA hereby promises to indemnify, defend and hold harmless the University from and against all demands, claims, actions, suits, causes of action, losses, judgments, liabilities, damages, fines, penalties, demands, forfeitures, or any other liabilities or losses of any kind whatsoever, including costs and expenses (not limited to reasonable attorney fees, expert and other professional fees) of settlement and prosecution imposed upon or incurred by the University, and not caused by the sole negligence of the University, which arise out of or are in any manner connected with the University Board’s approval of the School’s Charter Application, the University Board’s consideration of or issuance of a Charter, NHA’s preparation for or operation of the School, or which are incurred as a result of the reliance by the University upon information supplied by NHA, or which arise out of NHA’s failure to comply with the Charter or applicable law. The Parties expressly acknowledge and agree that the University may commence legal action against NHA to enforce its rights as set forth in this section of the Agreement.

ARTICLE X

INSURANCE

A. Insurance Coverage. NHA shall maintain such policies of insurance as required by the Charter, the Michigan Universities Self-Insurance Corporation (“M.U.S.I.C.”), and applicable law. Each party shall, upon request, present evidence to the other and the Authorizer that it maintains the requisite insurance in compliance with the provisions of this Article. In the event that the Authorizer or M.U.S.I.C. requests any change in coverage, NHA agrees to comply with any change in the type and amount of coverage, as requested, within thirty (30) days after notice of the insurance coverage change is provided to NHA. Each party shall comply with any information or reporting requirements required by the other party’s insurer(s), to the extent reasonably practicable.

B. Workers’ Compensation Insurance. Each party shall maintain workers’ compensation insurance as required by law, covering their respective employees.

ARTICLE XI

REPRESENTATIONS & WARRANTIES

A. Board and School. The Board represents and warrants, for itself and on behalf of the School, that: (i) it is legally vested with all power and authority necessary to operate a charter school under the Authorizing Law; (ii) it is legally vested with all power and authority necessary to execute, deliver and perform this Agreement, including without limitation, the power and

authority to contract with a private entity for the provision of educational, business administration and management services; (iii) its actions have been duly and validly authorized, and it has adopted any and all resolutions or expenditure approvals required for the execution of this Agreement; and (iv) there are no pending actions, claims, suits or proceedings, or, to its knowledge, threatened or reasonably anticipated against or affecting either the Board or the School, which if adversely determined, would have a material adverse effect on its ability to perform under this Agreement.

B. NHA. NHA represents and warrants that: (i) it is a corporation in good standing and is authorized to conduct business in the State of Michigan; (ii) it is legally vested with all power and authority necessary to execute, deliver and perform this Agreement; (iii) there are no pending actions, claims, suits or proceedings, or, to its knowledge, threatened or reasonably anticipated against or affecting NHA, which if adversely determined, would have a material adverse effect on its ability to perform its obligations under this Agreement; and (iv) it will comply with all registration and licensing requirements relating to conducting business under this Agreement, which the Board agrees to assist NHA in applying for such licenses and permits and in obtaining such approvals and consents.

ARTICLE XII

MISCELLANEOUS

A. Entire Agreement. This Agreement and any attachments hereto shall constitute the entire agreement of the Parties on the subject matter set forth herein. This Agreement supersedes and replaces any and all prior agreements and understandings regarding the subject matter set forth herein between the School and NHA.

B. Force Majeure. Except for payment obligations, and notwithstanding any other provisions of this Agreement, neither party shall be liable for any delay in performance or inability to perform due to acts of God, war, riot, embargo, fire, explosion, sabotage, flood, accident, labor strike, or other acts beyond its reasonable control; provided either party may terminate this Agreement in accordance with provisions contained herein if sufficient grounds exist as provided in the Article governing termination.

C. State Governing Law; Waiver of Jury Trial. This Agreement shall be construed, interpreted, governed and enforced pursuant to the laws of the State of Michigan, without regard to its conflict-of-laws principles. The Parties hereby waive the right to a jury trial in any action, proceeding or counterclaim brought by either NHA or the School against the other.

D. Notices. All notices and other communications required by this Agreement shall be in writing and sent to the Parties at the facsimile number or address set forth below. Notice may be given by: (i) facsimile with written evidence of confirmed receipt by the receiving party of the entire notice; (ii) certified or registered mail, postage prepaid, return receipt requested; or (iii) personal delivery. Notice shall be deemed to have been given on the date of transmittal if given by facsimile, upon the date of postmark if sent by certified or registered mail, or upon the date of delivery if given by personal delivery. For purposes of the foregoing, "**personal delivery**" shall include delivery by nationally recognized overnight courier (such as FedEx), if signed for by the recipient or a delegate thereof. Notices to the School shall be sent to the current address of the

then current Board President, with a copy to the then current Board attorney. The addresses of the Parties for the purposes aforesaid, including the address of the initial Board President, are as follows:

The School: South Arbor Charter Academy

E. Assignment. NHA may assign this Agreement with the prior written approval of the Board and in a manner consistent with the Authorizer's policies; provided, however, this Agreement shall not be assignable without prior written notification to Authorizer.

F. Amendment. This Agreement shall not be altered, amended, modified or supplemented except by memorandum approved by the Board and signed by both an authorized officer of the School and NHA and in manner consistent with the Authorizer's policies.

G. Waiver. No waiver of any provision of this Agreement shall be deemed or shall constitute a waiver of any other provision. Nor shall such waiver constitute a continuing waiver unless otherwise expressly stated.

H. Costs and Expenses. If any Party commences an action against another Party as a result of a breach or alleged breach of this Agreement, the prevailing Party shall be entitled to have and recover from the losing Party reasonable attorneys' fees and costs of suit.

I. Severability. If any term or provision of this Agreement is held by a court of competent jurisdiction to be invalid, void or unenforceable, the remainder of the terms and provisions set forth herein shall remain in full force and effect and shall in no way be affected, impaired or invalidated, and the Parties shall use their best efforts to find and employ an alternative means to achieve the same or substantially the same result as that contemplated by such term or provision.

J. Delegation of Authority. Nothing in this Agreement shall be construed as delegating to NHA powers or authority of the Board which are not subject to delegation by the Board under the Charter or applicable law.

K. Compliance with Law. Each party will comply with the Charter and laws applicable to the performance of such party's obligations hereunder.

L. Time of Essence. The Parties understand and agree that time is of the essence in performing their respective responsibilities under this Agreement.

South Arbor-Services Agreement (v1.123015)

CONTRACT SCHEDULE 6

PHYSICAL PLANT DESCRIPTION

PHYSICAL PLANT DESCRIPTION

Pursuant to Applicable Law and the Terms and Conditions of this Contract, including Article XI, Section 11.5, the Academy is authorized to operate at the physical facility or facilities outlined in this schedule. The Academy shall not occupy or use any facility until approved for occupancy by the Michigan Department of Licensing and Regulatory Affairs’ Bureau of Construction Codes.

Physical Plant Description 6-1

Site Plan 6-3

Floor Plan..... 6-4

Lease Agreement 6-5

Office of Fire Safety Approvals..... 6-29

Certificates of Use and Occupancy 6-31

1. Applicable Law requires that a school of excellence application and contract must contain a description of and the address for the proposed physical plant in which the public school academy will be located. See MCL 380.552(7)(i); 380.553(5)(f).

2. The address and a description of the site and physical plant (the "Site") of South Arbor Charter Academy (the "Academy") is as follows:

Address: 8200 Carpenter Rd.
Ypsilanti, MI 48197

Description: The Site contains a one-story, 53,428 square foot facility. The exterior of the facility is brick and vinyl construction. The initial building was constructed in 2000 and was then expanded in 2001, 2007 and 2012. The facility contains 30 classrooms, 11 restrooms, a gymnasium, library, music room, art room, conference room and various offices. The Site contains an outdoor play area and ample parking.

Configuration of Grade Levels: Kindergarten through Eighth Grade.

Term of Use: Term of Contract.

Name of School District and Intermediate School District:

Local: Milan Area Schools
ISD: Washtenaw

3. It is acknowledged and agreed that the following information about this Site is provided on the following pages, or must be provided to the satisfaction of the University Board or its designee, before the Academy may operate as a public school in this state.

- A. Narrative description of physical facility
- B. Size of building
- C. Scaled floor plan
- D. Copy of executed lease or purchase agreement

4. In addition, the Academy and the University Board hereby acknowledge and agree that this Contract is being issued to the Academy with the understanding that the Academy cannot conduct classes as a public school academy in this state until it has obtained the necessary fire, health and safety approvals for the above-described physical facility. These approvals must be provided and be acceptable to the University Board or its designee prior to the Academy operating as a public school. In cases of disagreement, the Academy may not begin operations without the consent of the University Board or its designee.

5. If the Site described above is not used as the physical facilities for the Academy, then Schedule 6 of this Contract between the Academy and the University Board must be amended pursuant to Article IX of the Terms and Conditions of Contract, to designate, describe, and agree upon the Academy's physical facilities. The Academy must submit to the University Board or its

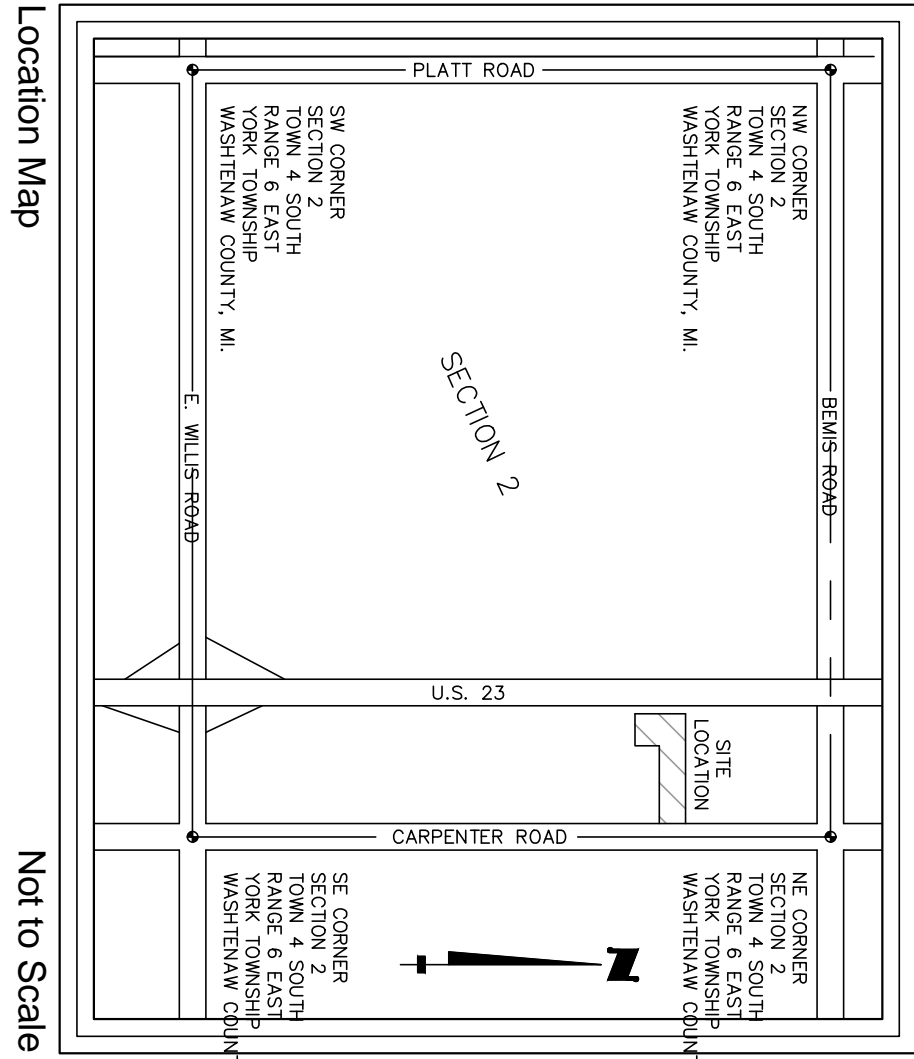

designee complete information about the new site to be actually used. This information includes that described in paragraphs 2, 3 and 4 of this Schedule 6. It is acknowledged and agreed that the public school academy cannot conduct classes as a public school in this state until it has submitted all the information described above, to the satisfaction of the University Board or its designee, and the amendment regarding the new site has been executed.

6. Any change in the configuration of grade levels at the Site requires an amendment to this Schedule 6 pursuant to Article IX of the Terms and Conditions of Contract set forth above.

LEASE

THIS LEASE ("**Lease**") by and between National Heritage Academies, Inc., a Michigan corporation, of 3850 Broadmoor SE, Ste. 201, Grand Rapids, Michigan 49512 ("**Landlord**"), and South Arbor Charter Academy, a school of excellence chartered under the laws of the State of Michigan, having an address of 8200 Carpenter Road, Ypsilanti, Michigan 48197 ("**Tenant**") is effective the 1st day of July 2016, (the "**Effective Date**"). For purposes of this Lease, Landlord and Tenant shall be referred to collectively as the "**Parties**."

RECITALS

A. Landlord (defined in Section 22.5), as tenant, and Charter Development, LLC, as landlord (together with its successors, assigns and successors in interest, the "**Master Landlord**") are party to that certain Master Lease Agreement effective January 1, 1999, as amended (the "**Master Lease**").

B. Landlord and Master Landlord amended the Master Lease to subject the Premises thereto and Landlord has the authority under the Master Lease to sublease the Premises to Tenant.

C. Tenant desires to sublease the Premises from Landlord, and Landlord desires to so sublease the Premises to Tenant, on the terms and conditions set forth herein.

NOW, THEREFORE, in consideration of the mutual covenants set forth above and herein, Landlord and Tenant agree as follows:

ARTICLE 1

The Premises and Other Agreements.

1.1 Premises. Landlord hereby leases to Tenant, on the terms and conditions hereinafter set forth, the real estate located in the Township of York, Washtenaw County, Michigan with an address of 8200 Carpenter Road, Ypsilanti, Michigan 48197 and more particularly described on Exhibit "A" attached hereto (the "**Land**"), and all improvements located on the Land (the Land and such improvements as they may exist from time to time, hereinafter referred to as the "**Premises**").

1.2 Master Lease. This Lease is subordinate and subject to the Master Lease. Landlord represents and warrants to Tenant that the terms of this Lease are not inconsistent with the terms of the Master Lease, and Tenant's compliance with the terms of this Lease will not constitute a breach of the terms of the Master Lease. Landlord hereby indemnifies Tenant against all liability, judgments, damages, claims, costs and expenses, including, without limitation, reasonable attorneys' fees arising out of or relating to Landlord's breach of the covenants, representations or warranties under the Master Lease.

ARTICLE 2

Term.

2.1 Initial Term and Renewals. The “**Initial Term**” of this Lease shall commence on July 1, 2016 and shall terminate effective June 30, 2017 (the “**Initial Term Expiration**”), unless sooner terminated as hereinafter set forth. Provided that (a) Tenant is not then in Default under this Lease, the Services Agreement, or the “**Charter**” (as defined in Section 13.1.E. below), and (b) this Lease, the Services Agreement and the Charter are still in full force and effect, then, unless a Notice of Non-Renewal is sent as provided below, on the Initial Term Expiration (and each anniversary thereof, during the Term of this Lease), this Lease shall be automatically renewed for successive one (1) year terms, upon the same terms and conditions as contained herein. The “**Term**” of this Lease shall mean the Initial Term and every renewal term entered into by Landlord and Tenant. The term “**Upcoming Expiration Date**” shall mean the Initial Term Expiration, or if the Initial Term Expiration has occurred, then the upcoming anniversary of the Initial Term Expiration. If either party, in its sole discretion, does not wish for this Lease to automatically renew, then at least one hundred eighty(180) days prior to the Upcoming Expiration Date, such party must notify the other party in writing that it does not wish the Term to be renewed (a “**Notice of Non-Renewal**”). Upon the timely delivery of a Notice of Non-Renewal, this Lease shall terminate on the Upcoming Expiration Date. If either party defaults under Article 13 of the Lease, the Term shall automatically end at the expiration of the then current one year Term and the Notice of Non-Renewal requirement shall be waived. The Parties acknowledge that the Tenant’s Authorizer, as part of any reauthorization or renewal, may require the Tenant to submit a new lease for review by the Authorizer.

ARTICLE 3

Rent.

3.1 Annual Rent. Tenant hereby leases said Premises for the Term above stated and agrees to pay Landlord annual rent of Nine Hundred Ninety-Four Thousand Eighty and No/100 Dollars (\$994,080.00), (“**Annual Rent**”) in twelve (12) equal monthly installments of Eighty-Two Thousand Eight Hundred Forty and 00/100 Dollars (\$82,840.00) (each, a “**Monthly Installment**”) each payable to Landlord (or to such other “Person” (defined in Section 22.9) or agent as Landlord may specify by written notice to Tenant) in advance on the first day of each calendar month during the Term. The term “**Lease Year**” is defined to mean any twelve month period from July 1 to June 30 of the following year, during the Term. If the Term ends before the end of a Lease Year, Annual Rent shall be prorated on a daily basis and paid in advance by Tenant on the first day of the last calendar month during the Term. Annual Rent may be adjusted upon determination of final costs for acquisition and construction of the Premises.

3.2 Additional Rent. Any amounts due from Tenant to Landlord hereunder, other than Annual Rent, shall constitute “**Additional Rent.**” Additional Rent shall, unless expressly provided to the contrary in this Lease, be payable from Tenant to Landlord on the same terms that Annual Rent is payable, with the next payment of the Monthly Installment coming due hereunder. Annual Rent and Additional Rent may be referred to collectively herein as “**Rent**”.

3.3 Payments. All Rent shall be paid to Landlord at Landlord’s address as set forth in the introductory paragraph hereof, or at such other address as Landlord may designate in writing. This Lease is a triple net lease and Rent shall be paid without setoff, counterclaim, recoupment, abatement, suspension, or deduction, except as expressly provided for herein. This Lease shall not terminate, nor shall Tenant have any right to terminate this Lease during the Term (except as otherwise expressly provided herein), nor shall Tenant be entitled to any abatement, deduction, deferment or reduction of Annual Rent hereunder (except as otherwise expressly provided herein), nor shall the obligations of Tenant under this Lease be affected by any interference with Tenant’s use of the Premises unless caused by Landlord or Master Landlord. It is the intention of the Parties hereto that the obligation of Tenant to pay Rent hereunder shall be separate and that the Rent shall continue to be payable in all events and that the obligations of Tenant hereunder shall continue unaffected, unless the requirement to pay or perform the same shall have been terminated pursuant to an express provision of this Lease.

3.4 Landlord’s Right to Increase. In the event Landlord makes future economic investments (a) in capital improvements to the Premises for any of the “Approved Purposes” (defined herein), or (b) in capital improvements (other than Approved Purposes) to the Premises, up to an amount of \$250,000.00 during any July 1 to July 30 period during the Term, or (c) in acquiring additional property for the Premises for the Approved Purposes, then in any such case, Annual Rent shall be adjusted by amendment to this Lease as of the immediately following July 1 in the Term to compensate Landlord for such additional economic investment. “**Approved Purposes**” shall mean any of the following purposes: (i) to comply with “Legal Requirements” (defined in Section 22.6); (ii) to comply with Landlord’s safety and security requirements; (iii) repairs or maintenance to, or replacement of essential building components and systems; and (iv) repairs, maintenance, replacement, or improvements necessary for Landlord to comply with its obligations under the Management Agreement and this Lease.

ARTICLE 4

Use, Occupancy and Purpose.

4.1 Permitted Uses.

A. Tenant shall use the Premises solely for operating a publicly chartered school or academy for grades kindergarten through 8th grade, and for ancillary or directly related uses.

B. Any other use of the Premises must be approved by Landlord in advance in writing.

4.2 Prohibited Uses.

A. Tenant shall not use or allow the use of the Premises for any unlawful purpose, nor shall Tenant allow the Premises to be used in violation of the Charter.

B. Tenant shall not allow the Premises to be used in violation of any public law, ordinance, rule or regulation, or in violation of any certificate of occupancy or certificate of compliance covering or affecting the Premises, or any part thereof. Tenant shall not suffer any act to be done or any condition to exist on the Premises or any part thereof which may in law constitute a nuisance, public or private, or which may make void or voidable, or increase premiums for, any insurance with respect thereto. Tenant shall not commit any waste, damage, or injury of or to the Premises or the fixtures or any part thereof and shall take all reasonable precautions and actions to prevent others from committing any of the foregoing.

C. Tenant covenants unto Landlord that during the Term, no part of the Premises shall be used for: the operation of any (i) private or commercial golf course, (ii) country club, (iii) massage parlor, hot tub facility, or suntan facility (iv) race track or other facility used for gambling, or (v) store the principal business of which is the sale of alcoholic beverages for consumption off premises; or the rental to others of residential property (as defined in Section 168(e)(2)(A) of the Internal Revenue Code).

D. Notwithstanding anything contained in this Lease to the contrary, in the event of a breach of any of the covenants contained in this Section 4.2, Landlord may immediately terminate this Lease by written notice to Tenant.

4.4 Educational Program. Tenant shall neither use the Premises nor allow the Premises to be used at any time during the Term in a manner that interferes with the performance of Landlord's obligations under the Services Agreement, including without limitation, the implementation and delivery of the Educational Program at the Premises. Tenant acknowledges that the terms of the preceding sentence are intended to allow Landlord to restrict access to certain portions of the Premises at certain times provided such access restriction is at all times consistent with the implementation and delivery of the Educational Program.

ARTICLE 5

Utilities.

5.1 Utility Connections; Utility Service. Landlord represents and warrants that construction of the Premises pursuant to Section 9.1 shall include provision of connections for all utility services necessary to the operation of a school at the Premises. Utility services, including without limitation gas, electricity, light, heat, water, sewage and telephone or other communication services, shall be contracted for and paid for by Tenant.

5.2 Disclaimers. Unless due to the gross negligence or willful misconduct of Landlord, Landlord shall not be liable for (i) any failure of water supply or electric current or any service by any utility provider or local government, or (ii) injury to persons, including death, or damage to

property resulting from steam, gas, electricity, water, rain or snow which may flow or leak from any part of the Premises or from any pipes, appliances or plumbing works from the street or subsurface or from any other place. Any express or implied rights, easements or licenses for view purposes or for the passage of light and air are hereby expressly disclaimed by Tenant. Except as otherwise expressly provided in this Lease or as may be provided in the Services Agreement, Landlord shall have no obligation to provide any services to Tenant or to the Premises.

5.3 Modifications and Replacements. If the existing services are required to be modified or replaced for any reason by any utility company or authorized agency, governmental or otherwise, then Tenant shall make such modifications or replacements at Tenant's expense and shall save Landlord harmless therefrom.

ARTICLE 6

Taxes.

6.1 Payment by Tenant. Tenant shall pay all (a) taxes levied on or assessed against the Premises during the Term, (b) special assessments levied on or assessed against the Premises during the Term that become due and payable during the term of this Lease, and (c) other similar charges levied on or assessed against the Premises during the Term and that become due and payable during the term of this Lease, except income and other taxes assessed against or by reason of Landlord's reversionary interest in or income from the Premises (the "**Taxes**"), (i) prior to the date on which any penalties, interest or late charges would apply, and to save Landlord harmless from the payment thereof, or (ii) to Landlord, in accordance with the terms of Section 6.4, provided Landlord makes the demand on Tenant required in Section 6.4. Taxes for the first and last year of the Term or any extension or renewal thereof shall be prorated on the basis of the fiscal period for which such tax is assessed.

6.2 Landlord's Option to Pay. If at any time after any tax, assessment or similar charge so charged or assessed against said Premises shall become due or payable and Tenant shall neglect or fail to pay the same, Landlord, without being obligated to do so, may pay the same at any time thereafter, and the amount of any and all such payments so made by Landlord shall be and is hereby declared to be payable as Additional Rent with the next Monthly Installment due hereunder.

6.3 Payment at End of Term. At the termination of this Lease by lapse of time or otherwise, all Taxes payable by Tenant under the provisions of this Article 6 shall be paid by Tenant to Landlord.

6.4 Monthly Installments. Upon demand of Landlord, (i) Tenant shall pay as Additional Rent, in addition to each Monthly Installment due hereunder, a sum equivalent to one-twelfth of the amount estimated by Landlord to be sufficient to enable Landlord to pay at least thirty (30) days before they become due, all such taxes, assessments and other charges, and (ii) Tenant will deliver and pay over to Landlord such additional sums as are necessary to make up any deficiency in the amount necessary to enable Landlord to fully pay such taxes, assessments and other charges. Any such tax payments from Tenant may be commingled with the general funds of Landlord and no interest shall be payable in respect thereof. If Landlord receives tax payments from Tenant in

accordance with this Section, then Landlord shall pay the full amount of taxes, assessments and other charges when due to the appropriate taxing authorities. In the event Tenant's tax payments under this Section are in any way insufficient to pay the full amount of taxes, assessments and other charges when due to the appropriate taxing authorities, then Tenant shall pay to Landlord, as Additional Rent, any shortfall within thirty (30) days of receiving a demand therefor from Landlord.

6.5 Non-Real Property Taxes. In the event that the City, County, State, or any other political subdivision that has taxing authority over the Premises shall, during the Term, impose upon Landlord any tax or other governmental charge in lieu of all or any part of the Taxes (a "**Non-Real Property Tax**"), such Non-Real Property Tax shall, for purposes of this Section, be treated as if it were included in the Taxes. Landlord agrees to furnish to Tenant upon request a separate accounting and supporting documentation of each Non-Real Property Tax.

6.6 Receipts. Upon demand of Landlord within ninety (90) days after the date all or any part of the Taxes are payable by Tenant, Tenant shall provide to Landlord official receipts of the appropriate taxing authority or other proof satisfactory to Landlord of the payment of such Taxes.

ARTICLE 7

Insurance.

7.1 Tenant will cause to be maintained policies of fire and extended coverage insurance on all buildings, structures, fixtures and improvements now or hereafter situated on the Premises and all other property leased hereunder in their full replacement cost. Such policies shall have no greater than eighty (80%) percent co-insurance provision and shall contain the standard "agreed amount" clause for evaluating replacement cost. Such policies shall name Tenant, Landlord, other parties designated by Landlord and the "first mortgagee" (defined in Section 22.3) as their interests may appear as insureds and such insurance shall be carried by an insurance company or companies approved by Landlord and the first mortgagee. Tenant shall make available to Landlord on request copies of said policies. Notwithstanding the aforesaid, in no event shall the manner, forms, companies, sums or length of terms be less than that required by the first mortgagee according to the terms and provisions of the "first mortgage" (defined in Section 22.2).

7.2 Each such policy shall include: (i) a standard mortgagee clause in favor of the first mortgagee; (ii) a provision to the effect that the waiver of subrogation rights by the insured does not void the coverage; (iii) a provision that the policy shall not be changed or canceled without at least thirty (30) days' prior written notice to Landlord and the first mortgagee; and (iv) a provision that any forfeiture of the policy due to an act of Tenant shall not affect the validity insofar as Landlord or the first mortgagee are concerned.

7.3 From time to time as required by Landlord or the first mortgagee, Tenant at its expense, shall obtain from an engineer or appraiser, in the regular employ of the insurer, or an appraiser, engineer, architect or contractor designated by Tenant and approved by Landlord and

the insurer, such evidence as may be required by such insurer to maintain the “agreed amount” clause eliminating the possibility of any co-insurance penalty.

7.4 If Tenant shall refuse or fail to so insure and keep insured the Premises and keep such policies in Landlord’s and first mortgagee’s possession, Landlord may at its election procure and from time to time renew such insurance, and the amounts expended therefore shall be Additional Rent due from Tenant with the next installment of Rent accruing hereunder and may be collected in the same manner as though Rent due hereunder.

7.5 Upon demand from Landlord, Tenant shall pay in advance as Additional Rent, a sum equivalent to one-twelfth of the amount estimated by Landlord to be sufficient to enable Landlord to pay at least thirty (30) days before they become due all insurance premiums on all policies of insurance required or allowed to be carried by Tenant hereunder. Such Additional Rent may be commingled with the general funds of Landlord and no interest shall be payable in respect thereof. Upon demand by Landlord, Tenant will pay Landlord, as Additional Rent, such additional sums as are necessary to make any deficiency in the amount necessary to enable Landlord to fully pay such premiums.

7.6 Landlord shall have no liability for damage to or loss of personal property located upon the Premises, unless and to the extent caused by Landlord.

ARTICLE 8

Casualty; Restoration.

8.1 If the Premises are damaged by fire or other casualty (a “**Casualty**”), Tenant shall give immediate written notice thereof to Landlord and the first mortgagee (“**Tenant’s Casualty Notice**”). Landlord shall, within 60 days after receipt of Tenant’s Casualty Notice, deliver to Tenant a good faith estimate (the “**Damage Notice**”) of the time needed to repair the damage caused by such Casualty (“**Restoration**”).

If the Premises is damaged by Casualty such that Tenant is prevented from conducting its business in the Premises in a manner reasonably comparable to that conducted immediately before such Casualty and Landlord estimates that the damage caused thereby cannot be repaired within 210 days after the commencement of repairs (the “**Repair Period**”), then Tenant may terminate this Lease by delivering written notice to Landlord of its election to terminate within 30 days after the Damage Notice has been delivered to Tenant.

If a Casualty occurs and (1) Landlord estimates that the damage cannot be repaired within the Repair Period, (2) regardless of the extent of damage, (a) the damage occurs during the last twelve (12) months of the Term or (b) the damage is not fully covered by Tenant’s insurance policies or any insurance Landlord may carry on the Premises or (c) Landlord makes a good faith determination that restoring the damage would be uneconomical, or (3) Landlord is required to pay any insurance proceeds arising out of the Casualty to a first mortgagee, then, in any such case, Landlord may terminate this Lease by giving written notice of its election to terminate within 30 days after the Damage Notice has been delivered to Tenant.

If neither party elects to terminate this Lease following a Casualty, then Landlord shall, within a reasonable time after such Casualty, begin to repair the Premises and shall proceed with reasonable diligence to restore the Premises to substantially the same condition as they existed immediately before such Casualty; however, Landlord shall not be required to repair or replace any improvements, alterations or betterments made by Tenant within the Premises (which shall be promptly repaired and restored by Tenant at Tenant's sole cost and expense) or any furniture, equipment, trade fixtures or personal property of Tenant or others in the Premises or the Project, and Landlord's and Tenant's obligations to repair or restore the Premises shall be limited to the extent of the insurance proceeds actually received by Landlord and Tenant respectively for the Casualty in question. If this Lease is terminated under the provisions of this Article 8, Landlord shall be entitled to the full proceeds of the insurance policies providing coverage for all alterations, improvements and betterments in the Premises (and, if Tenant has failed to maintain insurance on such items as required by this Lease, Tenant shall pay Landlord an amount equal to the proceeds Landlord would have received had Tenant maintained insurance on such items as required by this Lease).

8.2 Rent insurance proceeds, if payable, shall be applied by Tenant to the payment of, when and as due and payable, the installments of Rent and other payments due under this Lease until Restoration has been completed or until the Lease is terminated pursuant to any of the terms hereof. The balance, if any, of such proceeds shall be paid to Tenant or as Tenant may direct.

8.3 During any period of Restoration, Rent shall abate in proportion to the portion of the Premises that cannot be used for school purposes in Tenant's reasonable determination.

ARTICLE 9

Care of Premises.

9.1 Landlord shall cause the school building on the Premises to be constructed and maintained in a good and workmanlike manner, and in compliance with all Legal Requirements. Tenant will accept the possession of the Premises and keep the Premises in good condition and repair, and will yield and deliver the same to Landlord at the expiration or termination of the Lease in as good a condition as when taken, reasonable use and wear thereof, and damages thereto by Landlord or its agents or invitees, excepted. Tenant shall also maintain all portions of the Premises and adjoining areas in a clean and orderly condition, free of dirt, rubbish, snow, ice and unlawful obstructions, except for those attributable to Landlord's use or action. Tenant may not make any repairs, alterations, additions, changes or improvements to the Premises, except as described above in Section 5.3, without the written consent of Landlord. All repairs, alterations, changes or improvements shall be completed and maintained by Tenant in good workmanlike condition, free and clear of all liens and encumbrances arising out of such work.

9.2 Without limiting the rights granted to Landlord under Article 4 of this Lease, Landlord shall have the right to enter upon the Premises for the purpose of making any repairs thereto and performing any work thereon which may be necessary by reason of Tenant's failure to make any such repairs or perform any such maintenance work as provided herein. Except in case of emergency, the privilege and right of entry shall be exercised at reasonable times and at

reasonable hours. Tenant shall pay the cost of any such repairs and maintenance work to Landlord, upon demand therefor and upon submission of satisfactory evidence of Landlord's payment of such costs which sums shall constitute Additional Rent.

ARTICLE 10

Liability.

10.1 To the extent permitted by law, Tenant agrees to save Landlord and the first mortgagee harmless from any and all liabilities, losses, damages, penalties, costs and expenses arising from any injury or death to any person or damage to any property in, on, or about the Premises which arise out of (i) gross negligence or willful misconduct of Tenant, or (ii) any noncompliance or breach by Tenant of any of the terms, conditions, warranties, representations, or undertakings contained in or made pursuant to this Lease. Tenant agrees to procure at its own expense public liability and property damage, single limit liability insurance for the benefit of Landlord, Tenant and the first mortgagee as their interests may appear, in amount not less than One Million Dollars (\$1,000,000) to keep such insurance in force during the Term hereof, and to deliver certificates of such coverage to Landlord at least annually. In the event Tenant defaults as to any such obligations, Landlord may obtain such insurance and charge the cost thereof to Tenant as Additional Rent, payable with the monthly installment next coming due.

10.2 Landlord agrees to save Tenant harmless from any and all liabilities, losses, damages, penalties, costs and expenses arising from any injury or death to any person or damage to any property in, on, or about the Premises to the extent caused by willful misconduct or negligence by Landlord. Landlord agrees to procure at its own expense public liability and property damage, single limit liability insurance for the benefit of Landlord and Tenant as their interests may appear, in amount not less than One Million Dollars (\$1,000,000) to keep such insurance in force during the Term hereof, and to deliver certificates of such coverage to Tenant; Landlord agrees to furnish to Tenant upon request certificates of insurance evidencing such insurance.

10.3 Each party hereto, for itself and its respective successors and assigns (including any person, firm or corporation which may become subrogated to any of its rights), waives any and all rights and claims for recovery against the other party, and its officers, employees, agents, and assigns, or any of them, on account of any loss or damage to any of its property insured under any valid and collectible insurance policy or policies, to the extent of any recovery collectible under such insurance. Notwithstanding the foregoing, this waiver shall not be applicable if it has the effect of invalidating any insurance coverage of Landlord or Tenant.

ARTICLE 11

Compliance.

11.1 During the Term, Tenant shall assure compliance with all Legal Requirements relating to Tenant, the conduct of Tenant's business or pertaining to or otherwise affecting the use

of the Premises; and Tenant shall reimburse Landlord for any damages or penalties suffered because of any such noncompliance. Landlord hereby represents that as of the Effective Date, the Premises is in compliance with all Legal Requirements; and Landlord shall reimburse Tenant for any damages or penalties suffered because of any such noncompliance.

ARTICLE 12

Assignment and Subletting.

12.1 Tenant shall not assign, transfer, sublet or otherwise allow the use by another Person of the Premises or any part thereof or any interest hereunder without first obtaining the written consent of Landlord, which may be withheld by Landlord for any reason. Landlord may, in its sole discretion, assign, transfer, pledge and convey its rights, title and interests in the Premises and/or this Lease, without the consent of or notice to Tenant; provided, however, the terms and conditions of this Lease as set forth herein as of the execution date of this Lease shall have not been modified or amended and shall be subject to Section 23.3 hereof.

ARTICLE 13

Default.

13.1 Tenant shall be in default upon occurrence of any of the following events (any of the following, a “**Default**”):

A. Failure by Tenant to pay any portion of Rent for a period of more than ten (10) days after Tenant receives written notice of such failure to pay from Landlord (a “**Monetary Default**”); provided in no case shall Landlord be obligated to send notice of failure to pay more than twice in any twelve (12) month period.

B. Failure by Tenant to comply with any term, provision, condition or covenant of this Lease (other than a Monetary Default or as specified in Subsection F. below), if such failure is not cured by Tenant within a period of thirty (30) days after Tenant receives written notice from Landlord specifying such failure.

C. Tenant’s becoming insolvent, as that term is defined by any federal or state law or regulation (the “**Insolvency Laws**”); the appointment of a receiver or custodian for all or a substantial portion of Tenant’s property or assets; the institution of a foreclosure action upon all or a substantial portion of Tenant’s real or personal property; the filing of a voluntary petition under the provisions of the Bankruptcy Code or Insolvency Laws; the filing of an involuntary petition against Tenant as the subject debtor under the Bankruptcy Code or Insolvency Laws, which is either not dismissed within sixty (60) days of filing, or results in the issuance of an order for relief against the debtor, whichever is later; or Tenant’s making or consenting to an assignment for the benefit of creditors or a common law composition of creditors, or if Tenant’s leasehold interest herein shall be levied on execution.

D. Expiration or discontinuance for any reason of the Charter granted to Tenant by its authorizer (the “**Charter**”), other than an expiration or discontinuance which results in a new Charter effective as of termination of the existing Charter and with terms which would not, in Landlord’s opinion, substantially alter Tenant’s ability to comply with the terms of the Lease, Services Agreement, or Charter.

E. Failure by Tenant to deliver the certificate required by Section 23.2 within the time required by such Section.

13.2 Landlord’s Remedies. Upon the occurrence of any Default and the lapse of any grace or cure periods without cure thereof, Landlord shall have the option to pursue any one or more of the following remedies upon notice to Tenant:

13.2.1. *Termination.* Terminate this Lease or terminate Tenant’s right to possession, and in either event, accelerate all obligations of Tenant owed to Landlord under the Lease and force Tenant to immediately surrender the Premises to Landlord. Tenant agrees to pay to Landlord on demand the costs which Landlord may suffer by reason of such termination. Immediately upon any termination Landlord shall be entitled to recover from Tenant (i) all outstanding and unpaid Rent as of the date of such termination, (ii) the unamortized cost of any initial work performed according to this Lease by Landlord in anticipation of Tenant’s occupancy, (iii) the amount of any Rent that was abated pursuant to this Lease, and (iv) all future Rent due for the remaining balance of the Term, which future Rent shall be discounted to present value using a discount rate equal to the U.S. Treasury Bill or Note rate with the closest maturity to the remaining term of the Lease as selected by Landlord.

13.2.2. *Possession.* Enter upon and take possession of the Premises and expel or remove Tenant and any other person who may be present, without terminating the Lease or being liable for prosecution or any claim for damages, and, if Landlord so elects, relet the Premises on such terms as Landlord may determine.

13.2.3. *Entry.* Enter upon the Premises without being liable for prosecution or any claim for damages, and do whatever Tenant is obligated to do under the terms of this Lease. Tenant agrees to reimburse Landlord on demand for any expenses which Landlord may incur in effecting compliance with Tenant’s obligations.

13.2.4. *Mitigation.* Landlord shall have a duty to mitigate damages in the event of a Tenant Default, provided, however, that Landlord shall not be obligated (a) to favor the Premises for re-letting in comparison to other real property owned or leased by Landlord in the vicinity of the Premises, (b) to discount or disregard any of the following factors regarding a potential new tenant for the Premises: term of proposed lease, proposed rent, proposed use and the creditworthiness and reputation of the proposed tenant, or (c) to spend more toward re-letting the Premises than Landlord would spend in leasing real property in the ordinary course of its business.

13.2.5. *Application of Proceeds.* Any proceeds of re-letting the Premises shall be applied to pay (i) first, all costs of Landlord incurred in connection with such re-letting (including without limitation, all costs and expenses of taking possession of the Premises, securing new tenants, including expenses for redecoration, alterations or other upfit costs), (ii) second, any indebtedness of Tenant other than Rent, (iii) third, all then-outstanding Rent due hereunder, and (iv) fourth, any future obligations of Tenant, including without limitation, Rent. Tenant agrees to pay to Landlord on demand any deficiency that may arise by reason of such re-letting within ten (10) days of notice of the same from Landlord, following a re-letting. In the event Tenant pays to Landlord all accelerated sums due, any amounts applicable to Rent following the date of re-letting shall be reimbursed to Tenant as received.

13.3 No termination of this Lease pursuant to this Section or repossession of the Premises or any part thereof or of any other property leased hereunder shall relieve Tenant of its liabilities and obligations under this Lease that accrue during the Term, all of which shall survive any such termination or repossession and, if the Premises or any part thereof shall not have been relet, Tenant shall pay to Landlord as and for liquidated and agreed current damages the then present value of the Rent and other sums and charges to be paid by Tenant until what would have been the end of the Term in the absence of such termination or repossession. Landlord shall make a good faith effort to relet the Premises and alleviate Tenant of additional damages. Exercise of any remedy hereunder by Landlord shall not exclude the right to exercise any other remedy hereunder. Notwithstanding any of the foregoing obligations of Tenant stated herein to the contrary, upon termination of this Lease or Tenant's dispossession of the Premises, Tenant will automatically be relieved from and after the date of such termination or dispossession of all personal liability for the performance of any covenants or obligations on the part of Tenant contained in this Lease thereafter to be performed except for those liabilities expressly stated to have survived such termination or dispossession as stated herein.

13.4 To the extent applicable, Tenant has been made aware that Master Landlord as landlord under the Master Lease, or National Heritage Academies, Inc., as tenant under the Master Lease or an Affiliate (defined in Section 22.1) of either or any other Person that enjoys an interest in the Premises seeks the benefits offered pursuant to the U.S. Department of Treasury New Markets Tax Credit program and may pursue other federal, state or city funds, subsidies (including any city real estate tax exemptions or abatements) or loans (collectively, the "**Benefits**") in connection with the use of the Premises, and as a result of the grant of the Benefits, the Premises may be subject to certain use restrictions. Tenant shall have no responsibility and bear no liability for any claims, fees, expenses, costs or other impositions arising from or in connection with the Benefits due to the termination of this Lease or Tenant's dispossession of the Premises.

ARTICLE 14

Waiver of Breach.

14.1 No waiver by either party hereto of any breach of any of the terms of this Lease shall be deemed to be a waiver of any other or subsequent breach.

ARTICLE 15

Surrender.

15.1 Upon the expiration or earlier termination of this Lease, Tenant shall (i) surrender the Premises in broom clean, in good condition, free and clear of all lettings and occupancies, (except those previously approved by Landlord), free and clear of all liens and encumbrances, except that part of the Premises which have been taken through eminent domain, if any, after the delivery hereof, and otherwise in the same condition as Tenant received the Premises on the first day of the Initial Term, except for the following (which are allowed to remain at the Premises): any alterations that Landlord has not required to be removed, normal wear and tear and loss by fire or other casualty losses for which insurance proceeds have been received by Landlord; (ii) surrender all keys for the Premises to Landlord and (iii) inform Landlord of all combinations on locks in the Premises. All installations, alterations, additions and improvements, including partitions which may have been installed by either Landlord or Tenant, shall remain upon the Premises and shall become Landlord's property, all without compensation, allowance or credit.

15.2 On or before the scheduled expiration of the Term, Tenant may elect to remove its personal property and any fixtures and equipment. Any of Tenant's items listed in the preceding sentence not removed at the end of the Term shall be considered abandoned, and Landlord may appropriate such items for itself, sell such items or otherwise dispose of the same in such commercially reasonable manner as Landlord deems expedient without any liability to Tenant or any parties claiming by, through or under Tenant. In the event the Term terminates for any reason on other than its scheduled expiration date, then Tenant shall have a period of time in which to re-enter the Premises to retrieve its personal property, beginning on the date the Term terminates and ending fifteen (15) days thereafter. Any damage caused to the Premises by such removal shall be repaired by Tenant no later than fifteen (15) days after the end of the Term, but no Rent shall be payable by Tenant for such period of time (and such continued use of the Premises by Tenant shall not be deemed a holdover or a renewal or as creating a periodic or other similar tenancy that might be implied by law). Tenant shall reimburse Landlord for any damage to any portion of the Premises caused by Tenant during the removal of any items contemplated for potential removal in this Section.

ARTICLE 16

Eminent Domain.

16.1 If all or any part of the Premises shall be taken by any Governmental Authority under power of eminent domain, or by private purchase in lieu thereof, all damages awarded for such taking shall belong to and be the property of Landlord, whether such damages shall be awarded as compensation for the taking of or diminution in value to the leasehold or the fee of the Premises and Tenant hereby irrevocably assigns to Landlord any award or payment to which Tenant may become entitled as a result thereof, provided, however, that Tenant shall be entitled to receive from such Governmental Authority compensation for its personal property so taken.

16.2 In the event that only a part of the Premises are so taken, and the part not so taken cannot be completed as an architectural unit for the use described in Section 4.1 hereof, Tenant shall have the option to terminate this Lease by serving written notice of termination on Landlord within sixty (60) days after the taking.

16.3 If only a part of the Premises shall be so taken such that the part not so taken can be completed as an architectural unit for the use described in Section 4.1 hereof, Landlord (or at Landlord's direction, Tenant) shall, as promptly as practicable, make a complete architectural unit of the remainder of the building on the Premises (but only to the extent of the proceeds received for such taking); and there shall be an abatement of the monthly Rent hereinabove provided for in an amount equal to the percentage of the Premises and the building so taken.

ARTICLE 17

Notices.

17.1 All notices and other communications required by this Agreement shall be in writing and sent to the Parties at the facsimile number or address set forth below. Notice may be given by: (i) facsimile with written evidence of confirmed receipt by the receiving party of the entire notice; (ii) certified or registered mail, postage prepaid, return receipt requested; or (iii) personal delivery. Notice shall be deemed to have been given on the date of transmittal if given by facsimile, upon the date of postmark if sent by certified or registered mail, or upon the date of delivery if given by personal delivery. For purposes of the foregoing, "**personal delivery**" shall include delivery by nationally recognized overnight courier (such as FedEx), if signed for by the recipient or a delegate thereof. Notices to the School shall be sent to the current address of the then current Board President, with a copy to the then current Board attorney. The addresses of the Parties for the purposes aforesaid, including the address of the initial Board President, are as follows:

ARTICLE 18

Self Help.

18.1 If Tenant shall at any time fail to make any payment or perform any act on its part to be made or performed hereunder, then Landlord without notice to Tenant, except when other notice is expressly provided for in this Lease and without waiving or releasing Tenant from the obligations of Tenant contained in this Lease, may (but shall be under no obligation to) make such payment or perform such act, and may enter upon the Premises for any such purpose, and take all such actions thereon as may be necessary therefore.

18.2 All sums to be paid by Landlord and all costs and expenses incurred by Landlord in connection with the performance of any such act referenced in Section 18.1, together with any consequential damages Landlord may suffer by reason of the failure of Tenant to make such payment or perform such act, and counsel fees incurred by Landlord in connection therewith or in enforcing its rights hereunder, shall be paid by Tenant to Landlord on demand as Additional Rent.

18.3 Tenant agrees to hold Landlord harmless from any inconvenience or interference with Tenant's operation of its business as a result of Landlord's exercising any rights granted under Section 18.1.

ARTICLE 19

Construction Liens.

19.1 Tenant will not create nor permit to be created or to remain, and will promptly discharge, at its sole cost and expense, any lien, encumbrance or charge upon the Premises or any part thereof, or upon Tenant's leasehold interest therein, except such as are created by Landlord or the first mortgagee.

ARTICLE 20

Environmental Matters.

20.1 Tenant shall not use or store any Hazardous Materials (as defined in Section 20.3) on the Premises, except in compliance with Legal Requirements.

20.2 To the extent directly related to the conduct of Tenant, Tenant's use of the Premises, or the operation of its business thereon, Tenant shall defend, indemnify (limited to the maximum indemnification allowed by Legal Requirements) and hold harmless Landlord, its employees, agents, officers and directors, from and against any claims, demands, penalties, fines, liabilities, settlements, damages, costs or expenses of whatever kind or nature, known or unknown, contingent or otherwise, arising out of, or in any way related to, (1) the presence, disposal or release of any Hazardous Materials by Tenant on, over, under, from or affecting the Premises or the soil, water, vegetation, buildings, personal property, persons thereon by reason of Tenant's action or animals on the Premises; (2) any personal injury (including wrongful death) or property damage (real or personal) arising out of or related to such Hazardous Materials existing on the Premises by reason of Tenant's action; (3) any lawsuit brought or threatened, settlement reached or government order relating to such Hazardous Materials existing on the Premises by reason of Tenant's action; and/or (4) any violation of Legal Requirements based upon or in any way related to such Hazardous Materials existing on the Premises by reason of Tenant's action including, without limitation, reasonable attorney's and consultant's fees, investigation and laboratory fees, court costs and litigation expenses.

To the extent directly related to the conduct of Landlord, Landlord's use of the Premises, or the operation of its business thereon, and to the extent permitted by law, Landlord shall defend, indemnify and hold harmless Tenant, its employees, agents, officers and directors, from and against any claims, demands, penalties, fines, liabilities, settlements, damages, costs or expenses of whatever kind or nature, known or unknown, contingent or otherwise, arising out of, or in any way related to, (1) the presence, disposal or release of any Hazardous Materials by Landlord on, over, under, from or affecting the Premises or the soil, water, vegetation, buildings, personal property, persons thereon by reason of Landlord's action or animals on the Premises; (2) any personal injury (including wrongful death) or property damage (real or personal) arising out of or related to such Hazardous Materials existing on the Premises by reason of Landlord's action; (3) any lawsuit brought or threatened, settlement reached or government order relating to such Hazardous Materials existing on the Premises by reason of Landlord's action; and/or (4) any violation of Legal Requirements based upon or in any way related to such Hazardous Materials existing on the Premises by reason of Landlord's action including, without limitation, reasonable attorney's and consultant's fees, investigation and laboratory fees, court costs and litigation expenses.

As used herein, “**Hazardous Materials**” means and includes petroleum, petroleum products, asbestos, asbestos-containing materials, radioactive materials, waste oils, solvents and chlorinated oils, polychlorinated biphenyls (PCBs), and any other water, material or substance that is defined as hazardous or toxic under or regulated by any federal, state or local agent, law, rule or regulation (whether now existing or hereafter enacted or promulgated, as they may be amended from time to time) pertaining to environmental conditions, the environment, contamination or clean-up, including, without limitation, federal, state or local solid waste disposal rules, the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended, the Hazardous Materials Transportation Act, as amended, the Resource Conservation and Recovery Act, as amended, the Toxic Substances Control Act, as amended, the Water Pollution Control Act, as amended, the Clean Air Act, as amended, or any other applicable federal, state or local laws, regulations, publications of Governmental Authorities, or ordinances pertaining to Hazardous Materials (collectively, “**Environmental Laws**”).

20.3 Tenant shall promptly notify Landlord as soon as it knows of or suspects that any Hazardous Materials has been released or that there is a threatened release on the Premises and it shall take such action at its sole expense and with due diligence, as is necessary to insure timely compliance with Legal Requirements unless caused by Landlord. Landlord shall promptly notify Tenant as soon as its knows or suspects any Hazardous Materials has been released or that there is a threatened release on or in the Premises and Landlord shall take such action at its sole expense and with due diligence, as is necessary to ensure timely compliance with Legal Requirements unless caused by Tenant.

20.4 The provisions of this Article 20 shall be in addition to any and all obligations and liabilities of Tenant and Landlord may have to each other under Legal Requirements, and shall survive the expiration and termination of the Lease for any reason.

ARTICLE 21

Late Charges.

21.1 In the event of any failure by Tenant to pay Rent when due, Tenant shall also pay to Landlord, as Additional Rent, a late charge of five percent (5%) of such delinquent payment.

ARTICLE 22

Certain Definitions.

22.1 The term “**Affiliate**” means, with respect to any Person, any other Person that directly or indirectly through one or more intermediaries, controls, or is controlled by, or is under common control with, such first Person or any of its subsidiaries. As used in this definition, the term “**control**” means (a) the power to vote five percent (5%) or more of the securities or other equity interests of a Person having ordinary voting power, or (b) the possession, directly or

indirectly, of any other power to direct or cause the direction of the management and policies of a Person, whether through ownership of voting securities, by contract or otherwise.

22.2 The term “**first mortgage**” means any mortgage now existing or hereafter becoming a first and paramount lien on the Premises, subject to easements and restrictions of record, and all assignments, modifications, extensions and renewals thereof.

22.3 The term “**first mortgagee**” or “**holder of the first mortgage**” means the Person(s) who is(are) the holder(s) or beneficiary(ies) under the first mortgage from time to time.

22.4 The term “**Governmental Authority**” or “**Governmental Authorities**” means the government of the United States of America or any state or other political subdivision of either thereof, or any entity that exercises executive, legislative, regulatory, administrative, judicial, quasi-governmental or quasi-judicial functions of, or pertaining to, any such government, whether now or hereafter in existence having jurisdiction over the matter or matters in question.

22.5 The term “**Landlord**” is limited to mean and include, so far as covenants, agreements, stipulations or obligations on the part of Landlord are concerned, the tenant under the Master Lease to the Premises or its assignee, at the time in question, and in the event of any transfer or transfers of the title to such fee Landlord herein named (and, in case of any subsequent transfers or conveyances, the then grantor) will automatically be relieved from and after the date of such transfer or conveyance of all personal liability for the performance of any covenants or obligations on the part of Landlord contained in this Lease thereafter to be performed.

22.6 The term “**Legal Requirements**” means (i) all present and future applicable laws, statutes, treaties, rules, orders, ordinances, codes (including, without limitation, building and life-safety codes), regulations, requirements, permits, and interpretations by, and applicable judgments, decrees, injunctions, writs and like action even if unforeseen or extraordinary of any Governmental Authority (including, without limitation, Environmental Laws (defined herein), laws and regulations pertaining to health and safety, Insolvency Laws (defined herein), the Fair Housing Amendments Act of 1988, the Americans with Disabilities Act of 1990, and any other applicable Federal, State or local statute, law, ordinance, code, rule, regulation, order or decree regulating, relating to, or imposing liability or standards of conduct relating to barrier-free access or access of the handicapped or disabled to the Premises, and laws and regulations pertaining to the construction, restoration, use and operation of schools); and (ii) any reciprocal easement agreement, agreement, contract, instrument, restriction or similar agreement relating to the use, occupancy, possession, operation, alterations, repairs or maintenance of the Premises or otherwise affecting the Premises.

22.7 The term “**mortgage**” means any mortgage, deed of trust, deed to secure debt or other security instrument now existing as, or hereafter becoming a lien on the Premises.

22.8 The term “**mortgagee**” means the Person(s) who is(are) the holder(s) or beneficiary(ies) under any mortgage from time to time.

22.9 The term “**Person**” means any natural person, corporation, limited liability company, trust, joint venture, association, company, partnership, Governmental Authority or other entity.

ARTICLE 23

Subordination; Estoppel Certificates.

23.1 Tenant agrees that Landlord, or any mortgagee or lessor under any applicable ground or other underlying lease, may choose to make this Lease subordinate or paramount to any mortgages or ground or underlying leases now or hereafter affecting the Premises and to any and all advances to be made thereunder or to be secured thereby, and to the interest and charges thereon, and to all renewals, replacements and extensions thereof, and that upon any taking of possession of the Premises and accession to the interest of Landlord under this Lease by such lessor or mortgagee, Tenant shall attorn to and recognize such Person as landlord hereunder; provided the mortgagee, lessor under any such ground or underlying leases, Landlord or any trustee named in any such mortgages or leases shall agree (i) to recognize the Lease of Tenant in the event of foreclosure if Tenant is not in Default and (ii) that Tenant’s possession of the Premises under this Lease shall not be disturbed by such Person unless there is a Default. Tenant will execute promptly any instrument or certificate that Landlord may request to confirm such subordination.

23.2 Tenant, within ten (10) days after request by Landlord, will execute and deliver to Landlord (and any mortgagee or prospective mortgagee, or any current or prospective ground or underlying lessor, to the extent specified by Landlord) an estoppel certificate as to such reasonable facts and circumstances under this Lease as may be requested, but in any case including the following (i) identifying the commencement date and expiration date of this Lease, (ii) stating that this Lease is unmodified and in full force and effect, or is in full force and effect as modified, and then stating such modifications, (iii) stating that Tenant does not claim that Landlord is in default in any way, or listing any such claimed defaults, (iv) the amount of Monthly Installments then payable hereunder and Additional Rent, if any, as of the date of the certificate, (v) the date to which the Rent has been paid in advance, and (vi) the amount of any security deposit or pre-paid Rent. If Tenant fails to deliver the executed certificate to Landlord within the ten (10) day period, Tenant shall be in Default without benefit of any cure period, and the proposed certificate will be conclusively deemed executed by Tenant.

23.3 Upon the receipt of a notice from Landlord, Tenant agrees to pay all such sums owing under this Lease directly to the account or party specified in such notice.

ARTICLE 24

Quiet Enjoyment.

24.1 All times when Tenant is not in Default, Tenant's quiet and peaceable enjoyment of the Premises will not be disturbed or interfered with by Landlord or any Person claiming by, through or under Landlord.

ARTICLE 25

Holding Over.

25.1 Any holdover by Tenant in the Premises beyond the expiration or termination of the Term, shall not be deemed to be a renewal or extension of this Lease or any extension thereof or the exercise of any option to extend or renew this Lease, but said holding over shall be deemed a tenancy from calendar month to calendar month at a monthly Rent equal to two hundred percent (200%) of the Monthly Installment for the last month paid under the Term. A month-to-month tenancy arising by holding over under this Section may be terminated by either Landlord or Tenant giving written notice to the other party hereto on or before the day any Monthly Installment is due with termination becoming effective on the day the next following Monthly Installment would have otherwise become due.

ARTICLE 26

Remedies Not Exclusive; Waiver.

26.1 Each and every of the rights, remedies and benefits provided by this Lease to Landlord are cumulative, and are not exclusive of any other of said rights, remedies and benefits, or of any other rights, remedies and benefits allowed by law.

26.2 One or more waivers of any covenant or condition by Landlord will not be construed as a waiver of a further or subsequent breach of the same covenant or condition, and the consent or approval by Landlord to or of any act by Tenant requiring Landlord's consent or approval will not be deemed to waive or render unnecessary Landlord's consent to or approval of any subsequent similar act by Tenant.

ARTICLE 27

Right To Show Premises.

27.1 Landlord may show the Premises and may display about the Premises signs advertising the availability of the Premises at any time during the Term of this Lease.

ARTICLE 28

Landlord's Liability.

28.1 If Landlord fails to perform any provision of this Lease upon Landlord's part to be performed, and if as a consequence of such default Tenant recovers a money judgment against Landlord, such judgment may be satisfied only out of the proceeds of sale received upon execution of such judgment (subject to any prior mortgages and ground or underlying leases) and levied thereon against the right, title and interest of Landlord in the Premises and out of rents or other income from such property receivable by Landlord, and Landlord shall not be personally liable for any deficiency.

ARTICLE 29

General.

29.1 References in this Lease to Persons have been generalized for ease of reading. Therefore, references to a single Person will also mean more than one Person whenever such usage is appropriate (for example, "**Tenant**" may include, if appropriate, a group of Persons acting as a single entity, or as tenants-in-common). Similarly, pronouns of any gender should be considered inter-changeable with pronouns of other genders. If a party consists of more than one Person, such Persons shall be jointly and severally liable for the obligations of such party under this Lease.

29.2 Any waiver or waivers by either party of any of the provisions of this Lease will not constitute a waiver of any later breach of that provision, and any consent or approval given by either such party with respect to any act, neglect or default by the other party will not waive or make unnecessary the other party's consent or approval with respect to any later similar act, neglect or default by such other party.

29.3 In the event any provision contained herein shall be held to be invalid or unlawful for any reason, such provision shall be deemed to be stricken from this Lease, with the understanding that the remaining provisions hereof shall continue to be binding on the Parties.

29.4 Topical headings appearing in this Lease are for convenience only. They do not define, limit or construe the contents of any sections, paragraphs or clauses.

29.5 This Lease can be modified or amended only by a written agreement signed by Landlord and Tenant. The Parties further acknowledge and agree that any changes to this Lease other than the length of term due to automatic renewal shall be documented by an amendment to this Lease signed by both Parties and subject to prior review by the Authorizer.

29.6 All provisions of this Lease are and will be binding on the heirs, executors, administrators, personal representatives, successors and assigns of each of Landlord and Tenant.

29.7 The laws of the state in which the Premises are located will control in the construction and enforcement of this Lease, without regard to any laws or policies of such state regarding conflicts of law.

29.8 Time is of the essence of all terms and conditions of this Lease.

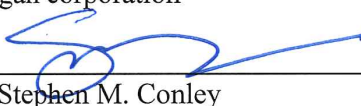

29.9. Landlord and Tenant each represent and warrant to the other that neither of them has contacted a broker, finder or similar Person in connection with this Lease, and to the extent permitted by law, each party shall defend, indemnify and hold the other harmless from and against all liability, cost and expense, including reasonable attorneys' fees, incurred as a consequence of any claim asserted by a Person alleging to have dealt with one of the Parties hereto in connection with this Lease.

[Signatures on Following Page]

IN WITNESS WHEREOF, the Parties hereto have executed this Lease as of the day and year first above written.

SCHEDULE 7

REQUIRED INFORMATION FOR
SCHOOL OF EXCELLENCE

SCHEDULE 7

REQUIRED INFORMATION FOR SCHOOL OF EXCELLENCE

Required Information for School of Excellence. This Schedule contains information required by the Code and the Contract. The required information for the Academy is contained in this Schedule 7.

- Section a. Governance Structure. The governance structure of the Academy is set forth in Section a of this Schedule.
- Section b. Educational Goal and Related Measures. The educational goal and related measures of the Academy are set forth in Section b of this Schedule.
- Section c. Educational Programs. The educational programs of the Academy are set forth in Section c of this Schedule.
- Section d. Curriculum. The curriculum of the Academy is set forth in Section d of this Schedule.
- Section e. Methods of Pupil Assessment. The methods of pupil assessment of the Academy are set forth in Section e of this Schedule.
- Section f. Application and Enrollment of Students. The application and enrollment of students criteria of the Academy is set forth in Section f of this Schedule.
- Section g. School Calendar and School Day Schedule. The school calendar and school day schedule procedures are set forth in Section g of this Schedule.
- Section h. Age or Grade Range of Pupils. The age or grade range of pupils to be enrolled by the Academy is set forth in Section h of this Schedule.

SECTION A

GOVERNANCE STRUCTURE

GOVERNANCE STRUCTURE

WHEREAS, the People of Michigan through their Constitution have provided that schools and the means of education shall forever be encouraged and have authorized the Legislature to maintain and support a system of free public elementary and secondary schools; and all public schools are subject to the leadership and general supervision of the State Board of Education; and the Legislature has authorized an alternative form of public school designated a "school of excellence" to be created to serve the educational needs of pupils and has provided that pupils attending these schools shall be eligible for support from the State School Aid Fund; and the Legislature has delegated to the governing boards of state public universities, community college boards, intermediate school district boards and local school district boards, the responsibility for authorizing the establishment of public school academies; and the University Board has approved the issuance of a contract conferring certain rights, franchises, privileges, and obligations of a school of excellence to the Academy Board.

The Academy is incorporated as a Michigan nonprofit corporation, organized on a non-stock, directorship basis for the purpose of operating as a Michigan school of excellence. The Academy shall conduct its affairs as a governmental entity exempt from federal income taxes under Section 115 of the United States Internal Revenue Code or any successor law. The Academy is a body corporate and is not a division or part of Central Michigan University. The relationship between the Academy and the University Board is based solely on the applicable provisions of the Code and the terms of this Contract.

The Academy Board shall have at least five (5), but no more than nine (9) members, as determined by the University Board. Academy Board members shall be appointed according to the terms of the Method of Selection, Appointment and Removal Resolution adopted by the University Board. The Academy Board has all the powers and duties permitted by law to manage the business, property and affairs of the Academy and for adopting policies by which the Academy shall be governed. The Academy Board is responsible for assuring that the Academy operates according to the Terms and Conditions of this Contract and Applicable Law. Contract Schedule 2: Bylaws, set forth a further description of the Academy Board's governance structure.

Academy Board members shall serve in their individual capacity, and not as a representative or designee of any other person or entity. The Academy Board shall ensure compliance with Applicable Law relating to conflicts of interest and prohibited familial relationships, including Article IV, Sections 4.4 and 4.5 of this Contract.

Pursuant to applicable law and the Terms and Conditions of this Contract, including Article III, Section 3.6, the Academy Board may employ or contract for personnel according to the position information outlined in Schedule 5. Before entering into an agreement with an educational service provider or an employee leasing company to provide services or to provide personnel to perform services or work at the Academy, the Academy Board must first comply with the Educational Service Provider Policies issued by The Center.

SECTION B

EDUCATIONAL GOAL AND RELATED MEASURES

EDUCATIONAL GOAL AND RELATED MEASURES

Pursuant to Applicable Law and the Terms and Conditions of this Contract, including Article VI, Section 6.2, the Academy shall achieve or demonstrate measurable progress for all groups of pupils toward the achievement of the educational goal identified in this schedule. Although an increase in academic achievement for all groups of pupils as measured by assessments and other objective criteria is the most important factor in determining the Academy's progress toward the achievement of the educational goal, the Center also considers other factors. Upon request, the Academy shall provide the Center with a written report, along with supporting data, assessing the Academy's progress toward achieving this goal. In addition, the University expects the Academy will meet the State of Michigan's accreditation standards pursuant to state and federal law.

Educational Goal to Be Achieved

Prepare students academically for success in college, work and life.

Measures to Assist in Determining Measurable Progress Towards Goal Achievement

To assist in determining whether the Academy is achieving measurable progress toward the achievement of this goal, the Center will annually assess the Academy's performance using the following measures.

Measure 1: Student Achievement

The academic achievement of all students in grades 2-8, who have been enrolled for three* or more years at the Academy, will be assessed using the following metrics and achievement targets:

Grade(s)	Metric	Achievement Targets
Grades 2-8	The average college readiness level based on scaled scores from the NWEA [®] MAP [®] reading and math tests administered in the spring.	Students enrolled for three* or more years will on average achieve scaled scores equal to or greater than the grade-level achievement targets for reading and math identified in this schedule.

*If the cohort of students enrolled for three or more years is not sufficient in size to conduct a valid analysis, the cohort of students enrolled for two or more years will be used.

Achievement Targets

NWEA MAP College Readiness Targets

Grade	MAP Reading Spring Target	MAP Math Spring Target
2	190	191
3	201	204
4	208	214
5	215	224
6	218	229
7	222	236
8	227	242

Measure 2: Student Growth

The academic growth of all students in grades 3 through 8 at the Academy will be assessed using the following metrics and growth targets:

Grade(s)	Metric	Growth Targets
Grades 3-8	Growth made by students from fall-to-spring in reading and math as measured by scaled scores on the NWEA MAP.	Students' fall-to-spring academic growth on average will demonstrate progress toward the grade-level achievement targets for reading and math identified in the schedule.

SECTION C

EDUCATIONAL PROGRAMS

EDUCATIONAL PROGRAM

Pursuant to Applicable Law and the Terms and Conditions of this Contract, including Article VI, Section 6.3, the Academy shall implement, deliver and support the educational programs identified in this schedule.

Mission Statement

South Arbor Charter Academy's mission statement is as follows:

Challenging each child to achieve:

Academic Proficiency

Moral Integrity

Personal Responsibility

Program Alignment to Mission, Vision and Values

South Arbor Charter Academy's ("Academy") educational program fulfills the Academy's mission, vision and values because it is grounded in a number of core beliefs that work together to guide the operation of the Academy. These core beliefs are the foundation of the Academy's educational program and, working together, ensure the Academy accomplishes what it has set out to do.

K-8 School Design

If students are to be adequately prepared for rigorous high school programming that leads to college readiness, then the elementary and middle school educational opportunities and experiences are critically important. The Academy's K-8 school design is central to ensuring a significant early investment in the lives of the students served.

Learning during the formative years of students' lives is foundational to future academic success. A student's reading skill at the end of third grade, for example, is a reasonably accurate predictor of whether or not that student will graduate from high school.¹ Early performance is important in all academic areas, and high-quality schooling across core academic content areas in the primary years is absolutely essential for later success in school and life. Studies by ACT note specifically that "the level of academic achievement that students attain by eighth grade has a larger impact on their college and career readiness . . . than anything that happens academically in high school."² The academic preparedness of students upon entry to high school greatly affects subsequent attainment: 82% of students who are placed in a high school's most intense curriculum go on to complete a bachelor's degree, compared to only 9% of those who are placed in a high school's least intense curriculum.³ The Academy's focus on providing exceptional learning opportunities for students in grades K-8 ensures that Academy students receive the high-quality education deserved and are well-prepared for rigorous high school study, leading to college readiness and life success.

The K-8 school design is not just beneficial to students academically, but prepares students to

³ Clifford Adelman, The Toolbox Revisited: Paths to Degree Completion from High School Through College (Washington, DC: U.S. Department of Education, 2006).

achieve success socially and emotionally as well⁴ Some suggest that the K-8 model is a more effective approach than the standard elementary, middle and high school models that many schools utilize. The transition to middle school can be highly challenging for many students at a time in life when students may not yet be prepared to cope with the increased responsibility and social pressures of middle school. This can result in regression on academic, emotional and social fronts as students seek to find footing in a new and unknown environment. A consistent K-8 schooling experience, with less transition and greater stability, serves to ensure that students develop appropriately during the middle school years and are better prepared to face the challenges of high school. In short, as a K-8 school, the Academy not only provides students with the foundation necessary to be successful academically, but also provides a greater sense of stability, security and community as students traverse the important adolescent years.

Curriculum

The Academy's curriculum is designed to prepare students for a rigorous high school curriculum to provide the best opportunity for college success. The Academy partners with National Heritage Academies ("NHA") to implement a curriculum built around the Michigan Academic Standards ("MAS"), which aligns with the mission and prepares students for success in high school, college and beyond.

The curriculum is aligned with the MAS for English language arts ("ELA") and mathematics and the Michigan Grade Level Content Expectations ("GLCE") for science, social studies, art and music and the Physical Education Content Standards and Benchmarks. This approach ensures students are learning the appropriate content for each grade level. Character development is an explicit and integrated component of the curriculum.⁵ Individual responsibility, integrity, personal character and effort are important contributors to success in school and life. In addition, the Academy instills character traits which are highly correlated with college success. With high-quality instruction, solid curricular tools to support instruction and rigorous assessment, the curriculum promotes academic success for students and equips students with the knowledge, understanding and skills needed to meet or exceed Michigan's standards and content expectations.

Core Content Areas

ELA

Literacy, which includes reading, writing and speaking, is a critical component of college- and career-readiness. "Low literacy levels often prevent high school students from mastering other subjects," and struggling readers are often excluded from academically challenging courses. More specifically, students who are able to comprehend complex texts are more likely to be successful after high school.⁶ Developing reading proficiency and strong literacy skills in elementary and

Tucker and Judy B. Coddling, Standards for our Schools: How to Set Them, Measure Them, and Reach Them (San Francisco, CA: Jossey Bass, 1998).

⁵ See Matthew Davidson and Thomas Lickona, *Smart & Good High Schools: Integrating Excellence and Ethics for Success in School, Work, and Beyond* (Cortland, NY: Center for the 4th and 5th Rs, 2005). Respect and Responsibility / Washington D.C.: Character Education Partnership.

⁶ ACT, Inc., *Reading Between the Lines: What the ACT Reveals About College Readiness in Reading* (Iowa City, IA, 2006).

middle grades is the cornerstone of the ELA curriculum, which upholds the MAS to ensure college- and career-readiness for all students. The ELA curriculum is designed to produce highly literate students who are proficient readers, evaluative writers and collaborative, analytical members of the classroom and future workplaces.

The MAS focus on five strands of literacy: reading, writing, speaking, listening and language. To best prepare students for school and life in the 21st century, each strand emphasizes the integration, critical analysis and production of a variety of media and technology. The reading standards focus on a gradual increase in text complexity to ensure students' readiness "for the demands of college- and career-level reading."⁷ The writing standards emphasize argument and informational writing "based on substantive claims, sound reasoning, and relevant evidence," as well as research, "both short, focused projects and longer, in-depth research."⁸ By challenging students to speak and listen, the standards require that "students gain, evaluate and present increasingly complex information, ideas, and evidence" through academic discussion, collaboration and formal presentations. The language standards emphasize students' growth and expansion of vocabulary, appreciation of word nuances and use of formal English in writing and speaking.

- In kindergarten through second grades, the curriculum emphasizes the foundations of reading. These include the ability to decode automatically, read with fluency and gain the capacity to comprehend increasingly complex texts across a range of types and disciplines. Student literacy is emphasized through rich, domain-specific content in a variety of fiction and nonfiction texts, including a true balance of informational and literary genres.
- In third through fifth grades, reading instruction is centered on complex, grade-appropriate texts to prepare students for the complexity of college- and career-ready texts. Reading instruction emphasizes a balance of informational and literary texts.
- In sixth through eighth grades, teachers of ELA, social studies and science each provide content-specific textual literary experiences. The middle school curriculum includes a blend of literature and substantial exposure to literary non-fiction, including historical and scientific documents.

For students to access grade-level texts with increasing complexity, the curriculum also focuses on the development of strong academic vocabulary. Students are exposed to extensive academic vocabulary through reading instruction, and practice is extended through listening, discussion and writing. Vocabulary instruction accentuates the nuances of word meanings and variances through a wide range of contexts. Discussion and collaboration are also a focus of the ELA curriculum, as students apply reading skills to develop habits for providing text-based evidence in both conversation and writing. Students' writing emphasizes analysis of complex texts by supporting ideas and arguments with textual evidence and evaluation. Students learn to produce a variety of text types, including argument, informative, narrative and research-based pieces. Collaboration and integration of technology are important aspects of the writing process as students plan, draft, revise, edit and publish a wide range of writing pieces. The ELA curriculum also ensures students demonstrate adequate mastery of the essential conventions and grammar of Standard English in

⁷ National Governors Association Center for Best Practices, Council of Chief State School Officers, "Key Points in English Language Arts," *Common Core State Standards* (Washington, D.C.: National Governors Association Center for Best Practices, Council of Chief State School Officers, 2010).

⁸ *Ibid.*

writing and speaking.⁹

Mathematics

If students are to be well-equipped for college and beyond, then students must be prepared through the kindergarten through eighth grade educational program to take Algebra II and other advanced mathematics courses in high school.

"A strong grounding in high school mathematics through Algebra II or higher correlates powerfully with access to college, graduation from college, and earning in the top quartile of income from employment."¹⁰ The development of a deep understanding of mathematical concepts makes such success possible. The Academy's mathematics curriculum is based on the MAS for mathematics. Through mastery of these standards, students develop a deep understanding of mathematical concepts. Students are also provided the opportunity to accelerate learning in seventh grade and complete Algebra I by eighth grade graduation, thus placing students on a college- and career-readiness trajectory. Research show that students who successfully complete Algebra I prior to entering high school are much more likely to complete other more advanced mathematics in high school and are "more than twice as likely to graduate from college" than students who do not complete Algebra I by eighth grade.¹¹

The National Council for Teachers of Mathematics has recognized the importance of the study of algebra in developing mathematical fluency and has also noted the importance of the study of other mathematics components such as number sense and operations, measurement, geometry, data analysis and probability and problem-solving. Number sense is developed through a variety of concrete models allowing students to use the area of the brain used for the comprehension of mathematical knowledge. Students are prepared to be fluent in computation using formal algorithms and also learn essential measurement and data analysis skills. In addition, students learn to make connections and apply mathematical knowledge through problem-solving and inquiry.

- In kindergarten through second grades, number sense and computational fluency are the main focus areas of students' learning. Students develop the skills necessary to progress into higher-level mathematics; through open-ended problem-solving, an increase of critical thinking skills and ability to see connections across mathematics as well as other subjects.
- In third through fifth grades, learning will shift from computation to fractional awareness. The ability to compose and decompose numbers, developed in the early grades, leads to a deeper understanding of fractions, percents, decimals and computation. Algebraic skills are developed as students begin working with patterns and equations with missing numbers.
- In sixth through eighth grades, the concentration will shift to the study of algebra and functions. Number sense remains a critical focus area through the study of integers, rational and irrational numbers, exponents and absolute values. Conceptual ideas are integrated through lab activities that provide exploratory opportunities for students to explicitly connect abstract ideas to concrete examples.

⁹ Coleman, David and Susan Pimentel, "Revised Publishers' Criteria for the Common Core State Standards in English Language Arts and Literacy," *Common Core State Standards* (Washington, D.C.: National Governors Association Center for Best Practices, Council of Chief State School Officers, 2012).

¹⁰ National Mathematics Advisory Panel, *Foundations for Success: The Final Report of the National Mathematics Advisory Panel* (Washington, D.C.: U.S. Department of Education, 2008).

¹¹ *Ibid.*

The mathematics curriculum also teaches effective mathematical communication by engaging students in thinking, reading and writing about mathematics. This helps students understand the foundational concepts for success in more complex mathematical coursework.

Science

As the Association for the Advancement of Science and the National Council on Science explains, developing college-ready and scientifically literate students involves teaching a mixture of content knowledge, the practices and skills of scientists and information on the nature of science. The Michigan GLCE were created around the work and philosophy of these organizations and the NHA curriculum aligns to the GLCE. The curriculum, which includes study in life science, physical science and earth and space science, incorporates the use of Full Option Science Systems (“FOSS”), Delta Science Modules (“DSM”) and non-fiction readers to give students hands-on opportunities to develop content knowledge about the results of scientific discoveries regarding the natural world. The curriculum and resources also provide students the chance to participate in the scientific process of inquiry and discovery through conducting investigations, using instruments and applying mathematical skills that model the process used by scientists to learn about the universe. It also incorporates the skills required by the MAS for Literacy in Science for sixth through eighth grades, which require students to do high-level thinking and problem solving, incorporating scientific reading, writing, discussing and presenting.

- In kindergarten through second grades, the content of the science curriculum focuses on scientific learning primarily through the study of events and phenomena in nature as observed through the five senses. Investigations at this level are modeled, simple and structured allowing students to write journals on personal discoveries, create simple pictographs of data and draw conclusions from observations under the direction of the teacher. The incorporation of non-fiction readers on each topic provide students opportunities to develop grade-level appropriate science vocabulary.
- In third through fifth grades, the curriculum builds on these foundational skills and directs students to begin exploring cause and effect connections between events (e.g., the sun rises every day and it gets warmer during the day, therefore, the sun provides heat to earth). Investigations for students in third through fifth grades will still often be modeled, but the investigations are more complex and involve more detailed measurements, use of a variety of tools such as balances and microscopes and require students to control for multiple variables. Students engage in the practices of scientists by charting data, completing lab reports and creating graphs in order to communicate results of investigations orally and in writing.
- In sixth through eighth grades, the curriculum includes further exploration of cause and effect relationships while also connecting knowledge of concepts to real world examples and solidifying congruence between students' understanding of phenomena to that of the scientific community. Investigations are more student-directed, from the guiding question through the scientific procedures, to the organizing, analyzing and reporting of data. Within each unit of instruction, students employ the skills of scientists by making connections with respect to the content of the unit using the methods of science. The scientific method is consistently integrated into content units throughout the year and students conduct science

investigations through closed and open lab investigations in response to posed questions during content studies.

Social Studies

According to the Michigan Department of Education (“MDE”), “the purpose of social studies instruction is to develop social understanding and civic efficacy. The GLCEs balance disciplinary content and processes and skills that contribute to responsible citizenship and form a foundation for high school social studies coursework.” The NHA social studies curriculum, which is aligned to the Michigan GLCE, ensures students are not only prepared for high school and college, but also prepared for life as global citizens. Developing students' understanding in the disciplines of history, geography, civics and government, economics and public discourse ensures readiness for college and responsible citizen involvement. In addition to supporting learning in these areas, the social studies curriculum also incorporates the skills required by the MAS for Literacy in History/Social Studies in sixth through eighth grades, which allow students to develop and utilize critical thinking skills by making connections, inferences and arguments around the content and learned skills. This focus on content, skills and critical thinking produces students who are knowledgeable in social studies and prepared to participate in society as informed citizens.

The curriculum supports the social studies disciplines that best prepare students to be contributing members of society. Students who master the social studies curriculum understand how history, geography, civics and economics interact in a global society. Through exposure to primary and secondary sources, students develop knowledge of shared national and world history and are able to make connections between the past and present as well as between cultures and government systems.

- In kindergarten through second grades, students learn about the social studies disciplines by developing an understanding of culture and community through the lens of “Myself and Others,” “Families and Schools” and “The Local Community.” In these early grades, students begin to learn about history and culture in the surrounding world. Students study personal history, family history and examine local examples of the community and school to become familiar with basic geography, economy and functions of government.
- In third through fifth grades, students explore the social studies disciplines through the context of Michigan and the United States. Students build on prior social studies knowledge and apply new concepts to the study of the state of Michigan, the regions of the United States and the early history of the United States. By fifth grade, students apply the concepts of social studies to the history of pre-European America through the adoption of the Bill of Rights in 1791.
- In sixth through eighth grades, students regularly practice how to make connections between historical events in the United States, the world and current events. Students also develop knowledge of the relationship between geography, history, economics and culture. In sixth and seventh grades, students apply social studies concepts to the study of the Western and Eastern Hemispheres during ancient and modern times. In eighth grade, students continue the study of United States history from the writing of the Constitution through Reconstruction. The middle school curriculum gives students opportunities to extend this basic knowledge to gather more complex information, describe concepts in more detail and deepen the understanding of the relationship between geography,

economics and civics.

Co-curricular Areas

The Academy intends to nurture high-achieving well-rounded students at the school. The Academy offers the following co-curricular areas: art, music, library and educational technology and character development.

Art

The study of art allows students to understand and appreciate the subject while understanding the significant role art plays in the expression of ideas throughout history. Students in lower grades learn to recognize and describe art forms from a variety of historical eras and places, while learning that art takes many forms and has many purposes. Students study and reproduce styles and techniques used by artists and discuss art by examining and critiquing the work of artists. Students in upper elementary and middle school grades focus on comparing and contrasting artwork from different time periods, cultures, artists and mediums. Historical and contemporary art is studied as students create a variety of original works using appropriate styles and mediums to express themes, tone, mood and images.

Music

Students study the basics of music theory, music appreciation and the work of great composers. Students first learn to identify basic music forms and patterns, describe elements of music using appropriate music vocabulary and sing and play basic instruments. By listening to a variety of music, students compare and contrast music from different composers, historical periods, cultures, styles and genres. Students continue to refine musical knowledge and skills by singing, playing, improvising and composing. In addition, students learn to identify and use key signature, meter signature, notation, bass and treble clef, tempo and dynamic markings as well as learn to perform and respond to a conductor's cues and make necessary adjustments.

Physical Education

Physical education includes a sequence of developmental experiences through which children learn by moving. Students first learn and practice basic movement skills and manipulate objects by throwing, catching, striking, pushing, pulling and climbing. Students take part in a variety of individual and group activities, games to increase body awareness, practice new skills and learn to move safely with respect to other people. Students also begin to learn about the physical and mental benefits of a healthy lifestyle characterized by physical activity. Students will then use movement skills in more complex ways by learning the concepts of fairness, positive attitude, teamwork and sportsmanship. Students learn to recognize the correlation between practice and mastery of skill and complete various types of drills to increase abilities. Students ultimately refine all the simple and complex skills necessary for physical activity of various types and focus on healthy lifestyles through nutrition and fitness.

Library and Educational Technology

The Library and Educational Technology Program is designed to expose students to a wide variety of classic and contemporary literature, instill a life-long love of reading and develop information literacy skills. The library collections contain specific materials that support the curriculum and provide students with a variety of high-quality literature and technological resources. The program

has been crafted to reflect expectations of students set forth in several authoritative sources, including:

- The *Big6* model for teaching information skills created by Mike Eisenberg and Bob Berkowitz (1998);
- Information Literacy Standards developed by the American Association of School Librarians (“AASL”); and
- The Association for Educational Communications and Technology (“AECT”).

Technology also plays a supporting role in the core academic curriculum. Classroom teachers plan lessons that leverage technology and provide technology resources for students. Students use technology to research, compose and present information related to topics of study. The Academy has a designated area to serve as the library and computer lab, enabling students to access technology needed to support the technology program. Moreover, students have access to a computer in the classroom to promote the integrated use of technology to support learning.

Character Development

To foster the desired culture, the Academy emphasizes strong personal character and accountability. Many schools offer character development programs, but the Academy melds character education throughout instruction and challenges the Academy community to model the desired traits. In this way, students develop a strong character while learning about virtues and different types of character. This approach to character development creates a culture within the Academy conducive to teaching and learning, and it makes parents and educators true collaborators in the learning process.

The Academy implements the character development curriculum to promote college readiness, create an environment that is conducive to teaching and learning and support the academic goals of the Academy.

During each month of the school year, the Academy focuses on a monthly virtue: wisdom, respect, gratitude, self-control, perseverance, courage, encouragement, compassion and integrity. Students develop and practice the virtues that, in time, become ingrained habits.

Students are encouraged to develop moral character, show performance character and interact well with others through social character. Character is both taught and caught; in other words, students acquire the behaviors that are modeled. The Academy will ensure school staff continually model moral, performance and social character in formal and informal settings. Students also participate in character development assemblies, where staff and other students speak on the monthly virtue and share how the virtue is implemented. Students are encouraged to share experiences and progress is recognized.

Learning is an Adult Responsibility

Student learning is, first and foremost, an adult responsibility. Nothing has a greater impact on student learning than great teaching in every classroom. If a student does not master the material that is taught in a classroom, the student has not failed; rather, the school has failed the student. In cases where students do not learn as expected, instruction must be adjusted in order to ensure that appropriate learning takes place for all students. Research has shown that the quality of

instruction strongly predicts the level of learning in a classroom—more strongly than does a student’s race or income.¹²

A typical student who scores at the 50th percentile in mathematics is likely to continue scoring at the 50th percentile two years later, if the student has an average teacher and attends an average school. However, the same student—with an effective teacher in an effective school—would rise to the 96th percentile within that same two-year period. Conversely, an average student would decline to the 3rd percentile over that time period with an ineffective teacher.¹³ A vast body of research supports the finding that teacher’s content knowledge, pedagogical knowledge and classroom management skills influence students’ learning. As such, the Academy works to manage instruction to ensure that students receive consistent, high-quality instruction.

Having one principal manage nearly every employee in the school would not set the Academy up for success. “One of the common misconceptions about leadership at the school level is that it should reside with a single individual—namely the principal.”¹⁴ In order to create a different kind of school culture, both a principal and other school leaders are needed. A “strong leadership team,” including “the principal and other administrators operating as key players and working with a dedicated group of classroom teachers” is essential to the success of the Academy.¹⁵ In order to effectively manage instruction, the Academy has adopted a distributed leadership model through which the Academy principal is supported by three deans. This model allows teachers to receive frequent classroom observation and feedback from Academy leaders.

Quality instruction is the result of clear expectations for teachers, frequent observation, consistent feedback and coaching, an intentional focus on developing professional practices through ongoing learning and coaching and the collaborative work of a professional learning community. The Academy has implemented a system to hire the most qualified teachers, provide high-quality professional development opportunities, hold teachers accountable for academic results and provide support through weekly classroom observations and feedback. In this way, the Academy effectively ensures appropriate learning for all students.

College Readiness

Students must leave the Academy after 8th grade well-prepared for success in high school, ready to enroll in rigorous college- and career-preparatory high school programming. Students must also understand, however, that success in high school, college and life is not only about academic aptitude; other factors affect success as well. Indeed, both academic and psychosocial factors have a bearing on how students succeed in school and in life.

¹⁵ Ibid.

The Academy's educational program thus includes a focus on developing college readiness in all students. Ultimately, the Academy promotes college readiness through a focus on both academic and psychosocial factors that influence school and life success: students develop key cognitive strategies and master content knowledge necessary to succeed in high school and beyond; students develop attitudinal and behavioral attributes correlated with college and life success; and students also develop contextual knowledge about high-school and college placement.¹⁶

These core beliefs, taken together, establish the foundation for the educational program of the Academy, and thereby ensure that the Academy both accomplishes its mission and vision and lives out its values.

Researched-based Practices

The educational program at the Academy is grounded in the systemic implementation of research-based educational practices that have been shown to produce positive results in terms of student learning. These research-based practices—which represent industry-leading standards and which characterize effective schools—have been refined and codified based on NHA's experience of managing charter schools over the past 15 years. These practices are:

- Measure Results
- Behave with Care
- Calendarize Priorities
- Manage Instruction
- Essential Learning Goals for All Students
- Teach Virtues
- Formative Assessment
- Utilize Common Curricular Tools
- Classrooms Exemplify Engagement, Clarity of Instructional Intent and Rigor
- Engage Parents
- Best Practices Become Common Practice

Faithful implementation of these practices enables the Academy to provide a high-quality K-8 education placing each student on the path to college readiness.

In order to know the Academy is fulfilling its responsibility to promote student learning, the Academy measures results at the student, classroom, teacher and school level. These results inform all of the Academy's decisions, from accountability to intervention. With data to inform decisions, relationships with students and amongst adults enable the Academy to act on evidence. An intentional school climate and culture has been established where all in the Academy behave with care for each student as a family does for its children, with the goal of self-managed classrooms.

Time is a critical resource for learning. Given this, classroom and school schedules reflect the principle that priorities need to be calendarized: math and ELA are scheduled to be taught in the morning, when possible; science and social studies are a focused priority; collaborative teacher planning time guides the implementation of the curriculum; teachers create, share and

¹⁶ See David T. Conley, *Toward a More Comprehensive Definition of College Readiness* (Eugene, WA: EPIC, 2007).

refine lessons and units in a professional learning community; and teachers examine evidence of student learning together with a focus on improving instruction and student learning. A distributed and shared leadership structure allows Academy leaders to manage instruction by observing and meeting one-on-one with all teachers on a weekly, scheduled basis in order to provide teachers with feedback and coaching.

The Academy's curriculum is deliberate in its college-preparatory design by defining essential learning goals for all students—and these learning goals closely align with the expectations outlined by the MAS. Since college and life success require more than academic aptitude, the Academy teaches virtues as an integrated and explicit part of the curriculum. Teachers and students use frequent, varying and ongoing assessment-based evidence to adjust instruction, and to implement and assess the Academy's curriculum. Additionally, the Academy utilizes common curricular materials that effectively support instruction and align with the Academy's curriculum.

A shared expectation across the Academy is that classrooms exemplify engagement, clarity of instructional intent and rigor. This is accomplished through effective instruction, classroom management and classroom curriculum design techniques. Further, teachers, staff and Academy leaders work to engage parents by initiating a positive relationship between the Academy and home. The Academy is a place where best practices become common practice. Research on effective schools consistently demonstrates the relationship between these practices and positive student outcomes.

Instructional Methods & Strategies

Learning is most effective when: 1) students are engaged in learning; 2) teachers can articulate what is being taught and students can describe what is being learned; and 3) students are performing work at the appropriate level of difficulty. Methods of instruction at the Academy, therefore, are designed to promote student engagement, to include clarity of instructional intent and to be appropriately rigorous. Since true learning requires that teachers shift the cognitive load to students in a purposeful and intentional way, teachers work to develop students' knowledge, understanding and skill gradually. Instruction takes various forms, including focused lessons, guided instruction, collaborative learning and independent work.¹⁷ The best approach is contextually-driven and contingent upon students' progress toward meeting instructional goals.

Beyond this, instruction includes effective, research-based instructional strategies embedded within daily lessons, implemented during instruction. Strategies with high probabilities of effectiveness¹⁸ are utilized based on the expected student learning outcomes of the lesson and are employed by teachers in accordance with student need. Such instructional strategies include the following, which have been identified as highly effective by researchers at Mid-continent Research for Education and Learning ("McREL"): 1) Identifying Similarities and Differences; 2) Summarizing and Note Taking; 3) Reinforcing Effort and Providing Recognition; 4) Homework and Practice; 5) Nonlinguistic Representations; 6) Cooperative Learning; 7) Setting Objectives and Providing Feedback; 8) Generating and Testing Hypotheses; and 9) Cues, Questions and

¹⁷ See Douglas Fisher and Nancy Frey, *Better Learning through Structured Teaching* (Alexandria, VA: ASCD, 2008).

¹⁸ See Robert Marzano, Debra Pickering, and Jane Pollock, *Classroom Instruction that Works: Research-Based Strategies for Increasing Student Achievement* (Upper Saddle River, NJ: Pearson Education, Inc., 2001).

Advanced Organizers. Teachers integrate these methods into instruction as appropriate, based both on student need and what research identifies as the most effective approach for content delivery.

The pedagogical approaches employed by teachers at the Academy ensure students master the essential learning goals articulated by the curriculum and develop college readiness in accordance with the Academy's educational design, the aligned Michigan GLCEs and the MAS. As teachers plan and implement instruction using these instructional methods and strategies, students gain the knowledge, proficiency and skills needed to perform at high levels.

Because effective instruction is the result of intentional planning, instruction is driven by a unique and collaborative planning approach. Planning is characterized by three sequential but interrelated types of planning: year-long planning, unit planning and daily planning. Each is discussed briefly below.

Year-long Plans: Teachers use year-long plans to ensure that students have the time and opportunity to learn all essential grade-level standards as outlined in the curriculum. Learning opportunities are organized using this instructional framework, an outline of what students are expected to learn over the course of the school year.

Unit Plans: Unit-level planning builds off of the year-long plan. Teachers use strategies and tools to routinely check for student understanding. Adjustments to instruction are made based on this student-elicited evidence. For example, a teacher may use small whiteboards, having students respond to questions or prompts. Students will write their answers and hold them up to show the teacher. Based on the students' level of understanding and responses, the teacher will adjust further instruction or grouping to meet the needs of the learners. Students also use the assessment results to track their learning and measure growth toward their academic goals using graphing or another form of record keeping.

Daily Plans: Daily instructional planning allows teachers to connect standards with specific instructional resources, effective teaching strategies, and the instructional methods that best support students' daily learning. Daily planning also includes developing strategies both to check for understanding and to determine if learning activities are providing intellectual engagement for each student.

Teachers work to differentiate instruction within each classroom to account for the diverse learning needs of the students who attend the Academy. According to Carol Ann Tomlinson, teachers may differentiate instruction by making adjustments to content, process, products and/or learning environment. Teachers work to ensure each student is provided with a rigorous academic and overall school culture leading to college readiness. By combining differentiation techniques with high-probability instructional methods and strategies teachers effectively promote and accelerate student learning.

Success in College, Work and Life

As noted above, the Academy's educational program has been designed to place students on a college readiness trajectory, effectively preparing students for success in college, work and life. The Academy's curriculum has been developed to ensure students are academically prepared to

enroll in rigorous high school programming upon leaving the Academy. Because college readiness and life success are dependent upon more than just academic aptitude, the Academy's educational program includes the development of attitudinal and behavioral characteristics associated with college and life success. It also provides students with opportunities to develop contextual readiness, including the development of awareness regarding high-school and college placement.

The Academy's curriculum, which is the core of its educational program, defines essential learning goals for all students. These learning goals prepare students academically and affectively for rigorous high school study and, subsequently, for college. The implementation of the curriculum enables the Academy to ensure all students are engaged with and progressively mastering instructional content. When instructional adjustments or interventions are needed, teachers work collaboratively under the direction of an instructional leader to ensure each student learns as required. Instruction is systemically designed to provide engagement, clarity of instructional intent and rigor, and student learning needs are addressed proactively through quick identification and response. Instructional leaders, including the principal and Academy deans, are actively involved in school-wide efforts to manage instruction through the provision of ongoing feedback and coaching based on regular and frequent classroom observations, one-on-one meetings and grade-level team meetings. The Classroom Framework of Instructional Practice is used by instructional leaders on an ongoing basis throughout efforts to capture and report teaching effectiveness within the Academy. This regular measurement of instruction, classroom management and classroom curricular design enables Academy leaders to provide practical feedback in a regular and timely manner and ensure all students receive high-quality instruction meeting individual learning needs. Academy leaders are also able to ensure all students are engaged in learning and progressing appropriately in terms of academic development.

Alignment of the Michigan Academic Standards

The Academy's educational program is driven by its curriculum, which includes the intended curriculum (essential learning goals for all students), the implemented curriculum (instructional content delivered by teachers in the classroom) and the assessed curriculum (the learning goals and objectives actually mastered by students). The curriculum's learning goals encompass academic standards in the core areas of learning including ELA, mathematics, science and social studies, as well as in other areas such as the arts, music and physical education. Because individual responsibility, integrity, personal character and effort are important contributors to success in school and life, and because character traits such as perseverance are highly correlated with college success, character development and the teaching of virtues is an explicit and integrated component of the curriculum.¹⁹ When coupled with high-quality instruction, solid curricular tools to support instruction and rigorous assessment, the curriculum promotes academic success, equipping students with the knowledge, understanding and skills needed to meet or exceed the performance standards currently established by the MDE.

Curriculum Modification and Adaptation

The Academy's educational program has been designed to ensure all students achieve at high

¹⁹ See Matthew Davidson and Thomas Lickona, *Smart & Good High Schools: Integrating Excellence and Ethics for Success in School, Work, and Beyond* (Cortland, NY: Center for the 4th and 5th Rs, 2005). Respect and Responsibility / Washington D.C.: Character Education Partnership.

levels. It is the Academy's responsibility to ensure students master the expected grade level content, as articulated through the curriculum and the Michigan GLCEs. If students struggle to master this content, or are not yet on a learning trajectory corresponding with college readiness, then instruction must be adjusted and, if needed, intervention must be provided. Likewise, if students master content more quickly than expected, then enrichment or extension opportunities should be provided. The Academy uses a three-tier approach to ensure students' individual learning needs are met, and this approach allows teachers to make appropriate adaptations or modifications in order to meet the needs of all students.

Academic & Enrichment Support

In the first tier, classroom teachers respond to student learning needs for all students within the context of regular classroom instruction. Students complete a diagnostic assessment at the beginning of each school year, providing useful information for planning more effective instruction, and short-cycle assessments are used during daily instruction to check for understanding. Students who struggle to demonstrate mastery of curricular learning goals are provided with supplemental support within the classroom; corrective approaches include re-teaching, cooperative learning opportunities, differentiated instructional strategies targeting individual student need, learning centers and alternative materials. Likewise, students who exhibit mastery more quickly than expected or demonstrate learning going beyond grade-level expectations are provided with extension and enrichment opportunities to extend learning. These extension opportunities allow students to increase the depth of knowledge pertaining to grade-level content. Extensions and enrichment may be provided through cooperative learning opportunities, differentiated instructional strategies targeting individual needs for enrichment, learning centers and through the provision of alternative learning materials.

If struggling students do not master content through the Academy's first tier of intervention, then a more prescriptive second tier of intervention is utilized. This is based on a review of the following:

- Teacher referral; data from classroom assessments administered through daily operations to check for understanding, formative assessments and end-of-instruction assessments
- Northwest Evaluation Association™ ("NWEA™") results
- State assessment results
- Interim assessment results
- Parent input

As needed, students receive supplemental interventions using programs and approaches proven to accelerate student learning. For example, recent research on Direct Instruction confirms this approach can produce rapid and consistent improvements for students at-risk of academic failure.²⁰ Intervention programs, such as SRA's *Corrective Reading* and *Corrective Math*, may be used to quickly increase student achievement. When possible, interventions align closely with core content being taught to the whole class.

²⁰ Michael Rebar, *Academic Acceleration in First Grade Using the Direct Instruction Model*, Cheney, WA: Eastern Washington University, 2007), available from http://www.ewu.edu/getset/Academic_Acceleration_G1_TR_2007-1.pdf.

Other intervention strategies are provided in the classroom in a workshop setting, or are delivered through supplemental support outside of the general education classroom, during non-core educational programming. These include one or more of the following: 1) Small group intervention services to provide more individualized assistance for students with similar academic needs; 2) Extended learning time before or after school for students needing more time to master content; and 3) Summer learning programs for students requiring extended learning opportunities during the summer months.

If data demonstrate some students continue struggling to make appropriate progress, then the teachers refer those students to the Academy's Intervention Assistance Team ("IAT") for consideration for tier three interventions. The IAT consists of a student's classroom teacher(s), parent/guardian, a special education teacher and other specialists, and includes, as needed, a speech occupational therapist, psychologist, school social worker or any other person who has pertinent knowledge about the student. The IAT reviews current intervention strategies, monitors student progress and works together as student learning progresses. The IAT may prescribe an intensified approach focusing on fewer high-priority reading and math skills. Also, one-on-one concentrated and focused tutoring are considered as needed.

If the third-tier of intervention is successful, then the IAT continues to monitor student progress on a regular, frequent basis. However, if the intervention does not successfully promote student learning, the Academy's special education team conducts a referral meeting to decide whether psycho-educational or other testing is needed to determine if the student has special needs as defined by the Individuals with Disabilities Educational Improvement Act ("IDEIA").

Special education programming and English Language Learner ("ELL") programming is outlined below.

Special Education

When making educational placement decisions for students with disabilities, the Academy will ensure parents are contributing members of the Individualized Educational Program ("IEP") team, and together the team will make decisions that are subject to requirements regarding provision of the least-restrictive environment. When determining how services will be delivered to students with disabilities, the Academy will follow all Special Education Rules as issued by the MDE. If a child with a current IEP enrolls in the Academy, the Academy will implement the existing IEP to the extent possible or will provide an interim IEP agreed upon by parents until a new IEP can be developed. IEPs will be developed, revised and implemented in accordance with IDEIA and state law and regulations.

The Academy will fully comply with federal laws and regulations governing children with disabilities as follows:

1. The Academy is responsible for providing a free, appropriate public education to children with disabilities enrolled in the Academy determined through an IEP to require Special Education programs and services.
2. The Academy will ensure that children who are suspected of having disabilities are properly evaluated by a multidisciplinary team, as defined in the Michigan Special

Education Rules, and that children who have already been identified are re-evaluated by the multidisciplinary team at least every three years.

3. When a multidisciplinary team determines a special education student requires Special Education programs and services, the Academy will ensure the IEP is fully implemented in accordance with IDEIA and reviewed on an annual basis or more frequently as determined by the IEP team.

English Language Learners

The Academy is committed to providing a high-quality education to ELL students. As such, the Academy has developed an ELL program to ensure ELL students are successful learners equipped by the Academy with the essential knowledge and skills necessary for academic success, both in school and beyond. The Academy's ELL program has been designed with a number of foundational principles in mind, based on the Guiding Principles of Effective Practice as identified by the Center for Equity and Excellence in Education at The George Washington University. These principles are as follows:

- ELL students will be held to the same high expectations of learning established for all students;
- ELL students will develop full receptive and productive proficiencies in English in the domains of listening, speaking, reading and writing, consistent with expectations for all students;
- ELL students will be taught challenging content to enable them to meet performance standards in all content areas, including reading and language arts, mathematics, social studies, science, the fine arts, health and physical education, consistent with those for all students;
- ELL students will receive instruction building on their previous education and cognitive abilities and reflecting their language proficiency levels;
- ELL students will be evaluated with appropriate and valid assessments aligned to state and local standards, taking into account the language acquisition stages and cultural background of the students; and
- The academic success of ELL students will be a responsibility shared by all educators, the family and the community.

The ELL program includes Sheltered English Immersion ("SEI") in the classroom and English Language Development ("ELD") for specific language acquisition. SEI is the vehicle for the acquisition of grade level content and is present in all teacher-directed instruction, while ELD is the vehicle for accelerated proficiency in the English language. ELL students receive ELD from a qualified teacher (e.g. TESOL or ESL certification) and may take place during the workshop time or other non-core instructional time. The sum of all services to ELL students is referred to as the ELL Program and these services are administered by the principal and the appointed ELL coordinator at the Academy.

Assessment Program

In order to support regular and frequent assessment of the Academy's educational program, and progress toward the Academy's charter Contract educational goals, the regular collection of evidence has been established. The educational program is assessed through three cycles of assessment: short-cycle, medium-cycle and long-cycle. While short- and medium-cycle

assessments are used to measure students' progress toward mastery of each educational objective within the Academy's curriculum, medium- and long-cycle assessments are used to track student and Academy performance over time. Evidence of student learning is gathered frequently and through multiple means, including Oral Language, Questioning, Writing, Projects and Performances and Tests. Teachers use assessment results to understand how students are progressing and to adjust the instruction to support student needs. Additional information about each assessment cycle is provided below.

1. *Short-cycle assessment:* Teachers use short-cycle assessment to inform needed adjustments to the sequencing and pacing of unit plans. Teachers also use short-cycle assessment data to adjust instructional strategies and delivery methods within daily lessons.
2. *Medium-cycle assessment:* Medium-cycle assessment data are used to measure the progress of students toward proficiency in terms of the standards assessed through the state assessment. Data from medium-cycle assessments are used as teachers plan unit and daily instruction.
3. *Long-cycle assessment:* Long-cycle assessment data are used to understand student learning over extended periods of time. Assessments in this category include: state assessments; NWEA norm-referenced, growth-modeled assessments, given twice per year; and the English Language Proficiency Assessment.

NHA's Common Assessment Model

Contributing to the set of short- and medium-cycle assessments NHA has established a common assessment model including the use of optional weekly/chapter curriculum-based assessments and required interim assessments, in accordance with curricular program sequences.

- Curriculum-based assessments are used as 'end-of-instruction' assessments and are administered on a regular and frequent basis between interim testing periods. Curriculum-based assessments measure student mastery of standards that have been the focus of recent instruction and that are tested on subsequently-administered interim assessments.
- Interim assessments are administered every 6 or 9 weeks and their data provide high-level evidence of student mastery of the standards taught over an extended period of time. Ultimately, the common assessment model provides a system of integrated assessments that well-align with instructional objectives, are easy to access and administer, are scored through a streamlined and automated process (to the extent possible), and provide solid evidence about where students are in their learning and what support is needed to ensure appropriate learning progress is made.

Implementation of NHA's Common Assessment Model

NHA's common assessment model affords assessments in both ELA and mathematics for grades K-8.

Curriculum-based assessments and interim assessments are not intended to be the only point of evidence of student performance for a recent instructional period, but they do represent one set of

common data—across students in a classroom, classrooms in a school, and schools—that reflects students’ progression toward mastery of grade level curriculum.

The below table summarizes the assessments the Academy administers to ensure progress toward the Academy’s charter Contract educational goals.

Assessment *	Cycle	Grades	Description and Dates/Months Used	Rationale
State Assessment ELA and Math Tests	Long Cycle	3-8	<ul style="list-style-type: none"> • Criterion-referenced assessment administered as required for state and federal accountability purposes • 1 x per year/Spring 	Required by Michigan Department of Education; provides data regarding student performance in relation to accountability goals
State Assessment Science Tests	Long Cycle	5 & 8	<ul style="list-style-type: none"> • Criterion-referenced assessment administered as required for state and federal accountability purposes • 1 x per year/Spring 	Required by Michigan Department of Education; provides data regarding student performance in relation to accountability goals
State Assessment Social Studies Tests	Long Cycle	6	<ul style="list-style-type: none"> • Criterion-referenced assessment administered as required for state and federal accountability purposes • 1 x per year/Spring 	Required by Michigan Department of Education; provides data regarding student performance in relation to accountability goals
NWEA Measures of Academic Progress® (MAP®) for Primary Grades	Long Cycle	K-1	<ul style="list-style-type: none"> • Norm-referenced, growth modeled assessment administered to measure student growth and performance in Reading, Language Usage (Gr. 2-8 only) and Math • 2 x per year/Fall & Spring 	Enables Academy to measure: 1) student performance and growth over time; 2) comparative school and student performance among nationally normed sample; and 3) teaching and schooling effectiveness. Fall test will serve as a baseline measure of student performance, and may identify students at-risk of academic failure. Spring test will show student learning growth, as well as year-over-year student, grade and school growth.
NWEA MAP	Long Cycle	2-8		
English Language Proficiency Assessment (“ELPA”)	Long Cycle	K-8	<ul style="list-style-type: none"> • Students identified as ELLs participate in annual assessment of proficiency in English. As needed, students will be identified as ELLs through the ELPA Screener • 1 x per year/March-April 	Student progress through the levels of proficiency in English will be measured. Specific language domains requiring additional instruction are revealed through the assessment. Evaluation of the Academy’s programming for ELLs will be facilitated through test results and the Annual Measurable Achievement Objectives.
Common Interim Assessments	Medium Cycle	3-8	<ul style="list-style-type: none"> • Paper-based criterion-referenced assessments • 8-9 week intervals 	Interim assessments measure student progress toward mastery of the school curriculum, MAS, and Michigan’s GLCEs. The assessments inform instructional design and focus, enabling teachers to support individual student learning needs and promote mastery of standards. Results serve as feedback on the overall curriculum allowing for

				changes, adjustments, and improvements.
Curriculum-based Assessments	Short Cycle	K-8	<ul style="list-style-type: none"> • Paper-based criterion-referenced assessments • Weekly/every 2-3 weeks 	Curriculum-based assessments measure student progress toward mastery of the school curriculum and NYS Learning Standards. The assessments will inform instructional design and focus, enabling teachers to support individual student learning needs and promote mastery of standards on a regular basis.
Ongoing Teacher Assessments (Opportunities to Check for Understanding)	Short Cycle	K-8	<ul style="list-style-type: none"> • Teacher-developed assessments to measure student learning in terms of daily instructional objectives • Daily 	Data gathered through multiple means informs teachers' understanding of student progress regarding daily and unit learning goals. The use of multiple assessment approaches provides teachers with regular and frequent feedback on student progress toward mastery of learning goals.

* These assessments are those the Academy intends to administer during its renewal charter term. However, the list is subject to modification in accordance with MDE guidelines and schedules and in order to meet the assessment needs of the Academy.

The Academy's assessment program begins with assessment of student performance, specifically student growth and student proficiency. Using the battery of instruments described above, the Academy regularly reports the instances and magnitude of academic growth for its students, comparing the evidence of growth at the Academy with the results from other schools around the country. Student proficiency rates are considered as the Academy tracks its performance. The Academy employs several definitions of proficiency: mastery of the Michigan state test, above the 50th percentile of the NWEA national population of test takers and meeting college academic readiness standards. By using several proficiency comparison points, the Academy communicates performance levels to students in the context of state expectations (state assessment) and national expectations (NWEA).

Measures of student growth and proficiency are rolled into Academy-level statistics, where further analysis is often conducted. For example, in order to understand proficiency, the Academy may employ both absolute proficiency and risk-adjusted measures, which accommodate the important context variables related to student achievement. These measures, taken together, ensure the Academy appropriately tracks student learning and overall progress toward meeting the educational goals outlined in its charter Contract.

Middle School: Success in College, Work and Life

As introduced above, the educational program has been designed to be highly rigorous and to promote student engagement with classroom content. Because preparing students for college readiness is one of the principles upon which the Academy's entire educational program is based, its middle school program is designed to promote learning placing students on a college readiness trajectory. The Academy's educational program, including its curriculum and its instructional approach, provides middle school students with the types of knowledge, skill, understanding and behavior attributable to those who are enrolled in rigorous high school programming and those who, in turn, are successful in college, work and life.

In addition to its curriculum and its instructional approach, the Academy employs various strategies at the middle school level to ensure middle school students gain the skills required to be prepared for success in college, work and life. First, students engage in writing across the curriculum. David Conley identifies writing as one of the “two academic skills that are repeatedly identified as being centrally important to college success.”²¹ Because of this, the Academy works to provide students with ample opportunities to write—not just in ELA, but in other academic areas as well. This not only promotes college readiness in students, but also increases student performance in content areas like reading, math, science and social studies.²² Second, the Academy’s mathematics program has been designed to allow students to complete Algebra I by 8th grade. Algebra I is known to be an important gateway to the study of higher mathematics in high school; the Academy’s focus on preparing students to take more advanced mathematics programming in high school is consistent with its commitment to promote college readiness in all students and helps students develop the skills necessary to be successful in high school, college, work and life.

Educational Development Plans (“EDP”)

As per P.A. 141 of 2007, the Academy provides students with the opportunity to develop EDPs in grade seven. These EDPs include students’ personal information, career goals, assessment results, educational/training goals, plans of action for high school and post-secondary and post-school options, in accordance with the requirements of the law. EDPs are reviewed by parents as appropriate.

Program Evaluation

The Academy’s curriculum is designed to promote learning in accordance with the Academy’s goals and the requirements of the MDE. A key activity in determining the effectiveness of the Academy’s educational program is the alignment of the Academy’s various assessment practices to the academic standards articulated through Michigan’s standards. Such alignment allows Academy instructional staff and leadership to continuously monitor student progress against those standards. Through its partnership with NHA, the Academy has access to a suite of measures and assessments providing mounting evidence of student growth and competency with respect to the educational goals and expectations of the State of Michigan. These measures enable the Academy to evaluate if its educational program is being implemented effectively for all students.

Building an instructive suite of assessments is more than just picking tests to utilize. Each instrument to be used must be evaluated for what it assesses and how the constructs it employs for measuring student learning relate to the overarching goal of mastery of the Academy’s curriculum and the aligned GLCEs, MAS or Content Standards. Based on its partnership with NHA, the Academy has access to various vertical alignment documents matching data produced by assessments of the Academy’s curriculum with the data captured by the NWEA MAP, which will be predictive of performance on state assessments. Additionally, NWEA customizes its instrument to the state assessment, so the measurement topics described in the NWEA data can be aligned with the Academy’s curriculum and with the expectations outlined by the state.

²¹ Conley, D. (2010). *College and Career Readiness*. San Francisco, CA: Jossey-Bass.

²² See Reeves, D. “The Write Way.” *The American School Board Journal* 197(11): 46-47.

Each of these pieces, including teacher developed assessments, Common Assessments from NHA, NWEA MAP, other interim assessments and the state assessment must work together to produce a complete portrait of student learning if the Academy is to understand whether its educational program is successfully implemented and effective. Teacher-developed assessments are delivered in accordance with the implementation of the curriculum in order to determine student learning progress. Notably, Scoring Scales can be used to measure student learning progress on all Educational Objectives, and scores are tracked by both teachers and students in order to monitor student learning growth over time. The tracking of learning by students is a powerful tool in the learning process, as it “provides a vehicle for students to establish their own learning goals and to define success in terms of their own learning . . . allowing [them] to see their ‘knowledge gain’ throughout a grading period.” This is important because it “elicits ‘intrinsic’ motivation” and promotes student engagement with learning.²³ In addition to teacher-developed assessments, periodic interim assessments, which are also designed to measure students’ mastery of the curriculum’s Educational Objectives, may be used. Data from teacher-developed and common interim assessments are analyzed by teachers and Academy leadership to understand areas of student learning need and to determine the degree to which the educational program is effective in meeting the needs of all students. Predictive analytics are performed with assessment data to gauge the likelihood of student success on the state assessments, and interventions are subsequently organized, when needed, in order to promote student growth and mastery of curricular content.

The Academy also utilizes NWEA growth-modeled, criterion-referenced assessments to measure growth rates and proficiency levels of all students, as determined by NWEA’s norm-referenced criteria. NWEA assessments are administered at least two times per year and assessment results are reviewed after each administration. Fall test data serves as a baseline measure of student performance and may identify students at-risk of academic failure. Spring test data shows student learning growth within the year as well as year-to-year growth. Disaggregated data from NWEA assessments is used to identify specific student groups within the Academy that may be struggling with growth or proficiency. Additionally, Academy leadership utilizes this data to identify student learning needs within the Academy as a whole, looking for areas needing improvement within and across grade levels, in specific classrooms or in specific content or subject areas. NWEA assessment data are also utilized to identify gaps in the intended and implemented curriculum, and therefore help teachers during instructional planning.

The Academy strongly believes this balanced and integrated approach to evaluating the performance of its educational program ensures students progress appropriately. Results are measured at the school, classroom, teacher and student level in order to ensure all students’ learning needs are met while the Academy also progresses appropriately in terms of overall goals.

SECTION D
CURRICULUM

CURRICULUM

Pursuant to Applicable Law and the Terms and Conditions of this Contract, including Article VI, Section 6.4, the Academy shall implement, deliver, and support the curriculum identified in this schedule.

The Academy has adopted the NHA curriculum and Mango Languages as world language curriculum. The curriculum for all subjects and courses is identified in this schedule or is available electronically and accessible at the following link:

- Mango Languages <https://connect.mangolanguages.com/southarbor/login?u=173022>

The curriculum has been reviewed and approved by The Center for Charter Schools.

Elementary

The following subjects/courses are offered at the Academy:

Course	K	1	2	3	4	5	6	7	8
English Language Arts	X	X	X	X	X	X	X	X	X
Mathematics	X	X	X	X	X	X	X	X	X

Strand: Reading – Literature

Topic: Key Ideas and Details

Anchor 1: Read closely to determine what the text says explicitly and to make logical inferences from it; cite specific textual evidence when writing or speaking to support conclusions drawn from the text.

Grade	Common Core State Standard
11-12	RL.11-12.1 Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text, including determining where the text leaves matters uncertain.
9-10	RL.9-10.1 Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.
8	RL.8.1 Cite the textual evidence that most strongly supports an analysis of what the text says explicitly as well as inferences drawn from the text.
7	RL.7.1 Cite several pieces of textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.
6	RL.6.1 Cite textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.
5	RL.5.1 Quote accurately from a text when explaining what the text says explicitly and when drawing inferences from the text.
4	RL.4.1 Refer to details and examples in a text when explaining what the text says explicitly and when drawing inferences from the text.
3	RL.3.1 Ask and answer questions to demonstrate understanding of a text, referring explicitly to the text as the basis for the answers.
2	RL.2.1 Ask and answer such questions as who, what, where, when, why, and how to demonstrate understanding of key details in a text.
1	RL.1.1 Ask and answer questions about key details in a text.
K	RL.K.1 With prompting and support, ask and answer questions about key details in a text.

Note: Grades 9-12 are included for information and acceleration possibilities only.

Strand: Reading – Literature

Topic: Key Ideas and Details

Anchor 2: Determine central ideas or themes of a text and analyze their development; summarize the key supporting details and ideas.

Grade	Common Core State Standard
11-12	RL.11-12.2 Determine two or more themes or central ideas of a text and analyze their development over the course of the text, including how they interact and build on one another to produce a complex account; provide an objective summary of the text.
9-10	RL.9-10.2 Determine a theme or central idea of a text and analyze in detail its development over the course of the text, including how it emerges and is shaped and refined by specific details; provide an objective summary of the text.
8	RL.8.2 Determine a theme or central idea of a text and analyze its development over the course of the text, including its relationship to the characters, setting, and plot; provide an objective summary of the text.
7	RL.7.2 Determine a theme or central idea of a text and analyze its development over the course of the text; provide an objective summary of the text.
6	RL.6.2 Determine a theme or central idea of a text and how it is conveyed through particular details; provide a summary of the text distinct from personal opinions or judgments.
5	RL.5.2 Determine a theme of a story, drama, or poem from details in the text, including how characters in a story or drama respond to challenges or how the speaker in a poem reflects upon a topic; summarize the text.
4	RL.4.2 Determine a theme of a story, drama, or poem from details in the text; summarize the text.
3	RL.3.2 Recount stories, including fables, folktales, and myths from diverse cultures; determine the central message, lesson, or moral and explain how it is conveyed through key details in the text.
2	RL.2.2 Recount stories, including fables and folktales from diverse cultures, and determine their central message, lesson, or moral.
1	RL.1.2 Retell stories, including key details, and demonstrate understanding of their central message or lesson.
K	RL.K.2 With prompting and support, retell familiar stories, including key details.

Note: Grades 9-12 are included for information and acceleration possibilities only.

Strand: Reading – Literature

Topic: Key Ideas and Details

Anchor 3: Analyze how and why individuals, events, and ideas develop and interact over the course of a text.

Grade	Common Core State Standard
11-12	RL.11-12.3 Analyze the impact of the author's choices regarding how to develop and relate elements of a story or drama (e.g., where a story is set, how the action is ordered, how the characters are introduced and developed).
9-10	RL.9-10.3 Analyze how complex characters (e.g., those with multiple or conflicting motivations) develop over the course of a text, interact with other characters, and advance the plot or develop the theme.
8	RL.8.3 Analyze how particular lines of dialogue or incidents in a story or drama propel the action, reveal aspects of a character, or provoke a decision.
7	RL.7.3 Analyze how particular elements of a story or drama interact (e.g., how setting shapes the characters or plot).
6	RL.6.3 Describe how a particular story's or drama's plot unfolds in a series of episodes as well as how the characters respond or change as the plot moves toward a resolution.
5	RL.5.3 Compare and contrast two or more characters, settings, or events in a story or drama, drawing on specific details in the text (e.g., how characters interact).
4	RL.4.3 Describe in depth a character, setting, or event in a story or drama, drawing on specific details in the text (e.g., a character's thoughts, words, or actions).
3	RL.3.3 Describe characters in a story (e.g., their traits, motivations, or feelings) and explain how their actions contribute to the sequence of events.
2	RL.2.3 Describe how characters in a story respond to major events and challenges.
1	RL.1.3 Describe characters, settings, and major events in a story, using key details.
K	RL.K.3 With prompting and support, identify characters, settings, and major events in a story.

Note: Grades 9-12 are included for information and acceleration possibilities only.

Strand: Reading – Literature

Topic: Craft and Structure

Anchor 4: Interpret words and phrases as they are used in a text, including determining technical, connotative, and figurative meanings, and analyze how specific word choices shape meaning or tone.

Grade	Common Core State Standard
11-12	RL.11-12.4 Determine the meaning of words and phrases as they are used in the text, including figurative and connotative meanings; analyze the impact of specific word choices on meaning and tone, including words with multiple meanings or language that is particularly fresh, engaging, or beautiful. (Include Shakespeare as well as other authors.)
9-10	RL.9-10.4 Determine the meaning of words and phrases as they are used in the text, including figurative and connotative meanings; analyze the cumulative impact of specific word choices on meaning and tone (e.g., how the language evokes a sense of time and place; how it sets a formal or informal tone).
8	RL.8.4 Determine the meaning of words and phrases as they are used in a text, including figurative and connotative meanings; analyze the impact of specific word choices on meaning and tone, including analogies or allusions to other texts.
7	RL.7.4 Determine the meaning of words and phrases as they are used in a text, including figurative and connotative meanings; analyze the impact of rhymes and other repetitions of sounds (e.g., alliteration) on a specific verse or stanza of a poem or section of a story or drama.
6	RL.6.4 Determine the meaning of words and phrases as they are used in a text, including figurative and connotative meanings; analyze the impact of a specific word choice on meaning and tone.
5	RL.5.4 Determine the meaning of words and phrases as they are used in a text, including figurative language such as metaphors and similes.
4	RL.4.1 Determine the meaning of words and phrases as they are used in a text, including those that allude to significant characters found in mythology (e.g., Herculean).
3	RL.3.4 Determine the meaning of words and phrases as they are used in a text, distinguishing literal from nonliteral language.
2	RL.2.4 Describe how words and phrases (e.g., regular beats, alliteration, rhymes, repeated lines) supply rhythm and meaning in a story, poem, or song.
1	RL.1.4 Identify words and phrases in stories or poems that suggest feelings or appeal to the senses.
K	RL.K.4 Ask and answer questions about unknown words in a text.

Note: Grades 9-12 are included for information and acceleration possibilities only.

Strand: Reading – Literature

Topic: Craft and Structure

Anchor 5: Analyze the structure of texts, including how specific sentences, paragraphs, and larger portions of the text (e.g., a section, chapter, scene, or stanza) relate to each other and the whole.

Grade	Common Core State Standard
11-12	RL.11-12.5 Analyze how an author's choices concerning how to structure specific parts of a text (e.g., the choice of where to begin or end a story, the choice to provide a comedic or tragic resolution) contribute to its overall structure and meaning as well as its aesthetic impact.
9-10	RL.9-10.5 Analyze how an author's choices concerning how to structure a text, order events within it (e.g., parallel plots), and manipulate time (e.g., pacing, flashbacks) create such effects as mystery, tension, or surprise.
8	RL.8.5 Compare and contrast the structure of two or more texts and analyze how the differing structure of each text contributes to its meaning and style.
7	RL.7.5 Analyze how a drama's or poem's form or structure (e.g., soliloquy, sonnet) contributes to its meaning.
6	RL.6.5 Analyze how a particular sentence, chapter, scene, or stanza fits into the overall structure of a text and contributes to the development of the theme, setting, or plot.
5	RL.5.5 Explain how a series of chapters, scenes, or stanzas fits together to provide the overall structure of a particular story, drama, or poem.
4	RL.4.5 Explain major differences between poems, drama, and prose, and refer to the structural elements of poems (e.g., verse, rhythm, meter) and drama (e.g., casts of characters, settings, descriptions, dialogue, stage directions) when writing or speaking about a text.
3	RL.3.5 Refer to parts of stories, dramas, and poems when writing or speaking about a text, using terms such as chapter, scene, and stanza; describe how each successive part builds on earlier sections.
2	RL.2.5 Describe the overall structure of a story, including describing how the beginning introduces the story and the ending concludes the action.
1	RL.1.5 Explain major differences between books that tell stories and books that give information, drawing on a wide reading of a range of text types.
K	RL.K.5 Recognize common types of texts (e.g., storybooks, poems).

Note: Grades 9-12 are included for information and acceleration possibilities only.

Strand: Reading – Literature

Topic: Craft and Structure

Anchor 6: Assess how point of view or purpose shapes the content and style of a text.

Grade	Common Core State Standard
11-12	RL.11-12.6 Analyze a case in which grasping a point of view requires distinguishing what is directly stated in a text from what is really meant (e.g., satire, sarcasm, irony, or understatement).
9-10	RL.9-10.6 Analyze a particular point of view or cultural experience reflected in a work of literature from outside the United States, drawing on a wide reading of world literature.
8	RL.8.6 Analyze how differences in the points of view of the characters and the audience or reader (e.g., created through the use of dramatic irony) create such effects as suspense or humor.
7	RL.7.6 Analyze how an author develops and contrasts the points of view of different characters or narrators in a text.
6	RL.6.6 Explain how an author develops the point of view of the narrator or speaker in a text.
5	RL.5.6 Describe how a narrator's or speaker's point of view influences how events are described.
4	RL.4.6 Compare and contrast the point of view from which different stories are narrated, including the difference between first- and third-person narrations.
3	RL.3.6 Distinguish their own point of view from that of the narrator or those of the characters.
2	RL.2.6 Acknowledge differences in the points of view of characters, including by speaking in a different voice for each character when reading dialogue aloud.
1	RL.1.6 Identify who is telling the story at various points in a text.
K	RL.K.6 With prompting and support, name the author and illustrator of a story and define the role of each in telling the story.

Note: Grades 9-12 are included for information and acceleration possibilities only.

Strand: Reading – Literature

Topic: Integration of Knowledge and Ideas

Anchor 7: Integrate and evaluate content presented in diverse media and formats, including visually and quantitatively, as well as in words.

Grade	Common Core State Standard
11-12	RL.11-12.7 Analyze multiple interpretations of a story, drama, or poem (e.g., recorded or live production of a play or recorded novel or poetry), evaluating how each version interprets the source text. (Include at least one play by Shakespeare and one play by an American dramatist.)
9-10	RL.9-10.7 Analyze the representation of a subject or a key scene in two different artistic mediums, including what is emphasized or absent in each treatment (e.g., Auden's —Musée des Beaux Artsll and Breughel's Landscape with the Fall of Icarus).
8	RL.8.7 Analyze the extent to which a filmed or live production of a story or drama stays faithful to or departs from the text or script, evaluating the choices made by the director or actors.
7	RL.7.7 Compare and contrast a written story, drama, or poem to its audio, filmed, staged, or multimedia version, analyzing the effects of techniques unique to each medium (e.g., lighting, sound, color, or camera focus and angles in a film).
6	RL.6.7 Compare and contrast the experience of reading a story, drama, or poem to listening to or viewing an audio, video, or live version of the text, including contrasting what they —seell and —hearll when reading the text to what they perceive when they listen or watch.
5	RL.5.7 Analyze how visual and multimedia elements contribute to the meaning, tone, or beauty of a text (e.g., graphic novel, multimedia presentation of fiction, folktale, myth, poem).
4	RL.4.7 Make connections between the text of a story or drama and a visual or oral presentation of the text, identifying where each version reflects specific descriptions and directions in the text.
3	RL.3.7 Explain how specific aspects of a text's illustrations contribute to what is conveyed by the words in a story (e.g., create mood, emphasize aspects of a character or setting).
2	RL.2.7 Use information gained from the illustrations and words in a print or digital text to demonstrate understanding of its characters, setting, or plot.
1	RL.1.7 Use illustrations and details in a story to describe its characters, setting, or events.
K	RL.K.7 With prompting and support, describe the relationship between illustrations and the story in which they appear (e.g., what moment in a story an illustration depicts).

Note: Grades 9-12 are included for information and acceleration possibilities only.

Strand: Reading – Literature

Topic: Integration of Knowledge and Ideas

Anchor 8: Delineate and evaluate the argument and specific claims in a text, including the validity of the reasoning as well as the relevance and sufficiency of the evidence.

Grade	Common Core State Standard
11-12	RL.11-12.8 (Not applicable to literature)
9-10	RL.9-10.8 (Not applicable to literature)
8	RL.8.8 (Not applicable to literature)
7	RL.7.8 (Not applicable to literature)
6	RL.6.8 (Not applicable to literature)
5	RL.5.8 (Not applicable to literature)
4	RL.4.8 (Not applicable to literature)
3	RL.3.8 (Not applicable to literature)
2	RL.2.8 (Not applicable to literature)
1	RL.1.8 (Not applicable to literature)
K	RL.K.8 (Not applicable to literature)

Note: Grades 9-12 are included for information and acceleration possibilities only.

Strand: Reading – Literature

Topic: Integration of Knowledge and Ideas

Anchor 9: Analyze how two or more texts address similar themes or topics in order to build knowledge or to compare the approaches the authors take.

Grade	Common Core State Standard
11-12	RL.11-12.9 Demonstrate knowledge of eighteenth-, nineteenth- and early-twentieth-century foundational works of American literature, including how two or more texts from the same period treat similar themes or topics.
9-10	RL.9-10.9 Analyze how an author draws on and transforms source material in a specific work (e.g., how Shakespeare treats a theme or topic from Ovid or the Bible or how a later author draws on a play by Shakespeare).
8	RL.8.9 Analyze how a modern work of fiction draws on themes, patterns of events, or character types from myths, traditional stories, or religious works such as the Bible, including describing how the material is rendered new
7	RL.7.9 Compare and contrast a fictional portrayal of a time, place, or character and a historical account of the same period as a means of understanding how authors of fiction use or alter history.
6	RL.6.9 Compare and contrast texts in different forms or genres (e.g., stories and poems; historical novels and fantasy stories) in terms of their approaches to similar themes and topics.
5	RL.5.9 Compare and contrast stories in the same genre (e.g., mysteries and adventure stories) on their approaches to similar themes and topics.
4	RL.4.9 Compare and contrast the treatment of similar themes and topics (e.g., opposition of good and evil) and patterns of events (e.g., the quest) in stories, myths, and traditional literature from different cultures.
3	RL.3.9 Compare and contrast the themes, settings, and plots of stories written by the same author about the same or similar characters (e.g., in books from a series).
2	RL.2.9 Compare and contrast two or more versions of the same story (e.g., Cinderella stories) by different authors or from different cultures.
1	RL.1.9 Compare and contrast the adventures and experiences of characters in stories.
K	RL.K.9 With prompting and support, compare and contrast the adventures and experiences of characters in familiar stories.

Note: Grades 9-12 are included for information and acceleration possibilities only.

Strand: Reading – Literature

Topic: Range of Reading and Level of Text Complexity

Anchor 10: Read and comprehend complex literary and informational texts independently and proficiently.

Grade	Common Core State Standard
11-12	RL.11-12.10 By the end of grade 11, read and comprehend literature, including stories, dramas, and poems, in the grades 11–CCR text complexity band proficiently, with scaffolding as needed at the high end of the range.
9-10	RL.9-10.10 By the end of grade 9, read and comprehend literature, including stories, dramas, and poems, in the grades 9–10 text complexity band proficiently, with scaffolding as needed at the high end of the range.
8	RL.8.10 By the end of the year, read and comprehend literature, including stories, dramas, and poems, at the high end of grades 6–8 text complexity band independently and proficiently.
7	RL.7.10 By the end of the year, read and comprehend literature, including stories, dramas, and poems, in the grades 6–8 text complexity band proficiently, with scaffolding as needed at the high end of the range.
6	RL.6.10 By the end of the year, read and comprehend literature, including stories, dramas, and poems, in the grades 6–8 text complexity band proficiently, with scaffolding as needed at the high end of the range.
5	RL.5.10 By the end of the year, read and comprehend literature, including stories, dramas, and poetry, at the high end of the grades 4–5 text complexity band independently and proficiently.
4	RL.4.10 By the end of the year, read and comprehend literature, including stories, dramas, and poetry, in the grades 4–5 text complexity band proficiently, with scaffolding as needed at the high end of the range.
3	RL.3.10 By the end of the year, read and comprehend literature, including stories, dramas, and poetry, at the high end of the grades 2–3 text complexity band independently and proficiently.
2	RL.2.10 By the end of the year, read and comprehend literature, including stories and poetry, in the grades 2–3 text complexity band proficiently, with scaffolding as needed at the high end of the range.
1	RL.1.10 With prompting and support, read prose and poetry of appropriate complexity for grade 1.
K	RL.K.10 Actively engage in group reading activities with purpose and understanding.

Note: Grades 9-12 are included for information and acceleration possibilities only.

Strand: Reading – Informational Texts

Topic: Key Ideas and Details

Anchor 1: Read closely to determine what the text says explicitly and to make logical inferences from it; cite specific textual evidence when writing or speaking to support conclusions drawn from the text.

Grade	Common Core State Standard
11-12	RI.11-12.1 Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text, including determining where the text leaves matters uncertain.
9-10	RI.9-10.1 Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.
8	RI.8.1 Cite the textual evidence that most strongly supports an analysis of what the text says explicitly as well as inferences drawn from the text.
7	RI.7.1 Cite several pieces of textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.
6	RI.6.1 Cite textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.
5	RI.5.1 Quote accurately from a text when explaining what the text says explicitly and when drawing inferences from the text.
4	RI.4.1 Refer to details and examples in a text when explaining what the text says explicitly and when drawing inferences from the text.
3	RI.3.1 Ask and answer questions to demonstrate understanding of a text, referring explicitly to the text as the basis for the answers.
2	RI.2.1 Ask and answer such questions as who, what, where, when, why, and how to demonstrate understanding of key details in a text.
1	RI.1.1 Ask and answer questions about key details in a text.
K	RI.K.1 With prompting and support, ask and answer questions about key details in a text.

Note: Grades 9-12 are included for information and acceleration possibilities only.

Strand: Reading – Informational Texts

Topic: Key Ideas and Details

Anchor 2: Determine central ideas or themes of a text and analyze their development; summarize the key supporting details and ideas.

Grade	Common Core State Standard
11-12	RI.11-12.2 Determine two or more central ideas of a text and analyze their development over the course of the text, including how they interact and build on one another to provide a complex analysis; provide an objective summary of the text.
9-10	RI.9-10.2 Determine a central idea of a text and analyze its development over the course of the text, including how it emerges and is shaped and refined by specific details; provide an objective summary of the text.
8	RI.8.2 Determine a central idea of a text and analyze its development over the course of the text, including its relationship to supporting ideas; provide an objective summary of the text.
7	RI.7.2 Determine two or more central ideas in a text and analyze their development over the course of the text; provide an objective summary of the text.
6	RI.6.2 Determine a central idea of a text and how it is conveyed through particular details; provide a summary of the text distinct from personal opinions or judgments.
5	RI.5.2 Determine two or more main ideas of a text and explain how they are supported by key details; summarize the text.
4	RI.4.2 Determine the main idea of a text and explain how it is supported by key details; summarize the text.
3	RI.3.2 Determine the main idea of a text; recount the key details and explain how they support the main idea.
2	RL.2.2 Identify the main topic of a multiparagraph text as well as the focus of specific paragraphs within the text.
1	RI.1.2 Identify the main topic and retell key details of a text
K	RI.K.2 With prompting and support, identify the main topic and retell key details of a text.

Note: Grades 9-12 are included for information and acceleration possibilities only.

Strand: Reading – Informational Texts

Topic: Key Ideas and Details

Anchor 3: Analyze how and why individuals, events, and ideas develop and interact over the course of a text.

Grade	Common Core State Standard
11-12	RI.11-12.3 Analyze a complex set of ideas or sequence of events and explain how specific individuals, ideas, or events interact and develop over the course of the text.
9-10	RI.9-10.3 Analyze how the author unfolds an analysis or series of ideas or events, including the order in which the points are made, how they are introduced and developed, and the connections that are drawn between them.
8	RI.8.3 Analyze how a text makes connections among and distinctions between individuals, ideas, or events (e.g., through comparisons, analogies, or categories).
7	RI.7.3 Analyze the interactions between individuals, events, and ideas in a text (e.g., how ideas influence individuals or events, or how individuals influence ideas or events).
6	RI.6.3 Analyze in detail how a key individual, event, or idea is introduced, illustrated, and elaborated in a text (e.g., through examples or anecdotes).
5	RI.5.3 Explain the relationships or interactions between two or more individuals, events, ideas, or concepts in a historical, scientific, or technical text based on specific information in the text.
4	RI.4.3 Explain events, procedures, ideas, or concepts in a historical, scientific, or technical text, including what happened and why, based on specific information in the text.
3	RI.3.3 Describe the relationship between a series of historical events, scientific ideas or concepts, or steps in technical procedures in a text, using language that pertains to time, sequence, and cause/effect.
2	RI.2.3 Describe the connection between a series of historical events, scientific ideas or concepts, or steps in technical procedures in a text.
1	RI.1.3 Describe the connection between two individuals, events, ideas, or pieces of information in a text.
K	RI.K.3 With prompting and support, describe the connection between two individuals, events, ideas, or pieces of information in a text.

Note: Grades 9-12 are included for information and acceleration possibilities only.

Strand: Reading – Informational Texts

Topic: Craft and Structure

Anchor 4: Interpret words and phrases as they are used in a text, including determining technical, connotative, and figurative meanings, and analyze how specific word choices shape meaning or tone.

Grade	Common Core State Standard
11-12	RI.11-12.4 Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings; analyze how an author uses and refines the meaning of a key term or terms over the course of a text (e.g., how Madison defines faction in Federalist No. 10).
9-10	RI.9-10.4 Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings; analyze the cumulative impact of specific word choices on meaning and tone (e.g., how the language of a court opinion differs from that of a newspaper).
8	RI.8.4 Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings; analyze the impact of specific word choices on meaning and tone, including analogies or allusions to other texts.
7	RI.7.4 Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings; analyze the impact of a specific word choice on meaning and tone.
6	RI.6.4 Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings.
5	RI.5.4 Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a grade 5 topic or subject area.
4	RI.4.4 Determine the meaning of general academic and domain-specific words or phrases in a text relevant to a grade 4 topic or subject area.
3	RI.3.4 Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a grade 3 topic or subject area.
2	RI.2.4 Determine the meaning of words and phrases in a text relevant to a grade 2 topic or subject area.
1	RI.1.4 Ask and answer questions to help determine or clarify the meaning of words and phrases in a text.
K	RI.K.4 With prompting and support, ask and answer questions about unknown words in a text.

Note: Grades 9-12 are included for information and acceleration possibilities only.

Strand: Reading – Informational Texts

Topic: Craft and Structure

Anchor 5: Analyze the structure of texts, including how specific sentences, paragraphs, and larger portions of the text (e.g., a section, chapter, scene, or stanza) relate to each other and the whole.

Grade	Common Core State Standard
11-12	RI.11-12.5 Analyze and evaluate the effectiveness of the structure an author uses in his or her exposition or argument, including whether the structure makes points clear, convincing, and engaging.
9-10	RI.9-10.5 Analyze in detail how an author's ideas or claims are developed and refined by particular sentences, paragraphs, or larger portions of a text (e.g., a section or chapter).
8	RI.8.5 Analyze in detail the structure of a specific paragraph in a text, including the role of particular sentences in developing and refining a key concept.
7	RI.7.5 Analyze the structure an author uses to organize a text, including how the major sections contribute to the whole and to the development of the ideas.
6	RI.6.5 Analyze how a particular sentence, paragraph, chapter, or section fits into the overall structure of a text and contributes to the development of the ideas.
5	RI.5.5 Compare and contrast the overall structure (e.g., chronology, comparison, cause/effect, problem/solution) of events, ideas, concepts, or information in two or more texts.
4	RI.4.5 Describe the overall structure (e.g., chronology, comparison, cause/effect, problem/solution) of events, ideas, concepts, or information in a text or part of a text.
3	RI.3.5 Use text features and search tools (e.g., key words, sidebars, hyperlinks) to locate information relevant to a given topic efficiently.
2	RI.2.5 Know and use various text features (e.g., captions, bold print, subheadings, glossaries, indexes, electronic menus, icons) to locate key facts or information in a text efficiently.
1	RI.1.5 Know and use various text features (e.g., headings, tables of contents, glossaries, electronic menus, icons) to locate key facts or information in a text.
K	RI.K.5 Identify the front cover, back cover, and title page of a book.

Note: Grades 9-12 are included for information and acceleration possibilities only.

Strand: Reading – Informational Texts

Topic: Craft and Structure

Anchor 6: Assess how point of view or purpose shapes the content and style of a text.

Grade	Common Core State Standard
11-12	RI.11-12.6 Determine an author's point of view or purpose in a text in which the rhetoric is particularly effective, analyzing how style and content contribute to the power, persuasiveness or beauty of the text.
9-10	RI.9-10.6 Determine an author's point of view or purpose in a text and analyze how an author uses rhetoric to advance that point of view or purpose.
8	RI.8.6 Determine an author's point of view or purpose in a text and analyze how the author acknowledges and responds to conflicting evidence or viewpoints.
7	RI.7.6 Determine an author's point of view or purpose in a text and analyze how the author distinguishes his or her position from that of others.
6	RI.6.6 Determine an author's point of view or purpose in a text and explain how it is conveyed in the text.
5	RI.5.6 Analyze multiple accounts of the same event or topic, noting important similarities and differences in the point of view they represent.
4	RI.4.6 Compare and contrast a firsthand and secondhand account of the same event or topic; describe the differences in focus and the information provided.
3	RI.3.6 Distinguish their own point of view from that of the author of a text.
2	RI.2.6 Identify the main purpose of a text, including what the author wants to answer, explain, or describe.
1	RI.1.6 Distinguish between information provided by pictures or other illustrations and information provided by the words in a text.
K	RI.K.6 Name the author and illustrator of a text and define the role of each in presenting the ideas or information in a text.

Note: Grades 9-12 are included for information and acceleration possibilities only.

Strand: Reading – Informational Texts

Topic: Integration of Knowledge and Ideas

Anchor 7: Assess how point of view or purpose shapes the content and style of a text.

Grade	Common Core State Standard
11-12	RI.11-12.7 Integrate and evaluate multiple sources of information presented in different media or formats (e.g., visually, quantitatively) as well as in words in order to address a question or solve a problem.
9-10	RI.9-10.7 Analyze various accounts of a subject told in different mediums (e.g., a person's life story in both print and multimedia), determining which details are emphasized in each account.
8	RI.8.7 Evaluate the advantages and disadvantages of using different mediums (e.g., print or digital text, video, multimedia) to present a particular topic or idea.
7	RI.7.7 Compare and contrast a text to an audio, video, or multimedia version of the text, analyzing each medium's portrayal of the subject (e.g., how the delivery of a speech affects the impact of the words).
6	RI.6.7 Integrate information presented in different media or formats (e.g., visually, quantitatively) as well as in words to develop a coherent understanding of a topic or issue.
5	RI.5.7 Draw on information from multiple print or digital sources, demonstrating the ability to locate an answer to a question quickly or to solve a problem efficiently.
4	RI.4.7 Interpret information presented visually, orally, or quantitatively (e.g., in charts, graphs, diagrams, time lines, animations, or interactive elements on Web pages) and explain how the information contributes to an understanding of the text in which it appears.
3	RI.3.7 Use information gained from illustrations (e.g., maps, photographs) and the words in a text to demonstrate understanding of the text (e.g., where, when, why, and how key events occur).
2	RI.2.7 Explain how specific images (e.g., a diagram showing how a machine works) contribute to and clarify a text.
1	RI.1.7 Use the illustrations and details in a text to describe its key ideas.
K	RI.K.7 With prompting and support, describe the relationship between illustrations and the text in which they appear (e.g., what person, place, thing, or idea in the text an illustration depicts).

Note: Grades 9-12 are included for information and acceleration possibilities only.

Strand: Reading – Informational Texts

Topic: Integration of Knowledge and Ideas

Anchor 8: Assess how point of view or purpose shapes the content and style of a text.

Grade	Common Core State Standard
11-12	RI.11-12.8 Delineate and evaluate the reasoning in seminal U.S. texts, including the application of constitutional principles and use of legal reasoning (e.g., in U.S. Supreme Court majority opinions and dissents) and the premises, purposes, and arguments in works of public advocacy (e.g., The Federalist, presidential addresses).
9-10	RI.9-10.8 Delineate and evaluate the argument and specific claims in a text, assessing whether the reasoning is valid and the evidence is relevant and sufficient; identify false statements and fallacious reasoning.
8	RI.8.8 Delineate and evaluate the argument and specific claims in a text, assessing whether the reasoning is sound and the evidence is relevant and sufficient; recognize when irrelevant evidence is introduced.
7	RI.7.8 Trace and evaluate the argument and specific claims in a text, assessing whether the reasoning is sound and the evidence is relevant and sufficient to support the claims.
6	RI.6.8 Trace and evaluate the argument and specific claims in a text, distinguishing claims that are supported by reasons and evidence from claims that are not.
5	RI.5.8 Explain how an author uses reasons and evidence to support particular points in a text, identifying which reasons and evidence support which point(s).
4	RI.4.8 Explain how an author uses reasons and evidence to support particular points in a text.
3	RI.3.8 Describe the logical connection between particular sentences and paragraphs in a text (e.g., comparison, cause/effect, first/second/third in a sequence).
2	RI.2.8 Describe how reasons support specific points the author makes in a text.
1	RI.1.8 Identify the reasons an author gives to support points in a text.
K	RI.K.8 With prompting and support, identify the reasons an author gives to support points in a text.

Note: Grades 9-12 are included for information and acceleration possibilities only.

Strand: Reading – Informational Texts

Topic: Integration of Knowledge and Ideas

Anchor 9: Assess how point of view or purpose shapes the content and style of a text.

Grade	Common Core State Standard
11-12	RI.11-12.9 Analyze seventeenth-, eighteenth-, and nineteenth-century foundational U.S. documents of historical and literary significance (including The Declaration of Independence, the Preamble to the Constitution, the Bill of Rights, and Lincoln's Second Inaugural Address) for their themes, purposes, and rhetorical features.
9-10	RI.9-10.9 Analyze seminal U.S. documents of historical and literary significance (e.g., Washington's Farewell Address, the Gettysburg Address, Roosevelt's Four Freedoms speech, King's "Letter from Birmingham Jail"), including how they address related themes and concepts.
8	RI.8.9 Analyze a case in which two or more texts provide conflicting information on the same topic and identify where the texts disagree on matters of fact or interpretation.
7	RI.7.9 Analyze how two or more authors writing about the same topic shape their presentations of key information by emphasizing different evidence or advancing different interpretations of facts.
6	RI.6.9 Compare and contrast one author's presentation of events with that of another (e.g., a memoir written by and a biography on the same person).
5	RI.5.9 Integrate information from several texts on the same topic in order to write or speak about the subject knowledgeably.
4	RI.4.9 Integrate information from two texts on the same topic in order to write or speak about the subject knowledgeably.
3	RI.3.9 Compare and contrast the most important points and key details presented in two texts on the same topic.
2	RI.2.9 Compare and contrast the most important points presented by two texts on the same topic.
1	RI.1.9 Identify basic similarities in and differences between two texts on the same topic (e.g., in illustrations, descriptions, or procedures).
K	RI.K.9 With prompting and support, identify basic similarities in and differences between two texts on the same topic (e.g., in illustrations, descriptions, or procedures).

Note: Grades 9-12 are included for information and acceleration possibilities only.

Strand: Reading – Informational Texts

Topic: Range of Reading and Level of Text Complexity

Anchor 10: Read and comprehend complex literary and informational texts independently and proficiently.

Grade	Common Core State Standard
11-12	RI.11-12.10 By the end of grade 11, read and comprehend literary nonfiction in the grades 11–CCR text complexity band proficiently, with scaffolding as needed at the high end of the range.
9-10	RI.9-10.10 By the end of grade 9, read and comprehend literary nonfiction in the grades 9–10 text complexity band proficiently, with scaffolding as needed at the high end of the range.
8	RI.8.10 By the end of the year, read and comprehend literary nonfiction at the high end of the grades 6–8 text complexity band independently and proficiently.
7	RI.7.10 By the end of the year, read and comprehend literary nonfiction in the grades 6–8 text complexity band proficiently, with scaffolding as needed at the high end of the range.
6	RI.6.10 By the end of the year, read and comprehend literary nonfiction in the grades 6–8 text complexity band proficiently, with scaffolding as needed at the high end of the range.
5	RI.5.10 By the end of the year, read and comprehend informational texts, including history/social studies, science, and technical texts, at the high end of the grades 4–5 text complexity band independently and proficiently
4	RI.4.10 By the end of year, read and comprehend informational texts, including history/social studies, science, and technical texts, in the grades 4–5 text complexity band proficiently, with scaffolding as needed at the high end of the range.
3	RI.3.10 By the end of the year, read and comprehend informational texts, including history/social studies, science, and technical texts, at the high end of the grades 2–3 text complexity band independently and proficiently.
2	RI.2.10 By the end of year, read and comprehend informational texts, including history/social studies, science, and technical texts, in the grades 2–3 text complexity band proficiently, with scaffolding as needed at the high end of the range.
1	RI.1.10 With prompting and support, read informational texts appropriately complex for grade 1.
K	RI.K.10 Actively engage in group reading activities with purpose and understanding.

Note: Grades 9-12 are included for information and acceleration possibilities only.

8	<p>W.8.3 Write narratives to develop real or imagined experiences or events using effective technique, relevant descriptive details, and well-structured event sequences.</p> <ol style="list-style-type: none"> Engage and orient the reader by establishing a context and point of view and introducing a narrator and/or characters; organize an event sequence that unfolds naturally and logically. Use narrative techniques, such as dialogue, pacing, description, and reflection, to develop experiences, events, and/or characters. Use a variety of transition words, phrases, and clauses to convey sequence, signal shifts from one time frame or setting to another, and show the relationships among experiences and events. Use precise words and phrases, relevant descriptive details, and sensory language to capture the action and convey experiences and events. Provide a conclusion that follows from and reflects on the narrated experiences or events.

7	<p>W.7.3 Write narratives to develop real or imagined experiences or events using effective technique, relevant descriptive details, and well-structured event sequences.</p> <ul style="list-style-type: none"> a. Engage and orient the reader by establishing a context and point of view and introducing a narrator and/or characters; organize an event sequence that unfolds naturally and logically. b. Use narrative techniques, such as dialogue, pacing, and description, to develop experiences, events, and/or characters. c. Use a variety of transition words, phrases, and clauses to convey sequence and signal shifts from one time frame or setting to another. d. Use precise words and phrases, relevant descriptive details, and sensory language to capture the action and convey experiences and events. e. Provide a conclusion that follows from and reflects on the narrated experiences or events.
6	<p>W.6.3 Write narratives to develop real or imagined experiences or events using effective technique, relevant descriptive details, and well-structured event sequences.</p> <ul style="list-style-type: none"> a. Engage and orient the reader by establishing a context and introducing a narrator and/or characters; organize an event sequence that unfolds naturally and logically. b. Use narrative techniques, such as dialogue, pacing, and description, to develop experiences, events, and/or characters. c. Use a variety of transition words, phrases, and clauses to convey sequence and signal shifts from one time frame or setting to another. d. Use precise words and phrases, relevant descriptive details, and sensory language to convey experiences and events. e. Provide a conclusion that follows from the narrated experiences or events.
5	<p>W.5.3 Write narratives to develop real or imagined experiences or events using effective technique, descriptive details, and clear event sequences.</p> <ul style="list-style-type: none"> a. Orient the reader by establishing a situation and introducing a narrator and/or characters; organize an event sequence that unfolds naturally. b. Use narrative techniques, such as dialogue, description, and pacing, to develop experiences and events or show the responses of characters to situations. c. Use a variety of transitional words, phrases, and clauses to manage the sequence of events. d. Use concrete words and phrases and sensory details to convey experiences and events precisely. e. Provide a conclusion that follows from the narrated experiences or events.
4	<p>W.4.3 Write narratives to develop real or imagined experiences or events using effective technique, descriptive details, and clear event sequences.</p> <ul style="list-style-type: none"> a. Orient the reader by establishing a situation and introducing a narrator and/or characters; organize an event sequence that unfolds naturally. b. Use dialogue and description to develop experiences and events or show the responses of characters to situations. c. Use a variety of transitional words and phrases to manage the sequence of events. d. Use concrete words and phrases and sensory details to convey experiences and events precisely. e. Provide a conclusion that follows from the narrated experiences or events.

3	<p>W.3.3 Write narratives to develop real or imagined experiences or events using effective technique, descriptive details, and clear event sequences.</p> <ul style="list-style-type: none"> a. Establish a situation and introduce a narrator and/or characters; organize an event sequence that unfolds naturally. b. Use dialogue and descriptions of actions, thoughts, and feelings to develop experiences and events or show the response of characters to situations. c. Use temporal words and phrases to signal event order. d. Provide a sense of closure.
2	<p>W.2.3 Write narratives in which they recount a well-elaborated event or short sequence of events, include details to describe actions, thoughts, and feelings, use temporal words to signal event order, and provide a sense of closure.</p>
1	<p>W.1.3 Write narratives in which they recount two or more appropriately sequenced events, include some details regarding what happened, use temporal words to signal event order, and provide some sense of closure.</p>
K	<p>W.K.3 Use a combination of drawing, dictating, and writing to narrate a single event or several loosely linked events, tell about the events in the order in which they occurred, and provide a reaction to what happened.</p>

Strand: Speaking and Listening

Topic: Comprehension and Collaboration

Anchor 1: Prepare for and participate effectively in a range of conversations and collaborations with diverse partners, building on others' ideas and expressing their own clearly and persuasively.

Grade	Common Core State Standard
11-12	<p>SL.11-12.1 Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</p> <ul style="list-style-type: none"> a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed. c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives. d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.
9-10	<p>SL.9-10.1 Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</p> <ul style="list-style-type: none"> a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.

8	<p>SL.8.1 Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and issues, building on others' ideas and expressing their own clearly.</p> <ul style="list-style-type: none"> a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions and decision-making, track progress toward specific goals and deadlines, and define individual roles as needed. c. Pose questions that connect the ideas of several speakers and respond to others' questions and comments with relevant evidence, observations, and ideas. d. Acknowledge new information expressed by others, and, when warranted, qualify or justify their own views in light of the evidence presented.
7	<p>SL.7.1 Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly.</p> <ul style="list-style-type: none"> a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed. c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the discussion back on topic as needed. d. Acknowledge new information expressed by others and, when warranted, modify their own views.
6	<p>SL.6.1 Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly.</p> <ul style="list-style-type: none"> a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed. c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion. d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.
5	<p>SL.5.1 Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on <i>grade 5 topics and texts</i>, building on others' ideas and expressing their own clearly.</p> <ul style="list-style-type: none"> a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion. b. Follow agreed-upon rules for discussions and carry out assigned roles. c. Pose and respond to specific questions by making comments that contribute to the discussion and elaborate on the remarks of others. d. Review the key ideas expressed and draw conclusions in light of information and knowledge gained from the discussions.

4	<p>SL.4.1 Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on <i>grade 4 topics and texts</i>, building on others' ideas and expressing their own clearly.</p> <ul style="list-style-type: none"> a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion. b. Follow agreed-upon rules for discussions and carry out assigned roles. c. Pose and respond to specific questions to clarify or follow up on information, and make comments that contribute to the discussion and link to the remarks of others. d. Review the key ideas expressed and explain their own ideas and understanding in light of the discussion.
3	<p>SL.3.1 Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on <i>grade 3 topics and texts</i>, building on others' ideas and expressing their own clearly.</p> <ul style="list-style-type: none"> a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion. b. Follow agreed-upon rules for discussions (e.g., gaining the floor in respectful ways, listening to others with care, speaking one at a time about the topics and texts under discussion). c. Ask questions to check understanding of information presented, stay on topic, and link their comments to the remarks of others. d. Explain their own ideas and understanding in light of the discussion.
2	<p>SL.2.1 Participate in collaborative conversations with diverse partners about <i>grade 2 topics and texts</i> with peers and adults in small and larger groups.</p> <ul style="list-style-type: none"> a. Follow agreed-upon rules for discussions (e.g., gaining the floor in respectful ways, listening to others with care, speaking one at a time about the topics and texts under discussion). b. Build on others' talk in conversations by linking their comments to the remarks of others. c. Ask for clarification and further explanation as needed about the topics and texts under discussion.
1	<p>SL.1.1 Participate in collaborative conversations with diverse partners about <i>grade 1 topics and texts</i> with peers and adults in small and larger groups.</p> <ul style="list-style-type: none"> a. Follow agreed-upon rules for discussions (e.g., listening to others with care, speaking one at a time about the topics and texts under discussion). b. Build on others' talk in conversations by responding to the comments of others through multiple exchanges. c. Ask questions to clear up any confusion about the topics and texts under discussion.
K	<p>SL.K.1 Participate in collaborative conversations with diverse partners about <i>kindergarten topics and texts</i> with peers and adults in small and larger groups.</p> <ul style="list-style-type: none"> a. Follow agreed-upon rules for discussions (e.g., listening to others and taking turns speaking about the topics and texts under discussion). b. Continue a conversation through multiple exchanges.

Topic: Comprehension and Collaboration

Anchor 2: Integrate and evaluate information presented in diverse media and formats, including visually, quantitatively, and orally.

Grade	Common Core State Standard
11-12	SL.11-12.2 Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.
9-10	SL.9-10.2 Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
8	SL.8.2 Analyze the purpose of information presented in diverse media and formats (e.g., visually, quantitatively, orally) and evaluate the motives (e.g., social, commercial, political) behind its presentation.
7	SL.7.2 Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas clarify a topic, text, or issue under study.
6	SL.6.2 Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.
5	SL.5.2 Summarize a written text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.
4	SL.4.2 Paraphrase portions of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.
3	SL.3.2 Determine the main ideas and supporting details of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.
2	SL.2.2 Recount or describe key ideas or details from a text read aloud or information presented orally or through other media.
1	SL.1.2 Ask and answer questions about key details in a text read aloud or information presented orally or through other media.
K	SL.K.2 Confirm understanding of a text read aloud or information presented orally or through other media by asking and answering questions about key details and requesting clarification if something is not understood.

Note: Grades 9-12 are included for information and acceleration possibilities only.

Strand: Speaking and Listening

Topic: Comprehension and Collaboration

Anchor 3: Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric.

Grade	Common Core State Standard
11-12	SL.11-12.3 Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.
9-10	SL.9-10.3 Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
8	SL.8.3 Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and relevance and sufficiency of the evidence and identifying when irrelevant evidence is introduced.
7	SL.7.3 Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence.
6	SL.6.3 Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.
5	SL.5.3 Summarize the points a speaker makes and explain how each claim is supported by reasons and evidence.
4	SL.4.3 Identify the reasons and evidence a speaker provides to support particular points.
3	SL.3.3 Ask and answer questions about information from a speaker, offering appropriate elaboration and detail.
2	SL.2.3 Ask and answer questions about what a speaker says in order to clarify comprehension, gather additional information, or deepen understanding of a topic or issue.
1	SL.1.3 Ask and answer questions about what a speaker says in order to gather additional information or clarify something that is not understood.
K	SL.K.3 Ask and answer questions in order to seek help, get information, or clarify something that is not understood.

Note: Grades 9-12 are included for information and acceleration possibilities only.

Strand: Speaking and Listening

Topic: Presentation of Knowledge and Ideas

Anchor 4: Present information, findings, and supporting evidence such that listeners can follow the line of reasoning and the organization, development, and style are appropriate to task, purpose, and audience.

Grade	Common Core State Standard
11-12	SL.11-12.4 Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.
9-10	SL.9-10.4 Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
8	SL.8.4 Present claims and findings, emphasizing salient points in a focused, coherent manner with relevant evidence, sound valid reasoning, and well-chosen details; use appropriate eye contact, adequate volume, and clear pronunciation.
7	SL.7.4 Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use appropriate eye contact, adequate volume, and clear pronunciation.
6	SL.6.4 Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.
5	SL.5.4 Report on a topic or text or present an opinion, sequencing ideas logically and using appropriate facts and relevant, descriptive details to support main ideas or themes; speak clearly at an understandable pace.
4	SL.4.4 Report on a topic or text, tell a story, or recount an experience in an organized manner, using appropriate facts and relevant, descriptive details to support main ideas or themes; speak clearly at an understandable pace.
3	SL.3.4 Report on a topic or text, tell a story, or recount an experience with appropriate facts and relevant, descriptive details, speaking clearly at an understandable pace.
2	SL.2.4 Tell a story or recount an experience with appropriate facts and relevant, descriptive details, speaking audibly in coherent sentences.
1	SL.1.4 Describe people, places, things, and events with relevant details, expressing ideas and feelings clearly.
K	SL.K.4 Describe familiar people, places, things, and events and, with prompting and support, provide additional detail.

Strand: Speaking and Listening

Topic: Presentation of Knowledge and Ideas

Anchor 5: Make strategic use of digital media and visual displays of data to express information and enhance understanding of presentations.

Grade	Common Core State Standard
11-12	SL.11-12.5 Make strategic use of digital media (e.g., textual, graphical, audio, visual, and interactive elements) in presentations to enhance understanding of findings, reasoning, and evidence and to add interest.
9-10	SL.9-10.5 Make strategic use of digital media (e.g., textual, graphical, audio, visual, and interactive elements) in presentations to enhance understanding of findings, reasoning, and evidence and to add interest.
8	SL.8.5 Integrate multimedia and visual displays into presentations to clarify information, strengthen claims and evidence, and add interest.
7	SL.7.5 Include multimedia components and visual displays in presentations to clarify claims and findings and emphasize salient points.
6	SL.6.5 Include multimedia components (e.g., graphics, images, music, sound) and visual displays in presentations to clarify information.
5	SL.5.5 Include multimedia components (e.g., graphics, sound) and visual displays in presentations when appropriate to enhance the development of main ideas or themes.
4	SL.4.5 Add audio recordings and visual displays to presentations when appropriate to enhance the development of main ideas or themes.
3	SL.3.5 Create engaging audio recordings of stories or poems that demonstrate fluid reading at an understandable pace; add visual displays when appropriate to emphasize or enhance certain facts or details.
2	SL.2.5 Create audio recordings of stories or poems; add drawings or other visual displays to stories or recounts of experiences when appropriate to clarify ideas, thoughts, and feelings.
1	SL.1.5 Add drawings or other visual displays to descriptions when appropriate to clarify ideas, thoughts, and feelings
K	SL.K.5 Add drawings or other visual displays to descriptions as desired to provide additional detail.

Note: Grades 9-12 are included for information and acceleration possibilities only.

Anchor 6: Adapt speech to a variety of contexts and communicative tasks, demonstrating command of formal English when indicated or appropriate.

Grade	Common Core State Standard
11-12	SL.11-12.6 Adapt speech to a variety of contexts and tasks, demonstrating a command of formal English when indicated or appropriate.
9-10	SL.9-10.6 Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.
8	SL.8.6 Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.
7	SL.7.6 Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.
6	SL.6.6 Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.
5	SL.5.6 Adapt speech to a variety of contexts and tasks, using formal English when appropriate to task and situation.
4	SL.4.6 Differentiate between contexts that call for formal English (e.g., presenting ideas) and situations where informal discourse is appropriate (e.g., small-group discussion); use formal English when appropriate to task and situation.
3	SL.3.6 Speak in complete sentences when appropriate to task and situation in order to provide requested detail or clarification.
2	SL.2.6 Produce complete sentences when appropriate to task and situation in order to provide requested detail or clarification.
1	SL.1.6 Produce complete sentences when appropriate to task and situation.
K	SL.K.6 Speak audibly and express thoughts, feelings, and ideas clearly.

Note: Grades 9-12 are included for information and acceleration possibilities only.

Strand: Language

Topic: Conventions of Standard English

Anchor 1: Demonstrate command of the conventions of standard English grammar and usage when writing and speaking.

Grade	Common Core State Standard
11-12	<p>L.11-12.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.</p> <ul style="list-style-type: none"> a. Apply the understanding that usage is a matter of convention, can change over time, and is sometimes contested. b. Resolve issues of complex or contested usage, consulting references (e.g., <i>Merriam-Webster's Dictionary of English Usage</i>, <i>Garner's Modern American Usage</i>) as needed.
9-10	<p>L.9-10.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.</p> <ul style="list-style-type: none"> a. Use parallel structure.* b. Use various types of phrases (noun, verb, adjectival, adverbial, participial, prepositional, absolute) and clauses (independent, dependent; noun, relative, adverbial) to convey specific meanings and add variety and interest to writing or presentations.
8	<p>L.8.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.</p> <ul style="list-style-type: none"> a. Explain the function of verbals (gerunds, participles, infinitives) in general and their function in particular sentences. b. Form and use verbs in the active and passive voice. Form and use verbs in the indicative, imperative, interrogative, conditional, and subjunctive mood. c. Recognize and correct inappropriate shifts in verb voice and mood.*
7	<p>L.7.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.</p> <ul style="list-style-type: none"> a. Explain the function of phrases and clauses in general and their function in specific sentences. b. Choose among simple, compound, complex, and compound-complex sentences to signal differing relationships among ideas. c. Place phrases and clauses within a sentence, recognizing and correcting misplaced and dangling modifiers.*
6	<p>L.6.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.</p> <ul style="list-style-type: none"> a. Ensure that pronouns are in the proper case (subjective, objective, possessive). b. Use intensive pronouns (e.g., <i>myself</i>, <i>ourselves</i>). c. Recognize and correct inappropriate shifts in pronoun number and person.* d. Recognize and correct vague pronouns (i.e., ones with unclear or ambiguous antecedents).* e. Recognize variations from standard English in their own and others' writing and speaking, and identify and use strategies to improve expression in conventional language.*

5	<p>L.5.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.</p> <ul style="list-style-type: none"> a. Explain the function of conjunctions, prepositions, and interjections in general and their function in particular sentences. b. Form and use the perfect (e.g., <i>I had walked</i>; <i>I have walked</i>; <i>I will have walked</i>) verb tenses. c. Use verb tense to convey various times, sequences, states, and conditions. d. Recognize and correct inappropriate shifts in verb tense.* e. Use correlative conjunctions (e.g., <i>either/or</i>, <i>neither/nor</i>).
4	<p>L.4.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.</p> <ul style="list-style-type: none"> a. Use relative pronouns (<i>who</i>, <i>whose</i>, <i>whom</i>, <i>which</i>, <i>that</i>) and relative adverbs (<i>where</i>, <i>when</i>, <i>why</i>). b. Form and use the progressive (e.g., <i>I was walking</i>; <i>I am walking</i>; <i>I will be walking</i>) verb tenses. c. Use modal auxiliaries (e.g., <i>can</i>, <i>may</i>, <i>must</i>) to convey various conditions. d. Order adjectives within sentences according to conventional patterns (e.g., <i>a small red bag</i> rather than <i>a red small bag</i>). e. Form and use prepositional phrases. f. Produce complete sentences, recognizing and correcting inappropriate fragments and run-ons.* g. Correctly use frequently confused words (e.g., <i>to</i>, <i>too</i>, <i>two</i>; <i>there</i>, <i>their</i>).*
3	<p>L.3.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.</p> <ul style="list-style-type: none"> a. Explain the function of nouns, pronouns, verbs, adjectives, and adverbs in general and their functions in particular sentences. b. Form and use regular and irregular plural nouns. c. Use abstract nouns (e.g., <i>childhood</i>). d. Form and use regular and irregular verbs. e. Form and use the simple (e.g., <i>I walked</i>; <i>I walk</i>; <i>I will walk</i>) verb tenses. f. Ensure subject-verb and pronoun-antecedent agreement.* g. Form and use comparative and superlative adjectives and adverbs, and choose between them depending on what is to be modified. h. Use coordinating and subordinating conjunctions. i. Produce simple, compound, and complex sentences.
2	<p>L.2.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.</p> <ul style="list-style-type: none"> a. Use collective nouns (e.g., <i>group</i>). b. Form and use frequently occurring irregular plural nouns (e.g., <i>feet</i>, <i>children</i>, <i>teeth</i>, <i>mice</i>, <i>fish</i>). c. Use reflexive pronouns (e.g., <i>myself</i>, <i>ourselves</i>). d. Form and use the past tense of frequently occurring irregular verbs (e.g., <i>sat</i>, <i>hid</i>, <i>told</i>). e. Use adjectives and adverbs, and choose between them depending on what is to be modified. f. Produce, expand, and rearrange complete simple and compound sentences (e.g., <i>The boy watched the movie</i>; <i>The little boy watched the movie</i>; <i>The action movie was watched by the little boy</i>).

1	<p>L.1.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.</p> <ul style="list-style-type: none"> a. Print all upper- and lowercase letters. b. Use common, proper, and possessive nouns. c. Use singular and plural nouns with matching verbs in basic sentences (e.g., He hops; We hop). d. Use personal, possessive, and indefinite pronouns (e.g., I, me, my; they, them, their, anyone, everything). e. Use verbs to convey a sense of past, present, and future (e.g., Yesterday I walked home; Today I walk home; Tomorrow I will walk home). f. Use frequently occurring adjectives. g. Use frequently occurring conjunctions (e.g., <i>and, but, or, so, because</i>). h. Use determiners (e.g., articles, demonstratives). i. Use frequently occurring prepositions (e.g., <i>during, beyond, toward</i>). j. Produce and expand complete simple and compound declarative, interrogative, imperative, and exclamatory sentences in response to prompts.
K	<p>L.K.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.</p> <ul style="list-style-type: none"> a. Print many upper- and lowercase letters. b. Use frequently occurring nouns and verbs. c. Form regular plural nouns orally by adding /s/ or /es/ (e.g., <i>dog, dogs; wish, wishes</i>). d. Understand and use question words (interrogatives) (e.g., <i>who, what, where, when, why, how</i>). e. Use the most frequently occurring prepositions (e.g., <i>to, from, in, out, on, off, for, of, by, with</i>). f. Produce and expand complete sentences in shared language activities.

Note: Grades 9-12 are included for information and acceleration possibilities only.

Strand: Language

Strand: Language

Topic: Vocabulary Acquisition and Use

Anchor 5: Demonstrate understanding of word relationships and nuances in word meanings.

Grade	Common Core State Standard
11-12	<p>L.11-12.5 Demonstrate understanding of figurative language, word relationships, and nuances in word meanings.</p> <ul style="list-style-type: none"> a. Interpret figures of speech (e.g., hyperbole, paradox) in context and analyze their role in the text. b. Analyze nuances in the meaning of words with similar denotations.
9-10	<p>L.9-10.5 Demonstrate understanding of figurative language, word relationships, and nuances in word meanings.</p> <ul style="list-style-type: none"> a. Interpret figures of speech (e.g., euphemism, oxymoron) in context and analyze their role in the text. b. Analyze nuances in the meaning of words with similar denotations.
8	<p>L.8.5 Demonstrate understanding of figurative language, word relationships, and nuances in word meanings.</p> <ul style="list-style-type: none"> a. Interpret figures of speech (e.g. verbal irony, puns) in context. b. Use the relationship between particular words to better understand each of the words. c. Distinguish among the connotations (associations) of words with similar denotations (definitions) (e.g., <i>bullheaded</i>, <i>willful</i>, <i>firm</i>, <i>persistent</i>, <i>resolute</i>).
7	<p>L.7.5 Demonstrate understanding of figurative language, word relationships, and nuances in word meanings.</p> <ul style="list-style-type: none"> a. Interpret figures of speech (e.g., literary, biblical, and mythological allusions) in context. b. Use the relationship between particular words (e.g., synonym/antonym, analogy) to better understand each of the words. c. Distinguish among the connotations (associations) of words with similar denotations (definitions) (e.g., <i>refined</i>, <i>respectful</i>, <i>polite</i>, <i>diplomatic</i>, <i>condescending</i>).
6	<p>L.6.5 Demonstrate understanding of figurative language, word relationships, and nuances in word meanings.</p> <ul style="list-style-type: none"> a. Interpret figures of speech (e.g., personification) in context. b. Use the relationship between particular words (e.g., cause/effect, part/whole, item/category) to better understand each of the words. c. Distinguish among the connotations (associations) of words with similar denotations (definitions) (e.g., <i>stingy</i>, <i>scrumping</i>, <i>economical</i>, <i>unwasteful</i>, <i>thrifty</i>).
5	<p>L.5.5 Demonstrate understanding of figurative language, word relationships, and nuances in word meanings.</p> <ul style="list-style-type: none"> a. Interpret figurative language, including similes and metaphors, in context. b. Recognize and explain the meaning of common idioms, adages, and proverbs. c. Use the relationship between particular words (e.g., synonyms, antonyms, homographs) to better understand each of the words.

4	<p>L.4.5 Demonstrate understanding of figurative language, word relationships, and nuances in word meanings.</p> <ul style="list-style-type: none"> a. Explain the meaning of simple similes and metaphors (e.g., <i>as pretty as a picture</i>) in context. b. Recognize and explain the meaning of common idioms, adages, and proverbs. c. Demonstrate understanding of words by relating them to their opposites (antonyms) and to words with similar but not identical meanings (synonyms).
3	<p>L.3.5 Demonstrate understanding of figurative language, word relationships and nuances in word meanings.</p> <ul style="list-style-type: none"> a. Distinguish the literal and nonliteral meanings of words and phrases in context (e.g., <i>take steps</i>). b. Identify real-life connections between words and their use (e.g., describe people who are <i>friendly</i> or <i>helpful</i>). c. Distinguish shades of meaning among related words that describe states of mind or degrees of certainty (e.g., <i>knew</i>, <i>believed</i>, <i>suspected</i>, <i>heard</i>, <i>wondered</i>).
2	<p>L.2.5 Demonstrate understanding of figurative language, word relationships and nuances in word meanings.</p> <ul style="list-style-type: none"> a. Identify real-life connections between words and their use (e.g., <i>describe foods that are spicy</i> or <i>juicy</i>). b. Distinguish shades of meaning among closely related verbs (e.g., <i>toss</i>, <i>throw</i>, <i>hurl</i>) and closely related adjectives (e.g., <i>thin</i>, <i>slender</i>, <i>skinny</i>, <i>scrawny</i>).
1	<p>L.1.5 With guidance and support from adults, demonstrate understanding of figurative language, word relationships and nuances in word meanings.</p> <ul style="list-style-type: none"> a. Sort words into categories (e.g., colors, clothing) to gain a sense of the concepts the categories represent. b. Define words by category and by one or more key attributes (e.g., a <i>duck</i> is a bird that swims; a <i>tiger</i> is a large cat with stripes). c. Identify real-life connections between words and their use (e.g., note places at home that are <i>cozy</i>). d. Distinguish shades of meaning among verbs differing in manner (e.g., <i>look</i>, <i>peek</i>, <i>glance</i>, <i>stare</i>, <i>glare</i>, <i>scowl</i>) and adjectives differing in intensity (e.g., large, gigantic) by defining or choosing them or by acting out the meanings.
K	<p>L.K.5 With guidance and support from adults, explore word relationships and nuances in word meanings.</p> <ul style="list-style-type: none"> a. Sort common objects into categories (e.g., shapes, foods) to gain a sense of the concepts the categories represent. b. Demonstrate understanding of frequently occurring verbs and adjectives by relating them to their opposites (antonyms). c. Identify real-life connections between words and their use (e.g., note places at school that are colorful). d. Distinguish shades of meaning among verbs describing the same general action (e.g., <i>walk</i>, <i>march</i>, <i>strut</i>, <i>prance</i>) by acting out the meanings.

Note: Grades 9-12 are included for information and acceleration possibilities only.

Strand: Language

Topic: Vocabulary Acquisition and Use

Anchor 6: Acquire and use accurately a range of general academic and domain-specific words and phrases sufficient for reading, writing, speaking, and listening at the college and career readiness level; demonstrate independence in gathering vocabulary knowledge when encountering an unknown term important to comprehension or expression.

Grade	Common Core State Standard
11-12	L.11-12.6 Acquire and use accurately general academic and domain-specific words and phrases, sufficient for reading, writing, speaking, and listening at the college and career readiness level; demonstrate independence in gathering vocabulary knowledge when considering a word or phrase important to comprehension or expression.
9-10	L.9-10.6 Acquire and use accurately general academic and domain-specific words and phrases, sufficient for reading, writing, speaking, and listening at the college and career readiness level; demonstrate independence in gathering vocabulary knowledge when considering a word or phrase important to comprehension or expression.
8	L.8.6 Acquire and use accurately grade-appropriate general academic and domain-specific words and phrases; gather vocabulary knowledge when considering a word or phrase important to comprehension or expression.
7	L.7.6 Acquire and use accurately grade-appropriate general academic and domain-specific words and phrases; gather vocabulary knowledge when considering a word or phrase important to comprehension or expression.
6	L.6.6 Acquire and use accurately grade-appropriate general academic and domain-specific words and phrases; gather vocabulary knowledge when considering a word or phrase important to comprehension or expression.
5	L.5.6 Acquire and use accurately grade-appropriate general academic and domain-specific words and phrases, including those that signal contrast, addition, and other logical relationships (e.g., <i>however, although, nevertheless, similarly, moreover, in addition</i>).
4	L.4.6 Acquire and use accurately grade-appropriate general academic and domain-specific words and phrases, including those that signal precise actions, emotions, or states of being (e.g., <i>quizzed, whined, stammered</i>) and that are basic to a particular topic (e.g., <i>wildlife, conservation, and endangered</i> when discussing animal preservation).
3	L.3.6 Acquire and use accurately grade-appropriate conversational, general academic, and domain-specific words and phrases, including those that signal spatial and temporal relationships (e.g., <i>After dinner that night we went looking for them</i>).
2	L.2.6 Use words and phrases acquired through conversations, reading and being read to, and responding to texts, including using adjectives and adverbs to describe (e.g., <i>When other kids are happy that makes me happy</i>).

1	L.1.6 Use words and phrases acquired through conversations, reading and being read to, and responding to texts, including using frequently occurring conjunctions to signal simple relationships (e.g., <i>because</i>).
K	L.K.6 Use words and phrases acquired through conversations, reading and being read to, and responding to texts.

QUARTER 2				
Year Long Curriculum Plan by Quarter	Reading	Writing	Speaking and Listening	Language
	<p>Key Ideas and Details RL.K.1 and RI.K.1 With prompting and support, ask and answer questions about key details.</p> <p>RL.K.2 With prompting and support, retell familiar stories, including key details.</p> <p>RI.K.2 With prompting and support, identify the main topic and retell key details of a text.</p> <p>Craft and Structure RL.K.4 With prompting and support, describe the connection between two individuals, events, ideas, or pieces of information in a text.</p> <p>RI.K.4 With prompting and support, ask and answer questions about unknown words in a text.</p> <p>RI.K.6 Name the author and illustrator of a text and define the role of each in presenting the ideas or information in a text.</p> <p>RL.K.6 With prompting and support, name the author and illustrator of a story and define the role of each in telling the story.</p>	<p>Production and Distribution of Writing W.K.5 With guidance and support from adults, respond to questions and suggestions from peers and add details to strengthen writing as needed.</p> <p>W.K.6 With guidance and support from adults, explore a variety of digital tools to produce and publish writing, including in collaboration with peers.</p>	<p>Comprehension and Collaboration SL.K.2 Confirm understanding of a text read aloud or information presented orally or through other media by asking and answering questions about key details and requesting clarification if something is not understood.</p> <p>SL.K.3 Ask and answer questions in order to seek help, get information, or clarify something that is not understood.</p>	<p>Conventions of Standard English L.K.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.</p> <p>a Print many upper- and lowercase letters.</p> <p>b Use frequently occurring nouns and verbs.</p> <p>c Form regular plural nouns orally by adding /s/ or /es/ (e.g., dog, dogs; wish, wishes).</p> <p>d Understand and use question words (interrogatives) (e.g., who, what, where, when, why, how).</p> <p>e Use the most frequently occurring prepositions (e.g., to, from, in, out, on, off, for, of, by, with).</p> <p>f Produce and expand complete sentences in share language</p> <p>Vocabulary Acquisition and Use L.K.5 With guidance and support from adults, explore word relationships and nuances in word meanings.</p> <p>a. Sort common objects into categories (e.g., shapes, foods) to gain a sense of the concepts the categories represent.</p> <p>b. Demonstrate understanding of frequently occurring verbs and adjectives by relating them to their opposites (antonyms).</p>

<p>Phonics and Word recognition RF.K.3 Know and apply grade-level phonics and word analysis skills in decoding words.</p> <p>a. Demonstrate basic knowledge of letter-sound correspondences by producing the primary or most frequent sound for each consonant.</p> <p>b. Associate the long and short sounds with the common spellings (graphemes) for the five major vowels.</p> <p>c. Read common high-frequency words by sight. (e.g., the, of, to, you, she, my, is, are, do, does).</p> <p>d. Distinguish between similarly spelled words by identifying the sounds of the letters that differ.</p>			<p>c. Identify real-life connections between words and their use (e.g., note places at school that are colorful).</p> <p>d. Distinguish shades of meaning among verbs describing the same general action (e.g., walk, march, strut, prance) by acting out the meanings.</p>
--	--	--	---

QUARTER 3				
Year Long Curriculum Plan by Quarter	Reading	Writing	Speaking and Listening	Language
	<p>Key Ideas and Details RL.K.1 and RI.K.1 With prompting and support, ask and answer questions about key details.</p> <p>Integration of Knowledge and Ideas RL.K.7 With prompting and support, describe the relationship between illustrations and the story in which they appear (e.g., what moment in a story an illustration depicts).</p> <p>RI.K.7 With prompting and support, describe the relationship between illustrations and the text in which they appear (e.g., what person, place, thing, or idea in the text an illustration depicts).</p> <p>RI.K.8 With prompting and support, identify the reasons an author gives to support points in a text.</p> <p>Fluency RF.K.4 Read emergent-reader texts with purpose and understanding.</p>	<p>Research to Build and Present Knowledge W.K.7 Participate in shared research and writing projects (e.g., explore a number of books by a favorite author and express opinions about them).</p>	<p>Comprehension and Collaboration SL.K.4 Describe familiar people, places, things, and events and, with prompting and support, provide additional detail.</p> <p>Presentation of Knowledge and Ideas SL.K.6 Speak audibly and express thoughts, feelings, and ideas clearly.</p>	<p>Conventions of Standard English L.K.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.</p> <p>a Print many upper- and lowercase letters.</p> <p>b Use frequently occurring nouns and verbs.</p> <p>c Form regular plural nouns orally by adding /s/ or /es/ (e.g., dog, dogs; wish, wishes).</p> <p>d Understand and use question words (interrogatives) (e.g., who, what, where, when, why, how).</p> <p>e Use the most frequently occurring prepositions (e.g., to, from, in, out, on, off, for, of, by, with).</p> <p>f Produce and expand complete sentences in share language</p> <p>Vocabulary Acquisition and Use L.K.6 Use words and phrases acquired through conversations, reading and being read to, and responding to texts.</p>

QUARTER 4				
Year Long Curriculum Plan by Quarter	Reading	Writing	Speaking and Listening	Language
	<p>Key Ideas and Details RL.K.1and RI.K.1 With prompting and support, ask and answer questions about key details.</p> <p>Integration of Knowledge and Ideas RL.K.9 With prompting and support, compare and contrast the adventures and experiences of characters in familiar stories.</p> <p>RI.K.9 With prompting and support, identify basic similarities in and differences between two texts on the same topic (e.g., in illustrations, descriptions, or procedures).</p>	<p>Research to Build and Present Knowledge W.K.8 With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.</p>	<p>Presentation of Knowledge and Ideas SL.K.6 Speak audibly and express thoughts, feelings, and ideas clearly.</p>	<p>Conventions of Standard English L.K.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.</p> <p>a Print many upper- and lowercase letters.</p> <p>b Use frequently occurring nouns and verbs.</p> <p>c Form regular plural nouns orally by adding /s/ or /es/ (e.g., dog, dogs; wish, wishes).</p> <p>d Understand and use question words (interrogatives) (e.g., who, what, where, when, why, how).</p> <p>e Use the most frequently occurring prepositions (e.g., to, from, in, out, on, off, for, of, by, with).</p> <p>f Produce and expand complete sentences in share language</p>

Objectives Assessed Throughout the Year

RL.K.10 and RI.K.10 Actively engage in group reading activities with purpose and understanding.

W.K.7 Participate in shared research and writing projects (e.g., explore a number of books by a favorite author and express opinions about them).

L.K.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.

- a. Print many upper- and lowercase letters.
- b. Use frequently occurring nouns and verbs.
- c. Form regular plural nouns orally by adding /s/ or /es/ (e.g., dog, dogs; wish, wishes).
- d. Understand and use question words (interrogatives) (e.g., who, what, where, when, why, how).
- e. Use the most frequently occurring prepositions (e.g., to, from, in, out, on, off, for, of, by, with).
- f. Produce and expand complete sentences in share language.

QUARTER 1				
Year Long Curriculum Plan by Quarter	Reading	Writing	Speaking and Listening	Language
	<p>Key Ideas and Details RI.1.1 and RL.1.1 Ask and answer questions about key details.</p> <p>RI.1.2 Identify the main topic and retell key details of a text.</p> <p>RL.1.3 Describe characters, settings, and major events in a story, using key details.</p> <p>RI.1.3 Describe the connection between two individuals, events, ideas, or pieces of information in a text.</p> <p>RL.1.2 Retell stories, including key details, and demonstrate understanding of their central message or</p> <p>Craft and Structure RI.1.4 Ask and answer questions to help determine or clarify the meaning of words and phrases in a text.</p> <p>RI.1.7 Use the illustrations and details in a text to describe its key ideas.</p> <p>Print Concepts RF.1.2 Demonstrate understanding of spoken words, syllables, and sounds (phonemes).</p> <p>a. Distinguish long from short vowel sounds in spoken single-syllable words.</p> <p>b. Orally produce single-syllable words by blending sounds (phonemes), including consonant blends.</p> <p>c. Isolate and pronounce initial, medial vowel, and final sounds (phonemes) in spoken single-syllable words.</p>	<p>Text Types and Purposes W.1.1 Write opinion pieces in which they introduce the topic or name the book they are writing about, state an opinion, supply a reason for the opinion, and provide some sense of closure.</p>	<p>Comprehension and Collaboration SL.1.3 Ask and answer questions about what a speaker says in order to gather additional information or clarify something that is not understood.</p>	<p>Vocabulary Acquisition and Use L.K.4 Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on kindergarten reading and content.</p> <p>a. Identify new meanings for familiar words and apply them accurately (e.g., knowing duck is a bird and learning the verb to duck).</p> <p>b. Use the most frequently occurring inflections and affixes (e.g., -ed, -s, re-, un-, pre-, -ful, -less) as a clue to the meaning of an unknown word.</p> <p>Conventions of Standard English L.1.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.</p> <p>a. Print all upper- and lowercase letters.</p> <p>b. Use common, proper, and possessive nouns.</p> <p>c. Use singular and plural nouns with matching verbs in basic sentences (e.g., He hops; We hop).</p> <p>d. Use personal, possessive, and indefinite pronouns (e.g., I, me, my; they, them, their, anyone, everything).</p> <p>e. Use verbs to convey a sense of past, present, and future (e.g., Yesterday I walked home; Today I walk home; Tomorrow I will walk home).</p> <p>f. Use frequently occurring adjectives.</p> <p>h. Use determiners (e.g., articles, demonstratives).</p>

<p>d. Segment spoken single-syllable words into their complete sequence of individual sounds (phonemes).</p> <p>Phonological Awareness RF.1.1 Demonstrate understanding of the organization and basic features of print.</p> <p>a. Recognize the distinguishing features of a sentence (e.g., first word, capitalization, ending).</p> <p>RF.1.3 Know and apply grade-level phonics and word analysis skills in decoding words.</p> <p>a. Know the spelling-sound correspondences for common consonant digraphs (two letters that represent one sound).</p> <p>b. Decode regularly spelled one-syllable words.</p> <p>c. Know final -e and common vowel team conventions for representing long vowel sounds.</p> <p>d. Use knowledge that every syllable must have a vowel sound to determine the number of syllables in a printed word.</p> <p>e. Decode two-syllable words following basic patterns by breaking the words into syllables.</p> <p>f. Read words with inflectional endings.</p> <p>g. Recognize and read grade-appropriate irregularly spelled.</p>			<p>i. Use frequently occurring prepositions (e.g., during, beyond, toward).</p> <p>j Produce and expand complete simple and compound declarative, interrogative, imperative, and exclamatory sentences in response to prompts.</p> <p>L.1.2 Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing.</p> <p>a Capitalize dates and names of people.</p> <p>b Use end punctuation for sentences.</p> <p>c Use commas in dates and to separate single words in a series.</p> <p>d Use conventional spelling for words with common spelling patterns and for frequently occurring irregular words.</p> <p>e Spell untaught words phonetically, drawing on phonemic awareness and spelling conventions.</p> <p>Vocabulary Acquisition and Use L.1.4 Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grade 1 reading and content, choosing flexibly from an array of strategies.</p> <p>a Use sentence-level context as a clue to the meaning of a word or phrase.</p> <p>b Use frequently occurring affixes as a clue to the meaning of a word.</p> <p>c Identify frequently occurring root words (e.g., look) and their inflectional forms.</p>

Use context to confirm or self-correct word recognition and understanding, rereading as necessary.</p>	<p>W.1.7 Participate in shared research and writing projects (e.g., explore a number of “how-to” books on a given topic and use them to write a sequence of instructions).</p> <p>W.1.8 With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.</p>	<p>Presentation of Knowledge and Ideas SL.1.5 Add drawings or other visual displays to descriptions when appropriate to clarify ideas, thoughts, and feelings</p> <p>SL.1.6 Produce complete sentences when appropriate to task and situation. (See grade 1 Language standards 1 and 3 on page 26 for specific expectations.)</p>	<p>Conventions of Standard English L.1.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.</p> <p>a. Print all upper- and lowercase letters.</p> <p>b. Use common, proper, and possessive nouns.</p> <p>c. Use singular and plural nouns with matching verbs in basic sentences (e.g., He hops; We hop).</p> <p>d. Use personal, possessive, and indefinite pronouns (e.g., I, me, my; they, them, their, anyone, everything).</p> <p>e Use verbs to convey a sense of past.</p> <p>L.1.6 Use words and phrases acquired through conversations, reading and being read to, and responding to texts, including using frequently occurring conjunctions to signal simple relationships (e.g., I named my hamster Nibbles because she nibbles too much because she likes that).</p>

Objectives Assessed Throughout the Year

RI.1.1 and RL.1.1 Ask and answer questions about key details.

RI.1.4 Ask and answer questions to help determine or clarify the meaning of words and phrases in a text.

W.1.1 Write opinion pieces in which they introduce the topic or name the book they are writing about, state an opinion, supply a reason for the opinion, and provide some sense of closure.

L.1.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.

- a. Print all upper- and lowercase letters.
- b. Use common, proper, and possessive nouns.
- c. Use singular and plural nouns with matching verbs in basic sentences (e.g., He hops; We hop).
- d. Use personal, possessive, and indefinite pronouns (e.g., I, me, my; they, them, their, anyone, everything).
- e. Use verbs to convey a sense of past, present, and future (e.g., Yesterday I walked home; Today I walk home; Tomorrow I will walk home).
- f. Use frequently occurring adjectives.
- h. Use determiners (e.g., articles, demonstratives).
- i. Use frequently occurring prepositions (e.g., during, beyond, toward).
- j. Produce and expand complete simple and compound declarative, interrogative, imperative, and exclamatory sentences in response to prompts.

QUARTER 1				
Year Long Curriculum Plan by Quarter	Reading	Writing	Speaking and Listening	Language
	<p>Key Ideas and Details RI.2.1 and RL.2.1 Ask and answer questions such questions as who, what, where, when, why, and how to demonstrate understanding of key details in a text.</p> <p>RL.2.2 Recount stories, including fables and folktales from diverse cultures, and determine their central message, lesson, or moral.</p> <p>RL.2.3 Describe how characters in a story respond to major events and challenges.</p> <p>RI.2.2 Identify the main topic of a multi-paragraph text as well as the focus of specific paragraphs within the text.</p> <p>RI.2.3 Describe the connection between a series of historical events, scientific ideas or concepts, or steps in a technical procedures in a text.</p> <p>Craft and Structure RL.2.4 Determine the meaning of words and phrases in a text relevant to a grade 2 topic or subject area.</p> <p>Integration of Knowledge and Ideas RL.2.7 Use information gained from the illustrations and words in a print or digital text to demonstrate understanding of its characters, setting, or plot.</p>	<p>Text Types and Purposes W.2.3 Write narratives in which they recount a well-elaborated event or short sequence of events, include details to describe actions, thoughts, and feelings, use temporal words to signal event order, and provide a sense of closure.</p>	<p>Comprehension and Collaboration SL.2.1 Participate in collaborative conversations with diverse partners about grade 2 topics and texts with peers and adults in small and larger groups.</p> <p>a) Follow agreed-upon rules for discussions (e.g., gaining the floor in respectful ways, listening to others with care, speaking one at a time about the topics and texts under discussion).</p> <p>b) Build on others' talk in conversations by linking their comments to the remarks of others.</p> <p>c) Ask for clarification and further explanation as needed about the topics and texts under discussion.</p>	<p>L.2.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.</p> <p>a) Use collective nouns (e.g., group).</p> <p>b) Form and use frequently occurring irregular plural nouns (e.g., feet, children, teeth, mice, fish).</p> <p>c) Use reflexive pronouns (e.g., myself, ourselves).</p> <p>d) Form and use the past tense of frequently occurring irregular verbs (e.g., sat, hid, told).</p> <p>e) Use adjectives and adverbs, and choose between them depending on what is to be modified.</p> <p>f) Produce, expand, and rearrange complete simple and compound sentences (e.g., The boy watched the movie; The little boy watched the movie; The action movie was watched by the little boy).</p> <p>L.2.2 Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing.</p> <p>a) Capitalize holidays, product names, and geographic names.</p> <p>b) Use commas in greetings and closings of letters.</p>

<p>Print Concepts RF.1.2 Demonstrate understanding of spoken words, syllables, and sounds (phonemes).</p> <ul style="list-style-type: none"> a. Distinguish long from short vowel sounds in spoken single-syllable words. b. Orally produce single-syllable words by blending sounds (phonemes), including consonant blends. c. Isolate and pronounce initial, medial vowel, and final sounds (phonemes) in spoken single-syllable words. d. Segment spoken single-syllable words into their complete sequence of individual sounds (phonemes). <p>Phonological Awareness RF.1.1 Demonstrate understanding of the organization and basic features of print.</p> <ul style="list-style-type: none"> a. Recognize the distinguishing features of a sentence (e.g., first word, capitalization, ending). <p>RF.1.3 Know and apply grade-level phonics and word analysis skills in decoding words.</p> <ul style="list-style-type: none"> a. Know the spelling-sound correspondences for common consonant digraphs (two letters that represent one sound). 			<ul style="list-style-type: none"> c) Use an apostrophe to form contractions and frequently occurring possessives. d) Generalize learned spelling patterns when writing words (e.g., cage-badger; boy-boil). e) Consult reference materials, including beginning dictionaries, as needed to check and correct spellings. <p>Vocabulary Acquisition and Use L.2.3 Use knowledge of language and its conventions when writing, speaking, reading, or listening. Compare formal and informal uses of English.</p> <p>L.2.4 Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grade 2 reading and content, choosing flexibility from an array of strategies.</p>
---	--	--	--

	<p>b. Decode regularly spelled one-syllable words.</p> <p>c. Know final -e and common vowel team conventions for representing long vowel sounds.</p> <p>d. Use knowledge that every syllable must have a vowel sound to determine the number of syllables in a printed word.</p> <p>e. Decode two-syllable words following basic patterns by breaking the words into syllables.</p> <p>f. Read words with inflectional endings.</p> <p>g. Recognize and read grade-appropriate irregularly spelled.</p>

	<p>Key Ideas and Details RI.2.1 and RL.2.1 Ask and answer questions such questions as who, what, where, when, why, and how to demonstrate understanding of key details in a text.</p> <p>Craft and Structure RL.2.4 Determine the meaning of words and phrases in a text relevant to a grade 2 topic or subject area.</p> <p>Integration of Knowledge and Ideas RL.2.7 Use information gained from the illustrations and words in a print or digital text to demonstrate understanding of its characters, setting, or plot.</p> <p>RI.2.5 Know and use various text features (e.g., captions, bold print, subheadings, glossaries, indexes, electronic menus, icons) to locate key facts or information in a text efficiently.</p> <p>RI.2.6 Identify the main purpose of a text, including what the author wants to answer, explain, or describe.</p> <p>RI.2.7 Explain how specific images (e.g., a diagram showing how a machine works) contribute to clarify a position.</p> <p>RL.2.9 Compare and contrast two or more versions of the same story (e.g., Cinderella stories) by different authors or from different cultures.</p> <p>RL.2.10 By the end of the year, read and comprehend literature, including prose and poetry, in the grades 2–3 text complexity band proficiently, with scaffolding as needed at the high end of the range</p>	<p>Text Types and Purposes W.2.2 Write informative/explanatory texts in which they introduce a topic, use facts and definitions to develop points, and provide a concluding</p> <p>W.2.6 With guidance and support from adults, use a variety of digital tools to produce and publish writing, including in collaboration with peers.</p>	<p>Presentation of Knowledge and Ideas SL.2.5 Create audio recordings of stories or poems; add drawings or other visual displays to stories or recounts of experiences when appropriate to clarify ideas, thoughts, and feelings.</p>	<p>L.2.6 Use words and phrases acquired through conversations, reading and being read to, and responding to texts, including and adverbs to describe (e.g., When other kids are happy that makes me happy).</p>

Objectives Assessed Throughout the Year

RI.2.1 and RL.2.1 Ask and answer questions such questions as who, what, where, when, why, and how to demonstrate understanding of key details in a text.

W.2.3 Write narratives in which they recount a well-elaborated event or short sequence of events, include details to describe actions, thoughts, and feelings, use temporal words to signal event order, and provide a sense of closure.

L.2.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.

- a) Use collective nouns (e.g., group).
- b) Form and use frequently occurring irregular plural nouns (e.g., feet, children, teeth, mice, fish).
- c) Use reflexive pronouns (e.g., myself, ourselves).
- d) Form and use the past tense of frequently occurring irregular verbs (e.g., sat, hid, told).
- e) Use adjectives and adverbs, and choose between them depending on what is to be modified.
- f) Produce, expand, and rearrange complete simple and compound sentences (e.g., The boy watched the movie; The little boy watched the movie; The action movie was watched by the little boy).

L.2.2 Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing.

- a) Capitalize holidays, product names, and geographic names.
- b) Use commas in greetings and closings of letters.
- c) Use an apostrophe to form contractions and frequently occurring possessives.
- d) Generalize learned spelling patterns when writing words (e.g., cage-badge; boy-boil).
- e) Consult reference materials, including beginning dictionaries, as needed to check and correct spellings.

QUARTER 1				
Year Long Curriculum Plan by Quarter	Reading	Writing	Speaking and Listening	Language
	<p>Key Ideas and Details RI.3.1 Ask and answer questions to demonstrate understanding of a text, referring explicitly to the text as the basis for the answers.</p> <p>RI.3.2 Determine the main idea of a text; recount the key details and explain how they support the main idea.</p> <p>RI.3.3 Describe the relationship between a series of historical events, scientific ideas or concepts, or steps in technical procedures in a text, using language that pertains to time, sequence, and cause/effect.</p> <p>RL.3.3 Describe characters in a story (e.g., their traits, motivations, or feelings) and explain how their actions contribute to the sequence of events.</p> <p>Craft and Structure RL.3.4 Determine the meaning of words and phrases as they are used in a text, distinguishing literal from nonliteral language.</p> <p>RL.3.6 Distinguish their own point of view from that of the narrator or those of the characters.</p> <p>Integration of Knowledge and Ideas RL.3.7 Explain how specific aspects of a text's illustrations contribute to what is conveyed by the words in a story (e.g., create mood, emphasize aspects of a character or setting).</p>	<p>Text Types and Purposes W.3.3 Write narratives to develop real or imagined experiences or events using effective technique, descriptive details, and clear event sequences.</p> <ol style="list-style-type: none"> Establish a situation and introduce a narrator and/or characters; organize an event sequence that unfolds naturally. Use dialogue and descriptions of actions, thoughts, and feelings to develop experiences and events or show the response of characters to situations. Use temporal words and phrases to signal event order. Provide a sense of closure 	<p>Comprehension and Collaboration SL.3.1 Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on <i>grade 3 topics and texts</i>, building on others' ideas and expressing their own clearly.</p> <ol style="list-style-type: none"> Come to discussions prepared having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion. Follow agreed-upon rules for discussions (e.g., gaining the floor in respectful ways, listening to others with care, speaking one at a time about the topics and texts under discussion). Ask questions to check understanding of information presented, stay on topic, and link their comments to the remarks of others. Explain their own ideas and understanding in light of the discussion. 	<p>Conventions of Standard English L.3.1 Explain the function of nouns, pronouns, verbs, adjectives, and adverbs in general and their functions in particular sentences.</p> <p>Knowledge of Language L.3.2 Use commas in addresses.</p> <p>L.3.2 Use commas and quotation marks in dialogue.</p> <p>Vocabulary Acquisition and Use L.3.4 Determine the meaning of the new word formed when a known affix is added to a known word (e.g., agreeable/disagreeable, comfortable/uncomfortable, care/careless, heat/preheat).</p> <p>L.3.4 Use a known root word as a clue to the meaning of an unknown word with the same root (e.g., company, companion).</p> <p>L.3.4 Use glossaries or beginning dictionaries, both print and digital, to determine or clarify the precise meaning of key words and phrases.</p>

	<p>RI.3.8 Describe the logical connection between particular sentences and paragraphs in a text (e.g., comparison, cause/effect, first/second/third in a sequence).</p>

	<p>RL.3.9 Compare and contrast the themes, settings, and plots of stories written by the same author about the same or similar characters (e.g., in books from a series).</p>			
--	--	--	--	--

Objectives Assessed Throughout the Year

- RI.3.4** Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a grade 3 topic or subject area.
- RL.3.10** By the end of the year, read and comprehend literature, including stories, dramas, and poetry, at the high end of the grades 2–3 text complexity band independently and proficiently.
- RI.3.10** By the end of the year, read and comprehend informational texts, including history/social studies, science, and technical texts, at the high end of the grades 2–3 text complexity band independently and proficiently.
- RF.3.3** Know and apply grade-level phonics and word analysis skills in decoding words.
- Identify and know the meaning of the most common prefixes and derivational suffixes.
 - Decode words with common Latin suffixes.
 - Decode multisyllable words.
 - Read grade-appropriate irregularly spelled words.
- RF.3.4** Read with sufficient accuracy and fluency to support comprehension.
- Read on-level text with purpose and understanding.
 - Read on-level prose and poetry orally with accuracy, appropriate rate, and expression on successive readings
 - Use context to confirm or self-correct word recognition and understanding, rereading as necessary.
- W.3.10** Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.

QUARTER 1				
Year Long Curriculum Plan by Quarter	Reading	Writing	Speaking and Listening	Language
	<p>Key Ideas and Details RL.4.1 Refer to details and examples in a text when explaining what the text says explicitly and when drawing inferences from the text.</p> <p>RL.4.2 Determine a theme of a story, drama, or poem from details in the text; summarize the text</p> <p>RL.4.3 Describe in depth a character, setting, or event in a story or drama, drawing on specific details in the text (e.g., a character's thoughts, words, or actions).</p> <p>Craft and Structure RI.4.4 Determine the meaning of general academic and domain-specific words or phrases in a text relevant to a grade 4 topic or subject area.</p> <p>RI.4.5 Describe the overall structure (e.g., chronology, comparison, cause/effect, problem/solution) of events, ideas, concepts, or information in a text or part of a text. Integration of Knowledge and Ideas</p>	<p>Text Types and Purposes W.4.3 Write narratives to develop real or imagined experiences or events using effective technique, descriptive details, and clear event sequences.</p> <ol style="list-style-type: none"> Orient the reader by establishing a situation and introducing a narrator and/or characters; organize an event sequence that unfolds naturally. Use dialogue and description to develop experiences and events or show the responses of characters to situations. Use a variety of transitional words and phrases to manage the sequence of events. Use concrete words and phrases and sensory details to convey experiences and events precisely. Provide a conclusion that follows from the narrated experiences or events. <p>Production and Distribution of Writing W.4.4. Produce clear and coherent writing in which the development and organization are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)</p>	<p>Comprehension and Collaboration SL.4.1 Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on <i>grade 4 topics and texts</i>, building on others' ideas and expressing their own clearly.</p> <ol style="list-style-type: none"> Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion. Follow agreed-upon rules for discussions and carry out assigned roles. Pose and respond to specific questions to clarify or follow up on information, and make comments that contribute to the discussion and link to the remarks of others. Review the key ideas expressed and explain their own ideas and understanding in light of the discussion. <p>SL.4.2 Paraphrase portions of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.</p>	<p>Conventions of Standard English L.4.1 Use relative pronouns (who, whose, whom, which, that) and relative adverbs (where, when, why).</p> <p>L.4.1 Form and use the progressive (e.g., I was walking; I am walking; I will be walking) verb tenses.</p> <p>L.4.2 Use correct capitalization.</p> <p>Knowledge of Language L.4.3 Choose words and phrases to convey ideas precisely.</p> <p>Vocabulary Acquisition and Use L.4.4 Use context (e.g., definitions, examples, or restatements in text) as a clue to the meaning of a word or phrase.</p> <p>L.4.5 Explain the meaning of simple similes and metaphors (e.g., as pretty as a picture) in context.</p>

		<p>W.4.5 With guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, and editing. QUARTER 4				
Year Long Curriculum Plan by Quarter	Reading	Writing	Speaking and Listening	Language
	<p>Key Ideas and Details RI.4.1 Refer to details and examples in a text when explaining what the text says explicitly and when drawing inferences from the text.</p> <p>RI.4.2 Determine the main idea of a text and explain how it is supported by key details; summarize the text.</p> <p>RI.4.3 Explain events, procedures, ideas, or concepts in a historical, scientific, or technical text, including what happened and why, based on specific information in the text.</p> <p>Craft and Structure RL.4.4 Determine the meaning of words and phrases as they are used in a text, including those that allude to significant characters found in mythology (e.g., Herculean).</p> <p>RI.4.5 Describe the overall structure (e.g., chronology, comparison, cause/effect, problem/solution) of events, ideas, concepts, or information in a text or part of a text.</p> <p>RL.4.6 Compare and contrast the point of view from which different stories are narrated, including the difference between first- and third-person narrations.</p>	<p>Text Types and Purposes W.4.1 Write opinion pieces on topics or texts, supporting a point of view with reasons and information.</p> <ol style="list-style-type: none"> Introduce a topic or text clearly, state an opinion, and create an organizational structure in which related ideas are grouped to support the writer's purpose. Provide reasons that are supported by facts and details. Link opinion and reasons using words and phrases (e.g., for instance, in order to, in addition). Provide a concluding statement or section related to the opinion presented. <p>W.4.3 Write narratives to develop real or imagined experiences or events using effective technique, descriptive details, and clear event sequences.</p> <ol style="list-style-type: none"> Orient the reader by establishing a situation and introducing a narrator and/or characters; organize an event sequence that unfolds naturally. Use dialogue and description to develop experiences and events or show the responses of characters to situations. Use a variety of transitional words and phrases to manage the sequence of events. Use concrete words and phrases and sensory details to convey experiences and events precisely. Provide a conclusion that follows from the narrated experiences or events. 	<p>Presentation of Knowledge and Ideas SL.4.6 Differentiate between contexts that call for formal English (e.g., presenting ideas) and situations where informal discourse is appropriate (e.g., small-group discussion); use formal English when appropriate to task and situation.</p>	<p>Conventions of Standard English L.4.1. Form and use the progressive (e.g., I was walking; I am walking; I will be walking) verb tenses.</p> <p>L.4.1 Form and use prepositional phrases.</p> <p>L.4.1 Produce complete sentences, recognizing and correcting inappropriate fragments and run-ons.</p> <p>L.4.2 Use correct capitalization.</p> <p>L.4.2 Spell grade-appropriate words correctly, consulting references as needed.</p> <p>Knowledge of Language L.4.4 Use context (e.g., definitions, examples, or restatements in text) as a clue to the meaning of a word or phrase.</p> <p>Vocabulary Acquisition and Use L.4.6 Acquire and use accurately grade-appropriate general academic and domain-specific words and phrases, including those that signal precise actions, emotions, or states of being (e.g., quizzed, whined, stammered) and that are based on a particular topic (e.g., <i>wildlife</i>, <i>conservation</i>, and <i>endangered</i> when discussing animal preservation).</p>

	<p>Integration of Knowledge and Ideas RI.4.7 Interpret information presented visually, orally, or quantitatively (e.g., in charts, graphs, diagrams, time lines, animations, or interactive elements on Web pages) and explain how the information contributes to an understanding of the text in which it appears.</p> <p>RI.4.8 Explain how an author uses reasons and evidence to support particular points in a text.</p> <p>RL.4.9 Compare and contrast the treatment of similar themes and topics (e.g., opposition of good and evil) and patterns of events (e.g., the quest) in stories, myths, and traditional literature from different cultures.</p>	<p>Production and Distribution of Writing W.4.4. Produce clear and coherent writing in which the development and organization are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)</p> <p>W.4.5 With guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, and editing. (Editing for conventions should demonstrate command of Language standards 1–3 up to and including grade 4.)</p> <p>W.4.6 With some guidance and support from adults, use technology, including the Internet, to produce and publish writing as well as to interact and collaborate with others; demonstrate sufficient command of keyboarding skills to type a minimum of one page in one sitting.</p> <p>Research to Build and Present Knowledge W.4.9. Draw evidence from literary or informational texts to support analysis, reflection, and research. b. Apply grade 4 Reading standards to informational texts (e.g., “Explain how an author uses reasons and evidence to support particular points in a text”).</p>		
--	--	--	--	--

Objectives Assessed Throughout the Year

- RL.4.10** By the end of the year, read and comprehend literature, including stories dramas, and poetry, in the grades 4–5 text complexity band proficiently, with scaffolding as needed at the high end of the range.
- RI.4.10** By the end of year, read and comprehend informational texts, including history/social studies, science, and technical texts, in the grades 4–5 text complexity band proficiently, with scaffolding as needed at the high end of the range.
- RF.4.3** Know and apply grade-level phonics and word analysis skills in decoding words.
a. Use combined knowledge of all letter-sound correspondences, syllabication patterns, and morphology (e.g., roots and affixes) to read accurately unfamiliar multisyllabic words in context and out of context.
- RF.4.4** Read with sufficient accuracy and fluency to support comprehension.
a. Read on-level text with purpose and understanding.
b. Read on-level prose and poetry orally with accuracy, appropriate rate, and expression on successive readings.
c. Use context to confirm or self-correct word recognition and understanding, rereading as necessary.
- W.4.10** Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.

QUARTER 1				
Year Long Curriculum Plan by Quarter	Reading	Writing	Speaking and Listening	Language
	<p>Key Ideas and Details RL.5.1 Quote accurately from a text when explaining what the text says explicitly and when drawing inferences from the text.</p> <p>RL.5.2 Determine a theme of a story, drama, or poem from details in the text, including how characters in a story or drama respond to challenges or how the speaker in a poem reflects upon a topic; summarize the text.</p> <p>RL.5.3 Compare and contrast two or more characters, settings, or events in a story or drama, drawing on specific details in the text (e.g., how characters interact).</p> <p>Craft and Structure RL.5.4 Determine the meaning of words and phrases as they are used in a text, including figurative language such as metaphors and similes.</p> <p>Integration of Knowledge and Ideas RI.5.7 Draw on information from multiple print or digital sources, demonstrating the ability to locate an answer to a question quickly or to solve a problem efficiently.</p> <p>RI.5.8 Explain how an author uses reasons and evidence to support particular points in a text, identifying which reasons and evidence support which point(s).</p>	<p>Text Types and Purposes W.5.3 Write narratives to develop real or imagined experiences or events using effective technique, descriptive details, and clear event sequences.</p> <ol style="list-style-type: none"> Orient the reader by establishing a situation and introducing a narrator and/or characters; organize an event sequence that unfolds naturally. Use narrative techniques, such as dialogue, description, and pacing, to develop experiences and events or show the responses of characters to situations. Use a variety of transitional words, phrases, and clauses to manage the sequence of events. Use concrete words and phrases and sensory details to convey experiences and events precisely. Provide a conclusion that follows from the narrated experiences or events. <p>Production and Distribution of Writing W.5.4. Produce clear and coherent writing in which the development and organization are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)</p>	<p>Comprehension and Collaboration SL.5.1 Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 5 topics and texts, building on others' ideas and expressing their own clearly.</p> <ol style="list-style-type: none"> Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion. Follow agreed-upon rules for discussions and carry out assigned roles. Pose and respond to specific questions by making comments that contribute to the discussion and elaborate on the remarks of others. Review the key ideas expressed and draw conclusions in light of information and knowledge gained from the discussions. <p>SL.5.2 Summarize a written text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.</p> <p>SL.5.3 Summarize the points a speaker makes and explain how each claim is supported by reasons and evidence.</p>	<p>Conventions of Standard English L.5.1 Explain the function of conjunctions, prepositions, and interjections in general and their function in particular sentences.</p> <p>L.5.1 Use verb tense to convey various times, sequences, states, and conditions.</p> <p>L.5.2 Spell grade-appropriate words correctly, consulting references as needed.</p> <p>Knowledge of Language L.5.3 Expand, combine, and reduce sentences for meaning, reader/listener interest, and style.</p> <p>Vocabulary Acquisition and Use L.5.4 Use context (e.g., cause/effect relationships and comparisons in text) as a clue to the meaning of a word or phrase.</p> <p>L.5.5 Interpret figurative language, including similes and metaphors, in context.</p> <p>L.5.5 Recognize and explain the meaning of common idioms, adages, and proverbs.</p>

		<p>W.5.5 With guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach. (Editing for conventions should demonstrate command of Language standards 1–3 up to and including grade 5.)</p> <p>W.5.6 With some guidance and support from adults, use technology, including the Internet, to produce and publish writing as well as to interact and collaborate with others; demonstrate sufficient command of keyboarding skills to type a minimum of two pages in a single sitting.</p>

QUARTER 4				
Year Long Curriculum Plan by Quarter	Reading	Writing	Speaking and Listening	Language
	<p>Key Ideas and Details RI.5.1 Quote accurately from a text when explaining what the text says explicitly and when drawing inferences from the text.</p> <p>RI.5.2 Determine two or more main ideas of a text and explain how they are supported by key details; summarize the text.</p> <p>RI.5.3 Explain the relationships or interactions between two or more individuals, events, ideas, or concepts in a historical, scientific, or technical text based on specific information in the text.</p> <p>Craft and Structure RL.5.5 Explain how a series of chapters, scenes, or stanzas fits together to provide the overall structure of a particular story, drama, or poem.</p> <p>RL.5.6 Describe how a narrator's or speaker's point of view influences how events are described.</p> <p>Integration of Knowledge and Ideas RI.5.8 Explain how an author uses reasons and evidence to support particular points in a text, identifying which reasons and evidence support which point(s).</p> <p>RL.5.9 Compare and contrast stories in the same genre (e.g., mysteries and adventure stories) on their approaches to similar themes and topics.</p>	<p>Text Types and Purposes W.5.2 Write informative/explanatory texts to examine a topic and convey ideas and information clearly.</p> <ol style="list-style-type: none"> Introduce a topic clearly, provide a general observation and focus, and group related information logically; include formatting (e.g., headings), illustrations, and multimedia when useful to aiding comprehension. Develop the topic with facts, definitions, concrete details, quotations, or other information and examples related to the topic. Link ideas within and across categories of information using words, phrases, and clauses (e.g., in contrast, especially). Use precise language and domain-specific vocabulary to inform about or explain the topic. Provide a concluding statement or section related to the information or explanation presented. 	<p>Presentation of Knowledge and Ideas SL.5.6 Adapt speech to a variety of contexts and tasks, using formal English when appropriate to task and situation.</p>	<p>Conventions of Standard English L.5.2 Use a comma to separate an introductory element from the rest of the sentence.</p> <p>Knowledge of Language L.5.3 Expand, combine, and reduce sentences for meaning, reader/listener interest, and style.</p> <p>L.5.3 Compare and contrast the varieties of English (e.g., dialects, registers) used in stories, dramas, or poems.</p> <p>Vocabulary Acquisition and Use L.5.4 Consult reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation and determine or clarify the precise meaning of key words and phrases.</p>

		<p>Research to Build and Present Knowledge</p> <p>W.5.9 Draw evidence from literary or informational texts to support analysis, reflection, and research.</p> <ul style="list-style-type: none"> a. Apply grade 5 Reading standards to literature (e.g., “Compare and contrast two or more characters, settings, or events in a story or a drama, drawing on specific details in the text [e.g., how characters interact]”). b. Apply grade 5 Reading standards to informational texts (e.g., “Explain how an author uses reasons and evidence to support particular points in a text, identifying which reasons and evidence support which point[s]”). 		
--	--	---	--	--

Objectives Assessed Throughout the Year

- RL.5.10** By the end of the year, read and comprehend literature, including stories, dramas, and poetry, at the high end of the grades 4–5 text complexity band independently and proficiently.
- RI.5.10** By the end of the year, read and comprehend informational texts, including history/social studies, science, and technical texts, at the high end of the grades 4–5 text complexity band independently and proficiently
- RF.5.3** Know and apply grade-level phonics and word analysis skills in decoding words.
- a. Use combined knowledge of all letter-sound correspondences, syllabication patterns, and morphology (e.g., roots and affixes) to read accurately unfamiliar multisyllabic words in context and out of context.
- RF.5.4** Read with sufficient accuracy and fluency to support comprehension.
- a. Read on-level text with purpose and understanding.
 - b. Read on-level prose and poetry orally with accuracy, appropriate rate, and expression on successive readings.
 - c. Use context to confirm or self-correct word recognition and understanding, rereading as necessary.
- W.5.10** Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.

QUARTER 1				
Year Long Curriculum Plan by Quarter	Reading	Writing	Speaking and Listening	Language
	Unit 1			
	Key Ideas and Details RL.6.1 Cite textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text. RL.6.3 Describe how a particular story's or drama's plot unfolds in a series of episodes as well as how the characters respond or change as the plot moves toward a resolution.	Text Types and Purposes W.6.3 Write narratives to develop real or imagined experiences or events using effective technique, relevant descriptive details, and well-structured event sequences. a. Engage and orient the reader by establishing a context and introducing a narrator and/or characters; organize an event sequence that unfolds naturally and logically. b. Use narrative techniques, such as dialogue, pacing, and description, to develop experiences, events, and/or characters. c. Use a variety of transition words, phrases, and clauses to convey sequence and signal shifts from one time frame or setting to another. d. Use precise words and phrases, relevant descriptive details, and sensory language to convey experiences and events. e. Provide a conclusion that follows from the narrated experiences or events.	Comprehension and Collaboration SL.6.1 Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed. c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion. d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.	Conventions of Standard English L.6.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking. a. Ensure that pronouns are in the proper case (subjective, objective, possessive). b. Use intensive pronouns (e.g., myself, ourselves). L.6.2 Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing. a. Use punctuation (commas, parentheses, dashes) to set off nonrestrictive/parenthetical elements.* b. Spell correctly. Knowledge of Language L.6.3 Use knowledge of language and its conventions when writing, speaking, reading, or listening. a. Vary sentence patterns for meaning, reader/listener interest, and style.* Vocabulary Acquisition and Use L.6.4 Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grade 6 reading and content, choosing flexibly from a range of strategies. a. Use context (e.g., the overall meaning of a sentence or paragraph; a word's position or function in a sentence) as a clue to the meaning of a word or phrase.

		<p>Production and Distribution of Writing</p> <p>W.6.5 With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach.</p> <p>W.6.6 Use technology, including the Internet, to produce and publish writing as well as to interact and collaborate with others; demonstrate sufficient command of keyboarding skills to type a minimum of three pages in a single sitting.</p>		<p>L.6.5 Demonstrate understanding of figurative language, word relationships, and nuances in word meanings.</p> <p>a. Interpret figures of speech (e.g., personification) in context.</p> <p>c. Distinguish among the connotations (associations) of words with similar denotations (definitions) (e.g., stingy, scrimping, economical, un wasteful, thrifty).</p> <p>L.6.6 Acquire and use accurately grade-appropriate general academic and domain-specific words and phrases; gather vocabulary knowledge when considering a word or phrase important to comprehension or expression.</p>
--	--	--	--	---

Unit 2			
<p>Key Ideas and Details</p> <p>RI.6.1 Cite textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.</p> <p>RI.6.2 Determine a central idea of a text and how it is conveyed through particular details; provide a summary of the text distinct from personal opinions or judgments.</p> <p>Craft and Structure</p> <p>RI.6.4 Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings.</p> <p>RI.6.5 Analyze how a particular sentence, paragraph, chapter, or section fits into the overall structure of a text and contributes to the development of the ideas.</p>	<p>Research to Build and Present Knowledge</p> <p>W.6.9 Draw evidence from literary or informational texts to support analysis, reflection, and research.</p> <p>b. Apply grade 6 Reading standards to literary nonfiction (e.g., “Determine a central idea of a text and how it is conveyed through particular details; provide a summary of the text distinct from personal opinions or judgments.”).</p>	<p>Comprehension and Collaboration</p> <p>SL.6.1 Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others’ ideas and expressing their own clearly.</p> <p>a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion.</p> <p>b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed.</p> <p>c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion.</p> <p>d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.</p>	<p>Conventions of Standard English</p> <p>L.6.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.</p> <p>a. Ensure that pronouns are in the proper case (subjective, objective, possessive).</p> <p>b. Use intensive pronouns (e.g., myself, ourselves).</p> <p>L.6.2 Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing.</p> <p>a. Use punctuation (commas, parentheses, dashes) to set off nonrestrictive/parenthetical elements.*</p> <p>b. Spell correctly.</p> <p>Knowledge of Language</p> <p>L.6.3 Use knowledge of language and its conventions when writing, speaking, reading, or listening.</p> <p>a. --	--	--	--	--

Objectives Assessed Throughout the Year

Range of Reading and Text Complexity

RL.6.10 By the end of the year, read and comprehend literature, including stories, dramas, and poems, in the grades 6–8 text complexity band proficiently, with scaffolding as needed at the high end of the range.

RI.6.10 By the end of the year, read and comprehend literary nonfiction in the grades 6–8 text complexity band proficiently, with scaffolding as needed at the high end of the range.

Production and Distribution of Writing

W.6.4 Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)

Range of Writing

W.6.10 Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.

Conventions of Standard English

L.6.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.

e. Recognize variations from standard English in their own and others' writing and speaking, and identify and use strategies to improve expression in conventional language.*

QUARTER 1				
Year Long Curriculum Plan by Quarter	Reading	Writing	Speaking and Listening	Language
	Unit 1			
	Key Ideas and Details RL.7.1 Cite several pieces of textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text. RL.7.2 Determine a theme or central idea of a text and analyze its development over the course of the text; provide an objective summary of the text. Craft and Structure RL.7.4 Determine the meaning of words and phrases as they are used in a text, including figurative and connotative meanings; analyze the impact of rhymes and other repetitions of sounds (e.g., alliteration) on a specific verse or stanza of a poem or section of a story or drama.	Research to Build and Present Knowledge W.7.9 Draw evidence from literary or informational texts to support analysis, reflection, and research. a. Apply grade 7 Reading standards to literature (e.g., “Determine a theme or central idea of a text and analyze its development over the course of the text”).	Comprehension and Collaboration SL.7.1 Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others’ ideas and expressing their own clearly. a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed. c. Pose questions that elicit elaboration and respond to others’ questions and comments with relevant observations and ideas that bring the discussion back on topic as needed. d. Acknowledge new information expressed by others and, when warranted, modify their own views.	Conventions of Standard English L.7.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking. b. Choose among simple, compound, complex, and compound-complex sentences to signal differing relationships among ideas. L.7.2 Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing. b. Spell correctly. Vocabulary Acquisition and Use L.7.4 Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grade 7 reading and content, choosing flexibly from a range of strategies. a. Use context (e.g., the overall meaning of a sentence or paragraph; a word’s position or function in a sentence) as a clue to the meaning of a word or phrase. b. Use common, grade-appropriate Greek or Latin affixes and roots as clues to the meaning of a word (e.g., belligerent, bellicose, rebel).

Unit 2

Key Ideas and Details

RI.7.1 Cite several pieces of textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.

RI.7.2 Determine two or more central ideas in a text and analyze their development over the course of the text; provide an objective summary of the text.

Craft and Structure

RI.7.3 Analyze the interactions between individuals, events, and ideas in a text (e.g., how ideas influence individuals or events, or how individuals influence ideas or events).

RI.7.4 Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings; analyze the impact of a specific word choice on meaning and tone.

Research to Build and Present Knowledge

W.7.7 Conduct short research projects to answer a question, drawing on several sources and generating additional related, focused questions for further research and investigation.

W.7.8 Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.

Comprehension and Collaboration

SL.7.2 Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas clarify a topic, text, or issue under study.

Conventions of Standard English

L.7.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.

b. Choose among simple, compound, complex, and compound-complex sentences to signal differing relationships among ideas.

L.7.2 Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing.

b. Spell correctly.

Vocabulary Acquisition and Use

L.7.4 Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grade 7 reading and content, choosing flexibly from a range of strategies.

a. Use context (e.g., the overall meaning of a sentence or paragraph; a word's position or function in a sentence) as a clue to the meaning of a word or phrase.

b. Use common, grade-appropriate Greek or Latin affixes and roots as clues to the meaning of a word (e.g., belligerent, bellicose, rebel).

QUARTER 2				
Year Long Curriculum Plan by Quarter	Reading	Writing	Speaking and Listening	Language
	Unit 3			
	Key Ideas and Details RL.7.1 Cite several pieces of textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.	Text Types and Purposes W.7.3 Write narratives to develop real or imagined experiences or events using effective technique, relevant descriptive details, and well-structured event sequences.		Conventions of Standard English L.7.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.
	Craft and Structure RL.7.4 Determine the meaning of words and phrases as they are used in a text, including figurative and connotative meanings; analyze the impact of rhymes and other repetitions of sounds (e.g., alliteration) on a specific verse or stanza of a poem or section of a story or drama.	a. Engage and orient the reader by establishing a context and point of view and introducing a narrator and/or characters; organize an event sequence that unfolds naturally and logically.		a. Explain the function of phrases and clauses in general and their function in specific sentences.
	RL.7.5 Analyze how a drama's or poem's form or structure (e.g., soliloquy, sonnet) contributes to its meaning.	b. Use narrative techniques, such as dialogue, pacing, and description, to develop experiences, events, and/or characters.		L.7.2 Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing.
	Integration of Knowledge and Ideas RL.7.7 Compare and contrast a written story, drama, or poem to its audio, filmed, staged, or multimedia version, analyzing the effects of techniques unique to each medium (e.g., lighting, sound, color, or camera focus and angles in a film).	c. Use a variety of transition words, phrases, and clauses to convey sequence and signal shifts from one time frame or setting to another.		b. Spell correctly.
		d. Use precise words and phrases, relevant descriptive details, and sensory language to capture the action and convey experiences and events.		Vocabulary Acquisition and Use L.7.4 Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grade 7 reading and content, choosing flexibly from a range of strategies.
		e. Provide a conclusion that follows from and reflects on the narrated experiences or events.		b. Use common, grade-appropriate Greek or Latin affixes and roots as clues to the meaning of a word (e.g., belligerent, bellicose, rebel).
				c. Consult general and specialized reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation of a word or determine or clarify its precise meaning or its part of speech.

				<p>L.7.5 Demonstrate understanding of figurative language, word relationships, and nuances in word meanings.</p> <p>a. Interpret figures of speech (e.g., literary, biblical, and mythological allusions) in context.</p> <p>b. Use the relationship between particular words (e.g., synonym/antonym, analogy) to better understand each of the words.</p>
--	--	--	--	---

Unit 4			
<p>Key Ideas and Details</p> <p>RI.7.1 Cite several pieces of textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.</p> <p>Craft and Structure</p> <p>RI.7.4 Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings; analyze the impact of a specific word choice on meaning and tone.</p> <p>RI.7.5 Analyze the structure an author uses to organize a text, including how the major sections contribute to the whole and to the development of the ideas.</p> <p>Integration of Knowledge and Ideas</p> <p>RL.7.9 Compare and contrast a fictional portrayal of a time, place, or character and a historical account of the same period as a means of understanding how authors of fiction use or alter history.</p>	<p>W.7.9 Draw evidence from literary or informational texts to support analysis, reflection, and research.</p> <p>b. Apply grade 7 Reading standards to literary nonfiction (e.g. “Trace and evaluate the argument and specific claims in a text, assessing whether the reasoning is sound and the evidence is relevant and sufficient to support the claims”).</p>	<p>Comprehension and Collaboration</p> <p>SL.7.1 Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others’ ideas and expressing their own clearly.</p> <p>a. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed.</p> <p>c. Pose questions that elicit elaboration and respond to others’ questions and comments with relevant observations and ideas that bring the discussion back on topic as needed.</p> <p>d. Acknowledge new information expressed by others and, when warranted, modify their own views.</p>	<p>Conventions of Standard English</p> <p>L.7.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.</p> <p>a. Explain the function of phrases and clauses in general and their function in specific sentences.</p> <p>L.7.2 Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing.</p> <p>b. Spell correctly.</p> <p>Vocabulary Acquisition and Use</p> <p>L.7.4 Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grade 7 reading and content, choosing flexibly from a range of strategies.</p> <p>b. Use common, grade-appropriate Greek or Latin affixes and roots as clues to the meaning of a word (e.g., belligerent, bellicose, rebel).</p> <p>c. Consult general and specialized reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation of a word or determine or clarify its precise meaning or its part of speech.</p> <p>L.7.5 Demonstrate understanding of figurative language, word relationships, and nuances in word meanings.</p> <p>a. Interpret figures of speech (e.g., literary, biblical, and mythological allusions) in context.</p>

				<p>b. Use the relationship between particular words (e.g., synonym/antonym, analogy) to better understand each of the words.</p>
--	--	--	--	--

QUARTER 3				
Year Long Curriculum Plan by Quarter	Reading	Writing	Speaking and Listening	Language
	Unit 5			
	Key Ideas and Details	Research to Build and Present Knowledge	Comprehension and Collaboration	Conventions of Standard English
	RL.7.1 Cite several pieces of textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.	W.7.9 Draw evidence from literary or informational texts to support analysis, reflection, and research.	SL.7.1 Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly.	L.7.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.
	RL.7.3 Analyze how particular elements of a story or drama interact (e.g., how setting shapes the characters or plot).	a. Apply grade 7 Reading standards to literature (e.g., "Analyze how particular elements of a story or drama interact").	a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion.	c. Place phrases and clauses within a sentence, recognizing and correcting misplaced and dangling modifiers.*
	Craft and Structure		b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed.	L.7.2 Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing.
	RL.7.4 Determine the meaning of words and phrases as they are used in a text, including figurative and connotative meanings; analyze the impact of rhymes and other repetitions of sounds (e.g., alliteration) on a specific verse or stanza of a poem or section of a story or drama.		c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the discussion back on topic as needed.	a. Use a comma to separate coordinate adjectives (e.g., It was a fascinating, enjoyable movie but not He wore an old[,] green shirt).
			d. Acknowledge new information expressed by others and, when warranted, modify their own views.	b. Spell correctly
				Vocabulary Acquisition and Use
				L.7.5 Demonstrate understanding of figurative language, word relationships, and nuances in word meanings.
				c. Distinguish among the connotations (associations) of words with similar denotations (definitions) (e.g., refined, respectful, polite, diplomatic, condescending).

Unit 6

<p>Key Ideas and Details RI.7.1 Cite several pieces of textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.</p> <p>Craft and Structure RI.7.4 Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings; analyze the impact of a specific word choice on meaning and tone.</p> <p>Integration of Knowledge and Ideas RI.7.6 Determine an author's point of view or purpose in a text and analyze how the author distinguishes his or her position from that of others. RI.7.8 Trace and evaluate the argument and specific claims in a text, assessing whether the reasoning is sound and the evidence is relevant and sufficient to support the claims.</p>	<p>Text Types and Purposes W.7.2 Write informative/explanatory texts to examine a topic and convey ideas, concepts, and information through the selection, organization, and analysis of relevant content.</p> <ol style="list-style-type: none"> Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information, using strategies such as definition, classification, comparison/contrast, and cause/effect; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. Develop the topic with relevant facts, definitions, concrete details, quotations, or other information and examples. Use appropriate transitions to create cohesion and clarify the relationships among ideas and concepts. Use precise language and domain-specific vocabulary to inform about or explain the topic. Establish and maintain a formal style. Provide a concluding statement or section that follows from and supports the information or explanation presented. 	<p>Presentation of Knowledge and Ideas SL.7.4 Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use appropriate eye contact, adequate volume, and clear pronunciation. SL.7.5 Include multimedia components and visual displays in presentations to clarify claims and findings and emphasize salient points. SL.7.6 Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.</p>	<p>Conventions of Standard English L.7.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking. c. Place phrases and clauses within a sentence, recognizing and correcting misplaced and dangling modifiers.* L.7.2 Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing. a. Use a comma to separate coordinate adjectives (e.g., It was a fascinating, enjoyable movie but not He wore an old[,] green shirt). b. Spell correctly</p> <p>Vocabulary Acquisition and Use L.7.5 Demonstrate understanding of figurative language, word relationships, and nuances in word meanings. c. Distinguish among the connotations (associations) of words with similar denotations (definitions) (e.g., refined, respectful, polite, diplomatic, condescending).</p>
--	---	---	---

		<p>Production and Distribution of Writing</p> <p>W.7.5 With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.</p> <p>W.7.6 Use technology, including the Internet, to produce and publish writing and link to and cite sources as well as to interact and collaborate with others, including linking to and citing sources.</p>

QUARTER 4				
Year Long Curriculum Plan by Quarter	Reading	Writing	Speaking and Listening	Language
	Unit 7			
	Key Ideas and Details RI.7.1 Cite several pieces of textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.	Text Types and Purposes W.7.1 Write arguments to support claims with clear reasons and relevant evidence. <ol style="list-style-type: none"> Introduce claim(s), acknowledge alternate or opposing claims, and organize the reasons and evidence logically. Support claim(s) with logical reasoning and relevant evidence, using accurate, credible sources and demonstrating an understanding of the topic or text. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), reasons, and evidence. Establish and maintain a formal style. Provide a concluding statement or section that follows from and supports the argument presented. 	Comprehension and Collaboration SL.7.3 Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence.	Conventions of Standard English L.7.2 Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing. <ol style="list-style-type: none"> Use a comma to separate coordinate adjectives (e.g., It was a fascinating, enjoyable movie but not He wore an old[,] green shirt). Spell correctly
	Craft and Structure RI.7.4 Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings; analyze the impact of a specific word choice on meaning and tone.			Knowledge of Language L.7.3 Use knowledge of language and its conventions when writing, speaking, reading, or listening. <ol style="list-style-type: none"> Choose language that expresses ideas precisely and concisely, recognizing and eliminating wordiness and redundancy.*
	Integration of Knowledge and Ideas RI.7.7 Compare and contrast a text to an audio, video, or multimedia version of the text, analyzing each medium's portrayal of the subject (e.g., how the delivery of a speech affects the impact of the words).	Research to Build and Present Knowledge W.7.7 Conduct short research projects to answer a question, drawing on several sources and generating additional related, focused questions for further research and investigation.		Vocabulary Acquisition and Use L.7.4 Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grade 7 reading and content, choosing flexibly from a range of strategies. <ol style="list-style-type: none"> Verify the preliminary determination of the meaning of a word or phrase (e.g., by checking the inferred meaning in context or in a dictionary).
	RI.7.9 Analyze how two or more authors writing about the same topic shape their presentations of key information by emphasizing different evidence or advancing different interpretations of facts.			L.7.5 Demonstrate understanding of figurative language, word relationships, and nuances in word meanings. <ol style="list-style-type: none"> Interpret figures of speech (e.g., literary, biblical, and mythological allusions) in context.

		<p>W.7.8 Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.</p>		<p>b. Use the relationship between particular words (e.g., synonym/antonym, analogy) to better understand each of the words.</p>

--	--	--	--	---

Objectives Assessed Throughout the Year

Range of Reading and Text Complexity

RL.7.10 By the end of the year, read and comprehend literature, including stories, dramas, and poems, in the grades 6–8 text complexity band proficiently, with scaffolding as needed at the high end of the range.

RI.7.10 By the end of the year, read and comprehend literary nonfiction in the grades 6–8 text complexity band proficiently, with scaffolding as needed at the high end of the range.

Production and Distribution of Writing

W.7.4 Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)

Range of Writing

W.7.10 Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.

Vocabulary Acquisition and Use

L.7.6 Acquire and use accurately grade-appropriate general academic and domain-specific words and phrases; gather vocabulary knowledge when considering a word or phrase important to comprehension or expression.

QUARTER 1				
Year Long Curriculum Plan by Quarter	Reading	Writing	Speaking and Listening	Language
	Unit 1			
	Key Ideas and Details RL.8.1 Cite the textual evidence that most strongly supports an analysis of what the text says explicitly as well as inferences drawn from the text. RL.8.2 Determine a theme or central idea of a text and analyze its development over the course of the text, including its relationship to the characters, setting, and plot; provide an objective summary of the text. Craft and Structure RL.8.4 Determine the meaning of words and phrases as they are used in a text, including figurative and connotative meanings; analyze the impact of specific word choices on meaning and tone, including analogies or allusions to other texts.	Research to Build and Present Knowledge W.8.9 Draw evidence from literary or informational texts to support analysis, reflection, and research. a. Apply grade 8 Reading standards to literature (e.g., "Determine a theme or central idea of a text and analyze its development over the course of the text, including its relationship to the characters, setting, and plot; provide an objective summary of the text."):	Comprehension and Collaboration SL.8.1 Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions and decision-making, track progress toward specific goals and deadlines, and define individual roles as needed. c. Pose questions that connect the ideas of several speakers and respond to others' questions and comments with relevant evidence, observations, and ideas. d. Acknowledge new information expressed by others, and, when warranted, qualify or justify their own views in light of the evidence presented.	Conventions of Standard English L.8.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking. b. Form and use verbs in the active and passive voice. L.8.2 Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing. a. Use punctuation (comma, ellipsis, dash) to indicate a pause or break. c. Spell correctly. Knowledge of Language L.8.3 Use knowledge of language and its conventions when writing, speaking, reading, or listening. a. Use verbs in the active and passive voice and in the conditional and subjunctive mood to achieve particular effects (e.g., emphasizing the actor or the action; expressing uncertainty or describing a state contrary to fact). Vocabulary Acquisition and Use L.8.4 Determine or clarify the meaning of unknown and multiple-meaning words or phrases based on grade 8 reading and content, choosing flexibly from a range of strategies.

				<p>c. Consult general and specialized reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation of a word or determine or clarify its precise meaning or its part of speech.</p> <p>L.8.5 Demonstrate understanding of figurative language, word relationships, and nuances in word meanings.</p> <p>a. Interpret figures of speech (e.g. verbal irony, puns) in context.</p>
--	--	--	--	---

Unit 2

Key Ideas and Details	Text Types and Purposes	Comprehension and Collaboration	Conventions of Standard English
RI.8.1 Cite the textual evidence that most strongly supports an analysis of what the text says explicitly as well as inferences drawn from the text.	W.8.2 Write informative/explanatory texts to examine a topic and convey ideas, concepts, and information through the selection, organization, and analysis of relevant content.	SL.8.2 Analyze the purpose of information presented in diverse media and formats (e.g., visually, quantitatively, orally) and evaluate the motives (e.g., social, commercial, political) behind its presentation.	L.8.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.
RI.8.2 Determine a central idea of a text and analyze its development over the course of the text, including its relationship to supporting ideas; provide an objective summary of the text.	a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension.		b. Form and use verbs in the active and passive voice.
Craft and Structure			L.8.2 Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing.
RI.8.4 Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings; analyze the impact of specific word choices on meaning and tone, including analogies or allusions to other texts.	b. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples.		a. Use punctuation (comma, ellipsis, dash) to indicate a pause or break.
Integration of Knowledge and Ideas			c. Spell correctly.
RI.8.7 Evaluate the advantages and disadvantages of using different mediums (e.g., print or digital text, video, multimedia) to present a particular topic or idea.	c. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts.		Knowledge of Language L.8.3 Use knowledge of language and its conventions when writing, speaking, reading, or listening.
	d. Use precise language and domain-specific vocabulary to inform about or explain the topic.		a. Use verbs in the active and passive voice and in the conditional and subjunctive mood to achieve particular effects (e.g., emphasizing the actor or the action; expressing uncertainty or describing a state contrary to fact).
	e. Establish and maintain a formal style.		Vocabulary Acquisition and Use L.8.4 Determine or clarify the meaning of unknown and multiple-meaning words or phrases based on grade 8 reading and content, choosing flexibly from a range of strategies.
	d. Provide a concluding statement or section that follows from and supports the information or explanation presented.		

	<p>Research to Build and Present Knowledge</p> <p>W.8.8 Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.</p> <p>Production and Distribution of Writing</p> <p>W.8.5 With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.</p> <p>W.8.6 Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas efficiently as well as to interact and collaborate with others.</p>		<p>c. Consult general and specialized reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation of a word or determine or clarify its precise meaning or its part of speech.</p> <p>L.8.5 Demonstrate understanding of figurative language, word relationships, and nuances in word meanings.</p> <p>a. Interpret figures of speech (e.g. verbal irony, puns) in context.</p>
--	--	--	---

QUARTER 2				
Year Long Curriculum Plan by Quarter	Reading	Writing	Speaking and Listening	Language
	Unit 3			
	Key Ideas and Details RL.8.1 Cite the textual evidence that most strongly supports an analysis of what the text says explicitly as well as inferences drawn from the text. RL.8.3 Analyze how particular lines of dialogue or incidents in a story or drama propel the action, reveal aspects of a character, or provoke a decision. Craft and Structure RL.8.4 Determine the meaning of words and phrases as they are used in a text, including figurative and connotative meanings; analyze the impact of specific word choices on meaning and tone, including analogies or allusions to other texts. RL.8.6 Analyze how differences in the points of view of the characters and the audience or reader (e.g., created through the use of dramatic irony) create such effects as suspense or humor.	Text Types and Purposes W.8.3 Write narratives to develop real or imagined experiences or events using effective technique, relevant descriptive details, and well-structured event sequences. a. Engage and orient the reader by establishing a context and point of view and introducing a narrator and/or characters; organize an event sequence that unfolds naturally and logically. b. Use narrative techniques, such as dialogue, pacing, description, and reflection, to develop experiences, events, and/or characters. c. Use a variety of transition words, phrases, and clauses to convey sequence, signal shifts from one time frame or setting to another, and show the relationships among experiences and events. d. Use precise words and phrases, relevant descriptive details, and sensory language to capture the action and convey experiences and events. e. Provide a conclusion that follows from and reflects on the narrated experiences or events.		Conventions of Standard English L.8.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking. a. Explain the function of verbals (gerunds, participles, infinitives) in general and their function in particular sentences. L.8.2 Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing. a. Use punctuation (comma, ellipsis, dash) to indicate a pause or break. c. Spell correctly. Vocabulary Acquisition and Use L.8.4 Determine or clarify the meaning of unknown and multiple-meaning words or phrases based on grade 8 reading and content, choosing flexibly from a range of strategies. a. Use context (e.g., the overall meaning of a sentence or paragraph; a word's position or function in a sentence) as a clue to the meaning of a word or phrase. L.8.5 Demonstrate understanding of figurative language, word relationships, and nuances in word meanings. b. Use the relationship between particular words to better understand each of the words.

		<p>Production and Distribution of Writing</p> <p>W.8.5 With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.</p> <p>W.8.6 Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas efficiently as well as to interact and collaborate with others.</p>

--	--	--	--	---

Unit 6

Key Ideas and Details

RI.8.1 Cite the textual evidence that most strongly supports an analysis of what the text says explicitly as well as inferences drawn from the text.

Craft and Structure

RI.8.4 Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings; analyze the impact of specific word choices on meaning and tone, including analogies or allusions to other texts.

RI.8.6 Determine an author's point of view or purpose in a text and analyze how the author acknowledges and responds to conflicting evidence or viewpoints.

Integration of Knowledge and Ideas

RI.8.9 Analyze a case in which two or more texts provide conflicting information on the same topic and identify where the texts disagree on matters of fact or interpretation.

Text Types and Purposes

W.8.1 Write arguments to support claims with clear reasons and relevant evidence. a. Introduce claim(s), acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically.

b. Support claim(s) with logical reasoning and relevant evidence, using accurate, credible sources and demonstrating an understanding of the topic or text.

c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence.

d. Establish and maintain a formal style.

e. Provide a concluding statement or section that follows from and supports the argument presented.

Conventions of Standard English

L.8.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.

c. Form and use verbs in the indicative, imperative, interrogative, conditional, and subjunctive mood.

L.8.2 Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing.

b. Use an ellipsis to indicate an omission.

c. Spell correctly.

Knowledge of Language

L.8.3 Use knowledge of language and its conventions when writing, speaking, reading, or listening.

a. Use verbs in the active and passive voice and in the conditional and subjunctive mood to achieve particular effects (e.g., emphasizing the actor or the action; expressing uncertainty or describing a state contrary to fact).

		<p>Production and Distribution of Writing</p> <p>W.8.5 With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.</p> <p>W.8.6 Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas efficiently as well as to interact and collaborate with others.</p>		<p>Vocabulary Acquisition and Use</p> <p>L.8.4 Determine or clarify the meaning of unknown and multiple-meaning words or phrases based on grade 8 reading and content, choosing flexibly from a range of strategies.</p> <p>c. Consult general and specialized reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation of a word or determine or clarify its precise meaning or its part of speech.</p> <p>L.8.5 Demonstrate understanding of figurative language, word relationships, and nuances in word meanings.</p> <p>c. Distinguish among the connotations (associations) of words with similar denotations (definitions) (e.g., bullheaded, willful, firm, persistent, resolute). resolute).</p>

QUARTER 4				
Year Long Curriculum Plan by Quarter	Reading	Writing	Speaking and Listening	Language
	Unit 7			
	Key Ideas and Details RI.8.1 Cite the textual evidence that most strongly supports an analysis of what the text says explicitly as well as inferences drawn from the text.	Production and Distribution of Writing W.8.5 With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.	Comprehension and Collaboration SL.8.3 Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and relevance and sufficiency of the evidence and identifying when irrelevant evidence is introduced.	Conventions of Standard English L.8.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking. d. Recognize and correct inappropriate shifts in verb voice and mood.* L.8.2 Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing. b. Use an ellipsis to indicate an omission. c. Spell correctly.
	Craft and Structure RI.8.4 Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings; analyze the impact of specific word choices on meaning and tone, including analogies or allusions to other texts.	W.8.6 Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas efficiently as well as to interact and collaborate with others.	Presentation of Knowledge and Ideas SL.8.4 Present claims and findings, emphasizing salient points in a focused, coherent manner with relevant evidence, sound valid reasoning, and well-chosen details; use appropriate eye contact, adequate volume, and clear pronunciation.	Vocabulary Acquisition and Use L.8.4 Determine or clarify the meaning of unknown and multiple-meaning words or phrases based on grade 8 reading and content, choosing flexibly from a range of strategies.
	RI.8.6 Determine an author's point of view or purpose in a text and analyze how the author acknowledges and responds to conflicting evidence or viewpoints.	Research to Build and Present Knowledge W.8.7 Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.	SL.8.6 Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.	a. Use context (e.g., the overall meaning of a sentence or paragraph; a word's position or function in a sentence) as a clue to the meaning of a word or phrase. b. Use common, grade-appropriate Greek or Latin affixes and roots as clues to the meaning of a word (e.g., precede, recede, secede).
	Integration of Knowledge and Ideas RI.8.8 Delineate and evaluate the argument and specific claims in a text, assessing whether the reasoning is sound and the evidence is relevant and sufficient; recognize when irrelevant evidence is introduced.			

		<p>W.8.8 Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.</p>

Unit 8			
<p>Key Ideas and Details</p> <p>RL.8.1 Cite the textual evidence that most strongly supports an analysis of what the text says explicitly as well as inferences drawn from the text.</p> <p>RL.8.4 Determine the meaning of words and phrases as they are used in a text, including figurative and connotative meanings; analyze the impact of specific word choices on meaning and tone, including analogies or allusions to other texts.</p> <p>RL.8.5 Compare and contrast the structure of two or more texts and analyze how the differing structure of each text contributes to its meaning and style.</p> <p>RL.8.9 Analyze how a modern work of fiction draws on themes, patterns of events, or character types from myths, traditional stories, or religious works such as the Bible, including describing how the material is rendered new</p>	<p>Research to Build and Present Knowledge</p> <p>W.8.9 Draw evidence from literary or informational texts to support analysis, reflection, and research.</p> <p>a. Apply grade 8 Reading standards to literature (e.g., “Analyze how a modern work of fiction draws on themes, patterns of events, or character types from myths, traditional stories, or religious works such as the Bible, including describing how the material is rendered new”).</p>	<p>Comprehension and Collaboration</p> <p>SL.8.1 Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and issues, building on others’ ideas and expressing their own clearly.</p> <p>a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion.</p> <p>b. Follow rules for collegial discussions and decision-making, track progress toward specific goals and deadlines, and define individual roles as needed.</p> <p>c. Pose questions that connect the ideas of several speakers and respond to others’ questions and comments with relevant evidence, observations, and ideas.</p> <p>d. Acknowledge new information expressed by others, and, when warranted, qualify or justify their own views in light of the evidence presented.</p>	<p>Conventions of Standard English</p> <p>L.8.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.</p> <p>d. Recognize and correct inappropriate shifts in verb voice and mood.*</p> <p>L.8.2 Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing.</p> <p>b. Use an ellipsis to indicate an omission.</p> <p>c. Spell correctly.</p> <p>Vocabulary Acquisition and Use</p> <p>L.8.4 Determine or clarify the meaning of unknown and multiple-meaning words or phrases based on grade 8 reading and content, choosing flexibly from a range of strategies.</p> <p>a. Use context (e.g., the overall meaning of a sentence or paragraph; a word’s position or function in a sentence) as a clue to the meaning of a word or phrase.</p> <p>b. Use common, grade-appropriate Greek or Latin affixes and roots as clues to the meaning of a word (e.g., precede, recede, secede).</p>

Objectives Assessed Throughout the Year

Range of Reading and Text Complexity

RL.8.10 By the end of the year, read and comprehend literature, including stories, dramas, and poems, at the high end of grades 6–8 text complexity band independently and proficiently.

RI.8.10 By the end of the year, read and comprehend literary nonfiction at the high end of the grades 6–8 text complexity band independently and proficiently.

Production and Distribution of Writing

W.8.4 Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)

Range of Writing

W.8.10 Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.

Vocabulary Acquisition and Use

L.8.6 Acquire and use accurately grade-appropriate general academic and domain-specific words and phrases; gather vocabulary knowledge when considering a word or phrase important to comprehension or expression.

Common Core State Standards: Kindergarten ELA Scoring Scales

Strand: Reading
Topic: Key Ideas and Details

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	Advanced grade level performance
3.5	Mastered grade level, some advanced grade level performance
Score 3.0	Mastered grade level expectations by: RL.K.1 With prompting and support, ask and answer questions about key details in a text. RL.K.2 With prompting and support, retell familiar stories, including key details. RL.K.3 With prompting and support, identify characters, settings, and major events in a story. RI.K.1 With prompting and support, ask and answer questions about key details in a text. RI.K.2 With prompting and support, identify the main topic and retell key details of a text. RI.K.3 With prompting and support, describe the connection between two individuals, events, ideas, or pieces of information in a text.

0	Basic understanding secure, progressing toward mastery
Score 2.0	Basic understanding achieved: <ul style="list-style-type: none"> Recognize and recall specific terminology such as: <ul style="list-style-type: none"> Key detail RI.K.1 Retell RL.K.2 Character, setting, event RL.K.3 Perform basic processes and recognize and recall the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Recognize who, what, where, when, why and how. RL.K.1, RI.K.1 and RI.K.2 Ask and answer questions before, during, and after reading a text. RL.K.1 and RI.K.1 Listen to a story and recognize the key details. RL.K.2 Recognize characters, settings, and major events in a story. RL.K.3 Recognize the main topic of a text (who or what the text is about). RI.K.2 Recognize the connection between two individuals in a text. RI.K.3 Recognize the connection between two events in a text. RI.K. 3 Recognize the connection between two ideas or pieces of information in a text. RI.K.3

Reading Literature				
Key Ideas and Details				
RL.K.1 With prompting and support, ask and answer questions about key details in a text.				
RL.K.2 With prompting and support, retell familiar stories, including key details.				
RL.K.3 With prompting and support, identify characters, settings, and major events in a story.				
Craft and Structure				
RL.K.4 Ask and answer questions about unknown words in a text.				
RL.K.5 Recognize common types of texts (e.g., storybooks, poems).				
RL.K.6 With prompting and support, name the author and illustrator of a story and define the role of each in telling the story.				
Integration of Knowledge and Ideas				
RL.K.7 With prompting and support, describe the relationship between illustrations and the story in which they appear (e.g., what moment in a story an illustration depicts).				
RL.K.8 (Not applicable to literature)				
RL.K.9 With prompting and support, compare and contrast the adventures and experiences of characters in familiar stories.				
Range of Reading and Level of Text Complexity				
RL.K.10 Actively engage in group reading activities with purpose and understanding.				
RL.K.11 With prompting and support, make connections between self, text, and the world around them (text, media, social interaction). (NY)				

Reading Informational Text

Key Ideas and Details

RI.K.1 With prompting and support, ask and answer questions about key details in a text.

RI.K.2 With prompting and support, identify the main topic and retell key details of a text.

RI.K.3 With prompting and support, describe the connection between two individuals, events, ideas, or pieces of information in a text.

Craft and Structure

RI.K.4 With prompting and support, ask and answer questions about unknown words in a text.

RI.K.5 Identify the front cover, back cover, and title page of a book.

RI.K.6 Name the author and illustrator of a text and define the role of each in presenting the ideas or information in a text.

Integration of Knowledge and Ideas

RI.K.7 With prompting and support, describe the relationship between illustrations and the text in which they appear (e.g., what person, place, thing, or idea in the text an illustration depicts).

RI.K.8 With prompting and support, identify the reasons an author gives to support points in a text.

RI.K.9 With prompting and support, identify basic similarities in and differences between two texts on the same topic (e.g., in illustrations, descriptions, or procedures).

Range of Reading and Level of Text Complexity

RI.K.10 Actively engage in group reading activities with purpose and understanding.

Writing				
Text Types and Purposes				
W.K.1	Use a combination of drawing, dictating, and writing to compose opinion pieces in which they tell a reader the topic or the name of the book they are writing about and state an opinion or preference about the topic or book (e.g., My favorite book is...)			
W.K.2	Use a combination of drawing, dictating, and writing to compose informative/explanatory texts in which they name what they are writing about and supply some information about the topic.			
W.K.3	Use a combination of drawing, dictating, and writing to narrate a single event or several loosely linked events, tell about the events in the order in which they occurred, and provide a reaction to what happened.			
Production and Distribution of Writing				
W.K.4	Begins in in grade 3			
W.K.5	With guidance and support from adults, respond to questions and suggestions from peers and add details to strengthen writing as needed.			
W.K.6	With guidance and support from adults, explore a variety of digital tools to produce and publish writing, including in collaboration with peers.			
Research to Build and Present Knowledge				
W.K.7	Participate in shared research and writing projects (e.g., explore a number of books by a favorite author and express opinions about them).			
W.K.8	With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.			
W.K.9	Begins in grade 4			
W.K.10	Begins in grade 3			

--	--	--	--	--

Speaking and Listening

Comprehension and Collaboration				
SL.K.1 Participate in collaborative conversations with diverse partners about <i>kindergarten topics and texts</i> with peers and adults in small and larger groups.				
a. Follow agreed-upon rules for discussions (e.g., listening to others and taking turns speaking about the topics and texts under discussion).				
b. Continue a conversation through multiple exchanges.				
SL.K.2 Confirm understanding of a text read aloud or information presented orally or through other media by asking and answering questions about key details and requesting clarification if something is not understood.				
SL.K.3 Ask and answer questions in order to seek help, get information, or clarify something that is not understood.				
Presentation of Knowledge and Ideas				
SL.K.4 Describe familiar people, places, things, and events and, with prompting and support, provide additional detail				
SL.K.5 Add drawings or other visual displays to descriptions as desired to provide additional detail.				
SL.K.6 Speak audibly and express thoughts, feelings, and ideas clearly.				

Language

Conventions of Standard English

L.K.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.

a. Print many upper- and lowercase letters.

b. Use frequently occurring nouns and verbs.

c. Form regular plural nouns orally by adding /s/ or /es/ (e.g., *dog, dogs; wish, wishes*).

d. Understand and use question words (interrogatives) (e.g., *who, what, where, when, why, how*).

e. Use the most frequently occurring prepositions (e.g., *to, from, in, out, on, off, for, of, by, with*).

f. Produce and expand complete sentences in shared language activities.

L.K.2 Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing.

a. Capitalize the first word in a sentence and the pronoun.

b. Recognize and name end punctuation.

c. Write a letter or letters for most consonant and short-vowel sounds (phonemes).

d. Spell simple words phonetically, drawing on knowledge of sound-letter relationships.

Knowledge of Language				
L.K.4 Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on kindergarten reading and content.				
a. Identify new meanings for familiar words and apply them accurately (e.g., knowing <i>duck</i> is a bird and learning the verb to <i>duck</i>).				
b. Use the most frequently occurring inflections and affixes (e.g., <i>-ed</i> , <i>-s</i> , <i>re-</i> , <i>un-</i> , <i>pre-</i> , <i>-ful</i> , <i>-less</i>) as a clue to the meaning of an unknown word.				
Vocabulary Acquisition and Use				
L.K.5 With guidance and support from adults, explore word relationships and nuances in word meanings.				
a. Sort common objects into categories (e.g., shapes, foods) to gain a sense of the concepts the categories represent.				
b. Demonstrate understanding of frequently occurring verbs and adjectives by relating them to their opposites (antonyms).				
c. Identify real-life connections between words and their use (e.g., note places at school that are colorful).				
L.K.6 Use words and phrases acquired through conversations, reading and being read to, and responding to texts.				

Reading Foundational Skills

Print Concepts

RF.K.1 Demonstrate understanding of the organization and basic features of print.

- | | | | | |
|--|--|--|--|--|
| a. Follow words from left to right, top to bottom, and page by page. | | | | |
| b. Recognize that spoken words are represented in written language by specific sequences of letters. | | | | |
| c. Understand that words are separated by spaces in print. | | | | |
| d. Recognize and name all upper- and lowercase letters of the alphabet. | | | | |

Phonological Awareness

RF.K.2 Demonstrate understanding of spoken words, syllables, and sounds (phonemes)

- | | | | | |
|--|--|--|--|--|
| a. Recognize and produce rhyming words. | | | | |
| b. Count, pronounce, blend, and segment syllables in spoken words. | | | | |
| c. Blend and segment onsets and rimes of single-syllables in spoken words. | | | | |
| d. Isolate and pronounce the initial, medial vowel, and final sounds (phonemes) in three phoneme (consonant-vowel-consonant, or CVC) words* (This does not include CVCs ending with /l/, /r/, or /x/.) | | | | |
| e. Add or substitute individual sounds (phonemes) in simple, one-syllable words to make new words. | | | | |

Note: Words, syllables, or phonemes written in /slashes/ refer to their pronunciation or phonology. Thus, /CVC/ is a word with three phonemes regardless of the number of letters in the spelling of the word.

Phonics and Word Recognition				
RF.K.3 Know and apply grade-level phonics and word analysis skills in decoding words.				
a. Demonstrate basic knowledge of one-to-one letter-sound correspondences by producing the primary or many of the most frequent sound for each consonant.				
b. Associate the long and short sounds with common spellings (graphemes) for the five major vowels.				
c. Read common high-frequency words by sight (e.g., <i>the, of, to, you, she, my, is, are, do, does</i>).				
d. Distinguish between similarly spelled words by identifying the sounds of the letters that differ.				
Fluency				
RF.K.4 Read emergent-reader texts with purpose and understanding.				

Reading Literature				
Key Ideas and Details				
RL.1.1 Ask and answer questions about key details in a text.				
RL.1.2 Retell stories, including key details, and demonstrate understanding of their central message or lesson.				
RL.1.3 Describe characters, settings, and major events in a story, using key details				
Craft and Structure				
RL.1.4 Identify words and phrases in stories or poems that suggest feelings or appeal to the senses.				
RL.1.5 Explain major differences between books that tell stories and books that give information, drawing on a wide reading of a range of text types.				
RL.1.6 Identify who is telling the story at various points in a text.				
Integration of Knowledge and Ideas				
RL.1.7 Use illustrations and details in a story to describe its characters, setting, or events				
RL.1.8 (Not applicable to literature)				
RL.1.9 Compare and contrast the adventures and experiences of characters in stories.				
Range of Reading and Level of Text Complexity				
RL.1.10 With prompting and support, read prose and poetry of appropriate complexity for grade 1.				

Reading Informational Text				
Key Ideas and Details				
RI.1.1 Ask and answer questions about key details in a text.				
RI.1.2 Identify the main topic and retell key details of a text.				
RI.1.3 Describe the connection between two individuals, events, ideas, or pieces of information in a text.				
Craft and Structure				
RI.1.4 Ask and answer questions to help determine or clarify the meaning of words and phrases in a text.				
RI.1.5 Know and use various text features (e.g., headings, tables of contents, glossaries, electronic menus, icons) to locate key facts or information in a text.				
RI.1.6 Distinguish between information provided by pictures or other illustrations and information provided by the words in a text.				
Integration of Knowledge and Ideas				
RI.1.7 Use the illustrations and details in a text to describe its key ideas.				
RI.1.8 Identify the reasons an author gives to support points in a text.				
RI.1.9 Identify basic similarities in and differences between two texts on the same topic (e.g., in illustrations, descriptions, or procedures).				
Range of Reading and Level of Text Complexity				
RI.1.10 With prompting and support, read informational texts appropriately complex for grade 1.				

Writing				
Text Types and Purposes				
W.1.1 Write opinion pieces in which they introduce the topic or name the book they are writing about, state an opinion, supply a reason for the opinion, and provide some sense of closure.				
W.1.2 Write informative/explanatory texts in which they name a topic, supply some facts about the topic, and provide some sense of closure.				
W.1.3 Write narratives in which they recount two or more appropriately sequenced events, include some details regarding what happened, use temporal words to signal event order, and provide some sense of closure.				
Production and Distribution of Writing				
W.1.4 Begins in in grade 3				
W.1.5 With guidance and support from adults, focus on a topic, respond to questions and suggestions from peers, and add details to strengthen writing as needed.				
W.1.6 With guidance and support from adults, use a variety of digital tools to produce and publish writing, including in collaboration with peers.				
Research to Build and Present Knowledge				
W.1.7 Participate in shared research and writing projects (e.g., explore a number of —how-to books on a given topic and use them to write a sequence of instructions).				
W.1.8 With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.				
W.1.9 Begins in grade 4				
W.1.10 Begins in grade 3				

Speaking and Listening

Comprehension and Collaboration

SL.1.1 Participate in collaborative conversations with diverse partners about *grade 1 topics and texts* with peers and adults in small and larger groups.

a. Follow agreed-upon rules for discussions (e.g., listening to others with care, speaking one at a time about the topics and texts under discussion).

b. Build on others' talk in conversations by responding to the comments of others through multiple exchanges.

c. Ask questions to clear up any confusion about the topics and texts under discussion.

SL.1.2 Ask and answer questions about key details in a text read aloud or presented orally or through other media.

SL.1.3 Ask and answer questions about what a speaker says in order to gather additional information or clarify something that is not understood.

Presentation of Knowledge and Ideas

SL.1.4 Describe people, places, things, and events with relevant details, expressing ideas and feelings clearly.

SL.1.5 Add drawings or other visual displays to descriptions when appropriate to clarify ideas, thoughts, and feelings.

SL.1.6 Produce complete sentences when appropriate to task and situation.

Language				
Conventions of Standard English				
L.1.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.				
a. Print all upper- and lowercase letters.				
b. Use common, proper, and possessive nouns.				
c. Use singular and plural nouns with matching verbs in basic sentences (e.g., He hops; We hop).				
d. Use personal, possessive, and indefinite pronouns (e.g., I, me, my; they, them, their, anyone, everything).				
e. Use verbs to convey a sense of past, present, and future (e.g., Yesterday I walked home; Today I walk home; Tomorrow I will walk home).				
f. Use frequently occurring adjectives.				
g. Use frequently occurring conjunctions (e.g., <i>and</i> , <i>but</i> , <i>or</i> , <i>so</i> , <i>because</i>).				
h. Use determiners (e.g., articles, demonstratives).				
i. Use frequently occurring prepositions (e.g., <i>during</i> , <i>beyond</i> , <i>toward</i>).				
j. Produce and expand complete simple and compound declarative, interrogative, imperative, and exclamatory sentences in response to prompts.				

L.1.2 Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing.				
a. Capitalize dates and names of people.				
b. Use end punctuation for sentences.				
c. Use commas in dates and to separate single words in a series.				
d. Use conventional spelling for words with common spelling patterns and for frequently occurring irregular words.				
e. Spell untaught words phonetically, drawing on phonemic awareness and spelling conventions.				
Knowledge of Language				
L.1.4 Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on <i>grade 1 reading and content</i> , choosing flexibly from an array of strategies.				
a. Use sentence-level context as a clue to the meaning of a word or phrase.				
b. Use frequently occurring affixes as a clue to the meaning of a word.				
c. Identify frequently occurring root words (e.g., <i>look</i>) and their inflectional forms (e.g., <i>looks, looked, looking</i>).				
d. Distinguish shades of meaning among verbs differing in manner (e.g., <i>look, peek, glance, stare, glare, scowl</i>) and adjectives differing in intensity (e.g., <i>large, gigantic</i>) by defining or choosing them or by acting out the meanings.				

Vocabulary Acquisition and Use				
L.1.5 With guidance and support from adults, demonstrate understanding of figurative language, word relationships and nuances in word meanings.				
a. Sort words into categories (e.g., colors, clothing) to gain a sense of the concepts the categories represent.				
b. Define words by category and by one or more key attributes (e.g., a <i>duck</i> is a bird that swims; a <i>tiger</i> is a large cat with stripes).				
c. Identify real-life connections between words and their use (e.g., note places at home that are <i>cozy</i>).				
d. Distinguish shades of meaning among verbs differing in manner (e.g., <i>look</i> , <i>peek</i> , <i>glance</i> , <i>stare</i> , <i>glare</i> , <i>scowl</i>) and adjectives differing in intensity (e.g., large, gigantic) by defining or choosing them or by acting out the meanings.				
L.1.6 Use words and phrases acquired through conversations, reading and being read to, and responding to texts, including using frequently occurring conjunctions to signal simple relationships (e.g., <i>because</i>).				

Reading Foundational Skills

Print Concepts

RF.1.1 Demonstrate understanding of the organization and basic features of print.

- a. Recognize the distinguishing features of a sentence (e.g., first word, capitalization, ending punctuation).

Phonological Awareness

RF.1.2 Demonstrate understanding of spoken words, syllables, and sounds (phonemes).

- a. Distinguish long from short vowel sounds in spoken single-syllable words.
- b. Orally produce single-syllable words by blending sounds (phonemes) including consonant blends.
- c. Isolate and pronounce initial, medial vowel, and final sounds (phonemes) in spoken single-syllable words.
- d. Segment spoken single-syllable words into their complete sequence of individual sounds (phonemes).

Phonics and Word Recognition				
RF.1.3 Know and apply grade-level phonics and word analysis skills in decoding words.				
a. Know the spelling-sound correspondences for common consonant digraphs.				
b. Decode regularly spelled one-syllable words.				
c. Know final -e and common vowel team conventions for representing long vowel sounds.				
d. Use knowledge that every syllable must have a vowel sound to determine the number of syllables in a printed word.				
e. Decode two-syllable words following basic patterns by breaking the words into syllables.				
f. Read words with inflectional endings.				
g. Recognize and read grade-appropriate irregularly spelled words.				
Fluency				
RF.1.4 Read with sufficient accuracy and fluency to support comprehension.				
a. Read on-level text with purpose and understanding.				
b. Read on-level text orally with accuracy, appropriate rate, and expression on successive readings.				
c. Use context to confirm or self-correct word recognition and understanding, rereading as necessary.				

Reading Literature				
Key Ideas and Details				
RL.2.1 Ask and answer such questions as who, what, where, when, why, and how to demonstrate understanding of key details in a text.				
RL.2.2 Recount stories, including fables and folktales from diverse cultures, and determine their central message, lesson, or moral.				
RL.2.3 Describe how characters in a story respond to major events and challenges.				
Craft and Structure				
RL.2.4 Describe how words and phrases (e.g., regular beats, alliteration, rhymes, repeated lines) supply rhythm and meaning in a story, poem, or song.				
RL.2.5 Describe the overall structure of a story, including describing how the beginning introduces the story and the ending concludes the action.				
RL.2.6 Acknowledge differences in the points of view of characters, including by speaking in a different voice for each character when reading dialogue aloud.				
Integration of Knowledge and Ideas				
RL.2.7 Use information gained from the illustrations and words in a print or digital text to demonstrate understanding of its characters, setting, or plot.				
RL.2.8 (Not applicable to literature)				
RL.2.9 Compare and contrast two or more versions of the same story (e.g., Cinderella stories) by different authors or from different cultures.				
Range of Reading and Level of Text Complexity				
RL.2.10 By the end of the year, read and comprehend literature, including stories and poetry, in the grades 2–3 text complexity band proficiently, with scaffolding as needed at the high end of the range.				

Reading Informational Text

Key Ideas and Details

RI.2.1 Ask and answer such questions as who, what, where, when, why, and how to demonstrate understanding of key details in a text.				
RI.2.2 Identify the main topic of a multiparagraph text as well as the focus of specific paragraphs within the text.				
RI.2.3 Describe the connection between a series of historical events, scientific ideas or concepts, or steps in technical procedures in a text.				

Craft and Structure

RI.2.4 Determine the meaning of words and phrases in a text relevant to a grade 2 topic or subject area.				
RI.2.5 Know and use various text features (e.g., captions, bold print, subheadings, glossaries, indexes, electronic menus, icons) to locate key facts or information in a text efficiently.				
RI.2.6 Identify the main purpose of a text, including what the author wants to answer, explain, or describe.				

Integration of Knowledge and Ideas

RI.2.7 Explain how specific images (e.g., a diagram showing how a machine works) contribute to and clarify a text.				
RI.2.8 Describe how reasons support specific points the author makes in a text.				
RI.2.9 Compare and contrast the most important points presented by two texts on the same topic.				

Range of Reading and Level of Text Complexity

RI.2.10 By the end of year, read and comprehend informational texts, including history/social studies, science, and technical texts, in the grades 2–3 text complexity band proficiently, with scaffolding as needed at the high end of the range.				
---	--	--	--	--

Writing

Text Types and Purposes				
W.2.1 Write opinion pieces in which they introduce the topic or book they are writing about, state an opinion, supply reasons that support the opinion, use linking words (e.g., because, and, also) to connect opinion and reasons, and provide a concluding statement or section.				
W.2.2 Write informative/explanatory texts in which they introduce a topic, use facts and definitions to develop points, and provide a concluding statement or section.				
W.2.3 Write narratives in which they recount a well-elaborated event or short sequence of events, include details to describe actions, thoughts, and feelings, use temporal words to signal event order, and provide a sense of closure.				
Production and Distribution of Writing				
W.2.4 Begins in in grade 3				
W.2.5 With guidance and support from adults and peers, focus on a topic and strengthen writing as needed by revising and editing.				
W.2.6 With guidance and support from adults, use a variety of digital tools to produce and publish writing, including in collaboration with peers.				
Research to Build and Present Knowledge				
W.2.7 Participate in shared research and writing projects (e.g., read a number of books on a single topic to produce a report; record science observations).				
W.2.8 Recall information from experiences or gather information from provided sources to answer a question.				
W.2.9 Begins in grade 4				
W.2.10 Begins in grade 3				

Speaking and Listening

Comprehension and Collaboration				
SL.2.1 Participate in collaborative conversations with diverse partners about <i>grade 2 topics and texts</i> with peers and adults in small and larger groups.				
a. Follow agreed-upon rules for discussions (e.g., gaining the floor in respectful ways, listening to others with care, speaking one at a time about the topics and texts under discussion).				
b. Build on others' talk in conversations by linking their comments to the remarks of others.				
c. Ask for clarification and further explanation as needed about the topics and texts under discussion.				
SL.2.2 Recount or describe key ideas or details from a text read aloud or information presented orally or through other media.				
SL.2.3 Ask and answer questions about what a speaker says in order to clarify comprehension, gather additional information, or deepen understanding of a topic or issue.				
Presentation of Knowledge and Ideas				
SL.2.4 Tell a story or recount an experience with appropriate facts and relevant, descriptive details, speaking audibly in coherent sentences.				
SL.2.5 Create audio recordings of stories or poems; add drawings or other visual displays to stories or recounts of experiences when appropriate to clarify ideas, thoughts, and feelings.				
SL.2.6 Produce complete sentences when appropriate to task and situation in order to provide requested detail or clarification.				

Language

Conventions of Standard English

L.2.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.				
a. Use collective nouns (e.g., <i>group</i>).				
b. Form and use frequently occurring irregular plural nouns (e.g., <i>feet, children, teeth, mice, fish</i>).				
c. Use reflexive pronouns (e.g., <i>myself, ourselves</i>).				
d. Form and use the past tense of frequently occurring irregular verbs (e.g., <i>sat, hid, told</i>).				
e. Use adjectives and adverbs, and choose between them depending on what is to be modified.				
f. Produce, expand, and rearrange complete simple and compound sentences (e.g., <i>The boy watched the movie; The little boy watched the movie; The action movie was watched by the little boy</i>).				
L.2.2 Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing.				
a. Capitalize holidays, product names, and geographic names.				
b. Use commas in greetings and closings of letters.				
c. Use an apostrophe to form contractions and frequently occurring possessives.				
d. Generalize learned spelling patterns when writing words (e.g., <i>cage</i> → <i>badge</i> ; <i>boy</i> → <i>boil</i>).				
e. Consult reference materials, including beginning dictionaries, as needed to check and correct spellings.				

Knowledge of Language				
L.2.3 Use knowledge of language and its conventions when writing, speaking, reading, or listening.				
a. Compare formal and informal uses of English.				
L.2.4 Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grade 2 reading and content, choosing flexibly from an array of strategies.				
a. Use sentence-level context as a clue to the meaning of a word or phrase.				
b. Determine the meaning of the new word formed when a known prefix is added to a known word (e.g., <i>happy/unhappy</i> , <i>tell/retell</i>).				
c. Use a known root word as a clue to the meaning of an unknown word with the same root (e.g., <i>addition</i> , <i>additional</i>).				
d. Use knowledge of the meaning of individual words to predict the meaning of compound words (e.g., <i>birdhouse</i> , <i>lighthouse</i> , <i>housefly</i> ; <i>bookshelf</i> , <i>notebook</i> , <i>bookmark</i>).				
e. Use glossaries and beginning dictionaries, both print and digital, to determine or clarify the meaning of words and phrases.				
Vocabulary Acquisition and Use				
L.2.5 Demonstrate understanding of figurative language, word relationships and nuances in word meanings.				
a. Identify real-life connections between words and their use (e.g., <i>describe foods that are spicy or juicy</i>).				
b. Distinguish shades of meaning among closely related verbs (e.g., <i>toss</i> , <i>throw</i> , <i>hurl</i>) and closely related adjectives (e.g., <i>thin</i> , <i>slender</i> , <i>skinny</i> , <i>scrawny</i>).				
L.2.6 Use words and phrases acquired through conversations, reading and being read to, and responding to texts, including using adjectives and adverbs to describe (e.g., <i>When other kids are happy that makes me happy</i>).				

Reading Foundational Skills

Phonics and Word Recognition

RF.2.3 Know and apply grade-level phonics and word analysis skills in decoding words.

- a. Distinguish long and short vowels when reading regularly spelled one-syllable words.
- b. Know spelling-sound correspondences for additional common vowel teams.
- c. Decode regularly spelled two-syllable words with long vowels.
- d. Decode words with common prefixes and suffixes.
- e. Identify words with inconsistent but common spelling-sound correspondences.
- f. Recognize and read grade-appropriate irregularly spelled words.

Fluency

RF.2.4 Read with sufficient accuracy and fluency to support comprehension.

- a. Read on-level text with purpose and understanding.
- b. Read on-level text orally with accuracy, appropriate rate, and expression on successive readings.
- c. Use context to confirm or self-correct word recognition and understanding, rereading as necessary.

Reading Literature				
Key Ideas and Details				
RL.3.1 Ask and answer questions to demonstrate understanding of a text, referring explicitly to the text as the basis for the answers.				
RL.3.2 Recount stories, including fables, folktales, and myths from diverse cultures; determine the central message, lesson, or moral and explain how it is conveyed through key details in the text.				
RL.3.3 Describe characters in a story (e.g., their traits, motivations, or feelings) and explain how their actions contribute to the sequence of events.				
Craft and Structure				
RL.3.4 Determine the meaning of words and phrases as they are used in a text, distinguishing literal from nonliteral language.				
RL.3.5 Refer to parts of stories, dramas, and poems when writing or speaking about a text, using terms such as chapter, scene, and stanza; describe how each successive part builds on earlier sections.				
RL.3.6 Distinguish their own point of view from that of the narrator or those of the characters.				
Integration of Knowledge and Ideas				
RL.3.7 Explain how specific aspects of a text's illustrations contribute to what is conveyed by the words in a story (e.g., create mood, emphasize aspects of a character or setting).				
RL.3.8 Not applicable to literature				
RL.3.9 Compare and contrast the themes, settings, and plots of stories written by the same author about the same or similar characters (e.g., in books from a series).				
Range of Reading and Level of Text Complexity				
RL.3.10 By the end of the year, read and comprehend literature, including stories, dramas, and poetry, at the high end of the grades 2–3 text complexity band independently and proficiently.				

Reading Informational Text

Key Ideas and Details				
RI.3.1 Ask and answer questions to demonstrate understanding of a text, referring explicitly to the text as the basis for the answers.				
RI.3.2 Determine the main idea of a text; recount the key details and explain how they support the main idea.				
RI.3.3 Describe the relationship between a series of historical events, scientific ideas or concepts, or steps in technical procedures in a text, using language that pertains to time, sequence, and cause/effect.				
Craft and Structure				
RI.3.4 Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a grade 3 topic or subject area.				
RI.3.5 Use text features and search tools (e.g., key words, sidebars, hyperlinks) to locate information relevant to a given topic efficiently.				
RI.3.6 Distinguish their own point of view from that of the author of a text.				
Integration of Knowledge and Ideas				
RI.3.7 Use information gained from illustrations (e.g., maps, photographs) and the words in a text to demonstrate understanding of the text (e.g., where, when, why, and how key events occur).				
RI.3.8 Describe the logical connection between particular sentences and paragraphs in a text (e.g., comparison, cause/effect, first/second/third in a sequence).				
RI.3.9 Compare and contrast the most important points and key details presented in two texts on the same topic.				
Range of Reading and Level of Text Complexity				
RI.3.10 By the end of the year, read and comprehend informational texts, including history/social studies, science, and technical texts, at the high end of the grades 2-3 test complexity band independently and proficiently				

Writing

Text Types and Purposes

W.3.1 Write opinion pieces on familiar topics or texts, supporting a point of view with reasons.				
a. Introduce the topic or text they are writing about, state an opinion, and create an organizational structure that lists reasons.				
b. Provide reasons that support the opinion.				
c. Use linking words and phrases (e.g., because, therefore, since, for example) to connect opinion and reasons.				
d. Provide a concluding statement or section.				
W.3.2 Write informative/explanatory texts to examine a topic and convey ideas and information clearly.				
a. Introduce a topic and group related information together; include illustrations when useful to aid in comprehension.				
b. Develop the topic with facts, definitions, and details.				
c. Use linking words and phrases (e.g., also, another, and, more, but) to connect ideas within categories of information.				
d. Provide a concluding statement or section.				
W.3.3 Write narratives to develop real or imagined experiences or events using effective technique, descriptive details, and clear event sequences.				
a. Establish a situation and introduce a narrator and/or characters; organize an event sequence that unfolds naturally.				
b. Use dialogue and descriptions of actions, thoughts, and feelings to develop experiences and events or show the response of characters to situations.				
c. Use temporal words and phrases to signal event order.				
d. Provide a sense of closure.				

Production and Distribution of Writing				
W.3.4 With guidance and support from adults, produce writing in which the development and organization are appropriate to task and purpose. (Grade-specific expectations for writing types are defined in standards 1-3 above)				
W.3.5 With guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, and editing. (Editing for conventions should demonstrate command of Language standards 1-3 and up to and including grade 3 on pages 28 and 29)				
W.3.6 With guidance and support from adults, use technology to produce and publish writing (using keyboarding skills) as well as to interact and collaborate with others.				
Research to Build and Present Knowledge				
W.3.7 Conduct short research projects that build knowledge about a topic.				
W.3.8 Recall information from experiences or gather information from print and digital sources; take brief notes on sources and sort evidence into provided categories				
W.3.9 Begins in grade 4				
Range of Writing				
W.3.10 Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.				

Speaking and Listening

Comprehension and Collaboration				
SL.3.1 Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 3 topics and texts, building on others' ideas and expressing their own clearly.				
a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion.				
b. Follow agreed-upon rules for discussions (e.g., gaining the floor in respectful ways, listening to others with care, speaking one at a time about the topics and texts under discussion).				
c. Ask questions to check understanding of information presented, stay on topic, and link their comments to the remarks of others.				
d. Explain their own ideas and understanding in light of the discussion.				
SL.3.2 Determine the main ideas and supporting details of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.				
SL.3.3 Ask and answer questions about information from a speaker, offer appropriate elaboration and detail.				
Presentation of Knowledge and Ideas				
SL.3.4 Report on a topic or text, tell a story, or recount an experience with appropriate facts and relevant, descriptive details, speaking clearly at an understandable pace.				
SL.3.5 Create engaging audio recordings of stories or poems that demonstrate fluid reading at an understandable pace; add visual displays when appropriate to emphasize or enhance certain facts or details.				
SL.3.6 Speak in complete sentences when appropriate to task and situation in order to provide requested detail or clarification. (See grade 3 Language standards 1 and 3 on page 26 for specific expectations.)				

Language

Conventions of Standard English

L.3.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.				
a. Explain the function of nouns, pronouns, verbs, adjectives, and adverbs in general and their functions in particular sentences.				
b. Form and use regular and irregular plural nouns.				
c. Use abstract nouns (e.g., childhood).				
d. Form and use regular and irregular verbs.				
e. Form and use the simple (e.g., I walked; I walk; I will walk) verb tenses.				
f. Ensure subject-verb and pronoun-antecedent agreement.*				
g. Form and use comparative and superlative adjectives and adverbs, and choose between them depending on what is to be modified.				
h. Use coordinating and subordinating conjunctions.				
i. Produce simple, compound, and complex sentences.				
L.3.2 Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing.				
a. Capitalize appropriate words in titles.				
b. Use commas in addresses.				
c. Use commas and quotation marks in dialogue.				
d. Form and use possessives.				
e. Use conventional spelling for high-frequency and other studied words and for adding suffixes to base words (e.g., sitting, smiled, cries, happiness).				
f. Use spelling patterns and generalizations (e.g., word families, position-based spellings, syllable patterns, ending rules, meaningful word parts) in writing words.				
g. Consult reference materials, including beginning dictionaries, as needed to check and correct spellings.				

Knowledge of Language				
L.3.4 Determine or clarify the meaning of unknown and multiple-meaning word and phrases based on grade 3 reading and content, choosing flexibly from a range of strategies.				
a. Use sentence-level context as a clue to the meaning of a word or phrase.				
b. Determine the meaning of the new word formed when a known affix is added to a known word (e.g., agreeable/disagreeable, comfortable/uncomfortable, care/careless, heat/preheat).				
c. Use a known root word as a clue to the meaning of an unknown word with the same root (e.g., company, companion).				
d. Use glossaries or beginning dictionaries, both print and digital, to determine or clarify the precise meaning of key words and phrases.				
Vocabulary Acquisition and Use				
L.3.5 Demonstrate understanding of word relationships and nuances in word meanings.				
a. Distinguish the literal and nonliteral meanings of words and phrases in context (e.g., take steps).				
b. Identify real-life connections between words and their use (e.g., describe people who are friendly or helpful).				
c. Distinguish shades of meaning among related words that describe states of mind or degrees of certainty (e.g., knew, believed, suspected, heard, wondered).				
L.3.6 Acquire and use accurately grade-appropriate conversational, general academic, and domain-specific words and phrases, including those that signal spatial and temporal relationships (e.g., After dinner that night we went looking for them).				

Reading Foundational Skills

Phonics and Word Recognition

RF.3.3 Know and apply grade-level phonics and word analysis skills in decoding words.

- Identify and know the meaning of the most common prefixes and derivational suffixes.
- Decode words with common Latin suffixes.
- Decode multisyllable words.
- Read grade-appropriate irregularly spelled words.

Fluency

RF.3.4 Read with sufficient accuracy and fluency to support comprehension.

- Read grade-level text with purpose and understanding.
- Read grade-level prose and poetry orally with accuracy, appropriate rate, and expression.
- Use context to confirm or self-correct word recognition and understanding, rereading as necessary.

Reading Literature				
Key Ideas and Details				
RL.4.1 Refer to details and examples in a text when explaining what the text says explicitly and when drawing inferences from the text.				
RL.4.2 Determine a theme of a story, drama, or poem from details in the text; summarize the text.				
RL.4.3 Describe in depth a character, setting, or event in a story or drama, drawing on specific details in the text (e.g., a character's thoughts, words, or actions).				
Craft and Structure				
RL.4.4 Determine the meaning of words and phrases as they are used in a text, including those that allude to significant characters found in mythology (e.g., Herculean).				
RL.4.5 Explain major differences between poems, drama, and prose, and refer to the structural elements of poems (e.g., verse, rhythm, meter) and drama (e.g., casts of characters, setting descriptions, dialogue, stage directions) when writing or speaking about a text.				
RL.4.6 Compare and contrast the point of view from which different stories are narrated, including the difference between first- and third-person narrations.				
Integration of Knowledge and Ideas				
RL.4.7 Make connections between the text of a story or drama and a visual or oral presentation of the text, identifying where each version reflects specific descriptions and directions in the text.				
RL.4.8 Not applicable to literature				
RL.4.9 Compare and contrast the treatment of similar themes and topics (e.g., opposition of good and evil) and patterns of events (e.g., the quest) in stories, myths, and traditional literature from different cultures.				
Range of Reading and Level of Text Complexity				
RL.4.10 By the end of the year, read and comprehend literature, including stories, dramas, and poetry, in the grades 4–5 text complexity band proficiently, with scaffolding as needed at the high end of the range.				

Reading Informational Text				
Key Ideas and Details				
RI.4.1 Refer to details and examples in a text when explaining what the text says explicitly and when drawing inferences from the text.				
RI.4.2 Determine the main idea of a text and explain how it is supported by key details; summarize the text.				
RI.4.3 Explain events, procedures, ideas, or concepts in a historical, scientific, or technical text, including what happened and why, based on specific information in the text.				
Craft and Structure				
RI.4.4 Determine the meaning of general academic and domain-specific words or phrases in a text relevant to a grade 4 topic or subject area.				
RI.4.5 Describe the overall structure (e.g., chronology, comparison, cause/effect, problem/solution) of events, ideas, concepts, or information in a text or part of a text.				
RI.4.6 Compare and contrast a firsthand and secondhand account of the same event or topic; describe the differences in focus and the information provided.				
Integration of Knowledge and Ideas				
RI.4.7 Interpret information presented visually, orally, or quantitatively (e.g., in charts, graphs, diagrams, time lines, animations, or interactive elements on Web pages) and explain how the information contributes to an understanding of the text in which it appears.				
RI.4.8 Explain how an author uses reasons and evidence to support particular points in a text.				
RI.4.9 Integrate information from two texts on the same topic in order to write or speak about the subject knowledgeably.				
Range of Reading and Level of Text Complexity				
RI.4.10 By the end of the year, read and comprehend informational texts, including history/social studies, science, and technical texts, in the grades 4-5 text complexity band proficiently, with scaffolding as needed at the high end of the range.				

Writing

Text Types and Purposes

W.4.1 Write opinion pieces on topics or texts, supporting a point of view with reasons and information.				
a. Introduce a topic or text clearly, state an opinion, and create an organizational structure in which related ideas are grouped to support the writer's purpose.				
b. Provide reasons that are supported by facts and details.				
c. Link opinion and reasons using words and phrases (e.g., for instance, in order to, in addition).				
d. Provide a concluding statement or section related to the opinion presented.				
W.3.2 Write informative/explanatory texts to examine a topic and convey ideas and information clearly.				
a. Introduce a topic clearly and group related information in paragraphs and sections; include formatting (e.g., headings), illustrations, and multimedia when useful to aiding comprehension.				
b. Develop the topic with facts, definitions, concrete details, quotations, or other information and examples related to the topic.				
c. Link ideas within categories of information using words and phrases (e.g., another, for example, also, because).				
d. Use precise language and domain-specific vocabulary to inform about or explain the topic.				
e. Provide a concluding statement or section related to the information or explanation presented.				
W.4.3 Write narratives to develop real or imagined experiences or events using effective technique, descriptive details, and clear event sequences.				
a. Orient the reader by establishing a situation and introducing a narrator and/or characters; organize an event sequence that unfolds naturally.				
b. Use dialogue and description to develop experiences and events or show the responses of characters to situations.				
c. Use a variety of transitional words and phrases to manage the sequence of events.				
d. Use concrete words and phrases and sensory details to convey experiences and events precisely.				
e. Provide a conclusion that follows from the narrated experiences or events.				

Production and Distribution of Writing				
W.4.4 Produce clear and coherent writing in which the development and organization are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1-3 above).				
W.4.5 With guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, and editing. (Editing for conventions should demonstrate command of Language standards 1-3 up to and including grade 4 on pages 28-29.)				
W.4.6 With some guidance and support from adults, use technology, including the Internet, to produce and publish writing as well as to interact and collaborate with others; demonstrate sufficient command of keyboarding skills to type a minimum of one page on a single sitting.				
Research to Build and Present Knowledge				
W.4.7 Conduct short research projects that build knowledge through investigation of different aspects of a topic.				
W.4.8 Recall relevant information from experiences or gather relevant information from print and digital sources; take notes and categorize information, and provide a list of sources.				
W.4.9 Draw evidence from literary or informational texts to support analysis, reflection, and research.				
a. Apply grade 4 Reading standards to literature (e.g., “Describe in depth a character, setting, or event in a story or drama, drawing on specific details in the text [e.g., a character’s thoughts, words, or actions].”).				
b. Apply grade 4 Reading standards to informational texts (e.g., “Explain how an author uses reasons and evidence to support particular points in a text”).				
Range of Writing				
W.4.10 Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or day or two) for a range of discipline-specific tasks, purposes, and audiences.				

Speaking and Listening

Comprehension and Collaboration				
SL.4.1 Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 4 topics and texts, building on others' ideas and expressing their own clearly.				
a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion.				
b. Follow agreed-upon rules for discussions and carry out assigned roles.				
c. Pose and respond to specific questions to clarify or follow up on information, and make comments that contribute to the discussion and link to the remarks of others.				
d. Review the key ideas expressed and explain their own ideas and understanding in light of the discussion.				
SL.4.2 Paraphrase portions of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.				
SL.4.3 Identify the reasons and evidence a speaker provides to support particular points.				
Presentation of Knowledge and Ideas				
SL.4.4 Report on a topic or text, tell a story, or recount an experience in an organized manner, using appropriate facts and relevant, descriptive details to support main ideas or themes; speak clearly at an understandable pace.				
SL.4.5 Add audio recordings and visual displays to presentations when appropriate to enhance the development of main ideas or themes.				
SL.4.6 Differentiate between contexts that call for formal English (e.g., presenting ideas) and situations where informal discourse is appropriate (e.g., small-group discussion); use formal English when appropriate to task and situation. (See grade 4 Language standards 1 and 3 on page 28 for specific expectations.)				

Language				
Conventions of Standard English				
L.4.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.				
a. Use relative pronouns (who, whose, whom, which, that) and relative adverbs (where, when, why).				
b. Form and use the progressive (e.g., I was walking; I am walking; I will be walking) verb tenses.				
c. Use modal auxiliaries (e.g., can, may, must) to convey various conditions.				
d. Order adjectives within sentences according to conventional patterns (e.g., a small red bag rather than a red small bag).				
e. Form and use prepositional phrases.				
f. Produce complete sentences, recognizing and correcting inappropriate fragments and run-ons.*				
g. Correctly use frequently confused words (e.g., to, too, two; there, their).*				
L.4.2 Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing.				
a. Use correct capitalization.				
b. Use commas and quotation marks to mark direct speech and quotations from a text.				
c. Use a comma before a coordinating conjunction.				
d. Form and use possessives.				
L.4.3 Use knowledge of language and its conventions when writing, speaking, reading, or listening.				
a. Choose words and phrases to convey ideas precisely.*				
b. Choose punctuation for effect.*				
c. Differentiate between contexts that call for formal English (e.g., presenting ideas) and situations where informational discourse is appropriate (e.g., small-group discussion).				

Knowledge of Language				
L.4.4 Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grade 4 reading and content, choosing flexibly from a range of strategies.				
a. Use context (e.g., definitions, examples, or restatements in text) as a clue to the meaning of a word or phrase.				
b. Use common, grade-appropriate Greek and Latin affixes and roots as clues to the meaning of a word (e.g., telegraph, photograph, autograph).				
c. Consult reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation and determine or clarify the precise meaning of key words and phrases.				
Vocabulary Acquisition and Use				
L.4.5 Demonstrate understanding of figurative language, word relationships, and nuances in word meanings.				
a. Explain the meaning of simple similes and metaphors (e.g., as pretty as a picture) in context.				
b. Recognize and explain the meaning of common idioms, adages, and proverbs.				
c. Demonstrate understanding of words by relating them to their opposites (antonyms) and to words with similar but not identical meanings (synonyms).				
L.4.6 Acquire and use accurately grade-appropriate general academic and domain-specific words and phrases, including those that signal precise actions, emotions, or states of being (e.g., quizzed, whined, stammered) and that are basic to a particular topic (e.g., wildlife, conservation, and endangered when discussing animal preservation).				

Reading Foundational Skills

Phonics and Word Recognition

RF.4.3 Know and apply grade-level phonics and word analysis skills in decoding words.

- a. Use combined knowledge of all letter-sound correspondences, syllabication patterns, and morphology (e.g., roots and affixes) to read accurately unfamiliar multisyllabic words in context and out of context.

Fluency

RF.4.4 Read with sufficient accuracy and fluency to support comprehension.

- a. Read grade-level text with purpose and understanding.
- b. Read grade-level prose and poetry orally with accuracy, appropriate rate, and expression.
- c. Use context to confirm or self-correct word recognition and understanding, rereading as necessary.

Reading Literature				
Key Ideas and Details				
RL.5.1 Quote accurately from a text when explaining what the text says explicitly and when drawing inferences from the text.				
RL.5.2 Determine a theme of a story, drama, or poem from details in the text, including how characters in a story or drama respond to challenges or how the speaker in a poem reflects upon a topic; summarize the text.				
RL.5.3 Compare and contrast two or more characters, settings, or events in a story or drama, drawing on specific details in the text (e.g., how characters interact).				
Craft and Structure				
RL.5.4 Determine the meaning of words and phrases as they are used in a text, including figurative language such as metaphors and similes.				
RL.5.5 Explain how a series of chapters, scenes, or stanzas fits together to provide the overall structure of a particular story, drama, or poem.				
RL.5.6 Describe how a narrator's or speaker's point of view influences how events are described.				
Integration of Knowledge and Ideas				
RL.5.7 Analyze how visual and multimedia elements contribute to the meaning, tone, or beauty of a text (e.g., graphic novel; multimedia presentation of fiction, folktale, myth, poem).				
RL.5.8 Not applicable to literature				
RL.5.9 Compare and contrast stories in the same genre (e.g., mysteries and adventure stories) on their approaches to similar themes and topics.				
Range of Reading and Level of Text Complexity				
RL.5.10 By the end of the year, read and comprehend literature, including stories, dramas, and poetry, at the high end of the grades 4–5 text complexity band independently and proficiently.				

Reading Informational Text

Key Ideas and Details				
RI.5.1 Quote accurately from a text when explaining what the text says explicitly and when drawing inferences from the text.				
RI.5.2 Determine two or more main ideas of a text and explain how they are supported by key details; summarize the text.				
RI.5.3 Explain the relationships or interactions between two or more individuals, events, ideas, or concepts in a historical, scientific, or technical text based on specific information in the text.				
Craft and Structure				
RI.5.4 Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a grade 5 topic or subject area.				
RI.5.5 Compare and contrast the overall structure (e.g., chronology, comparison, cause/effect, problem/solution) of events, ideas, concepts, or information in two or more texts.				
RI.5.6 Analyze multiple accounts of the same event or topic, noting important similarities and differences in the point of view they represent.				
Integration of Knowledge and Ideas				
RI.5.7 Draw on information from multiple print or digital sources, demonstrating the ability to locate an answer to a question quickly or to solve a problem efficiently.				
RI.5.8 Explain how an author uses reasons and evidence to support particular points in a text, identifying which reasons and evidence support which point(s).				
RI.5.9 Integrate information from several texts on the same topic in order to write or speak about the subject knowledgeably.				
Range of Reading and Level of Text Complexity				
RI.5.10 By the end of the year, read and comprehend informational texts, including history/social studies, science, and technical texts, at the high end of the grades 4-5 text complexity band independently and proficiently.				

Writing

Text Types and Purposes

W.5.1 Write opinion pieces on topics or texts, supporting a point of view with reasons and information.				
a. Introduce a topic or text clearly, state an opinion, and create an organizational structure in which ideas are logically grouped to support the writer's purpose.				
b. Provide logically ordered reasons that are supported by facts and details.				
c. Link opinion and reasons using words, phrases, and clauses (e.g., consequently, specifically).				
d. Provide a concluding statement or section related to the opinion presented.				
W.5.2 Write informative/explanatory texts to examine a topic and convey ideas and information clearly.				
a. Introduce a topic clearly, provide a general observation and focus, and group related information logically; include formatting (e.g., headings), illustrations, and multimedia when useful to aiding comprehension.				
b. Develop the topic with facts, definitions, concrete details, quotations, or other information and examples related to the topic.				
c. Link ideas within and across categories of information using words, phrases, and clauses (e.g., in contrast, especially).				
d. Use precise language and domain-specific vocabulary to inform about or explain the topic.				
e. Provide a concluding statement or section related to the information or explanation presented.				
W.5.3 Write narratives to develop real or imagined experiences or events using effective technique, descriptive details, and clear event sequences.				
a. Orient the reader by establishing a situation and introducing a narrator and/or characters; organize an event sequence that unfolds naturally.				
b. Use narrative techniques, such as dialogue, description, and pacing, to develop experiences and events or show the responses of characters to situations.				
c. Use a variety of transitional words, phrases, and clauses to manage the sequence of events.				
d. Use concrete words and phrases and sensory details to convey experiences and events precisely.				
e. Provide a conclusion that follows from the narrated experiences or events.				

Production and Distribution of Writing				
W.5.4 Produce clear and coherent writing in which the development and organization are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1-3 above.)				
W.5.5 With guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach. (Editing for conventions should demonstrate command of Language standards 1-3 up to and including grade 5 on pages 28 and 29.)				
W.5.6 With some guidance and support from adults, use technology, including the Internet, to produce and publish writing as well as to interact and collaborate with others; demonstrate sufficient command of keyboarding skills to type a minimum of two pages in a single sitting.				
Research to Build and Present Knowledge				
W.5.7 Conduct short research projects that use several sources to build knowledge through investigation or different aspects of a topic.				
W.5.8 Recall relevant information from experiences or gather relevant information from print and digital sources; summarize or paraphrase information in notes and finished work, and provide a list of sources.				
W.5.9 Draw evidence from literary or informational texts to support analysis, reflection, and research.				
a. Apply grade 5 Reading standards to literature (e.g., “Compare and contrast two or more characters, settings, or events in a story or a drama, drawing on specific details in the text [e.g., how characters interact]”).				
b. Apply grade 5 Reading standards to informational texts (e.g., “Explain how an author uses reasons and evidence to support particular points in a text, identifying which reasons and evidence support which point[s]”).				
Range of Writing				
W.5.10 Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.				

Speaking and Listening

Comprehension and Collaboration

SL.5.1 Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 5 topics and texts, building on others' ideas and expressing their own clearly.				
a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion.				
b. Follow agreed-upon rules for discussions and carry out assigned roles.				
c. Pose and respond to specific questions by making comments that contribute to the discussion and elaborate on the remarks of others.				
d. Review the key ideas expressed and draw conclusions in light of information and knowledge gained from the discussions.				
SL.5.2 Summarize written text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.				
SL.5.3 Summarize the points a speaker makes and explain how each claim is supported by reasons and evidence.				

Presentation of Knowledge and Ideas

SL.5.4 Report on a topic or text or present an opinion, sequencing ideas logically and using appropriate facts and relevant, descriptive details to support main ideas or themes; speak clearly at an understandable pace.				
SL.5.5 Include multimedia components (e.g., graphics, sound) and visual displays in presentations when appropriate to enhance the development of main ideas or themes.				
SL.5.6 Adapt speech to a variety of contexts and tasks, using formal English when appropriate to task and situation. (See grade 5 Language standards 1 and 3 on page 28 for specific expectations.)				

Language				
Conventions of Standard English				
L.5.1 Demonstrate command of the conventions of Standard English grammar and usage when writing or speaking.				
a. Explain the function of conjunctions, prepositions, and interjections in general and their function in particular sentences.				
b. Form and use the perfect (e.g., I had walked; I have walked; I will have walked) verb tenses.				
c. Use verb tense to convey various times, sequences, states, and conditions.				
d. Recognize and correct inappropriate shifts in verb tense.*				
e. Use correlative conjunctions (e.g., either/or, neither/nor).				
L.5.2 Demonstrate command of the conventions of Standard English capitalization, punctuation, and spelling when writing.				
a. Use punctuation to separate items in a series.*				
b. Use a comma to separate an introductory element from the rest of the sentence.				
c. Use a comma to set off the words yes and no (e.g., Yes, thank you), to set off a tag question from the rest of the sentence (e.g., It's true, isn't it?), and to indicate direct address (e.g., Is that you, Steve?).				
d. Use underlining, quotation marks, or italics to indicate titles of works.				
e. Spell grade-appropriate words correctly, consulting references as needed.				
L.5.3 Use knowledge of language and its conventions when writing, speaking, reading, or listening.				
a. Expand, combine, and reduce sentences for meaning, reader/listener interest, and style.				
b. Compare and contrast the varieties of English (e.g., dialects, registers) used in stories, dramas, or poems.				

Knowledge of Language				
L.5.4 Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grade 5 reading and content, choosing flexibly from a range of strategies.				
a. Use context (e.g., cause/effect relationships and comparisons in text) as a clue to the meaning of a word or phrase.				
b. Use common, grade-appropriate Greek and Latin affixes and roots as clues to the meaning of a word (e.g., photograph, photosynthesis).				
c. Consult reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation and determine or clarify the precise meaning of key words and phrases.				
Vocabulary Acquisition and Use				
L.5.5 Demonstrate understanding of figurative language, word relationships, and nuances in word meanings.				
a. Interpret figurative language, including similes and metaphors, in context.				
b. Recognize and explain the meaning of common idioms, adages, and proverbs.				
c. Use the relationship between particular words (e.g., synonyms, antonyms, homographs) to better understand each of the words.				
L.5.6 Acquire and use accurately grade-appropriate general academic and domain-specific words and phrases, including those that signal contrast, addition, and other logical relationships (e.g., however, although, nevertheless, similarly, moreover, in addition).				

Reading Foundational Skills

Phonics and Word Recognition

RF.5.3 Know and apply grade-level phonics and word analysis skills in decoding words.

- a. Use combined knowledge of all letter-sound correspondences, syllabication patterns, and morphology (e.g., roots and affixes) to read accurately unfamiliar multisyllabic words in context and out of context.

Fluency

RF.5.4 Read with sufficient accuracy and fluency to support comprehension.

- a. Read grade-level text with purpose and understanding.
- b. Read grade-level prose and poetry orally with accuracy, appropriate rate, and expression.
- c. Use context to confirm or self-correct word recognition and understanding, rereading as necessary.

Reading Literature				
Key Ideas and Details				
RL.6.1 Cite textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.				
RL.6.2 Determine a theme or central idea of a text and how it is conveyed through particular details; provide a summary of the text distinct from personal opinions or judgments.				
RL.6.3 Describe how a particular story's or drama's plot unfolds in a series of episodes as well as how the characters respond or change as the plot moves toward a resolution.				
Craft and Structure				
RL.6.4 Determine the meaning of words and phrases as they are used in a text, including figurative and connotative meanings; analyze the impact of a specific word choice on meaning and tone.				
RL.6.5 Analyze how a particular sentence, chapter, scene, or stanza fits into the overall structure of a text and contributes to the development of the theme, setting, or plot.				
RL.6.6 Explain how an author develops the point of view of the narrator or speaker in a text.				
Integration of Knowledge and Ideas				
RL.6.7 Compare and contrast the experience of reading a story, drama, or poem to listening to or viewing an audio, video, or live version of the text, including contrasting what they "see" and "hear" when reading the text to what they perceive when they listen or watch.				
RL.6.8 Not applicable to literature				
RL.6.9 Compare and contrast texts in different forms or genres (e.g., stories and poems; historical novels and fantasy stories) in terms of their approaches to similar themes and topics.				
Range of Reading and Level of Text Complexity				
RL.6.10 By the end of the year, read and comprehend literature, including stories, dramas, and poems, in the grades 6–8 text complexity band proficiently, with scaffolding as needed at the high end of the range.				

Reading Informational Text

Key Ideas and Details				
RI.6.1 Cite textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.				
RI.6.2 Determine a central idea of a text and how it is conveyed through particular details, provide a summary of the text distinct from personal opinions or judgments.				
RI.6.3 Analyze in detail how a key individual, event, or idea is introduced, illustrated, and elaborated in a text.				
Craft and Structure				
RI.6.4 Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings.				
RI.6.5 Analyze how a particular sentence, paragraph, chapter, or section fits into the overall structure of a text and contributes to the development of the ideas.				
RI.6.6 Determine an author's point of view or purpose in a text and explain how it is conveyed in the text.				
Integration of Knowledge and Ideas				
RI.6.7 Integrate information presented in different media or formats as well as in words to develop a coherent understanding of a topic or issue.				
RI.6.8 Trace and evaluate an argument and specific claims in a text, distinguishing from claims that are supported by reasons and evidence from claims that are not.				
RI.6.9 Compare and contrast one author's presentation of events with that of another.				
Range of Reading and Level of Text Complexity				
RI.6.10 By the end of the year, read and comprehend literary non-fiction, in the grades 6–8 text complexity band proficiently, with scaffolding as needed at the high end of the range.				

Writing

Text Types and Purposes

W.6.1 Write arguments to support claims with clear reasons and relevant evidence.				
a. Introduce claim(s) and organize the reasons and evidence clearly.				
b. Support claim(s) with clear reasons and relevant evidence, using credible sources and demonstrating an understanding of the topic or text.				
c. Use words, phrases, and clauses to clarify the relationships among claim(s) and reasons.				
d. Establish and maintain a formal style.				
e. Provide a concluding statement or section that follows from the argument presented.				
W.6.2 Write informative/explanatory texts to examine a topic and convey ideas, concepts, and information through the selection, organization, and analysis of relevant content.				
a. Introduce a topic; organize ideas, concepts, and information, using strategies such as definition, classification, comparison/contrast, and cause/effect; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension.				
b. Develop the topic with relevant facts, definitions, concrete details, quotations, or other information and examples.				
c. Use appropriate transitions to clarify the relationships among ideas and concepts.				
d. Use precise language and domain-specific vocabulary to inform about or explain the topic.				
e. Establish and maintain a formal style.				
f. Provide a concluding statement or section that follows from the information or explanation presented.				
W.6.3 Write narratives to develop real or imagined experiences or events using effective technique, relevant descriptive details, and well-structured event sequences.				
a. Engage and orient the reader by establishing a context and introducing a narrator and/or characters; organize an event sequence that unfolds naturally and logically.				
b. Use narrative techniques, such as dialogue, pacing, and description, to develop experiences, events, and/or characters.				
c. Use a variety of transition words, phrases, and clauses to convey sequence and signal shifts from one time frame or setting to another.				
d. Use precise words and phrases, relevant descriptive details, and sensory language to convey experiences and events.				
e. Provide a conclusion that follows from the narrated experiences or events.				

Production and Distribution of Writing				
W.6.4 Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)				
W.6.5 With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach				
W.6.6 Use technology, including the Internet, to produce and publish writing as well as to interact and collaborate with others; demonstrate sufficient command of keyboarding skills to type a minimum of three pages in a single sitting.				
Research to Build and Present Knowledge				
W.6.7 Conduct short research projects to answer a question, drawing on several sources and refocusing the inquiry when appropriate.				
W.6.8 Gather relevant information from multiple print and digital sources; assess the credibility of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and providing basic bibliographic information for sources.				
W.6.9 Draw evidence from literary or informational texts to support analysis, reflection, and research.				
a. Apply <i>grade 6 Reading standards</i> to literature (e.g., “Compare and contrast texts in different forms or genres [e.g., stories and poems; historical novels and fantasy stories] in terms of their approaches to similar themes and topics”).				
b. Apply <i>grade 6 Reading standards</i> to literary nonfiction (e.g., “Trace and evaluate the argument and specific claims in a text, distinguishing claims that are supported by reasons and evidence from claims that are not”).				
Range of Writing				
W.6.10 Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.				

Speaking and Listening

Comprehension and Collaboration

SL.6.1 Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly.

a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion.

b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed.

c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion.

d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.

SL.6.2 Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.

SL.6.3 Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.

Presentation of Knowledge and Ideas

SL.6.4 Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.

SL.6.5 Include multimedia components (e.g., graphics, images, music, sound) and visual displays in presentations to clarify information.

SL.6.6 Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.

Language				
Conventions of Standard English				
L.6.1 Demonstrate command of the conventions of Standard English grammar and usage when writing or speaking.				
a. Ensure that pronouns are in the proper case (subjective, objective, possessive).				
b. Use intensive pronouns (e.g., <i>myself</i> , <i>ourselves</i>).				
c. Recognize and correct inappropriate shifts in pronoun number and person.*				
d. Recognize and correct vague pronouns (i.e., ones with unclear or ambiguous antecedents).*				
e. Recognize variations from standard English in their own and others' writing and speaking, and identify and use strategies to improve expression in conventional language				
L.6.2 Demonstrate command of the conventions of Standard English capitalization, punctuation, and spelling when writing.				
a. Use punctuation (commas, parentheses, dashes) to set off nonrestrictive/parenthetical elements.*				
b. Spell correctly.				
L.6.3 Use knowledge of language and its conventions when writing, speaking, reading, or listening.				
a. Vary sentence patterns for meaning, reader/listener interest, and style.*				
b. Maintain consistency in style and tone.				
Knowledge of Language				
L.6.4 Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grade 6 reading and content, choosing flexibly from a range of strategies.				
a. Use context (e.g., the overall meaning of a sentence or paragraph; a word's position or function in a sentence) as a clue to the meaning of a word or phrase.				
b. Use common, grade-appropriate Greek or Latin affixes and roots as clues to the meaning of a word (e.g., <i>audience</i> , <i>auditory</i> , <i>audible</i>).				
c. Consult reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation of a word or determine or clarify its precise meaning or its part of speech.				
d. Verify the preliminary determination of the meaning of a word or phrase (e.g., by checking the inferred meaning in context or in a dictionary).				

Vocabulary Acquisition and Use				
L.6.5 Demonstrate understanding of figurative language, word relationships, and nuances in word meanings.				
a. Interpret figures of speech (e.g., personification) in context.				
b. Use the relationship between particular words (e.g., cause/effect, part/whole, item/category) to better understand each of the words.				
c. Distinguish among the connotations (associations) of words with similar denotations (definitions) (e.g., <i>stingy</i> , <i>scrimping</i> , <i>economical</i> , <i>unwasteful</i> , <i>thrifty</i>).				
L.6.6 Acquire and use accurately grade-appropriate general academic and domain-specific words and phrases; gather vocabulary knowledge when considering a word or phrase important to comprehension or expression.				

Reading Literature				
Key Ideas and Details				
RL.7.1 Cite several pieces of textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.				
RL.7.2 Determine a theme or central idea of a text and analyze its development over the course of the text; provide an objective summary of the text.				
RL.7.3 Analyze how particular elements of a story or drama interact (e.g., how setting shapes the characters or plot).				
Craft and Structure				
RL.7.4 Determine the meaning of words and phrases as they are used in a text, including figurative and connotative meanings; analyze the impact of rhymes and other repetitions of sounds (e.g., alliteration) on a specific verse or stanza of a poem or section of a story or drama.				
RL.7.5 Analyze how a drama's or poem's form or structure (e.g., soliloquy, sonnet) contributes to its meaning.				
RL.7.6 Analyze how an author develops and contrasts the points of view of different.				
Integration of Knowledge and Ideas				
RL.7.7 Compare and contrast a written story, drama, or poem to its audio, filmed, staged, or multimedia version, analyzing the effects of techniques unique to each medium (e.g., lighting, sound, color, or camera focus and angles in a film).				
RL.7.8 (Not applicable to literature)				
RL.7.9 Compare and contrast a fictional portrayal of a time, place, or character and a historical account of the same period as a means of understanding how authors of fiction use or alter history.				
Range of Reading and Level of Text Complexity				
RL.7.10 By the end of the year, read and comprehend literature, including stories, dramas, and poems, in the grades 6–8 text complexity band proficiently, with scaffolding as needed at the high end of the range.				

Reading Informational Text

Key Ideas and Details

RI.7.1 Cite several pieces of textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.				
RI.7.2 Determine two or more central ideas in a text and analyze their development over the course of the text; provide an objective summary of the text.				
RI.7.3 Analyze the interactions between individuals, events, and ideas in a text (e.g., how ideas influence individuals or events, or how individuals influence ideas or events).				

Craft and Structure

RI.7.4 Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings; analyze the impact of a specific word choice on meaning and tone.				
RI.7.5 Analyze the structure an author uses to organize a text, including how the major sections contribute to the whole and to the development of the ideas.				
RI.7.6 Determine an author's point of view or purpose in a text and analyze how the author distinguishes his or her position from that of others.				

Integration of Knowledge and Ideas

RI.7.7 Compare and contrast a text to an audio, video, or multimedia version of the text, analyzing each medium's portrayal of the subject (e.g., how the delivery of a speech affects the impact of the words).				
RI.7.8 Trace and evaluate the argument and specific claims in a text, assessing whether the reasoning is sound and the evidence is relevant and sufficient to support the claims.				
RI.7.9 Analyze how two or more authors writing about the same topic shape their presentations of key information by emphasizing different evidence or advancing different interpretations of facts.				

Range of Reading and Level of Text Complexity

RI.7.10 By the end of the year, read and comprehend literary nonfiction in the grades 6–8 text complexity band proficiently, with scaffolding as needed at the high end of the range.				
--	--	--	--	--

Writing

Text Types and Purposes

W.7.1 Write arguments to support claims with clear reasons and relevant evidence.				
a. Introduce claim(s), acknowledge alternate or opposing claims, and organize the reasons and evidence logically.				
b. Support claim(s) with logical reasoning and relevant evidence, using accurate, credible sources and demonstrating an understanding of the topic or text.				
c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), reasons, and evidence.				
d. Establish and maintain a formal style.				
e. Provide a concluding statement or section that follows from and supports the argument presented.				
W.7.2 Write informative/explanatory texts to examine a topic and convey ideas, concepts, and information through the selection, organization, and analysis of relevant content.				
a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information, using strategies such as definition, classification, comparison/contrast, and cause/effect; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension.				
b. Develop the topic with relevant facts, definitions, concrete details, quotations, or other information and examples.				
c. Use appropriate transitions to create cohesion and clarify the relationships among ideas and concepts.				
d. Use precise language and domain-specific vocabulary to inform about or explain the topic.				
e. Establish and maintain a formal style.				
f. Provide a concluding statement or section that follows from and supports the information or explanation presented.				

W.7.3 Write narratives to develop real or imagined experiences or events using effective technique, relevant descriptive details, and well-structured event sequences.				
a. Engage and orient the reader by establishing a context and point of view and introducing a narrator and/or characters; organize an event sequence that unfolds naturally and logically.				
b. Use narrative techniques, such as dialogue, pacing, and description, to develop experiences, events, and/or characters.				
c. Use a variety of transition words, phrases, and clauses to convey sequence and signal shifts from one time frame or setting to another.				
d. Use precise words and phrases, relevant descriptive details, and sensory language to capture the action and convey experiences and events.				
e. Provide a conclusion that follows from and reflects on the narrated experiences or events.				
Production and Distribution of Writing				
W.7.4 Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)				
W.7.5 With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.				
W.7.6 Use technology, including the Internet, to produce and publish writing and link to and cite sources as well as to interact and collaborate with others, including linking to and citing sources.				
Research to Build and Present Knowledge				
W.7.7 Conduct short research projects to answer a question, drawing on several sources and generating additional related, focused questions for further research and investigation.				
W.7.8 Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.				

W.7.9 Draw evidence from literary or informational texts to support analysis, reflection, and research.				
a. Apply <i>grade 7 Reading standards</i> to literature (e.g., “Compare and contrast a fictional portrayal of a time, place, or character and a historical account of the same period as a means of understanding how authors of fiction use or alter history”).				
b. Apply <i>grade 7 Reading standards</i> to literary nonfiction (e.g. “Trace and evaluate the argument and specific claims in a text, assessing whether the reasoning is sound and the evidence is relevant and sufficient to support the claims”).				
Range of Writing				
W.7.10 Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.				

Speaking and Listening

Comprehension and Collaboration

SL.7.1 Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly.				
a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion.				
b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed.				
c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the discussion back on topic as needed.				
d. Acknowledge new information expressed by others and, when warranted, modify their own views.				
SL.7.2 Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas clarify a topic, text, or issue under study.				
SL.7.3 Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence.				

Presentation of Knowledge and Ideas

SL.7.4 Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use appropriate eye contact, adequate volume, and clear pronunciation.				
SL.7.5 Include multimedia components and visual displays in presentations to clarify claims and findings and emphasize salient points.				
SL.7.6 Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.				

Language				
Conventions of Standard English				
L.7.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.				
a. Explain the function of phrases and clauses in general and their function in specific sentences.				
b. Choose among simple, compound, complex, and compound-complex sentences to signal differing relationships among ideas.				
c. Place phrases and clauses within a sentence, recognizing and correcting misplaced and dangling modifiers.*				
L.7.2 Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing.				
a. Use a comma to separate coordinate adjectives (e.g., <i>It was a fascinating, enjoyable movie</i> but not <i>He wore an old[,] green shirt</i>).				
b. Spell correctly.				
L.7.3 Use knowledge of language and its conventions when writing, speaking, reading, or listening.				
a. Choose language that expresses ideas precisely and concisely, recognizing and eliminating wordiness and redundancy.*				
Knowledge of Language				
L.7.4 Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on <i>grade 7 reading and content</i> , choosing flexibly from a range of strategies.				
a. Use context (e.g., the overall meaning of a sentence or paragraph; a word's position or function in a sentence) as a clue to the meaning of a word or phrase.				
b. Use common, grade-appropriate Greek or Latin affixes and roots as clues to the meaning of a word (e.g., <i>belligerent</i> , <i>bellicose</i> , <i>rebel</i>).				
c. Consult general and specialized reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation of a word or determine or clarify its precise meaning or its part of speech.				
d. Verify the preliminary determination of the meaning of a word or phrase (e.g., by checking the inferred meaning in context or in a dictionary).				

Vocabulary Acquisition and Use				
L.7.5 Demonstrate understanding of figurative language, word relationships, and nuances in word meanings.				
a. Interpret figures of speech (e.g., literary, biblical, and mythological allusions) in context.				
b. Use the relationship between particular words (e.g., synonym/antonym, analogy) to better understand each of the words.				
c. Distinguish among the connotations (associations) of words with similar denotations (definitions) (e.g., <i>refined</i> , <i>respectful</i> , <i>polite</i> , <i>diplomatic</i> , <i>condescending</i>).				
L.7.6 Acquire and use accurately grade-appropriate general academic and domain-specific words and phrases; gather vocabulary knowledge when considering a word or phrase important to comprehension or expression.				

Reading Literature				
Key Ideas and Details				
RL.8.1 Cite the textual evidence that most strongly supports an analysis of what the text says explicitly as well as inferences drawn from the text.				
RL.8.2 Determine a theme or central idea of a text and analyze its development over the course of the text, including its relationship to the characters, setting, and plot; provide an objective summary of the text.				
RL.8.3 Analyze how particular lines of dialogue or incidents in a story or drama propel the action, reveal aspects of a character, or provoke a decision.				
Craft and Structure				
RL.8.4 Determine the meaning of words and phrases as they are used in a text, including figurative and connotative meanings; analyze the impact of specific word choices on meaning and tone, including analogies or allusions to other texts.				
RL.8.5 Compare and contrast the structure of two or more texts and analyze how the differing structure of each text contributes to its meaning and style.				
RL.8.6 Analyze how differences in the points of view of the characters and the audience or reader (e.g., created through the use of dramatic irony) create such effects as suspense or humor.				
Integration of Knowledge and Ideas				
RL.8.7 Analyze the extent to which a filmed or live production of a story or drama stays faithful to or departs from the text or script, evaluating the choices made by the director or actors.				
RL.8.8 (Not applicable to literature)				
RL.8.9 Analyze how a modern work of fiction draws on themes, patterns of events, or character types from myths, traditional stories, or religious works such as the Bible, including describing how the material is rendered new				
Range of Reading and Level of Text Complexity				
RL.8.10 By the end of the year, read and comprehend literature, including stories, dramas, and poems, at the high end of grades 6–8 text complexity band independently and proficiently.				

Reading Informational Text

Key Ideas and Details				
RI.8.1	Cite the textual evidence that most strongly supports an analysis of what the text says explicitly as well as inferences drawn from the text.			
RI.8.2	Determine a central idea of a text and analyze its development over the course of the text, including its relationship to supporting ideas; provide an objective summary of the text.			
RI.8.3	Analyze how a text makes connections among and distinctions between individuals, ideas, or events (e.g., through comparisons, analogies, or categories).			
Craft and Structure				
RI.8.4	Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings; analyze the impact of specific word choices on meaning and tone, including analogies or allusions to other texts.			
RI.8.5	Analyze in detail the structure of a specific paragraph in a text, including the role of particular sentences in developing and refining a key concept.			
RI.8.6	Determine an author's point of view or purpose in a text and analyze how the author acknowledges and responds to conflicting evidence or viewpoints.			
Integration of Knowledge and Ideas				
RI.8.7	Evaluate the advantages and disadvantages of using different mediums (e.g., print or digital text, video, multimedia) to present a particular topic or idea.			
RI.8.8	Delineate and evaluate the argument and specific claims in a text, assessing whether the reasoning is sound and the evidence is relevant and sufficient; recognize when irrelevant evidence is introduced.			
RI.8.9	Analyze a case in which two or more texts provide conflicting information on the same topic and identify where the texts disagree on matters of fact or interpretation.			
Range of Reading and Level of Text Complexity				
RI.8.10	By the end of the year, read and comprehend literary nonfiction at the high end of the grades 6–8 text complexity band independently and proficiently.			

Writing

Text Types and Purposes

W.8.1 Write arguments to support claims with clear reasons and relevant evidence.				
a. Introduce claim(s), acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically.				
b. Support claim(s) with logical reasoning and relevant evidence, using accurate, credible sources and demonstrating an understanding of the topic or text.				
c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence.				
d. Establish and maintain a formal style.				
e. Provide a concluding statement or section that follows from and supports the argument presented.				
W.8.2 Write informative/explanatory texts to examine a topic and convey ideas, concepts, and information through the selection, organization, and analysis of relevant content.				
a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension.				
b. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples.				
c. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts.				
d. Use precise language and domain-specific vocabulary to inform about or explain the topic.				
e. Establish and maintain a formal style.				
f. Provide a concluding statement or section that follows from and supports the information or explanation presented.				

W.8.3 Write narratives to develop real or imagined experiences or events using effective technique, relevant descriptive details, and well-structured event sequences.				
a. Engage and orient the reader by establishing a context and point of view and introducing a narrator and/or characters; organize an event sequence that unfolds naturally and logically.				
b. Use narrative techniques, such as dialogue, pacing, description, and reflection, to develop experiences, events, and/or characters.				
c. Use a variety of transition words, phrases, and clauses to convey sequence, signal shifts from one time frame or setting to another, and show the relationships among experiences and events.				
d. Use precise words and phrases, relevant descriptive details, and sensory language to capture the action and convey experiences and events.				
e. Provide a conclusion that follows from and reflects on the narrated experiences or events.				
Production and Distribution of Writing				
W.8.4 Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)				
W.8.5 With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.				
W.8.6 Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas efficiently as well as to interact and collaborate with others.				
Research to Build and Present Knowledge				
W.8.7 Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.				
W.8.8 Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.				

W.8.9 Draw evidence from literary or informational texts to support analysis, reflection, and research.				
a. Apply <i>grade 8 Reading standards</i> to literature (e.g., “Analyze how a modern work of fiction draws on themes, patterns of events, or character types from myths, traditional stories, or religious works such as the Bible, including describing how the material is rendered new”).				
b. Apply <i>grade 8 Reading standards</i> to literary nonfiction (e.g., “Delineate and evaluate the argument and specific claims in a text, assessing whether the reasoning is sound and the evidence is relevant and sufficient; recognize when irrelevant evidence is introduced”).				
Range of Writing				
W.8.10 Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.				

Speaking and Listening

Comprehension and Collaboration

SL.8.1 Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and issues, building on others' ideas and expressing their own clearly.				
a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion.				
b. Follow rules for collegial discussions and decision-making, track progress toward specific goals and deadlines, and define individual roles as needed.				
c. Pose questions that connect the ideas of several speakers and respond to others' questions and comments with relevant evidence, observations, and ideas.				
d. Acknowledge new information expressed by others, and, when warranted, qualify or justify their own views in light of the evidence presented.				
SL.8.2 Analyze the purpose of information presented in diverse media and formats (e.g., visually, quantitatively, orally) and evaluate the motives (e.g., social, commercial, political) behind its presentation.				
SL.8.3 Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and relevance and sufficiency of the evidence and identifying when irrelevant evidence is introduced.				

Presentation of Knowledge and Ideas

SL.8.4 Present claims and findings, emphasizing salient points in a focused, coherent manner with relevant evidence, sound valid reasoning, and well-chosen details; use appropriate eye contact, adequate volume, and clear pronunciation.				
SL.8.5 Integrate multimedia and visual displays into presentations to clarify information, strengthen claims and evidence, and add interest.				
SL.8.6 Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.				

Language				
Conventions of Standard English				
L.8.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.				
a. Explain the function of verbals (gerunds, participles, infinitives) in general and their function in particular sentences.				
b. Form and use verbs in the active and passive voice.				
c. Form and use verbs in the indicative, imperative, interrogative, conditional, and subjunctive mood.				
d. Recognize and correct inappropriate shifts in verb voice and mood.*				
L.8.2 Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing.				
a. Use punctuation (comma, ellipsis, dash) to indicate a pause or break.				
b. Use an ellipsis to indicate an omission.				
c. Spell correctly.				
L.8.3 Use knowledge of language and its conventions when writing, speaking, reading, or listening.				
a. Use verbs in the active and passive voice and in the conditional and subjunctive mood to achieve particular effects (e.g., emphasizing the actor or the action; expressing uncertainty or describing a state contrary to fact).				
Knowledge of Language				
L.8.4 Determine or clarify the meaning of unknown and multiple-meaning words or phrases based on <i>grade 8 reading and content</i> , choosing flexibly from a range of strategies.				
a. Use context (e.g., the overall meaning of a sentence or paragraph; a word's position or function in a sentence) as a clue to the meaning of a word or phrase.				
b. Use common, grade-appropriate Greek or Latin affixes and roots as clues to the meaning of a word (e.g., <i>precede</i> , <i>recede</i> , <i>secede</i>).				
c. Consult general and specialized reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation of a word or determine or clarify its precise meaning or its part of speech.				
d. Verify the preliminary determination of the meaning of a word or phrase (e.g., by checking the inferred meaning in context or in a dictionary).				

Vocabulary Acquisition and Use				
L.8.5 Demonstrate understanding of figurative language, word relationships, and nuances in word meanings.				
a. Interpret figures of speech (e.g. verbal irony, puns) in context.				
b. Use the relationship between particular words to better understand each of the words.				
c. Distinguish among the connotations (associations) of words with similar denotations (definitions) (e.g., <i>bullheaded</i> , <i>willful</i> , <i>firm</i> , <i>persistent</i> , <i>resolute</i>).				
L.8.6 Acquire and use accurately grade-appropriate general academic and domain-specific words and phrases; gather vocabulary knowledge when considering a word or phrase important to comprehension or expression.

Domain: Counting & Cardinality (K)

Grade	Common Core State Standards
K	<p>Know number names and the count sequence.</p> <p>K.CC.1. Count to 100 by ones and by tens.</p> <p>K.CC.2. Count forward beginning from a given number within the known sequence (instead of having to begin at 1).</p> <p>K.CC.3. Write numbers from 0 to 20. Represent a number of objects with a written numeral 0-20 (with 0 representing a count of no objects).</p> <p>Count to tell the number of objects.</p> <p>K.CC.4. Understand the relationship between numbers and quantities; connect counting to cardinality.</p> <p>K.CC.5. Count to answer “how many?” questions about as many as 20 things arranged in a line, a rectangular array, or a circle, or as many as 10 things in a scattered configuration; given a number from 1–20, count out that many objects.</p> <p>Compare numbers.</p> <p>K.CC.6. Identify whether the number of objects in one group is greater than, less than, or equal to the number of objects in another group, e.g., by using matching and counting strategies.¹</p> <p>K.CC.7. Compare two numbers between 1 and 10 presented as written numerals.</p>

Domain: Number and Operations in Base Ten (K-5)

Grade	Common Core State Standard
K	<p>Work with numbers 11-19 to gain foundations for place value.</p> <p>K.NBT.1. Compose and decompose numbers from 11 to 19 into ten ones and some further ones, e.g., by using objects or drawings, and record each composition or decomposition by a drawing or equation (such as $18 = 10 + 8$); understand that these numbers are composed of ten ones and one, two, three, four, five, six, seven, eight, or nine ones.</p>
1	<p>Extend the counting sequence.</p> <p>1.NBT.1. Count to 120, starting at any number less than 120. In this range, read and write numerals and represent a number of objects with a written numeral.</p> <p>Understand place value.</p> <p>1.NBT.2. Understand that the two digits of a two-digit number represent amounts of tens and ones. Understand the following as special cases:</p> <p>1.NBT.3. Compare two two-digit numbers based on meanings of the tens and ones digits, recording the results of comparisons with the symbols $>$, $=$, and $<$.</p> <p>Use place value understanding and properties of operations to add and subtract.</p> <p>1.NBT.4. Add within 100, including adding a two-digit number and a one-digit number, and adding a two-digit number and a multiple of 10, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning used. Understand that in adding two-digit numbers, one adds tens and tens, ones and ones; and sometimes it is necessary to compose a ten.</p> <p>1.NBT.5. Given a two-digit number, mentally find 10 more or 10 less than the number, without having to count; explain the reasoning used.</p> <p>1.NBT.6. Subtract multiples of 10 in the range 10-90 from multiples of 10 in the range 10-90 (positive or zero differences), using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning used.</p>

2	<p>Understand place value.</p> <p>2.NBT.1. Understand that the three digits of a three-digit number represent amounts of hundreds, tens, and ones; e.g., 706 equals 7 hundreds, 0 tens, and 6 ones. Understand the following as special cases:</p> <p>2.NBT.2. Count within 1000; skip-count by 5s, 10s, and 100s.</p> <p>2.NBT.3. Read and write numbers to 1000 using base-ten numerals, number names, and expanded form.</p> <p>2.NBT.4. Compare two three-digit numbers based on meanings of the hundreds, tens, and ones digits, using $>$, $=$, and $<$ symbols to record the results of comparisons.</p> <p>Use place value understanding and properties of operations to add and subtract.</p> <p>2.NBT.5. Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.</p> <p>2.NBT.6. Add up to four two-digit numbers using strategies based on place value and properties of operations.</p> <p>2.NBT.7. Add and subtract within 1000, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method. Understand that in adding or subtracting three-digit numbers, one adds or subtracts hundreds and hundreds, tens and tens, ones and ones; and sometimes it is necessary to compose or decompose tens or hundreds.</p> <p>2.NBT.8. Mentally add 10 or 100 to a given number 100–900, and mentally subtract 10 or 100 from a given number 100–900.</p> <p>2.NBT.9. Explain why addition and subtraction strategies work, using place value and the properties of operations.¹</p>
3	<p>Use place value understanding and properties of operations to perform multi-digit arithmetic.¹</p> <p>3.NBT.1. Use place value understanding to round whole numbers to the nearest 10 or 100.</p> <p>3.NBT.2. Fluently add and subtract within 1000 using strategies and algorithms based on place value, properties of operations, and/or the relationship between addition and subtraction.</p> <p>3.NBT.3. Multiply one-digit whole numbers by multiples of 10 in the range 10–90 (e.g., 9×80, 5×60) using strategies based on place value and properties of operations.</p>
4	<p>Generalize place value understanding for multi-digit whole numbers.</p> <p>4.NBT.1. Recognize that in a multi-digit whole number, a digit in one place represents ten times what it represents in the place to its right. <i>For example, recognize that $700 \div 70 = 10$ by applying concepts of place value and division.</i></p> <p>4.NBT.2. Read and write multi-digit whole numbers using base-ten numerals, number names, and expanded form. Compare two multi-digit numbers based on meanings of the digits in each place, using $>$, $=$, and $<$ symbols to record the results of comparisons.</p> <p>4.NBT.3. Use place value understanding to round multi-digit whole numbers to any place.</p> <p>Use place value understanding and properties of operations to perform multi-digit arithmetic.</p> <p>4.NBT.4. Fluently add and subtract multi-digit whole numbers using the standard algorithm.</p>

	<p>4.NBT.5. Multiply a whole number of up to four digits by a one-digit whole number, and multiply two two-digit numbers, using strategies based on place value and the properties of operations. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models.</p> <p>4.NBT.6. Find whole-number quotients and remainders with up to four-digit dividends and one-digit divisors, using strategies based on place value, the properties of operations, and/or the relationship between multiplication and division. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models.</p>
5	<p>Understand the place value system.</p> <p>5.NBT.1. Recognize that in a multi-digit number, a digit in one place represents 10 times as much as it represents in the place to its right and 1/10 of what it represents in the place to its left.</p> <p>5.NBT.2. Explain patterns in the number of zeros of the product when multiplying a number by powers of 10, and explain patterns in the placement of the decimal point when a decimal is multiplied or divided by a power of 10. Use whole-number exponents to denote powers of 10.</p> <p>5.NBT.3. Read, write, and compare decimals to thousandths.</p> <p>5.NBT.4. Use place value understanding to round decimals to any place.</p> <p>Perform operations with multi-digit whole numbers and with decimals to hundredths.</p> <p>5.NBT.5. Fluently multiply multi-digit whole numbers using the standard algorithm.</p> <p>5.NBT.6. Find whole-number quotients of whole numbers with up to four-digit dividends and two-digit divisors, using strategies based on place value, the properties of operations, and/or the relationship between multiplication and division. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models.</p> <p>5.NBT.7. Add, subtract, multiply, and divide decimals to hundredths, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning used.</p>

Domain: Ratios and Proportional Relationships (6-7)

Grade	Common Core State Standard
6	<p>Understand ratio concepts and use ratio reasoning to solve problems.</p> <p>6.RP.1. Understand the concept of a ratio and use ratio language to describe a ratio relationship between two quantities. <i>For example, “The ratio of wings to beaks in the bird house at the zoo was 2:1, because for every 2 wings there was 1 beak.” “For every vote candidate A received, candidate C received nearly three votes.”</i></p> <p>6.RP.2. Understand the concept of a unit rate a/b associated with a ratio $a:b$ with $b \neq 0$, and use rate language in the context of a ratio relationship. <i>For example, “This recipe has a ratio of 3 cups of flour to 4 cups of sugar, so there is $3/4$ cup of flour for each cup of sugar.” “We paid \$75 for 15 hamburgers, which is a rate of \$5 per hamburger.”¹</i></p> <p>6.RP.3. Use ratio and rate reasoning to solve real-world and mathematical problems, e.g., by reasoning about tables of equivalent ratios, tape diagrams, double number line diagrams, or equations.</p>
7	<p>Analyze proportional relationships and use them to solve real-world and mathematical problems.</p> <p>7.RP.1. Compute unit rates associated with ratios of fractions, including ratios of lengths, areas and other quantities measured in like or different units. <i>For example, if a person walks $1/2$ mile in each $1/4$ hour, compute the unit rate as the complex fraction $^{1/2}/_{1/4}$ miles per hour, equivalently 2 miles per hour.</i></p> <p>7.RP.2. Recognize and represent proportional relationships between quantities.</p> <p>7.RP.3. Use proportional relationships to solve multistep ratio and percent problems. Examples: simple interest, tax, markups and markdowns, gratuities and commissions, fees, percent increase and decrease, percent error.</p>

Domain: Number and Operations- Fractions (3-5)

Grade	Common Core State Standard
3	<p>Develop understanding of fractions as numbers.</p> <p>3.NF.1. Understand a fraction $1/b$ as the quantity formed by 1 part when a whole is partitioned into b equal parts; understand a fraction a/b as the quantity formed by a parts of size $1/b$.</p> <p>3.NF.2. Understand a fraction as a number on the number line; represent fractions on a number line diagram.</p> <p>3.NF.3. Explain equivalence of fractions in special cases, and compare fractions by reasoning about their size.</p>
4	<p>Extend understanding of fraction equivalence and ordering.</p> <p>4.NF.1. Explain why a fraction a/b is equivalent to a fraction $(n \times a)/(n \times b)$ by using visual fraction models, with attention to how the number and size of the parts differ even though the two fractions themselves are the same size. Use this principle to recognize and generate equivalent fractions.</p> <p>4.NF.2. Compare two fractions with different numerators and different denominators, e.g., by creating common denominators or numerators, or by comparing to a benchmark fraction such as $1/2$. Recognize that comparisons are valid only when the two fractions refer to the same whole. Record the results of comparisons with symbols $>$, $=$, or $<$, and justify the conclusions, e.g., by using a visual fraction model.</p> <p>Build fractions from unit fractions by applying and extending previous understandings of operations on whole numbers.</p> <p>4.NF.3. Understand a fraction a/b with $a > 1$ as a sum of fractions $1/b$.</p> <p>4.NF.4. Apply and extend previous understandings of multiplication to multiply a fraction by a whole number.</p> <p>Understand decimal notation for fractions, and compare decimal fractions.</p> <p>4.NF.5. Express a fraction with denominator 10 as an equivalent fraction with denominator 100, and use this technique to add two fractions with respective denominators 10 and 100.² For example, express $3/10$ as $30/100$, and add $3/10 + 4/100 = 34/100$.</p> <p>4.NF.6. Use decimal notation for fractions with denominators 10 or 100. For example, rewrite 0.62 as $62/100$; describe a length as 0.62 meters; locate 0.62 on a number line diagram.</p> <p>4.NF.7. Compare two decimals to hundredths by reasoning about their size. Recognize that comparisons are valid only when the two decimals refer to the same whole. Record the results of comparisons with the symbols $>$, $=$, or $<$, and justify the conclusions, e.g., by using a visual model.</p>
5	<p>Use equivalent fractions as a strategy to add and subtract fractions.</p> <p>5.NF.1. Add and subtract fractions with unlike denominators (including mixed numbers) by replacing given fractions with equivalent fractions in such a way as to produce an equivalent sum or difference of fractions with like denominators. For example, $2/3 + 5/4 = 8/12 + 15/12 = 23/12$. (In general, $a/b + c/d = (ad + bc)/bd$.)</p> <p>5.NF.2. Solve word problems involving addition and subtraction of fractions referring to the same whole, including cases of unlike denominators, e.g., by using visual fraction models or equations to represent the problem. Use benchmark fractions and number sense of fractions to estimate mentally and assess the reasonableness of answers. For example, recognize an incorrect result $2/5 + 1/2 = 3/7$, by observing that $3/7 < 1/2$.</p>

	<p>Apply and extend previous understandings of multiplication and division to multiply and divide fractions.</p> <p>5.NF.3. Interpret a fraction as division of the numerator by the denominator ($a/b = a \div b$). Solve word problems involving division of whole numbers leading to answers in the form of fractions or mixed numbers, e.g., by using visual fraction models or equations to represent the problem. <i>For example, interpret $3/4$ as the result of dividing 3 by 4, noting that $3/4$ multiplied by 4 equals 3, and that when 3 wholes are shared equally among 4 people each person has a share of size $3/4$. If 9 people want to share a 50-pound sack of rice equally by weight, how many pounds of rice should each person get? Between what two whole numbers does your answer lie?</i></p> <p>5.NF.4. Apply and extend previous understandings of multiplication to multiply a fraction or whole number by a fraction.</p> <p>5.NF.5. Interpret multiplication as scaling (resizing), by:</p> <p>5.NF.6. Solve real world problems involving multiplication of fractions and mixed numbers, e.g., by using visual fraction models or equations to represent the problem.</p> <p>5.NF.7. Apply and extend previous understandings of division to divide unit fractions by whole numbers and whole numbers by unit fractions.¹</p>
--	--

Domain: The Number System (6-8)

Grade	Common Core State Standard
6	<p>Apply and extend previous understandings of multiplication and division to divide fractions by fractions.</p> <p>6.NS.1. Interpret and compute quotients of fractions, and solve word problems involving division of fractions by fractions, e.g., by using visual fraction models and equations to represent the problem. <i>For example, create a story context for $(2/3) \div (3/4)$ and use a visual fraction model to show the quotient; use the relationship between multiplication and division to explain that $(2/3) \div (3/4) = 8/9$ because $3/4$ of $8/9$ is $2/3$. (In general, $(a/b) \div (c/d) = ad/bc$.) How much chocolate will each person get if 3 people share $1/2$ lb of chocolate equally? How many $3/4$-cup servings are in $2/3$ of a cup of yogurt? How wide is a rectangular strip of land with length $3/4$ mi and area $1/2$ square mi? Compute fluently with multi-digit numbers and find common factors and multiples.</i></p> <p>Compute fluently with multi-digit numbers and find common factors and multiples.</p> <p>6.NS.2. Fluently divide multi-digit numbers using the standard algorithm.</p> <p>6.NS.3. Fluently add, subtract, multiply, and divide multi-digit decimals using the standard algorithm for each operation.</p> <p>6.NS.4. Find the greatest common factor of two whole numbers less than or equal to 100 and the least common multiple of two whole numbers less than or equal to 12. Use the distributive property to express a sum of two whole numbers 1–100 with a common factor as a multiple of a sum of two whole numbers with no common factor. <i>For example, express $36 + 8$ as $4(9 + 2)$. Apply and extend previous understandings of numbers to the system of rational numbers.</i></p> <p>Apply and extend previous understandings of numbers to the system of rational numbers.</p> <p>6.NS.5. Understand that positive and negative numbers are used together to describe quantities having opposite directions or values (e.g., temperature above/below zero, elevation above/below sea level, credits/debits, positive/negative electric charge); use positive and negative numbers to represent quantities in real-world contexts, explaining the meaning of 0 in each situation.</p> <p>6.NS.6. Understand a rational number as a point on the number line. Extend number line diagrams and coordinate axes familiar from previous grades to represent points on the line and in the plane with negative number coordinates.</p> <p>6.NS.7. Understand ordering and absolute value of rational numbers.</p> <p>6.NS.8. Solve real-world and mathematical problems by graphing points in all four quadrants of the coordinate plane. Include use of coordinates and absolute value to find distances between points with the same first coordinate or the same second coordinate.</p>
7	<p>Apply and extend previous understandings of operations with fractions to add, subtract, multiply, and divide rational numbers.</p> <p>7.NS.1. Apply and extend previous understandings of addition and subtraction to add and subtract rational numbers; represent addition and subtraction on a horizontal or vertical number line diagram.</p> <p>7.NS.2. Apply and extend previous understandings of multiplication and division and of fractions to multiply and divide rational numbers.</p> <p>7.NS.3. Solve real-world and mathematical problems involving the four operations with</p>

	rational numbers.
8	<p>Know that there are numbers that are not rational, and approximate them by rational numbers.</p> <p>8.NS.1. Know that numbers that are not rational are called irrational. Understand informally that every number has a decimal expansion; for rational numbers show that the decimal expansion repeats eventually, and convert a decimal expansion which repeats eventually into a rational number.</p> <p>8.NS.2. Use rational approximations of irrational numbers to compare the size of irrational numbers, locate them approximately on a number line diagram, and estimate the value of expressions (e.g., π^2). <i>For example, by truncating the decimal expansion of $\sqrt{2}$, show that $\sqrt{2}$ is between 1 and 2, then between 1.4 and 1.5, and explain how to continue on to get better approximations.</i></p>

Domain: Number & Quantity (HS)

Sub Domain: The Real Number System

Grade	Common Core State Standards
HS	<p>Extend the properties of exponents to rational exponents.</p> <p>N-RN.1. Explain how the definition of the meaning of rational exponents follows from extending the properties of integer exponents to those values, allowing for a notation for radicals in terms of rational exponents. <i>For example, we define $5^{1/3}$ to be the cube root of 5 because we want $(5^{1/3})^3 = 5^{(1/3)3}$ to hold, so $(5^{1/3})^3$ must equal 5.</i></p> <p>N-RN.2. Rewrite expressions involving radicals and rational exponents using the properties of exponents.</p> <p>Use properties of rational and irrational numbers.</p> <p>N-RN.3. Explain why the sum or product of two rational numbers is rational; that the sum of a rational number and an irrational number is irrational; and that the product of a nonzero rational number and an irrational number is irrational.</p>

Domain: Number & Quantity (HS)

Sub Domain: Quantities

Grade	Common Core State Standards
HS	<p>Reason quantitatively and use units to solve problems.</p> <p>N-Q.1. Use units as a way to understand problems and to guide the solution of multi-step problems; choose and interpret units consistently in formulas; choose and interpret the scale and the origin in graphs and data displays.</p> <p>N-Q.2. Define appropriate quantities for the purpose of descriptive modeling.</p> <p>N-Q.3. Choose a level of accuracy appropriate to limitations on measurement when reporting quantities.</p>

Domain: Number & Quantity (HS)

Sub Domain: The Complex Number System

Grade	Common Core State Standards
HS	<p>Perform arithmetic operations with complex numbers.</p> <p>N-CN.1. Know there is a complex number i such that $i^2 = -1$, and every complex number has the form $a + bi$ with a and b real.</p> <p>N-CN.2. Use the relation $i^2 = -1$ and the commutative, associative, and distributive properties to add, subtract, and multiply complex numbers.</p> <p>N-CN.3. (+) Find the conjugate of a complex number; use conjugates to find moduli and quotients of complex numbers.</p> <p>Represent complex numbers and their operations on the complex plane.</p> <p>N-CN.4. (+) Represent complex numbers on the complex plane in rectangular and polar form (including real and imaginary numbers), and explain why the rectangular and polar forms of a given complex number represent the same number.</p> <p>N-CN.5. (+) Represent addition, subtraction, multiplication, and conjugation of complex numbers geometrically on the complex plane; use properties of this representation for computation. <i>For example, $(-1 + \sqrt{3}i)^3 = 8$ because $(-1 + \sqrt{3}i)$ has modulus 2 and argument 120°.</i></p> <p>N-CN.6. (+) Calculate the distance between numbers in the complex plane as the modulus of the difference, and the midpoint of a segment as the average of the numbers at its endpoints.</p> <p>Use complex numbers in polynomial identities and equations.</p> <p>N-CN.7. Solve quadratic equations with real coefficients that have complex solutions.</p> <p>N-CN.8. (+) Extend polynomial identities to the complex numbers. <i>For example, rewrite $x^2 + 4$ as $(x + 2i)(x - 2i)$.</i></p> <p>N-CN.9. (+) Know the Fundamental Theorem of Algebra; show that it is true for quadratic polynomials.</p>

Domain: Number & Quantity (HS)

Sub Domain: Vector & Matrix Quantities

Grade	Common Core State Standards
HS	<p>Represent and model with vector quantities.</p> <p>N-VM.1. (+) Recognize vector quantities as having both magnitude and direction. Represent vector quantities by directed line segments, and use appropriate symbols for vectors and their magnitudes (e.g., \mathbf{v}, \mathbf{v}, $\ \mathbf{v}\$, v).</p> <p>N-VM.2. (+) Find the components of a vector by subtracting the coordinates of an initial point from the coordinates of a terminal point.</p> <p>N-VM.3. (+) Solve problems involving velocity and other quantities that can be represented by vectors.</p> <p>Perform operations on vectors.</p> <p>N-VM.4. (+) Add and subtract vectors.</p> <p>N-VM.5. (+) Multiply a vector by a scalar.</p> <p>Perform operations on matrices and use matrices in applications.</p> <p>N-VM.6. (+) Use matrices to represent and manipulate data, e.g., to represent payoffs or incidence relationships in a network.</p> <p>N-VM.7. (+) Multiply matrices by scalars to produce new matrices, e.g., as when all of the payoffs in a game are doubled.</p> <p>N-VM.8. (+) Add, subtract, and multiply matrices of appropriate dimensions.</p> <p>N-VM.9. (+) Understand that, unlike multiplication of numbers, matrix multiplication for square matrices is not a commutative operation, but still satisfies the associative and distributive properties.</p> <p>N-VM.10. (+) Understand that the zero and identity matrices play a role in matrix addition and multiplication similar to the role of 0 and 1 in the real numbers. The determinant of a square matrix is nonzero if and only if the matrix has a multiplicative inverse.</p> <p>N-VM.11. (+) Multiply a vector (regarded as a matrix with one column) by a matrix of suitable dimensions to produce another vector. Work with matrices as transformations of vectors.</p> <p>N-VM.12. (+) Work with 2×2 matrices as a transformations of the plane, and interpret the absolute value of the determinant in terms of area.</p>

Domain: Operations and Algebraic Thinking (K-5)

Grade	Common Core State Standard
K	<p>Understand addition as putting together and adding to, and understand subtraction as taking apart and taking from.</p> <p>K.OA.1. Represent addition and subtraction with objects, fingers, mental images, drawings¹, sounds (e.g., claps), acting out situations, verbal explanations, expressions, or equations.</p> <p>K.OA.2. Solve addition and subtraction word problems, and add and subtract within 10, e.g., by using objects or drawings to represent the problem.</p> <p>K.OA.3. Decompose numbers less than or equal to 10 into pairs in more than one way, e.g., by using objects or drawings, and record each decomposition by a drawing or equation (e.g., $5 = 2 + 3$ and $5 = 4 + 1$).</p> <p>K.OA.4. For any number from 1 to 9, find the number that makes 10 when added to the given number, e.g., by using objects or drawings, and record the answer with a drawing or equation.</p> <p>K.OA.5. Fluently add and subtract within 5.</p>
1	<p>Represent and solve problems involving addition and subtraction.</p> <p>1.OA.1. Use addition and subtraction within 20 to solve word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions, e.g., by using objects, drawings, and equations with a symbol for the unknown number to represent the problem.¹</p> <p>1.OA.2. Solve word problems that call for addition of three whole numbers whose sum is less than or equal to 20, e.g., by using objects, drawings, and equations with a symbol for the unknown number to represent the problem.</p> <p>Understand and apply properties of operations and the relationship between addition and subtraction.</p> <p>1.OA.3. Apply properties of operations as strategies to add and subtract.² <i>Examples: If $8 + 3 = 11$ is known, then $3 + 8 = 11$ is also known. (Commutative property of addition.) To add $2 + 6 + 4$, the second two numbers can be added to make a ten, so $2 + 6 + 4 = 2 + 10 = 12$. (Associative property of addition.)</i></p> <p>1.OA.4. Understand subtraction as an unknown-addend problem. <i>For example, subtract $10 - 8$ by finding the number that makes 10 when added to 8. Add and subtract within 20.</i></p> <p>Add and subtract within 20.</p> <p>1.OA.5. Relate counting to addition and subtraction (e.g., by counting on 2 to add 2).</p> <p>1.OA.6. Add and subtract within 20, demonstrating fluency for addition and subtraction within 10. Use strategies such as counting on; making ten (e.g., $8 + 6 = 8 + 2 + 4 = 10 + 4 = 14$); decomposing a number leading to a ten (e.g., $13 - 4 = 13 - 3 - 1 = 10 - 1 = 9$); using the relationship between addition and subtraction (e.g., knowing that $8 + 4 = 12$, one knows $12 - 8 = 4$); and creating equivalent but easier or known sums (e.g., adding $6 + 7$ by creating the known equivalent $6 + 6 + 1 = 12 + 1 = 13$).</p> <p>Work with addition and subtraction equations.</p> <p>1.OA.7. Understand the meaning of the equal sign, and determine if equations involving addition and subtraction are true or false. For example, which of the following equations are true and which are false? $6 = 6$, $7 = 8 - 1$, $5 + 2 = 2 + 5$, $4 + 1 = 5 + 2$.</p> <p>1.OA.8. Determine the unknown whole number in an addition or subtraction equation relating</p>

	three whole numbers. <i>For example, determine the unknown number that makes the equation true in each of the equations $8 + ? = 11$, $5 = _ - 3$, $6 + 6 = _$.</i>
2	<p>Represent and solve problems involving addition and subtraction.</p> <p>2.OA.1. Use addition and subtraction within 100 to solve one- and two-step word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.¹</p> <p>Add and subtract within 20.</p> <p>2.OA.2. Fluently add and subtract within 20 using mental strategies.² By end of Grade 2, know from memory all sums of two one-digit numbers.</p> <p>Work with equal groups of objects to gain foundations for multiplication.</p> <p>2.OA.3. Determine whether a group of objects (up to 20) has an odd or even number of members, e.g., by pairing objects or counting them by 2s; write an equation to express an even number as a sum of two equal addends.</p> <p>2.OA.4. Use addition to find the total number of objects arranged in rectangular arrays with up to 5 rows and up to 5 columns; write an equation to express the total as a sum of equal addends.</p>
3	<p>Represent and solve problems involving multiplication and division.</p> <p>3.OA.1. Interpret products of whole numbers, e.g., interpret 5×7 as the total number of objects in 5 groups of 7 objects each. <i>For example, describe a context in which a total number of objects can be expressed as 5×7.</i></p> <p>3.OA.2. Interpret whole-number quotients of whole numbers, e.g., interpret $56 \div 8$ as the number of objects in each share when 56 objects are partitioned equally into 8 shares, or as a number of shares when 56 objects are partitioned into equal shares of 8 objects each. <i>For example, describe a context in which a number of shares or a number of groups can be expressed as $56 \div 8$.</i></p> <p>3.OA.3. Use multiplication and division within 100 to solve word problems in situations involving equal groups, arrays, and measurement quantities, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.¹</p> <p>3.OA.4. Determine the unknown whole number in a multiplication or division equation relating three whole numbers. <i>For example, determine the unknown number that makes the equation true in each of the equations $8 \times ? = 48$, $5 = _ \div 3$, $6 \times 6 = ?$</i></p> <p>Understand properties of multiplication and the relationship between multiplication and division.</p> <p>3.OA.5. Apply properties of operations as strategies to multiply and divide.² <i>Examples: If $6 \times 4 = 24$ is known, then $4 \times 6 = 24$ is also known. (Commutative property of multiplication.) $3 \times 5 \times 2$ can be found by $3 \times 5 = 15$, then $15 \times 2 = 30$, or by $5 \times 2 = 10$, then $3 \times 10 = 30$. (Associative property of multiplication.) Knowing that $8 \times 5 = 40$ and $8 \times 2 = 16$, one can find 8×7 as $8 \times (5 + 2) = (8 \times 5) + (8 \times 2) = 40 + 16 = 56$. (Distributive property.)</i></p> <p>3.OA.6. Understand division as an unknown-factor problem. <i>For example, find $32 \div 8$ by finding the number that makes 32 when multiplied by 8.</i></p> <p>Multiply and divide within 100.</p> <p>3.OA.7. Fluently multiply and divide within 100, using strategies such as the relationship between multiplication and division (e.g., knowing that $8 \times 5 = 40$, one knows $40 \div 5 = 8$) or properties of operations. By the end of Grade 3, know from memory all products of two one-</p>

	<p>digit numbers.</p> <p>Solve problems involving the four operations, and identify and explain patterns in arithmetic.</p> <p>3.OA.8. Solve two-step word problems using the four operations. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding.³</p> <p>3.OA.9. Identify arithmetic patterns (including patterns in the addition table or multiplication table), and explain them using properties of operations. <i>For example, observe that 4 times a number is always even, and explain why 4 times a number can be decomposed into two equal addends.</i></p>
4	<p>Use the four operations with whole numbers to solve problems.</p> <p>4.OA.1. Interpret a multiplication equation as a comparison, e.g., interpret $35 = 5 \times 7$ as a statement that 35 is 5 times as many as 7 and 7 times as many as 5. Represent verbal statements of multiplicative comparisons as multiplication equations.</p> <p>4.OA.2. Multiply or divide to solve word problems involving multiplicative comparison, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem, distinguishing multiplicative comparison from additive comparison.¹</p> <p>4.OA.3. Solve multistep word problems posed with whole numbers and having whole-number answers using the four operations, including problems in which remainders must be interpreted. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding.</p> <p>Gain familiarity with factors and multiples.</p> <p>4.OA.4. Find all factor pairs for a whole number in the range 1–100. Recognize that a whole number is a multiple of each of its factors. Determine whether a given whole number in the range 1–100 is a multiple of a given one-digit number. Determine whether a given whole number in the range 1–100 is prime or composite.</p> <p>Generate and analyze patterns.</p> <p>4.OA.5. Generate a number or shape pattern that follows a given rule. Identify apparent features of the pattern that were not explicit in the rule itself. <i>For example, given the rule “Add 3” and the starting number 1, generate terms in the resulting sequence and observe that the terms appear to alternate between odd and even numbers. Explain informally why the numbers will continue to alternate in this way.</i></p>
5	<p>Write and interpret numerical expressions.</p> <p>5.OA.1. Use parentheses, brackets, or braces in numerical expressions, and evaluate expressions with these symbols.</p> <p>5.OA.2. Write simple expressions that record calculations with numbers, and interpret numerical expressions without evaluating them. <i>For example, express the calculation “add 8 and 7, then multiply by 2” as $2 \times (8 + 7)$. Recognize that $3 \times (18932 + 921)$ is three times as large as $18932 + 921$, without having to calculate the indicated sum or product.</i></p> <p>Analyze patterns and relationships.</p> <p>5.OA.3. Generate two numerical patterns using two given rules. Identify apparent relationships between corresponding terms. Form ordered pairs consisting of corresponding terms from the two patterns, and graph the ordered pairs on a coordinate plane. <i>For example, given the rule “Add 3” and the starting number 0, and given the rule “Add 6” and the starting number 0, generate terms in the resulting sequences, and observe that the terms in one</i></p>

	<i>sequence are twice the corresponding terms in the other sequence. Explain informally why this is so.</i>
--	---

Domain: Expressions and Equations (6-8)

Grade	Common Core State Standard
6	<p>Apply and extend previous understandings of arithmetic to algebraic expressions.</p> <p>6.EE.1. Write and evaluate numerical expressions involving whole-number exponents.</p> <p>6.EE.2. Write, read, and evaluate expressions in which letters stand for numbers.</p> <p>6.EE.3. Apply the properties of operations to generate equivalent expressions. <i>For example, apply the distributive property to the expression $3(2 + x)$ to produce the equivalent expression $6 + 3x$; apply the distributive property to the expression $24x + 18y$ to produce the equivalent expression $6(4x + 3y)$; apply properties of operations to $y + y + y$ to produce the equivalent expression $3y$.</i></p> <p>6.EE.4. Identify when two expressions are equivalent (i.e., when the two expressions name the same number regardless of which value is substituted into them). <i>For example, the expressions $y + y + y$ and $3y$ are equivalent because they name the same number regardless of which number y stands for. Reason about and solve one-variable equations and inequalities.</i></p> <p>Reason about and solve one-variable equations and inequalities.</p> <p>6.EE.5. Understand solving an equation or inequality as a process of answering a question: which values from a specified set, if any, make the equation or inequality true? Use substitution to determine whether a given number in a specified set makes an equation or inequality true.</p> <p>6.EE.6. Use variables to represent numbers and write expressions when solving a real-world or mathematical problem; understand that a variable can represent an unknown number, or, depending on the purpose at hand, any number in a specified set.</p> <p>6.EE.7. Solve real-world and mathematical problems by writing and solving equations of the form $x + p = q$ and $px = q$ for cases in which p, q and x are all nonnegative rational numbers.</p> <p>6.EE.8. Write an inequality of the form $x > c$ or $x < c$ to represent a constraint or condition in a real-world or mathematical problem. Recognize that inequalities of the form $x > c$ or $x < c$ have infinitely many solutions; represent solutions of such inequalities on number line diagrams.</p> <p>Represent and analyze quantitative relationships between dependent and independent variables.</p> <p>6.EE.9. Use variables to represent two quantities in a real-world problem that change in relationship to one another; write an equation to express one quantity, thought of as the dependent variable, in terms of the other quantity, thought of as the independent variable. Analyze the relationship between the dependent and independent variables using graphs and tables, and relate these to the equation. For example, in a problem involving motion at constant speed, list and graph ordered pairs of distances and times, and write the equation $d = 65t$ to represent the relationship between distance and time.</p>
7	<p>Use properties of operations to generate equivalent expressions.</p> <p>7.EE.1. Apply properties of operations as strategies to add, subtract, factor, and expand linear expressions with rational coefficients.</p> <p>7.EE.2. Understand that rewriting an expression in different forms in a problem context can shed light on the problem and how the quantities in it are related. <i>For example, $a + 0.05a =$</i></p>

	<p>1.05a means that “increase by 5%” is the same as “multiply by 1.05.”</p> <p>Solve real-life and mathematical problems using numerical and algebraic expressions and equations.</p> <p>7.EE.3. Solve multi-step real-life and mathematical problems posed with positive and negative rational numbers in any form (whole numbers, fractions, and decimals), using tools strategically. Apply properties of operations to calculate with numbers in any form; convert between forms as appropriate; and assess the reasonableness of answers using mental computation and estimation strategies. <i>For example: If a woman making \$25 an hour gets a 10% raise, she will make an additional 1/10 of her salary an hour, or \$2.50, for a new salary of \$27.50. If you want to place a towel bar 9 3/4 inches long in the center of a door that is 27 1/2 inches wide, you will need to place the bar about 9 inches from each edge; this estimate can be used as a check on the exact computation.</i></p> <p>7.EE.4. Use variables to represent quantities in a real-world or mathematical problem, and construct simple equations and inequalities to solve problems by reasoning about the quantities.</p>
8	<p>Expressions and EquationsWork with radicals and integer exponents.</p> <p>8.EE.1. Know and apply the properties of integer exponents to generate equivalent numerical expressions. For example, $3^2 \times 3^{-5} = 3^{-3} = 1/3^3 = 1/27$.</p> <p>8.EE.2. Use square root and cube root symbols to represent solutions to equations of the form $x^2 = p$ and $x^3 = p$, where p is a positive rational number. Evaluate square roots of small perfect squares and cube roots of small perfect cubes. Know that $\sqrt{2}$ is irrational.</p> <p>8.EE.3. Use numbers expressed in the form of a single digit times a whole-number power of 10 to estimate very large or very small quantities, and to express how many times as much one is than the other. <i>For example, estimate the population of the United States as 3 times 10^8 and the population of the world as 7 times 10^9, and determine that the world population is more than 20 times larger.</i></p> <p>8.EE.4. Perform operations with numbers expressed in scientific notation, including problems where both decimal and scientific notation are used. Use scientific notation and choose units of appropriate size for measurements of very large or very small quantities (e.g., use millimeters per year for seafloor spreading). Interpret scientific notation that has been generated by technology.</p> <p>Understand the connections between proportional relationships, lines, and linear equations.</p> <p>8.EE.5. Graph proportional relationships, interpreting the unit rate as the slope of the graph. Compare two different proportional relationships represented in different ways. For example, compare a distance-time graph to a distance-time equation to determine which of two moving objects has greater speed.</p> <p>8.EE.6. Use similar triangles to explain why the slope m is the same between any two distinct points on a non-vertical line in the coordinate plane; derive the equation $y = mx$ for a line through the origin and the equation $y = mx + b$ for a line intercepting the vertical axis at b.</p> <p>Analyze and solve linear equations and pairs of simultaneous linear equations.</p> <p>8.EE.7. Solve linear equations in one variable.</p> <p>8.EE.8. Analyze and solve pairs of simultaneous linear equations.</p>

Domain: Algebra (HS)
Sub Domain: Seeing Structure in Expressions

Grade	Common Core State Standard
HS	<p>Interpret the structure of expressions.</p> <p>A-SSE.1. Interpret expressions that represent a quantity in terms of its context.★</p> <p>A-SSE.3. Choose and produce an equivalent form of an expression to reveal and explain properties of the quantity represented by the expression.★</p> <p>A-SSE.4. Derive the formula for the sum of a finite geometric series (when the common ratio is not 1), and use the formula to solve problems. <i>For example, calculate mortgage payments.</i>★</p>

Domain: Algebra (HS)

Sub Domain: Arithmetic with Polynomials & Rational Expressions

Grade	Common Core State Standard
HS	<p>Perform arithmetic operations on polynomials. A-APR.1. Understand that polynomials form a system analogous to the integers, namely, they are closed under the operations of addition, subtraction, and multiplication; add, subtract, and multiply polynomials.</p> <p>Understand the relationship between zeros and factors of polynomials. A-APR.2. Know and apply the Remainder Theorem: For a polynomial $p(x)$ and a number a, the remainder on division by $x - a$ is $p(a)$, so $p(a) = 0$ if and only if $(x - a)$ is a factor of $p(x)$.</p> <p>A-APR.3. Identify zeros of polynomials when suitable factorizations are available, and use the zeros to construct a rough graph of the function defined by the polynomial.</p> <p>Use polynomial identities to solve problems. A-APR.4. Prove polynomial identities and use them to describe numerical relationships. <i>For example, the polynomial identity $(x^2 + y^2)^2 = (x^2 - y^2)^2 + (2xy)^2$ can be used to generate Pythagorean triples.</i></p> <p>A-APR.5. (+) Know and apply the Binomial Theorem for the expansion of $(x + y)^n$ in powers of x and y for a positive integer n, where x and y are any numbers, with coefficients determined for example by Pascal's Triangle.¹</p> <p>Rewrite rational expressions. A-APR.6. Rewrite simple rational expressions in different forms; write $\frac{a(x)}{b(x)}$ in the form $q(x) + \frac{r(x)}{b(x)}$, where $a(x)$, $b(x)$, $q(x)$, and $r(x)$ are polynomials with the degree of $r(x)$ less than the degree of $b(x)$, using inspection, long division, or, for the more complicated examples, a computer algebra system.</p> <p>A-APR.7. (+) Understand that rational expressions form a system analogous to the rational numbers, closed under addition, subtraction, multiplication, and division by a nonzero rational expression; add, subtract, multiply, and divide rational expressions.</p>

Domain: Algebra (HS)

Sub Domain: Creating Equations

Grade	Common Core State Standard
HS	<p>Create equations that describe numbers or relationships.</p> <p>A-CED.1. Create equations and inequalities in one variable and use them to solve problems. <i>Include equations arising from linear and quadratic functions, and simple rational and exponential functions.</i></p> <p>A-CED.2. Create equations in two or more variables to represent relationships between quantities; graph equations on coordinate axes with labels and scales.</p> <p>A-CED.3. Represent constraints by equations or inequalities, and by systems of equations and/or inequalities, and interpret solutions as viable or nonviable options in a modeling context. <i>For example, represent inequalities describing nutritional and cost constraints on combinations of different foods.</i></p> <p>A-CED.4. Rearrange formulas to highlight a quantity of interest, using the same reasoning as in solving equations. <i>For example, rearrange Ohm's law $V = IR$ to highlight resistance R.</i></p>

Domain: Algebra (HS)

Sub Domain: Reasoning with Equations and Inequalities

Grade	Common Core State Standard
HS	<p>Understand solving equations as a process of reasoning and explain the reasoning.</p> <p>A-REI.1. Explain each step in solving a simple equation as following from the equality of numbers asserted at the previous step, starting from the assumption that the original equation has a solution. Construct a viable argument to justify a solution method.</p> <p>A-REI.2. Solve simple rational and radical equations in one variable, and give examples showing how extraneous solutions may arise.</p> <p>Solve equations and inequalities in one variable.</p> <p>A-REI.3. Solve linear equations and inequalities in one variable, including equations with coefficients represented by letters.</p> <p>A-REI.4. Solve quadratic equations in one variable.</p> <p>Solve systems of equations.</p> <p>A-REI.5. Prove that, given a system of two equations in two variables, replacing one equation by the sum of that equation and a multiple of the other produces a system with the same solutions.</p> <p>A-REI.6. Solve systems of linear equations exactly and approximately (e.g., with graphs), focusing on pairs of linear equations in two variables.</p> <p>A-REI.7. Solve a simple system consisting of a linear equation and a quadratic equation in two variables algebraically and graphically. For example, find the points of intersection between the line $y = -3x$ and the circle $x^2 + y^2 = 3$.</p> <p>A-REI.8. (+) Represent a system of linear equations as a single matrix equation in a vector variable.</p> <p>A-REI.9. (+) Find the inverse of a matrix if it exists and use it to solve systems of linear equations (using technology for matrices of dimension 3×3 or greater).</p> <p>Represent and solve equations and inequalities graphically.</p> <p>A-REI.10. Understand that the graph of an equation in two variables is the set of all its solutions plotted in the coordinate plane, often forming a curve (which could be a line).</p> <p>A-REI.11. Explain why the x-coordinates of the points where the graphs of the equations $y = f(x)$ and $y = g(x)$ intersect are the solutions of the equation $f(x) = g(x)$; find the solutions approximately, e.g., using technology to graph the functions, make tables of values, or find successive approximations. Include cases where $f(x)$ and/or $g(x)$ are linear, polynomial, rational, absolute value, exponential, and logarithmic functions.★</p> <p>A-REI.12. Graph the solutions to a linear inequality in two variables as a half-plane (excluding the boundary in the case of a strict inequality), and graph the solution set to a system of linear inequalities in two variables as the intersection of the corresponding half-planes.</p>

Domain: Functions (8)

Grade	Common Core State Standard
8	<p>Define, evaluate, and compare functions.</p> <p>8.F.1. Understand that a function is a rule that assigns to each input exactly one output. The graph of a function is the set of ordered pairs consisting of an input and the corresponding output.¹</p> <p>8.F.2. Compare properties of two functions each represented in a different way (algebraically, graphically, numerically in tables, or by verbal descriptions). <i>For example, given a linear function represented by a table of values and a linear function represented by an algebraic expression, determine which function has the greater rate of change.</i></p> <p>8.F.3. Interpret the equation $y = mx + b$ as defining a linear function, whose graph is a straight line; give examples of functions that are not linear. <i>For example, the function $A = s^2$ giving the area of a square as a function of its side length is not linear because its graph contains the points (1,1), (2,4) and (3,9), which are not on a straight line.</i></p> <p>Use functions to model relationships between quantities.</p> <p>8.F.4. Construct a function to model a linear relationship between two quantities. Determine the rate of change and initial value of the function from a description of a relationship or from two (x, y) values, including reading these from a table or from a graph. Interpret the rate of change and initial value of a linear function in terms of the situation it models, and in terms of its graph or a table of values.</p> <p>8.F.5. Describe qualitatively the functional relationship between two quantities by analyzing a graph (e.g., where the function is increasing or decreasing, linear or nonlinear). Sketch a graph that exhibits the qualitative features of a function that has been described verbally.</p>

Domain: Functions (HS)

Sub Domain: Interpreting Functions

Grade	Common Core State Standard
HS	<p>Understand the concept of a function and use function notation.</p> <p>F-IF.1. Understand that a function from one set (called the domain) to another set (called the range) assigns to each element of the domain exactly one element of the range. If f is a function and x is an element of its domain, then $f(x)$ denotes the output of f corresponding to the input x. The graph of f is the graph of the equation $y = f(x)$.</p> <p>F-IF.2. Use function notation, evaluate functions for inputs in their domains, and interpret statements that use function notation in terms of a context.</p> <p>F-IF.3. Recognize that sequences are functions, sometimes defined recursively, whose domain is a subset of the integers. <i>For example, the Fibonacci sequence is defined recursively by $f(0) = f(1) = 1$, $f(n+1) = f(n) + f(n-1)$ for $n \geq 1$.</i></p> <p>Interpret functions that arise in applications in terms of the context.</p> <p>F-IF.4. For a function that models a relationship between two quantities, interpret key features of graphs and tables in terms of the quantities, and sketch graphs showing key features given a verbal description of the relationship. <i>Key features include: intercepts; intervals where the function is increasing, decreasing, positive, or negative; relative maximums and minimums; symmetries; end behavior; and periodicity.*</i></p> <p>F-IF.5. Relate the domain of a function to its graph and, where applicable, to the quantitative relationship it describes. <i>For example, if the function $h(n)$ gives the number of person-hours it takes to assemble n engines in a factory, then the positive integers would be an appropriate domain for the function.*</i></p> <p>F-IF.6. Calculate and interpret the average rate of change of a function (presented symbolically or as a table) over a specified interval. Estimate the rate of change from a graph.*</p> <p>Analyze functions using different representations.</p> <p>F-IF.7. Graph functions expressed symbolically and show key features of the graph, by hand in simple cases and using technology for more complicated cases.*</p> <p>F-IF.8. Write a function defined by an expression in different but equivalent forms to reveal and explain different properties of the function.</p> <p>F-IF.9. Compare properties of two functions each represented in a different way (algebraically, graphically, numerically in tables, or by verbal descriptions). <i>For example, given a graph of one quadratic function and an algebraic expression for another, say which has the larger maximum.</i></p>

Domain: Functions (HS)

Sub Domain: Building Functions

Grade	Common Core State Standard
HS	<p>Build a function that models a relationship between two quantities.</p> <p>F-BF.1. Write a function that describes a relationship between two quantities.★</p> <p>F-BF.2. Write arithmetic and geometric sequences both recursively and with an explicit formula, use them to model situations, and translate between the two forms.★</p> <p>Build new functions from existing functions.</p> <p>F-BF.3. Identify the effect on the graph of replacing $f(x)$ by $f(x) + k$, $k f(x)$, $f(kx)$, and $f(x + k)$ for specific values of k (both positive and negative); find the value of k given the graphs. Experiment with cases and illustrate an explanation of the effects on the graph using technology. Include recognizing even and odd functions from their graphs and algebraic expressions for them.</p> <p>F-BF.4. Find inverse functions.</p> <p>F-BF.5. (+) Understand the inverse relationship between exponents and logarithms and use this relationship to solve problems involving logarithms and exponents.</p>

Domain: Functions (HS)

Sub Domain: Linear, Quadratic, & Exponential Models

Grade	Common Core State Standard
HS	<p>Construct and compare linear, quadratic, and exponential models and solve problems.</p> <p>F-LE.1. Distinguish between situations that can be modeled with linear functions and with exponential functions.</p> <p>F-LE.2. Construct linear and exponential functions, including arithmetic and geometric sequences, given a graph, a description of a relationship, or two input-output pairs (include reading these from a table).</p> <p>F-LE.3. Observe using graphs and tables that a quantity increasing exponentially eventually exceeds a quantity increasing linearly, quadratically, or (more generally) as a polynomial function.</p> <p>F-LE.4. For exponential models, express as a logarithm the solution to $ab^{ct} = d$ where a, c, and d are numbers and the base b is 2, 10, or e; evaluate the logarithm using technology.</p> <p>Interpret expressions for functions in terms of the situation they model.</p> <p>F-LE.5. Interpret the parameters in a linear or exponential function in terms of a context.</p>

Domain: Functions (HS)

Sub Domain: Trigonometric Functions

Grade	Common Core State Standard
HS	<p>Extend the domain of trigonometric functions using the unit circle.</p> <p>F-TF.1. Understand radian measure of an angle as the length of the arc on the unit circle subtended by the angle.</p> <p>F-TF.2. Explain how the unit circle in the coordinate plane enables the extension of trigonometric functions to all real numbers, interpreted as radian measures of angles traversed counterclockwise around the unit circle.</p> <p>F-TF.3. (+) Use special triangles to determine geometrically the values of sine, cosine, tangent for $\pi/3$, $\pi/4$ and $\pi/6$, and use the unit circle to express the values of sine, cosines, and tangent for x, $\pi + x$, and $2\pi - x$ in terms of their values for x, where x is any real number.</p> <p>F-TF.4. (+) Use the unit circle to explain symmetry (odd and even) and periodicity of trigonometric functions.</p> <p>Model periodic phenomena with trigonometric functions.</p> <p>F-TF.5. Choose trigonometric functions to model periodic phenomena with specified amplitude, frequency, and midline.★</p> <p>F-TF.6. (+) Understand that restricting a trigonometric function to a domain on which it is always increasing or always decreasing allows its inverse to be constructed.</p> <p>F-TF.7. (+) Use inverse functions to solve trigonometric equations that arise in modeling contexts; evaluate the solutions using technology, and interpret them in terms of the context.★</p> <p>Prove and apply trigonometric identities.</p> <p>F-TF.8. Prove the Pythagorean identity $\sin^2(\theta) + \cos^2(\theta) = 1$ and use it to find $\sin(\theta)$, $\cos(\theta)$, or $\tan(\theta)$ given $\sin(\theta)$, $\cos(\theta)$, or $\tan(\theta)$ and the quadrant of the angle.</p> <p>F-TF.9. (+) Prove the addition and subtraction formulas for sine, cosine, and tangent and use them to solve problems.</p>

Domain: Geometry (K-8)

Grade	Common Core State Standard
K	<p>Identify and describe shapes (squares, circles, triangles, rectangles, hexagons, cubes, cones, cylinders, and spheres).</p> <p>K.G.1. Describe objects in the environment using names of shapes, and describe the relative positions of these objects using terms such as <i>above</i>, <i>below</i>, <i>beside</i>, <i>in front of</i>, <i>behind</i>, and <i>next to</i>.</p> <p>K.G.2. Correctly name shapes regardless of their orientations or overall size.</p> <p>K.G.3. Identify shapes as two-dimensional (lying in a plane, “flat”) or three-dimensional (“solid”).</p> <p>Analyze, compare, create, and compose shapes.</p> <p>K.G.4. Analyze and compare two- and three-dimensional shapes, in different sizes and orientations, using informal language to describe their similarities, differences, parts (e.g., number of sides and vertices/“corners”) and other attributes (e.g., having sides of equal length).</p> <p>K.G.5. Model shapes in the world by building shapes from components (e.g., sticks and clay balls) and drawing shapes.</p> <p>K.G.6. Compose simple shapes to form larger shapes. <i>For example, “Can you join these two triangles with full sides touching to make a rectangle?”</i></p>
1	<p>Reason with shapes and their attributes.</p> <p>1.G.1. Distinguish between defining attributes (e.g., triangles are closed and three-sided) versus non-defining attributes (e.g., color, orientation, overall size) ; build and draw shapes to possess defining attributes.</p> <p>1.G.2. Compose two-dimensional shapes (rectangles, squares, trapezoids, triangles, half-circles, and quarter-circles) or three-dimensional shapes (cubes, right rectangular prisms, right circular cones, and right circular cylinders) to create a composite shape, and compose new shapes from the composite shape.¹</p> <p>1.G.3. Partition circles and rectangles into two and four equal shares, describe the shares using the words <i>halves</i>, <i>fourths</i>, and <i>quarters</i>, and use the phrases <i>half of</i>, <i>fourth of</i>, and <i>quarter of</i>. Describe the whole as two of, or four of the shares. Understand for these examples that decomposing into more equal shares creates smaller shares.</p>
2	<p>Reason with shapes and their attributes.</p> <p>2.G.1. Recognize and draw shapes having specified attributes, such as a given number of angles or a given number of equal faces.¹ Identify triangles, quadrilaterals, pentagons, hexagons, and cubes.</p> <p>2.G.2. Partition a rectangle into rows and columns of same-size squares and count to find the total number of them.</p> <p>2.G.3. Partition circles and rectangles into two, three, or four equal shares, describe the shares using the words halves, thirds, half of, a third of, etc., and describe the whole as two halves, three thirds, four fourths. Recognize that equal shares of identical wholes need not have the same shape.</p>

3	<p>Reason with shapes and their attributes.</p> <p>3.G.1. Understand that shapes in different categories (e.g., rhombuses, rectangles, and others) may share attributes (e.g., having four sides), and that the shared attributes can define a larger category (e.g., quadrilaterals). Recognize rhombuses, rectangles, and squares as examples of quadrilaterals, and draw examples of quadrilaterals that do not belong to any of these subcategories.</p> <p>3.G.2. Partition shapes into parts with equal areas. Express the area of each part as a unit fraction of the whole. <i>For example, partition a shape into 4 parts with equal area, and describe the area of each part as $\frac{1}{4}$ of the area of the shape.</i></p>
4	<p>Draw and identify lines and angles, and classify shapes by properties of their lines and angles.</p> <p>4.G.1. Draw points, lines, line segments, rays, angles (right, acute, obtuse), and perpendicular and parallel lines. Identify these in two-dimensional figures.</p> <p>4.G.2. Classify two-dimensional figures based on the presence or absence of parallel or perpendicular lines, or the presence or absence of angles of a specified size. Recognize right triangles as a category, and identify right triangles.</p> <p>4.G.3. Recognize a line of symmetry for a two-dimensional figure as a line across the figure such that the figure can be folded along the line into matching parts. Identify line-symmetric figures and draw lines of symmetry.</p>
5	<p>problems.</p> <p>5.G.1. Use a pair of perpendicular number lines, called axes, to define a coordinate system, with the intersection of the lines (the origin) arranged to coincide with the 0 on each line and a given point in the plane located by using an ordered pair of numbers, called its coordinates. Understand that the first number indicates how far to travel from the origin in the direction of one axis, and the second number indicates how far to travel in the direction of the second axis, with the convention that the names of the two axes and the coordinates correspond (e.g., x-axis and x-coordinate, y-axis and y-coordinate).</p> <p>5.G.2. Represent real world and mathematical problems by graphing points in the first quadrant of the coordinate plane, and interpret coordinate values of points in the context of the situation.</p> <p>Classify two-dimensional figures into categories based on their properties.</p> <p>5.G.3. Understand that attributes belonging to a category of two-dimensional figures also belong to all subcategories of that category. For example, all rectangles have four right angles and squares are rectangles, so all squares have four right angles.</p> <p>5.G.4. Classify two-dimensional figures in a hierarchy based on properties.</p>
6	<p>Solve real-world and mathematical problems involving area, surface area, and volume.</p> <p>6.G.1. Find the area of right triangles, other triangles, special quadrilaterals, and polygons by composing into rectangles or decomposing into triangles and other shapes; apply these techniques in the context of solving real-world and mathematical problems.</p> <p>6.G.2. Find the volume of a right rectangular prism with fractional edge lengths by packing it with unit cubes of the appropriate unit fraction edge lengths, and show that the volume is the same as would be found by multiplying the edge lengths of the prism. Apply the formulas $V = lwh$ and $V = bh$ to find volumes of right rectangular prisms with fractional edge lengths in the context of solving real-world and mathematical problems.</p> <p>6.G.3. Draw polygons in the coordinate plane given coordinates for the vertices; use</p>

	<p>coordinates to find the length of a side joining points with the same first coordinate or the same second coordinate. Apply these techniques in the context of solving real-world and mathematical problems.</p> <p>6.G.4. Represent three-dimensional figures using nets made up of rectangles and triangles, and use the nets to find the surface area of these figures. Apply these techniques in the context of solving real-world and mathematical problems.</p>
7	<p>Draw construct, and describe geometrical figures and describe the relationships between them.</p> <p>7.G.1. Solve problems involving scale drawings of geometric figures, including computing actual lengths and areas from a scale drawing and reproducing a scale drawing at a different scale.</p> <p>7.G.2. Draw (freehand, with ruler and protractor, and with technology) geometric shapes with given conditions. Focus on constructing triangles from three measures of angles or sides, noticing when the conditions determine a unique triangle, more than one triangle, or no triangle.</p> <p>7.G.3. Describe the two-dimensional figures that result from slicing three-dimensional figures, as in plane sections of right rectangular prisms and right rectangular pyramids.</p> <p>Solve real-life and mathematical problems involving angle measure, area, surface area, and volume.</p> <p>7.G.4. Know the formulas for the area and circumference of a circle and use them to solve problems; give an informal derivation of the relationship between the circumference and area of a circle.</p> <p>7.G.5. Use facts about supplementary, complementary, vertical, and adjacent angles in a multi-step problem to write and solve simple equations for an unknown angle in a figure.</p> <p>7.G.6. Solve real-world and mathematical problems involving area, volume and surface area of two- and three-dimensional objects composed of triangles, quadrilaterals, polygons, cubes, and right prisms.</p>
8	<p>Understand congruence and similarity using physical models, transparencies, or geometry software.</p> <p>8.G.1. Verify experimentally the properties of rotations, reflections, and translations:</p> <p>8.G.2. Understand that a two-dimensional figure is congruent to another if the second can be obtained from the first by a sequence of rotations, reflections, and translations; given two congruent figures, describe a sequence that exhibits the congruence between them.</p> <p>8.G.3. Describe the effect of dilations, translations, rotations, and reflections on two-dimensional figures using coordinates.</p> <p>8.G.4. Understand that a two-dimensional figure is similar to another if the second can be obtained from the first by a sequence of rotations, reflections, translations, and dilations; given two similar two-dimensional figures, describe a sequence that exhibits the similarity between them.</p> <p>8.G.5. Use informal arguments to establish facts about the angle sum and exterior angle of triangles, about the angles created when parallel lines are cut by a transversal, and the angle-angle criterion for similarity of triangles. <i>For example, arrange three copies of the same triangle so that the sum of the three angles appears to form a line, and give an argument in terms of transversals why this is so.</i></p>

	<p>Understand and apply the Pythagorean Theorem.</p> <p>8.G.6. Explain a proof of the Pythagorean Theorem and its converse.</p> <p>8.G.7. Apply the Pythagorean Theorem to determine unknown side lengths in right triangles in real-world and mathematical problems in two and three dimensions.</p> <p>8.G.8. Apply the Pythagorean Theorem to find the distance between two points in a coordinate system.</p> <p>Solve real-world and mathematical problems involving volume of cylinders, cones, and spheres.</p> <p>8.G.9. Know the formulas for the volumes of cones, cylinders, and spheres and use them to solve real-world and mathematical problems.</p>
--	---

Domain: Geometry (HS)

Sub Domain: Congruence

Grade	Common Core State Standard
HS	<p>Experiment with transformations in the plane</p> <p>G.CO.1. Know precise definitions of angle, circle, perpendicular line, parallel line, and line segment, based on the undefined notions of point, line, distance along a line, and distance around a circular arc.</p> <p>G-CO.2. Represent transformations in the plane using, e.g., transparencies and geometry software; describe transformations as functions that take points in the plane as inputs and give other points as outputs. Compare transformations that preserve distance and angle to those that do not (e.g., translation versus horizontal stretch).</p> <p>G-CO.3. Given a rectangle, parallelogram, trapezoid, or regular polygon, describe the rotations and reflections that carry it onto itself.</p> <p>G-CO.4. Develop definitions of rotations, reflections, and translations in terms of angles, circles, perpendicular lines, parallel lines, and line segments.</p> <p>G-CO.5. Given a geometric figure and a rotation, reflection, or translation, draw the transformed figure using, e.g., graph paper, tracing paper, or geometry software. Specify a sequence of transformations that will carry a given figure onto another.</p> <p>Understand congruence in terms of rigid motions</p> <p>G-CO.6. Use geometric descriptions of rigid motions to transform figures and to predict the effect of a given rigid motion on a given figure; given two figures, use the definition of congruence in terms of rigid motions to decide if they are congruent.</p> <p>G-CO.7. Use the definition of congruence in terms of rigid motions to show that two triangles are congruent if and only if corresponding pairs of sides and corresponding pairs of angles are congruent.</p> <p>G-CO.8. Explain how the criteria for triangle congruence (ASA, SAS, and SSS) follow from the definition of congruence in terms of rigid motions.</p> <p>Prove geometric theorems</p> <p>G-CO.9. Prove theorems about lines and angles. <i>Theorems include: vertical angles are congruent; when a transversal crosses parallel lines, alternate interior angles are congruent and corresponding angles are congruent; points on a perpendicular bisector of a line segment are exactly those equidistant from the segment's endpoints.</i></p> <p>G-CO.10. Prove theorems about triangles. <i>Theorems include: measures of interior angles of a triangle sum to 180°; base angles of isosceles triangles are congruent; the segment joining midpoints of two sides of a triangle is parallel to the third side and half the length; the medians of a triangle meet at a point.</i></p> <p>G-CO.11. Prove theorems about parallelograms. <i>Theorems include: opposite sides are congruent, opposite angles are congruent, the diagonals of a parallelogram bisect each other, and conversely, rectangles are parallelograms with congruent diagonals.</i></p>

	<p>Make geometric constructions</p> <p>G-CO.12. Make formal geometric constructions with a variety of tools and methods (compass and straightedge, string, reflective devices, paper folding, dynamic geometric software, etc.). <i>Copying a segment; copying an angle; bisecting a segment; bisecting an angle; constructing perpendicular lines, including the perpendicular bisector of a line segment; and constructing a line parallel to a given line through a point not on the line.</i></p> <p>G-CO.13. Construct an equilateral triangle, a square, and a regular hexagon inscribed in a circle.</p>
--	--

Sub Domain: Similarity, Right Triangles, & Trigonometry

Grade	Common Core State Standard
HS	<p>Understand similarity in terms of similarity transformations</p> <p>G-SRT.1. Verify experimentally the properties of dilations given by a center and a scale factor:</p> <p>G-SRT.2. Given two figures, use the definition of similarity in terms of similarity transformations to decide if they are similar; explain using similarity transformations the meaning of similarity for triangles as the equality of all corresponding pairs of angles and the proportionality of all corresponding pairs of sides.</p> <p>G-SRT.3. Use the properties of similarity transformations to establish the AA criterion for two triangles to be similar.</p> <p>Prove theorems involving similarity</p> <p>G-SRT.4. Prove theorems about triangles. <i>Theorems include: a line parallel to one side of a triangle divides the other two proportionally, and conversely; the Pythagorean Theorem proved using triangle similarity.</i></p> <p>G-SRT.5. Use congruence and similarity criteria for triangles to solve problems and to prove relationships in geometric figures.</p> <p>Define trigonometric ratios and solve problems involving right triangles</p> <p>G-SRT.6. Understand that by similarity, side ratios in right triangles are properties of the angles in the triangle, leading to definitions of trigonometric ratios for acute angles.</p> <p>G-SRT.7. Explain and use the relationship between the sine and cosine of complementary angles.</p> <p>G-SRT.8. Use trigonometric ratios and the Pythagorean Theorem to solve right triangles in applied problems.★</p> <p>Apply trigonometry to general triangles</p> <p>G-SRT.9. (+) Derive the formula $A = \frac{1}{2} ab \sin(C)$ for the area of a triangle by drawing an auxiliary line from a vertex perpendicular to the opposite side.</p> <p>G-SRT.10. (+) Prove the Laws of Sines and Cosines and use them to solve problems.</p> <p>G-SRT.11. (+) Understand and apply the Law of Sines and the Law of Cosines to find unknown measurements in right and non-right triangles (e.g., surveying problems, resultant forces).</p>

Domain: Geometry (HS)

Sub Domain: Circles

Grade	Common Core State Standard
HS	<p>Understand and apply theorems about circles</p> <p>G-C.1. Prove that all circles are similar.</p> <p>G-C.2. Identify and describe relationships among inscribed angles, radii, and chords. <i>Include the relationship between central, inscribed, and circumscribed angles; inscribed angles on a diameter are right angles; the radius of a circle is perpendicular to the tangent where the radius intersects the circle.</i></p> <p>G-C.3. Construct the inscribed and circumscribed circles of a triangle, and prove properties of angles for a quadrilateral inscribed in a circle.</p> <p>G-C.4. (+) Construct a tangent line from a point outside a given circle to the circle.</p> <p>Find arc lengths and areas of sectors of circles</p> <p>G-C.5. Derive using similarity the fact that the length of the arc intercepted by an angle is proportional to the radius, and define the radian measure of the angle as the constant of proportionality; derive the formula for the area of a sector.</p>

Domain: Geometry (HS)

Sub Domain: Expressing Geometric Properties with Equations

Grade	Common Core State Standard
HS	<p>Translate between the geometric description and the equation for a conic section</p> <p>G-GPE.1. Derive the equation of a circle of given center and radius using the Pythagorean Theorem; complete the square to find the center and radius of a circle given by an equation.</p> <p>G-GPE.2. Derive the equation of a parabola given a focus and directrix.</p> <p>G-GPE.3. (+) Derive the equations of ellipses and hyperbolas given the foci, using the fact that the sum or difference of distances from the foci is constant.</p> <p>Use coordinates to prove simple geometric theorems algebraically</p> <p>G-GPE.4. Use coordinates to prove simple geometric theorems algebraically. <i>For example, prove or disprove that a figure defined by four given points in the coordinate plane is a rectangle; prove or disprove that the point $(1, \sqrt{3})$ lies on the circle centered at the origin and containing the point $(0, 2)$.</i></p> <p>G-GPE.5. Prove the slope criteria for parallel and perpendicular lines and use them to solve geometric problems (e.g., find the equation of a line parallel or perpendicular to a given line that passes through a given point).</p> <p>G-GPE.6. Find the point on a directed line segment between two given points that partitions the segment in a given ratio.</p> <p>G-GPE.7. Use coordinates to compute perimeters of polygons and areas of triangles and rectangles, e.g., using the distance formula.★</p>

Domain: Geometry (HS)

Sub Domain: Geometric Measurement & Dimensions

Grade	Common Core State Standard
HS	<p>Explain volume formulas and use them to solve problems</p> <p>G-GMD.1. Give an informal argument for the formulas for the circumference of a circle, area of a circle, volume of a cylinder, pyramid, and cone. <i>Use dissection arguments, Cavalieri's principle, and informal limit arguments.</i></p> <p>G-GMD.2. (+) Give an informal argument using Cavalieri's principle for the formulas for the volume of a sphere and other solid figures.</p> <p>G-GMD.3. Use volume formulas for cylinders, pyramids, cones, and spheres to solve problems.★</p> <p>Visualize relationships between two-dimensional and three-dimensional objects</p> <p>G-GMD.4. Identify the shapes of two-dimensional cross-sections of three-dimensional objects, and identify three-dimensional objects generated by rotations of two-dimensional objects.</p>

Domain: Geometry (HS)

Sub Domain: Modeling with Geometry

Grade	Common Core State Standard
HS	<p>Apply geometric concepts in modeling situations</p> <p>G-MG.1. Use geometric shapes, their measures, and their properties to describe objects (e.g., modeling a tree trunk or a human torso as a cylinder).★</p> <p>G-MG.2. Apply concepts of density based on area and volume in modeling situations (e.g., persons per square mile, BTUs per cubic foot).★</p> <p>G-MG.3. Apply geometric methods to solve design problems (e.g., designing an object or structure to satisfy physical constraints or minimize cost; working with typographic grid systems based on ratios).★</p>

Domain: Measurement and Data (K-5)

Grade	Common Core State Standard
K	<p>Describe and compare measurable attributes.</p> <p>K.MD.1. Describe measurable attributes of objects, such as length or weight. Describe several measurable attributes of a single object.</p> <p>K.MD.2. Directly compare two objects with a measurable attribute in common, to see which object has “more of”/“less of” the attribute, and describe the difference. <i>For example, directly compare the heights of two children and describe one child as taller/shorter.</i></p> <p>Classify objects and count the number of objects in each category.</p> <p>K.MD.3. Classify objects into given categories; count the numbers of objects in each category and sort the categories by count. (Limit category counts to be less than or equal to 10)</p>
1	<p>Measure lengths indirectly and by iterating length units.</p> <p>1.MD.1. Order three objects by length; compare the lengths of two objects indirectly by using a third object.</p> <p>1.MD.2. Express the length of an object as a whole number of length units, by laying multiple copies of a shorter object (the length unit) end to end; understand that the length measurement of an object is the number of same-size length units that span it with no gaps or overlaps. <i>Limit to contexts where the object being measured is spanned by a whole number of length units with no gaps or overlaps.</i></p> <p>Tell and write time.</p> <p>1.MD.3. Tell and write time in hours and half-hours using analog and digital clocks.</p> <p>Represent and interpret data.</p> <p>1.MD.4. Organize, represent, and interpret data with up to three categories; ask and answer questions about the total number of data points, how many in each category, and how many more or less are in one category than in another.</p>
2	<p>Measure and estimate lengths in standard units.</p> <p>2.MD.1. Measure the length of an object by selecting and using appropriate tools such as rulers, yardsticks, meter sticks, and measuring tapes.</p> <p>2.MD.2. Measure the length of an object twice, using length units of different lengths for the two measurements; describe how the two measurements relate to the size of the unit chosen.</p> <p>2.MD.3. Estimate lengths using units of inches, feet, centimeters, and meters.</p> <p>2.MD.4. Measure to determine how much longer one object is than another, expressing the length difference in terms of a standard length unit.</p> <p>Relate addition and subtraction to length.</p> <p>2.MD.5. Use addition and subtraction within 100 to solve word problems involving lengths that are given in the same units, e.g., by using drawings (such as drawings of rulers) and equations with a symbol for the unknown number to represent the problem.</p> <p>2.MD.6. Represent whole numbers as lengths from 0 on a number line diagram with equally spaced points corresponding to the numbers 0, 1, 2, ..., and represent whole-number sums and differences within 100 on a number line diagram.</p> <p>Work with time and money.</p> <p>2.MD.7. Tell and write time from analog and digital clocks to the nearest five minutes, using</p>

	<p>a.m. and p.m.</p> <p>2.MD.8. Solve word problems involving dollar bills, quarters, dimes, nickels, and pennies, using \$ and ¢ symbols appropriately. Example: If you have 2 dimes and 3 pennies, how many cents do you have?</p> <p>Represent and interpret data.</p> <p>2.MD.9. Generate measurement data by measuring lengths of several objects to the nearest whole unit, or by making repeated measurements of the same object. Show the measurements by making a line plot, where the horizontal scale is marked off in whole-number units.</p> <p>2.MD.10. Draw a picture graph and a bar graph (with single-unit scale) to represent a data set with up to four categories. Solve simple put-together, take-apart, and compare problems¹ using information presented in a bar graph.</p>
3	<p>Solve problems involving measurement and estimation of intervals of time, liquid volumes, and masses of objects.</p> <p>3.MD.1. Tell and write time to the nearest minute and measure time intervals in minutes. Solve word problems involving addition and subtraction of time intervals in minutes, e.g., by representing the problem on a number line diagram.</p> <p>3.MD.2. Measure and estimate liquid volumes and masses of objects using standard units of grams (g), kilograms (kg), and liters (l). Add, subtract, multiply, or divide to solve one-step word problems involving masses or volumes that are given in the same units, e.g., by using drawings (such as a beaker with a measurement scale) to represent the problem. (Excludes compound units such as cm³ and finding the geometric volume of a container. Excludes multiplicative comparison problems (problems involving notions of “times as much”)</p> <p>Represent and interpret data.</p> <p>3.MD.3. Draw a scaled picture graph and a scaled bar graph to represent a data set with several categories. Solve one- and two-step “how many more” and “how many less” problems using information presented in scaled bar graphs. <i>For example, draw a bar graph in which each square in the bar graph might represent 5 pets.</i></p> <p>3.MD.4. Generate measurement data by measuring lengths using rulers marked with halves and fourths of an inch. Show the data by making a line plot, where the horizontal scale is marked off in appropriate units— whole numbers, halves, or quarters.</p> <p>Geometric measurement: understand concepts of area and relate area to multiplication and to addition.</p> <p>3.MD.5. Recognize area as an attribute of plane figures and understand concepts of area measurement.</p> <p>3.MD.6. Measure areas by counting unit squares (square cm, square m, square in, square ft, and improvised units).</p> <p>3.MD.7. Relate area to the operations of multiplication and addition.</p> <p>Geometric measurement: recognize perimeter as an attribute of plane figures and distinguish between linear and area measures.</p> <p>3.MD.8. Solve real world and mathematical problems involving perimeters of polygons, including finding the perimeter given the side lengths, finding an unknown side length, and exhibiting rectangles with the same perimeter and different areas or with the same area and different perimeters.</p>

4	<p>Solve problems involving measurement and conversion of measurements from a larger unit to a smaller unit.</p> <p>4.MD.1. Know relative sizes of measurement units within one system of units including km, m, cm; kg, g; lb, oz.; l, ml; hr, min, sec. Within a single system of measurement, express measurements in a larger unit in terms of a smaller unit. Record measurement equivalents in a two-column table. <i>For example, know that 1 ft is 12 times as long as 1 in. Express the length of a 4 ft snake as 48 in. Generate a conversion table for feet and inches listing the number pairs (1, 12), (2, 24), (3, 36), ...</i></p> <p>4.MD.2. Use the four operations to solve word problems involving distances, intervals of time, liquid volumes, masses of objects, and money, including problems involving simple fractions or decimals, and problems that require expressing measurements given in a larger unit in terms of a smaller unit. Represent measurement quantities using diagrams such as number line diagrams that feature a measurement scale.</p> <p>4.MD.3. Apply the area and perimeter formulas for rectangles in real world and mathematical problems. <i>For example, find the width of a rectangular room given the area of the flooring and the length, by viewing the area formula as a multiplication equation with an unknown factor.</i></p> <p>Represent and interpret data.</p> <p>4.MD.4. Make a line plot to display a data set of measurements in fractions of a unit ($\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{8}$). Solve problems involving addition and subtraction of fractions by using information presented in line plots. <i>For example, from a line plot find and interpret the difference in length between the longest and shortest specimens in an insect collection.</i></p> <p>Geometric measurement: understand concepts of angle and measure angles.</p> <p>4.MD.5. Recognize angles as geometric shapes that are formed wherever two rays share a common endpoint, and understand concepts of angle measurement:</p> <p>4.MD.6. Measure angles in whole-number degrees using a protractor. Sketch angles of specified measure.</p> <p>4.MD.7. Recognize angle measure as additive. When an angle is decomposed into non-overlapping parts, the angle measure of the whole is the sum of the angle measures of the parts. Solve addition and subtraction problems to find unknown angles on a diagram in real world and mathematical problems, e.g., by using an equation with a symbol for the unknown angle measure.</p>
5	<p>Convert like measurement units within a given measurement system.</p> <p>5.MD.1. Convert among different-sized standard measurement units within a given measurement system (e.g., convert 5 cm to 0.05 m), and use these conversions in solving multi-step, real world problems.</p> <p>Represent and interpret data.</p> <p>5.MD.2. Make a line plot to display a data set of measurements in fractions of a unit ($\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{8}$). Use operations on fractions for this grade to solve problems involving information presented in line plots. <i>For example, given different measurements of liquid in identical beakers, find the amount of liquid each beaker would contain if the total amount in all the beakers were redistributed equally.</i></p> <p>Geometric measurement: understand concepts of volume and relate volume to multiplication and to addition.</p> <p>5.MD.3. Recognize volume as an attribute of solid figures and understand concepts of volume</p>

	<p>measurement.</p> <p>5.MD.4. Measure volumes by counting unit cubes, using cubic cm, cubic in, cubic ft, and improvised units.</p> <p>5.MD.5. Relate volume to the operations of multiplication and addition and solve real world and mathematical problems involving volume.</p>
--	---

Domain: Statistics and Probability (6-8)

Grade	Common Core State Standard
6	<p>Develop understanding of statistical variability.</p> <p>6.SP.1. Recognize a statistical question as one that anticipates variability in the data related to the question and accounts for it in the answers. <i>For example, “How old am I?” is not a statistical question, but “How old are the students in my school?” is a statistical question because one anticipates variability in students’ ages.</i></p> <p>6.SP.2. Understand that a set of data collected to answer a statistical question has a distribution which can be described by its center, spread, and overall shape.</p> <p>6.SP.3. Recognize that a measure of center for a numerical data set summarizes all of its values with a single number, while a measure of variation describes how its values vary with a single number.</p> <p>Summarize and describe distributions.</p> <p>6.SP.4. Display numerical data in plots on a number line, including dot plots, histograms, and box plots.</p> <p>6.SP.5. Summarize numerical data sets in relation to their context.</p>
7	<p>Use random sampling to draw inferences about a population.</p> <p>7.SP.1. Understand that statistics can be used to gain information about a population by examining a sample of the population; generalizations about a population from a sample are valid only if the sample is representative of that population. Understand that random sampling tends to produce representative samples and support valid inferences.</p> <p>7.SP.2. Use data from a random sample to draw inferences about a population with an unknown characteristic of interest. Generate multiple samples (or simulated samples) of the same size to gauge the variation in estimates or predictions. <i>For example, estimate the mean word length in a book by randomly sampling words from the book; predict the winner of a school election based on randomly sampled survey data. Gauge how far off the estimate or prediction might be.</i></p> <p>Draw informal comparative inferences about two populations.</p> <p>7.SP.3. Informally assess the degree of visual overlap of two numerical data distributions with similar variabilities, measuring the difference between the centers by expressing it as a multiple of a measure of variability. <i>For example, the mean height of players on the basketball team is 10 cm greater than the mean height of players on the soccer team, about twice the variability (mean absolute deviation) on either team; on a dot plot, the separation between the two distributions of heights is noticeable.</i></p> <p>7.SP.4. Use measures of center and measures of variability for numerical data from random samples to draw informal comparative inferences about two populations. <i>For example, decide whether the words in a chapter of a seventh-grade science book are generally longer than the words in a chapter of a fourth-grade science book.</i></p> <p>Investigate chance processes and develop, use, and evaluate probability models.</p> <p>7.SP.5. Understand that the probability of a chance event is a number between 0 and 1 that expresses the likelihood of the event occurring. Larger numbers indicate greater likelihood. A probability near 0 indicates an unlikely event, a probability around 1/2 indicates an event that is neither unlikely nor likely, and a probability near 1 indicates a likely event.</p>

	<p>7.SP.6. Approximate the probability of a chance event by collecting data on the chance process that produces it and observing its long-run relative frequency, and predict the approximate relative frequency given the probability. <i>For example, when rolling a number cube 600 times, predict that a 3 or 6 would be rolled roughly 200 times, but probably not exactly 200 times.</i></p> <p>7.SP.7. Develop a probability model and use it to find probabilities of events. Compare probabilities from a model to observed frequencies; if the agreement is not good, explain possible sources of the discrepancy.</p> <p>7.SP.8. Find probabilities of compound events using organized lists, tables, tree diagrams, and simulation.</p>
8	<p>Investigate patterns of association in bivariate data.</p> <p>8.SP.1. Construct and interpret scatter plots for bivariate measurement data to investigate patterns of association between two quantities. Describe patterns such as clustering, outliers, positive or negative association, linear association, and nonlinear association.</p> <p>8.SP.2. Know that straight lines are widely used to model relationships between two quantitative variables. For scatter plots that suggest a linear association, informally fit a straight line, and informally assess the model fit by judging the closeness of the data points to the line.</p> <p>8.SP.3. Use the equation of a linear model to solve problems in the context of bivariate measurement data, interpreting the slope and intercept. <i>For example, in a linear model for a biology experiment, interpret a slope of 1.5 cm/hr as meaning that an additional hour of sunlight each day is associated with an additional 1.5 cm in mature plant height.</i></p> <p>8.SP.4. Understand that patterns of association can also be seen in bivariate categorical data by displaying frequencies and relative frequencies in a two-way table. Construct and interpret a two-way table summarizing data on two categorical variables collected from the same subjects. Use relative frequencies calculated for rows or columns to describe possible association between the two variables. <i>For example, collect data from students in your class on whether or not they have a curfew on school nights and whether or not they have assigned chores at home. Is there evidence that those who have a curfew also tend to have chores?</i></p>

Domain: Statistics & Probability (HS)

Sub Domain: Interpreting Categorical & Quantitative Data

Grade	Common Core State Standard
HS	<p>Summarize, represent, and interpret data on a single count or measurement variable</p> <p>S-ID.1. Represent data with plots on the real number line (dot plots, histograms, and box plots).</p> <p>S-ID.2. Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets.</p> <p>S-ID.3. Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers).</p> <p>S-ID.4. Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve.</p> <p>Summarize, represent, and interpret data on two categorical and quantitative variables</p> <p>S-ID.5. Summarize categorical data for two categories in two-way frequency tables. Interpret relative frequencies in the context of the data (including joint, marginal, and conditional relative frequencies). Recognize possible associations and trends in the data.</p> <p>S-ID.6. Represent data on two quantitative variables on a scatter plot, and describe how the variables are related.</p> <p>Interpret linear models</p> <p>S-ID.7. Interpret the slope (rate of change) and the intercept (constant term) of a linear model in the context of the data.</p> <p>S-ID.8. Compute (using technology) and interpret the correlation coefficient of a linear fit.</p> <p>S-ID.9. Distinguish between correlation and causation.</p>

Domain: Statistics & Probability (HS)

Sub Domain: Making Inferences & Justifying Conclusions

Grade	Common Core State Standard
HS	<p>Understand and evaluate random processes underlying statistical experiments</p> <p>S-IC.1. Understand statistics as a process for making inferences about population parameters based on a random sample from that population.</p> <p>S-IC.2. Decide if a specified model is consistent with results from a given data-generating process, e.g., using simulation. <i>For example, a model says a spinning coin falls heads up with probability 0.5. Would a result of 5 tails in a row cause you to question the model?</i></p> <p>Make inferences and justify conclusions from sample surveys, experiments, and observational studies</p> <p>S-IC.3. Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each.</p> <p>S-IC.4. Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling.</p> <p>S-IC.5. Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant.</p> <p>S-IC.6. Evaluate reports based on data.</p>

Domain: Statistics & Probability (HS)

Sub Domain: Conditional Probability & the Rules of Probability

Grade	Common Core State Standard
HS	<p>Understand independence and conditional probability and use them to interpret data</p> <p>S-CP.1. Describe events as subsets of a sample space (the set of outcomes) using characteristics (or categories) of the outcomes, or as unions, intersections, or complements of other events (“or,” “and,” “not”).</p> <p>S-CP.2. Understand that two events A and B are independent if the probability of A and B occurring together is the product of their probabilities, and use this characterization to determine if they are independent.</p> <p>S-CP.3. Understand the conditional probability of A given B as $P(A \text{ and } B)/P(B)$, and interpret independence of A and B as saying that the conditional probability of A given B is the same as the probability of A, and the conditional probability of B given A is the same as the probability of B.</p> <p>S-CP.4. Construct and interpret two-way frequency tables of data when two categories are associated with each object being classified. Use the two-way table as a sample space to decide if events are independent and to approximate conditional probabilities. <i>For example, collect data from a random sample of students in your school on their favorite subject among math, science, and English. Estimate the probability that a randomly selected student from your school will favor science given that the student is in tenth grade. Do the same for other subjects and compare the results.</i></p> <p>S-CP.5. Recognize and explain the concepts of conditional probability and independence in everyday language and everyday situations. <i>For example, compare the chance of having lung cancer if you are a smoker with the chance of being a smoker if you have lung cancer.</i></p> <p>Use the rules of probability to compute probabilities of compound events in a uniform probability model</p> <p>S-CP.6. Find the conditional probability of A given B as the fraction of B's outcomes that also belong to A, and interpret the answer in terms of the model.</p> <p>S-CP.7. Apply the Addition Rule, $P(A \text{ or } B) = P(A) + P(B) - P(A \text{ and } B)$, and interpret the answer in terms of the model.</p> <p>S-CP.8. (+) Apply the general Multiplication Rule in a uniform probability model, $P(A \text{ and } B) = P(A)P(B A) = P(B)P(A B)$, and interpret the answer in terms of the model.</p> <p>S-CP.9. (+) Use permutations and combinations to compute probabilities of compound events and solve problems.</p>

Domain: Statistics & Probability (HS)

Sub Domain: Using Probability to Make Decisions

Grade	Common Core State Standard
HS	<p>Calculate expected values and use them to solve problems</p> <p>S-MD.1. (+) Define a random variable for a quantity of interest by assigning a numerical value to each event in a sample space; graph the corresponding probability distribution using the same graphical displays as for data distributions.</p> <p>S-MD.2. (+) Calculate the expected value of a random variable; interpret it as the mean of the probability distribution.</p> <p>S-MD.3. (+) Develop a probability distribution for a random variable defined for a sample space in which theoretical probabilities can be calculated; find the expected value. <i>For example, find the theoretical probability distribution for the number of correct answers obtained by guessing on all five questions of a multiple-choice test where each question has four choices, and find the expected grade under various grading schemes.</i></p> <p>S-MD.4. (+) Develop a probability distribution for a random variable defined for a sample space in which probabilities are assigned empirically; find the expected value. <i>For example, find a current data distribution on the number of TV sets per household in the United States, and calculate the expected number of sets per household. How many TV sets would you expect to find in 100 randomly selected households?</i></p> <p>Use probability to evaluate outcomes of decisions</p> <p>S-MD.5. (+) Weigh the possible outcomes of a decision by assigning probabilities to payoff values and finding expected values.</p> <p>S-MD.6. (+) Use probabilities to make fair decisions (e.g., drawing by lots, using a random number generator).</p> <p>S-MD.7. (+) Analyze decisions and strategies using probability concepts (e.g., product testing, medical testing, pulling a hockey goalie at the end of a game).</p>

Alignment of Common Core State Standards to Core Curricular Tools

Common Core State Standards	
Think Math Chapter 1 : Numbers to Ten	Counting and Cardinality K.CC.4 Understand the relationship between numbers and quantities; connect counting to cardinality. <ol style="list-style-type: none"> When counting objects, say the number names in the standard order, pairing each object with one and only one number name and each number name with one and only one object. Understand that the last number name said tells the number of objects counted. The number of objects is the same regardless of their arrangement or the order in which they were counted. Understand that each successive number name refers to a quantity that is one larger.
	Operations and Algebraic Thinking K.OA.3 Decompose numbers less than or equal to 10 into pairs in more than one way, e.g., by using objects or drawings, and record each decomposition by a drawing or equation (e.g., $5 = 2 + 3$ and $5 = 4 + 1$).
	Numbers and Operations in Base Ten K.NBT.1 Compose and decompose numbers from 11 to 19 into ten ones and some further ones, e.g., by using objects or drawings, and record each composition or decomposition by a drawing or equations (e.g., $18 = 10 + 8$); understand that these numbers are composed of ten ones and one, two, three, four, five, six, seven, eight, or nine ones.
Anticipated Time: 4 weeks	

Think Math Chapter 2: Two-Dimensional Figures and Quantities	Common Core State Standards
	<p>Counting and Cardinality</p> <p>K.CC.6</p> <p>Identify whether the number of objects in one group is greater than, less than, or equal to the number of objects in another group, e.g., by using matching and counting strategies. (include groups with up to ten objects)</p> <p>Geometry</p> <p>K.G.2</p> <p>Correctly name shapes regardless of their orientations or overall size.</p> <p>K.G.6</p> <p>Compose simple shapes to form larger shapes. For example, “Can you join these two triangles with full sides touching to make a rectangle?”</p>
	Anticipated Time: 4 weeks

Think Math Chapter 3: Patterns and Sorting	Common Core State Standards
	<p>Measurement and Data</p> <p>K.MD.3</p> <p>Classify objects into categories; count the number of objects in each category and sort the categories by count. (limit category counts to be less than or equal to 10)</p>
Anticipated Time: 3 weeks	

Think Math Chapter 4: Moving on the Number Line	Common Core State Standards
	<p>Counting and Cardinality</p> <p>K.CC.1 Count to 100 by ones and tens.</p> <p>K.CC.2 Count forward beginning from a given number within the known sequence (instead of having to begin with 1).</p> <p>K.CC.7 Compare two numbers between 1 and 10 presented as written numerals.</p>
Anticipated Time: 3 weeks	

Think Math Chapter 5: Making and Breaking Numbers	Common Core State Standards
	<p>Counting and Cardinality</p> <p>K.CC.3 Write numbers from 0 to 20. Represent a number of objects with a written numeral 0-20 (with 0 representing a count of no objects).</p> <p>K.CC.5 Count to answer “how many?” questions about as many as 20 things arranged in a line, rectangular array, or a circle, or as many as 10 things in a scattered configuration; given a number from 1-20, count out that many objects.</p> <p>Operations and Algebraic Thinking</p> <p>K.OA.1 Represent addition and subtraction with objects, fingers, mental images, drawings*, sounds (e.g., claps), acting out situations, verbal explanations, expressions, or equations. *Drawings need not show details, but should show the mathematics in the problem</p>
Anticipated Time: 4 weeks	

Think Math Chapter 6: Stories in Numbers, Words, and Pictures	Common Core State Standards
	<p>Operations and Algebraic Thinking</p> <p>K.OA.2 Solve addition and subtraction word problems, and add and subtract within 10, e.g., by using objects or drawings to represent the problem.</p> <p>K.OA.4 For any number from 1 to 9, find the number that makes 10 when added to the given number, e.g., by using objects or drawings, and record the answer with a drawing or equation</p> <p>K.OA.5 Fluently add and subtract within 5.</p>
Anticipated Time: 4 weeks	

Think Math Chapter 7: Three-Dimensional Geometry	Common Core State Standards
	<p>Geometry</p> <p>K.G.1 Describe objects in the environment using names of shapes, and describe the relative positions of these objects using terms such as above, below, beside, in front of, behind, and next to.</p> <p>K.G.3 Identify shapes as two-dimensional (lying in a plane, “flat”) or three dimensional (“solid”).</p> <p>K.G.4 Analyze and compare two- and three-dimensional shapes, in different sizes and orientations, using informal language to describe their similarities, differences, and parts (e.g., number of sides and vertices/”corners”) and other attributes (e.g., having sides of equal length).</p> <p>K.G.5 Model shapes in the world by building shapes from components (e.g., sticks and clay balls) and drawing shapes</p>
Anticipated Time: 4 weeks	

Think Math Chapter 8: Measurement	Common Core State Standards
	<p>Measurement and Data</p> <p>K.MD.1 Describe measurable attributes of objects, such as length or weight. Describe several measurable attributes of a single object.</p> <p>K.MD.2 Directly compare two objects with a measurable attribute in common, to see which object has “more of”/”less of” the attribute, and describe the difference. <i>For example, directly compare heights of two children and describe one child as taller/shorter.</i></p>
Anticipated Time: 3 weeks	

Think Math Chapter 9: Large Numbers	Common Core State Standards
	<p>Counting and Cardinality</p> <p>K.CC.1 Count to 100 by ones and tens.</p> <p>Numbers and Operations in Base Ten</p> <p>K.NBT.1 Compose and decompose numbers from 11 to 19 into ten ones and some further ones, e.g., by using objects or drawings, and record each composition or decomposition by a drawing or equations (e.g., $18 = 10 + 8$); understand that these numbers are composed of ten ones and one, two, three, four, five, six, seven, eight, or nine ones.</p>
Anticipated Time: 3 weeks	

Alignment of Common Core State Standards to Core Curricular Tools

Think Math Chapter 1 : Two-Dimensional Figures and Patterns	Common Core State Standards
	<p>Geometry</p> <p>1.G.1</p> <p>Distinguish between defining attributes (e.g., triangles are closed and three-sided) versus non-defining attributes (e.g., color, orientation, overall size); build and draw shapes to possess defining attributes.</p>
Anticipated Time: 2 weeks	

Think Math Chapter 2: Number Lines and Time	Common Core State Standards
	<p>Operations and Algebraic Thinking</p> <p>1.OA.5</p> <p>Relate counting to addition and subtraction (e.g., by counting on 2 to add 2).</p> <p>Measurement and Data</p> <p>1.MD.3</p> <p>Tell and write time in hours and half-hours using analog and digital clocks.</p>
Anticipated Time: 2 weeks	

Think Math Chapter 3: Skip-Counting and Money	Common Core State Standards
	Teachers should use this chapter to reinforce the Standards for Mathematical Practice.
Anticipated Time: 1.5 weeks	

Think Math Chapter 4: Exploring Addition and Subtraction	Common Core State Standards
	<p>Operations and Algebraic Thinking</p> <p>1.OA.8</p> <p>Determine the unknown whole number in an addition or subtraction equation relating three whole numbers. <i>For example, determine the unknown number that makes the equation true in each of the equations $8 + ? = 11$, $5 = _ - 3$, $6 + 6 = _$.</i></p>
Anticipated Time: 2 weeks	

Think Math Chapter 5: Working with Tens	Common Core State Standards
	<p>Operations and Algebraic Thinking</p> <p>1.OA.8</p> <p>Determine the unknown whole number in an addition or subtraction equation relating three whole numbers. <i>For example, determine the unknown number that makes the equation true in each of the equations $8 + ? = 11$, $5 = _ - 3$, $6 + 6 = _$.</i></p> <p>Number and Operations in Base Ten</p> <p>1.NBT.2a</p> <p>Understand that the two digits of a two-digit number represent amounts of tens and ones. Understand the following as special cases: 10 can be thought of as bundle of ten ones – called a “ten.”</p> <p>1.NBT.2b</p> <p>Understand that the two digits of a two-digit number represent amounts of tens and ones. Understand the following as special cases: The numbers from 11 to 19 are composed of a ten and a one, two, three, four, five, six, seven, eight or nine ones.</p> <p>1.NBT.2c</p> <p>Understand that the two digits of a two-digit number represent amounts of tens and ones. Understand the following as special cases: The numbers 10, 20, 30, 40, 50, 60, 70, 80, 90 refer to one, two three, four, five, six, seven, eight, or nine tens (and 0 ones).</p> <p>Measurement and Data</p> <p>1.MD.3</p> <p>Tell and write time in hours and half-hours using analog and digital clocks.</p>
	Anticipated Time: 3 weeks

Think Math Chapter 6: Data and Probability	Common Core State Standards
	Measurement and Data 1.MD.4 Organize, represent, and interpret data with up to three categories; ask and answer questions about the total number of data points, how many in each category, and how many more or less are in one category than in another.
	Anticipated Time: 1.5 weeks

Think Math Chapter 7: Working with Large Numbers	Common Core State Standards
	Number and Operations in Base Ten 1.NBT.1 Count to 120, starting at any number less than 120. In this range, read and write numerals and represent a number of objects with a written numeral. 1.NBT.4 Add within 100, including adding a two-digit number and a one-digit number, and adding a two-digit number and a multiple of 10, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning used. Understand that in adding two-digit numbers, one adds tens and tens, ones and ones; and sometimes it is necessary to compose a ten. 1.NBT.5 Given a two-digit number, mentally find 10 more or 10 less than the number, without having to count; explain the reasoning used. 1.NBT.6 Subtract multiples of 10 in the range 10-90 from multiples of 10 in the range 10-90 (positive or zero differences), using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning used.
	Anticipated Time: 3 weeks

Think Math Chapter 8: Doubling, Halving, and Fractions	Common Core State Standards
	<p>Geometry</p> <p>1.G.3</p> <p>Partition circles and rectangles into two and four equal shares, describe the shares using the words <i>halves</i>, <i>fourths</i>, and <i>quarters</i> and use the phrases <i>half of</i>, <i>fourth of</i>, and <i>quarter of</i>. Describe the whole as two of, or four of the shares. Understand for these examples that decomposing into more equal shares creates smaller shares.</p>
Anticipated Time: 3 weeks	

Think Math Chapter 9: Modeling Addition and Subtraction	Common Core State Standards
	<p>Operations and Algebraic Thinking</p> <p>1.OA.1</p> <p>Use addition and subtraction within 20 to solve word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions, e.g., by using objects, drawings, and equations with a symbol for the unknown number to represent the problem.</p> <p>1.OA.4</p> <p>Understand subtraction as an unknown-addend problem. <i>For example, subtract $10 - 8$ by finding the number that makes 10 when added to 8.</i></p> <p>1.OA.6</p> <p>Add and subtract within 20, demonstrating fluency for addition and subtraction within 10. Use strategies such as counting on; making ten (e.g., $8 + 6 = 8 + 2 + 4 = 10 + 4 = 14$); decomposing a number leading to a ten (e.g., $13 - 4 = 13 - 3 - 1 = 10 - 1 = 9$); using the relationship between addition and subtraction (e.g., knowing that $8 + 4 = 12$, one knows $12 - 8 = 4$); and creating equivalent but easier or known sums (e.g., adding $6 + 7$ by creating the known equivalent $6 + 6 + 1 = 12 + 1 = 13$).</p>
Anticipated Time: 3 weeks	

Think Math Chapter 10: Maps, Grids, and Geometric Figures	Common Core State Standards
	<p>Geometry</p> <p>1.G.2</p> <p>Compose two-dimensional shapes (rectangles, squares, trapezoids, triangles, half-circles, and quarter-circles) or three-dimensional shapes (cubes, right rectangular prisms, right circular cones, and right circular cylinders) to create a composite shape, and compose new shapes from the composite shape. *Students do not need to learn formal names such as “right rectangular prism”</p>
Anticipated Time: 2.5 weeks	

Think Math Chapter 11: Comparing Numbers, Temperatures, and Weights	Common Core State Standards
	<p>Operations and Algebraic Thinking</p> <p>1.OA.7</p> <p>Understand the meaning of the equal sign, and determine if equations involving addition and subtraction are true or false. For example, which of the following equations are true and which are false? $6 = 6$, $7 = 8 - 1$, $5 + 2 = 2 + 5$, $4 + 1 = 5 + 2$.</p> <p>Number and Operation in Base Ten</p> <p>1.NBT.3</p> <p>Compare two two-digit numbers based on meanings of the tens and ones digits, recording the results of comparisons with the symbols $>$, $=$, and $<$.</p>
Anticipated Time: 2 weeks	

Think Math Chapter 12: Length, Area, and Capacity	Common Core State Standards
	<p>Measurement and Data</p> <p>1.MD.1 Order three objects by length; compare the lengths of two objects indirectly by using a third object.</p> <p>1.MD.2 Express the length of an object as a whole number of length units, by laying multiple copies of a short object (the length unit) end to end; understand that the length measurement of an object is the number of the same-size length units that span it with no gaps or overlaps. <i>Limit to contexts where the objects being measured is spanned by a whole number of length units with no gaps or overlaps.</i></p>
Anticipated Time: 2.5 weeks	

Think Math Chapter 13: Making and Breaking Numbers	Common Core State Standards
	<p>Operations and Algebraic Thinking</p> <p>1.OA.2 Solve word problems that call for addition of three whole numbers whose sum is less than or equal to 20, e.g., by using objects, drawings, and equations with a symbol for the unknown number to represent the problem.</p> <p>1.OA.3 Apply properties of operations as strategies to add and subtract. <i>Examples: If $8 + 3 = 11$ is known, then $3 + 8 = 11$ is also known. (Commutative property of addition) To add $2 + 6 + 4$, the second two numbers can be added to make a ten, so $2 + 6 + 4 = 2 + 10 = 12$ (Associative property of addition)</i> *Students need not use formal terms for these properties.</p>
Anticipated Time: 3 weeks	

Think Math Chapter 14: Extending Addition and Subtraction	Common Core State Standards
	Number and Operations in Base Ten 1.NBT.4 Add within 100, including adding a two-digit number and a one-digit number, and adding a two-digit number and a multiple of 10, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning used. Understand that in adding two-digit numbers, one adds tens and tens, ones and ones; and sometimes it is necessary to compose a ten. 1.NBT.6 Subtract multiples of 10 in the range 10-90 from multiples of 10 in the range 10-90 (positive or zero differences), using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning used.
	Anticipated Time: 2 weeks

Think Math Chapter 15: Exploring Rules and Patterns	Common Core State Standards
	Teachers should use this chapter to reinforce the Standards for Mathematical Practice.
Anticipated Time: 2 weeks	

Alignment of Common Core State Standards to Core Curricular Tools

Think Math Chapter 1 : Counting Strategies	Common Core State Standards
	<p>Operations and Algebraic Thinking</p> <p>2.OA.1. Use addition and subtraction within 100 to solve one- and two-step word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.¹</p> <p>2.OA.2 Fluently add and subtract within 20 using mental strategies. By end of Grade 2, know from memory all sums of two one-digit numbers.</p> <p>Numbers and Operations in Base Ten</p> <p>2.NBT.2 Count within 1000; skip-count by 5s, 10s, and 100s.</p> <p>Measurement and Data</p> <p>2.MD.6 Represent whole numbers as lengths from 0 on a number line diagram with equally spaced points corresponding to the numbers 0, 1, 2, . . . , and represent whole-number sums and differences within 100 on a number line diagram.</p>
Anticipated Time: 3 weeks	
Think Math Chapter 2: Working with 10	Common Core State Standards
	<p>Operations and Algebraic Thinking</p> <p>2.OA.1 Use addition and subtraction within 100 to solve one- and two-step word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.</p> <p>2.OA.2 Fluently add and subtract within 20 using mental strategies. By end of Grade 2, know from memory all sums of two one-digit numbers.</p> <p>2.OA.3. Determine whether a group of objects (up to 20) has an odd or even number of members, e.g., by pairing objects or counting them by 2s; write an equation to express an even number as a sum of two equal addends.</p> <p>Numbers and Operations in Base Ten</p> <p>2.NBT.8. Mentally add 10 or 100 to a given number 100–900, and mentally subtract 10 or 100 from a given number 100–900.</p>
Anticipated Time: 2 weeks	

Think Math Chapter 3: Place Value and Sorting	Common Core State Standards
	<p>Numbers and Operations in Base Ten</p> <p>2.NBT.1. Understand that the three digits of a three-digit number represent amounts of hundreds, tens, and ones; e.g., 706 equals 7 hundreds, 0 tens, and 6 ones. Understand the following as special cases:</p> <p>2.NBT.1a. 100 can be thought of as a bundle of ten tens—called a “hundred.”</p> <p>2.NBT.1b. The numbers 100, 200, 300, 400, 500, 600, 700, 800, 900 refer to one, two, three, four, five, six, seven, eight, or nine hundreds (and 0 tens and 0 ones).</p> <p>2.NBT.2 Count within 1000; skip-count by 5s, 10s, and 100s.</p> <p>2.NBT.3 Read and write numbers to 1000 using base-ten numerals, number names, and expanded form.</p> <p>2.NBT.4 Compare two three-digit numbers based on meanings of the hundreds, tens, and ones digits, using $>$, $=$, and $<$ symbols to record the results of comparisons.</p>
Anticipated Time: 2 weeks	

Think Math Chapter 4: Addition and Subtraction with Place Value	Common Core State Standards
	<p>Operations and Algebraic Thinking</p> <p>2.OA.1 Use addition and subtraction within 100 to solve one- and two-step word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.</p> <p>Numbers and Operations in Base Ten</p> <p>2.NBT.1a. 100 can be thought of as a bundle of ten tens—called a “hundred.”</p> <p>2.NBT.5 Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.</p> <p>Measurement and Data</p> <p>2.MD.8. Solve word problems involving dollar bills, quarters, dimes, nickels, and pennies, using \$ and ¢ symbols appropriately. Example: If you have 2 dimes and 3 pennies, how many cents do you have?</p>
Anticipated Time: 2 weeks	

Think Math Chapter 5: Probability and Data	Common Core State Standards
	Measurement and Data 2.MD.9. Generate measurement data by measuring lengths of several objects to the nearest whole unit, or by making repeated measurements of the same object. Show the measurements by making a line plot, where the horizontal scale is marked off in whole-number units. 2.MD.10 Draw a picture graph and a bar graph (with single unit scale) to represent a data set with up to four categories. Solve simple put-together, take-apart, and compare problems using information presented in a bar graph.
	Anticipated Time: 4 weeks

Think Math Chapter 6: Measuring Time	Common Core State Standards
	Measurement and Data 2.MD.7. Tell and write time from analog and digital clocks to the nearest five minutes, using a.m. and p.m.
	Anticipated Time: 2 weeks

Think Math Chapter 7: Doubling, Halving, and Fractions	Common Core State Standards
	<p>Operations and Algebraic Thinking 2.OA.3. Determine whether a group of objects (up to 20) has an odd or even number of members, e.g., by pairing objects or counting them by 2s; write an equation to express an even number as a sum of two equal addends.</p> <p>Geometry 2.G.3. Partition circles and rectangles into two, three, or four equal shares, describe the shares using the words halves, thirds, half of, a third of, etc., and describe the whole as two halves, three thirds, four fourths. Recognize that equal shares of identical wholes need not have the same shape.</p>
Anticipated Time: 2 weeks	

Think Math Chapter 8: Building Addition and Subtraction Fluency	Common Core State Standards
	<p>Operations and Algebraic Thinking 2.OA.1. Use addition and subtraction within 100 to solve one- and two-step word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.¹ 2.OA.2. Fluently add and subtract within 20 using mental strategies.² By end of Grade 2, know from memory all sums of two one-digit numbers.</p> <p>Numbers and Operations in Base 10 2.NBT.5. Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction. 2.NBT.7. Add and subtract within 1000, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method. Understand that in adding or subtracting three-digit numbers, one adds or subtracts hundreds and hundreds, tens and tens, ones and ones; and sometimes it is necessary to compose or decompose tens or hundreds. 2.NBT.8. Mentally add 10 or 100 to a given number 100–900, and mentally subtract 10 or 100 from a given number 100–900. 2.NBT.9. Explain why addition and subtraction strategies work, using place value and the properties of operations.¹</p> <p>Measurement and Data 2.MD.6. Represent whole numbers as lengths from 0 on a number line diagram with equally spaced points corresponding to the numbers 0, 1, 2, ..., and represent whole-number sums and differences within 100 on a number line diagram. 2.MD.8. Solve word problems involving dollar bills, quarters, dimes, nickels, and pennies, using \$ and ¢ symbols appropriately. Example: If you have 2 dimes and 3 pennies, how many cents do you have?</p>
Anticipated Time: 3 weeks	

Think Math Chapter 9: Two-Dimensional Figures and Spatial Sense	Common Core State Standards
	<p>Geometry</p> <p>2.G.1. Recognize and draw shapes having specified attributes, such as a given number of angles or a given number of equal faces.¹ Identify triangles, quadrilaterals, pentagons, hexagons, and cubes.</p> <p>2.G.2. Partition a rectangle into rows and columns of same-size squares and count to find the total number of them.</p>
Anticipated Time: 2 weeks	

Think Math Chapter 10: Adding and Subtracting Larger Numbers	Common Core State Standards
	<p>Number and Operations in Base 10</p> <p>2.NBT.5. Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.</p> <p>2.NBT.6. Add up to four two-digit numbers using strategies based on place value and properties of operations.</p> <p>2.NBT.7. Add and subtract within 1000, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method. Understand that in adding or subtracting three-digit numbers, one adds or subtracts hundreds and hundreds, tens and tens, ones and ones; and sometimes it is necessary to compose or decompose tens or hundreds.</p> <p>2.NBT.8. Mentally add 10 or 100 to a given number 100–900, and mentally subtract 10 or 100 from a given number 100–900</p> <p>Measurement and Data</p> <p>2.MD.8. Solve word problems involving dollar bills, quarters, dimes, nickels, and pennies, using \$ and ¢ symbols appropriately. Example: If you have 2 dimes and 3 pennies, how many cents do you have?</p>
Anticipated Time: 3 weeks	

Think Math Chapter 11: Skip Counting and Equivalent Sets	Common Core State Standards
	<p>Operations and Algebraic Thinking 2.OA.4. Use addition to find the total number of objects arranged in rectangular arrays with up to 5 rows and up to 5 columns; write an equation to express the total as a sum of equal addends.</p> <p>Number and Operations in Base 10 2.NBT.2. Count within 1000; skip-count by 5s, 10s, and 100s.</p>
Anticipated Time: 2 weeks	

Think Math Chapter 12: Measuring Lengths	Common Core State Standards
	<p>Measurement and Data 2.MD.1. Measure the length of an object by selecting and using appropriate tools such as rulers, yardsticks, meter sticks, and measuring tapes. 2.MD.2. Measure the length of an object twice, using length units of different lengths for the two measurements; describe how the two measurements relate to the size of the unit chosen. 2.MD.3. Estimate lengths using units of inches, feet, centimeters, and meters. 2.MD.4. Measure to determine how much longer one object is than another, expressing the length difference in terms of a standard length unit. 2.MD.5. Use addition and subtraction within 100 to solve word problems involving lengths that are given in the same units, e.g., by using drawings (such as drawings of rulers) and equations with a symbol for the unknown number to represent the problem.</p>
Anticipated Time: 2 weeks	

Think Math Chapter 13: Exploring Multiplication and Division	Common Core State Standards
	<p>Operations and Algebraic Thinking 2.OA.4. Use addition to find the total number of objects arranged in rectangular arrays with up to 5 rows and up to 5 columns; write an equation to express the total as a sum of equal addends.</p> <p>Measurement and Data 2.MD.8. Solve word problems involving dollar bills, quarters, dimes, nickels, and pennies, using \$ and ¢ symbols appropriately. Example: If you have 2 dimes and 3 pennies, how many cents do you have?</p>
Anticipated Time: 2 weeks	

Think Math Chapter 14: Comparing and Contrasting Three- Dimensional Figures	Common Core State Standards
	<p>Geometry 2.G.1. Recognize and draw shapes having specified attributes, such as a given number of angles or a given number of equal faces.¹ Identify triangles, quadrilaterals, pentagons, hexagons, and cubes.</p>
Anticipated Time: 2 weeks	

Think Math Chapter 15: Capacity, Weight/Mass, and Temperature	Common Core State Standards
	Teachers should use this chapter to reinforce the Standards for Mathematical Practice.
Anticipated Time: 2 weeks	

Think Math Chapter 16: Multiplying and Dividing	Common Core State Standards
	Teachers should use this chapter to reinforce the Standards for Mathematical Practice.
Anticipated Time: 1 week	

Alignment of Common Core State Standards to Core Curricular Tools

Think Math Chapter 1: Building Strategies	Common Core State Standards
	<p>Numbers and Operations in Base Ten</p> <p>3.NBT.2. Fluently add and subtract within 1000 using strategies and algorithms based on place value, properties of operations, and/or the relationship between addition and subtraction.</p>
Think Math Chapter 2: Multiplication Situations	Common Core State Standards
	<p>Operations and Algebraic Thinking</p> <p>3.OA.1. Interpret products of whole numbers, e.g., interpret 5×7 as the total number of objects in 5 groups of 7 objects each. <i>For example, describe a context in which a total number of objects can be expressed as 5×7.</i></p> <p>3.OA.2. Interpret whole-number quotients of whole numbers, e.g., interpret $56 \div 8$ as the number of objects in each share when 56 objects are partitioned equally into 8 shares, or as a number of shares when 56 objects are partitioned into equal shares of 8 objects each. <i>For example, describe a context in which a number of shares or a number of groups can be expressed as $56 \div 8$.</i></p> <p>3.OA.3. Use multiplication and division within 100 to solve word problems in situations involving equal groups, arrays, and measurement quantities, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.¹</p> <p>3.OA.6. Understand division as an unknown-factor problem. <i>For example, find $32 \div 8$ by finding the number that makes 32 when multiplied by 8.</i></p> <p>3.OA.7. Fluently multiply and divide within 100, using strategies such as the relationship between multiplication and division (e.g., knowing that $8 \times 5 = 40$, one knows $40 \div 5 = 8$) or properties of operations. By the end of Grade 3, know from memory all products of two one-digit numbers.</p>
Anticipated Time: 3 weeks	

Think Math Chapter 3: Using Addition and Subtraction	Common Core State Standards
	<p>Numbers and Operations in Base Ten</p> <p>3.NBT.2. Fluently add and subtract within 1000 using strategies and algorithms based on place value, properties of operations, and/or the relationship between addition and subtraction.</p> <p>Measurement and Data</p> <p>3.MD.3. Draw a scaled picture graph and a scaled bar graph to represent a data set with several categories. Solve one- and two-step “how many more” and “how many less” problems using information presented in scaled bar graphs. <i>For example, draw a bar graph in which each square in the bar graph might represent 5 pets.</i></p>
Anticipated Time: 2 weeks	

Think Math Chapter 4: Grouping, Regrouping, and Place Value	Common Core State Standards
	<p>Numbers and Operations in Base Ten</p> <p>3.NBT.1. Use place value understanding to round whole numbers to the nearest 10 or 100.</p>
Anticipated Time: 3 weeks	

Think Math Chapter 5: Understanding Addition and Subtraction Algorithms	Common Core State Standards
	<p>Operations and Algebraic Thinking 3.OA.9. Identify arithmetic patterns (including patterns in the addition table or multiplication table), and explain them using properties of operations. <i>For example, observe that 4 times a number is always even, and explain why 4 times a number can be decomposed into two equal addends.</i></p> <p>Numbers and Operations in Base 10 3.NBT.1. Use place value understanding to round whole numbers to the nearest 10 or 100. 3.NBT.2. Fluently add and subtract within 1000 using strategies and algorithms based on place value, properties of operations, and/or the relationship between addition and subtraction.</p>
Anticipated Time: 3 weeks	

Think Math Chapter 6: Rules and Patterns	Common Core State Standards
	<p>Operations and Algebraic Thinking 3.OA.7. Fluently multiply and divide within 100, using strategies such as the relationship between multiplication and division (e.g., knowing that $8 \times 5 = 40$, one knows $40 \div 5 = 8$) or properties of operations. By the end of Grade 3, know from memory all products of two one-digit numbers. 3.OA.8. Solve two-step word problems using the four operations. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding.³ 3.OA.9. Identify arithmetic patterns (including patterns in the addition table or multiplication table), and explain them using properties of operations. <i>For example, observe that 4 times a number is always even, and explain why 4 times a number can be decomposed into two equal addends.</i></p> <p>Numbers and Operations – Fraction 3.NF.1. Understand a fraction $1/b$ as the quantity formed by 1 part when a whole is partitioned into b equal parts; understand a fraction a/b as the quantity formed by a parts of size $1/b$.</p>
Anticipated Time: 2 weeks	

Think Math Chapter 7: Fractions	Common Core State Standards
	<p>Numbers and Operations – Fractions</p> <p>3.NF.2. Understand a fraction as a number on the number line; represent fractions on a number line diagram.</p> <p>3.NF.2a. Represent a fraction $\frac{1}{b}$ on a number line diagram by defining the interval from 0 to 1 as the whole and partitioning it into b equal parts. Recognize that each part has size $\frac{1}{b}$ and that the endpoint of the part based at 0 locates the number $\frac{1}{b}$ on the number line.</p> <p>3.NF.2b Represent a fraction $\frac{a}{b}$ on a number line diagram by marking off a lengths $\frac{1}{b}$ from 0. Recognize that the resulting interval has size $\frac{a}{b}$ and that its endpoint locates the number $\frac{a}{b}$ on the number line.</p> <p>3.NF.3. Explain equivalence of fractions in special cases, and compare fractions by reasoning about their size.</p> <p>3.NF.3a. Understand two fractions as equivalent (equal) if they are the same size, or the same point on a number line.</p> <p>3.NF.3b Recognize and generate simple equivalent fractions, e.g., $\frac{1}{2} = \frac{2}{4}$, $\frac{4}{6} = \frac{2}{3}$. Explain why the fractions are equivalent, e.g., by using a visual fraction model.</p> <p>3.NF.3c. Express whole numbers as fractions, and recognize fractions that are equivalent to whole numbers. <i>Examples: Express 3 in the form $3 = \frac{3}{1}$; recognize that $\frac{6}{1} = 6$; locate $\frac{4}{4}$ and 1 at the same point of a number line diagram.</i></p> <p>3.NF.3d. Compare two fractions with the same numerator or the same denominator by reasoning about their size. Recognize that comparisons are valid only when the two fractions refer to the same whole. Record the results of comparisons with the symbols $>$, $=$, or $<$, and justify the conclusions, e.g., by using a visual fraction model.</p> <p>Geometry</p> <p>3.G.2. Partition shapes into parts with equal areas. Express the area of each part as a unit fraction of the whole. <i>For example, partition a shape into 4 parts with equal area, and describe the area of each part as $\frac{1}{4}$ of the area of the shape.</i></p>
Anticipated Time: 3 weeks	

Think Math Chapter 8: Charts and Graphs.	Common Core State Standards
	<p>Operations and Algebraic Thinking</p> <p>3.OA.3. Use multiplication and division within 100 to solve word problems in situations involving equal groups, arrays, and measurement quantities, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.¹</p> <p>3.OA.4. Determine the unknown whole number in a multiplication or division equation relating three whole numbers. <i>For example, determine the unknown number that makes the equation true in each of the equations $8 \times ? = 48$, $5 = _ \div 3$, $6 \times 6 = ?$</i></p> <p>Measurement and Data</p> <p>3.MD.3. Draw a scaled picture graph and a scaled bar graph to represent a data set with several categories. Solve one- and two-step “how many more” and “how many less” problems using information presented in scaled bar graphs. <i>For example, draw a bar graph in which each square in the bar graph might represent 5 pets.</i></p>
Anticipated Time: 2 weeks	

Think Math Chapter 9: Exploring Multiplication	Common Core State Standards
	<p>Operations and Algebraic Thinking</p> <p>3.OA.1. Interpret products of whole numbers, e.g., interpret 5×7 as the total number of objects in 5 groups of 7 objects each. For example, describe a context in which a total number of objects can be expressed as 5×7.</p> <p>3.OA.2. Interpret whole-number quotients of whole numbers, e.g., interpret $56 \div 8$ as the number of objects in each share when 56 objects are partitioned equally into 8 shares, or as a number of shares when 56 objects are partitioned into equal shares of 8 objects each. For example, describe a context in which a number of shares or a number of groups can be expressed as $56 \div 8$.</p> <p>3.OA.7. Fluently multiply and divide within 100, using strategies such as the relationship between multiplication and division (e.g., knowing that $8 \times 5 = 40$, one knows $40 \div 5 = 8$) or properties of operations. By the end of Grade 3, know from memory all products of two one-digit numbers.</p> <p>3.OA.9. Identify arithmetic patterns (including patterns in the addition table or multiplication table), and explain them using properties of operations. For example, observe that 4 times a number is always even, and explain why 4 times a number can be decomposed into two equal addends.</p>
Anticipated Time: 2 weeks	

Think Math Chapter 10: Length, Area, and Volume	Common Core State Standards
	<p>Measurement and Data</p> <p>3.MD.4. Generate measurement data by measuring lengths using rulers marked with halves and fourths of an inch. Show the data by making a line plot, where the horizontal scale is marked off in appropriate units— whole numbers, halves, or quarters</p> <p>3.MD.5. Recognize area as an attribute of plan figures and understand concepts of area measurement.</p> <p>3.MD.5a. A square with side length 1 unit, called “a unit square,” is said to have “one square unit” of area, and can be used to measure area.</p> <p>3.MD.5b A plane figure which can be covered without gaps or overlaps by n unit squares is said to have an area of n square units.</p> <p>3.MD.6. Measure areas by counting unit squares (square cm, square m, square in, square ft., and improvised units).</p> <p>3.MD.7. Relate area to the operations of multiplication and addition.</p> <p>3.MD.7a. Find the area of a rectangle with whole-number side lengths by tiling it, and show that the area is the same as would be found by multiplying the side lengths.</p> <p>3.MD.7b Multiply side lengths to find areas of rectangles with whole-number side lengths in the context of solving real world and mathematical problems, and represent whole-number products as rectangular areas in mathematical reasoning.</p> <p>3.MD.7c Use tiling to show in a concrete case that the area of a rectangle with whole-number side lengths a and $b + c$ is the sum of $a \times b$ and $a \times c$. Use area models to represent the distributive property in mathematical reasoning.</p> <p>3.MD.7d. Recognize area as additive. Find areas of rectilinear figures by decomposing them into non-overlapping rectangles and adding the areas of the non-overlapping parts, applying this technique to solve real world problems.</p> <p>3.MD.8. Solve real world and mathematical problems involving perimeters of polygons, including finding the perimeter given the side lengths, finding an unknown side length, and exhibiting rectangles with the same perimeter and different areas or with the same area and different perimeters.</p>
Anticipated Time: 2 weeks	

Think Math Chapter 11: Geometry	Common Core State Standards
	<p>Geometry</p> <p>3.G.1. Understand that shapes in different categories (e.g., rhombuses, rectangles, and others) may share attributes (e.g., having four sides), and that the shared attributes can define a larger category (e.g., quadrilaterals). Recognize rhombuses, rectangles, and squares as examples of quadrilaterals, and draw examples of quadrilaterals that do not belong to any of these subcategories.</p>
Anticipated Time: 2 weeks	

Think Math Chapter 12: Multiplication Strategies	Common Core State Standards
	<p>Operations and Algebraic Thinking</p> <p>3.OA.3. Use multiplication and division within 100 to solve word problems in situations involving equal groups, arrays, and measurement quantities, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.¹</p> <p>3.OA.5. Apply properties of operations as strategies to multiply and divide.² <i>Examples: If $6 \times 4 = 24$ is known, then $4 \times 6 = 24$ is also known. (Commutative property of multiplication.) $3 \times 5 \times 2$ can be found by $3 \times 5 = 15$, then $15 \times 2 = 30$, or by $5 \times 2 = 10$, then $3 \times 10 = 30$. (Associative property of multiplication.) Knowing that $8 \times 5 = 40$ and $8 \times 2 = 16$, one can find 8×7 as $8 \times (5 + 2) = (8 \times 5) + (8 \times 2) = 40 + 16 = 56$. (Distributive property.)</i></p> <p>3.OA.7. Fluently multiply and divide within 100, using strategies such as the relationship between multiplication and division (e.g., knowing that $8 \times 5 = 40$, one knows $40 \div 5 = 8$) or properties of operations. By the end of Grade 3, know from memory all products of two one-digit numbers.</p>
Anticipated Time: 2 weeks	

Think Math Chapter 13: Time, Temperature, Weight, and Capacity	Common Core State Standards
	<p>Operations and Algebraic Thinking</p> <p>3.OA.3. Use multiplication and division within 100 to solve word problems in situations involving equal groups, arrays, and measurement quantities, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.¹</p> <p>3.OA.5. Apply properties of operations as strategies to multiply and divide.² <i>Examples: If $6 \times 4 = 24$ is known, then $4 \times 6 = 24$ is also known. (Commutative property of multiplication.) $3 \times 5 \times 2$ can be found by $3 \times 5 = 15$, then $15 \times 2 = 30$, or by $5 \times 2 = 10$, then $3 \times 10 = 30$. (Associative property of multiplication.) Knowing that $8 \times 5 = 40$ and $8 \times 2 = 16$, one can find 8×7 as $8 \times (5 + 2) = (8 \times 5) + (8 \times 2) = 40 + 16 = 56$. (Distributive property.)</i></p> <p>3.OA.7. Fluently multiply and divide within 100, using strategies such as the relationship between multiplication and division (e.g., knowing that $8 \times 5 = 40$, one knows $40 \div 5 = 8$) or properties of operations. By the end of Grade 3, know from memory all products of two one-digit numbers.</p>
Anticipated Time: 2 weeks	

Think Math Chapter 14:	Common Core State Standards
	<p>Operations and Algebraic Thinking</p> <p>3.OA.3. Use multiplication and division within 100 to solve word problems in situations involving equal groups, arrays, and measurement quantities, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.¹</p> <p>3.OA.5. Apply properties of operations as strategies to multiply and divide.² <i>Examples: If $6 \times 4 = 24$ is known, then $4 \times 6 = 24$ is also known. (Commutative property of multiplication.) $3 \times 5 \times 2$ can be found by $3 \times 5 = 15$, then $15 \times 2 = 30$, or by $5 \times 2 = 10$, then $3 \times 10 = 30$. (Associative property of multiplication.) Knowing that $8 \times 5 = 40$ and $8 \times 2 = 16$, one can find 8×7 as $8 \times (5 + 2) = (8 \times 5) + (8 \times 2) = 40 + 16 = 56$. (Distributive property.)</i></p> <p>3.OA.7. Fluently multiply and divide within 100, using strategies such as the relationship between multiplication and division (e.g., knowing that $8 \times 5 = 40$, one knows $40 \div 5 = 8$) or properties of operations. By the end of Grade 3, know from memory all products of two one-digit numbers.</p>
Anticipated Time: 2 weeks	

Will require additional resources, not addressed in Think Math:

Numbers and Operations in Base Ten

- **3.NBT.3.** Multiply one-digit whole numbers by multiples of 10 in the range 10–90 (e.g., 9×80 , 5×60) using strategies based on place value and properties of operations.

Measurement and Data

- **3.MD.1.** Tell and write time to the nearest minute and measure time intervals in minutes. Solve word problems involving addition and subtraction of time intervals in minutes, e.g., by representing the problem on a number line diagram.
- **3.MD.2.** Measure and estimate liquid volumes and masses of objects using standard units of grams (g), kilograms (kg), and liters (l). 1 Add, subtract, multiply, or divide to solve one-step word problems involving masses or volumes that are given in the same units, e.g., by using drawings (such as a beaker with a measurement scale) to represent the problem.

Alignment of Common Core State Standards to Core Curricular Tools

Think Math Chapter 1: Magic Squares	Common Core State Standards
	<p>Numbers and Operations in Base 10</p> <p>4.NBT.4. Fluently add and subtract multi-digit whole numbers using the standard algorithm.</p> <p>4.NBT.5. Multiply a whole number of up to four digits by a one-digit whole number, and multiply two two-digit numbers, using strategies based on place value and the properties of operations. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models.</p> <p>4.NBT.6. Find whole-number quotients and remainders with up to four-digit dividends and one-digit divisors, using strategies based on place value, the properties of operations, and/or the relationship between multiplication and division. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models.</p>
Anticipated Time: 2 weeks	
Think Math Chapter 2: Multiplication	Common Core State Standards
	<p>Operations and Algebraic Thinking</p> <p>4.OA.1. Interpret a multiplication equation as a comparison, e.g., interpret $35 = 5 \times 7$ as a statement that 35 is 5 times as many as 7 and 7 times as many as 5. Represent verbal statements of multiplicative comparisons as multiplication equations.</p> <p>4.OA.2. Multiply or divide to solve word problems involving multiplicative comparison, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem, distinguishing multiplicative comparison from additive comparison.¹</p> <p>Number and Operations in Base 10</p> <p>4.NBT.5. Multiply a whole number of up to four digits by a one-digit whole number, and multiply two two-digit numbers, using strategies based on place value and the properties of operations. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models.</p>
Anticipated Time: 2 weeks	

Think Math Chapter 3: The Eraser Store	Common Core State Standards
	<p>Number and Operations in Base Ten</p> <p>4.NBT.1. Recognize that in a multi-digit whole number, a digit in one place represents ten times what it represents in the place to its right. For example, recognize that $700 \div 70 = 10$ by applying concepts of place value and division.</p> <p>4.NBT.2. Read and write multi-digit whole numbers using base-ten numerals, number names, and expanded form. Compare two multi-digit numbers based on meanings of the digits in each place, using $>$, $=$, and $<$ symbols to record the results of comparisons.</p>
Anticipated Time: 3 weeks	

Think Math Chapter 4: Classifying Angles and Figures	Common Core State Standards
	<p>Measurement and Data</p> <p>4.MD.5. Recognize angles as geometric shapes that are formed wherever two rays share a common endpoint, and understand concepts of angle measurement:</p> <p>4.MD.5a. An angle is measured with reference to a circle with its center at the common endpoint of the rays, by considering the fraction of the circular arc between the points where the two rays intersect the circle. An angle that turns through $1/360$ of a circle is called a “one-degree angle,” and can be used to measure angles.</p> <p>4.MD.5b. An angle that turns through n one-degree angles is said to have an angle measure of n degrees.</p> <p>4.MD.6. Measure angles in whole-number degrees using a protractor. Sketch angles of specified measure.</p> <p>4.MD.7. Recognize angle measure as additive. When an angle is decomposed into non-overlapping parts, the angle measure of the whole is the sum of the angle measures of the parts. Solve addition and subtraction problems to find unknown angles on a diagram in real world and mathematical problems, e.g., by using an equation with a symbol for the unknown angle measure.</p> <p>Geometry</p> <p>4.G.1. Draw points, lines, line segments, rays, angles (right, acute, obtuse), and perpendicular and parallel lines. Identify these in two-dimensional figures.</p> <p>4.G.2. Classify two-dimensional figures based on the presence or absence of parallel or perpendicular lines, or the presence or absence of angles of a specified size. Recognize right triangles as a category, and identify right triangles.</p> <p>4.G.3. Recognize a line of symmetry for a two-dimensional figure as a line across the figure such that the figure can be folded along the line into matching parts. Identify line-symmetric figures and draw lines of symmetry.</p>
Anticipated Time: 2 weeks	

Think Math Chapter 5: Area and Perimeter	Common Core State Standards
	<p>Measurement and Data</p> <p>4.MD.3. Apply the area and perimeter formulas for rectangles in real world and mathematical problems. <i>For example, find the width of a rectangular room given the area of the flooring and the length, by viewing the area formula as a multiplication equation with an unknown factor.</i></p>
Anticipated Time: 2 weeks	

Think Math Chapter 6: Multi-Digit Multiplication	Common Core State Standards
	<p>Operations and Algebraic Thinking</p> <p>4.OA.3. Solve multistep word problems posed with whole numbers and having whole-number answers using the four operations, including problems in which remainders must be interpreted. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding.</p> <p>Numbers and Operations in Base 10</p> <p>4.NBT.5. Multiply a whole number of up to four digits by a one-digit whole number, and multiply two two-digit numbers, using strategies based on place value and the properties of operations. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models.</p>
Anticipated Time: 2 weeks	

Think Math Chapter 7: Fractions	Common Core State Standards
	<p>Numbers and Operations-Fractions</p> <p>4.NF.1. Explain why a fraction a/b is equivalent to a fraction $(n \times a)/(n \times b)$ by using visual fraction models, with attention to how the number and size of the parts differ even though the two fractions themselves are the same size. Use this principle to recognize and generate equivalent fractions.</p> <p>4.NF.2. Compare two fractions with different numerators and different denominators, e.g., by creating common denominators or numerators, or by comparing to a benchmark fraction such as $1/2$. Recognize that comparisons are valid only when the two fractions refer to the same whole. Record the results of comparisons with symbols $>$, $=$, or $<$, and justify the conclusions, e.g., by using a visual fraction model.</p> <p>4.NF.3. Understand a fraction a/b with $a > 1$ as a sum of fractions $1/b$.</p> <p>4.NF.3a. Understand addition and subtraction of fractions as joining and separating parts referring to the same whole.</p> <p>4.NF.3b. Decompose a fraction into a sum of fractions with the same denominator in more than one way, recording each decomposition by an equation. Justify decompositions, e.g., by using a visual fraction model. <i>Examples:</i> $3/8 = 1/8 + 1/8 + 1/8$; $3/8 = 1/8 + 2/8$; $2 \frac{1}{8} = 1 + 1 + 1/8 = 8/8 + 8/8 + 1/8$.</p> <p>4.NF.3c. Add and subtract mixed numbers with like denominators, e.g., by replacing each mixed number with an equivalent fraction, and/or by using properties of operations and the relationship between addition and subtraction.</p> <p>4.NF.3c. Solve word problems involving addition and subtraction of fractions referring to the same whole and having like denominators, e.g., by using visual fraction models and equations to represent the problem.</p> <p>4.NF.4. Apply and extend previous understandings of multiplication to multiply a fraction by a whole number.</p> <p>4.NF.4a. Understand a fraction a/b as a multiple of $1/b$. <i>For example, use a visual fraction model to represent $5/4$ as the product $5 \times (1/4)$, recording the conclusion by the equation $5/4 = 5 \times (1/4)$.</i></p> <p>4.NF.4b. Understand a multiple of a/b as a multiple of $1/b$, and use this understanding to multiply a fraction by a whole number. <i>For example, use a visual fraction model to express $3 \times (2/5)$ as $6 \times (1/5)$, recognizing this product as $6/5$. (In general, $n \times (a/b) = (n \times a)/b$.)</i></p> <p>4.NF.4c. Solve word problems involving multiplication of a fraction by a whole number, e.g., by using visual fraction models and equations to represent the problem. <i>For example, if each person at a party will eat $3/8$ of a pound of roast beef, and there will be 5 people at the party, how many pounds of roast beef will be needed? Between what two whole numbers does your answer lie?</i></p> <p>4.NF.5. Express a fraction with denominator 10 as an equivalent fraction with denominator 100, and use this technique to add two fractions with respective denominators 10 and 100. <i>For example, express $3/10$ as $30/100$, and add $3/10 + 4/100 = 34/100$.</i></p> <p>Measurement and Data</p> <p>4.MD.4. Make a line plot to display a data set of measurements in fractions of a unit ($1/2$, $1/4$, $1/8$). Solve problems involving addition and subtraction of fractions by using information presented in line plots. <i>For example, from a line plot find and interpret the difference in length between the longest and shortest specimens in an insect collection.</i></p>
Anticipated Time: 3 weeks	

Think Math Chapter 8: Decimals	Common Core State Standards
	<p>Numbers and Operations-Fractions</p> <p>4.NF.6. Use decimal notation for fractions with denominators 10 or 100. <i>For example, rewrite 0.62 as $62/100$; describe a length as 0.62 meters; locate 0.62 on a number line diagram.</i></p> <p>4.NF.7. Compare two decimals to hundredths by reasoning about their size. Recognize that comparisons are valid only when the two decimals refer to the same whole. Record the results of comparisons with the symbols $>$, $=$, or $<$, and justify the conclusions, e.g., by using a visual model.</p> <p>Measurement and Data</p> <p>4.MD.2. Use the four operations to solve word problems involving distances, intervals of time, liquid volumes, masses of objects, and money, including problems involving simple fractions or decimals, and problems that require expressing measurements given in a larger unit in terms of a smaller unit. Represent measurement quantities using diagrams such as number line diagrams that feature a measurement scale.</p>
Anticipated Time: 3 weeks	

Think Math Chapter 9: Measurement	Common Core State Standards
	<p>Measurement and Data</p> <p>4.MD.1. Know relative sizes of measurement units within one system of units including km, m, cm; kg, g; lb, oz.; l, ml; hr, min, sec. Within a single system of measurement, express measurements in a larger unit in terms of a smaller unit. Record measurement equivalents in a two-column table. For example, know that 1 ft is 12 times as long as 1 in. Express the length of a 4 ft snake as 48 in. Generate a conversion table for feet and inches listing the number pairs (1, 12), (2, 24), (3, 36), ...</p> <p>4.MD.2. Use the four operations to solve word problems involving distances, intervals of time, liquid volumes, masses of objects, and money, including problems involving simple fractions or decimals, and problems that require expressing measurements given in a larger unit in terms of a smaller unit. Represent measurement quantities using diagrams such as number line diagrams that feature a measurement scale.</p>
Anticipated Time: 3 weeks	

Think Math Chapter 10: Data and Probability	Common Core State Standards
	<p>While teaching this chapter, focus on the Standards for Mathematical Practice.</p>
Anticipated Time: 2 weeks	

Think Math Chapter 11: Three-Dimensional Geometry	Common Core State Standards
	<p>Measurement and Data</p> <p>4.MD.2. Use the four operations to solve word problems involving distances, intervals of time, liquid volumes, masses of objects, and money, including problems involving simple fractions or decimals, and problems that require expressing measurements given in a larger unit in terms of a smaller unit. Represent measurement quantities using diagrams such as number line diagrams that feature a measurement scale.</p>
Anticipated Time: 1 week	

Think Math Chapter 12: Extending the Number Line	Common Core State Standards
	<p>While teaching this chapter, focus on the Standards for Mathematical Practice.</p>
Anticipated Time: 2 weeks	

Think Math Chapter 13: Division	Common Core State Standards
	<p>Operations and Algebraic Thinking</p> <p>4.OA.4. Find all factor pairs for a whole number in the range 1–100. Recognize that a whole number is a multiple of each of its factors. Determine whether a given whole number in the range 1–100 is a multiple of a given one-digit number. Determine whether a given whole number in the range 1–100 is prime or composite.</p> <p>Number and Operations in Base Ten</p> <p>4.NBT.3. Use place value understanding to round multi-digit whole numbers to any place.</p> <p>4.NBT.6. Find whole-number quotients and remainders with up to four-digit dividends and one-digit divisors, using strategies based on place value, the properties of operations, and/or the relationship between multiplication and division. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models.</p>
Anticipated Time: 2 weeks	

Think Math Chapter 14: Algebraic Thinking	Common Core State Standards
	<p>Operations and Algebraic Thinking</p> <p>4.OA.5. Generate a number or shape pattern that follows a given rule. Identify apparent features of the pattern that were not explicit in the rule itself. <i>For example, given the rule “Add 3” and the starting number 1, generate terms in the resulting sequence and observe that the terms appear to alternate between odd and even numbers. Explain informally why the numbers will continue to alternate in this way.</i></p>
Anticipated Time: 2 weeks	

Think Math Chapter 15: Estimation	Common Core State Standards
	<p>Measurement and Data</p> <p>4.MD.1. Know relative sizes of measurement units within one system of units including km, m, cm; kg, g; lb, oz.; l, ml; hr, min, sec. Within a single system of measurement, express measurements in a larger unit in terms of a smaller unit. Record measurement equivalents in a two-column table. For example, know that 1 ft is 12 times as long as 1 in. Express the length of a 4 ft snake as 48 in. Generate a conversion table for feet and inches listing the number pairs (1, 12), (2, 24), (3, 36), ...</p> <p>4.MD.2. Use the four operations to solve word problems involving distances, intervals of time, liquid volumes, masses of objects, and money, including problems involving simple fractions or decimals, and problems that require expressing measurements given in a larger unit in terms of a smaller unit. Represent measurement quantities using diagrams such as number line diagrams that feature a measurement scale.</p>

Anticipated Time: 4 weeks	

Common Core State Standards

Number and Operations-Fractions

- 5.NF.3.** Interpret a fraction as division of the numerator by the denominator ($a/b = a \div b$). Solve word problems involving division of whole numbers leading to answers in the form of fractions or mixed numbers, e.g., by using visual fraction models or equations to represent the problem. *For example, interpret $3/4$ as the result of dividing 3 by 4, noting that $3/4$ multiplied by 4 equals 3, and that when 3 wholes are shared equally among 4 people each person has a share of size $3/4$. If 9 people want to share a 50-pound sack of rice equally by weight, how many pounds of rice should each person get? Between what two whole numbers does your answer lie?*
- 5.NF.1.** Add and subtract fractions with unlike denominators (including mixed numbers) by replacing given fractions with equivalent fractions in such a way as to produce an equivalent sum or difference of fractions with like denominators. *For example, $2/3 + 5/4 = 8/12 + 15/12 = 23/12$. (In general, $a/b + c/d = (ad + bc)/bd$.)*
- 5.NF.2.** Solve word problems involving addition and subtraction of fractions referring to the same whole, including cases of unlike denominators, e.g., by using visual fraction models or equations to represent the problem. Use benchmark fractions and number sense of fractions to estimate mentally and assess the reasonableness of answers. *For example, recognize an incorrect result $2/5 + 1/2 = 3/7$, by observing that $3/7 < 1/2$.*
- 5.NF.4.** Apply and extend previous understandings of multiplication to multiply a fraction or whole number by a fraction.
- 5.NF.4a.** Interpret the product $(a/b) \times q$ as a parts of a partition of q into b equal parts; equivalently, as the result of a sequence of operations $a \times q \div b$. *For example, use a visual fraction model to show $(2/3) \times 4 = 8/3$, and create a story context for this equation. Do the same with $(2/3) \times (4/5) = 8/15$. (In general, $(a/b) \times (c/d) = ac/bd$.)*
- 5.NF.4b.** Find the area of a rectangle with fractional side lengths by tiling it with unit squares of the appropriate unit fraction side lengths, and show that the area is the same as would be found by multiplying the side lengths. Multiply fractional side lengths to find areas of rectangles, and represent fraction products as rectangular areas.
- 5.NF.6.** Solve real world problems involving multiplication of fractions and mixed numbers, e.g., by using visual fraction models or equations to represent the problem.
- 5.NF.7.** Apply and extend previous understandings of division to divide unit fractions by whole numbers and whole numbers by unit fractions.
- 5.NF.7a.** Interpret division of a unit fraction by a non-zero whole number, and compute such quotients. *For example, create a story context for $(1/3) \div 4$, and use a visual fraction model to show the quotient. Use the relationship between multiplication and division to explain that $(1/3) \div 4 = 1/12$ because $(1/12) \times 4 = 1/3$.*
- 5.NF.7b.** Interpret division of a whole number by a unit fraction, and compute such quotients. *For example, create a story context for $4 \div (1/5)$, and use a visual fraction model to show the quotient. Use the relationship between multiplication and division to explain that $4 \div (1/5) = 20$ because $20 \times (1/5) = 4$.*
- 5.NF.7c.** Solve real world problems involving division of unit fractions by non-zero whole numbers and division of whole numbers by unit fractions, e.g., by using visual fraction models and equations to represent the problem. *For example, how much chocolate will each person get if 3 people share $1/2$ lb. of chocolate equally? How many $1/3$ -cup servings are in 2 cups of raisins?*

Anticipated Time: 4 weeks

Common Core State Standards

Geometry

5.G.1. Use a pair of perpendicular number lines, called axes, to define a coordinate system, with the intersection of the lines (the origin) arranged to coincide with the 0 on each line and a given point in the plane located by using an ordered pair of numbers, called its coordinates. Understand that the first number indicates how far to travel from the origin in the direction of one axis, and the second number indicates how far to travel in the direction of the second axis, with the convention that the names of the two axes and the coordinates correspond (e.g., x-axis and x-coordinate, y-axis and y-coordinate).

5.G.2. Represent real world and mathematical problems by graphing points in the first quadrant of the coordinate plane, and interpret coordinate values of points in the context of the situation.

Anticipated Time: 3 weeks

Holt Course 1 Chapter 7: Proportional Relationships	Common Core State Standards
	<p>Numbers and Operations</p> <p>5.NF.5. Interpret multiplication as scaling (resizing), by:</p> <p>5.NF.5a. Comparing the size of a product to the size of one factor on the basis of the size of the other factor, without performing the indicated multiplication.</p> <p>5.NF.5b. Explaining why multiplying a given number by a fraction greater than 1 results in a product greater than the given number (recognizing multiplication by whole numbers greater than 1 as a familiar case); explaining why multiplying a given number by a fraction less than 1 results in a product smaller than the given number; and relating the principle of fraction equivalence $a/b = (n \times a)/(n \times b)$ to the effect of multiplying a/b by 1.</p>
Anticipated Time: 3 weeks	

Holt Course 1 Chapter 8: Geometric Relationships	Common Core State Standards
	<p>Geometry</p> <p>5.G.3. Understand that attributes belonging to a category of two-dimensional figures also belong to all subcategories of that category. For example, all rectangles have four right angles and squares are rectangles, so all squares have four right angles.</p> <p>5.G.4. Classify two-dimensional figures in a hierarchy based on properties.</p>
Anticipated Time: 3 weeks	

Holt Course 1 Chapter 9: Measurement and Geometry	Common Core State Standards
	Measurement and Data 5.MD.1. Convert among different-sized standard measurement units within a given measurement system (e.g., convert 5 cm to 0.05 m), and use these conversions in solving multi-step, real world problems.
Anticipated Time: 2 weeks	

Holt Course 1 Chapter 10: Area and Volume	Common Core State Standards
	Measurement and Data 5.MD.3. Recognize volume as an attribute of solid figures and understand concepts of volume measurement. 5.MD.3a. A cube with side length 1 unit, called a “unit cube,” is said to have “one cubic unit” of volume, and can be used to measure volume. 5.MD.3b. A solid figure which can be packed without gaps or overlaps using n unit cubes is said to have a volume of n cubic units. 5.MD.4. Measure volumes by counting unit cubes, using cubic cm, cubic in, cubic ft., and improvised units. 5.MD.5. Relate volume to the operations of multiplication and addition and solve real world and mathematical problems involving volume. 5.MD.5a. Find the volume of a right rectangular prism with whole-number side lengths by packing it with unit cubes, and show that the volume is the same as would be found by multiplying the edge lengths, equivalently by multiplying the height by the area of the base. Represent threefold whole-number products as volumes, e.g., to represent the associative property of multiplication. 5.MD.5b. Apply the formulas $V = l \times w \times h$ and $V = b \times h$ for rectangular prisms to find volumes of right rectangular prisms with whole-number edge lengths in the context of solving real world and mathematical problems. 5.MD.5c. Recognize volume as additive. Find volumes of solid figures composed of two non-overlapping right rectangular prisms by adding the volumes of the non-overlapping parts, applying this technique to solve real world problems.
Anticipated Time: 3 weeks	

Holt Course 1 Chapter 11: Integers, Graphs, and Functions	Common Core State Standards
	<p>Geometry</p> <p>5.G.1. Use a pair of perpendicular number lines, called axes, to define a coordinate system, with the intersection of the lines (the origin) arranged to coincide with the 0 on each line and a given point in the plane located by using an ordered pair of numbers, called its coordinates. Understand that the first number indicates how far to travel from the origin in the direction of one axis, and the second number indicates how far to travel in the direction of the second axis, with the convention that the names of the two axes and the coordinates correspond (e.g., x-axis and x-coordinate, y-axis and y-coordinate).</p> <p>5.G.2. Alignment of Common Core State Standards to Core Curricular Tools

Holt Course 1 Chapter 1 : Whole Numbers and Patterns	Common Core State Standards
	<p>The Number System</p> <p>6.NS.2. Fluently divide multi-digit numbers using the standard algorithm.</p> <p>Expressions and Equations</p> <p>6.EE.1. Write and evaluate numerical expressions involving whole-number exponents</p>
Anticipated Time: 2 weeks	
Holt Course 1 Chapter 2: Introduction to Algebra	Common Core State Standards
	<p>Expression and Equations</p> <p>6.EE.2. Write, read, and evaluate expressions in which letters stand for numbers.</p> <p>6.EE.2a Write expressions that record operations with numbers and with letters standing for numbers. <i>For example, express the calculation “Subtract y from 5” as $5 - y$.</i></p> <p>6.EE.2b Identify parts of an expression using mathematical terms (sum, term, product, factor, quotient, coefficient); view one or more parts of an expression as a single entity. <i>For example, describe the expression $2(8 + 7)$ as a product of two factors; view $(8 + 7)$ as both a single entity and a sum of two terms.</i></p> <p>6.EE.2c Evaluate expressions at specific values of their variables. Include expressions that arise from formulas used in real-world problems. Perform arithmetic operations, including those involving whole-number exponents, in the conventional order when there are no parentheses to specify a particular order (Order of Operations). <i>For example, use the formulas $V = s^3$ and $A = 6s^2$ to find the volume and surface area of a cube with sides of length $s = \frac{1}{2}$.</i></p> <p>6.EE.3. Apply the properties of operations to generate equivalent expressions. <i>For example, apply the distributive property to the expression $3(2 + x)$ to produce the equivalent expression $6 + 3x$; apply the distributive property to the expression $24x + 18y$ to produce the equivalent expression $6(4x + 3y)$; apply properties of operations to $y + y + y$ to produce the equivalent expression $3y$.</i></p> <p>6.EE.4. Identify when two expressions are equivalent (i.e., when the two expressions name the same number regardless of which value is substituted into them). <i>For example, the expressions $y + y + y$ and $3y$ are equivalent because they name the same number regardless of which number y stands for. Reason about and solve one-variable equations and</i></p>

	<p><i>inequalities.</i></p> <p>6.EE.5. Understand solving an equation or inequality as a process of answering a question: which values from a specified set, if any, make the equation or inequality true? Use substitution to determine whether a given number in a specified set makes an equation or inequality true.</p> <p>6.EE.6. Use variables to represent numbers and write expressions when solving a real-world or mathematical problem; understand that a variable can represent an unknown number, or, depending on the purpose at hand, any number in a specified set.</p> <p>6.EE.7. Solve real-world and mathematical problems by writing and solving equations of the form $x + p = q$ and $px = q$ for cases in which p, q and x are all nonnegative rational numbers.</p> <p>6.EE.8. Write an inequality of the form $x > c$ or $x < c$ to represent a constraint or condition in a real-world or mathematical problem. Recognize that inequalities of the form $x > c$ or $x < c$ have infinitely many solutions; represent solutions of such inequalities on number line diagrams.</p>
Anticipated Time: 3 weeks	

Holt Course 1 Chapter 3: Decimals	Common Core State Standards
	<p>The Number System</p> <p>6.NS.3. Fluently add, subtract, multiply, and divide multi-digit decimals using the standard algorithm for each operation.</p>
Anticipated Time: 2 weeks	

Holt Course 1 Chapter 4: Number Theory and Fractions	Common Core State Standards
	<p>The Number System</p> <p>6.NS.4. Find the greatest common factor of two whole numbers less than or equal to 100 and the least common multiple of two whole numbers less than or equal to 12. Use the distributive property to express a sum of two whole numbers 1–100 with a common factor as a multiple of a sum of two whole numbers with no common factor. <i>For example, express $36 + 8$ as $4(9 + 2)$. Apply and extend previous understandings of numbers to the system of rational numbers.</i></p>
Anticipated Time: 4 weeks	

Holt Course 1 Chapter 5: Fraction Operations	Common Core State Standards
	<p>The Number System</p> <p>6.NS.1. Interpret and compute quotients of fractions, and solve word problems involving division of fractions by fractions, e.g., by using visual fraction models and equations to represent the problem. <i>For example, create a story context for $(2/3) \div (3/4)$ and use a visual fraction model to show the quotient; use the relationship between multiplication and division to explain that $(2/3) \div (3/4) = 8/9$ because $3/4$ of $8/9$ is $2/3$. (In general, $(a/b) \div (c/d) = ad/bc$.) How much chocolate will each person get if 3 people share $1/2$ lb of chocolate equally? How many $3/4$-cup servings are in $2/3$ of a cup of yogurt? How wide is a rectangular strip of land with length $3/4$ mi and area $1/2$ square mi? Compute fluently with multi-digit numbers and find common factors and multiples.</i></p>
Anticipated Time: 3 weeks	

Holt Course 1 Chapter 6: Collecting and Displaying Data	Common Core State Standards
	<p>Statistics and Probability</p> <p>6.SP.1. Recognize a statistical question as one that anticipates variability in the data related to the question and accounts for it in the answers. <i>For example, “How old am I?” is not a statistical question, but “How old are the students in my school?” is a statistical question because one anticipates variability in students’ ages.</i></p> <p>6.SP.2. Understand that a set of data collected to answer a statistical question has a distribution which can be described by its center, spread, and overall shape.</p> <p>6.SP.3. Recognize that a measure of center for a numerical data set summarizes all of its values with a single number, while a measure of variation describes how its values vary with a single number.</p> <p>6.SP.4. Display numerical data in plots on a number line, including dot plots, histograms, and box plots.</p> <p>6.SP.5a Summarize numerical data sets in relation to their context, such as by: Reporting the number of observations.</p> <p>6.SP.5b Summarize numerical data sets in relation to their context, such as by: Describing the nature of the attribute under investigation, including how it was measured and its units of measurement.</p> <p>6.SP.5c Summarize numerical data sets in relation to their context, such as by: Giving quantitative measures of center (median and/or mean) and variability (interquartile range and/or mean absolute deviation), as well as describing any overall pattern and any striking deviations from the overall pattern with reference to the context in which the data were gathered.</p> <p>6.SP.5d Summarize numerical data sets in relation to their context, such as by: Relating the choice of measures of center and variability to the shape of the data distribution and the context in which the data were gathered.</p>
Anticipated Time: 3 weeks	

Holt Course 1 Chapter 7: Proportional Relationships	Common Core State Standards
	<p>Ratios and Proportions</p> <p>6.RP.1. Understand the concept of a ratio and use ratio language to describe a ratio relationship between two quantities. <i>For example, “The ratio of wings to beaks in the bird house at the zoo was 2:1, because for every 2 wings there was 1 beak.” “For every vote candidate A received, candidate C received nearly three votes.”</i></p> <p>6.RP.2. Understand the concept of a unit rate a/b associated with a ratio $a:b$ with $b \neq 0$, and use rate language in the context of a ratio relationship. <i>For example, “This recipe has a ratio of 3 cups of flour to 4 cups of sugar, so there is $\frac{3}{4}$ cup of flour for each cup of sugar.” “We paid \$75 for 15 hamburgers, which is a rate of \$5 per hamburger.”</i></p> <p>6.RP.3 Use ratio and rate reasoning to solve real-world and mathematical problems, e.g., by reasoning about tables of equivalent ratios, tape diagrams, double number line diagrams, or equations.</p> <p>6.RP.3a Make tables of equivalent ratios relating quantities with whole-number measurements, find missing values in the tables, and plot the pairs of values on the coordinate plane. Use tables to compare ratios.</p> <p>6.RP.3b Solve unit rate problems including those involving unit pricing and constant speed. <i>For example, if it took 7 hours to mow 4 lawns, then at that rate, how many lawns could be mowed in 35 hours? At what rate were lawns being mowed?</i></p> <p>6.RP.3c Find a percent of a quantity as a rate per 100 (e.g., 30% of a quantity means $\frac{30}{100}$ times the quantity); solve problems involving finding the whole, given a part and the percent.</p> <p>6.RP.3d Use ratio reasoning to convert measurement units; manipulate and transform units appropriately when multiplying or dividing quantities.</p>
Anticipated Time: 3 weeks	

Holt Course 1 Chapter 8: Geometric Relationships	Common Core State Standards
	<p>The Number System</p> <p>6.NS.8. Solve real-world and mathematical problems by graphing points in all four quadrants of the coordinate plane. Include use of coordinates and absolute value to find distances between points with the same first coordinate or the same second coordinate.</p>
	<p>Geometry</p> <p>6.G.3. Draw polygons in the coordinate plane given coordinates for the vertices; use coordinates to find the length of a side joining points with the same first coordinate or the same second coordinate. Apply these techniques in the context of solving real-world and mathematical problems.</p>
Anticipated Time: 3 weeks	

Holt Course 1 Chapter 9: Measurement and Geometry	Common Core State Standards
	<p>While teaching this chapter, focus on the Standards for Mathematical Practice.</p>
Anticipated Time: 2 weeks	

Holt Course 1 Chapter 10: Area and Volume	Common Core State Standards
	<p>Geometry</p> <p>6.G.1. Find the area of right triangles, other triangles, special quadrilaterals, and polygons by composing into rectangles or decomposing into triangles and other shapes; apply these techniques in the context of solving real-world and mathematical problems.</p> <p>6.G.2. Find the volume of a right rectangular prism with fractional edge lengths by packing it with unit cubes of the appropriate unit fraction edge lengths, and show that the volume is the same as would be found by multiplying the edge lengths of the prism. Apply the formulas $V = lwh$ and $V = bh$ to find volumes of right rectangular prisms with fractional edge lengths in the context of solving real-world and mathematical problems.</p> <p>6.G.4. Represent three-dimensional figures using nets made up of rectangles and triangles, and use the nets to find the surface area of these figures. Apply these techniques in the context of solving real-world and mathematical problems.</p>
Anticipated Time: 3 weeks	

Holt Course 1 Chapter 11: Integers, Graphs, and Functions	Common Core State Standards
	<p>The Number System</p> <p>6.NS.5. Understand that positive and negative numbers are used together to describe quantities having opposite directions or values (e.g., temperature above/below zero, elevation above/below sea level, credits/debits, positive/negative electric charge); use positive and negative numbers to represent quantities in real-world contexts, explaining the meaning of 0 in each situation.</p> <p>6.NS.6. Understand a rational number as a point on the number line. Extend number line diagrams and coordinate axes familiar from previous grades to represent points on the line and in the plane with negative number coordinates.</p> <p>6.NS.6a. Recognize opposite signs of numbers as indicating locations on opposite sides of 0 on the number line; recognize that the opposite of the opposite of a number is the number itself, e.g., $-(-3) = 3$, and that 0 is its own opposite.</p> <p>6.NS.6b. Understand signs of numbers in ordered pairs as indicating locations in quadrants of the coordinate plane; recognize that when two ordered pairs differ only by signs, the locations of the points are related by reflections across one or both axes.</p> <p>6.NS.6c. Find and position integers and other rational numbers on a horizontal or vertical number line diagram; find and position pairs of integers and other rational numbers on a coordinate plane.</p> <p>6.NS.7. Understand ordering and absolute value of rational numbers.</p> <p>6.NS.7a. Interpret statements of inequality as statements about the relative position of two numbers on a number line diagram. <i>For example, interpret $-3 > -7$ as a statement that -3 is located to the right of -7 on a number line oriented from left to right.</i></p> <p>6.NS.7b. Write, interpret, and explain statements of order for rational numbers in real-world contexts. <i>For example, write $-3^{\circ}\text{C} > -7^{\circ}\text{C}$ to express the fact that -3°C is warmer than -7°C.</i></p> <p>6.NS.7c. Understand the absolute value of a rational number as its distance from 0 on the number line; interpret absolute value as magnitude for a positive or negative quantity in a real-world situation. <i>For example, for an account balance of -30 dollars, write $-30 = 30$ to describe the size of the debt in dollars.</i></p> <p>6.NS.7d. Distinguish comparisons of absolute value from statements about order. <i>For example, recognize that an account balance less than -30 dollars represents a debt greater than 30 dollars.</i></p>

	<p>6.EE.9. Use variables to represent two quantities in a real-world problem that change in relationship to one another; write an equation to express one quantity, thought of as the dependent variable, in terms of the other quantity, thought of as the independent variable. Analyze the relationship between the dependent and independent variables using graphs and tables, and relate these to the equation. For example, in a problem involving motion at constant speed, list and graph ordered pairs of distances and times, and write the equation $d = 65t$ to represent the relationship between distance and time.</p>
<p>Anticipated Time: 3 weeks</p>	

<p>Holt Course 1 Chapter 12: Probability</p>	<p>Common Core State Standards</p>
	<p>While teaching this chapter, focus on the Standards for Mathematical Practice.</p>
<p>Anticipated Time: 3 weeks</p>	

Alignment of Common Core State Standards to Core Curricular Tools

Common Core State Standards	
Holt Course 2 Chapter 1: Algebraic Reasoning	Expressions and Equations 6.EE.1. Write and evaluate numerical expressions involving whole-number exponents 6.EE.2. Write, read, and evaluate expressions in which letters stand for numbers. 6.EE.2a Write expressions that record operations with numbers and with letters standing for numbers. <i>For example, express the calculation “Subtract y from 5” as $5 - y$.</i> 6.EE.2b Identify parts of an expression using mathematical terms (sum, term, product, factor, quotient, coefficient); view one or more parts of an expression as a single entity. <i>For example, describe the expression $2(8 + 7)$ as a product of two factors; view $(8 + 7)$ as both a single entity and a sum of two terms.</i> 6.EE.3. Apply the properties of operations to generate equivalent expressions. <i>For example, apply the distributive property to the expression $3(2 + x)$ to produce the equivalent expression $6 + 3x$; apply the distributive property to the expression $24x + 18y$ to produce the equivalent expression $6(4x + 3y)$; apply properties of operations to $y + y + y$ to produce the equivalent expression $3y$.</i> 6.EE.4. Identify when two expressions are equivalent (i.e., when the two expressions name the same number regardless of which value is substituted into them). <i>For example, the expressions $y + y + y$ and $3y$ are equivalent because they name the same number regardless of which number y stands for. Reason about and solve one-variable equations and inequalities.</i> 6.EE.5. Understand solving an equation or inequality as a process of answering a question: which values from a specified set, if any, make the equation or inequality true? Use substitution to determine whether a given number in a specified set makes an equation or inequality true. 6.EE.6. Use variables to represent numbers and write expressions when solving a real-world or mathematical problem; understand that a variable can represent an unknown number, or, depending on the purpose at hand, any number in a specified set. 6.EE.7. Solve real-world and mathematical problems by writing and solving equations of the form $x + p = q$ and $px = q$ for cases in which p , q and x are all nonnegative rational numbers. 6.EE.8. Write an inequality of the form $x > c$ or $x < c$ to represent a constraint or condition in a real-world or mathematical problem. Recognize that inequalities of the form $x > c$ or $x < c$ have infinitely many solutions; represent solutions of such inequalities on number line diagrams.
	Anticipated Time: 3

Holt Course 2 Chapter 2: Integers and Rational Numbers	Common Core State Standards
	<p>The Number System</p> <p>6.NS.2. Fluently divide multi-digit numbers using the standard algorithm.</p> <p>6.NS.4. Find the greatest common factor of two whole numbers less than or equal to 100 and the least common multiple of two whole numbers less than or equal to 12. Use the distributive property to express a sum of two whole numbers 1–100 with a common factor as a multiple of a sum of two whole numbers with no common factor. <i>For example, express $36 + 8$ as $4(9 + 2)$. Apply and extend previous understandings of numbers to the system of rational numbers.</i></p> <p>6.NS.5. Understand that positive and negative numbers are used together to describe quantities having opposite directions or values (e.g., temperature above/below zero, elevation above/below sea level, credits/debits, positive/negative electric charge); use positive and negative numbers to represent quantities in real-world contexts, explaining the meaning of 0 in each situation.</p> <p>6.NS.6. Understand a rational number as a point on the number line. Extend number line diagrams and coordinate axes familiar from previous grades to represent points on the line and in the plane with negative number coordinates.</p> <p>6.NS.6a. Recognize opposite signs of numbers as indicating locations on opposite sides of 0 on the number line; recognize that the opposite of the opposite of a number is the number itself, e.g., $-(-3) = 3$, and that 0 is its own opposite.</p> <p>6.NS.7. Understand ordering and absolute value of rational numbers.</p> <p>6.NS.7a. Interpret statements of inequality as statements about the relative position of two numbers on a number line diagram. <i>For example, interpret $-3 > -7$ as a statement that -3 is located to the right of -7 on a number line oriented from left to right.</i></p> <p>6.NS.7b. Write, interpret, and explain statements of order for rational numbers in real-world contexts. <i>For example, write $-3^{\circ}\text{C} > -7^{\circ}\text{C}$ to express the fact that -3°C is warmer than -7°C.</i></p> <p>6.NS.7c. Understand the absolute value of a rational number as its distance from 0 on the number line; interpret absolute value as magnitude for a positive or negative quantity in a real-world situation. <i>For example, for an account balance of -30 dollars, write $-30 = 30$ to describe the size of the debt in dollars.</i></p> <p>6.NS.7d. Distinguish comparisons of absolute value from statements about order. <i>For example, recognize that an account balance less than -30 dollars represents a debt greater than 30 dollars.</i></p>
Anticipated Time: 4	
Holt Course 2 Chapter 3: Applying Rational Numbers	Common Core State Standards
	<p>The Number System</p> <p>6.NS.1. Interpret and compute quotients of fractions, and solve word problems involving division of fractions by fractions, e.g., by using visual fraction models and equations to represent the problem. <i>For example, create a story context for $(2/3) \div (3/4)$ and use a visual fraction model to show the quotient; use the relationship between multiplication and division to explain that $(2/3) \div (3/4) = 8/9$ because $3/4$ of $8/9$ is $2/3$. (In general, $(a/b) \div (c/d) = ad/bc$.) How much chocolate will each person get if 3 people share $1/2$ lb of chocolate equally? How many $3/4$-cup servings are in $2/3$ of a cup of yogurt? How wide is a rectangular strip of land with length $3/4$ mi and area $1/2$ square mi? Compute fluently with multi-digit numbers and find common factors and multiples.</i></p> <p>6.NS.3. Fluently add, subtract, multiply, and divide multi-digit decimals using the standard algorithm for each operation.</p>
Anticipated Time: 2	

Holt Course 2 Chapter 4: Patterns and Functions	Common Core State Standards
	<p>The Number System</p> <p>6.NS.8. Solve real-world and mathematical problems by graphing points in all four quadrants of the coordinate plane. Include use of coordinates and absolute value to find distances between points with the same first coordinate or the same second coordinate.</p> <p>6.NS.6. Understand a rational number as a point on the number line. Extend number line diagrams and coordinate axes familiar from previous grades to represent points on the line and in the plane with negative number coordinates.</p> <p>6.NS.6b. Understand signs of numbers in ordered pairs as indicating locations in quadrants of the coordinate plane; recognize that when two ordered pairs differ only by signs, the locations of the points are related by reflections across one or both axes.</p> <p>6.NS.6c. Find and position integers and other rational numbers on a horizontal or vertical number line diagram; find and position pairs of integers and other rational numbers on a coordinate plane.</p> <p>Expressions and Equations</p> <p>6.EE.9. Use variables to represent two quantities in a real-world problem that change in relationship to one another; write an equation to express one quantity, thought of as the dependent variable, in terms of the other quantity, thought of as the independent variable. Analyze the relationship between the dependent and independent variables using graphs and tables, and relate these to the equation. For example, in a problem involving motion at constant speed, list and graph ordered pairs of distances and times, and write the equation $d = 65t$ to represent the relationship between distance and time.</p>
	Anticipated Time: 3

Holt Course 2 Chapter 5: Proportional Relationships	Common Core State Standards
	<p>Ratios and Proportions</p> <p>6.RP.1. Understand the concept of a ratio and use ratio language to describe a ratio relationship between two quantities. <i>For example, “The ratio of wings to beaks in the bird house at the zoo was 2:1, because for every 2 wings there was 1 beak.” “For every vote candidate A received, candidate C received nearly three votes.”</i></p> <p>6.RP.2. Understand the concept of a unit rate a/b associated with a ratio $a:b$ with $b \neq 0$, and use rate language in the context of a ratio relationship. <i>For example, “This recipe has a ratio of 3 cups of flour to 4 cups of sugar, so there is $3/4$ cup of flour for each cup of sugar.” “We paid \$75 for 15 hamburgers, which is a rate of \$5 per hamburger.”</i></p> <p>6.RP.3 Use ratio and rate reasoning to solve real-world and mathematical problems, e.g., by reasoning about tables of equivalent ratios, tape diagrams, double number line diagrams, or equations.</p> <p>6.RP.3a Make tables of equivalent ratios relating quantities with whole-number measurements, find missing values in the tables, and plot the pairs of values on the coordinate plane. Use tables to compare ratios.</p> <p>6.RP.3b Solve unit rate problems including those involving unit pricing and constant speed. <i>For example, if it took 7 hours to mow 4 lawns, then at that rate, how many lawns could be mowed in 35 hours? At what rate were lawns being mowed?</i></p> <p>6.RP.3c Find a percent of a quantity as a rate per 100 (e.g., 30% of a quantity means 30/100 times the quantity); solve problems involving finding the whole, given a part and the percent.</p> <p>6.RP.3d Use ratio reasoning to convert measurement units; manipulate and transform units appropriately when multiplying or dividing quantities.</p> <p>Expressions and Equations</p> <p>6.EE.9. Use variables to represent two quantities in a real-world problem that change in relationship to one another; write an equation to express one quantity, thought of as the dependent variable, in terms of the other quantity, thought of as the independent variable. Analyze the relationship between the dependent and independent variables using graphs and tables, and relate these to the equation. For example, in a problem involving motion at constant speed, list and graph ordered pairs of distances and times, and write the equation $d = 65t$ to represent the relationship between distance and time.</p>
Anticipated Time: 3	

Holt Course 2 Chapter 6: Percents	Common Core State Standards
	<p>The Number System</p> <p>6.NS.6. Understand a rational number as a point on the number line. Extend number line diagrams and coordinate axes familiar from previous grades to represent points on the line and in the plane with negative number coordinates.</p> <p>6.NS.6a. Recognize opposite signs of numbers as indicating locations on opposite sides of 0 on the number line; recognize that the opposite of the opposite of a number is the number itself, e.g., $-(-3) = 3$, and that 0 is its own opposite.</p> <p>6.NS.7. Understand ordering and absolute value of rational numbers.</p> <p>6.NS.7a. Interpret statements of inequality as statements about the relative position of two numbers on a number line diagram. <i>For example, interpret $-3 > -7$ as a statement that -3 is located to the right of -7 on a number line oriented from left to right.</i></p> <p>6.NS.7b. Write, interpret, and explain statements of order for rational numbers in real-world contexts. <i>For example, write $-3^{\circ}\text{C} > -7^{\circ}\text{C}$ to express the fact that -3°C is warmer than -7°C.</i></p> <p>6.NS.7c. Understand the absolute value of a rational number as its distance from 0 on the number line; interpret absolute value as magnitude for a positive or negative quantity in a real-world situation. <i>For example, for an account balance of -30 dollars, write $-30 = 30$ to describe the size of the debt in dollars.</i></p> <p>6.NS.7d. Distinguish comparisons of absolute value from statements about order. <i>For example, recognize that an account balance less than -30 dollars represents a debt greater than 30 dollars.</i></p>
	Anticipated Time: 3

Holt Course 2 Chapter 7: Collecting, Displaying, and Analyzing Data	Common Core State Standards
	<p>Statistics and Probability</p> <p>6.SP.1. Recognize a statistical question as one that anticipates variability in the data related to the question and accounts for it in the answers. <i>For example, “How old am I?” is not a statistical question, but “How old are the students in my school?” is a statistical question because one anticipates variability in students’ ages.</i></p> <p>6.SP.2. Understand that a set of data collected to answer a statistical question has a distribution which can be described by its center, spread, and overall shape.</p> <p>6.SP.3. Recognize that a measure of center for a numerical data set summarizes all of its values with a single number, while a measure of variation describes how its values vary with a single number.</p> <p>6.SP.4. Display numerical data in plots on a number line, including dot plots, histograms, and box plots.</p> <p>6.SP.5a Summarize numerical data sets in relation to their context, such as by: Reporting the number of observations.</p> <p>6.SP.5b Summarize numerical data sets in relation to their context, such as by: Describing the nature of the attribute under investigation, including how it was measured and its units of measurement.</p> <p>6.SP.5c Summarize numerical data sets in relation to their context, such as by: Giving quantitative measures of center (median and/or mean) and variability (interquartile range and/or mean absolute deviation), as well as describing any overall pattern and any striking deviations from the overall pattern with reference to the context in which the data were gathered.</p> <p>6.SP.5d Summarize numerical data sets in relation to their context, such as by: Relating the choice of measures of center and variability to the shape of the data distribution and the context in which the data were gathered.</p>
	Anticipated Time: 3

Holt Course 2 Chapter 8: Geometric Figures	Common Core State Standards
	Geometry 6.G.3. Draw polygons in the coordinate plane given coordinates for the vertices; use coordinates to find the length of a side joining points with the same first coordinate or the same second coordinate. Apply these techniques in the context of solving real-world and mathematical problems.
Anticipated Time: 2	

Holt Course 2 Chapter 9: Measurement- Two-Dimensional Figures	Common Core State Standards
	Geometry 6.G.1. Find the area of right triangles, other triangles, special quadrilaterals, and polygons by composing into rectangles or decomposing into triangles and other shapes; apply these techniques in the context of solving real-world and mathematical problems.
Anticipated Time: 2	

Holt Course 2 Chapter 10: Measurement: Three- Dimensional Figures	Common Core State Standards
	<p>Expressions and Equations</p> <p>6.EE.2c Evaluate expressions at specific values of their variables. Include expressions that arise from formulas used in real-world problems. Perform arithmetic operations, including those involving whole-number exponents, in the conventional order when there are no parentheses to specify a particular order (Order of Operations). <i>For example, use the formulas $V = s^3$ and $A = 6s^2$ to find the volume and surface area of a cube with sides of length $s = 1/2$.</i></p> <p>Geometry</p> <p>6.G.2. Find the volume of a right rectangular prism with fractional edge lengths by packing it with unit cubes of the appropriate unit fraction edge lengths, and show that the volume is the same as would be found by multiplying the edge lengths of the prism. Apply the formulas $V = lwh$ and $V = bh$ to find volumes of right rectangular prisms with fractional edge lengths in the context of solving real-world and mathematical problems.</p> <p>6.G.4. Represent three-dimensional figures using nets made up of rectangles and triangles, and use the nets to find the surface area of these figures. Apply these techniques in the context of solving real-world and mathematical problems.</p>

	Anticipated Time: 2

Holt Course 2 Chapter 12: Multi-Step Equations and Inequalities	Common Core State Standards
	While teaching this chapter, focus on the Standards for Mathematical Practice.
Anticipated Time: 2	

Alignment of Common Core State Standards to Core Curricular Tools

Common Core State Standards	
Holt Course 2 Chapter 1: Algebraic Reasoning	Expressions and Equations
	7.EE.1. Apply properties of operations as strategies to add, subtract, factor, and expand linear expressions with rational coefficients.
	7.EE.2. Understand that rewriting an expression in different forms in a problem context can shed light on the problem and how the quantities in it are related. <i>For example, $a + 0.05a = 1.05a$ means that “increase by 5%” is the same as “multiply by 1.05.”</i>
	7.NS.1. Apply and extend previous understandings of addition and subtraction to add and subtract rational numbers; represent addition and subtraction on a horizontal or vertical number line diagram.
	7.NS.1d. Apply properties of operations as strategies to add and subtract rational numbers.
Anticipated Time: 3 weeks	

Holt Course 2 Chapter 2: Integers and Rational Numbers	Common Core State Standards	
	The Number System 7.NS.1. Apply and extend previous understandings of addition and subtraction to add and subtract rational numbers; represent addition and subtraction on a horizontal or vertical number line diagram. 7.NS.1a. Describe situations in which opposite quantities combine to make 0. For example, a hydrogen atom has 0 charge because its two constituents are oppositely charged. 7.NS.1b. Understand $p + q$ as the number located a distance $ q $ from p , in the positive or negative direction depending on whether q is positive or negative. Show that a number and its opposite have a sum of 0 (are additive inverses). Interpret sums of rational numbers by describing real-world contexts. 7.NS.1c. Understand subtraction of rational numbers as adding the additive inverse, $p - q = p + (-q)$. Show that the distance between two rational numbers on the number line is the absolute value of their difference, and apply this principle in real-world contexts. 7.NS.2. Apply and extend previous understandings of multiplication and division and of fractions to multiply and divide rational numbers. 7.NS.2a. Understand that multiplication is extended from fractions to rational numbers by requiring that operations continue to satisfy the properties of operations, particularly the distributive property, leading to products such as $(-1)(-1) = 1$ and the rules for multiplying signed numbers. Interpret products of rational numbers by describing real-world contexts. 7.NS.2b. Understand that integers can be divided, provided that the divisor is not zero, and every quotient of integers (with non-zero divisor) is a rational number. If p and q are integers, then $-(p/q) = (-p)/q = p/(-q)$. Interpret quotients of rational numbers by describing real-world contexts. 7.NS.2c. Apply properties of operations as strategies to multiply and divide rational numbers. 7.NS.3. Solve real-world and mathematical problems involving the four operations with rational numbers. ¹ Expressions and Equations E.EE.3. Solve multi-step real-life and mathematical problems posed with positive and negative rational numbers in any form (whole numbers, fractions, and decimals), using tools strategically. Apply properties of operations to calculate with numbers in any form; convert between forms as appropriate; and assess the reasonableness of answers using mental computation and estimation strategies. <i>For example: If a woman making \$25 an hour gets a 10% raise, she will make an additional 1/10 of her salary an hour, or \$2.50, for a new salary of \$27.50. If you want to place a towel bar 9 3/4 inches long in the center of a door that is 27 1/2 inches wide, you will need to place the bar about 9 inches from each edge; this estimate can be used as a check on the exact computation.</i>	
	Anticipated Time: 4 weeks	
Holt Course 2 Chapter 3: Applying Rational Numbers	Common Core State Standards	
	The Number System 7.NS.2d. Convert a rational number to a decimal using long division; know that the decimal form of a rational number terminates in 0s or eventually repeats. Expressions and Equations E.EE.3. Solve multi-step real-life and mathematical problems posed with positive and negative rational numbers in any form (whole numbers, fractions, and decimals), using tools strategically. Apply properties of operations to calculate with numbers in any form; convert between forms as appropriate; and assess the reasonableness of answers using mental computation and estimation strategies. <i>For example: If a woman making \$25 an hour gets a 10% raise, she will make an additional 1/10 of her salary an hour, or \$2.50, for a new salary of \$27.50. If you want to place a towel bar 9 3/4 inches long in the center of a door that is 27 1/2 inches wide, you will need to place the bar about 9 inches from each edge; this estimate can be used as a check on the exact computation.</i>

Holt Course 2 Chapter 4: Patterns and Functions	Common Core State Standards
	While teaching this chapter, focus on the Standards for Mathematical Practice.
Anticipated Time: 2 weeks	

Holt Course 2 Chapter 5: Proportional Relationships	Common Core State Standards
	<p>Ratios and Proportional Relationship</p> <p>7.RP.1. Compute unit rates associated with ratios of fractions, including ratios of lengths, areas and other quantities measured in like or different units. <i>For example, if a person walks $\frac{1}{2}$ mile in each $\frac{1}{4}$ hour, compute the unit rate as the complex fraction $\frac{1/2}{1/4}$ miles per hour, equivalently 2 miles per hour.</i></p> <p>7.RP.2. Recognize and represent proportional relationships between quantities.</p> <p>7.RP.2a. Decide whether two quantities are in a proportional relationship, e.g., by testing for equivalent ratios in a table or graphing on a coordinate plane and observing whether the graph is a straight line through the origin.</p> <p>7.RP.2b. Identify the constant of proportionality (unit rate) in tables, graphs, equations, diagrams, and verbal descriptions of proportional relationships.</p> <p>7.RP.2c. Represent proportional relationships by equations. <i>For example, if total cost t is proportional to the number n of items purchased at a constant price p, the relationship between the total cost and the number of items can be expressed as $t = pn$.</i></p> <p>7.RP.2d. Explain what a point (x, y) on the graph of a proportional relationship means in terms of the situation, with special attention to the points $(0, 0)$ and $(1, r)$ where r is the unit rate.</p> <p>7.RP.3. Use proportional relationships to solve multistep ratio and percent problems. Examples: simple interest, tax, markups and markdowns, gratuities and commissions, fees, percent increase and decrease, percent error.</p> <p>Expressions and Equations</p> <p>7.EE.2. Understand that rewriting an expression in different forms in a problem context can shed light on the problem and how the quantities in it are related. <i>For example, $a + 0.05a = 1.05a$ means that “increase by 5%” is the same as “multiply by 1.05.”</i></p> <p>Geometry</p> <p>7.G.1. Solve problems involving scale drawings of geometric figures, including computing actual lengths and areas from a scale drawing and reproducing a scale drawing at a different scale.</p>
Anticipated Time: 3 weeks	

Holt Course 2 Chapter 6: Percents	Common Core State Standards
	Ratios and Proportional Relationships 7.RP.3. Use proportional relationships to solve multistep ratio and percent problems. Examples: simple interest, tax, markups and markdowns, gratuities and commissions, fees, percent increase and decrease, percent error.
Anticipated Time: 2 weeks	

Holt Course 2 Chapter 7: Collecting, Displaying, and Analyzing Data	Common Core State Standards
	Statistics and Probability 7.SP.1. Understand that statistics can be used to gain information about a population by examining a sample of the population; generalizations about a population from a sample are valid only if the sample is representative of that population. Understand that random sampling tends to produce representative samples and support valid inferences. 7.SP.2. Use data from a random sample to draw inferences about a population with an unknown characteristic of interest. Generate multiple samples (or simulated samples) of the same size to gauge the variation in estimates or predictions. <i>For example, estimate the mean word length in a book by randomly sampling words from the book; predict the winner of a school election based on randomly sampled survey data. Gauge how far off the estimate or prediction might be.</i> 7.SP.3. Informally assess the degree of visual overlap of two numerical data distributions with similar variabilities, measuring the difference between the centers by expressing it as a multiple of a measure of variability. <i>For example, the mean height of players on the basketball team is 10 cm greater than the mean height of players on the soccer team, about twice the variability (mean absolute deviation) on either team; on a dot plot, the separation between the two distributions of heights is noticeable.</i> 7.SP.4. Use measures of center and measures of variability for numerical data from random samples to draw informal comparative inferences about two populations. <i>For example, decide whether the words in a chapter of a seventh-grade science book are generally longer than the words in a chapter of a fourth-grade science book.</i>
Anticipated Time: 3 weeks	

Holt Course 2 Chapter 8: Geometric Figures	Common Core State Standards
	Geometry 7.G.2. Draw (freehand, with ruler and protractor, and with technology) geometric shapes with given conditions. Focus on constructing triangles from three measures of angles or sides, noticing when the conditions determine a unique triangle, more than one triangle, or no triangle. 7.G.5. Use facts about supplementary, complementary, vertical, and adjacent angles in a multi-step problem to write and solve simple equations for an unknown angle in a figure.
Anticipated Time: 3 weeks	

Holt Course 2 Chapter 9: Measurement- Two- Dimensional Figures	Common Core State Standards
	Geometry 7.G.4. Know the formulas for the area and circumference of a circle and use them to solve problems; give an informal derivation of the relationship between the circumference and area of a circle. 7.G.6. Solve real-world and mathematical problems involving area, volume and surface area of two- and three-dimensional objects composed of triangles, quadrilaterals, polygons, cubes, and right prisms.
Anticipated Time: 2 weeks	

Holt Course 2 Chapter 10: Measurement: Three- Dimensional Figures	Common Core State Standards
	<p>Geometry</p> <p>7.G.3. Describe the two-dimensional figures that result from slicing three-dimensional figures, as in plane sections of right rectangular prisms and right rectangular pyramids.</p> <p>7.G.6. Solve real-world and mathematical problems involving area, volume and surface area of two- and three-dimensional objects composed of triangles, quadrilaterals, polygons, cubes, and right prisms.</p>
Anticipated Time: 2 weeks	

Holt Course 2 Chapter 11: Probability	Common Core State Standards
	<p>7.SP.5. Understand that the probability of a chance event is a number between 0 and 1 that expresses the likelihood of the event occurring. Larger numbers indicate greater likelihood. A probability near 0 indicates an unlikely event, a probability around 1/2 indicates an event that is neither unlikely nor likely, and a probability near 1 indicates a likely event.</p> <p>7.SP.6. Approximate the probability of a chance event by collecting data on the chance process that produces it and observing its long-run relative frequency, and predict the approximate relative frequency given the probability. <i>For example, when rolling a number cube 600 times, predict that a 3 or 6 would be rolled roughly 200 times, but probably not exactly 200 times.</i></p> <p>7.SP.7. Develop a probability model and use it to find probabilities of events. Compare probabilities from a model to observed frequencies; if the agreement is not good, explain possible sources of the discrepancy.</p> <p>7.SP.7a. Develop a uniform probability model by assigning equal probability to all outcomes, and use the model to determine probabilities of events. <i>For example, if a student is selected at random from a class, find the probability that Jane will be selected and the probability that a girl will be selected.</i></p> <p>7.SP.7b. Develop a probability model (which may not be uniform) by observing frequencies in data generated from a chance process. <i>For example, find the approximate probability that a spinning penny will land heads up or that a tossed paper cup will land open-end down. Do the outcomes for the spinning penny appear to be equally likely based on the observed frequencies?</i></p> <p>7.SP.8. Find probabilities of compound events using organized lists, tables, tree diagrams, and simulation.</p> <p>7.SP.8a. Understand that, just as with simple events, the probability of a compound event is the fraction of outcomes in the sample space for which the compound event occurs.</p> <p>7.SP.8b. Represent sample spaces for compound events using methods such as organized lists, tables and tree diagrams. For an event described in everyday language (e.g., “rolling double sixes”), identify the outcomes in the sample space which compose the event.</p> <p>7.SP.8c. Design and use a simulation to generate frequencies for compound events. <i>For example, use random digits as a simulation tool to approximate the answer to the question: If 40% of donors have type A blood, what is the probability that it will take at least 4 donors to find one with type A blood?</i></p>
Anticipated Time: 3 weeks	

Holt Course 2 Chapter 12: Multi-Step Equations and Inequalities	Common Core State Standards
	<p>Expressions and Equations</p> <p>7.EE.4. Use variables to represent quantities in a real-world or mathematical problem, and construct simple equations and inequalities to solve problems by reasoning about the quantities.</p> <p>7.EE.4a. Solve word problems leading to equations of the form $px + q = r$ and $p(x + q) = r$, where p, q, and r are specific rational numbers. Solve equations of these forms fluently. Compare an algebraic solution to an arithmetic solution, identifying the sequence of the operations used in each approach. <i>For example, the perimeter of a rectangle is 54 cm. Its length is 6 cm. What is its width?</i></p> <p>7.EE.4b. Solve word problems leading to inequalities of the form $px + q > r$ or $px + q < r$, where p, q, and r are specific rational numbers. Graph the solution set of the inequality and interpret it in the context of the problem. <i>For example: As a salesperson, you are paid \$50 per week plus \$3 per sale. This week you want your pay to be at least \$100. Write an inequality for the number of sales you need to make, and describe the solutions.</i></p>
Anticipated Time: 4 weeks	

Alignment of Common Core State Standards to Core Curricular Tools

Holt Course 3 Chapter 1: Principles of Algebra	Common Core State Standards
	<p>The Number System</p> <p>7.NS.1. Apply and extend previous understandings of addition and subtraction to add and subtract rational numbers; represent addition and subtraction on a horizontal or vertical number line diagram.</p> <p>7.NS.1a. Describe situations in which opposite quantities combine to make 0. <i>For example, a hydrogen atom has 0 charge because its two constituents are oppositely charged.</i></p> <p>7.NS.1b. Understand $p + q$ as the number located a distance q from p, in the positive or negative direction depending on whether q is positive or negative. Show that a number and its opposite have a sum of 0 (are additive inverses). Interpret sums of rational numbers by describing real-world contexts.</p> <p>7.NS.1c. Understand subtraction of rational numbers as adding the additive inverse, $p - q = p + (-q)$. Show that the distance between two rational numbers on the number line is the absolute value of their difference, and apply this principle in real-world contexts.</p>
Anticipated Time: 2 weeks	

Common Core State Standards	
Holt Course 3 Chapter 2: Rational Numbers	The Number System 7.NS.1. Apply and extend previous understandings of addition and subtraction to add and subtract rational numbers; represent addition and subtraction on a horizontal or vertical number line diagram. 7.NS.1d. Apply properties of operations as strategies to add and subtract rational numbers. 7.NS.2. Apply and extend previous understandings of multiplication and division and of fractions to multiply and divide rational numbers. 7.NS.2a. Understand that multiplication is extended from fractions to rational numbers by requiring that operations continue to satisfy the properties of operations, particularly the distributive property, leading to products such as $(-1)(-1) = 1$ and the rules for multiplying signed numbers. Interpret products of rational numbers by describing real-world contexts. 7.NS.2b. Understand that integers can be divided, provided that the divisor is not zero, and every quotient of integers (with non-zero divisor) is a rational number. If p and q are integers, then $-(p/q) = (-p)/q = p/(-q)$. Interpret quotients of rational numbers by describing real-world contexts. 7.NS.2c. Apply properties of operations as strategies to multiply and divide rational numbers. 7.NS.2d. Convert a rational number to a decimal using long division; know that the decimal form of a rational number terminates in 0s or eventually repeats. 7.NS.3. Solve real-world and mathematical problems involving the four operations with rational numbers. ¹
	Expressions and Equations 7.EE.3. Solve multi-step real-life and mathematical problems posed with positive and negative rational numbers in any form (whole numbers, fractions, and decimals), using tools strategically. Apply properties of operations to calculate with numbers in any form; convert between forms as appropriate; and assess the reasonableness of answers using mental computation and estimation strategies. <i>For example: If a woman making \$25 an hour gets a 10% raise, she will make an additional $1/10$ of her salary an hour, or \$2.50, for a new salary of \$27.50. If you want to place a towel bar $9\frac{3}{4}$ inches long in the center of a door that is $27\frac{1}{2}$ inches wide, you will need to place the bar about 9 inches from each edge; this estimate can be used as a check on the exact computation.</i>
Anticipated Time: 3 weeks	

Common Core State Standards	
Holt Course 3 Chapter 3: Graphs, Functions, and Sequences	Expressions and Equations 7.EE.2. Understand that rewriting an expression in different forms in a problem context can shed light on the problem and how the quantities in it are related. <i>For example, $a + 0.05a = 1.05a$ means that “increase by 5%” is the same as “multiply by 1.05.”</i>
Anticipated Time: 2 weeks	

Holt Course 3 Chapter 4: Exponents and Roots	Common Core State Standards
	While teaching this chapter, focus on the Standards for Mathematical Practice.
Anticipated Time: 2 weeks	

Holt Course 3 Chapter 5: Ratios, Proportions, and Similarity	Common Core State Standards
	<p>Ratios and Proportional Relationships</p> <p>7.RP.1. Compute unit rates associated with ratios of fractions, including ratios of lengths, areas, and other quantities measured in like or different units. <i>For example, if a person walks $\frac{1}{2}$ mile in each $\frac{1}{4}$ hour, compute the unit rate as the complex fraction $\frac{1/2}{1/4}$ miles per hour, equivalently 2 miles per hour.</i></p> <p>7.RP.2. Recognize and represent proportional relationships between quantities.</p> <p>7.RP.2a. Decide whether two quantities are in a proportional relationship, e.g., by testing for equivalent ratios in a table or graphing on a coordinate plane and observing whether the graph is a straight line through the origin.</p> <p>7.RP.2b. Identify the constant of proportionality (unit rate) in tables, graphs, equations, diagrams, and verbal descriptions of proportional relationships.</p> <p>7.RP.2c. Represent proportional relationships by equations. For example, if total cost t is proportional to the number n of items purchased at a constant price p, the relationship between the total cost and the number of items can be expressed as $t = pn$.</p> <p>7.RP.2d. Explain what a point (x, y) on the graph of a proportional relationship means in terms of the situation, with special attention to the points $(0, 0)$ and $(1, r)$ where r is the unit rate.</p> <p>Geometry</p> <p>7.G.1. Solve problems involving scale drawings of geometric figures, including computing actual lengths and areas from a scale drawing and reproducing a scale drawing at a different scale.</p>
Anticipated Time: 3 weeks	

Holt Course 3 Chapter 6: Percents	Common Core State Standards
	<p>7.RP.3. Use proportional relationships to solve multistep ratio and percent problems. Examples: simple interest, tax, markups and markdowns, gratuities and commissions, fees, percent increase and decrease, percent error.</p>
Anticipated Time: 2 weeks	

Holt Course 3 Chapter 7: Foundations of Geometry	Common Core State Standards
	<p>Geometry</p> <p>7.G.2. Draw (freehand, with ruler and protractor, and with technology) geometric shapes with given conditions. Focus on constructing triangles from three measures of angles or sides, noticing when the conditions determine a unique triangle, more than one triangle, or no triangle.</p> <p>7.G.5. Use facts about supplementary, complementary, vertical, and adjacent angles in a multi-step problem to write and solve simple equations for an unknown angle in a figure.</p>
Anticipated Time: 2 weeks	

Holt Course 3 Chapter 8: Perimeter, Area, and Volume	Common Core State Standards
	<p>Geometry</p> <p>7.G.3. Describe the two-dimensional figures that result from slicing three-dimensional figures, as in plane sections of right rectangular prisms and right rectangular pyramids.</p> <p>7.G.4. Know the formulas for the area and circumference of a circle and use them to solve problems; give an informal derivation of the relationship between the circumference and area of a circle.</p> <p>7.G.6. Solve real-world and mathematical problems involving area, volume and surface area of two- and three-dimensional objects composed of triangles, quadrilaterals, polygons, cubes, and right prisms.</p>
Anticipated Time: 3 weeks	

Holt Course 3 Chapter 9: Data and Statistics	Common Core State Standards
	<p>Statistics and Probability</p> <p>7.SP.1. Understand that statistics can be used to gain information about a population by examining a sample of the population; generalizations about a population from a sample are valid only if the sample is representative of that population. Understand that random sampling tends to produce representative samples and support valid inferences.</p> <p>7.SP.2. Use data from a random sample to draw inferences about a population with an unknown characteristic of interest. Generate multiple samples (or simulated samples) of the same size to gauge the variation in estimates or predictions. <i>For example, estimate the mean word length in a book by randomly sampling words from the book; predict the winner of a school election based on randomly sampled survey data. Gauge how far off the estimate or prediction might be.</i></p> <p>7.SP.3. Informally assess the degree of visual overlap of two numerical data distributions with similar variabilities, measuring the difference between the centers by expressing it as a multiple of a measure of variability. <i>For example, the mean height of players on the basketball team is 10 cm greater than the mean height of players on the soccer team, about twice the variability (mean absolute deviation) on either team; on a dot plot, the separation between the two distributions of heights is noticeable.</i></p> <p>7.SP.4. Use measures of center and measures of variability for numerical data from random samples to draw informal comparative inferences about two populations. <i>For example, decide whether the words in a chapter of a seventh-grade science book are generally longer than the words in a chapter of a fourth-grade science book.</i></p>
Anticipated Time: 3 weeks	

Holt Course 3 Chapter 10: Probability	Common Core State Standards
	<p>Statistics and Probability</p> <p>7.SP.5. Understand that the probability of a chance event is a number between 0 and 1 that expresses the likelihood of the event occurring. Larger numbers indicate greater likelihood. A probability near 0 indicates an unlikely event, a probability around $\frac{1}{2}$ indicates an event that is neither unlikely nor likely, and a probability near 1 indicates a likely event.</p> <p>7.SP.6. Approximate the probability of a chance event by collecting data on the chance process that produces it and observing its long-run relative frequency, and predict the approximate relative frequency given the probability. <i>For example, when rolling a number cube 600 times, predict that a 3 or 6 would be rolled roughly 200 times, but probably not exactly 200 times.</i></p> <p>7.SP.7. Develop a probability model and use it to find probabilities of events. Compare probabilities from a model to observed frequencies; if the agreement is not good, explain possible sources of the discrepancy.</p> <p>7.SP.7a. Develop a uniform probability model by assigning equal probability to all outcomes, and use the model to determine probabilities of events. <i>For example, if a student is selected at random from a class, find the probability that Jane will be selected and the probability that a girl will be selected.</i></p> <p>7.SP.7b. Develop a probability model (which may not be uniform) by observing frequencies in data generated from a chance process. <i>For example, find the approximate probability that a spinning penny will land heads up or that a tossed paper cup will land open-end down. Do the outcomes for the spinning penny appear to be equally likely based on the observed frequencies?</i></p> <p>7.SP.8. Find probabilities of compound events using organized lists, tables, tree diagrams, and simulation.</p> <p>7.SP.8a. Understand that, just as with simple events, the probability of a compound event is the fraction of outcomes in the sample space for which the compound event occurs.</p> <p>7.SP.8b. Represent sample spaces for compound events using methods such as organized lists, tables and tree diagrams. For an event described in everyday language (e.g., “rolling double sixes”), identify the outcomes in the sample space which compose the event.</p> <p>7.SP.8c. Design and use a simulation to generate frequencies for compound events. <i>For example, use random digits as a simulation tool to approximate the answer to the question: If 40% of donors have type A blood, what is the probability that it will take at least 4 donors to find one with type A blood?</i></p>
Anticipated Time: 2 weeks	

Holt Course 3 Chapter 11: Multi-Step Equations and Inequalities	Common Core State Standards
	<p>Expressions and Equations</p> <p>7.EE.1. Apply properties of operations as strategies to add, subtract, factor, and expand linear expressions with rational coefficients.</p> <p>7.EE.3. Solve multi-step real-life and mathematical problems posed with positive and negative rational numbers in any form (whole numbers, fractions, and decimals), using tools strategically. Apply properties of operations to calculate with numbers in any form; convert between forms as appropriate; and assess the reasonableness of answers using mental computation and estimation strategies. <i>For example: If a woman making \$25 an hour gets a 10% raise, she will make an additional $\frac{1}{10}$ of her salary an hour, or \$2.50, for a new salary of \$27.50. If you want to place a towel bar $9\frac{3}{4}$ inches long in the center of a door that is $27\frac{1}{2}$ inches wide, you will need to place the bar about 9 inches from each edge; this estimate can be used as a check on the exact computation.</i></p> <p>7.EE.4. Use variables to represent quantities in a real-world or mathematical problem, and construct simple equations and inequalities to solve problems by reasoning about the quantities.</p> <p>7.EE.4a. Solve word problems leading to equations of the form $px + q = r$ and $p(x + q) = r$, where p, q, and r are specific rational numbers. Solve equations of these forms fluently. Compare an algebraic solution to an arithmetic solution, identifying the sequence of the operations used in each approach. <i>For example, the perimeter of a rectangle is 54 cm. Its length is 6 cm. What is its width?</i></p> <p>7.EE.4b. Solve word problems leading to inequalities of the form $px + q > r$ or $px + q < r$, where p, q, and r are specific rational numbers. Graph the solution set of the inequality and interpret it in the context of the problem. <i>For example: As a salesperson, you are paid \$50 per week plus \$3 per sale. This week you want your pay to be at least \$100. Write an inequality for the number of sales you need to make, and describe the solutions.</i></p>

Anticipated Time: 2 weeks	

Alignment of Common Core State Standards to Core Curricular Tools

	Common Core State Standards
Holt Algebra 1 Chapter 1: Foundations for Algebra	<p>N-RN.1. Explain how the definition of the meaning of rational exponents follows from extending the properties of integer exponents to those values, allowing for a notation for radicals in terms of rational exponents. <i>For example, we define $5^{1/3}$ to be the cube root of 5 because we want $(5^{1/3})^3 = 5^{(1/3)3}$ to hold, so $(5^{1/3})^3$ must equal 5.</i></p> <p>N-RN.2. Rewrite expressions involving radicals and rational exponents using the properties of exponents.</p> <p>N-RN.3. Explain why the sum or product of two rational numbers is rational; that the sum of a rational number and an irrational number is irrational; and that the product of a nonzero rational number and an irrational number is irrational</p> <p>N-Q.2. Define appropriate quantities for the purpose of descriptive modeling.</p> <p>N-Q.3. Choose a level of accuracy appropriate to limitations on measurement when reporting quantities.</p> <p>A-SSE.1a. Interpret parts of an expression, such as terms, factors, and coefficients.</p> <p>A-SSE.1b. Interpret complicated expressions by viewing one or more of their parts as a single entity. <i>For example, interpret $P(1+r)^n$ as the product of P and a factor not depending on P.</i></p> <p>A-SSE.2 Use the structure of an expression to identify ways to rewrite it. <i>For example, see $x^4 - y^4$ as $(x^2)^2 - (y^2)^2$, thus recognizing it as a difference of squares that can be factored as $(x^2 - y^2)(x^2 + y^2)$.</i></p>
	Anticipated Time: 3 weeks

Holt Algebra 1 Chapter 2: Equations	Common Core State Standards
	<p>A-REI.1 Explain each step in solving a simple equation as following from the equality of numbers asserted at the previous step, starting from the assumption that the original equation has a solution. Construct a viable argument to justify a solution method.</p> <p>A-CED.4. Rearrange formulas to highlight a quantity of interest, using the same reasoning as in solving equations. <i>For example, rearrange Ohm's law $V = IR$ to highlight resistance R.</i></p> <p>A-REI.3. Solve linear equations and inequalities in one variable, including equations with coefficients represented by letters.</p> <p>F-LE.5. Interpret the parameters in a linear or exponential function in terms of a context.</p>
Anticipated Time: 3 weeks	

Holt Algebra 1 Chapter 3: Inequalities	Common Core State Standards
	<p>A-CED.1 Create equations and inequalities in one variable and use them to solve problems. <i>Include equations arising from linear and quadratic functions, and simple rational and exponential functions.</i></p> <p>A-CED.3. Represent constraints by equations or inequalities, and by systems of equations and/or inequalities, and interpret solutions as viable or nonviable options in a modeling context. <i>For example, represent inequalities describing nutritional and cost constraints on combinations of different foods.</i></p> <p>A-REI.12. Graph the solutions to a linear inequality in two variables as a half-plane (excluding the boundary in the case of a strict inequality), and graph the solution set to a system of linear inequalities in two variables as the intersection of the corresponding half-planes.</p>
Anticipated Time: 2 weeks	

Holt Algebra 1 Chapter 4: Functions	Common Core State Standards
	<p>8.F.1. Understand that a function is a rule that assigns to each input exactly one output. The graph of a function is the set of ordered pairs consisting of an input and the corresponding output.¹</p> <p>8.F.4. Construct a function to model a linear relationship between two quantities. Determine the rate of change and initial value of the function from a description of a relationship or from two (x, y) values, including reading these from a table or from a graph. Interpret the rate of change and initial value of a linear function in terms of the situation it models, and in terms of its graph or a table of values.</p> <p>8.F.5. Describe qualitatively the functional relationship between two quantities by analyzing a graph (e.g., where the function is increasing or decreasing, linear or nonlinear). Sketch a graph that exhibits the qualitative features of a function that has been described verbally.</p> <p>A-CED.2. Create equations in two or more variables to represent relationships between quantities; graph equations on coordinate axes with labels and scales.</p> <p>A-REI.10. Understand that the graph of an equation in two variables is the set of all its solutions plotted in the coordinate plane, often forming a curve (which could be a line).</p> <p>F-IF.1 Understand that a function from one set (called the domain) to another set (called the range) assigns to each element of the domain exactly one element of the range. If f is a function and x is an element of its domain, then $f(x)$ denotes the output of f corresponding to the input x. The graph of f is the graph of the equation $y = f(x)$.</p> <p>F-IF.2. Use function notation, evaluate functions for inputs in their domains, and interpret statements that use function notation in terms of a context.</p> <p>F-IF.3. Recognize that sequences are functions, sometimes defined recursively, whose domain is a subset of the integers. <i>For example, the Fibonacci sequence is defined recursively by $f(0) = f(1) = 1$, $f(n+1) = f(n) + f(n-1)$ for $n \geq 1$.</i></p> <p>F-IF.5. Relate the domain of a function to its graph and, where applicable, to the quantitative relationship it describes. <i>For example, if the function $h(n)$ gives the number of person-hours it takes to assemble n engines in a factory, then the positive integers would be an appropriate domain for the function</i></p> <p>F-BF.1a. Determine an explicit expression, a recursive process, or steps for calculation from a context.</p>
	Anticipated Time: 4 weeks

Holt Algebra 1 Chapter 5: Linear Functions	Common Core State Standards
	<p>8.F.2. Compare properties of two functions each represented in a different way (algebraically, graphically, numerically in tables, or by verbal descriptions). For example, given a linear function represented by a table of values and a linear function represented by an algebraic expression, determine which function has the greater rate of change.</p> <p>8.F.3. Interpret the equation $y = mx + b$ as defining a linear function, whose graph is a straight line; give examples of functions that are not linear. For example, the function $A = s^2$ giving the area of a square as a function of its side length is not linear because its graph contains the points (1,1), (2,4) and (3,9), which are not on a straight line.</p> <p>F-IF.4. For a function that models a relationship between two quantities, interpret key features of graphs and tables in terms of the quantities, and sketch graphs showing key features given a verbal description of the relationship. Key features include: intercepts; intervals where the function is increasing, decreasing, positive, or negative; relative maximums and minimums; symmetries; end behavior; and periodicity.</p> <p>F-IF.6. Calculate and interpret the average rate of change of a function (presented symbolically or as a table) over a specified interval. Estimate the rate of change from a graph.</p> <p>F-BF.2. Write arithmetic and geometric sequences both recursively and with an explicit formula, use them to model situations, and translate between the two forms.</p> <p>F-LE.1b. Recognize situations in which one quantity changes at a constant rate per unit interval relative to another.</p> <p>F-LE.2. Construct linear and exponential functions, including arithmetic and geometric sequences, given a graph, a description of a relationship, or two input-output pairs (include reading these from a table).</p>
Anticipated Time: 3 weeks	

Chapter 6: Systems of Equations and	Common Core State Standards
	<p>8.EE.8a. Understand that solutions to a system of two linear equations in two variables correspond to points of intersection of their graphs, because points of intersection satisfy both equations simultaneously.</p> <p>8.EE.8b. Solve systems of two linear equations in two variables algebraically, and estimate solutions by graphing the equations. Solve simple cases by inspection. <i>For example, $3x + 2y = 5$ and $3x + 2y = 6$ have no solution because $3x + 2y$ cannot simultaneously be 5 and 6.</i></p> <p>8.EE.8c. Solve real-world and mathematical problems leading to two linear equations in two variables. <i>For example, given coordinates for</i></p>

	<p><i>two pairs of points, determine whether the line through the first pair of points intersects the line through the second pair.</i></p> <p>A-REI.5. Prove that, given a system of two equations in two variables, replacing one equation by the sum of that equation and a multiple of the other produces a system with the same solutions.</p> <p>A-REI.6. Solve systems of linear equations exactly and approximately (e.g., with graphs), focusing on pairs of linear equations in two variables.</p> <p>A-REI.10. Understand that the graph of an equation in two variables is the set of all its solutions plotted in the coordinate plane, often forming a curve (which could be a line).</p>
Anticipated Time: 3 weeks	

Holt Algebra 1 Chapter 7: Exponents and Polynomials	Common Core State Standards
	<p>A-APR.1. Understand that polynomials form a system analogous to the integers, namely, they are closed under the operations of addition, subtraction, and multiplication; add, subtract, and multiply polynomials.</p>
Anticipated Time: 2 weeks	

Holt Algebra 1 Chapter 8: Factoring Polynomials	Common Core State Standards
	<p>A-REI.4b. Solve quadratic equations in one variable: Solve quadratic equations by inspection (e.g., for $x^2 = 49$), taking square roots, completing the square, the quadratic formula and factoring, as appropriate to the initial form of the equation. Recognize when the quadratic formula gives complex solutions and write them as $a \pm bi$ for real numbers a and b.</p>
Anticipated Time: 2 weeks	

Holt Algebra 1 Chapter 9: Quadratic Functions and Equations	Common Core State Standards
	<p>A-SSE.3a. Choose and produce an equivalent form of an expression to reveal and explain properties of the quantity represented by the expression: Factor a quadratic expression to reveal the zeros of the function it defines.</p> <p>A-SSE.3b. Choose and produce an equivalent form of an expression to reveal and explain properties of the quantity represented by the expression: Complete the square in a quadratic expression to reveal the maximum or minimum value of the function it defines.</p> <p>A-SSE.3c. Choose and produce an equivalent form of an expression to reveal and explain properties of the quantity represented by the expression: Use the properties of exponents to transform expressions for exponential functions. <i>For example the expression 1.15^t can be rewritten as $(1.15^{1/12})^{12t} \approx 1.012^{12t}$ to reveal the approximate equivalent monthly interest rate if the annual rate is 15%.</i></p> <p>A-REI.4a. Solve quadratic equations in one variable: Use the method of completing the square to transform any quadratic equation in x into an equation of the form $(x - p)^2 = q$ that has the same solutions. Derive the quadratic formula from this form.</p> <p>A-REI.4b. Solve quadratic equations in one variable: Solve quadratic equations by inspection (e.g., for $x^2 = 49$), taking square roots, completing the square, the quadratic formula and factoring, as appropriate to the initial form of the equation. Recognize when the quadratic formula gives complex solutions and write them as $a \pm bi$ for real numbers a and b.</p> <p>A-REI.7. Solve a simple system consisting of a linear equation and a quadratic equation in two variables algebraically and graphically. <i>For example, find the points of intersection between the line $y = -3x$ and the circle $x^2 + y^2 = 3$.</i></p> <p>F-IF.7a. Graph linear and quadratic functions and show intercepts, maxima, and minima</p> <p>F-IF.9 Compare properties of two functions each represented in a different way (algebraically, graphically, numerically in tables, or by verbal descriptions). <i>For example, given a graph of one quadratic function and an algebraic expression for another, say which has the larger maximum.</i></p> <p>F-LE.3. Observe using graphs and tables that a quantity increasing exponentially eventually exceeds a quantity increasing linearly, quadratically, or (more generally) as a polynomial function.</p>
Anticipated Time: 4 weeks	

Holt Algebra 1 Chapter 10: Data Analysis and Probability	Common Core State Standards
	<p>8.SP.1. Construct and interpret scatter plots for bivariate measurement data to investigate patterns of association between two quantities. Describe patterns such as clustering, outliers, positive or negative association, linear association, and nonlinear association.</p> <p>8.SP.2. Know that straight lines are widely used to model relationships between two quantitative variables. For scatter plots that suggest a linear association, informally fit a straight line, and informally assess the model fit by judging the closeness of the data points to the line.</p> <p>8.SP.3. Use the equation of a linear model to solve problems in the context of bivariate measurement data, interpreting the slope and intercept. <i>For example, in a linear model for a biology experiment, interpret a slope of 1.5 cm/hr as meaning that an additional hour of sunlight each day is associated with an additional 1.5 cm in mature plant height</i></p> <p>8.SP.4. Understand that patterns of association can also be seen in bivariate categorical data by displaying frequencies and relative frequencies in a two-way table. Construct and interpret a two-way table summarizing data on two categorical variables collected from the same subjects. Use relative frequencies calculated for rows or columns to describe possible association between the two variables. <i>For example, collect data from students in your class on whether or not they have a curfew on school nights and whether or not they have assigned chores at home. Is there evidence that those who have a curfew also tend to have chores?</i></p> <p>N-Q.1 Use units as a way to understand problems and to guide the solution of multi-step problems; choose and interpret units consistently in formulas; choose and interpret the scale and the origin in graphs and data displays</p> <p>S-ID.1. Represent data with plots on the real number line (dot plots, histograms, and box plots).</p> <p>S-ID.2. Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets.</p> <p>S-ID.3. Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers).</p> <p>S-ID.5. Summarize categorical data for two categories in two-way frequency tables. Interpret relative frequencies in the context of the data (including joint, marginal, and conditional relative frequencies). Recognize possible associations and trends in the data.</p> <p>S-ID.6a. Fit a function to the data; use functions fitted to data to solve problems in the context of the data. Use given functions or choose a function suggested by the context. Emphasize linear, quadratic, and exponential models.</p> <p>S-ID.6b. Informally assess the fit of a function by plotting and analyzing residuals.</p> <p>S-ID.6c. Fit a linear function for a scatter plot that suggests a linear association.</p> <p>S-ID.7 Interpret the slope (rate of change) and the intercept (constant term) of a linear model in the context of the data.</p> <p>S-ID.8 Compute (using technology) and interpret the correlation coefficient of a linear fit.</p> <p>S-ID.9 Distinguish between correlation and causation.</p>
	Anticipated Time: 4 weeks

Holt Algebra 1 Chapter 11: Exponential and Radical Functions	Common Core State Standards
	<p>F-IF.7.b. Graph square root, cube root, and piecewise-defined functions, including step functions and absolute value functions.</p> <p>F-IF.7.e. Graph exponential and logarithmic functions, showing intercepts and end behavior, and trigonometric functions, showing period, midline, and amplitude.</p> <p>F-IF.8a. Write a function defined by an expression in different but equivalent forms to reveal and explain different properties of the function: Use the process of factoring and completing the square in a quadratic function to show zeros, extreme values, and symmetry of the graph, and interpret these in terms of a context.</p> <p>F-IF.8b. Write a function defined by an expression in different but equivalent forms to reveal and explain different properties of the function: Use the properties of exponents to interpret expressions for exponential functions. For example, identify percent rate of change in functions such as $y = (1.02)^t$, $y = (0.97)^t$, $y = (1.01)^{12t}$, $y = (1.2)^{t/10}$, and classify them as representing exponential growth or decay.</p> <p>F-BF.1b. Combine standard function types using arithmetic operations. <i>For example, build a function that models the temperature of a cooling body by adding a constant function to a decaying exponential, and relate these functions to the model.</i></p> <p>F-BF.3. Identify the effect on the graph of replacing $f(x)$ by $f(x) + k$, $k f(x)$, $f(kx)$, and $f(x + k)$ for specific values of k (both positive and negative); find the value of k given the graphs. Experiment with cases and illustrate an explanation of the effects on the graph using technology. Include recognizing even and odd functions from their graphs and algebraic expressions for them.</p> <p>F-LE.1a. Prove that linear functions grow by equal differences over equal intervals, and that exponential functions grow by equal factors over equal intervals.</p> <p>F-LE.1c. Recognize situations in which a quantity grows or decays by a constant percent rate per unit interval relative to another.</p> <p>F-LE.5. Interpret the parameters in a linear or exponential function in terms of a context.</p>
Anticipated Time: 3 weeks	

Holt Algebra 1 Chapter 12: Rational Functions and Equations	Common Core State Standards
	<p>F-BF.4a. Solve an equation of the form $f(x) = c$ for a simple function f that has an inverse and write an expression for the inverse. For example, $f(x) = 2x^3$ or $f(x) = (x+1)/(x-1)$ for $x \neq 1$.</p>
Anticipated Time: 3 weeks	

Not Addressed in Holt Algebra 1	Common Core State Standards
	<p>8.G.6. Explain a proof of the Pythagorean Theorem and its converse.</p> <p>8.G.7. Apply the Pythagorean Theorem to determine unknown side lengths in right triangles in real-world and mathematical problems in two and three dimensions.</p> <p>8.G.8. Apply the Pythagorean Theorem to find the distance between two points in a coordinate system.</p>
Anticipated Time: 1 week	

Alignment of Common Core State Standards to Core Curricular Tools

Holt Course 3 Chapter 1: Principles of Algebra	Common Core State Standards
	<p>8.EE.7. Solve linear equations in one variable.</p> <p>8.EE.7a. Give examples of linear equations in one variable with one solution, infinitely many solutions, or no solutions. Show which of these possibilities is the case by successively transforming the given equation into simpler forms, until an equivalent equation of the form $x = a$, $a = a$, or $a = b$ results (where a and b are different numbers).</p> <p>8.EE.7b. Solve linear equations with rational number coefficients, including equations whose solutions require expanding expressions using the distributive property and collecting like terms.</p>
Anticipated Time: 2 weeks	

Holt Course 3 Chapter 2: Rational Numbers	Common Core State Standards
	<p>While teaching this chapter, focus on the Standards for Mathematical Practice.</p>
Anticipated Time: 2 weeks	

Holt Course 3 Chapter 3: Graphs, Functions, and Sequences	Common Core State Standards
	<p>Functions</p> <p>8.F.1. Understand that a function is a rule that assigns to each input exactly one output. The graph of a function is the set of ordered pairs consisting of an input and the corresponding output.¹</p> <p>8.F.2. Compare properties of two functions each represented in a different way (algebraically, graphically, numerically in tables, or by verbal descriptions). For example, given a linear function represented by a table of values and a linear function represented by an algebraic expression, determine which function has the greater rate of change.</p> <p>8.F.4. Construct a function to model a linear relationship between two quantities. Determine the rate of change and initial value of the function from a description of a relationship or from two (x, y) values, including reading these from a table or from a graph. Interpret the rate of change and initial value of a linear function in terms of the situation it models, and in terms of its graph or a table of values.</p> <p>8.F.5. Describe qualitatively the functional relationship between two quantities by analyzing a graph (e.g., where the function is increasing or decreasing, linear or nonlinear). Sketch a graph that exhibits the qualitative features of a function that has been described verbally.</p>
	Anticipated Time: 2 weeks

Holt Course 3 Chapter 4: Exponents and Roots	Common Core State Standards
	<p>The Number System</p> <p>8.NS.1. Know that numbers that are not rational are called irrational. Understand informally that every number has a decimal expansion; for rational numbers show that the decimal expansion repeats eventually, and convert a decimal expansion which repeats eventually into a rational number.</p> <p>8.NS.2. Use rational approximations of irrational numbers to compare the size of irrational numbers, locate them approximately on a number line diagram, and estimate the value of expressions (e.g., π^2). <i>For example, by truncating the decimal expansion of $\sqrt{2}$, show that $\sqrt{2}$ is between 1 and 2, then between 1.4 and 1.5, and explain how to continue on to get better approximations.</i></p> <p>Expressions and Equations</p> <p>8.EE.1. Know and apply the properties of integer exponents to generate equivalent numerical expressions. For example, $3^2 \times 3^{-5} = 3^{-3} = 1/3^3 = 1/27$.</p> <p>8.EE.2. Use square root and cube root symbols to represent solutions to equations of the form $x^2 = p$ and $x^3 = p$, where p is a positive rational number. Evaluate square roots of small perfect squares and cube roots of small perfect cubes. Know that $\sqrt{2}$ is irrational.</p> <p>8.EE.3. Use numbers expressed in the form of a single digit times a whole-number power of 10 to estimate very large or very small quantities, and to express how many times as much one is than the other. <i>For example, estimate the population of the United States as 3 times 10^8 and the population of the world as 7 times 10^9, and determine that the world population is more than 20 times larger.</i></p> <p>8.EE.4. Perform operations with numbers expressed in scientific notation, including problems where both decimal and scientific notation are used. Use scientific notation and choose units of appropriate size for measurements of very large or very small quantities (e.g., use millimeters per year for seafloor spreading). Interpret scientific notation that has been generated by technology.</p> <p>Geometry</p> <p>8.G.6. Explain a proof of the Pythagorean Theorem and its converse.</p> <p>8.G.7. Apply the Pythagorean Theorem to determine unknown side lengths in right triangles in real-world and mathematical problems in two and three dimensions.</p>
	Anticipated Time: 3 weeks

Holt Course 3 Chapter 5: Ratios, Proportions, and Similarity	Common Core State Standards	
	Geometry	
	8.G.3. Describe the effect of dilations, translations, rotations, and reflections on two-dimensional figures using coordinates. 8.G.4. Understand that a two-dimensional figure is similar to another if the second can be obtained from the first by a sequence of rotations, reflections, translations, and dilations; given two similar two-dimensional figures, describe a sequence that exhibits the similarity between them.	
Anticipated Time: 3 weeks		

Holt Course 3 Chapter 6: Percents	Common Core State Standards	
	While teaching this chapter, focus on the Standards for Mathematical Practice.	
Anticipated Time: 2 weeks		

Holt Course 3 Chapter 7: Foundations of Geometry	Common Core State Standards
	<p>Geometry</p> <p>8.G.1. Verify experimentally the properties of rotations, reflections, and translations:</p> <p>8.G.1a. Lines are taken to lines, and line segments to line segments of the same length.</p> <p>8.G.1b. Angles are taken to angles of the same measure.</p> <p>8.G.1c. Parallel lines are taken to parallel lines.</p> <p>8.G.2. Understand that a two-dimensional figure is congruent to another if the second can be obtained from the first by a sequence of rotations, reflections, and translations; given two congruent figures, describe a sequence that exhibits the congruence between them.</p> <p>8.G.3. Describe the effect of dilations, translations, rotations, and reflections on two-dimensional figures using coordinates.</p> <p>8.G.4. Understand that a two-dimensional figure is similar to another if the second can be obtained from the first by a sequence of rotations, reflections, translations, and dilations; given two similar two-dimensional figures, describe a sequence that exhibits the similarity between them.</p> <p>8.G.5. Use informal arguments to establish facts about the angle sum and exterior angle of triangles, about the angles created when parallel lines are cut by a transversal, and the angle-angle criterion for similarity of triangles. <i>For example, arrange three copies of the same triangle so that the sum of the three angles appears to form a line, and give an argument in terms of transversals why this is so.</i></p>
Anticipated Time: 3 weeks	

Holt Course 3 Chapter 8: Perimeter, Area, and Volume	Common Core State Standards
	<p>Geometry</p> <p>8.G.9. Know the formulas for the volumes of cones, cylinders, and spheres and use them to solve real-world and mathematical problems.</p>
Anticipated Time: 3 weeks	

Holt Course 3 Chapter 9: Data and Statistics	Common Core State Standards
	<p>Statistics and Probability</p> <p>8.SP.1. Construct and interpret scatter plots for bivariate measurement data to investigate patterns of association between two quantities. Describe patterns such as clustering, outliers, positive or negative association, linear association, and nonlinear association.</p> <p>8.SP.2. Know that straight lines are widely used to model relationships between two quantitative variables. For scatter plots that suggest a linear association, informally fit a straight line, and informally assess the model fit by judging the closeness of the data points to the line.</p> <p>8.SP.3. Use the equation of a linear model to solve problems in the context of bivariate measurement data, interpreting the slope and intercept. <i>For example, in a linear model for a biology experiment, interpret a slope of 1.5 cm/hr as meaning that an additional hour of sunlight each day is associated with an additional 1.5 cm in mature plant height.</i></p> <p>8.SP.4. Understand that patterns of association can also be seen in bivariate categorical data by displaying frequencies and relative frequencies in a two-way table. Construct and interpret a two-way table summarizing data on two categorical variables collected from the same subjects. Use relative frequencies calculated for rows or columns to describe possible association between the two variables. <i>For example, collect data from students in your class on whether or not they have a curfew on school nights and whether or not they have assigned chores at home. Is there evidence that those who have a curfew also tend to have chores?</i></p>
Anticipated Time: 3 weeks	

Holt Course 3 Chapter 10: Probability	Common Core State Standards
	<p>While teaching this chapter, focus on the Standards for Mathematical Practice.</p>
Anticipated Time:	

Holt Course 3 Chapter 11: Multi-Step Equations and Inequalities	Common Core State Standards
	<p>Expressions and Equations</p> <p>8.EE.7. Solve linear equations in one variable.</p> <p>8.EE.7a. Give examples of linear equations in one variable with one solution, infinitely many solutions, or no solutions. Show which of these possibilities is the case by successively transforming the given equation into simpler forms, until an equivalent equation of the form $x = a$, $a = a$, or $a = b$ results (where a and b are different numbers).</p> <p>8.EE.7b. Solve linear equations with rational number coefficients, including equations whose solutions require expanding expressions using the distributive property and collecting like terms.</p> <p>8.EE.8. Analyze and solve pairs of simultaneous linear equations.</p> <p>8.EE.8a. Understand that solutions to a system of two linear equations in two variables correspond to points of intersection of their graphs, because points of intersection satisfy both equations simultaneously.</p> <p>8.EE.8b. Solve systems of two linear equations in two variables algebraically, and estimate solutions by graphing the equations. Solve simple cases by inspection. For example, $3x + 2y = 5$ and $3x + 2y = 6$ have no solution because $3x + 2y$ cannot simultaneously be 5 and 6.</p> <p>8.EE.8c. Solve real-world and mathematical problems leading to two linear equations in two variables. For example, given coordinates for two pairs of points, determine whether the line through the first pair of points intersects the line through the second pair.</p>
Anticipated Time: 2 weeks	

Holt Course 3 Chapter 12: Graphing Lines	Common Core State Standards
	<p>Expressions and Equations</p> <p>8.EE.6. Use similar triangles to explain why the slope m is the same between any two distinct points on a non-vertical line in the coordinate plane; derive the equation $y = mx$ for a line through the origin and the equation $y = mx + b$ for a line intercepting the vertical axis at b.</p> <p>Functions</p> <p>8.F.3. Interpret the equation $y = mx + b$ as defining a linear function, whose graph is a straight line; give examples of functions that are not linear. For example, the function $A = s^2$ giving the area of a square as a function of its side length is not linear because its graph contains the points (1,1), (2,4) and (3,9), which are not on a straight line.</p> <p>Statistics and Probability</p> <p>8.SP.2. Know that straight lines are widely used to model relationships between two quantitative variables. For scatter plots that suggest a linear association, informally fit a straight line, and informally assess the model fit by judging the closeness of the data points to the line.</p>

Anticipated Time: 3 weeks	

Alignment of Common Core State Standards to Core Curricular Tools

	Common Core State Standards
Holt Geometry Chapter 1: Foundations for Geometry	<p>Geometry - Congruence</p> <p>G.CO.1. Know precise definitions of angle, circle, perpendicular line, parallel line, and line segment, based on the undefined notions of point, line, distance along a line, and distance around a circular arc.</p> <p>G-CO.4. Develop definitions of rotations, reflections, and translations in terms of angles, circles, perpendicular lines, parallel lines, and line segments.</p> <p>G-CO.5. Given a geometric figure and a rotation, reflection, or translation, draw the transformed figure using, e.g., graph paper, tracing paper, or geometry software. Specify a sequence of transformations that will carry a given figure onto another.</p> <p>G-CO.12. Make formal geometric constructions with a variety of tools and methods (compass and straightedge, string, reflective devices, paper folding, dynamic geometric software, etc.). <i>Copying a segment; copying an angle; bisecting a segment; bisecting an angle; constructing perpendicular lines, including the perpendicular bisector of a line segment; and constructing a line parallel to a given line through a point not on the line.</i></p> <p>Geometry – Expressing Geometric Properties with Equations</p> <p>G-GPE.6. Find the point on a directed line segment between two given points that partitions the segment in a given ratio.</p>
	Anticipated Time: 3 weeks

Holt Geometry Chapter 2: Geometric Reasoning	Common Core State Standards
	<p>Statistics and Probability – Conditional Probability and the Rules of Probability</p> <p>S-CP.1. Describe events as subsets of a sample space (the set of outcomes) using characteristics (or categories) of the outcomes, or as unions, intersections, or complements of other events (“or,” “and,” “not”).</p> <p>S-CP.2. Understand that two events <i>A</i> and <i>B</i> are independent if the probability of <i>A</i> and <i>B</i> occurring together is the product of their probabilities, and use this characterization to determine if they are independent.</p> <p>S-CP.3. Understand the conditional probability of <i>A</i> given <i>B</i> as $P(A \text{ and } B)/P(B)$, and interpret independence of <i>A</i> and <i>B</i> as saying that the conditional probability of <i>A</i> given <i>B</i> is the same as the probability of <i>A</i>, and the conditional probability of <i>B</i> given <i>A</i> is the same as the probability of <i>B</i>.</p> <p>S-CP.4. Construct and interpret two-way frequency tables of data when two categories are associated with each object being classified. Use the two-way table as a sample space to decide if events are independent and to approximate conditional probabilities. <i>For example, collect data from a random sample of students in your school on their favorite subject among math, science, and English. Estimate the probability that a randomly selected student from your school will favor science given that the student is in tenth grade. Do the same for other subjects and compare the results.</i></p> <p>S-CP.5. Recognize and explain the concepts of conditional probability and independence in everyday language and everyday situations. <i>For example, compare the chance of having lung cancer if you are a smoker with the chance of being a smoker if you have lung cancer.</i></p> <p>S-CP.6. Find the conditional probability of <i>A</i> given <i>B</i> as the fraction of <i>B</i>’s outcomes that also belong to <i>A</i>, and interpret the answer in terms of the model.</p> <p>S-CP.7. Apply the Addition Rule, $P(A \text{ or } B) = P(A) + P(B) - P(A \text{ and } B)$, and interpret the answer in terms of the model.</p> <p>S-CP.8. (+) Apply the general Multiplication Rule in a uniform probability model, $P(A \text{ and } B) = P(A)P(B A) = P(B)P(A B)$, and interpret the answer in terms of the model.</p> <p>S-CP.9. (+) Use permutations and combinations to compute probabilities of compound events and solve problems.</p> <p>Statistics and Probability – Using Probability to Make Decisions</p> <p>S-MD.6. (+) Use probabilities to make fair decisions (e.g., drawing by lots, using a random number generator).</p> <p>S-MD.7. (+) Analyze decisions and strategies using probability concepts (e.g., product testing, medical testing, pulling a hockey goalie at the end of a game).</p>
	Anticipated Time: 3 weeks

Holt Geometry Chapter 3: Parallel and Perpendicular	Common Core State Standards
	<p>Geometry - Congruence</p> <p>G-CO.9. Prove theorems about lines and angles. <i>Theorems include: vertical angles are congruent; when a transversal crosses parallel lines, alternate interior angles are congruent and corresponding angles are congruent; points on a perpendicular bisector of a line segment are exactly those equidistant from the segment’s endpoints</i></p>
Anticipated Time: 3 weeks	

Holt Geometry Chapter 4: Triangle Congruence	Common Core State Standards
	<p>Geometry – Congruence</p> <p>G-CO.7. Use the definition of congruence in terms of rigid motions to show that two triangles are congruent if and only if corresponding pairs of sides and corresponding pairs of angles are congruent.</p> <p>G-CO.8. Explain how the criteria for triangle congruence (ASA, SAS, and SSS) follow from the definition of congruence in terms of rigid motions.</p> <p>G-CO.10. Prove theorems about triangles. <i>Theorems include: measures of interior angles of a triangle sum to 180°; base angles of isosceles triangles are congruent; the segment joining midpoints of two sides of a triangle is parallel to the third side and half the length; the medians of a triangle meet at a point.</i></p> <p>Geometry – Similarity, Right Triangles, and Trigonometry</p> <p>G-SRT.2. Given two figures, use the definition of similarity in terms of similarity transformations to decide if they are similar; explain using similarity transformations the meaning of similarity for triangles as the equality of all corresponding pairs of angles and the proportionality of all corresponding pairs of sides.</p> <p>G-SRT.3. Use the properties of similarity transformations to establish the AA criterion for two triangles to be similar.</p> <p>G-SRT.4. Prove theorems about triangles. <i>Theorems include: a line parallel to one side of a triangle divides the other two proportionally, and conversely; the Pythagorean Theorem proved using triangle similarity.</i></p> <p>G-SRT.5. Use congruence and similarity criteria for triangles to solve problems and to prove relationships in geometric figures.</p>
Anticipated Time: 3 Weeks	

Holt Geometry Chapter 5: Properties and Attributes of Triangles	Common Core State Standards
	<p>Geometry - Congruence G-CO.9. Prove theorems about lines and angles. <i>Theorems include: vertical angles are congruent; when a transversal crosses parallel lines, alternate interior angles are congruent and corresponding angles are congruent; points on a perpendicular bisector of a line segment are exactly those equidistant from the segment's endpoints</i></p>
	<p>Geometry – Similarity, Right Triangles, and Trigonometry G-SRT.8. Use trigonometric ratios and the Pythagorean Theorem to solve right triangles in applied problems.</p> <p>Geometry – Expressing Geometric Properties with Equations G-GPE.5. Prove the slope criteria for parallel and perpendicular lines and use them to solve geometric problems (e.g., find the equation of a line parallel or perpendicular to a given line that passes through a given point)</p>
Anticipated Time: 3 weeks	

Holt Geometry Chapter 6: Polygons and Quadrilaterals	Common Core State Standards
	<p>Geometry – Congruence G-CO.11. Prove theorems about parallelograms. <i>Theorems include: opposite sides are congruent, opposite angles are congruent, the diagonals of a parallelogram bisect each other, and conversely, rectangles are parallelograms with congruent diagonals.</i></p>
Anticipated Time: 2 weeks	

Holt Geometry Chapter 7: Similarity	Common Core State Standards
	<p>Geometry – Similarity, Right Triangles, and Trigonometry</p> <p>G-SRT.1. Verify experimentally the properties of dilations given by a center and a scale factor:</p> <p>G-SRT.1a. Verify experimentally that a dilation takes a line not passing through the center of the dilation to a parallel line, and leaves a line passing through the center unchanged.</p> <p>G-SRT.1b Verify experimentally that the dilation of a line segment is longer or shorter in the ratio given by the scale factor.</p> <p>G-SRT.2. Given two figures, use the definition of similarity in terms of similarity transformations to decide if they are similar; explain using similarity transformations the meaning of similarity for triangles as the equality of all corresponding pairs of angles and the proportionality of all corresponding pairs of sides.</p> <p>G-SRT.3. Use the properties of similarity transformations to establish the AA criterion for two triangles to be similar.</p> <p>Geometry – Geometric Measurement and Dimension</p> <p>G-GMD.4. Identify the shapes of two-dimensional cross-sections of three-dimensional objects, and identify three-dimensional objects generated by rotations of two-dimensional objects.</p>
Anticipated Time: 3 weeks	

Holt Geometry Chapter 8: Right Triangles and Trigonometry	Common Core State Standards
	<p>Geometry – Similarity, Right Triangles, and Trigonometry</p> <p>G-SRT.6. Understand that by similarity, side ratios in right triangles are properties of the angles in the triangle, leading to definitions of trigonometric ratios for acute angles.</p> <p>G-SRT.7. Explain and use the relationship between the sine and cosine of complementary angles.</p> <p>G-SRT.8. Use trigonometric ratios and the Pythagorean Theorem to solve right triangles in applied problems.</p> <p>G-SRT.9. (+) Derive the formula $A = \frac{1}{2} ab \sin(C)$ for the area of a triangle by drawing an auxiliary line from a vertex perpendicular to the opposite side.</p> <p>G-SRT.10. (+) Prove the Laws of Sines and Cosines and use them to solve problems.</p> <p>G-SRT.11. (+) Understand and apply the Law of Sines and the Law of Cosines to find unknown measurements in right and non-right triangles (e.g., surveying problems, resultant forces).</p>
Anticipated Time: 3 weeks	

Holt Geometry Chapter 9: Extending Perimeter, Circumference, and Area	Common Core State Standards
	<p>Geometry – Expressing Geometric Properties with Equations G-GPE.7. Use coordinates to compute perimeters of polygons and areas of triangles and rectangles, e.g., using the distance formula.*</p> <p>Geometry – Geometric Measurement and Dimension G-GMD.1. Give an informal argument for the formulas for the circumference of a circle, area of a circle, volume of a cylinder, pyramid, and cone. <i>Use dissection arguments, Cavalieri’s principle, and informal limit arguments.</i></p> <p>Statistics and Probability – Conditional Probability and the Rules of Probability S-CP.1. Describe events as subsets of a sample space (the set of outcomes) using characteristics (or categories) of the outcomes, or as unions, intersections, or complements of other events (“or,” “and,” “not”).</p> <p>Statistics and Probability – Using Probability to Make Decisions S-MD.6. (+) Use probabilities to make fair decisions (e.g., drawing by lots, using a random number generator). S-MD.7. (+) Analyze decisions and strategies using probability concepts (e.g., product testing, medical testing, pulling a hockey goalie at the end of a game).</p>
Anticipated Time: 3 weeks	

Holt Geometry Chapter 10: Spatial Reasoning	Common Core State Standards
	<p>Geometry – Geometric Measurement and Dimension</p> <p>G-GMD.1. Give an informal argument for the formulas for the circumference of a circle, area of a circle, volume of a cylinder, pyramid, and cone. <i>Use dissection arguments, Cavalieri's principle, and informal limit arguments.</i></p> <p>G-GMD.3. Use volume formulas for cylinders, pyramids, cones, and spheres to solve problems.</p> <p>G-GMD.4. Identify the shapes of two-dimensional cross-sections of three-dimensional objects, and identify three-dimensional objects generated by rotations of two-dimensional objects.</p> <p>Geometry- Modeling and Geometry</p> <p>G-MG.1. Use geometric shapes, their measures, and their properties to describe objects (e.g., modeling a tree trunk or a human torso as a cylinder).</p> <p>G-MG.2. Apply concepts of density based on area and volume in modeling situations (e.g., persons per square mile, BTUs per cubic foot).</p> <p>G-MG.3. Apply geometric methods to solve design problems (e.g., designing an object or structure to satisfy physical constraints or minimize cost; working with typographic grid systems based on ratios).</p>
Anticipated Time: 3 weeks	

Holt Geometry Chapter 11: Spatial Reasoning	Common Core State Standards
	<p>Geometry – Congruence</p> <p>G-CO.13. Construct an equilateral triangle, a square, and a regular hexagon inscribed in a circle.</p> <p>Geometry- Circles</p> <p>G-C.1. Prove that all circles are similar.</p> <p>G-C.2. Identify and describe relationships among inscribed angles, radii, and chords. <i>Include the relationship between central, inscribed, and circumscribed angles; inscribed angles on a diameter are right angles; the radius of a circle is perpendicular to the tangent where the radius intersects the circle.</i></p> <p>G-C.3. Construct the inscribed and circumscribed circles of a triangle, and prove properties of angles for a quadrilateral inscribed in a circle.</p> <p>G-C.4. (+) Construct a tangent line from a point outside a given circle to the circle.</p> <p>G-C.5. Derive using similarity the fact that the length of the arc intercepted by an angle is proportional to the radius, and define the radian measure of the angle as the constant of proportionality; derive the formula for the area of a sector.</p>
Anticipated Time: 3 weeks	

Holt Geometry Chapter 12: Extending Transformational Geometry	Common Core State Standards	
	Geometry – Congruence G-CO.2. Represent transformations in the plane using, e.g., transparencies and geometry software; describe transformations as functions that take points in the plane as inputs and give other points as outputs. Compare transformations that preserve distance and angle to those that do not (e.g., translation versus horizontal stretch). G-CO.3. Given a rectangle, parallelogram, trapezoid, or regular polygon, describe the rotations and reflections that carry it onto itself G-CO.4. Develop definitions of rotations, reflections, and translations in terms of angles, circles, perpendicular lines, parallel lines, and line segments. G-CO.5. Given a geometric figure and a rotation, reflection, or translation, draw the transformed figure using, e.g., graph paper, tracing paper, or geometry software. Specify a sequence of transformations that will carry a given figure onto another. G-CO.6. Use geometric descriptions of rigid motions to transform figures and to predict the effect of a given rigid motion on a given figure; given two figures, use the definition of congruence in terms of rigid motions to decide if they are congruent.	
	Geometry – Expressing Geometric Properties with Equations G-GPE.4. Use coordinates to prove simple geometric theorems algebraically. <i>For example, prove or disprove that a figure defined by four given points in the coordinate plane is a rectangle; prove or disprove that the point $(1, \sqrt{3})$ lies on the circle centered at the origin and containing the point $(0, 2)$.</i>	
Anticipated Time: 3 weeks

NHA Science Exemplar: The Living Environment

The student will explore the common themes that intertwine and connect all aspects of living things, such as the similarities of plants and animals, structure and functions of body parts, adaptations to new environments, and coexistence of animals in a variety of ecosystems.

Kindergarten

UNIT: Health

NHA Science Content	Michigan Grade Level Content Expectations
<p>Personal Appearance</p> <ul style="list-style-type: none"> • Hygiene <ul style="list-style-type: none"> - Washing hands - Blowing nose - Using toilet - Brushing teeth • Importance of having good hygiene <ul style="list-style-type: none"> - Avoiding illness - Sanitation • Clothing <ul style="list-style-type: none"> - Wearing appropriate clothing for weather - Tying shoes <p>Healthy Diet</p> <ul style="list-style-type: none"> • Nutrition <ul style="list-style-type: none"> - How our body uses food - Healthy vs. unhealthy food <p>Healthy Decisions</p> <ul style="list-style-type: none"> • Safety <ul style="list-style-type: none"> - Traffic/pedestrian safety - Playground/classroom /home safety - Appropriate touch - Strangers - Recognition of dangerous objects and substances • Emergency Situations <ul style="list-style-type: none"> - Routines for fire drills/tornado drills - Calling 911 - Police officers/fire fighters <p>Healthy Practices</p> <ul style="list-style-type: none"> • Exercise • Avoidance of dangerous substances 	<p>Strand 1: Nutrition and Physical Activity Standard 1: Core Concepts 1.1 Describe how consuming a variety of healthy foods and beverages helps a person stay healthy. 1.2 Describe how being physically active helps a person stay healthy. 1.3 Describe how drinking water helps a person stay healthy.</p> <p>Standard 3: Health Behaviors 1.4 Generate examples of physical activities that are personally enjoyable. 1.5 Select a variety of foods that can be eaten for healthy snacks.</p> <p>Strand 2: Alcohol, Tobacco , and Other Drugs Standard 1: Core Concepts 2.1 Identify household products that are harmful if touched, ingested, or inhaled. 2.2 Describe ways that over-the-counter and prescription medicines can be helpful or harmful.</p> <p>Standard 2: Access Information 2.3 Identify trustworthy sources of accurate information about potentially poisonous household products.</p> <p>Standard 3: Health Behaviors 2.4 Explain rules for handling household products and avoiding poisons. 2.5 Describe how to safely use medicines.</p> <p>Strand 3: Safety Standard 1: Core Concepts 3.1 Describe pedestrian hazards and safe pedestrian behaviors. 3.2 Identify dangerous objects and weapons. 3.3 Describe the characteristics of appropriate touch and inappropriate touch. 3.4 Explain that a child is not at fault if someone touches him or her in an inappropriate way.</p>

- Drugs/alcohol

Healthy Minds

- Appropriate television use
- Healthy sleeping habits
- Interacting with others
 - Sharing feelings
 - Coping with change
 - Role of family

Standard 2: Access Information

3.5 Demonstrate the procedure for calling 911 and explain when it is appropriate to do so.

3.6 Demonstrate how to ask trusted adults for help.

Standard 3: Health Behaviors

3.7 Demonstrate safe pedestrian behaviors.

3.8 Describe dangerous and destructive situations that need to be reported to an adult.

3.9 Apply a rule and demonstrate actions to use in hypothetical situations when weapons may be present.

3.10 Generate examples of safe places one might go if feeling personally threatened.

3.11 Apply strategies to avoid personally unsafe situations.

3.12 Apply strategies to get away in hypothetical cases of inappropriate touching or abduction.

Strand 4: Social and Emotional Health

Standard 1: Core Concepts

4.1 Identify and describe different kinds of feelings.

Standard 2: Access Information

4.2 Identify and locate people who can help at home and school.

Standard 3: Health Behaviors

4.3 Describe and demonstrate ways to be responsible at home and school.

4.4 Demonstrate the ability to recognize and express a variety of feelings appropriately.

4.5 Identify and demonstrate strategies to manage strong feelings.

Standard 7: Social Skills

4.6 Identify and practice strategies to make friends.

4.7 Demonstrate giving and accepting a compliment or statement of appreciation.

4.8 Describe situations when it is appropriate to use “please,” “thank you,” “excuse me,” and “I am sorry.”

4.9 Apply “please,” “thank you,” “excuse me,” and “I am sorry” to appropriate situations.

Strand 5: Personal Health and Wellness

Standard 1: Core Concepts

5.1 Explain the importance of taking care of teeth and having one’s own

toothbrush to prevent disease.
5.2 Explain the importance of dental health cleanings and exams.
5.3 Explain the importance of proper hand washing to prevent disease.

Standard 3: Health Behaviors

5.4 Demonstrate proper tooth brushing techniques.
5.5 Demonstrate proper hand washing to prevent the spread of germs.

Standard 8: Advocacy

5.6 Encourage peers to make positive choices for personal health and wellness.

Michigan Grade Level Content Expectations Taught at Another Grade Level

NHA Grade 1

MI.E.SE.00.11 Identify Earth materials that occur in nature (sand, rocks, soil, water). (The Surface of Earth Unit)

NHA Grade 2

MI.P.FM.00.11 Describe the position of an object (for example: above, below, in front of, behind, on) in relation to other objects around it. (Motion and Forces Unit)

MI.P.FM.00.12 Describe the direction of a moving object (for example: away from or closer to) from different observers' views. (Motion and Forces Unit)

MI.P.FM.00.21 Observe how objects fall toward the earth. (Motion and Forces Unit)

MI.P.FM.00.31 Demonstrate pushes and pulls on objects that can move. (Motion and Forces Unit)

MI.P.FM.00.32 Observe that objects initially at rest will move in the direction of the push or pull. (Motion and Forces Unit)

MI.P.FM.00.33 Observe how pushes and pulls can change the speed or direction of moving objects. (Motion and Forces Unit)

MI.P.FM.00.34 Observe how shape (for example: cone, cylinder, sphere) and mass of an object can affect motion. (Motion and Forces Unit)

Vertical Alignment for the Measurement Topic: <i>Scientific Knowledge</i>	
Grade Eight	<ul style="list-style-type: none"> Analyze similar investigations that yield different results to determine the cause of the difference and develop a plan to eliminate the variables (UNITS: Introduction to Science, Earth Systems, Electricity and Magnetism) Trace the development of an idea to a scientific theory (UNITS: Introduction to Science, Earth in Space, Species Over Time)
Grade Seven	<ul style="list-style-type: none"> Analyze similar investigations that yield different results to determine the cause of the difference and develop a plan to eliminate the variables (UNITS: Introduction to Science, Motion and Forces) Trace the development of an idea to a scientific theory (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNITS: Introduction to Science, Chemistry)
Grade Six	<ul style="list-style-type: none"> Analyze similar investigations that yield different results to determine the cause of the difference and develop a plan to eliminate the variables (UNITS: Introduction to Science, Models and Design, Ecosystems, Sound) Trace the development of an idea to a scientific theory (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.)
Grade Five	<ul style="list-style-type: none"> Compare the results of similar experiments and determine reasons for any inconsistencies (UNIT: Introduction to Science) Construct reasonable scientific explanations supported by facts found in books or evidence from observations and/or investigations (UNIT: Introduction to Science) Differentiate between observation and inference in scientific explanations (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Introduction to Science)
Grade Four	<ul style="list-style-type: none"> Compare the results of similar experiments and determine reasons for any inconsistencies (UNITS: Introduction to Science, Animal Adaptations, Plants, Electricity and Magnetism, Energy) Construct reasonable scientific explanations supported by facts found in books or evidence from observations and/or investigations (UNITS: Introduction to Science, Animal Adaptations, Plants, Electricity and Magnetism, Energy) Differentiate between observation and inference in scientific explanations (UNIT: Introduction to Science)
Grade Three	<ul style="list-style-type: none"> Compare the results of similar experiments and determine reasons for any inconsistencies (UNITS: Introduction to Science, Sound, Motion and Forces) Construct reasonable scientific explanations supported by facts found in books or evidence from observations and/or investigations (UNITS: Introduction to Science, Sound, Motion and Forces) Differentiate between observation and inference in scientific explanations (UNIT: Introduction to Science)
Grade Two	<ul style="list-style-type: none"> Describe the consistency of the results of a experiment conducted multiple times (UNITS: Introduction to Science, The Water Cycle, Plants, Energy, Motion and Forces) Communicate a scientific idea using evidence (UNITS: Introduction to Science, The Water Cycle, Plants, Energy, Motion and Forces)
Grade One	<ul style="list-style-type: none"> Describe the consistency of the results of a experiment conducted multiple times (UNITS: Introduction to Science, Weather) Communicate a scientific idea using evidence (UNITS: Introduction to Science, Weather)
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>Scientific Inquiry- The Scientific Method</i>	
Grade Eight	<ul style="list-style-type: none"> Propose questions and hypotheses that can be studied through scientific investigations and distinguish them from questions and hypotheses that cannot be examined scientifically (UNITS: Introduction to Science, Electricity and Magnetism, Earth Systems) Explain why only one variable(<i>e.g., independent, dependent, control</i>) can be manipulated at a time (UNITS: Introduction to Science, Electricity and Magnetism, Earth Systems) Describe why questioning, response to criticism, replication, accurate record keeping, and open communication are integral to the process of science (UNITS: Introduction to Science, Electricity and Magnetism, Earth Systems)
Grade Seven	<ul style="list-style-type: none"> Propose questions and hypotheses that can be studied through scientific investigations and distinguish them from questions and hypotheses that cannot be examined scientifically (UNITS: Introduction to Science, Motion and Forces) Explain why only one variable(<i>e.g., independent, dependent, control</i>) can be manipulated at a time (UNITS: Introduction to Science, Motion and Forces) Describe why questioning, response to criticism, replication, accurate record keeping, and open communication are integral to the process of science (UNITS: Introduction to Science, Motion and Forces)
Grade Six	<ul style="list-style-type: none"> Propose questions and hypotheses that can be studied through scientific investigations and distinguish them from questions and hypotheses that cannot be examined scientifically (UNITS: Introduction to Science, Models and Design, Ecosystems, Sound) Explain why only one variable(<i>e.g., independent, dependent, control</i>) can be manipulated at a time (UNITS: Introduction to Science, Models and Design, Ecosystems, Sound) Describe why questioning, response to criticism, replication, accurate record keeping, and open communication are integral to the process of science (UNITS: Introduction to Science, Models and Design, Ecosystems, Sound)
Grade Five	<ul style="list-style-type: none"> Propose and test independent and dependent variables in a controlled experiment (UNIT: Introduction to Science)
Grade Four	<ul style="list-style-type: none"> Plan and conduct simple investigations (<i>e.g., formulating a testable question, planning a fair test, making systematic observations, and developing logical conclusions</i>) (UNITS: Introduction to Science, Animal Adaptations, Plants, Electricity and Magnetism, Energy)
Grade Three	<ul style="list-style-type: none"> Plan and conduct simple investigations (<i>e.g., formulating a testable question, planning a fair test, making systematic observations, and developing logical conclusions</i>) (UNITS: Introduction to Science, Sound, Motion and Forces)
Grade Two	<ul style="list-style-type: none"> Plan simple investigations as a strategy for evaluating predictions based on questions developed from observations of the natural world (UNITS: Introduction to Science, The Water Cycle, Plants, Energy, Motion and Forces) Make observations related to the 5 senses about living things, nonliving objects, and events (UNITS: Introduction to Science, The Water Cycle, Plants, Energy, Motion and Forces)
Grade One	<ul style="list-style-type: none"> Plan simple investigations as a strategy for evaluating predictions based on questions developed from observations of the natural world (UNITS: Introduction to Science, Weather) Make observations related to the 5 senses about living things, nonliving objects, and events (UNITS: Introduction to Science, Weather)
Kindergarten	<ul style="list-style-type: none"> Generate basic questions (who, what, when, where, why, and "I wonder...") from observations of the natural world (UNITS: How Do We Learn, Seasons) Make observations related to the 5 senses about living things, nonliving objects, and events and identify this as something that scientists do to gain knowledge about the world (UNITS: How Do We Learn, Introduction to Animals)

Vertical Alignment for the Measurement Topic: <i>Scientific Inquiry- Data Collection and Analysis</i>	
Grade Eight	<ul style="list-style-type: none"> • Use appropriate tools, technologies and metric measurements to gather, organize and report results for investigations (UNIT: Introduction to Science) • Describe basic safety procedures in science such as recognizing potential hazards, cautiously manipulating materials and equipment and conducting appropriate procedures (UNIT: Introduction to Science) • Organize, display, and interpret scientific data from investigations in tables, graphs (e.g. line, circle, bar, histogram) and plots (e.g. stem-and-leaf, box-and-whisker, scatter) (UNITS: Introduction to Science, Earth Systems, Electricity and Magnetism) • Interpret and evaluate tables, charts, and graphs produced by others (UNITS: Introduction to Science, Earth Systems, Electricity and Magnetism) • Cite evidence from tables, charts, and/or graphs in making arguments and claims in oral and written reports (UNITS: Introduction to Science, Earth Systems, Electricity and Magnetism)
Grade Seven	<ul style="list-style-type: none"> • Use appropriate tools, technologies and metric measurements to gather, organize and report results for investigations (UNIT: Introduction to Science) • Describe basic safety procedures in science such as recognizing potential hazards, cautiously manipulating materials and equipment and conducting appropriate procedures (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Introduction to Science) • Organize, display, and interpret scientific data from investigations in tables, graphs (e.g. line, circle, bar, histogram) and plots (e.g. stem-and-leaf, box-and-whisker, scatter) (UNITS: Introduction to Science, Motion and Forces) • Interpret and evaluate tables, charts, and graphs produced by others (UNITS: Introduction to Science, Motion and Forces) • Cite evidence from tables, charts, and/or graphs in making arguments and claims in oral and written reports (UNITS: Introduction to Science, Motion and Forces)
Grade Six	<ul style="list-style-type: none"> • Use appropriate tools, technologies and metric measurements to gather, organize and report results for investigations (UNIT: Introduction to Science) • Describe basic safety procedures in science such as recognizing potential hazards, cautiously manipulating materials and equipment and conducting appropriate procedures (UNIT: Introduction to Science) • Organize, display, and interpret scientific data from investigations in tables, graphs (e.g. line, circle, bar, histogram) and plots (e.g. stem-and-leaf, box-and-whisker, scatter) (UNITS: Introduction to Science, Models and Design, Ecosystems, Sound) • Interpret and evaluate tables, charts, and graphs produced by others (UNITS: Introduction to Science, Models and Design, Ecosystems, Sound) • Cite evidence from tables, charts, and/or graphs in making arguments and claims in oral and written reports (UNITS: Introduction to Science, Models and Design, Ecosystems, Sound)
Grade Five	<ul style="list-style-type: none"> • Make accurate measurements with appropriate units (centimeters, meters, Celsius, Fahrenheit, grams, seconds, minutes) (UNIT: Introduction to Science) • Safely use appropriate tools and simple equipment, for investigations, to gather scientific data and extend the senses (UNIT: Introduction to Science) • Communicate the results of investigations and describe the investigations in ways that enable others to repeat them (UNIT: Introduction to Science) • Organize, display, and interpret data from observations and investigations in simple bar graphs, line plots, line graphs, and/or stem-and-leaf plots (UNIT: Introduction to Science)
Grade Four	<ul style="list-style-type: none"> • Make accurate measurements with appropriate units (centimeters, meters, Celsius, Fahrenheit, grams, seconds, minutes) (UNITS: Introduction to Science, Properties of Materials, Animal Adaptations, Plants, Electricity and Magnetism, Energy) • Safely use appropriate tools and simple equipment, for investigations, to gather scientific data and extend the senses (UNIT: Introduction to Science) • Communicate the results of investigations and describe the investigations in ways that enable others to repeat them (UNITS: Introduction to Science, Animal Adaptations, Plants, Electricity and Magnetism, Energy) • Organize, display, and interpret data from observations and investigations in simple bar graphs, line plots, line graphs, and/or stem-and-leaf plots (UNITS: Introduction to Science, Animal Adaptations, Plants, Electricity and Magnetism, Energy)
Grade Three	<ul style="list-style-type: none"> • Make accurate measurements with appropriate units (centimeters, meters, Celsius, Fahrenheit, grams, seconds, minutes) (UNITS: Introduction to Science, Sound, Motion and Forces) • Safely use appropriate tools and simple equipment, for investigations, to gather scientific data and extend the senses (UNIT: Introduction to Science) • Communicate the results of investigations and describe the investigations in ways that enable others to repeat them (UNITS: Introduction to Science, Sound, Motion and Forces) • Organize, display, and interpret data from observations and investigations in simple bar graphs, line plots, line graphs, and/or stem-and-leaf plots (UNITS: Introduction to Science, Sound, Motion and Forces)
Grade Two	<ul style="list-style-type: none"> • Make measurements of length, weight, temperature, capacity and volume using standard and nonstandard units and appropriate instruments in investigations (UNITS: Introduction to Science; Matter, Mixtures, and Changes)

	<ul style="list-style-type: none"> • Safely use tools and instruments (<i>e.g., thermometers, magnifiers, rulers, balances, scissors, hammers, pliers, screwdrivers</i>) to construct, measure, and/or look at objects for investigations (UNIT: Introduction to Science) • Record and communicate findings from observations of an investigation, using a variety of methods such as drawings, journaling, pictographs, and bar graphs (UNITS: Introduction to Science, The Water Cycle, Plants, Energy, Motion and Forces)
Grade One	<ul style="list-style-type: none"> • Make measurements of length, weight, temperature, capacity and volume using standard and nonstandard units and appropriate instruments in investigations (UNITS: Introduction to Science, Properties, Weather, The Surface of Earth) • Safely use tools and instruments (<i>e.g., thermometers, magnifiers, rulers, balances, scissors, hammers, pliers, screwdrivers</i>) to construct, measure, and/or look at objects for investigations (UNITS: Introduction to Science, Properties) • Record and communicate findings from observations of an investigation, using a variety of methods such as drawings, journaling, pictographs, and bar graphs (UNITS: Introduction to Science, Weather)
Kindergarten	<ul style="list-style-type: none"> • Make measurements of length, weight, temperature, capacity and volume using standard and nonstandard units and appropriate instruments in investigations (UNIT: How Do We Learn) • Safely use tools and instruments (<i>e.g., thermometers, magnifiers, rulers, balances, scissors, hammers, pliers, screwdrivers</i>) to construct, measure, and/or look at objects for investigations (UNIT: How Do We Learn) • Record and communicate findings from observations of an investigation, using a variety of methods such as drawings, journaling, pictographs, and bar graphs and identify this as something that scientists do to help them learn more about their observations (UNITS: How Do We Learn, Introduction to animals, Seasons)

Vertical Alignment for the Measurement Topic: <i>Scientific Enterprise- Science and Society</i>	
Grade Eight	<ul style="list-style-type: none"> Describe ways in which science and society influence one another (UNITS: Introduction to Science, Earth Systems, Body Systems) Describe the diverse nature of science and scientists past and present (UNITS: Introduction to Science, Earth in Space, Earth Systems, Classification, Species Over Time, Body Systems)
Grade Seven	<ul style="list-style-type: none"> Describe ways in which science and society influence one another (UNITS: Introduction to Science, Heredity) Describe the diverse nature of science and scientists past and present (UNITS: Introduction to Science, Cells, Heredity, Chemistry, Motion and Forces)
Grade Six	<ul style="list-style-type: none"> Describe ways in which science and society influence one another (UNITS: Introduction to Science, Energy, Geology, Ecosystems) Describe the diverse nature of science and scientists past and present (UNITS: Introduction to Science, Geology, Ecosystems, Light)
Grade Five	<ul style="list-style-type: none"> Identify scientists of various groups (<i>i.e. gender, country of origin, socioeconomic status, age</i>) and their contributions (UNITS: Introduction to Science, Technological Design, Body Systems)
Grade Four	<ul style="list-style-type: none"> Identify scientists of various groups (<i>i.e. gender, country of origin, socioeconomic status, age</i>) and their contributions (UNITS: Introduction to Science, Electricity and Magnetism, Species Over time, Ecosystems, Conservation of Natural Resources)
Grade Three	<ul style="list-style-type: none"> Identify scientists of various groups (<i>i.e. gender, country of origin, socioeconomic status, age</i>) and their contributions (UNITS: Introduction to Science, Classification, Earth in Space, Light, Rocks and Minerals, The Changing Surface of Earth)
Grade Two	<i>Not Applicable</i>
Grade One	<i>Not Applicable</i>
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>Common Themes in Science</i>	
Grade Eight	<ul style="list-style-type: none"> Analyze the parts, subsystems and interactions of a system (UNITS: Introduction to Science, Earth in Space, Body Systems) Measure and graph change over time and analyze the results to determine patterns and trends or predict events (UNITS: Introduction to Science, Earth in Space, Body Systems, Species Over Time) Compare and contrast the properties of objects as they change in scale (UNITS: Introduction to Science, Earth in Space, Earth Systems)
Grade Seven	<ul style="list-style-type: none"> Analyze the parts, subsystems and interactions of a system (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Measure and graph change over time and analyze the results to determine patterns and trends or predict events (UNITS: Introduction to Science, Motion and Forces, Weather and Water) Compare and contrast the properties of objects as they change in scale (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.)
Grade Six	<ul style="list-style-type: none"> Analyze the parts, subsystems and interactions of a system (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Measure and graph change over time and analyze the results to determine patterns and trends or predict events (UNITS: Introduction to Science, Geology, Ecosystems) Compare and contrast the properties of objects as they change in scale (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Construct physical and conceptual models that mimic the characteristics of an unknown system and compare the model to the system (UNIT: Models and Design) Evaluate the usefulness of the model as a comparison tool (UNIT: Models and Design)
Grade Five	<ul style="list-style-type: none"> Describe how the parts of a system work together (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Identify and measure things that change and describing the different ways they change (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Identify objects that are at the extremes in size, weights, ages and speeds (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Explain the role of models in studying objects, events, and processes (UNITS: Introduction to Science, Body Systems, Weather and Water)
Grade Four	<ul style="list-style-type: none"> Describe how the parts of a system work together (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Identify and measure things that change and describing the different ways they change (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Explain the role of models in studying objects, events, and processes (UNITS: Introduction to Science, Properties of Materials, Electricity and Magnetism)
Grade Three	<ul style="list-style-type: none"> Describe how the parts of a system work together (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Identify and measure things that change and describing the different ways they change (UNITS: Introduction to Science, Earth in Space, Rocks and Minerals, The Changing Surface, Motion and Forces) Identify objects that are at the extremes in size, weights, ages and speeds (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Explain the role of models in studying objects, events, and processes (UNITS: Introduction to Science, Earth in Space, Rocks and Minerals, The Changing Surface, Motion and Forces)
Grade Two	<ul style="list-style-type: none"> Identify the parts of things and how one part connects to and affects another (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Identify and record instances of things that change and the different ways they change (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Describe the different sizes, weights, ages and speeds of things observed (UNITS: Introduction to Science, Plants, Motion and Forces) Identify similarities and differences between a model of an object and the real thing (UNITS: Introduction to Science, Motion and Forces)
Grade One	<ul style="list-style-type: none"> Identify the parts of things and how one part connects to and affects another (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Identify and record instances of things that change and the different ways they change (UNITS: Introduction to Science, Animal Adaptations, Weather, Ecosystems) Describe the different sizes, weights, ages and speeds of things observed (UNITS: Introduction to Science, Animal Adaptations, Earth in Space) Identify similarities and differences between a model of an object and the real thing (UNITS: Introduction to Science, Animal Adaptations)
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>Technology</i>	
Grade Eight	<i>Not Applicable</i>
Grade Seven	<i>Not Applicable</i>
Grade Six	<ul style="list-style-type: none"> • Evaluate various technologies in terms of drawbacks and benefits to society (Unit: Models and Design) • Explain how societies influence what types of technology are developed and used in a variety of fields (<i>e.g. agriculture, manufacturing, etc.</i>) (Unit: Models and Design) • Describe the similarities and differences between scientific inquiry and technological design (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (Unit: Models and Design)
Grade Five	<ul style="list-style-type: none"> • Describe positive and negative effects of technology on the environment and society (UNIT: Technological Design)
Grade Four	<ul style="list-style-type: none"> • S.RS.04.16 Identify technology used in everyday life (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.) (Unit: Introduction to Science) • S.RS.04.17 Identify current problems that may be solved through the use of technology (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.) (Unit: Introduction to Science)
Grade Three	<ul style="list-style-type: none"> • Describe some of the technologies that have advanced our knowledge of objects in space (UNIT: Earth in Space)
Grade Two	<i>Not Applicable</i>
Grade One	<i>Not Applicable</i>
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>Engineering</i>	
Grade Eight	<i>Not Applicable</i>
Grade Seven	<i>Not Applicable</i>
Grade Six	<ul style="list-style-type: none"> Develop a product that fulfills a set of requirements using a product development approach (i.e., design, construction of prototype, tests, evaluation of design, and redesign) (UNIT: Models and Design)
Grade Five	<ul style="list-style-type: none"> Describe the properties of materials that make them useful in design and construction (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Technological Design) Describe examples of mechanical systems that are designed to serve similar purposes as natural systems (UNIT: Technological Design) Design and construct something useful out of a variety of materials using a variety of tools and the design process (UNIT: Technological Design) Evaluate the usefulness of inventions and suggest ways that the product could be changed or improved (UNIT: Technological Design)
Grade Four	<i>Not Applicable</i>
Grade Three	<i>Not Applicable</i>
Grade Two	<i>Not Applicable</i>
Grade One	<ul style="list-style-type: none"> Describe the relationship between the properties of a material and its typical uses and determine the best material for a specific use (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Properties) Compare and contrast manmade and natural materials (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Properties)
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>Classification</i>	
Grade Eight	<i>Not Applicable as of 2013-14</i>
Grade Seven	<i>Not Applicable</i>
Grade Six	<i>Not Applicable</i>
Grade Five	<i>Not Applicable</i>
Grade Four	<i>Not Applicable</i>
Grade Three	<ul style="list-style-type: none"> Classify organisms based on physical and environmental characteristics (<i>e.g., ecosystem, body structures</i>) (UNIT: Classification) Classify vertebrates and invertebrates on the basis of observable physical characteristics (UNIT: Classification)
Grade Two	<i>Not Applicable</i>
Grade One	<i>Not Applicable</i>
Kindergarten	<ul style="list-style-type: none"> Categorize organisms based on a variety of simple criteria (<i>e.g., body features, appendages, methods of movement, body covering</i>) (UNIT: Introduction to Animals)

Vertical Alignment for the Measurement Topic: <i>Needs of Organisms</i>	
Grade Eight	<i>Not Applicable</i>
Grade Seven	<i>Not Applicable</i>
Grade Six	<i>Not Applicable</i>
Grade Five	<i>Not Applicable</i>
Grade Four	<ul style="list-style-type: none"> Explain the necessity of food for the survival, growth, and repair of animals (UNIT: Ecosystems)
Grade Three	<i>Not Applicable</i>
Grade Two	<ul style="list-style-type: none"> Describe evidence that plants are alive and need air, water, light, and nutrients to grow (UNIT: Plants)
Grade One	<i>Not Applicable</i>
Kindergarten	<ul style="list-style-type: none"> Describe the basic needs of a wide variety of animals, such as fish, snails, worms, birds, and other common animals native to the region (UNIT: Introduction to Animals) Explain how food is used by animals (UNIT: Introduction to Animals) Compare and contrast the needs of animals with the needs of humans which include safety precautions, good hygiene and healthy habits(UNIT: Introduction to Animals)

Vertical Alignment for the Measurement Topic: <i>Life Cycles of Plants and Animals</i>	
Grade Eight	<i>Not Applicable</i>
Grade Seven	<i>Not Applicable</i>
Grade Six	<i>Not Applicable</i>
Grade Five	<i>Not Applicable</i>
Grade Four	<ul style="list-style-type: none"> Explain ways that the stages of an animal's life cycle (including humans) contribute to the survival of the animal (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Animal Adaptations) Compare the life cycles of common annuals, biennials, and perennials (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Plants)
Grade Three	<i>Not Applicable</i>
Grade Two	<ul style="list-style-type: none"> Describe the changes observed in plants as they progress through their life cycle (UNIT: Plants)
Grade One	<i>Not Applicable</i>
Kindergarten	<ul style="list-style-type: none"> Describe the basic differences in life cycles of common animals, including humans, as they grow and develop over time (UNIT: Introduction to Animals)

Vertical Alignment for the Measurement Topic: <i>Plant Structures and Functions</i>	
Grade Eight	<i>Not Applicable</i>
Grade Seven	<i>Not Applicable</i>
Grade Six	<i>Not Applicable</i>
Grade Five	<i>Not Applicable</i>
Grade Four	<ul style="list-style-type: none"> Explain the function of each of the plant parts (<i>e.g., root, stem, leaves, or flower</i>) (UNIT: Plants) MI.L.OL.03.41 Classify plants on the basis of observable physical characteristics (roots, leaves, stems, and flowers). (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.)
Grade Three	<i>Not Applicable</i>
Grade Two	<ul style="list-style-type: none"> Describe the structure and function of the stem, bulbs, and roots in the growth of new plants (UNIT: Plants) Compare and contrast flowering plants and grasses of different species in structure, life processes, and reaction to environmental influences (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Plants)
Grade One	<i>Not Applicable</i>
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>Animal Body Structures and Functions</i>	
Grade Eight	<ul style="list-style-type: none"> Describe the interaction between each of the human body systems, including homeostasis and the mechanisms that maintain the balance of body systems (UNIT: Body Systems) Compare the body systems of various animals and explain how differences relate to the needs of the animals in their habitats (UNIT: Body Systems)
Grade Seven	<i>Not Applicable</i>
Grade Six	<ul style="list-style-type: none"> Analyze the form and function of the human eye (UNIT: Light)
Grade Five	<ul style="list-style-type: none"> Describe the functions of human body systems (<i>e.g., digestive, circulatory, respiratory</i>) and major organs of the body (<i>e.g., heart, lungs, skin</i>) (UNIT: Body Systems) MI.L.OL.05.42 Explain how animal systems (digestive, circulatory, respiratory, skeletal, muscular, nervous, excretory, and reproductive) work together to perform selected activities (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.)
Grade Four	<ul style="list-style-type: none"> Identify the external structures in a variety of animals from around the world that perform particular functions critical to the survival of the animals (<i>e.g., sensing structures, body coverings and coloration</i>) (UNIT: Animal Adaptations)
Grade Three	<ul style="list-style-type: none"> Describe the parts of the ear and their functions (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Sound)
Grade Two	<i>Not Applicable</i>
Grade One	<i>Not Applicable</i>
Kindergarten	<ul style="list-style-type: none"> Identify structures specific to a wide variety of animals, such as fish, snails, worms, birds, and other common animals native to the region (UNIT: Introduction to Animals)

Vertical Alignment for the Measurement Topic: <i>Plant and Animal Adaptations</i>	
Grade Eight	<ul style="list-style-type: none"> Analyze the inherited and learned structures, behavior and physiology of organisms that contribute to survival in their particular environment (UNIT: Species Over Time)
Grade Seven	<i>Not Applicable</i>
Grade Six	<i>Not Applicable</i>
Grade Five	<ul style="list-style-type: none"> MI.L.EV.05.11 Explain how behavioral characteristics (adaptation, instinct, learning, habit) of animals help them to survive in their environment (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.) MI.L.EV.05.12 Describe the physical characteristics (traits) of organisms that help them survive in their environment (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.) MI.L.HE.05.11 Explain that the traits of an individual are influenced by both the environment and the genetics of the individual (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.) MI.L.HE.05.12 Distinguish between inherited and acquired traits (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.) MI.L.EV.05.21 Relate degree of similarity in anatomical features to the classification of contemporary organisms (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.) MI.L.EV.05.13 Describe how fossils provide evidence about how living things and environmental conditions have changed (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.) MI.L.EV.05.14 Analyze the relationship of environmental change and catastrophic events (for example: volcanic eruption, floods, asteroid impacts, tsunami) to species extinction (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.)
Grade Four	<ul style="list-style-type: none"> Identify the adaptive features (<i>e.g., camouflage, behaviors, weapons</i>) of animals native to common habitats around the world (UNIT: Animal Adaptations) Describe the adaptive features of plants native to habitats around the world (UNIT: Plants) Identify individual differences in organisms from the same population that could give them an advantage or disadvantage in the competition for resources and reproduction (UNIT: Species Over Time)
Grade Three	<i>Not Applicable</i>
Grade Two	<i>Not Applicable</i>
Grade One	<ul style="list-style-type: none"> Describe the physical and behavioral characteristics of a variety of North American animals that help them survive in their particular environments (UNIT: Animal Adaptations) Identify the similarities and differences in features and characteristics of animals of the same species (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Animal Adaptations)
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>Fossils and Extinction</i>	
Grade Eight	<ul style="list-style-type: none"> Describe how fossils provide evidence of the existence, diversification, and extinction of organisms from the past (UNIT: Species Over Time)
Grade Seven	<i>Not Applicable</i>
Grade Six	<i>Not Applicable</i>
Grade Five	<i>Not Applicable</i>
Grade Four	<ul style="list-style-type: none"> Analyze organisms and environmental conditions of the past using fossil evidence (UNIT: Species Over Time) Compare fossils with each other and with living organisms to determine similarities and differences (UNIT: Species Over Time) Describe processes (human related, natural events) that can lead to the extinction of a species (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Species Over Time)
Grade Three	<i>Not Applicable</i>
Grade Two	<i>Not Applicable</i>
Grade One	<ul style="list-style-type: none"> Describe fossils as evidence that there are kinds of animals that lived long ago that are no longer found on Earth (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Animal Adaptations)
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>Food Chains and Webs</i>	
Grade Eight	<i>Not Applicable</i>
Grade Seven	<i>Not Applicable</i>
Grade Six	<ul style="list-style-type: none"> Analyze the food webs formed by the interactions of producers, carnivores, herbivores and decomposers in an ecosystem (UNIT: Ecosystems) Describe the process of photosynthesis (UNIT: Ecosystems) Describe the flow of energy through an ecosystem (UNIT: Ecosystems) Describe the cycle of nitrogen, carbon, and phosphorous in an ecosystem (UNIT: Ecosystems)
Grade Five	<i>Not Applicable</i>
Grade Four	<ul style="list-style-type: none"> Analyze the role of plants in food chains and webs (UNIT: Ecosystems) Classify various organisms as producers, herbivores, carnivores, omnivores, or decomposers (UNIT: Ecosystems) Compare and contrast simple food chains and food webs (UNIT: Ecosystems)
Grade Three	<i>Not Applicable</i>
Grade Two	<i>Not Applicable</i>
Grade One	<ul style="list-style-type: none"> Classify animals as plant eaters, animal eaters, or both plant and animal eaters and identify their primary food source (UNIT: Ecosystems)
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>Ecosystems</i>	
Grade Eight	<i>Not Applicable</i>
Grade Seven	<i>Not Applicable</i>
Grade Six	<ul style="list-style-type: none"> Analyze and describe the relationships among biotic and abiotic factors and their effects on populations of terrestrial and aquatic ecosystems (UNIT: Ecosystems) Analyze natural changes and human-caused changes in an ecosystem to evaluate, with evidential support, whether they are detrimental or beneficial to the survival of populations in that ecosystem (UNIT: Ecosystems) Analyze the ecological succession of a variety of environments (UNIT: Ecosystems)
Grade Five	<i>Not Applicable</i>
Grade Four	<ul style="list-style-type: none"> Describe components of an ecosystem that have an effect on the behavior and types of organisms in the ecosystem (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Ecosystems) Classify the interaction of organisms (<i>e.g., predator/prey, beneficial to both organisms, beneficial to one and harmful to another, or beneficial to one and neither harmful nor helpful to another</i>) (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Ecosystems) Describe changes to an ecosystem from natural causes (<i>e.g., disease, fire, flood, erosion, drought, and succession</i>) (UNIT: Ecosystems) Describe changes to an ecosystem from human causes (UNIT: Ecosystems) Describe changes (beneficial, neutral or detrimental) caused by organisms in the ecosystem (UNIT: Ecosystems)
Grade Three	<i>Not Applicable</i>
Grade Two	<i>Not Applicable</i>
Grade One	<ul style="list-style-type: none"> Describe evidence that all environments change as a result of the organisms living there (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Ecosystems)
Kindergarten	<ul style="list-style-type: none"> Describe how the behavior of animals is influenced by the conditions of their environment (UNIT: Introduction to Animals)

Vertical Alignment for the Measurement Topic: <i>Genetics and Heredity</i>	
Grade Eight	<ul style="list-style-type: none"> Analyze the process of natural selection and evaluate evidence of it as a mechanism that leads to diversity of species over time (UNIT: Species Over Time) Explain the impact of both sexual and asexual reproduction on the spread of traits that are detrimental or beneficial for the survival of an organism (UNIT: Species Over Time)
Grade Seven	<ul style="list-style-type: none"> Describe the relationship between genes, proteins, chromosomes, genomes, and DNA and explain their role in the process of heredity (UNIT: Heredity) Compare how genetic material is transferred to offspring in sexual and asexual reproduction (UNIT: Heredity) Use models such as Punnett squares or pedigree charts to determine the probability of dominant, recessive and incomplete traits being expressed (UNIT: Heredity)
Grade Six	<i>Not Applicable</i>
Grade Five	<i>Not Applicable</i>
Grade Four	<ul style="list-style-type: none"> Differentiate between those traits shared between parent and offspring that are inherited and those that are learned (UNIT: Species Over Time)
Grade Three	<i>Not Applicable</i>
Grade Two	<i>Not Applicable</i>
Grade One	<ul style="list-style-type: none"> Describe similarities and differences between offspring and parents of a variety of animals (UNIT: Animal Adaptations)
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>Cell Theory</i>	
Grade Eight	<i>Not Applicable</i>
Grade Seven	<ul style="list-style-type: none"> • Sequence the major points in the development of the cell theory, including important historical figures and technological advancements associated with the theory (UNIT: Cells) • Explain the three components of the cell theory (UNIT: Cells)
Grade Six	<i>Not Applicable</i>
Grade Five	<i>Not Applicable</i>
Grade Four	<i>Not Applicable</i>
Grade Three	<i>Not Applicable</i>
Grade Two	<i>Not Applicable</i>
Grade One	<i>Not Applicable</i>
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>Cell Structure and Function</i>	
Grade Eight	<i>Not Applicable</i>
Grade Seven	<ul style="list-style-type: none"> Describe the basic functions of cell organelles in plant and animal cells (UNIT: Cells) Describe how materials move into and out of cells in the processes of osmosis, diffusion, and active transport (UNIT: Cells) Explain how cellular respiration provides cells with energy (UNIT: Cells)
Grade Six	<i>Not Applicable</i>
Grade Five	<i>Not Applicable</i>
Grade Four	<i>Not Applicable</i>
Grade Three	<i>Not Applicable</i>
Grade Two	<i>Not Applicable</i>
Grade One	<i>Not Applicable</i>
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>Atoms and Molecules</i>	
Grade Eight	<i>Not Applicable</i>
Grade Seven	<ul style="list-style-type: none"> Explain how chemical reactions form new substances with new properties from the rearrangement and conservation of atoms (UNIT: Chemistry)
Grade Six	<i>Not Applicable</i>
Grade Five	<i>Not Applicable</i>
Grade Four	<i>Not Applicable</i>
Grade Three	<i>Not Applicable</i>
Grade Two	<i>Not Applicable</i>
Grade One	<i>Not Applicable</i>
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>Properties of Materials</i>	
Grade Eight	<i>Not Applicable</i>
Grade Seven	<ul style="list-style-type: none"> Describe physical and chemical properties of a variety of substances (UNIT: Chemistry) Describe the function of the periodic table in describing and grouping common earth elements by their basic properties (<i>e.g., symbol, reactivity, metal, non-metal or metalloid, natural state, what products contain them</i>) (UNIT: Chemistry)
Grade Six	<i>Not Applicable</i>
Grade Five	<i>Not Applicable</i>
Grade Four	<ul style="list-style-type: none"> Explain how the material make-up of an object determines some of the properties of the object (UNIT: Properties of Materials)
Grade Three	<i>Not Applicable</i>
Grade Two	<ul style="list-style-type: none"> Compare and contrast the characteristics (<i>e.g., flexibility, transparency</i>) of various solid objects (UNIT: Matter, Mixtures, and Changes)
Grade One	<ul style="list-style-type: none"> Explain that objects have properties that can be analyzed and described using the senses (UNIT: Properties) Describe, compare and classify objects (<i>e.g., size, color, shape, texture, weight, magnetism, ability to float</i>) (UNIT: Properties)
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>Physical States and Changes</i>	
Grade Eight	<i>Not Applicable</i>
Grade Seven	<ul style="list-style-type: none"> • Explain the physical properties of solids, liquids, gases and their changes (contraction & expansion) using the particulate nature of matter model (UNIT: Chemistry) • Describe phases of matter and changes in phases in terms of particle kinetic energy and energy transfer (UNIT: Chemistry)
Grade Six	<i>Not Applicable</i>
Grade Five	<i>Not Applicable</i>
Grade Four	<ul style="list-style-type: none"> • Compare and contrast the three states of matter by observable characteristics (UNIT: States of Matter) • Explain the relationship between the temperature of an object and its state (UNIT: States of Matter) • Describe the unique properties of water (expansion and contraction) as it is heated and cooled (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: States of Matter)
Grade Three	<i>Not Applicable</i>
Grade Two	<ul style="list-style-type: none"> • Describe basic characteristics and properties of liquids (UNIT: Matter, Mixtures, and Changes) • Explain how different materials react to change (<i>e.g. in temperature, pressure, forces</i>) (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Matter, Mixtures, and Changes)
Grade One	<i>Not Applicable</i>
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>Chemical Changes</i>	
Grade Eight	<i>Not Applicable</i>
Grade Seven	<i>Not Applicable</i>
Grade Six	<i>Not Applicable</i>
Grade Five	<ul style="list-style-type: none"> Classify reactions as chemical or not based on the presence of color change, odor, light or heat emission, and/or gas (Teach if time. Though there isn't a 5th grade GLCE that aligns, this will better prepare students for chemistry studies in 7th.) (UNIT: Mixtures and Solutions)
Grade Four	<i>Not Applicable</i>
Grade Three	<i>Not Applicable</i>
Grade Two	<i>Not Applicable</i>
Grade One	<i>Not Applicable</i>
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>Mixtures and Solutions</i>	
Grade Eight	<i>Not Applicable</i>
Grade Seven	<ul style="list-style-type: none"> Describe characteristics of a solution at the particle level, including the process of dissolving, saturation, and concentration (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Chemistry)
Grade Six	<i>Not Applicable</i>
Grade Five	<ul style="list-style-type: none"> Determine the appropriate tools and processes (magnet, filter, evaporation) needed to separate various mixtures (UNIT: Mixtures and Solutions) Describe factors that influence saturation in a solution (UNIT: Mixtures and Solutions) Describe the appropriate tools and senses needed to determine the concentration levels of various solutions (UNIT: Mixtures and Solutions) <p>(Teach these objectives if time. Though there aren't 5th grade GLCE that align, this unit will better prepare students for chemistry studies in 7th.)</p>
Grade Four	<i>Not Applicable</i>
Grade Three	<i>Not Applicable</i>
Grade Two	<ul style="list-style-type: none"> Describe characteristics of solutions (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Matter, Mixtures, and Changes) Describe how mixtures can be created and separated using various tools (UNIT: Matter, Mixtures, and Changes)
Grade One	<i>Not Applicable</i>
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>Forms of Energy and their Interactions</i>	
Grade Eight	<i>Not Applicable</i>
Grade Seven	<ul style="list-style-type: none"> • Explain heat, heat energy transfer and temperature in terms of particle kinetic energy (UNIT: Chemistry) • Compare and contrast conduction, convection, and radiation as methods of heat energy transfer (UNIT: Chemistry)
Grade Six	<ul style="list-style-type: none"> • Describe the various forms of potential (chemical, elastic, gravitational) and kinetic (energy of motion) energy (UNIT: Energy) • Trace the conversion of energy from one form to another in a system (UNIT: Energy) • Explain the law of conservation of energy (UNIT: Energy)
Grade Five	<i>Not Applicable</i>
Grade Four	<ul style="list-style-type: none"> • Describe forms of energy (sound, chemical, radiant, electrical, atomic, mechanical, heat (transfer and conduction) and provide a real-life example of each (UNIT: Energy) • Describe the transformation of energy from one form to another (UNIT: Energy) • Describe how heat spreads from one object or place to another (<i>e.g., conduction, convection, radiation</i>) (UNIT: Energy) • Investigate different materials to determine which are better conductors and which are better insulators of heat (UNIT: Energy)
Grade Three	<i>Not Applicable</i>
Grade Two	<ul style="list-style-type: none"> • Describe various methods for generating and transferring heat energy (UNIT: Energy)
Grade One	<i>Not Applicable</i>
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>Energy Resources</i>	
Grade Eight	<i>Not Applicable</i>
Grade Seven	<i>Not Applicable</i>
Grade Six	<ul style="list-style-type: none"> Evaluate energy sources in terms of advantages and disadvantages (<i>e.g. cost, environmental consequences, sustainability</i>) (UNIT: Energy) (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.)
Grade Five	<i>Not Applicable</i>
Grade Four	<i>Not Applicable</i>
Grade Three	<i>Not Applicable</i>
Grade Two	<ul style="list-style-type: none"> Describe how energy is used in the household, in transportation, in toys, etc. (UNIT: Energy) Identify sources of energy, such as gasoline from oil, electricity, and food (UNIT: Energy) Demonstrate practical ways to conserve energy (UNIT: Energy)
Grade One	<i>Not Applicable</i>
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>Electricity</i>	
Grade Eight	<ul style="list-style-type: none"> Construct complex circuits and describe the interaction of the circuit components to produce heat, light, sound, and magnetic effects (UNIT: Electricity and Magnetism) Analyze changing current flow in given circuits (UNIT: Electricity and Magnetism) Analyze and describe the process for generating electrical energy from a variety of energy sources (e.g. <i>sun, wind and coal</i>) (UNIT: Electricity and Magnetism) Describe the relationship between electric current and magnetism (UNIT: Electricity and Magnetism)
Grade Seven	<i>Not Applicable</i>
Grade Six	<i>Not Applicable</i>
Grade Five	<i>Not Applicable</i>
Grade Four	<ul style="list-style-type: none"> Categorize substances and/or objects as conductors or nonconductors of electricity based on tests (UNIT: Electricity and Magnetism) Construct simple circuits and describe the interaction of the circuit components (UNIT: Electricity and Magnetism) Compare and contrast series and parallel circuits (UNIT: Electricity and Magnetism) Create a simple electromagnet and investigate variables affecting its strength (UNIT: Electricity and Magnetism)
Grade Three	<i>Not Applicable</i>
Grade Two	<i>Not Applicable</i>
Grade One	<i>Not Applicable</i>
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>Magnetism</i>	
Grade Eight	<i>Not Applicable</i>
Grade Seven	<i>Not Applicable</i>
Grade Six	<i>Not Applicable</i>
Grade Five	<i>Not Applicable</i>
Grade Four	<ul style="list-style-type: none"> Describe the properties of magnets (UNIT: Electricity and Magnetism)
Grade Three	<i>Not Applicable</i>
Grade Two	<i>Not Applicable</i>
Grade One	<i>Not Applicable</i>
Kindergarten	<ul style="list-style-type: none"> Explain the effect of magnets on certain objects whether touching or not (UNIT: Magnetism) Describe some real-world applications of magnets (UNIT: Magnetism) Recall objects that can be damaged by exposure to magnets (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Magnetism)

Vertical Alignment for the Measurement Topic: <i>Sound</i>	
Grade Eight	<i>Not Applicable</i>
Grade Seven	<i>Not Applicable</i>
Grade Six	<ul style="list-style-type: none"> Describe the effect of the medium on sound (UNIT: Sound) Compare and contrast the properties of longitudinal and transverse waves and specify examples of each (UNIT: Sound) Relate the amplitude of a wave (<i>i.e. sound, seismic, water</i>) to the amount of energy used to create the vibration of the object producing the wave (UNIT: Sound) Describe the changing pitch of sound in terms of the speed, frequency, and wavelength of the sound waves (speed=wavelength X frequency) (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.)
Grade Five	<i>Not Applicable</i>
Grade Four	<i>Not Applicable</i>
Grade Three	<ul style="list-style-type: none"> Describe the relationship between vibrations and the production of sound (UNIT: Sound) Describe the variables that affect pitch (UNIT: Sound) Explain how sound energy travels through solids, liquids, and gas (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Sound) Compare and contrast sounds produced by various objects in terms of pitch and amplitude (UNIT: Sound)
Grade Two	<i>Not Applicable</i>
Grade One	<i>Not Applicable</i>
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>Light</i>	
Grade Eight	<i>Not Applicable</i>
Grade Seven	<i>Not Applicable</i>
Grade Six	<ul style="list-style-type: none"> • Differentiate between color addition and color subtraction using colored lighting and filters (UNIT: Light) • Compare the reflection of light from various surfaces (<i>e.g., loss of light, angle of reflection, reflected color</i>) (UNIT: Light) • Investigate and describe the refraction of light passing through various materials (<i>e.g., prisms, lenses, water</i>) (UNIT: Light) • Compare and contrast waves that make up the electromagnetic spectrum as versions of radiation that differ in wavelengths, frequencies, and energy levels (UNIT: Light) • Describe an everyday application of each of the waves of the electromagnetic spectrum (UNIT: Light) <p>(NOTE- There are no GLCE that align with these NHA objectives. Teach only as an enrichment unit if time permits.)</p>
Grade Five	<i>Not Applicable</i>
Grade Four	<i>Not Applicable</i>
Grade Three	<ul style="list-style-type: none"> • Describe the refraction, reflection, transmission, and/or absorption of light as it interacts with objects that are transparent, translucent, and opaque (UNIT: Light) • Describe the visible spectrum of light (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Light)
Grade Two	<i>Not Applicable</i>
Grade One	<i>Not Applicable</i>
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>Measuring Motion</i>	
Grade Eight	<i>Not Applicable</i>
Grade Seven	<ul style="list-style-type: none"> Analyze the motion of objects in terms of direction and changes in motion (UNIT: Motion and Forces) Describe, measure, and graph quantities that characterize moving objects such as direction, speed, velocity, and acceleration (UNIT: Motion and Forces)
Grade Six	<i>Not Applicable</i>
Grade Five	<ul style="list-style-type: none"> P.FM.05.41 Explain the motion of an object relative to its point of reference (Unit: Motion and Forces) P.FM.05.42 Describe the motion of an object in terms of distance, time and direction, as the object moves, and in relationship to other objects (Unit: Motion and Forces) P.FM.05.43 Illustrate how motion can be measured and represented on a graph (Unit: Motion and Forces)
Grade Four	<i>Not Applicable</i>
Grade Three	<ul style="list-style-type: none"> Describe the position and change in position (motion) of an object in comparison to a reference point (UNIT: Motion and Forces) Calculate the speed of objects based on the distance traveled divided by the time it took to travel the distance (UNIT: Motion and Forces)
Grade Two	<ul style="list-style-type: none"> Describe the position of an object relative to another object or background (UNIT: Motion and Forces) Compare and contrast the motion of different objects (UNIT: Motion and Forces)
Grade One	<i>Not Applicable</i>
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>Forces Effect on Motion</i>	
Grade Eight	<i>Not Applicable</i>
Grade Seven	<ul style="list-style-type: none"> • Explain the effects of contact and non-contact forces on objects using Newton's First Law (Unit: Motion and Forces) • Explain the relationship between the mass of the object, the size of the net force acting on the object, and the resulting change in motion of the object in real world examples of motion (Unit: Motion and Forces)
Grade Six	<i>Not Applicable</i>
Grade Five	<ul style="list-style-type: none"> • P.FM.05.21 Distinguish between contact forces and non-contact forces (Unit: Motion and Forces) • P.FM.05.22 Demonstrate contact and non-contact forces to change the motion of an object (Unit: Motion and Forces) • P.FM.05.31 Describe what happens when two forces act on an object in the same or opposing directions (Unit: Motion and Forces) • P.FM.05.32 Describe how constant motion is the result of balanced (zero net) forces (Unit: Motion and Forces) • P.FM.05.33 Describe how changes in the motion of objects are caused by a non-zero net (unbalanced) force (Unit: Motion and Forces) • P.FM.05.34 Relate the size of change in motion to the strength of unbalanced forces and the mass of the object (Unit: Motion and Forces)
Grade Four	<i>Not Applicable</i>
Grade Three	<ul style="list-style-type: none"> • Analyze changing motion of objects and identify forces acting on the object to cause change in motion (Unit: Motion and Forces) • Explain how the change in motion of an object is related to the strength of the force acting upon the object and to the mass of the object (UNIT: Motion and Forces)
Grade Two	<ul style="list-style-type: none"> • Describe balance as a function of position and weight/counterweight (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Motion and Forces) • Describe the effects that pushing or pulling have on the motion of objects (UNIT: Motion and Forces) • Describe the observable effects of gravity on objects (UNIT: Motion and Forces)
Grade One	<i>Not Applicable</i>
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>Simple Machines</i>	
Grade Eight	<i>Not Applicable as of 2013-14</i>
Grade Seven	<i>Not Applicable</i>
Grade Six	<i>Not Applicable</i>
Grade Five	<i>Not Applicable as of 2013-14</i>
Grade Four	<i>Not Applicable</i>
Grade Three	<i>Not Applicable</i>
Grade Two	<ul style="list-style-type: none"> Describe simple machines (<i>e.g., lever, pulley, wedge, inclined plane, wheel and axle, screw</i>) and their purpose (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (Unit: Motion and Forces)
Grade One	<i>Not Applicable</i>
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>The Changing Earth</i>	
Grade Eight	<i>Not Applicable</i>
Grade Seven	<i>Not Applicable</i>
Grade Six	<ul style="list-style-type: none"> Analyze and describe the Earth's surface features using maps (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Geology) Describe agents of physical and chemical weathering and explain their connection to the formation of soil and sediment (UNIT: Geology) Analyze how physical/mechanical weathering (e.g., waves, wind, water, and glacier movement) shape and reshape Earth's surface over time (UNIT: Geology) Describe the three primary types of plate boundaries and the landforms associated with each (UNIT: Geology) Compare the physical properties of the interior layers of Earth (UNIT: Geology) Describe major geological events (mountain building, earthquakes, volcanic eruptions) as processes resulting from heat flow and movement of material within Earth (UNIT: Geology) Describe ways scientists learn about Earth's geologic history (e.g., seismographs, ground penetrating radar, core drillers, observations) (UNIT: Geology)
Grade Five	<i>Not Applicable</i>
Grade Four	<i>Not Applicable</i>
Grade Three	<ul style="list-style-type: none"> Compare and contrast major features of the earth's surface (e.g., ocean, sea, lake, pond, mountain, hill, mesa, plateau) (UNIT: The Changing Surface of Earth) Describe the variety of forces involved in weathering, erosion and deposition (UNIT: The Changing Surface of Earth) Describe how physical/mechanical weathering (e.g., wind, water, ice, and gravity) causes change to the Earth's surface over time (UNIT: The Changing Surface of Earth)
Grade Two	<i>Not Applicable</i>
Grade One	<ul style="list-style-type: none"> Recall major features of the Earth's surface (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (e.g., mountains, oceans, plains) (UNIT: The Surface of Earth)
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>Earth Materials and Responsible Use</i>	
Grade Eight	<i>Not Applicable</i>
Grade Seven	<i>Not Applicable</i>
Grade Six	<ul style="list-style-type: none"> Classify sedimentary, igneous and metamorphic rocks (UNIT: Geology) Analyze observable and measurable soil properties to predict soil quality (UNIT: Geology)
Grade Five	<i>Not Applicable</i>
Grade Four	<ul style="list-style-type: none"> Compare the components and properties (e.g., compressibility, water retention, color) of various soil types (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Ecosystems) Demonstrate and describe the practices of reducing, reusing and recycling and other conservation measures (UNIT: Conservation of Natural Resources) Classify manufactured products according to the Earth materials from which they are made (UNIT: Conservation of Natural Resources) S.RS.03&04.18 Describe the effect humans and other organisms have on the balance of the natural world (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.) (UNIT: Conservation of Natural Resources) MI.E.ES.03.51 Describe ways humans are dependent on the natural environment (forests, water, clean air, earth materials) and constructed environments (homes, neighborhoods, shopping malls, factories, and industry) (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.) (UNIT: Conservation of Natural Resources) MI.E.ES.03.41 Identify natural resources (metals, fuels, fresh water, farmland, and forests) (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.) (UNIT: Conservation of Natural Resources) MI.E.ES.03.42 Classify renewable (fresh water, farmland, forests) and non-renewable (fuels, metals) resources (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.) (UNIT: Conservation of Natural Resources)
Grade Three	<ul style="list-style-type: none"> Compare and contrast types of earth materials (UNIT: Rocks and Minerals) Describe properties used to identify minerals and determine the mineral makeup of rocks (UNIT: Rocks and Minerals) Compare and contrast the observable features and formation processes of igneous, sedimentary, and metamorphic rocks (UNIT: Rocks and Minerals) Describe the identifying properties of common rock samples (UNIT: Rocks and Minerals)
Grade Two	<i>Not Applicable</i>
Grade One	<ul style="list-style-type: none"> Describe the basic properties of rocks (e.g., color, composition, texture, size) (UNIT: The Surface of Earth) Classify rock particles as boulders, cobble, pebbles, gravel, sand, silt, or clay (UNIT: The Surface of Earth) Compare and contrast soil samples by components (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: The Surface of Earth) Explain uses for different natural resources based upon their properties (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: The Surface of Earth)
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>Water on Earth</i>	
Grade Eight	<i>Not Applicable</i>
Grade Seven	<ul style="list-style-type: none"> Describe the basic distinguishing characteristics of various locations of water on Earth (<i>e.g. glaciers, ice caps, oceans, wetlands, etc.</i>) (UNIT: Weather and Water) Describe the various paths a water molecule might follow in the water cycle and explaining factors that influence each path (UNIT: Weather and Water)
Grade Six	<i>Not Applicable</i>
Grade Five	<ul style="list-style-type: none"> Analyze the distribution, location, and state of water on Earth (UNIT: Weather and Water) Describe the processes of infiltration, runoff, evaporation, condensation, and precipitation as they relate to movement of water in the water cycle (UNIT: Weather and Water)
Grade Four	<i>Not Applicable</i>
Grade Three	<i>Not Applicable</i>
Grade Two	<ul style="list-style-type: none"> Describe the locations of solid and liquid water on Earth (UNIT: The Water Cycle) Analyze precipitation such as snow, ice, rain, hail, and sleet as forms of water resulting from different conditions (UNIT: The Water Cycle) Compare and contrast the effect that surface type has on whether water seeps into the surface, runs off, or puddles (UNIT: The Water Cycle) Describe the effect of evaporation (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: The Water Cycle) Investigate and explain the changes in state from solid to liquid made by water and the conditions necessary for these changes (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: The Water Cycle) MI.E.FE.02.12 Identify household uses of water (drinking, cleaning, food preparation). (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.)
Grade One	<i>Not Applicable</i>
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>Atmosphere</i>	
Grade Eight	<i>Not Applicable</i>
Grade Seven	<ul style="list-style-type: none"> Describe the composition, characteristics, and structure of the Earth's atmosphere (UNIT: Weather and Water)
Grade Six	<i>Not Applicable</i>
Grade Five	<i>Not Applicable</i>
Grade Four	<i>Not Applicable</i>
Grade Three	<i>Not Applicable</i>
Grade Two	<i>Not Applicable</i>
Grade One	<ul style="list-style-type: none"> Explain that air is a substance that surrounds us, takes up space, moves as wind, and interacts with us and objects on earth (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Weather)
Kindergarten	<i>Not Applicable</i>

Vertical Alignment for the Measurement Topic: <i>Weather and Climate</i>	
Grade Eight	<i>Not Applicable</i>
Grade Seven	<ul style="list-style-type: none"> Analyze common weather instruments (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Weather and Water) Interpret weather maps to describe local, regional and national weather conditions (UNIT: Weather and Water) Explain how the interaction of air masses influences weather conditions (UNIT: Weather and Water) Analyze how radiant energy from the sun heats earth materials and influences weather (UNIT: Weather and Water) Compare and contrast climate regions around the world (UNIT: Weather and Water)
Grade Six	<i>Not Applicable</i>
Grade Five	<ul style="list-style-type: none"> Measure, record, and explain daily weather phenomena using the appropriate tools (UNIT: Weather and Water) Compile and use weather data to determine climate trends (UNIT: Weather and Water) Correlate cloud types with general weather conditions (UNIT: Weather and Water) Describe a variety of storm types, the weather conditions associated with each, and explain when they occur (UNIT: Weather and Water) Describe the effects geography can have on weather and climate (UNIT: Weather and Water)
Grade Four	<i>Not Applicable</i>
Grade Three	<i>Not Applicable</i>
Grade Two	<i>Not Applicable</i>
Grade One	<ul style="list-style-type: none"> Compare and contrast cirrus, stratus, and cumulus clouds (UNIT: Weather) Describe examples of severe weather and appropriate safety precautions (UNIT: Weather) Describe the effect of the Sun's rays on land, air and water (UNIT: Weather)
Kindergarten	<ul style="list-style-type: none"> Observe and describe the cyclical pattern of seasons (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Seasons) Correlate the different seasons with different life processes in plants and animals (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Seasons)

Vertical Alignment for the Measurement Topic: <i>Daily Weather Measurement</i>	
Grade Eight	<i>Not Applicable</i>

NHA Science Exemplar: The Nature of Science

The student will study and apply the strategies and practices of scientists having to do with scientific knowledge and inquiry. They will learn to develop hypotheses and make predictions while they create scientific investigations to test their theories.

Grade One

UNIT: Introduction to Science

NHA Science Content	NHA Objectives	MI GLCE
Because the universe is consistent, when a science investigation is done the same way multiple times, one can expect to get very similar results each time it is performed.	The Nature of Science, Scientific Knowledge Describe the consistency of the results of an experiment conducted multiple times	MI.S.RS.01.12 Recognize that science investigations are done more than one time.
People are more likely to believe your ideas if you can back them up with reason or evidence. In science it is critical to based ideas on evidence.	The Nature of Science, Scientific Knowledge Communicate a scientific idea using evidence	MI.S.IA.01.12 Share ideas about science through purposeful conversation.
Scientists learn about things by observing those things carefully.	The Nature of Science, Scientific Inquiry- The Scientific Method Make observations related to the 5 senses about living things, nonliving objects, and events	MI.S.IP.01.11 Make purposeful observation of the natural world using the appropriate senses
Scientists learn about things by observing those things carefully but sometimes they can learn more by doing something to the things and observing what happens.	The Nature of Science, Scientific Inquiry- The Scientific Method Plan simple investigations as a strategy for evaluating predictions based on questions developed from observations of the natural world	MI.S.IP.01.12 Generate questions based on observations. MI.S.IP.01.13 Plan and conduct simple investigations. MI.S.IA.01.14 Develop strategies for information gathering (ask an expert, use a book, make observations, conduct simple investigations, and watch a video).
Describing things accurately is important in science because it enables people to compare their observations with those of others.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Record and communicate findings from observations using a variety of methods such as drawings, journaling, pictographs, and bar graphs	MI.S.IP.01.16 Construct simple charts from data and observations MI.S.IA.01.12 Share ideas about science through purposeful conversation. MI.S.IA.01.13 Communicate and present findings of observations. MI.S.RS.01.11 Demonstrate scientific concepts through various illustrations, performances, models, exhibits, and activities.

Tools such as thermometers, rulers and balances often give more information about things than can be gotten by just using our senses. Construction tools are used to do things better or more easily and to do some things that could not otherwise be done at all.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Safely use tools and instruments (e.g., thermometers, magnifiers, rulers, balances, scissors, hammers, pliers, screwdrivers) to construct, measure, and/or look at objects	MI.S.IP.01.14 Manipulate simple tools (for example: hand lens, pencils, balances, non-standard objects for measurement) that aid observation and data collection.
Tools such as thermometers, rulers and balances often give more information about things than can be gotten by just using our senses. Construction tools are used to do things better or more easily and to do some things that could not otherwise be done at all.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Make measurements of length, weight, temperature, capacity and volume using standard and nonstandard units and appropriate instruments	MI.S.IP.01.15 Make accurate measurements with appropriate (non-standard) units for the measurement tool.
Most things are made of parts. Something may not work if some of its parts are missing. When parts are put together, they can do things that they couldn't do by themselves.	The Nature of Science, Common Themes in Science Identify the parts of things and how one part connects to and affects another	There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.
Objects change in some ways and stay the same in some ways. People can keep track of some things that change, seeing where they come from and where they go. An object can change in various ways, such as in size, weight, color, or temperature. Small changes can sometimes be detected by comparing counts or measurements at different times. Some things change so slowly or so quickly that the changes are hard to notice while they are taking place.	The Nature of Science, Common Themes in Science Identify and record instances of things that change and the different ways they change	MI.S.IP.01.16 Construct simple charts from data and observations.
Many toys are like real things in some ways but not others and would be considered models of the real thing. They may not be the same size, are missing many details, or are not able to do all of the same things. A model of something is different from the real thing but can be used to learn something about the real thing. One way to describe something is to say how it is and isn't like something else.	The Nature of Science, Common Themes in Science Identify similarities and differences between a model of an object and the real thing	MI.S.RS.01.11 Demonstrate scientific concepts through various illustrations, performances, models, exhibits, and activities.
Things in nature and things people make have very different sizes, weights, ages, and speeds and can be compared based on those differences.	The Nature of Science, Common Themes in Science Describe the different sizes, weights, ages, and speeds of things observed	MI.S.IP.01.11 Make purposeful observation of the natural world using the appropriate senses.

NHA Science Exemplar: The Living Environment

The student will explore the common themes that intertwine and connect all aspects of living things, such as the similarities of plants and animals, structure and functions of body parts, adaptations to new environments, and coexistence of animals in a variety of ecosystems.

Grade One

UNIT: Ecosystems

NHA Science Content	NHA Objectives	MI GLCE
<p>Simple Food Chains</p> <ul style="list-style-type: none"> Some animals eat plants for food Some animals eat other animals for food Some animals eat both plants and animals for food 	<p>The Living Environment, Food Chains and Webs Classify animals as plant eaters, animal eaters, or both plant and animal eaters and identify their primary food source</p>	<p>MI.L.OL.01.13 Identify the needs of animals.</p>
<p>Changes in Ecosystems</p> <ul style="list-style-type: none"> All organisms interact with the environment and cause change <ul style="list-style-type: none"> E.g. grass and other plants grow, animals eat plants or use plants for shelter or nesting, plants and animals change over seasons, animals immigrate and emigrate, plants and animals give birth and die Change can be fast or very slow, very noticeable or only slightly noticeable 	<p>The Living Environment, Ecosystems Describe evidence that all environments change, and often as a result of the organisms living there</p>	<p>There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.</p>
<p>The following objectives are process skills. As you teach the content objectives above, include opportunities for students to practice the following science skills.</p>		
<p>Objects change in some ways and stay the same in some ways. People can keep track of some things that change, seeing where they come from and where they go. notice while they are taking place.		
-------------------------------------	--	--

NHA Science Exemplar: The Living Environment

The student will explore the common themes that intertwine and connect all aspects of living things, such as the similarities of plants and animals, structure and functions of body parts, adaptations to new environments, and coexistence of animals in a variety of ecosystems.

Grade One

UNIT: Animal Adaptations

NHA Science Content	NHA Objectives	MI GLCE
<p>Anatomical Structures that Aid in Survival</p> <ul style="list-style-type: none"> • Body covering, different types of appendages, special features such as stingers, and teeth <p>Seasonal Adaptation Features</p> <ul style="list-style-type: none"> • Changing color • Changing body covering • Hibernation • Migration • Dormancy 	<p>The Living Environment, Plant and Animal Adaptations Describe the physical characteristics of a variety of North American animals that help them survive in their particular environments</p>	<p>MI.L.OL.01.13 Identify the needs of animals.</p>
<p>Variations in traits of animals and plants in a species, including people</p>	<p>The Living Environment, Plant and Animal Adaptations Identify the similarities and differences in features and characteristics of animals of the same species</p>	<p>There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.</p>
<p>Changes in Species Over Time</p> <ul style="list-style-type: none"> • Extinction of organisms (e.g. trilobites, dinosaurs, mammoths, saber-toothed tigers) • Fossils <ul style="list-style-type: none"> – Evidence of kinds of animals that lived long ago that have become extinct 	<p>The Nature of Science, Common Themes in Science Identify similarities and differences between a model of an object and the real thing</p>	<p>MI.S.RS.01.11 Demonstrate scientific concepts through various illustrations, performances, models, exhibits, and activities.</p>

	The Living Environment, Fossils and Extinction Describe fossils as evidence that there are kinds of animals that lived long ago that are no longer found on Earth	There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.
The following objectives are process skills. As you teach the content objectives above, include opportunities for students to practice the following science skills.		
Objects change in some ways and stay the same in some ways. People can keep track of some things that change, seeing where they come from and where they go. An object can change in various ways, such as in size, weight, color, or temperature. Small changes can sometimes be detected by comparing counts or measurements at different times. Some things change so slowly or so quickly that the changes are hard to notice while they are taking place.	The Nature of Science, Common Themes in Science Identify and record instances of things that change and the different ways they change	MI.S.IP.01.16 Construct simple charts from data and observations.
Many toys are like real things in some ways but not others and would be considered models of the real thing. They may not be the same size, are missing many details, or are not able to do all of the same things. A model of something is different from the real thing but can be used to learn something about the real thing. One way to describe something is to say how it is and isn't like something else.	The Living Environment, Genetics and Heredity Describe similarities and differences between offspring and parents of a variety of animals	MI.L.HE.01.11 Identify characteristics (for example: body coverings, beak shape, number of legs, body parts) that are passed on from parents to young. MI.L.HE.01.12 Classify young animals based on characteristics that are passed on from parents (for example: dogs/puppies, cats/kittens, cows/calves, chicken/chicks).
Things in nature and things people make have very different sizes, weights, ages, and speeds and can be compared based on those differences.	The Nature of Science, Common Themes in Science Describe the different sizes, weights, ages, and speeds of things observed	MI.S.IP.01.11 Make purposeful observation of the natural world using the appropriate senses.

NHA Science Exemplar: Physical Science

The student will investigate the laws of the physical world that form our understanding of phenomena such as the motion of objects, the characteristics of matter, and the various forms of energy applicable to our lives.

Grade One

UNIT: Properties (Delta Learning Kit: Properties)

NHA Science Content	NHA Objectives	MI GLCE
	Physical Science, Properties of Materials Explain that objects have properties that can be analyzed and described using the senses	MI.P.PM.02.12 Describe objects and substances according to their properties (color, size, shape, texture, hardness, liquid or solid, sinking or floating).
5 Senses: Explore Properties, Compare and Classify Objects <ul style="list-style-type: none"> • Size <ul style="list-style-type: none"> – Big, little, large, small, tiny • Color <ul style="list-style-type: none"> – ROYGBIV, silver, brown, black, white • Shape <ul style="list-style-type: none"> – Circle, square, triangle, diamond, pointy, round, rectangle • Texture <ul style="list-style-type: none"> – Rough, smooth, sticky, bumpy, scratchy, slippery, soft, hard, greasy • Weight <ul style="list-style-type: none"> – Heavy/light • Density <ul style="list-style-type: none"> – Float or sink in water • Magnetism 	Physical Science, Properties of Materials Describe, compare and classify objects by size, color, shape, texture, weight, magnetism, and ability to float	MI.P.PM.01.11 Demonstrate the ability to sort objects according to observable attributes such as color, shape, size, sinking or floating. MI.P.PM.01.31 Identify materials that are attracted by magnets. MI.P.PM.02.12 Describe objects and substances according to their properties (color, size, shape, texture, hardness, liquid or solid, sinking or floating).
	Engineering and Technology, Engineering Describe the relationship between the properties of a material and its typical uses and determine the best material for a specific use	There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.
	Engineering and Technology, Engineering Compare and contrast manmade and natural materials	There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.

The following objectives are process skills. As you teach the content objectives above, include opportunities for students to practice the following science skills.

Tools such as thermometers, rulers and balances often give more information about things than can be gotten by just using our senses. Construction tools are used to do things better or more easily and to do some things that could not otherwise be done at all.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Safely use tools and instruments (e.g., thermometers, magnifiers, rulers, balances, scissors, hammers, pliers, screwdrivers) to construct, measure, and/or look at objects	MI.S.IP.01.14 Manipulate simple tools (for example: hand lens, pencils, balances, non-standard objects for measurement) that aid observation and data collection.
Science is based on accurate measurement.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Make measurements of length, weight, temperature, capacity and volume using standard and nonstandard units and appropriate instruments	MI.S.IP.01.15 Make accurate measurements with appropriate (non-standard) units for the measurement tool.

NHA Science Exemplar: Earth and Space Science

The student will participate in the study of the physical characteristics of our Earth and the evidence of those characteristics all around us. Topics include: rocks and minerals; the properties and movement of water on the earth; the relationship between land, air, and water; and the motion of Earth in space.

Grade One

UNIT: Weather (Foss Learning Kit: Air and Weather)

NHA Science Content	NHA Objectives	MI GLCE
<p>The Atmosphere</p> <ul style="list-style-type: none"> Air surrounds us and takes up space Air moves as wind Air interacts with us and other objects on earth 	<p>Earth and Space Science, Atmosphere Explain that air is a substance that surrounds us, takes up space, moves as wind, and interacts with us and objects on earth</p>	<p>There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.</p>
<p>Daily Weather Changes</p> <ul style="list-style-type: none"> Meteorologists <ul style="list-style-type: none"> Study and record daily weather changes Precipitation <ul style="list-style-type: none"> Rain, snow, hail, freezing rain 	<p>Earth and Space Science, Daily Weather Measurement Describe patterns of change in weather over time</p>	<p>MI.E.S.01.21 Compare daily changes in the weather related to temperature (cold, hot, warm, cool); cloud cover (cloudy, partly cloudy, foggy) precipitation (rain, snow, hail, freezing rain); wind (breezy, windy, calm). MI.E.S.01.22 Describe and compare weather related to the four seasons in terms of temperature, cloud cover, precipitation, and wind.</p>
<p>Weather Measurement Tools</p> <ul style="list-style-type: none"> Rain gauge, anemometer, wind vane Graphing and tracking changes 	<p>Earth and Space Science, Daily Weather Measurement Describe various tools that are used in weather measurement</p>	<p>MI.E.S.01.31 Identify the tools that might be used to measure temperature, precipitation, cloud cover and wind.</p>
<ul style="list-style-type: none"> Temperature <ul style="list-style-type: none"> Thermometers used to measure temperature in Fahrenheit degrees <ul style="list-style-type: none"> Words to describe temperature- hot, warm, cool, cold, freezing Sunlight provides the heat to warm the land, air, and water 	<p>Earth and Space Science, Weather and Climate Describe the effect of the Sun's rays on land, air, and water</p>	<p>MI.E.S.01.11 Identify the sun as the most important source of heat which warms the land, air, and water of the Earth MI.E.S.01.12 Demonstrate the importance of sunlight and warmth in plant growth</p>
<ul style="list-style-type: none"> Clouds relationship to weather condition <ul style="list-style-type: none"> Words to describe conditions- cloudy, partly cloudy, foggy Cloud types to identify- Cirrus, Stratus, 	<p>Earth and Space Science, Weather and Climate Compare and contrast cirrus, stratus, and cumulus clouds</p>	<p>There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.</p>

Cumulus		
<ul style="list-style-type: none"> Severe Weather <ul style="list-style-type: none"> Tornadoes, thunderstorms, blizzards, hurricanes Safety precautions 	Earth and Space Science, Weather and Climate Describe examples of severe weather and appropriate safety precautions	MI.E.ES.01.23 Describe severe weather characteristics. MI.E.ES.01.24 Describe precautions that should be taken for human safety during severe weather conditions (thunder and lightning, tornadoes, strong winds, heavy precipitation).
The following objectives are process skills. As you teach the content objectives above, include opportunities for students to practice the following science skills.		
Scientists learn about things by observing those things carefully.	The Nature of Science, Scientific Inquiry- The Scientific Method Make observations related to the 5 senses about living things, nonliving objects, and events	MI.S.IP.01.11 Make purposeful observation of the natural world using the appropriate senses
Scientists learn about things by observing those things carefully but sometimes they can learn more by doing something to the things and observing what happens. Grade One

UNIT: The Surface of Earth (Foss Learning Kit: Pebbles, Sand and Silt)

NHA Science Content	NHA Objectives	MI GLCE
Features of the Earth's Surface <ul style="list-style-type: none"> Land/water Mountains/plains Canyons Volcanoes 	Earth and Space Science, The Changing Earth Recall major features of the Earth's surface	There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.
Rocks <ul style="list-style-type: none"> Properties in the form of boulders, pebbles, sand (e.g. size, shape, color, weight, hardness) <ul style="list-style-type: none"> Minerals vs. rock- a rock is a combination of multiple minerals 	Earth and Space Science, Earth Materials and Responsible Use Describe the basic properties of rocks (e.g., color, composition, texture, size)	MI.E.SE.00.11 Identify Earth materials that occur in nature (sand, rocks, soil, water).
Rocks <ul style="list-style-type: none"> Properties in the form of boulders, pebbles, sand (e.g. size, shape, color, weight, hardness) <ul style="list-style-type: none"> Minerals vs. rock- a rock is a combination of multiple minerals 	Earth and Space Science, Earth Materials and Responsible Use Classify rock particles as boulders, cobble, pebbles, gravel, sand, silt, or clay	MI.E.SE.00.11 Identify Earth materials that occur in nature (sand, rocks, soil, water).
Uses of Earth Materials <ul style="list-style-type: none"> Construction uses for rocks and minerals Reduce, reuse, recycle 	Earth and Space Science, Earth Materials and Responsible Use Explain uses for different natural resources based upon their properties	There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.
Soil <ul style="list-style-type: none"> Components Rock fragments, clay, silt, sand, humus	Earth and Space Science, Earth Materials and Responsible Use Compare and contrast soil samples by components	There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.
The following objectives are process skills. As you teach the content objectives above, include opportunities for students to practice the following science skills.		

Science is based on accurate measurement.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Make measurements of length, weight, temperature, capacity and volume using standard and nonstandard units and appropriate instruments	MI.S.IP.01.15 Make accurate measurements with appropriate (non-standard) units for the measurement tool.
---	--	---

NHA Science Exemplar: The Living Environment

The student will explore the common themes that intertwine and connect all aspects of living things, such as the similarities of plants and animals, structure and functions of body parts, adaptations to new environments, and coexistence of animals in a variety of ecosystems.

Grade One

UNIT: Health

NHA Science Content	Michigan Grade Level Content Expectations
<p>Personal Appearance</p> <ul style="list-style-type: none"> • Hygiene <ul style="list-style-type: none"> - Caring for: teeth, gums, eyes, ears, nose, skin, hair, and nails - Bathing • Importance of having good hygiene <ul style="list-style-type: none"> - Avoiding illness - Sanitation • Clothing <ul style="list-style-type: none"> - Wearing appropriate clothing for weather - Tying shoes <p>Healthy Diet</p> <ul style="list-style-type: none"> • Nutrition <ul style="list-style-type: none"> - How our body uses food - Eating a variety of food - Importance of water - Healthy vs. unhealthy food <ul style="list-style-type: none"> • Healthy snacks - Food Pyramid <p>Healthy Decisions</p> <ul style="list-style-type: none"> • Safety <ul style="list-style-type: none"> - Traffic/pedestrian safety - Playground/classroom safety - Bicycle safety - Appropriate touch <ul style="list-style-type: none"> • Responding to inappropriate touch - Strangers - Recognition of dangerous objects and substances <ul style="list-style-type: none"> • Weapons, cleaning products/chemicals, medicine • Emergency Situations <ul style="list-style-type: none"> - Routines for fire drills/tornado drills - Calling 911 	<p>Strand 1: Nutrition and Physical Activity</p> <p>Standard 1: Core Concepts</p> <p>1.1 Describe the benefits of eating healthy snacks.</p> <p>1.2 Describe the benefits of being physically active.</p> <p>1.3 Describe the health benefits of drinking water, compared to other beverages.</p> <p>1.4 Classify foods according to the food groups.</p> <p>1.5 Describe how physical activity, rest, and sleep help a person stay healthy.</p> <p>Standard 3: Health Behaviors</p> <p>1.6 Explain the importance of eating a variety of foods from all of the food groups.</p> <p>1.7 Suggest a food from each of the food groups that could be eaten as a healthy snack.</p> <p>Strand 2: Alcohol, Tobacco , and Other Drugs</p> <p>Standard 1: Core Concepts</p> <p>2.1 Identify household products that are harmful if touched, ingested, or inhaled.</p> <p>2.2 Describe ways that over-the-counter and prescription medicines can be helpful or harmful.</p> <p>2.3 Explain the differences between over-the-counter and prescription medicines and illicit drugs.</p> <p>2.4 State that all forms of tobacco products contain harmful chemicals, including the drug nicotine.</p> <p>Standard 2: Access Information</p> <p>2.5 Identify trustworthy adults who are sources of accurate information about potentially poisonous household products.</p> <p>2.6 Apply knowledge of product label warnings to gain accurate information about potentially poisonous household products.</p> <p>Standard 3: Health Behaviors</p> <p>2.7 Apply rules for handling household products and avoiding poisons.</p> <p>2.8 Describe how to safely use medicines.</p> <p>2.9 Apply strategies to hypothetical situations to avoid exposure to</p>

- Community Service Providers
 - Police officers/fire fighters / paramedics

Healthy Practices

- Benefits of Exercise
- Appropriate television use
- Healthy sleeping habits
- Avoidance of dangerous substances
 - Drugs/alcohol/ tobacco products

Healthy Minds

- Interacting with family/friends
 - Sharing feelings
 - Coping with change
 - Importance of manners
- Building relationships/making friends
 - Listening/paying attention
- Making decisions and solving problems

secondhand smoke.

Strand 3: Safety

Standard 1: Core Concepts

3.1 Describe fire and burn hazards.

3.2 Describe wheeled recreation hazards.

Standard 2: Access Information

3.3 Demonstrate the procedure for using 911 to get help in emergencies.

Standard 3: Health Behaviors

3.4 Apply strategies to prevent fires and burns to hypothetical situations.

3.5 Demonstrate actions to take in a fire emergency.

3.6 Describe situations that are dangerous, destructive, and disturbing and that need to be reported to an adult.

3.7 Practice escaping unsafe situations by getting away, leaving, and telling an adult.

3.8 Apply strategies and rules for safe wheeled recreation, including the proper use of safety gear.

Strand 4: Social and Emotional Health

Standard 1: Core Concepts

4.1 Describe ways family members and friends help each other.

4.2 Explain the role of listening and paying attention in building and maintaining friendships.

Standard 3: Health Behaviors

4.3 Apply skills to find out how others are feeling.

4.4 Apply skills to predict the potential feelings of others.

Standard 6: Decision Making

4.5 Describe characteristics of people who can help make decisions and solve problems.

4.6 Explain the decision making and problem solving steps.

4.7 Apply the steps to making a decision or solving a problem.

Standard 7: Social Skills

4.8 Apply effective listening and attending skills.

4.9 Demonstrate giving and accepting a compliment or statement of appreciation.

4.10 Apply “please,” “thank you,” “excuse me,” and “I am sorry” to appropriate situations.

Strand 5: Personal Health and Wellness

Standard 1: Core Concepts

5.1 Explain the importance of taking care of teeth.

Standard 3: Health Behaviors

5.2 Demonstrate proper tooth brushing techniques.

NHA Science Michigan Alignment
Grade One

Michigan Grade Level Content Expectations Taught at Another Grade Level

NHA Grade K

MI.L.OL.01.21 Describe the life cycle of animals including the following stages: egg, young, adult; egg, larva, pupa, adult. (Introduction to Animals Unit)

MI.P.PM.01.32 Observe that like poles of a magnet repel and unlike poles of a magnet attract. (Magnets Unit)

NHA Grade 2

MI.P.PM.01.21 Demonstrate that water as a solid keeps its own shape (ice). (Matter, Mixtures and Changes Unit)

MI.P.PM.01.22 Demonstrate that water as a liquid takes on the shape of various containers. (Matter, Mixtures and Changes Unit)

NHA Science Exemplar: The Nature of Science

The student will study and apply the strategies and practices of scientists having to do with scientific knowledge and inquiry. They will learn to develop hypotheses and make predictions while they create scientific investigations to test their theories.

Grade Two

UNIT: Introduction to Science

NHA Science Content	NHA Objectives	MI GLCE
Because the universe is consistent, when a science investigation is done the same way multiple times, one can expect to get very similar results each time it is performed.	The Nature of Science, Scientific Knowledge Describe the consistency of the results of an experiment conducted multiple times	S.RS.02.13 Recognize that when a science investigation is done the way it was done before, similar results are expected.
People are more likely to believe your ideas if you can back them up with reason or evidence. In science it is critical to based ideas on evidence.	The Nature of Science, Scientific Knowledge Communicate a scientific idea using evidence	S.IA.02.12 Share ideas about science through purposeful conversation. S.IA.02.13 Communicate and present findings of observations. S.RS.02.15 Use evidence when communicating scientific ideas.
Scientists learn about things by observing those things carefully.	The Nature of Science, Scientific Inquiry- The Scientific Method Make observations related to the 5 senses about living things, nonliving objects, and events	S.IP.02.11 Make purposeful observation of the natural world using the appropriate senses. S.IP.02.12 Generate questions based on observations.
Scientists learn about things by observing those things carefully but sometimes they can learn more by doing something to the things and observing what happens.	The Nature of Science, Scientific Inquiry- The Scientific Method Plan simple investigations as a strategy for evaluating predictions based on questions developed from observations of the natural world	S.IP.02.13 Plan and conduct simple investigations. S.IP.02.12 Generate questions based on observations. S.IA.02.14 Develop strategies and skills for information gathering and problem solving (books, internet, ask an expert, observation, investigation, technology tools).
Describing things accurately is important in science because it enables people to compare their observations with those of others.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Record and communicate findings from observations using a variety of methods such as drawings, journaling, pictographs, and bar graphs	S.IP.02.16 Construct simple charts and graphs from data and observations. S.RS.02.11 Demonstrate scientific concepts through various illustrations, performances, models, exhibits, and activities.

Tools such as thermometers, rulers and balances often give more information about things than can be gotten by just using our senses. Construction tools are used to do things better or more easily and to do some things that could not otherwise be done at all.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Safely use tools and instruments (e.g., thermometers, magnifiers, rulers, balances, scissors, hammers, pliers, screwdrivers) to construct, measure, and/or look at objects	S.IP.02.14 Manipulate simple tools (ruler, meter stick, measuring cups, hand lens, thermometer, balance) that aid observation and data collection. S.RS.02.16 Identify technology used in everyday life.
Tools such as thermometers, rulers and balances often give more information about things than can be gotten by just using our senses. Construction tools are used to do things better or more easily and to do some things that could not otherwise be done at all.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Make measurements of length, weight, temperature, capacity and volume using standard and nonstandard units and appropriate instruments	MI.P.PM.02.13 Measure the length of objects using rulers (centimeters) and meter sticks (meters) . MI.P.PM.02.14 Measure the volume of liquids using common measuring tools (measuring cups, measuring spoons). MI.P.PM.02.15 Compare the weight of objects using balances. S.IP.02.15 Make accurate measurements with appropriate units (meter, centimeter) for the measurement tool.
Most things are made of parts. Something may not work if some of its parts are missing. When parts are put together, they can do things that they couldn't do by themselves.	The Nature of Science, Common Themes in Science Identify the parts of things and how one part connects to and affects another	There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.
Objects change in some ways and stay the same in some ways. People can keep track of some things that change, seeing where they come from and where they go. An object can change in various ways, such as in size, weight, color, or temperature. Small changes can sometimes be detected by comparing counts or measurements at different times. Some things change so slowly or so quickly that the changes are hard to notice while they are taking place.	The Nature of Science, Common Themes in Science Identify and record instances of things that change and the different ways they change	There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.
Many toys are like real things in some ways but not others and would be considered models of the real thing. They may not be the same size, are missing many details, or are not able to do all of the same things. A model of something is different from the real thing but can be used to learn something about the real thing. One way to describe something is to say how it is and isn't like something else.	The Nature of Science, Common Themes in Science Identify similarities and differences between a model of an object and the real thing	S.RS.02.11 Demonstrate scientific concepts through various illustrations, performances, models, exhibits, and activities.

Things in nature and things people make have very different sizes, weights, ages, and speeds and can be compared based on those differences.	The Nature of Science, Common Themes in Science Describe the different sizes, weights, ages, and speeds of things observed	MI.P.FM.00.34 Observe how shape (for example: cone, cylinder, sphere), size, and weight of an object can affect motion.
--	--	--

NHA Science Exemplar: The Living Environment

The student will explore the common themes that intertwine and connect all aspects of living things, such as the similarities of plants and animals, structure and functions of body parts, adaptations to new environments, and coexistence of animals in a variety of ecosystems.

Grade Two

UNIT: Plants (Foss Learning Kit: New Plants)

NHA Science Content	NHA Objectives	MI GLCE
Plant Needs <ul style="list-style-type: none"> Water, air, sunlight, nutrients 	The Living Environment, Needs of Organisms Describe evidence that plants are alive and need air, water, light, and nutrients to grow	MI.L.OL.02.14 Identify the needs of plants. MI.E.SE.00.12 Describe how Earth materials contribute to the growth of plant and animal life
Plant Life Cycles <ul style="list-style-type: none"> There are differences in development and growth of different plants Plants have a life cycle that includes seed, seedling or young plant, adult plant, flower, fruit and seed. 	The Living Environment, Life Cycles of Plants and Animals Describe the changes observed in plants as they progress through their life cycle	MI.L.OL.02.22 Describe the life cycle of familiar flowering plants including the following stages: seed, plant, flower, and fruit.
Plant Diversity <ul style="list-style-type: none"> Plants vary widely in structure according to species and location <ul style="list-style-type: none"> Flowering plants Grasses Plants vary in life processes (e.g. germination rates, length of life cycle) Plants vary in reaction to environmental influences (e.g. being mowed, receiving varying amounts of water, sunlight, or nutrients)	The Living Environment, Plant Structures and Function Compare and contrast flowering plants and grasses of different species in structure, life processes, and reaction to environmental influences	(There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.)
New Plant Growth <ul style="list-style-type: none"> Stems <ul style="list-style-type: none"> Plants can reproduce vegetatively by growing roots and leaves on stems Nodes 	The Living Environment, Plant Structures and Function Describe the structure and function of the stem, bulbs, and roots in the growth of new plants	MI.L.HE.02.13 Identify characteristics of plants (for example: leaf shape, flower type, color, size) that are passed on from parents to young

<ul style="list-style-type: none"> • Bulbs <ul style="list-style-type: none"> – Bulbs are alive – Bulbs need water to start a new plant growth • Roots <ul style="list-style-type: none"> – Some parts of roots will grow into new plants, others won't 		
The following objectives are process skills. As you teach the content objectives above, include opportunities for students to practice the following science skills.		
Scientists learn about things by observing those things carefully	The Nature of Science, Scientific Inquiry- The Scientific Method Make observations related to the 5 senses about living things, nonliving objects, and events	S.IP.02.11 Make purposeful observation of the natural world using the appropriate senses. Objects change in some ways and stay the same in some ways. People can keep track of some things that change, seeing where they come from and where they go. An object can change in various ways, such as in size, weight, color, or temperature. Small changes can sometimes be detected by comparing counts or measurements at different times. Some things change so slowly or so quickly that the changes are hard to notice while they are taking place.	The Nature of Science , Common Themes in Science Identify and record instances of things that change and the different ways they change	MI.L.OL.02.22 Describe the life cycle of familiar flowering plants including the following stages: seed, plant, flower, and fruit.
Things in nature and things people make have very different sizes, weights, ages, and speeds and can be compared based on those differences.	The Nature of Science , Common Themes in Science Describe the different sizes, weights, ages, and speeds of things observed	MI.P.FM.00.34 Observe how shape (for example: cone, cylinder, sphere), size, and weight of an object can affect motion.

NHA Science Exemplar: Physical Science

The student will investigate the laws of the physical world that form our understanding of phenomena such as the motion of objects, the characteristics of matter, and the various forms of energy applicable to our lives.

Grade Two

UNIT: Matter, Mixtures, and Changes (Foss Learning Kit: Solids and Liquids)

NHA Science Content	NHA Objectives	MI GLCE
<p>States of Matter</p> <ul style="list-style-type: none"> • Solids <ul style="list-style-type: none"> – Definite shape and volume – Words to describe solids include hard, flexible, rigid, rough, smooth, transparent, opaque, etc. – Technology connection- engineers use knowledge of properties to select construction materials 	<p>Physical Science, Properties of Materials Compare and contrast the characteristics of various solid objects</p>	<p>MI.P.PM.01.21 Demonstrate that water as a solid keeps its own shape (ice).</p>
<p>States of Matter</p> <ul style="list-style-type: none"> • Liquids <ul style="list-style-type: none"> – Words to describe liquids include bubbly, colorless, flow, foams, pour, shake, surface, translucent, and viscous – Properties <ul style="list-style-type: none"> • No definite shape, but definite volume • Liquids pour and flow • Liquids take the shape of their container • Surface of liquid is level with respect to the floor 	<p>Physical Science, Physical States and Changes Describe basic characteristics and properties of liquids</p>	<p>MI.P.PM.01.22 Demonstrate that water as a liquid takes on the shape of various containers.</p>
<p>Physical Changes</p> <ul style="list-style-type: none"> • Bending, breaking, twisting, cutting, etc. • Phase changes (melting, flowing freezing) • Not all materials respond the same way to what is done to them <ul style="list-style-type: none"> – Some materials bend without breaking, some can be twisted and others crack, etc. 	<p>Physical Science, Physical States and Changes Explain how different materials react to change (e.g. in temperature, pressure, forces)</p>	<p>There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.</p>

<ul style="list-style-type: none"> Everything melts and freezes but at different temperatures. Ex. Rock turns to lava, ice to water, but the sun won't melt a rock 		
<p>Mixtures</p> <ul style="list-style-type: none"> Liquid and liquid, liquid and solid, solid and solid (e.g. oil and water, salt and water, sand and water, iron filings and sand) Separation Techniques <ul style="list-style-type: none"> Magnets, filters, evaporation Dissolving tests (types of solids, and conditions under which they will dissolve in water) e.g. milk, baking soda, corn syrup, cooking oil, liquid detergent, powdered drink mix, sugar, salt, chalk, cookies, raisins, candy, rice, beans, sand, oil, soil 	<p>Physical Science, Mixtures and Solutions Describe how mixtures can be created and separated using various tools</p>	<p>MI.P.PM.02.41 Recognize that some objects are composed of a single substance (water, sugar, salt) and others are composed of more than one substance (salt and pepper, mixed dry beans).</p>
	<p>Physical Science, Mixtures and Solutions Describe characteristics of solutions</p>	<p>There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.</p>
<p>The following objectives are process skills. As you teach the content objectives above, include opportunities for students to practice the following science skills.</p>		
	<p>The Nature of Science, Scientific Inquiry- Data Collection and Analysis Make measurements of length, weight, temperature, capacity and volume using standard and nonstandard units and appropriate instruments</p>	<p>MI.P.PM.02.13 Measure the length of objects using rulers (centimeters) and meter sticks (meters) .</p> <p>MI.P.PM.02.14 Measure the volume of liquids using common measuring tools (measuring cups, measuring spoons).</p> <p>MI.P.PM.02.15 Compare the weight of objects using balances.</p> <p>S.IP.02.15 Make accurate measurements with appropriate units (meter, centimeter) for the measurement tool.</p>

NHA Science Exemplar: Physical Science

The student will investigate the laws of the physical world that form our understanding of phenomena such as the motion of objects, the characteristics of matter, and the various forms of energy applicable to our lives.

Grade Two

UNIT: Motion and Forces (Foss Learning Kit: Balance and Motion)

NHA Science Content	NHA Objectives	MI GLCE
Balance <ul style="list-style-type: none"> Stability or instability of objects and the relationship to forces acting on the object <ul style="list-style-type: none"> Equilibrium 	Physical Science, Forces Effect on Motion Describe balance as a function of position and weight/counterweight	There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.
Forces Affect Motion <ul style="list-style-type: none"> Isaac Newton's 1st Law of Motion <ul style="list-style-type: none"> An object at rest will remain at rest and an object in motion will remain in motion, in a straight line, unless a force acts on them This means that anytime an object starts moving or stops moving or moves in any way other than a straight line, there is a force causing that change in motion Forces <ul style="list-style-type: none"> Pushes and pulls on objects (e.g. by anything in visible contact with an object as well as wind, earthquakes or other natural forces) 	Physical Science, Forces Effect on Motion Describe the effects that pushing or pulling have on the motion of objects	MI.P.FM.00.31 Demonstrate pushes and pulls. MI.P.FM.00.32 Observe that objects initially at rest will move in the direction of the push or pull. MI.P.FM.00.33 Observe how pushes and pulls can change the speed or direction of moving objects
<ul style="list-style-type: none"> Forces <ul style="list-style-type: none"> Gravity pulls on objects: objects near the Earth fall to the ground unless something holds them up 	Physical Science, Forces Effect on Motion Describe the observable effects of gravity on objects	MI.P.FM.00.21 Observe how objects fall toward the earth.
<ul style="list-style-type: none"> Position of an object relative to another object or background <ul style="list-style-type: none"> Over/under In/out Above/below Left/right 	Physical Science, Measuring Motion Describe the position of an object relative to another object or background	MI.P.FM.00.11 Compare the position of an object (for example: above, below, in front of, behind, on) in relation to other objects around it. MI.P.FM.00.12 Describe the motion of an object (for example: away from or closer to) from different observers' views.

<ul style="list-style-type: none"> • Motion of an object <ul style="list-style-type: none"> – Moving, stopped, straight, zigzag, vibrate, spin, rotate, curved, circular, back-and-forth/vibrating, fast, slow, speeding up, slowing down 	Physical Science, Measuring Motion Compare and contrast the motion of different objects	MI.P.FM.00.34 Observe how shape (for example: cone, cylinder, sphere), size, and weight of an object can affect motion.
Simple Machines <ul style="list-style-type: none"> • Inclined plane <ul style="list-style-type: none"> – E.g. stairs • Screw • Lever • Pulley • Wheel and axle • Gears • Inclined plane • Wedge • Screw 	Physical Science, Simple Machines Describe simple machines and their purpose	There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.
The following objectives are process skills. As you teach the content objectives above, include opportunities for students to practice the following science skills.		
Scientists learn about things by observing those things carefully	The Nature of Science, Scientific Inquiry- The Scientific Method Make observations related to the 5 senses about living things, nonliving objects, and events	S.IP.02.11 Make purposeful observation of the natural world using the appropriate senses. S.IP.02.12 Generate questions based on observations.
Scientists learn about things by observing those things carefully but sometimes they can learn more by doing something to the things and observing what happens.	The Nature of Science, Scientific Inquiry- The Scientific Method Plan simple investigations as a strategy for evaluating predictions based on questions developed from observations of the natural world	S.IP.02.13 Plan and conduct simple investigations. S.IP.02.12 Generate questions based on observations. The following objectives are process skills. As you teach the content objectives above, include opportunities for students to practice the following science skills.

Scientists learn about things by observing those things carefully	The Nature of Science, Scientific Inquiry- The Scientific Method Make observations related to the 5 senses about living things, nonliving objects, and events	S.IP.02.11 Make purposeful observation of the natural world using the appropriate senses. S.IP.02.12 Generate questions based on observations.
Scientists learn about things by observing those things carefully but sometimes they can learn more by doing something to the things and observing what happens.	The Nature of Science, Scientific Inquiry- The Scientific Method Plan simple investigations as a strategy for evaluating predictions based on questions developed from observations of the natural world	S.IP.02.13 Plan and conduct simple investigations. S.IP.02.12 Generate questions based on observations. S.IA.02.14 Develop strategies and skills for information gathering and problem solving (books, internet, ask an expert, observation, investigation, technology tools).
Because the universe is consistent, when a science investigation is done the same way multiple times, one can expect to get very similar results each time it is performed.	The Nature of Science, Scientific Knowledge Describe the consistency of the results of an experiment conducted multiple times	S.RS.02.13 Recognize that when a science investigation is done the way it was done before, similar results are expected.
People are more likely to believe your ideas if you can back them up with reason or evidence.	The Nature of Science, Scientific Knowledge Communicate a scientific idea using evidence	S.IA.02.12 Share ideas about science through purposeful conversation. S.IA.02.13 Communicate and present findings of observations. S.RS.02.15 Use evidence when communicating scientific ideas.
Describing things accurately is important in science because it enables people to compare their observations with those of others.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Record and communicate findings from observations using a variety of methods such as drawings, journaling, pictographs, and bar graphs	S.IP.02.16 Construct simple charts and graphs from data and observations. S.RS.02.11 Demonstrate scientific concepts through various illustrations, performances, models, exhibits, and activities.

NHA Science Exemplar: Earth and Space Science

The student will participate in the study of the physical characteristics of our Earth and the evidence of those characteristics all around us. Topics include: rocks and minerals; the properties and movement of water on the earth; the relationship between land, air, and water; and the motion of Earth in space.

Grade Two

UNIT: The Water Cycle

NHA Science Content	NHA Objectives	MI GLCE
Precipitation <ul style="list-style-type: none"> Falls from the sky Water takes the form of ice, snow, rainwater, sleet, hail 	Earth and Space Science, Water on Earth Analyze precipitation such as snow, ice, rain, hail, and sleet as forms of water resulting from different conditions	MI.E.FE.02.13 Describe the properties of water as a liquid (visible, flowing, shape of container and recognize rain, dew, and fog as water in its liquid state. MI.E.FE.02.14 Describe the properties of water as a solid (hard, visible, frozen, cold) and recognize ice, snow, and hail as water in its solid state.
Groundwater <ul style="list-style-type: none"> Water poured onto sand or soil disappears unless the ground is saturated Water poured on rocks or concrete runs off if there is a slope, or puddles 	Earth and Space Science, Water on Earth Compare and contrast the effect that surface type has on whether water seeps into the surface, runs off, or puddles	MI.E.FE.02.21 Describe how rain collects on the surface of the Earth and flows downhill into bodies of water (streams, rivers, lakes, oceans) or into the ground.
Evaporation <ul style="list-style-type: none"> Water in an uncovered cup disappears 	Earth and Space Science, Water on Earth Describe the effect of evaporation	There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.
Water on Earth <ul style="list-style-type: none"> Water exists naturally as a solid and liquid (and gas, but not to be analyzed at this level) on Earth in the forms of glaciers, ice caps, lakes, rivers, oceans, and groundwater 	Earth and Space Science, Water on Earth Describe the locations of solid and liquid water on Earth	MI.E.FE.02.11 Identify water sources (wells, springs, lakes, rivers, oceans). MI.E.FE.02.22 Describe the major bodies of water on the Earth's surface (lakes, ponds, oceans, rivers, streams).
Water on Earth <ul style="list-style-type: none"> Water changes from one form to another with the influence of heat energy <ul style="list-style-type: none"> Amount of water doesn't necessarily change during phase change 	Earth and Space Science, Water on Earth Investigate and explain the changes in state from solid to liquid made by water and the conditions necessary for these changes	There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.

	There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.	Earth and Space Science, Water on Earth MI.E.FE.02.12 Identify household uses of water (drinking, cleaning, food preparation).
The following objectives are process skills. As you teach the content objectives above, include opportunities for students to practice the following science skills.		
Scientists learn about things by observing those things carefully	The Nature of Science, Scientific Inquiry- The Scientific Method Make observations related to the 5 senses about living things, nonliving objects, and events	S.IP.02.11 Make purposeful observation of the natural world using the appropriate senses. S.IP.02.12 Generate questions based on observations.
Scientists learn about things by observing those things carefully but sometimes they can learn more by doing something to the things and observing what happens.	The Nature of Science, Scientific Inquiry- The Scientific Method Plan simple investigations as a strategy for evaluating predictions based on questions developed from observations of the natural world	S.IP.02.13 Plan and conduct simple investigations. S.IP.02.12 Generate questions based on observations. NHA Science Exemplar: The Nature of Science

The student will study and apply the strategies and practices of scientists having to do with scientific knowledge and inquiry. They will learn to develop hypotheses and make predictions while they create scientific investigations to test their theories.

Grade Three

UNIT: Introduction to Science

NHA Science Content	NHA Objectives	MI GLCE
Scientific investigations generally work the same way regardless of time, place, or experimenter so when an investigation is repeated a similar result is expected. However, similar scientific investigations seldom produce exactly the same results, which may differ due to differences in whatever is being investigated, differences in the methods or circumstances of the investigation, or observational ambiguity. It is not always easy to tell which but because we expect science investigations that are done the same way to produce the same results, when they do not, it is important to try to figure out why.	The Nature of Science, Scientific Knowledge Compare the results of similar experiments and determine reasons for any inconsistencies	MI.S.IA.03.12 Share ideas about science through purposeful conversation in collaborative groups. MI.S.IA.03.15 Compare and contrast sets of data from multiple trials of a science investigation to explain reasons for differences.
Scientists' explanations about what happens in the world come partly from what they observe (evidence) and partly from how they interpret (inference) their observations. Sometimes scientists have different explanations for the same set of observations which usually leads to their making more observations to resolve the differences.	The Nature of Science, Scientific Knowledge Differentiate between observation and inference in scientific explanations	MI.S.IP.03.11 Make purposeful observation of the natural world using the appropriate senses.

Scientists seek better reasons for believing something than "Everyone knows that..." or "I just know" and discount such reasons when given by others. Scientists do not pay much attention to claims about how something they know about works unless the claims are backed up with evidence that can be confirmed, along with a logical argument.	The Nature of Science, Scientific Knowledge Construct reasonable explanations supported by facts found in books or evidence from observations and/or investigations	MI.S.IA.03.11 Summarize information from charts and graphs to answer scientific questions. MI.S.RS.03.15 Use evidence when communicating scientific ideas. MI.S.IA.03.13 Communicate and present findings of observations and investigations. MI.S.IA.03.12 Share ideas about science through purposeful conversation in collaborative groups. MI.S.RS.03.14 Use data/samples as evidence to separate fact from opinion.
Scientists learn about things by observing those things carefully but sometimes they can learn more by doing something to the things and observing what happens	The Nature of Science, Scientific Inquiry- The Scientific Method Plan and conduct simple investigations (e.g., formulate a testable question, plan a fair test, make systematic observations, and develop logical conclusions)	MI.S.IP.03.12 Generate questions based on observations. MI.S.IP.03.13 Plan and conduct simple and fair investigations. MI.S.IA.03.12 Share ideas about science through purposeful conversation in collaborative groups. MI.S.IA.03.14 Develop research strategies and skills for information gathering and problem solving.
Simple tools aid observation and data collection and may include a hand lens, balance, ruler, meter stick, measuring cup, thermometer, spring scale, stop watch/timer, graduated cylinder/beakers.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Safely use appropriate tools and simple equipment to gather scientific data and extend the senses	MI.S.IP.03.14 Manipulate simple tools that aid observation and data collection (for example: hand lens, balance, ruler, meter stick, measuring cup, thermometer, spring scale, stop watch/timer).
It is imperative in science to make accurate measurements.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Make accurate measurements with appropriate units (centimeters, meters, Celsius, Fahrenheit, grams, seconds, minutes)	MI.S.IP.03.15 Make accurate measurements with appropriate units (centimeters, meters, Celsius, grams, seconds, minutes) for the measurement tool.
Clear communication is an essential part of doing science since it enables scientists to inform others about their work, to expose their ideas and experiments to evaluation and retesting by other scientists, and to allow scientists to stay informed about scientific discoveries around the world.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Communicate the results of investigations and describe the investigations in ways that enable others to repeat them	MI.S.IA.03.13 Communicate and present findings of observations and investigations.

Geometric figures, number sequences, graphs, diagrams, sketches, number lines, maps, and oral and written descriptions can be used to represent objects, events, and processes in the real world. Graphical displays of numbers may make it possible to spot patterns that are not otherwise obvious, such as comparative size and trends.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Organize, display and interpret data from observations and investigations in simple bar graphs, line plots, line graphs, and/or stem-and-leaf plots	MI.S.IP.03.16 Construct simple charts and graphs from data and observations. MI.S.IA.03.12 Share ideas about science through purposeful conversation in collaborative groups. MI.S.IA.03.13 Communicate and present findings of observations and investigations.
Science is an adventure that people everywhere can take part in, as they have for many centuries. Doing science involves many different kinds of work and engages men and women of all ages and backgrounds.	The Nature of Science, Scientific Enterprise- Science and Society Identify scientists of various groups (i.e. gender, country of origin, socioeconomic status, age) and their contributions	MI.S.RS.03.19 Describe how people have contributed to science throughout history and across cultures.
In something that consists of many parts, the parts usually influence one another. Something may not work well (or at all) if a part of it is missing, broken, worn out, mismatched, or misconnected.	The Nature of Science, Common Themes in Science Describe how the parts of a system work together	There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.
Some features of things may stay the same even when other features change. Things change in steady, repetitive, or erratic ways—or sometimes in more than one way at the same time. Often the best way to tell which kinds of change are happening is to make a table or graph of measurements. Some things, such as a person's age, change in only one direction and other things in nature have a repeating pattern. The number of objects in a group can stay the same even as some enter or leave, as long as each one that leaves is replaced by another one that is entering.	The Nature of Science, Common Themes in Science Identify and measure things that change and describe the different ways they change	MI.S.IP.03.15 Make accurate measurements with appropriate units (centimeters, meters, Celsius, grams, seconds, minutes) for the measurement tool.
Models (e.g., physical, conceptual, mathematical models, computer simulations) are very useful for communicating ideas and predicting changes in objects, events, and processes. When using a model to communicate about something, it is important to keep in mind how it is different from the thing being modeled	The Nature of Science, Common Themes in Science Explain the role of models in studying objects, events, and processes	MI.S.IA.03.12 Share ideas about science through purposeful conversation in collaborative groups. MI.S.RS.03.11 Demonstrate scientific concepts through various illustrations, performances, models, exhibits, and activities.
Finding the largest and the smallest values of something is often as informative as knowing what the usual value is.	The Nature of Science, Common Themes in Science Identify objects that are at the extremes in sizes, weights, ages, and speeds	There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.

NHA Science Exemplar: The Living Environment

The student will explore the common themes that intertwine and connect all aspects of living things, such as the similarities of plants and animals, structure and functions of body parts, adaptations to new environments, and coexistence of animals in a variety of ecosystems.

Grade Three

UNIT: Classification

NHA Science Content	NHA Objectives	MI GLCE
<p>Different ways in which living things can be grouped</p> <ul style="list-style-type: none"> Plants/animals <ul style="list-style-type: none"> Flowering/non flowering plants Bones/no bones <ul style="list-style-type: none"> Endoskeleton/exoskeleton Land animal/water animal 	<p>The Living Environment, Classification Classify organisms based on physical and environmental characteristics</p>	<p>MI.L.OL.03.42 Classify animals on the basis of observable physical characteristics (backbone, body coverings, limbs).</p>

NHA Science Exemplar: Physical Science

The student will investigate the laws of the physical world that form our understanding of phenomena such as the motion of objects, the characteristics of matter, and the various forms of energy applicable to our lives.

Grade Three

UNIT: Light

NHA Science Content	NHA Objectives	MI GLCE
<p>Visible Light</p> <ul style="list-style-type: none"> Shadows <ul style="list-style-type: none"> Light travels in a straight line until it strikes an object Producing vs. not producing light Interaction with matter <ul style="list-style-type: none"> Transparent, translucent, opaque objects Refraction and reflection 	<p>Physical Science, Light Describe the refraction, reflection, transmission, and/or absorption of light as it interacts with objects that are transparent, translucent, and opaque</p>	<p>MI.P.EN.03.21 Demonstrate that light travels in a straight path and that shadows are made by placing an object in a path of light MI.P.EN.03.22 Observe what happens to light when it travels from air to water (a straw half in the water and half in the air looks bent). MI.P.PM.03.52 Explain how we need light to see objects: light from a source reflects off objects and enters our eyes. P.PM.03.51 Demonstrate how some materials are heated more than others by light that shines on them.</p>
<p>Visible Light</p> <ul style="list-style-type: none"> Light and color <ul style="list-style-type: none"> Prisms/diffraction gratings ROYGBIV 	<p>Physical Science, Light Describe the visible spectrum of light</p>	<p>There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.</p>
<p>The following objectives are process skills. As you teach the content objectives above, include opportunities for students to practice the following science skills.</p>		
<p>Science is an adventure that people everywhere can take part in, as they have for many centuries. Doing science involves many different kinds of work and engages men and women of all ages and backgrounds.</p>	<p>The Nature of Science, Scientific Enterprise-Science and Society Identify scientists of various groups (i.e. gender, country of origin, socioeconomic status, age) and their contributions</p>	<p>MI.S.RS.03.19 Describe how people have contributed to science throughout history and across cultures.</p>

NHA Science Exemplar: Physical Science

The student will investigate the laws of the physical world that form our understanding of phenomena such as the motion of objects, the characteristics of matter, and the various forms of energy applicable to our lives.

Grade Three

UNIT: Motion and Forces

NHA Science Content	NHA Objectives	MI GLCE
Describing and Graphing Motion <ul style="list-style-type: none"> Direction of motion Describing change in motion Change direction, speeding up, slowing down	Physical Science, Measuring Motion Describe the position and change in position (motion) of an object in comparison to a reference point	MI.P.FM.03.41 Describe the motion of objects in terms of direction. MI.P.FM.03.42 Identify changes in motion (change direction, speeding up, slowing down).
Describing and Graphing Motion <ul style="list-style-type: none"> Speed, time, distance Objects move at different rates, some very slowly and some too quickly to see	Physical Science, Measuring Motion Calculate the speed of objects based on the distance traveled divided by the time it took to travel the distance	MI.P.FM.03.43 Relate the speed of an object to the distance it travels in a standard amount of time.
Forces <ul style="list-style-type: none"> Looking at forces on an object <ul style="list-style-type: none"> Examples of forces at this level- the pushes and pulls by any object, pushes and pulls by magnets and electrically charged objects such as a balloon with static charge, gravity, forces of nature such as wind, etc. 	Physical Science, Forces Effect on Motion Analyze changing motion of objects and identify forces acting on the object to cause change in motion	MI.P.FM.03.22 Identify the force that pulls objects towards the Earth. MI.P.FM.03.35 Describe how a push or a pull is a force.
Relationship between Force and Motion <ul style="list-style-type: none"> Isaac Newton's 1st Law of Motion <ul style="list-style-type: none"> How forces cause change in motion (speeding up, slowing down, changing direction) Unbalanced forces cause change in motion- an object can have multiple forces acting on it and not change its motion because the forces are balanced Isaac Newton's 2nd Law of Motion <ul style="list-style-type: none"> How the size of a force and mass of an object affect what kind of change in motion there will be 	Physical Science, Forces Effect on Motion Explain how the change in motion of an object is related to the strength of the force acting upon the object and to the mass of the object	MI.P.FM.03.36 Relate a change in motion of an object to the force that caused the change of motion. MI.P.FM.03.37 Demonstrate how the change in motion of an object is related to the strength of the force acting upon the object and to the mass of the object. MI.P.FM.03.38 Demonstrate when an object does not move in response to a force, it is because another force is acting on it.

The following objectives are process skills. As you teach the content objectives above, include opportunities for students to practice the following science skills.

Some features of things may stay the same even when other features change. Things change in steady, repetitive, or erratic ways—or sometimes in more than one way at the same time. Often the best way to tell which kinds of change are happening is to make a table or graph of measurements. Some things, such as a person's age, change in only one direction and other things in nature have a repeating pattern. The number of objects in a group can stay the same even as some enter or leave, as long as each one that leaves is replaced by another one that is entering.	The Nature of Science, Common Themes in Science Identify and measure things that change and describe the different ways they change	MI.S.IP.03.15 Make accurate measurements with appropriate units (centimeters, meters, Celsius, grams, seconds, minutes) for the measurement tool.
It is imperative in science to make accurate measurements.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Make accurate measurements with appropriate units (centimeters, meters, Celsius, Fahrenheit, grams, seconds, minutes)	MI.S.IP.03.15 Make accurate measurements with appropriate units (centimeters, meters, Celsius, grams, seconds, minutes) for the measurement tool.
Clear communication is an essential part of doing science since it enables scientists to inform others about their work, to expose their ideas and experiments to evaluation and retesting by other scientists, and to allow scientists to stay informed about scientific discoveries around the world.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Communicate the results of investigations and describe the investigations in ways that enable others to repeat them	MI.S.IA.03.13 Communicate and present findings of observations and investigations.
Scientists learn about things by observing those things carefully but sometimes they can learn more by doing something to the things and observing what happens.	The Nature of Science, Scientific Inquiry- The Scientific Method Plan and conduct simple investigations (e.g., formulate a testable question, plan a fair test, make systematic observations, and develop logical conclusions)	MI.S.IP.03.12 Generate questions based on observations. MI.S.IP.03.13 Plan and conduct simple and fair investigations. MI.S.IA.03.12 Share ideas about science through purposeful conversation in collaborative groups. MI.S.IA.03.14 Develop research strategies and skills for information gathering and problem solving.

Geometric figures, number sequences, graphs, diagrams, sketches, number lines, maps, and oral and written descriptions can be used to represent objects, events, and processes in the real world. Graphical displays of numbers may make it possible to spot patterns that are not otherwise obvious, such as comparative size and trends.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Organize, display and interpret data from observations and investigations in simple bar graphs, line plots, line graphs, and/or stem-and-leaf plots	MI.S.IP.03.16 Construct simple charts and graphs from data and observations. MI.S.IA.03.12 Share ideas about science through purposeful conversation in collaborative groups. MI.S.IA.03.13 Communicate and present findings of observations and investigations.
Scientific investigations generally work the same way regardless of time, place, or experimenter so when an investigation is repeated a similar result is expected. However, similar scientific investigations seldom produce exactly the same results, which may differ due to differences in whatever is being investigated, differences in the methods or circumstances of the investigation, or observational ambiguity. It is not always easy to tell which but because we expect science investigations that are done the same way to produce the same results, when they do not, it is important to try to figure out why.	The Nature of Science, Scientific Knowledge Compare the results of similar experiments and determine reasons for any inconsistencies	MI.S.IA.03.12 Share ideas about science through purposeful conversation in collaborative groups. MI.S.IA.03.15 Compare and contrast sets of data from multiple trials of a science investigation to explain reasons for differences.
Scientists seek better reasons for believing something than "Everyone knows that..." or "I just know" and discount such reasons when given by others. Scientists do not pay much attention to claims about how something they know about works unless the claims are backed up with evidence that can be confirmed, along with a logical argument.	The Nature of Science, Scientific Knowledge Construct reasonable explanations supported by facts found in books or evidence from observations and/or investigations	MI.S.IA.03.11 Summarize information from charts and graphs to answer scientific questions. MI.S.RS.03.15 Use evidence when communicating scientific ideas. MI.S.IA.03.13 Communicate and present findings of observations and investigations. MI.S.IA.03.12 Share ideas about science through purposeful conversation in collaborative groups. MI.S.RS.03.14 Use data/samples as evidence to separate fact from opinion.

NHA Exemplar: Earth and Space Science

The student will participate in the study of the physical characteristics of our Earth and the evidence of those characteristics all around us. Topics include: rocks and minerals; the properties and movement of water on the earth; the relationship between land, air, and water; and the motion of Earth in space.

Grade Three

UNIT: Rocks and Minerals (Foss Learning Kit: Earth Materials)

NHA Science Content	NHA Objectives	MI GLCE
Earth Materials <ul style="list-style-type: none"> Differentiating between mineral, rock, clay, boulder, gravel, sand, soil 	Earth and Space Science, Earth Materials and Responsible Use Compare and contrast types of earth materials	MI.E.SE.03.13 Recognize and describe different types of Earth materials (mineral, rock, clay, boulder, gravel, sand, soil, water, and air)
Minerals <ul style="list-style-type: none"> Commonly seen minerals- quartz, feldspar, hornblende, mica, halite, fluoride, pyrite (fool's gold) Basic properties of minerals- color, hardness, reaction to acid Relationship to rocks- rocks are composed of different combinations of minerals 	Earth and Space Science, Earth Materials and Responsible Use Describe properties used to identify minerals and determine the mineral makeup of rocks	MI.E.SE.03.14 Recognize that rocks are made up of minerals
Rocks <ul style="list-style-type: none"> Rock identification <ul style="list-style-type: none"> Mineral content and texture comparison (color due to presence of light or dark minerals and size of minerals due to cooling time) Process of formation <ul style="list-style-type: none"> Igneous <ul style="list-style-type: none"> "Fire rock"- rock that is the result of the cooling and hardening of hot liquid magma or lava, either above ground or below Identification and classification by key- granite, gabbro, basalt Sedimentary <ul style="list-style-type: none"> Rock that is formed from the consolidation of sediment over time Identification and classification by key- sandstone, limestone, siltstone, 	Earth and Space Science, Earth Materials and Responsible Use Compare and contrast the observable features and formation processes of igneous, sedimentary, and metamorphic rocks	MI.E.SE.03.13 Recognize and describe different types of Earth materials (mineral, rock, clay, boulder, gravel, sand, soil, water, and air)

<ul style="list-style-type: none"> shale, conglomerate • Metamorphic <ul style="list-style-type: none"> – Preexisting rock that has been physically altered by heat and/or pressure – Identification and classification by key- gneiss, marble, quartzite, slate 		
<p>Rocks</p> <ul style="list-style-type: none"> • Rock identification <ul style="list-style-type: none"> – Mineral content and texture comparison (color due to presence of light or dark minerals and size of minerals due to cooling time) – Process of formation <ul style="list-style-type: none"> • Igneous <ul style="list-style-type: none"> – “Fire rock”- rock that is the result of the cooling and hardening of hot liquid magma or lava, either above ground or below – Identification and classification by key- granite, gabbro, basalt • Sedimentary <ul style="list-style-type: none"> – Rock that is formed from the consolidation of sediment over time – Identification and classification by key- sandstone, limestone, siltstone, shale, conglomerate • Metamorphic <ul style="list-style-type: none"> – Preexisting rock that has been physically altered by heat and/or pressure – Identification and classification by key- gneiss, marble, quartzite, slate 	<p>Earth and Space Science, Earth Materials and Responsible Use Describe the identifying properties of common rock samples</p>	<p>MI.E.SE.03.13 Recognize and describe different types of Earth materials (mineral, rock, clay, boulder, gravel, sand, soil, water, and air)</p>
<p>The following objectives are process skills. As you teach the content objectives above, include opportunities for students to practice the following science skills.</p>
