The number of</p>	<p>The Nature of Science, Common Themes in Science Identify and measure things that change and describe the different ways they change</p>	<p>MI.E.ST.04.24 Explain how the visible shape of the moon follows a predictable cycle which takes approximately one month.</p>

objects in a group can stay the same even as some enter or leave, as long as each one that leaves is replaced by another one that is entering.		
Models (e.g., physical, conceptual, mathematical models, computer simulations) are very useful for communicating ideas and predicting changes in objects, events, and processes. When using a model to communicate about something, it is important to keep in mind how it is different from the thing being modeled	The Nature of Science, Common Themes in Science Explain the role of models in studying objects, events, and processes	MI.E.ST.04.23 Describe the motion of the moon around the Earth.
Science is an adventure that people everywhere can take part in, as they have for many centuries. Doing science involves many different kinds of work and engages men and women of all ages and backgrounds.	The Nature of Science, Scientific Enterprise-Science and Society Identify scientists of various groups (i.e. gender, country of origin, socioeconomic status, age) and their contributions	MI.S.RS.03.19 Describe how people have contributed to science throughout history and across cultures.

NHA Science Exemplar: The Living Environment

The student will explore the common themes that intertwine and connect all aspects of living things, such as the similarities of plants and animals, structure and functions of body parts, adaptations to new environments, and coexistence of animals in a variety of ecosystems.

Grade Three

UNIT: Health

NHA Science Content	Michigan Grade Level Content Expectations
<p>Healthy Body</p> <ul style="list-style-type: none"> • Illness prevention <ul style="list-style-type: none"> – Food choices – Personal Hygiene <ul style="list-style-type: none"> • Strategies to keep the body clean – Sanitation <ul style="list-style-type: none"> • Reducing the spread of germs <p>Healthy Diet</p> <ul style="list-style-type: none"> • Nutritional value of various foods • Healthy eating habits <ul style="list-style-type: none"> – Importance of breakfast – Diet including a variety of foods – Nutritious snacks – Importance of water – Limiting intake of unhealthy foods • Affects of advertising on food choices <p>Healthy Decisions</p> <ul style="list-style-type: none"> • Community health care <ul style="list-style-type: none"> – Public health clinics – Mental health clinics – HMO's • Safety Rules <ul style="list-style-type: none"> – Wearing a seatbelt/helmet, use of a booster seat – Protecting ears from excessive noise – Appropriate clothing/protective sports equipment – Use of sunscreen – Recognizing and avoiding threatening situations • First aid procedures <ul style="list-style-type: none"> – How/when to get help – Minor burns/cuts/ poison • Conflict resolution <ul style="list-style-type: none"> – Positive and negative behaviors 	<p>STRAND 1: Nutrition and Physical Activity</p> <p>Standard 1: Core Concepts</p> <p>1.1 Explain the benefits of healthy eating and being physically active.</p> <p>1.2 Describe the importance of choosing a variety of ways to be physically active.</p> <p>Standard 4: Influences</p> <p>1.3 Explain strategies used to advertise food and beverage products.</p> <p>1.4 Analyze how food advertising impacts eating behaviors related to eating when not hungry.</p> <p>Standard 5: Goal Setting</p> <p>1.5 Describe the elements of a physical activity plan.</p> <p>1.6 Develop a personal plan to be physically active.</p> <p>STRAND 2: Alcohol, Tobacco , and Other Drugs</p> <p>Standard 1: Core Concepts</p> <p>2.1 Describe the short- and long-term effects of alcohol use, including addiction.</p> <p>2.2 Describe the short- and long-term effects of using tobacco, including addiction.</p> <p>Standard 3: Health Behaviors</p> <p>2.3 Describe actions that need to be followed to avoid accidental poisoning by household cleaning and paint products.</p> <p>2.4 Describe actions to take in a poison emergency.</p> <p>2.5 Explain rules for safe use of medicines and household products, including those that can be inhaled.</p> <p>Standard 4: Influences</p> <p>2.6 Explain how family and peers can influence choices about using alcohol and other drugs.</p> <p>2.7 Analyze various strategies used in the media that encourage or discourage tobacco use.</p> <p>Standard 7: Social Skills</p> <p>2.8 Demonstrate verbal and non-verbal ways to refuse alcohol.</p> <p>2.9 Demonstrate verbal and non-verbal ways to refuse tobacco use.</p>

- Non-violent strategies

Healthy Practices

- Major influences on a person's health (both positive and negative aspects)
 - Food choices
 - Exercise
 - Development of a physical activity plan
 - Sleep
 - Activity/ recreation
 - Awareness of personal habits
 - Anything put into your body
 - Drugs
 - Proper use of medication
- Alcohol, tobacco, and other drugs
 - Effects including addiction
 - Effect of media on use
- Effects of family on health
 - Importance of a supportive family
 - Participating in family activities
 - Taking on responsibilities at home

Healthy Minds

- Negative effects of media
 - Television
 - Movies
 - Video games
 - Advertising/magazines
- Stress management for children
- Social interactions
 - Maintaining positive friendships
 - Managing moods and emotions (anger)
 - Communicating care and respect to others
 - Respecting differences
- Peer pressure
 - Strategies to respond
 - How it effects others

STRAND 3: Safety

Standard 1: Core Concepts

3.1 Explain why the back seat is the safest place for young people to ride in a vehicle equipped with air bags.

3.2 Explain how booster seats and safety belts help passengers to stay safe.

3.3 Describe characteristics of safe and unsafe places.

Standard 2: Access Information

3.4 Describe how to access help when feeling threatened.

Standard 3: Health Behaviors

3.5 Describe safe and unsafe behaviors of occupants in vehicles.

3.6 Demonstrate the proper wearing of a safety belt.

3.7 Describe dangerous, destructive, and disturbing situations that need to be reported to an adult.

3.8 Analyze environments to determine whether they are safe places.

Standard 4: Influences

3.9 Analyze how one can influence safety belt and booster seat use of others.

STRAND 4: Social and Emotional Health

Standard 1: Core Concepts

4.1 Explain the benefits of positive friendships.

4.2 Describe the characteristics of positive role models.

4.3 Recognize that each person has unique talents and skills.

Standard 3: Health Behaviors

4.4 Describe ways people help each other.

4.5 Describe a unique talent or skill of oneself and one other person.

4.6 Explain ways to show acceptance of differences.

Standard 4: Influences

4.7 Analyze how friends influence others' behavior and well-being.

Standard 7: Social Skills

4.8 Demonstrate ways to express appreciation.

4.9 Demonstrate strategies for keeping positive friends.

4.10 Demonstrate how to confront annoying behavior.

Standard 8: Advocacy

4.11 Demonstrate the ability to support and respect people with differences.

STRAND 5: Personal Health and Wellness

Standard 1: Core Concepts

5.1 Explain the physical, emotional, and social importance of keeping the body clean.

Standard 3: Health Behaviors

5.2 Describe strategies to keep the body clean.

Standard 5: Goal Setting

	5.3 Develop a plan to keep the body clean.

NHA Science Michigan Alignment
Grade Three

Michigan Grade Level Content Expectations Taught at Another Grade Level

NHA Grade 4

MI.P.EN.03.11 Identify light and sound as forms of energy. (Energy Unit)

MI.L.EV.03.11 Relate characteristics and functions of observable parts in a variety of plants that allow them to live in their environment (for example: leaf shape, thorns, odor, color). (Plant Unit)

MI.L.OL.03.31 Describe the function of the following plant parts: flower, stem, root and leaf. (Plant Unit)

MI.L.OL.03.41 Classify plants on the basis of observable physical characteristics (roots, leaves, stems, and flowers). (Plant Unit)

MI.E.ES.03.52 Describe helpful or harmful effects of humans on the environment (garbage, habitat destruction, land management, renewable and non-renewable resources). (Ecosystems Unit)

MI.L.OL.03.32 Identify and compare structures in animals used for controlling body temperature, support, movement, food-getting, and protection (for example: fur, wings, teeth, scales). (Animal Adaptations Unit)

MI.L.EV.03.12 Relate characteristics and functions of observable body parts to the ability of animals to live in their environment (for example: sharp teeth, claws, color, body covers). (Animal Adaptations Unit)

MI.E.SE.03.31 Identify Earth materials used to construct some common objects (bricks, buildings, roads, glass). (Conservation of Natural Resources Unit)

MI.E.SE.03.32 Describe how materials taken from the Earth can be used as fuels for heating and transportation. (Conservation of Natural Resources Unit)

MI.E.ES.03.41 Identify natural resources (metals, fuels, fresh water, fertile soil, and forests). (Conservation of Natural Resources Unit)

MI.E.ES.03.42 Classify renewable (fresh water, fertile soil, forests) and non-renewable (fuels, metals) resources. (Conservation of Natural Resources Unit)

MI.E.ES.03.43 Describe ways humans are protecting, extending, and restoring resources (recycle, reuse, reduce, renewal). (Conservation of Natural Resources Unit)

MI.E.ES.03.44 Recognize that paper, metal, glass, and some plastics can be recycled. (Conservation of Natural Resources Unit)

MI.E.ES.03.51 Describe ways humans are dependent on the natural environment (forests, water, clean air, earth materials) and constructed environments (homes, neighborhoods, shopping malls, factories, and industry). (Conservation of Natural Resources Unit)

NHA Science Exemplar: The Nature of Science

The student will study and apply the strategies and practices of scientists having to do with scientific knowledge and inquiry. They will learn to develop hypotheses and make predictions while they create scientific investigations to test their theories.

Grade Four

UNIT: Introduction to Science

NHA Science Content	NHA Objective	MI GLCE
<p>Scientific investigations generally work the same way regardless of time, place, or experimenter so when an investigation is repeated a similar result is expected. However, similar scientific investigations seldom produce exactly the same results, which may differ due to differences in whatever is being investigated, differences in the methods or circumstances of the investigation, or observational ambiguity. It is not always easy to tell which but because we expect science investigations that are done the same way to produce the same results, when they do not, it is important to try to figure out why.</p>	<p>The Nature of Science, Scientific Knowledge Compare the results of similar experiments and determine reasons for any inconsistencies</p>	<p>MI.S.IA.04.12 Share ideas about science through purposeful conversation in collaborative groups. MI.S.IA.04.15 Compare and contrast sets of data from multiple trials of a science investigation to explain reasons for differences.</p>
<p>Scientists' explanations about what happens in the world come partly from what they observe (evidence) and partly from how they interpret (inference) their observations. Sometimes scientists have different explanations for the same set of observations which usually leads to their making more observations to resolve the differences.</p>	<p>The Nature of Science, Scientific Knowledge Differentiate between observation and inference in scientific explanations</p>	<p>MI.S.IP.04.11 Make purposeful observation of the natural world using the appropriate senses.</p>
<p>Scientists seek better reasons for believing something than "Everyone knows that..." or "I just know" and discount such reasons when given by others. Scientists do not pay much attention to claims about how something they know about works unless the claims are backed up with evidence that can be confirmed, along with a logical argument.</p>	<p>The Nature of Science, Scientific Knowledge Construct reasonable explanations supported by facts found in books or evidence from observations and/or investigations</p>	<p>MI.S.IA.04.14 Develop research strategies and skills for information gathering and problem solving. MI.S.RS.04.14 Use data/samples as evidence to separate fact from opinion. MI.S.RS.04.15 Use evidence when communicating scientific ideas.</p>

Scientists learn about things by observing those things carefully but sometimes they can learn more by doing something to the things and observing what happens. Scientists use different kinds of investigations depending on the questions they are trying to answer. Types of investigations include describing objects, events, and organisms; classifying them; and doing a fair test (experimenting).	The Nature of Science, Scientific Inquiry- The Scientific Method Plan and conduct simple investigations (e.g., formulate a testable question, plan a fair test, make systematic observations, and develop logical conclusions)	MI.S.IP.04.12 Generate questions based on observations. MI.S.IP.04.13 Plan and conduct simple and fair investigations. MI.S.IA.04.12 Share ideas about science through purposeful conversation in collaborative groups.
Simple tools aid observation and data collection and may include a hand lens, balance, ruler, meter stick, measuring cup, thermometer, spring scale, stop watch/timer, graduated cylinder/beakers.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Safely use appropriate tools and simple equipment to gather scientific data and extend the senses	MI.S.IP.04.14 Manipulate simple tools that aid observation and data collection (for example: hand lens, balance, ruler, meter stick, measuring cup, thermometer, spring scale, stop watch/timer, graduated cylinder/beaker).
It is imperative in science to make accurate measurements.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Make accurate measurements with appropriate units (centimeters, meters, Celsius, Fahrenheit, grams, seconds, minutes)	MI.S.IP.04.15 Make accurate measurements with appropriate units (centimeters, meters, Celsius, grams, seconds, minutes) for the measurement tool.
Clear communication is an essential part of doing science since it enables scientists to inform others about their work, to expose their ideas and experiments to evaluation and retesting by other scientists, and to allow scientists to stay informed about scientific discoveries around the world.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Communicate the results of investigations and describe the investigations in ways that enable others to repeat them	MI.S.IA.04.11 Summarize information from charts and graphs to answer scientific questions. MI.S.IA.04.12 Share ideas about science through purposeful conversation in collaborative groups. MI.S.IA.04.13 Communicate and present findings of observations and investigations
Geometric figures, number sequences, graphs, diagrams, sketches, number lines, maps, and oral and written descriptions can be used to represent objects, events, and processes in the real world. Graphical displays of numbers may make it possible to spot patterns that are not otherwise obvious, such as comparative size and trends.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Organize, display and interpret data from observations and investigations in simple bar graphs, line plots, line graphs, and/or stem-and-leaf plots	MI.S.IP.04.16 Construct simple charts and graphs from data and observations

Science is an adventure that people everywhere can take part in, as they have for many centuries. Doing science involves many different kinds of work and engages men and women of all ages and backgrounds.	The Nature of Science, Scientific Enterprise-Science and Society Identify scientists of various groups (i.e. gender, country of origin, socioeconomic status, age) and their contributions	MI.S.RS.04.19 Describe how people have contributed to science throughout history and across cultures.
In something that consists of many parts, the parts usually influence one another. Something may not work well (or at all) if a part of it is missing, broken, worn out, mismatched, or misconnected.	The Nature of Science, Common Themes in Science Describe how the parts of a system work together	There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.
Some features of things may stay the same even when other features change. Things change in steady, repetitive, or erratic ways—or sometimes in more than one way at the same time. Often the best way to tell which kinds of change are happening is to make a table or graph of measurements. Some things, such as a person's age, change in only one direction and other things in nature have a repeating pattern. The number of objects in a group can stay the same even as some enter or leave, as long as each one that leaves is replaced by another one that is entering.	The Nature of Science, Common Themes in Science Identify and measure things that change and describe the different ways they change	There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.
Models (e.g., physical, conceptual, mathematical models, computer simulations) are very useful for communicating ideas and predicting changes in objects, events, and processes. When using a model to communicate about something, it is important to keep in mind how it is different from the thing being modeled.	The Nature of Science, Common Themes in Science Explain the role of models in studying objects, events, and processes	MI.S.RS.04.11 Demonstrate scientific concepts through various illustrations, performances, models, exhibits, and activities.
Finding the largest and the smallest values of something is often as informative as knowing what the usual value is.	The Nature of Science, Common Themes in Science Identify objects that are at the extremes in sizes, weights, ages, and speeds	There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.
	There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.	Engineering and Technology, Technology S.RS.04.16 Identify technology used in everyday life. S.RS.04.17 Identify current problems that may be solved through the use of technology.

NHA Science Exemplar: The Living Environment

The student will explore the common themes that intertwine and connect all aspects of living things, such as the similarities of plants and animals, structure and functions of body parts, adaptations to new environments, and coexistence of animals in a variety of ecosystems.

Grade Four

UNIT: Ecosystems (Delta Learning Kit: Food Chains and Webs)

NHA Science Content	NHA Objectives	MI GLCE
Plant Needs <ul style="list-style-type: none"> - Soil properties (e.g. color, texture, capacity to retain water, ability to support plant growth) - Soil components (e.g. rock fragments, clay, silt, sand, humus) 	Earth and Space Science, Earth Materials and Responsible Use Compare the components and properties of various soil types	There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.
Plant Needs <ul style="list-style-type: none"> • Plant needs are foundational to animal needs because plants begin the food chain • Green plants make their own food (producers) 	The Living Environment, Food Chains and Webs Analyze the role of plants in food chains and webs	MI.L.EC.04.11 Identify organisms as part of a food chain or food web. MI.L.OL.04.15 Determine that plants require air, water, light, and a source of energy and building material for growth and repair.
Food Chains and Webs <ul style="list-style-type: none"> • Some animals eat plants for energy (herbivores/primary consumers) • Some animals eat other animals for energy (carnivores/secondary consumers) • Some animals eat both plants and animals for energy (omnivores) • Some organisms eat the remains of long-dead animals for energy (decomposers) 	The Living Environment, Food Chains and Webs Classify various organisms as producers, herbivores, carnivores, omnivores, or decomposers	MI.L.EC.04.11 Identify organisms as part of a food chain or food web.
Food Chains and Webs <ul style="list-style-type: none"> • Some animals eat plants for energy (herbivores/primary consumers) • Some animals eat other animals for energy (carnivores/secondary consumers) • Some animals eat both plants and animals for 	The Living Environment, Food Chains and Webs Compare and contrast simple food chains and food webs	MI.L.EC.04.11 Identify organisms as part of a food chain or food web.

energy (omnivores) Some organisms eat the remains of long-dead animals for energy (decomposers)		
Animal Needs <ul style="list-style-type: none"> • Food for energy <ul style="list-style-type: none"> - Every living thing needs food to live - Food is the source of growth in plants and animals - Food is the source of an animal's ability to do anything 	The Living Environment, Needs of Organisms Explain the necessity of food for the survival, growth, and repair of animals	MI.L.OL.04.16 Determine that animals require air, water, and a source of energy and building material for growth and repair.
Animal Needs <ul style="list-style-type: none"> • Behavior is dependent on a variety of factors in an environment <ul style="list-style-type: none"> - Kinds and numbers of other organisms present - Availability of food - Abiotic factors such as temperature, light, amount of water, soil composition, etc. • An ecosystem can only support a certain number and certain types of organisms according to their needs 	The Living Environment, Ecosystems Describe components of an ecosystem that have an effect on the behavior and types of organisms in the ecosystem	(There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.)
Populations and Communities <ul style="list-style-type: none"> • Competition <ul style="list-style-type: none"> - Predator/prey relationships • Symbiotic relationships <ul style="list-style-type: none"> - Common species interactions in an ecosystem (e.g. pollination by bees, deer and ticks, etc.) 	The Living Environment, Ecosystems Classify the interaction of organisms in an ecosystem (e.g., predator/prey, beneficial to both organisms, beneficial to one and harmful to another, or beneficial to one and neither harmful nor helpful to another)	There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.
Changes in Ecosystems <ul style="list-style-type: none"> • Natural events <ul style="list-style-type: none"> - E.g. Disease, fire, flood, erosion, drought - Succession 	The Living Environment, Ecosystems Describe changes to an ecosystem from natural causes (e.g., disease, fire, flood, erosion, drought, and succession)	MI.L.EC.04.21 Explain how environmental changes can produce a change in the food web.

<p>Changes in Ecosystems</p> <ul style="list-style-type: none"> • Human activities and technology <ul style="list-style-type: none"> - Use of natural resources - Pollution - Construction - Land development - Mining - Hunting 	<p>The Living Environment, Ecosystems Describe changes to an ecosystem from human causes</p>	<p>MI.E.ES.03.52 Describe helpful or harmful effects of humans on the environment (garbage, habitat destruction, land management, renewable and non-renewable resources).</p>
<p>Changes in Ecosystems</p> <ul style="list-style-type: none"> • Changes caused by animals <ul style="list-style-type: none"> - Animals that use plants and animals for nesting or shelter - Effects of overpopulation and lack of food - Animals that have behaviors with large impact <ul style="list-style-type: none"> • E.g. Beaver ponds , earthworm burrows 	<p>The Living Environment, Ecosystems Describe changes (beneficial, neutral or detrimental) caused by organisms in the ecosystem</p>	<p>MI.L.EC.04.21 Explain how environmental changes can produce a change in the food web.</p>
<p>The following objectives are process skills. As you teach the content objectives above, include opportunities for students to practice the following science skills.</p>		
<p>Science is an adventure that people everywhere can take part in, as they have for many centuries. Doing science involves many different kinds of work and engages men and women of all ages and backgrounds.</p>	<p>The Nature of Science, Scientific Enterprise- Science and Society Identify scientists of various groups (i.e. gender, country of origin, socioeconomic status, age) and their contributions</p>	<p>MI.S.RS.04.19 Describe how people have contributed to science throughout history and across cultures.</p>

Clear communication is an essential part of doing science since it enables scientists to inform others about their work, to expose their ideas and experiments to evaluation and retesting by other scientists, and to allow scientists to stay informed about scientific discoveries around the world.	The Nature of Science, Science Inquiry and Data Collection Communicate the results of investigations and describe the investigations in ways that enable others to repeat them	MI.S.IA.04.11 Summarize information from charts and graphs to answer scientific questions. MI.S.IA.04.12 Share ideas about science through purposeful conversation in collaborative groups. MI.S.IA.04.13 Communicate and present findings of observations and investigations
Scientific investigations generally work the same way regardless of time, place, or experimenter so when an investigation is repeated a similar result is expected. However, similar scientific investigations seldom produce exactly the same results, which may differ due to differences in whatever is being investigated, differences in the methods or circumstances of the investigation, or observational ambiguity. It is not always easy to tell which but because we expect science investigations that are done the same way to produce the same results, when they do not, it is important to try to figure out why.	The Nature of Science, Scientific Knowledge Compare the results of similar experiments and determine reasons for any inconsistencies	MI.S.IA.04.12 Share ideas about science through purposeful conversation in collaborative groups. MI.S.IA.04.15 Compare and contrast sets of data from multiple trials of a science investigation to explain reasons for differences.

<p>Scientists seek better reasons for believing something than "Everyone knows that..." or "I just know" and discount such reasons when given by others. Scientists do not pay much attention to claims about how something they know about works unless the claims are backed up with evidence that can be confirmed, along with a logical argument.</p>	<p>The Nature of Science, Scientific Knowledge Construct reasonable explanations supported by facts found in books or evidence from observations and/or investigations</p>	<p>MI.S.IA.04.14 Develop research strategies and skills for information gathering and problem solving. MI.S.RS.04.14 Use data/samples as evidence to separate fact from opinion. MI.S.RS.04.15 Use evidence when communicating scientific ideas.</p>
---	---	---

NHA Science Exemplar: The Living Environment

The student will explore the common themes that intertwine and connect all aspects of living things, such as the similarities of plants and animals, structure and functions of body parts, adaptations to new environments, and coexistence of animals in a variety of ecosystems.

Grade Four

UNIT: Animal Adaptations

NHA Science Content	NHA Objectives	MI GLCE
<p>Anatomical Structures that Aid in Survival</p> <ul style="list-style-type: none"> • Eyes, nose, ears, tongue, and skin aid animals in sensing surroundings • Claws, shells, spines, feathers, fur, scales, or body color that help meet needs of animals <p>Defenses that Aid in Survival</p> <ul style="list-style-type: none"> • Camouflage <ul style="list-style-type: none"> – Mimicry <ul style="list-style-type: none"> • E.g. moth caterpillar, king snake – Disruptive coloration <ul style="list-style-type: none"> • E.g. tiger, zebra, leopard – Concealing coloration <ul style="list-style-type: none"> • E.g. snowshoe hare, polar bear, chameleon – Disguise <ul style="list-style-type: none"> • E.g. walking stick, treehopper, katydid • Weapons and other defense mechanisms <ul style="list-style-type: none"> – Animals with horns, tusks, sharp teeth, or claws – E.g. skunks, porcupines, toxic frogs, animals that sting, snakes <p>Behaviors that Aid in Survival</p> <ul style="list-style-type: none"> • Influenced by internal cues (e.g. instincts) <ul style="list-style-type: none"> – Salmon swimming upstream – Dormancy – Hibernation – Migration – Staying in herds • Influenced by external cues (e.g. changes in 	<p>The Living Environment, Animal Body Structures and Functions</p> <p>Identify the external structures of a variety of animals from around the world that perform particular functions critical to the survival of the animals</p>	<p>MI.L.OL.03.32 Identify and compare structures in animals used for controlling body temperature, support, movement, food-getting, and protection (for example: fur, wings, teeth, claws).</p>

environment) – Bears foraging in state parks or dumps		
Animal Life Cycles <ul style="list-style-type: none"> • Development of animal from birth to growth, reproduction, death and how it fits with the needs of the animals <ul style="list-style-type: none"> – Butterflies, moths, crickets, ants, meal worms, frogs • Human life cycles <ul style="list-style-type: none"> – Embryo, fetus, newborn, infancy, childhood, adolescence, adulthood, old age 	The Living Environment, Life Cycles of Plants and Animals Explain ways that the stages of an animal's life cycle (including humans) contribute to the survival of the animal	There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.
Animals and their Habitats <ul style="list-style-type: none"> • Desert <ul style="list-style-type: none"> – Animals that are adept at conserving water and maintaining safe body temperatures through avoidance or dissipation of heat (e.g. desert toads, Kangaroo Rats, roadrunner, lizard, tortoise, skunk, fox, owl) • Prairie <ul style="list-style-type: none"> – Animals that burrow, graze, and are camouflaged for grasses (e.g. prairie dogs, rabbits, mice and other rodents) • Rainforest <ul style="list-style-type: none"> – With half of all animals living here, camouflage and defense mechanisms are critical (E.g. poisonous snakes, scorpions and spiders, leopards, anteaters, sloths, and insects) • Deciduous forest <ul style="list-style-type: none"> – Many mammals and birds with fur and feathers to keep warm during winter, or animals that migrate or hibernate (E.g. deer, bear, elk, rodents, bobcats, coyotes, chipmunks and squirrels) • Tundra <ul style="list-style-type: none"> – Animals that are adapted to long cold winters and very little precipitation or hibernate or 	The Living Environment, Plant and Animal Adaptations Identify the adaptive features (e.g. camouflage, behaviors, weapons) of animals native to common habitats around the world	MI.L.EV.03.12 Relate characteristics and functions of observable body parts to the ability of animals to live in their environment (for example: sharp teeth, claws, color, body covers).

<ul style="list-style-type: none"> migrate to escape the harsh conditions (e.g. Arctic wolf, brown bear, Musk Ox, Ptarmigan) Savannah <ul style="list-style-type: none"> Because of the lengthy dry season, animals that migrate or don't need much water and can run fast, fly, or burrow to avoid frequent fires (e.g. elephants, warthogs, gazelles, hyenas, cheetahs, lions) 		
<p>The following objectives are process skills. As you teach the content objectives above, include opportunities for students to practice the following science skills.</p>		
Scientists learn about things by observing those things carefully but sometimes they can learn more by doing something to the things and observing what happens.	The Nature of Science, Scientific Inquiry- The Scientific Method Plan and conduct simple investigations (e.g., formulate a testable question, plan a fair test, make systematic observations, and develop logical conclusions)	MI.S.IP.04.12 Generate questions based on observations. MI.S.IP.04.13 Plan and conduct simple and fair investigations. MI.S.IA.04.12 Share ideas about science through purposeful conversation in collaborative groups.
It is imperative in science to make accurate measurements.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Make accurate measurements with appropriate units (centimeters, meters, Celsius, Fahrenheit, grams, seconds, minutes)	MI.S.IP.04.15 Make accurate measurements with appropriate units (centimeters, meters, Celsius, grams, seconds, minutes) for the measurement tool.
Geometric figures, number sequences, graphs, diagrams, sketches, number lines, maps, and oral and written descriptions can be used to represent objects, events, and processes in the real world. Graphical displays of numbers may make it possible to spot patterns that are not otherwise obvious, such as comparative size and trends.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Organize, display and interpret data from observations and investigations in simple bar graphs, line plots, line graphs, and/or stem-and-leaf plots	MI.S.IP.04.16 Construct simple charts and graphs from data and observations
Clear communication is an essential part of doing science since it enables scientists to inform others about their work, to expose their ideas and experiments to evaluation and retesting by other scientists, and to allow scientists to stay informed about scientific discoveries around the world. NHA Science Exemplar: The Living Environment

The student will explore the common themes that intertwine and connect all aspects of living things, such as the similarities of plants and animals, structure and functions of body parts, adaptations to new environments, and coexistence of animals in a variety of ecosystems.

Grade Four

UNIT: Species over Time

NHA Science Content	NHA Objectives	MI GLCE
<p>Looking at Traits</p> <ul style="list-style-type: none"> • Inherited vs. Acquired Traits <ul style="list-style-type: none"> – Traits inherited from parents (e.g. eye color, ability to roll tongue or wiggle ears, height, shape of nose, eyes, etc., flower color) <p>Traits resulting from the environment (e.g. table manners, # of scars, weight, hair style)</p>	<p>The Living Environment, Genetics and Heredity Differentiate between those traits shared between parents and offspring that are inherited and those that are learned</p>	<p>MI.L.EV.04.21 Identify individual differences (color, leg length, size, wing size, leaf shape) in organisms of the same kind.</p>
	<p>The Living Environment, Plant and Animal Adaptations Identify individual differences in organisms from the same population that could give them an advantage or disadvantage in the competition for resources and reproduction</p>	<p>MI.L.EV.04.21 Identify individual differences (color, leg length, size, wing size, leaf shape) in organisms of the same kind. MI.L.EV.04.22 Identify how variations in physical characteristics of individual organisms give them an advantage for survival and reproduction.</p>
<p>NOTE- As a courtesy to parents who may disagree with the content of this objective, please send a notice home with this information prior to teaching this objective.</p>	<p>The Living Environment, Fossils and Extinction Analyze organisms and environmental conditions of the past using fossil evidence</p>	<p>MI.E.ST.04.31 Explain how fossils provide evidence of the history of the Earth.</p>
<p>Fossils</p> <ul style="list-style-type: none"> • Definition, types, etc. • Relationship to evidence of change in species <ul style="list-style-type: none"> – Provide evidence about the plants and animals and environmental conditions of the past – Used to compare past and present animals 	<p>The Living Environment, Fossils and Extinction Compare fossils with each other and with living organisms to determine similarities and differences</p>	<p>MI.E.ST.04.32 Compare and contrast life forms found in fossils and organisms that exist today.</p>

<p>Extinction of Species</p> <ul style="list-style-type: none"> • Human related causes • Natural events 	<p>The Living Environment, Fossils and Extinction Describe processes that can lead to the extinction of a species</p>	<p>There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.</p>
<p>The following objectives are process skills. As you teach the content objectives above, include opportunities for students to practice the following science skills.</p>		
<p>Science is an adventure that people everywhere can take part in, as they have for many centuries. Doing science involves many different kinds of work and engages men and women of all ages and backgrounds.</p>	<p>The Scientific Environment, Science and Society Identify scientists of various groups (i.e. gender, country of origin, socioeconomic status, age) and their contributions</p>	<p>MI.S.RS.04.19 Describe how people have contributed to science throughout history and across cultures.</p>

NHA Science Exemplar: Physical Science

The student will investigate the laws of the physical world that form our understanding of phenomena such as the motion of objects, the characteristics of matter, and the various forms of energy applicable to our lives.

Grade Four

UNIT: Properties of Materials (Delta Learning Kit: Measuring)

NHA Science Content	NHA Objectives	MI GLCE
<p>It is imperative in science to make accurate measurements.</p> <p>Measurement Tools</p> <ul style="list-style-type: none"> • Length, height, width, distance, area (use of a meter stick, millimeters, centimeter, meters) • Capacity- <ul style="list-style-type: none"> – Nonstandard measurement- cupfuls – Customary measurement- teaspoon, tablespoon, cups, gallons, quarts, pints, fluidounces – Metric measurement- liter, milliliter • Volume- the size of an object, substance, or space • Mass- amount of matter in an object (use of a balance, grams, kilograms) • Weight- amount of attraction between earth and an object (use of a spring scale, pounds or Newtons) • Temperature (use of a thermometer, Fahrenheit or Celsius) 	<p>The Nature of Science, Scientific Inquiry- Data Collection and Analysis</p> <p>Make accurate measurements with appropriate units (centimeters, meters, Celsius, Fahrenheit, grams, seconds, minutes)</p>	<p>MI.P.PM.04.16 Measure the weight (spring scale) and mass (balances in grams or kilograms) of objects.</p> <p>MI.P.PM.04.17 Measure volumes of liquids in milliliters and liters.</p> <p>MI.P.PM.04.18 Demonstrate the use of centimeter cubes poured into a container to estimate the container's capacity.</p> <p>MI.S.IP.04.15 Make accurate measurements with appropriate units (centimeters, meters, Celsius, grams, seconds, minutes) for the measurement tool.</p>

<p>Properties of Objects</p> <ul style="list-style-type: none"> • Color • Texture • Flexibility • Density- amount of matter in the space an object fills <ul style="list-style-type: none"> – Sink or float in water • Magnetism • Melting point/boiling point • Conductivity <ul style="list-style-type: none"> – Heat and/or electrical energy <ul style="list-style-type: none"> • Dense solids are generally the best conductors of heat, gasses the worst • Metals are the best conductors of electrical energy • Technology connection- Materials, whether human made or natural have different levels of conductivity. Materials are often chosen in design and construction based on conductivity <p>Technology connection- the properties of objects are dependent on the materials from which they are made, either human made or natural</p>	<p>Physical Science, Properties of Materials Explain how the material make-up of an object determines some of the properties of the object</p>	<p>MI.P.PM.02.12 Describe objects and substances according to their properties (color, size, shape, texture, hardness, liquid or solid, sinking or floating).</p>
<p>Models (e.g., physical, conceptual, mathematical models, computer simulations) are very useful for communicating ideas and predicting changes in objects, events, and processes. When using a model to communicate about something, it is important to keep in mind how it is different from the thing being modeled.</p>	<p>The Nature of Science, Common Themes in Science Explain the role of models in studying objects, events, and processes</p>	<p>MI.S.RS.04.11 Demonstrate scientific concepts through various illustrations, performances, models, exhibits, and activities.</p>

NHA Science Exemplar: Physical Science

The student will investigate the laws of the physical world that form our understanding of phenomena such as the motion of objects, the characteristics of matter, and the various forms of energy applicable to our lives.

Grade Four

UNIT: States of Matter

NHA Science Content	NHA Objectives	MI GLCE
Solids, Liquids, Gases <ul style="list-style-type: none"> • Solids- definite shape and volume • Liquids- no definite shape but definite volume • Gases do not hold definite shape or volume 	Physical Science, Physical States and Changes Compare and contrast the three states of matter by observable characteristics	MI.P.PM.04.23 Compare and contrast the states (solids, liquids, gases) of matter
	Physical Science, Physical States and Changes Explain the relationship between the temperature of an object and its state	MI.P.CM.04.11 Explain how matter can change from one state (liquid, solid, gas) to another by heating and cooling
Physical Changes of Matter <ul style="list-style-type: none"> • Phase changes of common matter (melting, freezing, evaporation, condensation, sublimation) <ul style="list-style-type: none"> - Temperature and relationship to phase changes <ul style="list-style-type: none"> • Thermometers • Celsius, Fahrenheit • Conservation of mass in physical changes 	Physical Science, Physical States and Changes Describe the unique properties of water (expansion and contraction) as it is heated and cooled	There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.

NHA Science Exemplar: Physical Science

The student will investigate the laws of the physical world that form our understanding of phenomena such as the motion of objects, the characteristics of matter, and the various forms of energy applicable to our lives.

Grade Four

UNIT: Energy

NHA Science Content	NHA Objectives	MI GLCE
<p>S-C-R-E-A-M (+H)</p> <ul style="list-style-type: none"> • Sound energy <ul style="list-style-type: none"> – Vibration through a medium • Chemical energy <ul style="list-style-type: none"> – Molecules and chemical changes release energy • Radiant energy <ul style="list-style-type: none"> – Light waves • Electrical energy • Atomic energy • Mechanical energy <ul style="list-style-type: none"> – Energy of motion- kinetic 	<p>Physical Science, Forms of Energy and Their Interactions Describe forms of energy and provide a real-life example of each</p>	<p>MI.P.EN.03.11 Identify light and sound as forms of energy. MI.P.EN.04.12 Identify heat and electricity as forms of energy.</p>
<p>S-C-R-E-A-M (+H)</p> <ul style="list-style-type: none"> • Heat transfer <ul style="list-style-type: none"> – Things that give off light often give off heat – Heat can move between things that are and aren't touching 	<p>Physical Science, Forms of Energy and Their Interactions Describe how heat spreads from one object or place to another (e.g., conduction, convection, radiation)</p>	<p>MI.P.EN.04.41 Demonstrate how temperature can be increased in a substance by adding energy.</p>
<p>S-C-R-E-A-M (+H)</p> <ul style="list-style-type: none"> • Heat conduction in common materials <ul style="list-style-type: none"> – Equilibrium – Touching something hot to a cold item will heat up the cool item and cool down the hot item – Conductors and insulators 	<p>Physical Science, Forms of Energy and Their Interactions Investigate different materials to determine which are better conductors and which are better insulators of heat</p>	<p>MI.P.PM.04.53 Identify objects that are good conductors or poor conductors of heat and electricity.</p>

<p>Energy Transformations in Common Objects</p> <ul style="list-style-type: none"> E.g., A fan transforms electrical energy to mechanical energy, a toaster transforms electrical energy to heat energy, a T.V. transforms electrical energy to light and sound energy Heat as a Byproduct of Energy Transformations <ul style="list-style-type: none"> Household appliances such as the T.V. Digestion of food Rubbing things together generally produces heat 	<p>Physical Science, Forms of Energy and Their Interactions Describe the transformation of energy from one form to another</p>	<p>MI.P.EN.04.42 Describe heat as the energy produced when substances burn, certain kinds of materials rub against each other, and when electricity flows through wire. MI.P.EN.04.43 Describe how heat is produced through electricity, rubbing, and burning.</p>
<p>The following objectives are process skills. As you teach the content objectives above, include opportunities for students to practice the following science skills.</p>		
<p>Scientists learn about things by observing those things carefully but sometimes they can learn more by doing something to the things and observing what happens.</p>	<p>The Nature of Science, Scientific Inquiry- The Scientific Method Plan and conduct simple investigations (e.g., formulate a testable question, plan a fair test, make systematic observations, and develop logical conclusions)</p>	<p>MI.S.IP.04.12 Generate questions based on observations. MI.S.IP.04.13 Plan and conduct simple and fair investigations. MI.S.IA.04.12 Share ideas about science through purposeful conversation in collaborative groups.</p>
<p>It is imperative in science to make accurate measurements.</p>	<p>The Nature of Science, Scientific Inquiry- Data Collection and Analysis Make accurate measurements with appropriate units (centimeters, meters, Celsius, Fahrenheit, grams, seconds, minutes)</p>	<p>MI.S.IP.04.15 Make accurate measurements with appropriate units (centimeters, meters, Celsius, grams, seconds, minutes) for the measurement tool.</p>
<p>Clear communication is an essential part of doing science since it enables scientists to inform others about their work, to expose their ideas and experiments to evaluation and retesting by other scientists, and to allow scientists to stay informed about scientific discoveries around the world.</p>	<p>The Nature of Science, Scientific Inquiry- Data Collection and Analysis Communicate the results of investigations and describe the investigations in ways that enable others to repeat them</p>	<p>MI.S.IA.04.11 Summarize information from charts and graphs to answer scientific questions. backed up with evidence that can be confirmed, along with a logical argument.		communicating scientific ideas.
	The Nature of Science, Common Themes in Science Explain the role of models in studying objects, events, and processes	MI.S.RS.04.11 Demonstrate scientific concepts through various illustrations, performances, models, exhibits, and activities.

NHA Exemplar: Earth and Space Science

The student will participate in the study of the physical characteristics of our Earth and the evidence of those characteristics all around us. Topics include: rocks and minerals; the properties and movement of water on the earth; the relationship between land, air, and water; and the motion of Earth in space.

Grade Four

UNIT: Conservation of Natural Resources

NHA Science Content	NHA Objectives	MI GLCE
<p>Green Living</p> <ul style="list-style-type: none"> • Uses of Earth materials 	<p>Earth and Space Science, Earth Materials and Responsible Use Classify manufactured products according to the Earth materials from which they are made</p>	<p>MI.E.SE.03.31 Identify Earth materials used to construct some common objects (for example: bricks, buildings, roads, glass). MI.E.SE.03.32 Describe how materials taken from the Earth can be used as fuels for heating and transportation.</p>
<p>Green Living</p> <ul style="list-style-type: none"> • Reduce, Reuse, Recycle • Ways to preserve the environment and delay depletion of natural resources <ul style="list-style-type: none"> - Recycling, energy conservation, water conservation 	<p>Earth and Space Science, Earth Materials and Responsible Use Demonstrate and describe the practices of reducing, reusing and recycling and other conservation measures</p>	<p>MI.E.ES.03.43 Describe ways humans are protecting, extending, and restoring resources (recycle, reuse, reduce, renewal). MI.E.ES.03.44 Recognize that paper, metal, glass, and some plastics can be recycled. MI.E.ES.03.44 Recognize that paper, metal, glass, and some plastics can be recycled.</p>
	<p style="color: red;">There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.</p>	<p>Earth and Space Science, Earth Materials and Responsible Use S.RS.04.18 Describe the effect humans and other organisms have on the balance of the natural world MI.E.ES.03.51 Describe ways humans are dependent on the natural environment (forests, water, clean air, earth materials) and constructed environments (homes, neighborhoods, shopping malls, factories, and industry) MI.E.ES.03.41 Identify natural resources (metals, fuels, fresh water, farmland, and forests) MI.E.ES.03.42 Classify renewable (fresh water, farmland, forests) and non-renewable (fuels, metals) resources</p>

The following objectives are process skills. As you teach the content objectives above, include opportunities for students to practice the following science skills.

Science is an adventure that people everywhere can take part in, as they have for many centuries. Doing science involves many different kinds of work and engages men and women of all ages and backgrounds.

**The Nature of Science, Scientific Enterprise-
Science and Society**
Identify scientists of various groups (i.e. gender, country of origin, socioeconomic status, age) and their contributions

MI.S.RS.04.19 Describe how people have contributed to science throughout history and across cultures.

NHA Science Exemplar: The Living Environment

The student will explore the common themes that intertwine and connect all aspects of living things, such as the similarities of plants and animals, structure and functions of body parts, adaptations to new environments, and coexistence of animals in a variety of ecosystems.

Grade Four

UNIT: Health

NHA Science Content	Michigan Grade Level Content Expectations
<p>Healthy Body</p> <ul style="list-style-type: none"> • The human body <ul style="list-style-type: none"> - Structures and functions • Illness prevention <ul style="list-style-type: none"> - Personal Hygiene - Immunizations - Regular doctor visits - Sanitation <ul style="list-style-type: none"> • Reducing the spread of germs • HIV/AIDS Prevention <ul style="list-style-type: none"> - Transmission of disease <ul style="list-style-type: none"> • Not through touch or close proximity - Strategies for protection <ul style="list-style-type: none"> • Not touching blood or used needles <p>Healthy Diet</p> <ul style="list-style-type: none"> • Healthy eating habits <ul style="list-style-type: none"> - Diet including a variety of foods - Nutritionally balanced meals and snacks - Eating regularly to maintain energy - Media influence on food choices • Food groups <ul style="list-style-type: none"> - Eating moderate portion sizes <ul style="list-style-type: none"> • Portion control with packaged foods or restaurants • Influences on food choices <ul style="list-style-type: none"> - Activity level - Peers/age - Culture/religion <p>Healthy Decisions</p> <ul style="list-style-type: none"> • Health information/products <ul style="list-style-type: none"> - Provided/recommended by health care professionals 	<p>STRAND 1: Nutrition and Physical Activity</p> <p>Standard 1: Core Concepts</p> <p>1.1 Describe the food groups, including recommended portions to eat from each group.</p> <p>1.2 Analyze the relationship of physical activity, rest, and sleep.</p> <p>1.3 Explain why some food groups have a greater number of recommended portions than other food groups.</p> <p>1.4 Associate recommended food portions to the sizes of common items.</p> <p>1.5 Compare the quantity of restaurant or packaged foods to the quantities of food needed to keep the body healthy.</p> <p>Standard 3: Health Behaviors</p> <p>1.6 Assess one's ability to include physical activity, rest, and sleep in one's daily routine.</p> <p>1.7 Describe strategies people use to consume the recommended portions of food to meet their individual nutrient needs.</p> <p>Standard 4: Influences</p> <p>1.8 Analyze examples of food advertising.</p> <p>Standard 5: Goal Setting</p> <p>1.9 Develop a one-day plan for eating the recommended portions of food from each food group.</p> <p>STRAND 2: Alcohol, Tobacco , and Other Drugs</p> <p>Standard 1: Core Concepts</p> <p>2.1 Describe the short- and long-term physical effects of being exposed to tobacco smoke.</p> <p>2.2 Analyze possible reasons why individuals choose to use or to not use alcohol.</p> <p>2.3 Explain the positive outcomes of not using alcohol.</p> <p>Standard 3: Health Behaviors</p> <p>2.4 Demonstrate the ability to avoid exposure to secondhand smoke.</p> <p>Standard 4: Influences</p> <p>2.5 Explain how family and peers can influence decisions about using alcohol</p>

- Community health care facilities
- Safety Rules
 - Car safety
 - Home safety
 - Emergency plans
 - Sports safety
 - Outdoor safety
 - Recognizing and avoiding threatening situations
 - Appropriate vs. inappropriate touch
 - Being home alone
 - Internet safety
- First aid procedures
 - How/when to get help
 - Calling 911
 - Minor injuries
- Conflict resolution
 - Positive and negative behaviors
 - Non-violent strategies

Healthy Practices

- Major influences on a person's health (both positive and negative aspects)
 - Food choices
 - Exercise
 - Sleep
 - Activity/ recreation
 - Awareness of personal habits
 - Anything put into your body
 - Drugs
 - Proper use of medication
- Effects of family on health
 - Physical, psychological, social
 - How health problems impact the entire family
- Safe, risky, and harmful behaviors
 - How they affect self and others
- Alcohol, tobacco, and other drugs
 - Reasons people use or avoid
 - Effects including addiction
 - Second hand smoke
 - Impact of use on relationships
 - Effect of media on use
 - Influence of peer pressure on use

Healthy Minds

and other drugs.
2.6 Explain how decisions about alcohol use will impact relationships with friends and family.
2.7 Analyze various strategies used in the media that encourage and discourage the use of alcohol and tobacco.

Standard 7: Social Skills

2.8 Demonstrate verbal and non-verbal ways to refuse alcohol.

STRAND 3: SAFETY

Standard 1: Core Concepts

3.1 Describe safety hazards, including those related to fire, dangerous objects and weapons, being home alone, and using the Internet.

3.2 Explain the importance of respecting personal space and boundaries.

3.3 Describe the characteristics of appropriate and inappropriate touch.

3.4 Explain that a child is not at fault if someone touches him or her in an inappropriate way.

Standard 2: Access Information

3.5 Demonstrate how to ask a trusted adult for help.

3.6 Demonstrate how to access emergency services, such as calling "911," including what to say when accessing such services.

Standard 3: Health Behaviors

3.7 Apply strategies to prevent fires and burns.

3.8 Develop and practice a home fire escape plan.

3.9 Apply strategies to stay safe and prevent injury when home alone.

3.10 Explain a rule and demonstrate actions to use when dangerous objects or weapons are present.

3.11 Apply strategies to stay safe when using the Internet.

3.12 Apply strategies to avoid personally unsafe situations.

3.13 Demonstrate strategies to get away in cases of inappropriate touching or abduction.

Standard 4: Influences

3.14 Analyze how one influences the safety of others when adult supervision is not present.

STRAND 4: Social and Emotional Health

Standard 1: Core Concepts

4.1 Describe the effect of teasing and bullying on others.

Standard 2: Access Information

4.2 Describe the characteristics of people who can help make decisions and solve problems.

Standard 3: Health Behaviors

4.3 Apply the use of positive self-talk to manage feelings.

4.4 Describe strategies to manage strong feelings, including anger.

<ul style="list-style-type: none"> • Negative effects of media <ul style="list-style-type: none"> - Television - Movies - Video games - Advertising/magazines • Physical vs. mental health • Stress management for children <ul style="list-style-type: none"> - Managing moods and emotions (anger) - Conflict resolution strategies • Social interactions <ul style="list-style-type: none"> - How behaviors affect others <ul style="list-style-type: none"> • Responding to the behavior of others - Listening skills <ul style="list-style-type: none"> • How it affect relationships/friendships • Handling peer pressure <ul style="list-style-type: none"> - Teasing/bullying - Strategies to handle bullying/peer pressure 	<p>Standard 6: Decision Making</p> <p>4.5 Explain the decision making and problem solving steps.</p> <p>4.6 Apply the steps to make a decision or solve a problem, using criteria to evaluate solutions.</p> <p>Standard 7: Social Skills</p> <p>4.7 Describe characteristics and steps of conflict resolution.</p> <p>4.8 Apply the steps of conflict resolution.</p> <p>4.9 Demonstrate non-violent conflict resolution strategies.</p> <p>4.10 Explain what to do if you or someone else is being teased or bullied.</p> <p>4.11 Express intentions to stop bullying as a bystander, perpetrator, or victim.</p> <p>4.12 Demonstrate the ability to confront bullying and teasing.</p> <p>STRAND 5: Personal Health and Wellness</p> <p>Standard 3: Health Behaviors</p> <p>5.1 Demonstrate skills throughout the day to reduce the spread of germs.</p> <p>STRAND 6: HIV Prevention</p> <p>Standard 1: Core Concepts</p> <p>6.1 Define HIV and AIDS.</p> <p>6.2 Explain that it is safe to be a friend of someone who is living with HIV or AIDS.</p> <p>6.3 Explain how HIV is and is not transmitted.</p> <p>Standard 3: Health Behaviors</p> <p>6.4 Describe how people can protect themselves from infection with serious blood-borne communicable diseases, including not touching blood and not touching used needles</p>

NHA Science Exemplar: The Nature of Science

The student will study and apply the strategies and practices of scientists having to do with scientific knowledge and inquiry. They will learn to develop hypotheses and make predictions while they create scientific investigations to test their theories.

Grade Five

UNIT: Introduction to Science (Foss Learning Kit: Variables)

NHA Science Content	NHA Objective	MI GLCE
Scientific investigations generally work the same way regardless of time, place, or experimenter so when an investigation is repeated a similar result is expected. However, similar scientific investigations seldom produce exactly the same results, which may differ due to differences in whatever is being investigated, differences in the methods or circumstances of the investigation, or observational ambiguity. It is not always easy to tell which but because we expect science investigations that are done the same way to produce the same results, when they do not, it is important to try to figure out why.	The Nature of Science, Scientific Knowledge Compare the results of similar experiments and determine reasons for any inconsistencies	S.IA.05.14 Draw conclusions from sets of data from multiple trials of a scientific investigation. S.RS.05.12 Describe limitations in personal and scientific knowledge. S.RS.05.11 Evaluate the strengths and weaknesses of claims, arguments, and data.
Scientists' explanations about what happens in the world come partly from what they observe (evidence) and partly from how they interpret (inference) their observations. Sometimes scientists have different explanations for the same set of observations which usually leads to their making more observations to resolve the differences	The Nature of Science, Scientific Knowledge Differentiate between observation and inference in scientific explanations	There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.

Scientists seek better reasons for believing something than "Everyone knows that..." or "I just know" and discount such reasons when given by others. Scientists do not pay much attention to claims about how something they know about works unless the claims are backed up with evidence that can be confirmed, along with a logical argument.	The Nature of Science, Scientific Knowledge Construct reasonable explanations supported by facts found in books or evidence from observations and/or investigations	S.IA.05.11 Analyze information from data tables and graphs to answer scientific questions. S.IA.05.13 Communicate and defend findings of observations and investigations using evidence. S.IA.05.15 Use multiple sources of information to evaluate strengths and weaknesses of claims, arguments, or data. S.RS.05.13 Identify the need for evidence in making scientific decisions.
Scientists use different kinds of investigations depending on the questions they are trying to answer. Types of investigations include describing objects, events, and organisms; classifying them; and doing a fair test (experimenting).	The Nature of Science, Scientific Inquiry- The Scientific Method Propose and test independent and dependent variables in a controlled experiment	S.IP.05.11 Generate scientific questions based on observations, investigations, and research. S.IP.05.12 Design and conduct scientific investigations.
Simple tools aid observation and data collection and may include a hand lens, balance, ruler, meter stick, measuring cup, thermometer, spring scale, stop watch/timer, graduated cylinder/beakers.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Safely use appropriate tools and simple equipment to gather scientific data and extend the senses	S.IP.05.13 Use tools and equipment (spring scales, stop watches, meter sticks and tapes, models, hand lens) appropriate to scientific investigations. S.IP.05.14 Use metric measurement devices in an investigation.
It is imperative in science to make accurate measurements	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Make accurate measurements with appropriate units (centimeters, meters, Celsius, Fahrenheit, grams, seconds, minutes)	S.IP.05.13 Use tools and equipment (spring scales, stop watches, meter sticks and tapes, models, hand lens) appropriate to scientific investigations S.IP.05.14 Use metric measurement devices in an investigation.
Clear communication is an essential part of doing science since it enables scientists to inform others about their work, to expose their ideas and experiments to evaluation and retesting by other scientists, and to allow scientists to stay informed about scientific discoveries around the world.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Communicate the results of investigations and describe the investigations in ways that enable others to repeat them	S.IA.05.12 Evaluate data, claims, and personal knowledge through collaborative science discourse. S.IA.05.13 Communicate and defend findings of observations and investigations using evidence.
Geometric figures, number sequences, graphs, diagrams, sketches, number lines, maps, and oral and written descriptions can be used to represent objects, events, and processes in the real world. Graphical	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Organize, display and interpret data from observations and investigations in simple bar	S.IP.05.15 Construct charts and graphs from data and observations. S.IP.05.16 Identify patterns in data.

displays of numbers may make it possible to spot patterns that are not otherwise obvious, such as comparative size and trends.	graphs, line plots, line graphs, and/or stem-and-leaf plots	
Science is an adventure that people everywhere can take part in, as they have for many centuries. Doing science involves many different kinds of work and engages men and women of all ages and backgrounds.	The Nature of Science, Scientific Enterprise-Science and Society Identify scientists of various groups (i.e. gender, country of origin, socioeconomic status, age) and their contributions	S.RS.05.19 Describe how science and technology have advanced because of the contributions of many people throughout history and across cultures.
In something that consists of many parts, the parts usually influence one another. Something may not work well (or at all) if a part of it is missing, broken, worn out, mismatched, or misconnected.	The Nature of Science, Common Themes in Science Describe how the parts of a system work together	There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.
Some features of things may stay the same even when other features change. Things change in steady, repetitive, or erratic ways—or sometimes in more than one way at the same time. Often the best way to tell which kinds of change are happening is to make a table or graph of measurements. Some things, such as a person's age, change in only one direction and other things in nature have a repeating pattern. The number of objects in a group can stay the same even as some enter or leave, as long as each one that leaves is replaced by another one that is entering.	The Nature of Science, Common Themes in Science Identify and measure things that change and describe the different ways they change	There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.
Models (e.g., physical, conceptual, mathematical models, computer simulations) are very useful for communicating ideas and predicting changes in objects, events, and processes. When using a model to communicate about something, it is important to keep in mind how it is different from the thing being modeled.	The Nature of Science, Common Themes in Science Explain the role of models in studying objects, events, and processes	S.RS.05.15 Demonstrate scientific concepts through various illustrations, performances, models, exhibits, and activities.
Finding the largest and the smallest values of something is often as informative as knowing what the usual value is.	The Nature of Science, Common Themes in Science Identify objects that are at the extremes in sizes, weights, ages, and speeds	There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.

NHA Science Exemplar: Engineering and Technology

The student will study the strategies and practices used in engineering and technology, as well as the relationship between science and technology. They will apply problem solving skills as they model the steps of design and experiment with materials and tools involved in inventions.

Grade Five

UNIT: Technological Design

NHA Science Content	NHA Objectives	MI GLCE
<p>Engineering Design</p> <ul style="list-style-type: none"> • The nature of inventions and steps in designing a device to fill a need <ul style="list-style-type: none"> - Designers of mechanical systems often draw inspiration from natural systems that serve similar purposes (e.g., a bird's wings as compared to an airplane's) <p>Engineering Design</p> <ul style="list-style-type: none"> • Identifying need <ul style="list-style-type: none"> - Researching problem - Designing solution - Building prototypes 	<p>Engineering and Technology, Engineering</p> <p>Describe examples of mechanical systems that are designed to serve purposes similar to natural systems</p>	<p>MI.S.RS.05.16 Design solutions to problems using technology.</p>

- Used to compare past and present animals		
--	--	--

NHA Science Exemplar: Physical Science

The student will investigate the laws of the physical world that form our understanding of phenomena such as the motion of objects, the characteristics of matter, and the various forms of energy applicable to our lives.

Grade Five

UNIT: Motion and Forces

NHA Science Content	NHA Objectives	MI GLCE
<p>Forces</p> <ul style="list-style-type: none"> • Direct contact <ul style="list-style-type: none"> - Normal - Friction - Pushes and pulls • Non-contact <ul style="list-style-type: none"> - Magnetic force - Electrical force - Gravitational force 	<p>There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.</p>	<p>Physical Science, Forces Effect on Motion P.FM.05.21 Distinguish between contact forces and non-contact forces. P.FM.05.22 Demonstrate contact and non-contact forces to change the motion of an object.</p>
<p>Isaac Newton's 1st and 2nd Laws of Motion</p> <ul style="list-style-type: none"> • 1st Law- Objects at rest remain at rest and objects in motion remain in motion in a straight line unless acted on by an unbalanced/net force <ul style="list-style-type: none"> - If the forces acting on an object are balanced, then there will be no change in motion of that object (it won't speed up, slow down, or change direction) - Direction and magnitude of forces acting on an object - Balanced forces (equilibrium), Unbalanced forces, Net force - A force is NOT needed to keep an object in motion 	<p>There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.</p>	<p>Physical Science, Forces Effect on Motion P.FM.05.31 Describe what happens when two forces act on an object in the same or opposing directions. P.FM.05.32 Describe how constant motion is the result of balanced (zero net) forces P.FM.05.33 Describe how changes in the motion of objects are caused by a non-zero net (unbalanced) force.</p>
<ul style="list-style-type: none"> • 2nd Law- An object's change in motion (change in direction, speeding up or slowing down, starting or stopping) is dependent on the size of the net force acting on it and how much mass the object has <ul style="list-style-type: none"> - $F=ma$ • Real world applications of Newton's Laws 	<p>There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.</p>	<p>Physical Science, Forces Effect on Motion P.FM.05.34 Relate the size of change in motion to the strength of unbalanced forces and the mass of the object.</p>

- Sports, transportation, human body, motion of objects in space, etc.		
<p>Measuring Motion</p> <ul style="list-style-type: none"> • Describing and graphing motion <ul style="list-style-type: none"> - Position and frame of reference - Direction of motion - Speed • Speed = Distance/Time ($S=D/T$), average speed= change in distance/change in time • Velocity- average velocity= displacement/time <ul style="list-style-type: none"> - vectors • Acceleration- average acceleration= change in velocity/time 	<p>There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.</p>	<p>Physical Science, Measuring Motion P.FM.05.34 Relate the size of change in motion to the strength of unbalanced forces and the mass of the object. P.FM.05.41 Explain the motion of an object relative to its point of reference. P.FM.05.42 Describe the motion of an object in terms of distance, time and direction, as the object moves, and in relationship to other objects. P.FM.05.43 Illustrate how motion can be measured and represented on a graph.</p>

NHA Science Exemplar: Physical Science

The student will investigate the laws of the physical world that form our understanding of phenomena such as the motion of objects, the characteristics of matter, and the various forms of energy applicable to our lives.

Grade Five

UNIT: Mixtures and Solutions (Foss Learning Kit: Mixtures and Solutions)

NHA Science Content	NHA Objectives	MI GLCE
Separation Techniques <ul style="list-style-type: none"> • Use of filters, sieves, magnets, evaporation, separation by density • Tools (e.g. funnels, filters, beakers, sieves, magnets, heat sources) 	Physical Science, Mixtures and Solutions Determine the appropriate tools and processes needed to separate various mixtures	Teach this objective if time. Though there aren't 5 th grade GLCE that align, this unit will better prepare students for chemistry studies in 7 th .
Types of Mixtures <ul style="list-style-type: none"> • Homogeneous <ul style="list-style-type: none"> - Solutions <ul style="list-style-type: none"> • Solute and solvent • Dissolving • Saturation <ul style="list-style-type: none"> - Influenced by the kind of material in the solute and the temperature of the solvent 	Physical Science, Mixtures and Solutions Describe factors that influence saturation in a solution	Teach this objective if time. Though there aren't 5 th grade GLCE that align, this unit will better prepare students for chemistry studies in 7 th .
Types of Mixtures <ul style="list-style-type: none"> • Heterogeneous • Homogeneous <ul style="list-style-type: none"> - Solutions <ul style="list-style-type: none"> • Solute and solvent • Dissolving • Concentration 	Physical Science, Mixtures and Solutions Describe the appropriate tools and senses needed to compare and contrast the concentration levels of various solutions	Teach this objective if time. Though there aren't 5 th grade GLCE that align, this unit will better prepare students for chemistry studies in 7 th .
Chemical Reactions in Mixtures <ul style="list-style-type: none"> • Identifying properties of changes that can't be reversed by physical means (i.e. chemical changes) <ul style="list-style-type: none"> - Presence of color change, odor, light or heat emission, and/or gas 	Physical Science, Chemical Changes Classify reactions as chemical or not based on the presence of color change, odor, light or heat emission, and/or gas	Teach this objective if time. Though there aren't 5 th grade GLCE that align, this unit will better prepare students for chemistry studies in 7 th .

NHA Exemplar: Earth and Space Science

The student will participate in the study of the physical characteristics of our Earth and the evidence of those characteristics all around us. Topics include: rocks and minerals; the properties and movement of water on the earth; the relationship between land, air, and water; and the motion of Earth in space.

Grade Five

UNIT: Earth In Space

NHA Science Content	NHA Objectives	MI GLCE
<p>The Solar System</p> <ul style="list-style-type: none"> Sun, moon, and planets (e.g. temperatures, pressure conditions, surface features, gravitational pull, position in the Solar System, atmospheric conditions, actual and apparent motion, and ability to support life) Meteors, asteroids, and comets 	<p>There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.</p>	<p>Earth and Space Science, Characteristics of Objects in Space MI.E.ST.05.11 Design a model of the solar system that shows the relative order and scale of the planets, dwarf planets, comets, and asteroids to the sun.</p>
<p>Earth's Rotation and Revolution</p> <ul style="list-style-type: none"> The plane of the Earth and Sun and Earth's tilt on its axis Latitude and longitude lines and relationship to earth in space <ul style="list-style-type: none"> Tropic of Cancer Tropic of Capricorn 	<p>There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.</p>	<p>Earth and Space Science, Interaction of the Sun, Earth, and Moon MI.E.ST.05.21 Describe the motion of planets and moons in terms of rotation on axis and orbits due to gravity.</p>
	<p>There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.</p>	<p>Earth and Space Science, Interaction of the Sun, Earth, and Moon MI.E.ES.05.61 Demonstrate and explain seasons using a model.</p>
<p>Earth's Rotation and Revolution</p> <ul style="list-style-type: none"> The plane of the Earth and Sun and Earth's tilt on its axis Latitude and longitude lines and relationship to earth in space <ul style="list-style-type: none"> Tropic of Cancer Tropic of Capricorn 	<p>There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.</p>	<p>Earth and Space Science, Interaction of the Sun, Earth, and Moon MI.E.ES.05.62 Explain how the revolution of the Earth around the sun defines a year.</p>
<p>Phases of the Moon</p> <ul style="list-style-type: none"> First quarter, second quarter, new moon, 3rd quarter, full moon 	<p>There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.</p>	<p>Earth and Space Science, Interaction of the Sun, Earth, and Moon MI.E.ST.05.22 Explain the phases of the moon.</p>

<ul style="list-style-type: none"> waxing vs. waning Gibbous vs. crescent 		
Eclipses <ul style="list-style-type: none"> Solar eclipses Lunar eclipses 	There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.	Earth and Space Science, Interaction of the Sun, Earth, and Moon MI.E.ST.05.24 Explain lunar and solar eclipses.
Tides <ul style="list-style-type: none"> Neap and spring tides High and low tides 	There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.	Earth and Space Science, Interaction of the Sun, Earth, and Moon MI.E.ST.05.25 Explain the tides of the oceans as they relate to the gravitational pull and orbit of the moon.
Stars <ul style="list-style-type: none"> Distances and basic properties (e.g. sizes, life cycles) Actual and apparent motion of stars <ul style="list-style-type: none"> Big Dipper around Polaris <ul style="list-style-type: none"> Astrolabes and orienteering using Polaris 	There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.	Earth and Space Science, Characteristics of Objects in Space MI.E.ST.05.23 Explain the apparent motion of the stars (constellations) and the sun across the sky.

NHA Exemplar: Earth and Space Science

The student will participate in the study of the physical characteristics of our Earth and the evidence of those characteristics all around us. Topics include: rocks and minerals; the properties and movement of water on the earth; the relationship between land, air, and water; and the motion of Earth in space.

Grade Five

UNIT: Weather and Water (Delta Learning Kit: Weather Instruments)

NHA Science Content	NHA Objectives	MI GLCE
<p>Weather Measurement and Recording</p> <ul style="list-style-type: none"> Air as a substance that surrounds us, has weight, and takes up space Air pressure <ul style="list-style-type: none"> High and low pressure air masses <ul style="list-style-type: none"> Use of barometers Heat differentiation in the atmosphere and the resulting phenomena <ul style="list-style-type: none"> Convection cells and wind Precipitation (use of a rain gauge) Wind direction and speed (Use of wind vanes and an anemometer) Temperature (use of a thermometer) 	<p>Earth and Space Science, Weather and Climate Measure, record, and explain daily weather phenomena using the appropriate tools</p>	<p>Teach this objective if time. Though there aren't 5th grade GLCE that align, this unit will better prepare students for weather studies in 7th.</p>
<ul style="list-style-type: none"> Water storage in the atmosphere <ul style="list-style-type: none"> Condensation Clouds <ul style="list-style-type: none"> Cirrus, stratus, cumulus, and cumulonimbus Relationship to weather conditions From air to ground <ul style="list-style-type: none"> Types of precipitation 	<p>Earth and Space Science, Weather and Climate Correlate cloud types with general weather conditions</p>	<p>Teach this objective if time. Though there aren't 5th grade GLCE that align, this unit will better prepare students for weather studies in 7th.</p>
<p>Adverse Weather Conditions</p> <ul style="list-style-type: none"> Thunderstorms, hurricanes, tornadoes, drought <ul style="list-style-type: none"> Conditions under which they occur <p>Weather safety</p>	<p>Earth and Space Science, Weather and Climate Describe a variety of storm types, the weather conditions associated with each, and explain when they occur</p>	<p>Teach this objective if time. Though there aren't 5th grade GLCE that align, this unit will better prepare students for weather studies in 7th.</p>
	<p>Earth and Space Science, Weather and Climate</p>	<p>Teach this objective if time. Though there aren't 5th grade GLCE that align, this unit will better</p>

	Compile and use weather data to determine climate trends	prepare students for weather studies in 7 th .
Climate <ul style="list-style-type: none"> Climate patterns of the world Effect of geography on weather and climate (e.g., mountains, sea breezes, water bodies)	Earth and Space Science, Weather and Climate Describe the effects geography can have on weather and climate	Teach this objective if time. Though there aren't 5 th grade GLCE that align, this unit will better prepare students for weather studies in 7 th .
<ul style="list-style-type: none"> Solid, liquid, gas states (e.g. glaciers, snow on mountains, polar ice caps, icebergs, lakes, oceans, seas, groundwater, water vapor) Freshwater vs. saltwater 	Earth and Space Science, Water on Earth Analyze the distribution, location, and state of water on Earth	Teach this objective if time. Though there aren't 5 th grade GLCE that align, this unit will better prepare students for weather studies in 7 th .
The Water Cycle <ul style="list-style-type: none"> 3 things water does after precipitation <ul style="list-style-type: none"> Infiltration, runoff, evaporation Runoff vs. infiltration <ul style="list-style-type: none"> Permeability Saturation Pore space 	Earth and Space Science, Water on Earth Describe the processes of infiltration, runoff, evaporation, condensation, and precipitation as they relate to movement of water in the water cycle	Teach this objective if time. Though there aren't 5 th grade GLCE that align, this unit will better prepare students for weather studies in 7 th .

NHA Science Exemplar: The Living Environment

The student will explore the common themes that intertwine and connect all aspects of living things, such as the similarities of plants and animals, structure and functions of body parts, adaptations to new environments, and coexistence of animals in a variety of ecosystems.

Grade Five

UNIT: Health

NHA Science Content	Michigan Grade Level Content Expectations
<p>Healthy Body</p> <ul style="list-style-type: none"> • The human body <ul style="list-style-type: none"> - Changes that occur during puberty • Illness prevention <ul style="list-style-type: none"> - Personal Hygiene <ul style="list-style-type: none"> • Importance of keeping the body clean - Sanitation • Treatment of illnesses <ul style="list-style-type: none"> - Proper use of medication/prescriptions - Importance of following recommendations of parents or doctors • HIV/AIDS Prevention <ul style="list-style-type: none"> - Transmission of disease <ul style="list-style-type: none"> • Not through touch or close proximity - Strategies for protection <ul style="list-style-type: none"> • Not touching blood or used needles <p>Healthy Diet</p> <ul style="list-style-type: none"> • Healthy eating habits <ul style="list-style-type: none"> - Nutritionally balanced meals and snacks <ul style="list-style-type: none"> • Essential nutrients <ul style="list-style-type: none"> - Reading food labels - Food Pyramid – guidelines for healthy eating - Eating regularly to maintain energy - Relationship between food choices and growth - Advantages of drinking water compared to other beverages • Influences on food choices <ul style="list-style-type: none"> - Media/advertising - Money/economics - Convenience - Environment • Food quality and safety <ul style="list-style-type: none"> - Healthy food preparation methods - Healthy food handling practices 	<p>STRAND 1: Nutrition and Physical Activity</p> <p>Standard 1: Core Concepts</p> <p>1.1 Describe the essential nutrients the body needs to stay healthy.</p> <p>1.2 Describe guidelines to follow for healthy eating.</p> <p>1.3 Identify calcium and vitamin D intake and physical activity as protectors from developing osteoporosis.</p> <p>1.4 Explain the importance of choosing water rather than other beverages for the purpose of keeping the body hydrated.</p> <p>Standard 2: Access Information</p> <p>1.5 Interpret information provided on food labels.</p> <p>Standard 3: Health Behaviors</p> <p>1.6 Choose a snack using specific criteria such as fat, carbohydrate, fiber, calcium, and calorie content of foods.</p> <p>1.7 Plan a meal using specific criteria such as fat, carbohydrate, fiber, calcium, and calorie content of foods.</p> <p>STRAND 2: Alcohol , Tobacco , and Other Drugs</p> <p>Standard 1: Core Concepts</p> <p>2.1 Describe poison safety rules for household products.</p> <p>2.2 Describe the short- and long- term physical effects of using tobacco and inhalants.</p> <p>2.3 Describe health benefits of abstaining from or stopping tobacco use.</p> <p>2.4 Recognize that it is hard to stop using tobacco.</p> <p>2.5 Compute the economic cost of tobacco use.</p> <p>2.6 Explain school policies and community laws related to the sale and use of tobacco products.</p> <p>2.7 Describe how use of alcohol and other drugs impairs safe driving.</p> <p>Standard 3: Health Behaviors</p> <p>2.8 Apply effective strategies to avoid exposure to inhalants.</p> <p>2.9 Apply strategies to avoid riding with an impaired driver.</p> <p>Standard 4: Influences</p> <p>2.10 Analyze the accuracy of information conveyed in the media about tobacco use.</p> <p>2.11 Explain how decisions about alcohol and tobacco use will impact</p>

<p>Healthy Decisions</p> <ul style="list-style-type: none"> • Community health care facilities • Skills to enhance personal safety <ul style="list-style-type: none"> - Safety in sun, water, and cold weather - Recognizing and avoiding threatening situations <ul style="list-style-type: none"> • Appropriate vs. inappropriate touch • Respecting personal space/boundaries • Being home alone • First aid procedures <ul style="list-style-type: none"> - Obtaining help - Breathing and choking - Handling blood - Poison <p>Healthy Practices</p> <ul style="list-style-type: none"> • Major influences on a person's health (both positive and negative aspects) <ul style="list-style-type: none"> - Food choices - Exercise - Sleep - Activity/ recreation - Awareness of personal habits • Effects of society and science on health <ul style="list-style-type: none"> - Culture - Technology • Effects of family on health <ul style="list-style-type: none"> - Physical, psychological, social - How health problems impact the entire family • Importance of health-based goals <ul style="list-style-type: none"> - Target habits that hinder personal health - Develop goals to work on those habits - Monitor progress • Drug, alcohol, & other drugs <ul style="list-style-type: none"> - Influences that promote use <ul style="list-style-type: none"> • Peer pressure <ul style="list-style-type: none"> - Strategies to refuse use • Adult/peer modeling • Advertising/media • Availability/cost - Tools to avoid use <ul style="list-style-type: none"> • Self-control • Role play of refusal situations • Responding to negative social influence and peer pressure 	<p>relationships with friends and family.</p> <p>2.12 Analyze how families and peers may influence choices about using tobacco and inhalants.</p> <p>Standard 6: Decision Making</p> <p>2.13 Analyze the positive and negative choices one can make about using tobacco and alcohol.</p> <p>Standard 7: Social Skills</p> <p>2.14 Demonstrate verbal and non-verbal ways to refuse tobacco, alcohol, inhalant, and other drug use.</p> <p>STRAND 3: Safety</p> <p>Standard 1: Core Concepts</p> <p>3.1 Explain the importance of respecting personal space and boundaries.</p> <p>3.2 Describe the characteristics of appropriate and inappropriate touch.</p> <p>3.3 Explain that a child is not at fault if someone touches him or her in an inappropriate way.</p> <p>3.4 Describe hazards related to sun, water, and ice.</p> <p>Standard 2: Access Information</p> <p>3.5 Demonstrate how to ask a trusted adult for help.</p> <p>Standard 3: Health Behaviors</p> <p>3.6 Analyze situations to predict safety hazards when home alone and in public places.</p> <p>3.7 Apply strategies to avoid personally unsafe situations.</p> <p>3.8 Apply strategies to be safe in the sun and when around water and ice.</p> <p>Standard 5: Goal Setting</p> <p>3.9 Develop plans to stay safe when home alone and in public places.</p> <p>Standard 7: Social Skills</p> <p>3.10 Demonstrate strategies to get away in cases of inappropriate touching or abduction.</p> <p>STRAND 4: Social and Emotional Health</p> <p>Standard 1: Core Concepts</p> <p>4.1 Describe the harmful impact of harassing behaviors to both the perpetrator and the victim.</p> <p>Standard 2: Access Information</p> <p>4.2 Describe how to get help from an adult when someone is in danger of hurting self or others.</p> <p>Standard 3: Health Behaviors</p> <p>4.3 Demonstrate strategies to manage strong feelings.</p> <p>4.4 Predict situations that might lead to trouble, including violence.</p> <p>4.5 Demonstrate strategies to avoid situations that might lead to trouble.</p> <p>4.6 Demonstrate the ability to manage harassment, including getting help from</p>

NHA Science Exemplar: The Nature of Science

The student will study and apply the strategies and practices of scientists having to do with scientific knowledge and inquiry. They will learn to develop hypotheses and make predictions while they create scientific investigations to test their theories.

Grade Six

UNIT: Introduction to Science

NHA Science Content	NHA Objectives	MI GLCE
When similar investigations give different results, the scientific challenge is to judge whether the differences are trivial or significant, and it often takes further studies to decide. Even with similar results, scientists may wait until an investigation has been repeated many times before accepting the results as correct.	The Nature of Science, Scientific Knowledge Analyze similar investigations that yield different results to determine the cause of the difference and develop a plan to eliminate the variables	S.IA.06.14 Draw conclusions from sets of data from multiple trials of a scientific investigation.
Although all scientific ideas are tentative and subject to change and improvement in principle, for most major ideas in science, there is much experimental and observational confirmation. Those ideas are not likely to change greatly in the future. Some of these ideas and knowledge are very old and still applicable. Scientists do and have changed their ideas about nature when they encounter new experimental evidence that does not match their existing explanations. When new experimental results are inconsistent with existing, well established ideas, scientists pursue further experimentation to determine whether the results are flawed or the existing ideas require modification.	The Nature of Science, Scientific Knowledge Trace the development of an idea to a scientific theory	(There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.)
Different kinds of questions suggest different kinds of scientific investigations. Some investigations involve observing and describing objects, organisms, or events; some involve collecting specimens; some involve experiments; some involve seeking more information; some involve discovery of new objects and phenomena; and some involve making models. Some matters cannot be examined usefully in a scientific way. Among them are matters that by their nature cannot be tested objectively and those that are essentially matters of	The Nature of Science, Scientific Inquiry- The Scientific Method Propose questions and hypotheses that can be studied through scientific investigations and distinguish them from questions and hypothesis that cannot be examined scientifically	S.IP.06.11 Generate scientific questions based on observations, investigations, and research.

<p>morality. Science can sometimes be used to inform ethical decisions by identifying the likely consequences of particular actions but cannot be used to establish that some action is either moral or immoral.</p>		
<p>Variables and controls can affect the results of an investigation and ideally one variable should be tested at a time; however it is not always possible to identify and/or control all variables. If more than one variable changes at the same time in an experiment, the outcome of the experiment may not be clearly attributable to any one variable. Collaboration among investigators can often lead to research designs that are able to deal with situations where it is not possible to control all of the variables.</p>	<p>The Nature of Science, Scientific Inquiry- The Scientific Method Explain why only one variable (e.g., independent, dependent, control) can be manipulated at a time</p>	<p>S.IP.06.12 Design and conduct scientific investigations.</p>
<p>It is part of scientific inquiry to evaluate the results of scientific investigations, experiments, observations, theoretical models, and the explanations proposed by other scientists. Evaluation includes reviewing the experimental procedures, examining the evidence, identifying faulty reasoning, pointing out statements that go beyond the evidence, and suggesting alternative explanations for the same observations. In areas where active research is being pursued and in which there is not a great deal of experimental or observational evidence and understanding, it is normal for scientists to differ with one another about the interpretation of the evidence or theory being considered. Different scientists might publish conflicting experimental results or might draw different conclusions from the same data. Ideally, scientists acknowledge such conflict and work towards finding evidence that will resolve their disagreement.</p>	<p>The Nature of Science, Scientific Inquiry- The Scientific Method Describe why questioning, response to criticism, replication, accurate record keeping, and open communication are integral to the process of science</p>	<p>S.RS.06.12 Describe limitations in personal and scientific knowledge. S.RS.06.13 Identify the need for evidence in making scientific decisions. S.RS.06.11 Evaluate the strengths and weaknesses of claims, arguments, and data.</p>

Technology used (safely) to gather data enhances accuracy and allows scientists to analyze and quantify results of investigations.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Use appropriate tools, technologies and metric measurements to gather, analyze, and interpret data and report results	S.IP.06.13 Use tools and equipment (spring scales, stop watches, meter sticks and tapes, models, hand lens, thermometer, models, sieves, microscopes) appropriate to scientific investigations. S.IP.06.14 Use metric measurement devices in an investigation.
	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Describe basic safety procedures in science such as recognizing potential hazards, cautiously manipulating materials and equipment and conducting appropriate procedures	S.IP.06.12 Design and conduct scientific investigations.
Graphs can show a variety of possible relationships between two variables. As one variable increases uniformly, the other may do one of the following: increase or decrease steadily, increase or decrease faster and faster, get closer and closer to some limiting value, reach some intermediate maximum or minimum, alternately increase and decrease, increase or decrease in steps, or do something different from any of these. Graphs can also help to show patterns such as trends, varying rates of change, gaps, or clusters that are useful when making predictions about the phenomena being graphed.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Organize, display, and interpret scientific data in tables, graphs (e.g. line, circle, bar, histogram) and plots (e.g. stem-and-leaf, box-and-whisker, scatter)	S.IP.06.15 Construct charts and graphs from data and observations.
	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Interpret and evaluate tables, charts, and graphs produced by others	S.IP.06.16 Identify patterns in data. S.IA.06.11 Analyze information from data tables and graphs to answer scientific questions. S.RS.06.11 Evaluate the strengths and weaknesses of claims, arguments, and data. S.IA.06.12 Evaluate data, claims, and personal knowledge through collaborative science discourse.

	<p>The Nature of Science, Scientific Inquiry- Data Collection and Analysis Cite evidence from tables, charts, and/or graphs in making arguments and claims in oral and written reports</p>	<p>S.IA.06.11 Analyze information from data tables and graphs to answer scientific questions. S.IA.06.13 Communicate and defend findings of observations and investigations using evidence. S.RS.06.14 Evaluate scientific explanations based on current evidence and scientific principles. S.IA.06.15 Use multiple sources of information to evaluate strengths and weaknesses of claims, arguments, or data.</p>
<p>People of all backgrounds and with diverse interests, talents, qualities, and motivations engage in fields of science and engineering; some of these people work in teams and others work alone, but all communicate extensively with others. The work of science requires a variety of human abilities, qualities, and habits of mind (e.g., reasoning, insight, energy, skill, creativity, intellectual honesty, tolerance of ambiguity, skepticism, openness to new ideas). Scientists are employed by colleges and universities, business and industry, hospitals, and many government agencies. Their places of work include offices, classrooms, laboratories, farms, factories, and natural field settings ranging from space to the ocean floor.</p>	<p>The Nature of Science, Scientific Enterprise- Science and Society Describe the diverse nature of science and scientists past and present</p>	<p>S.RS.06.19 Describe how science and technology have advanced because of the contributions of many people throughout history and across cultures.</p>
<p>Scientific knowledge and the procedures used by scientists influence the way many individuals think about themselves, others, and the environment. Societal challenges often inspire questions for scientific research. Social and economic forces strongly influence which science research programs are pursued and funded</p>	<p>The Nature of Science, Scientific Enterprise- Science and Society Describe ways in which science and society influence one another</p>	<p>S.RS.06.18 Describe what science and technology can and cannot reasonably contribute to society. S.RS.06.17 Describe the effect humans and other organisms have on the balance of the natural world.</p>
<p>A system can include processes as well as things. Thinking about things as systems means looking for how every part relates to others. The output from one part of a system (which can include material, energy, or information) can become the input to other parts. Such feedback can serve to control what goes on in the system as a whole. Any system is usually connected to</p>	<p>The Nature of Science, Common Themes in Science Analyze the parts, subsystems and interactions of a system</p>	<p>There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.</p>

<p>other systems, both internally and externally. Thus a system may be thought of as containing subsystems and as being a sub-system of a larger system. Some portion of the output of a system may be fed back to that system's input. Systems are defined by placing boundaries around collections of interrelated things to make them easier to study. Regardless of where the boundaries are placed, a system still interacts with its surrounding environment. Therefore, when studying a system, it is important to keep track of what enters or leaves the system. A system may stay the same because nothing is influencing it or the influences on it are balanced. Many systems contain feedback mechanisms that serve to keep changes within certain limits.</p>		
<p>Symbolic equations can be used to summarize how the quantity of something changes over time or in response to other changes. Cycles, such as the seasons or body temperature, can be described by what their cycle length or frequency is, what their highest and lowest values are, and when these values occur. Different cycles range from many years down to a fraction of a second. Cyclic patterns evident in past events can be used to make predictions about future events. However, these predictions may not always match what actually happens. The way some systems behave is so erratic that patterns of change are not apparent. Small differences in how things start out can sometimes produce large differences in how they end up. Some events are so sensitive to small differences in initial conditions that their outcomes cannot be predicted. Trends based on what has happened in the past can be used to make predictions about what things will be like in the future. However, these predictions may not always match what actually happens.</p>	<p>The Nature of Science, Common Themes in Science Measure and graph change over time and analyze the results to determine patterns and trends or predict events</p>	<p>S.IP.06.16 Identify patterns in data.</p>

<p>Some properties of an object depend on its length, some depend on its area, and some depend on its volume (for instance, cooling rates of different-sized containers of water, strength of different-sized constructions from the same material, flight characteristics of different-sized model airplanes). As the complexity of any system increases, gaining an understanding of it depends increasingly on summaries, such as averages and ranges, and on descriptions of typical examples of that system. Natural phenomena often involve sizes, durations, and speeds that are extremely small or extremely large. These phenomena may be difficult to appreciate because they involve magnitudes far outside human experience.</p>	<p>The Nature of Science, Common Themes in Science Compare and contrast the properties of objects as they change in scale</p>	<p>There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.</p>
	<p>The Nature of Science, Common Themes in Science Construct physical and conceptual models that mimic the characteristics of an unknown system and compare the model to the system</p>	<p>S.RS.06.15 Demonstrate scientific concepts through various illustrations, performances, models, exhibits, and activities.</p>

NHA Science Exemplar: Engineering and Technology

The student will study the strategies and practices used in engineering and technology, as well as the relationship between science and technology. They will apply problem solving skills as they model the steps of design and experiment with materials and tools involved in inventions.

Grade Six

UNIT: Models and Design (Foss Learning Kit: Models and Designs)

Teach only as an enrichment objective as time permits.</p>
<p>The following objectives are process skills. As you teach the content objectives above, include opportunities for students to practice the following science skills.</p>		
<p>Different kinds of questions suggest different kinds of scientific investigations. Some investigations involve observing and describing objects, organisms, or events; some involve collecting specimens; some involve experiments; some involve seeking more information; some involve discovery of new objects and phenomena; and some involve making models. Some matters cannot be examined usefully in a scientific way. Among them are matters that by their nature cannot be tested objectively and those that are essentially matters of morality. Science can sometimes be used to inform ethical decisions by identifying the likely consequences of particular actions but cannot be used to establish that some action is either moral or immoral</p>	<p>The Nature of Science, Scientific Inquiry- The Scientific Method Propose questions and hypotheses that can be studied through scientific investigations and distinguish them from questions and hypothesis that cannot be examined scientifically</p>	<p>S.IP.06.11 Generate scientific questions based on observations, investigations, and research.</p>

Variables and controls can affect the results of an investigation and ideally one variable should be tested at a time; however it is not always possible to identify and/or control all variables. If more than one variable changes at the same time in an experiment, the outcome of the experiment may not be clearly attributable to any one variable. Collaboration among investigators can often lead to research designs that are able to deal with situations where it is not possible to control all of the variables.	The Nature of Science, Scientific Inquiry- The Scientific Method Explain why only one variable (e.g., independent, dependent, control) can be manipulated at a time	S.IP.06.12 Design and conduct scientific investigations.
It is part of scientific inquiry to evaluate the results of scientific investigations, experiments, observations, theoretical models, and the explanations proposed by other scientists. Evaluation includes reviewing the experimental procedures, examining the evidence, identifying faulty reasoning, pointing out statements that go beyond the evidence, and suggesting alternative explanations for the same observations. In areas where active research is being pursued and in which there is not a great deal of experimental or observational evidence and understanding, it is normal for scientists to differ with one another about the interpretation of the evidence or theory being considered. Different scientists might publish conflicting experimental results or might draw different conclusions from the same data. Ideally, scientists acknowledge such conflict and work towards finding evidence that will resolve their disagreement.	The Nature of Science, Scientific Inquiry- The Scientific Method Describe why questioning, response to criticism, replication, accurate record keeping, and open communication are integral to the process of science	S.RS.06.12 Describe limitations in personal and scientific knowledge. S.RS.06.13 Identify the need for evidence in making scientific decisions. S.RS.06.11 Evaluate the strengths and weaknesses of claims, arguments, and data.
When similar investigations give different results, the scientific challenge is to judge whether the differences are trivial or significant, and it often takes further studies to decide. Even with similar results, scientists may wait until an investigation has been repeated many times before accepting the results as correct.	The Nature of Science, Scientific Knowledge Analyze similar investigations that yield different results to determine the cause of the difference and develop a plan to eliminate the variables	S.IA.06.14 Draw conclusions from sets of data from multiple trials of a scientific investigation.
Graphs can show a variety of possible relationships between two variables. As one variable increases uniformly, the other may do one of the following: increase or decrease steadily, increase or decrease faster and faster, get closer and closer to some limiting value, reach some intermediate maximum or minimum, alternately increase and decrease, increase or decrease in steps, or do something different from any of these. Graphs can also help to show patterns such as trends, varying rates of change, gaps, or clusters that are useful when making predictions about the phenomena being graphed.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Organize, display, and interpret scientific data in tables, graphs (e.g. line, circle, bar, histogram) and plots (e.g. stem-and-leaf, box-and-whisker, scatter)	S.IP.06.15 Construct charts and graphs from data and observations.

	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Interpret and evaluate tables, charts, and graphs produced by others	S.RS.06.11 Evaluate the strengths and weaknesses of claims, arguments, and data.
	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Cite evidence from tables, charts, and/or graphs in making arguments and claims in oral and written reports	S.IA.06.11 Analyze information from data tables and graphs to answer scientific questions. S.IA.06.13 Communicate and defend findings of observations and investigations using evidence. S.RS.06.14 Evaluate scientific explanations based on current evidence and scientific principles. S.IA.06.15 Use multiple sources of information to evaluate strengths and weaknesses of claims, arguments, or data.

NHA Science Exemplar: The Living Environment

The student will explore the common themes that intertwine and connect all aspects of living things, such as the similarities of plants and animals, structure and functions of body parts, adaptations to new environments, and coexistence of animals in a variety of ecosystems.

<p>Different kinds of questions suggest different kinds of scientific investigations. Some investigations involve observing and describing objects, organisms, or events; some involve collecting specimens; some involve experiments; some involve seeking more information; some involve discovery of new objects and phenomena; and some involve making models. Some matters cannot be examined usefully in a scientific way. Among them are matters that by their nature cannot be tested objectively and those that are essentially matters of morality. Science can sometimes be used to inform ethical decisions by identifying the likely consequences of particular actions but cannot be used to establish that some action is either moral or immoral.</p>	<p>The Nature of Science, Scientific Inquiry- The Scientific Method Propose questions and hypotheses that can be studied through scientific investigations and distinguish them from questions and hypothesis that cannot be examined scientifically</p>	<p>S.IP.06.11 Generate scientific questions based on observations, investigations, and research.</p>
<p>Variables and controls can affect the results of an investigation and ideally one variable should be tested at a time; however it is not always possible to identify and/or control all variables. If more than one variable changes at the same time in an experiment, the outcome of the experiment may not be clearly attributable to any one variable. Collaboration among investigators can often lead to research designs that are able to deal with situations where it is not possible to control all of the variables.</p>	<p>The Nature of Science, Scientific Inquiry- The Scientific Method Explain why only one variable (e.g., independent, dependent, control) can be manipulated at a time</p>	<p>S.IP.06.12 Design and conduct scientific investigations.</p>
<p>It is part of scientific inquiry to evaluate the results of scientific investigations, experiments, observations, theoretical models, and the explanations proposed by other scientists. Evaluation includes reviewing the experimental procedures, examining the evidence,</p>	<p>The Nature of Science, Scientific Inquiry- The Scientific Method Describe why questioning, response to criticism, replication, accurate record keeping, and open communication are integral to the process of science</p>	<p>S.RS.06.12 Describe limitations in personal and scientific knowledge. S.RS.06.13 Identify the need for evidence in making scientific decisions. S.RS.06.11 Evaluate the strengths and weaknesses of claims, arguments, and data.</p>

identifying faulty reasoning, pointing out statements that go beyond the evidence, and suggesting alternative explanations for the same observations. In areas where active research is being pursued and in which there is not a great deal of experimental or observational evidence and understanding, it is normal for scientists to differ with one another about the interpretation of the evidence or theory being considered. Different scientists might publish conflicting experimental results or might draw different conclusions from the same data. Ideally, scientists acknowledge such conflict and work towards finding evidence that will resolve their disagreement.		
When similar investigations give different results, the scientific challenge is to judge whether the differences are trivial or significant, and it often takes further studies to decide. Even with similar results, scientists may wait until an investigation has been repeated many times before accepting the results as correct.	The Nature of Science, Scientific Knowledge Analyze similar investigations that yield different results to determine the cause of the difference and develop a plan to eliminate the variables	S.IA.06.14 Draw conclusions from sets of data from multiple trials of a scientific investigation.
Graphs can show a variety of possible relationships between two variables. As one variable increases uniformly, the other may do one of the following: increase or decrease steadily, increase or decrease faster and faster, get closer and closer to some limiting value, reach some intermediate maximum or minimum, alternately increase and decrease, increase or decrease in steps, or do something different from any of these. Graphs can also help to show patterns such as trends, varying rates of change, gaps, or clusters that are useful when making predictions about the phenomena being graphed.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Organize, display, and interpret scientific data in tables, graphs (e.g. line, circle, bar, histogram) and plots (e.g. stem-and-leaf, box-and-whisker, scatter)	S.IP.06.15 Construct charts and graphs from data and observations.
	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Interpret and evaluate tables, charts, and graphs produced by others	S.RS.06.11 Evaluate the strengths and weaknesses of claims, arguments, and data.

	<p>The Nature of Science, Scientific Inquiry- Data Collection and Analysis</p> <p>Cite evidence from tables, charts, and/or graphs in making arguments and claims in oral and written reports</p>	<p>S.IA.06.11 Analyze information from data tables and graphs to answer scientific questions.</p> <p>S.IA.06.13 Communicate and defend findings of observations and investigations using evidence.</p> <p>S.RS.06.14 Evaluate scientific explanations based on current evidence and scientific principles.</p> <p>S.IA.06.15 Use multiple sources of information to evaluate strengths and weaknesses of claims, arguments, or data.</p>
--	--	--

NHA Science Exemplar: Physical Science

The student will investigate the laws of the physical world that form our understanding of phenomena such as the motion of objects, the characteristics of matter, and the various forms of energy applicable to our lives.

Grade Six

UNIT: Light

NHA Science Content	NHA Objectives	MI GLCE

<p>Erosion</p> <ul style="list-style-type: none"> • Runoff • Rivers (e.g. deltas, floodplains, alluvial fans, meanders, oxbow lakes, dams) • Waves <ul style="list-style-type: none"> • Sandbars, beaches, spits • Glaciers <ul style="list-style-type: none"> • Erosional landforms (e.g. cirques, glacial horns, U-shaped valleys, kettle lakes) • Depositional landforms (e.g. moraines) • Wind • Dunes 	<p>Earth and Space Science, The Changing Earth Analyze how physical/mechanical weathering (e.g. waves, wind, water, and glacier movements) shape and reshape Earth's surface over time</p>	<p>E.SE.06.11 Explain how physical and chemical weathering lead to erosion and the formation of soils and sediments. E.SE.06.12 Explain how waves, wind, water, and glacier movement, shape and reshape the land surface of the Earth by eroding rock in some areas and depositing sediments in other areas.</p>
<p>Plate Tectonics</p> <ul style="list-style-type: none"> • Visible Earth processes related to forces in the Earth <ul style="list-style-type: none"> • Mountain building <ul style="list-style-type: none"> • Folded, dome, fault mountains • Earthquakes <ul style="list-style-type: none"> • Richard Dixon Oldham <ul style="list-style-type: none"> • Using seismic waves to learn about Earth layers • Wave types and energy transfer • History of seismology • Volcanic activity <ul style="list-style-type: none"> • Ring of Fire • Forces driving plate movement • Isostasy • Convection currents in the mantle 	<p>Earth and Space Science, The Changing Earth Describe major geological events (mountain building, earthquakes, volcanic eruptions) as processes resulting from heat flow and movement of material within Earth</p>	<p>E.SE.06.51 Explain plate tectonic movement and how the lithospheric plates move centimeters each year. E.SE.06.52 Demonstrate how major geological events (earthquakes, volcanic eruptions, mountain building) result from these plate motions.</p>
<p>Plate Tectonics</p> <ul style="list-style-type: none"> • Plates Boundaries • Convergent boundaries <ul style="list-style-type: none"> • Collision zones • Subduction zones • Trenches • Divergent boundaries <ul style="list-style-type: none"> • Sea floor spreading 	<p>Earth and Space Science, The Changing Earth Describe the three primary types of plate boundaries and the landforms associated with each</p>	<p>E.SE.06.52 Demonstrate how major geological events (earthquakes, volcanic eruptions, mountain building) result from these plate motions.</p>

<ul style="list-style-type: none"> •Mid-ocean ridges •Rift valleys •Transform boundaries <ul style="list-style-type: none"> • Strike-slip faults 		
<p>The Age of Earth</p> <ul style="list-style-type: none"> • Scientific laws and the relationship between past and present events • Relative time <ul style="list-style-type: none"> •Fossils •Superposition •Crosscutting relations • Absolute time • Radioactive decay 	<p>Earth and Space Science, The Changing Earth Describe ways scientists learn about Earth's geologic history (e.g., seismographs, ground penetrating radar, core drillers, observations)</p>	<p>E.ST.06.31 Explain how rocks and fossils are used to understand the age and geological history of the Earth (timelines and relative dating, rock layers). E.ST.06.42 Describe how fossils provide important evidence of how life and environmental conditions have changed. E.ST.06.41 Explain how Earth processes (erosion, mountain building, and glacier movement) are used for the measurement of geologic time through observing rock layers.</p>
<p>Earth Materials</p> <ul style="list-style-type: none"> • Soil <ul style="list-style-type: none"> •Components (e.g. rock fragments, clay, silt, sand, humus) •Soil properties (e.g. color, horizon profile, infiltration, soil temperature, structure, consistency, texture, particle size, pH, fertility and soil moisture) •Variables that influence soil texture, fertility and resistance to erosion (e.g. plant roots, bacteria, fungi, worms, rodents) •Soil conservation 	<p>Earth and Space Science, Earth Materials and Responsible Use Analyze observable and measurable soil properties to predict soil quality</p>	<p>E.SE.06.13 Describe how soil is a mixture made up of weather eroded rock and decomposed organic material. E.SE.06.14 Compare different soil samples based on particle size and texture.</p>
<p>Earth Materials</p> <ul style="list-style-type: none"> • Rocks <ul style="list-style-type: none"> •Mineral content and texture comparison (color due to presence of quartz, feldspar, calcite, mica and size of minerals due to cooling time) •Process of formation <ul style="list-style-type: none"> • Sedimentary <ul style="list-style-type: none"> •Clastic •Non-clastic • Igneous 	<p>Earth and Space Science, Earth Materials and Responsible Use Classify sedimentary, igneous and metamorphic rocks</p>	<p>E.SE.06.41 Compare and contrast the formation of rock types (igneous, metamorphic, and sedimentary) and demonstrate the similarities and differences using the rock cycle model.</p>

<ul style="list-style-type: none"> •Extrusive •Intrusive • Metamorphic •Foliated •Unfoliated •The rock cycle 		
<p>The following objectives are process skills. As you teach the content objectives above, include opportunities for students to practice the following science skills.</p>		
<p>Scientific knowledge and the procedures used by scientists influence the way many individuals think about themselves, others, and the environment. Societal challenges often inspire questions for scientific research. Social and economic forces strongly influence which science research programs are pursued and funded.</p>	<p>The Nature of Science, Scientific Enterprise-Science and Society Describe ways in which science and society influence one another</p>	<p>S.RS.06.18 Describe what science and technology can and cannot reasonably contribute to society. S.RS.06.17 Describe the effect humans and other organisms have on the balance of the natural world.</p>
<p>Symbolic equations can be used to summarize how the quantity of something changes over time or in response to other changes. Cycles, such as the seasons or body temperature, can be described by what their cycle length or frequency is, what their highest and lowest values are, and when these values occur. Different cycles range from many years down to a fraction of a second. Cyclic patterns evident in past events can be used to make predictions about future events. However, these predictions may not always match what actually happens. The way some systems behave is so erratic that patterns of change are not apparent. Small differences in how things start out can sometimes produce large differences in how they end up. Some events are so sensitive to small differences in initial conditions that their outcomes cannot be predicted. Trends based on what has happened in the past can be used to make predictions about what things will be like in the future. However, these predictions may not always match what actually happens.</p>	<p>The Nature of Science, Common Themes in Science Measure and graph change over time and analyze the results to determine patterns and trends or predict events</p>	<p>S.IP.06.16 Identify patterns in data.</p>

NHA Science Exemplar: The Living Environment

The student will explore the common themes that intertwine and connect all aspects of living things, such as the similarities of plants and animals, structure and functions of body parts, adaptations to new environments, and coexistence of animals in a variety of ecosystems.

Grade Six

UNIT: Health

<p>Healthy Body</p> <ul style="list-style-type: none"> • Illness/disease prevention <ul style="list-style-type: none"> - Awareness of risk factors <ul style="list-style-type: none"> • Lifestyle • Family history - Sanitation/spread of germs • HIV/AIDS Prevention <ul style="list-style-type: none"> - Transmission of disease <ul style="list-style-type: none"> • Facts vs. myths - Strategies for protection <ul style="list-style-type: none"> • Awareness of risky situations/behaviors • Not touching blood or used needles - Community resources of information/help <p>Healthy Diet</p> <ul style="list-style-type: none"> • Following dietary guidelines • Benefits of having healthy eating habits <ul style="list-style-type: none"> - Dental health • Reduced health risks • Influences on food choices <ul style="list-style-type: none"> - Family/friends - Culture/religion - Media/advertising - Money/economics - Lifestyle/priorities - Emotional eating - Convenience /cost - Environment/food availability • Food quality and safety <ul style="list-style-type: none"> - Food borne illnesses - Proper refrigeration - Hand washing - Proper cooking - Storage temperatures - Sanitation/cleanliness in the kitchen 	<p>STRAND 1: Nutrition and Physical Activity</p> <p>Standard 1: Core Concepts</p> <p>1.1 Analyze the benefits of healthy eating and being physically active.</p> <p>1.2 Identify the causes of food borne illness.</p> <p>1.3 Explain how weight management is influenced by healthy eating and being physically active.</p> <p>Standard 3: Health Behaviors</p> <p>1.4 Describe the federal dietary guidelines and the amount of physical activity recommended for one's age in order to achieve health benefits.</p> <p>1.5 Describe strategies for dealing with personal preferences, restrictions, and barriers related to healthy eating, adequate sleep, and physical activity.</p> <p>1.6 Describe environmental influences that encourage or discourage physical activity.</p> <p>1.7 Develop a dietary and physical activity plan for a week that is consistent with the dietary guidelines.</p> <p>1.8 Demonstrate the ability to support others to choose healthy foods and be physically active.</p> <p>Standard 1: Core Concepts (Recommended)</p> <p>1.9 Describe the relationship of self perception, body image, body weight, and physical activity.</p> <p>Standard 4: Influences</p> <p>1.10 Analyze how one's own perception of weight influences healthy eating and being physically active.</p> <p>STRAND 2: Alcohol, Tobacco , and Other Drugs</p> <p>Standard 1: Core Concepts</p> <p>2.1 Explain the short- and long-term effects of alcohol and marijuana use.</p> <p>2.2 Explain school policies and Michigan laws related to the sale and use of tobacco products.</p> <p>2.3 Analyze data that supports that most young people in middle school do not use tobacco, alcohol, or other drugs.</p> <p>2.4 Articulate the benefits of remaining alcohol, tobacco, and drug free.</p> <p>2.5 Analyze how impaired judgment and other effects of alcohol or marijuana use impact personal safety, relationships with friends and families, school success, and attainment of present and future goals.</p> <p>Standard 2: Access Information</p>

- Weight management
 - Influence of weight perception on food choices

Healthy Decisions

- Community health care facilities
 - Availability of health care products/information /services
 - Situations requiring professional health services
 - Health emergencies
 - Asthma, diabetes management
- Injury prevention strategies
 - Home emergency plans
 - Maintaining supplies in readiness of an emergency
 - Identification and removal of safety hazards
- Skills to enhance personal safety
 - Car safety/seatbelts
 - Internet safety
 - Recognizing and avoiding threatening situations
 - Appropriate vs. inappropriate touch
 - Respecting personal space/boundaries
 - Being home alone
 - Strategies to handle threatening situations
 - Presence of weapons/dangerous objects

Healthy Practices

- Personal influences on health
 - Food choices/exercise/sleep /activity
 - Anything put into your body
- Family influences on health
 - Physical, emotional, social
 - Ability of family to provide for its members
- Peer relationships
 - Exclusiveness
 - Discriminating
 - Risk-taking behaviors
 - Name-calling/prejudice
- Drug, alcohol, & other drug use
 - Long-term and short-term effects of use
 - Alcohol and impaired driving
 - Health benefits to avoiding use
 - Difficulty of fighting addictions
 - Negative effects on relationships
 - Effects on athletic performance and weight management
 - Legal perspectives

2.6 Demonstrate the ability to locate school and community resources to assist with problems related to alcohol and other drug use; and assess the validity of the resources.

Standard 3: Health Behaviors

2.7 Make a commitment to be alcohol, tobacco and drug free.

2.8 Recognize behaviors that may indicate alcohol or drug impairment in order to avoid riding with an impaired driver.

2.9 Describe strategies to avoid riding with an impaired driver, and demonstrate the ability to use them.

Standard 4: Influences

2.10 Analyze family, peer, societal, and media influences on tobacco, alcohol, and other drug use.

Standard 7: Social Skills

2.11 Develop personal strategies to resist influences to use tobacco, alcohol, and other drugs.

2.12 Demonstrate verbal and non-verbal ways to refuse alcohol, tobacco, and other drugs. **Grade Six**

Standard 1: Core Concepts (Recommended)

2.13 Describe the negative health effects of caffeine, tobacco, and diet pills on rest, stress, athletic performance, and weight management.

Standard 4: Influences

2.14 Analyze possible reasons why individuals choose to use, or not use, alcohol or marijuana.

2.15 Demonstrate the ability to support friends and family members who are trying to stop using alcohol, tobacco, and other drugs.

Standard 8: Advocacy

2.16 Apply effective persuasion skills for encouraging others not to use tobacco, alcohol, and other drugs.

STRAND 3: Safety

Standard 1: Core Concepts

3.1 Explain how safety belts help passengers to stay safe.

3.2 Describe safety hazards related to using the Internet.

3.3 Describe appropriate and inappropriate touch.

3.4 Explain the importance of respecting personal space and boundaries.

3.5 Explain that a child is not at fault if someone touches him or her in an inappropriate way.

Standard 2: Access Information

3.6 Demonstrate the ability to ask a trusted adult for help when feeling personally threatened or unsafe, including while using the Internet.

Standard 3: Health Behaviors

3.7 Analyze environments and situations, including those where weapons may be present, to determine whether they are safe.

3.8 Describe strategies to avoid unsafe situations.

- Use vs. misuse of prescription drugs
- Influences that promote use
 - Peer pressure
 - Strategies to refuse use
 - Adult/peer modeling
 - Advertising/media
 - Availability/cost
- Tools to avoid use
 - Self-control
 - Role play of refusal situations
 - Responding to negative social influence and peer pressure
- Caffeine, diet pills, and other drugs

Healthy Minds

- Negative effects of media
 - Influence from television, video games, movies, advertising
- Self-Image
 - Importance of healthy perception of weight and body image
- Stress management
 - Talking about problems
 - Understanding that feelings of isolation and depression will pass
 - Examining situation leading to feelings
- Social interactions
 - Recognition of positive self-esteem
 - Interpersonal communication
 - Building positive relationships with peers, parents
 - Safe and risky behaviors in relationships
 - Handling peer pressure
 - Management of feelings and behaviors (anger)
- Decision making and problem solving skills
- Conflict resolution
 - Possible causes of conflict
 - Non-violent strategies to manage conflict
 - Refusal/negotiation

- 3.9** Demonstrate strategies to escape when weapons/dangerous objects are present.
- 3.10** Describe the procedure for reporting the presence of weapons at school.
- 3.11** Demonstrate the ability to escape safety hazards in public places.
- 3.12** Apply school rules and procedures to hypothetical school crisis situations.
- 3.13** Demonstrate strategies to get away in hypothetical cases of inappropriate touching or abduction.
- 3.14** Apply strategies to stay safe when using the Internet.

Standard 4: Influences

- 3.15** Explain how one's behavior, when an occupant of a vehicle, influences the behavior of others.

Standard 8: Advocacy (Recommended)

- 3.16** Advocate for others to practice safe behavior, including the proper use of safety belts, when riding in a car.

- 3.17** Advocate for others to stay safe when using the Internet.

STRAND 4: Social and Emotional Health

Standard 1: Core Concepts

- 4.1** Describe some common causes of stress, and the health effects of stress.

Standard 2: Access Information

- 4.2** Analyze the importance of getting help from an adult when it is needed.
- 4.3** Identify criteria to determine whether another person is able to help one make healthy decisions and solve problems; and apply these criteria to identify people who can provide help.

Standard 3: Health Behaviors

- 4.4** Demonstrate the ability to use practical strategies to manage strong feelings.

Standard 5: Goal Setting

- 4.5** Use practical strategies to develop a personal plan for stress management.

Standard 6: Decision Making

- 4.6** Describe the decision making and problem solving steps.
- 4.7** Demonstrate the ability to make a decision or solve a problem using criteria to evaluate solutions.

Standard 7: Social Skills

- 4.8** Describe the characteristics of conflicts that can be resolved and the steps of effective conflict resolution.
- 4.9** Demonstrate the ability to use the steps of conflict resolution.
- 4.10** Demonstrate effective listening strategies.
- 4.11** Demonstrate the ability to use assertive communication skills appropriately.

Standard 1: Core Concepts (Recommended)

- 4.12** Analyze how friendships may involve positive and negative risks.
- 4.13** Explain the difference between angry feelings and angry behavior.

Standard 7: Social Skills

	<p>4.14 Demonstrate the ability to express appreciation.</p> <p>STRAND 5: Personal Health and Wellness</p> <p>Standard 3: Health Behaviors</p> <p>5.1 Demonstrate skills throughout the day to reduce the spread of germs.</p> <p>STRAND 6: HIV AND STIs Prevention</p> <p>Standard 1: Core Concepts</p> <p>6.1 Explain how HIV is and is not transmitted.</p> <p>6.2 Distinguish between facts and myths regarding HIV infection and AIDS.</p> <p>Standard 2: Access Information</p> <p>6.3 Explain when it is important to get adult, medical, and/or counseling help.</p> <p>6.4 Describe sources of accurate information and assistance in one's community.</p> <p>Standard 3: Health Behaviors</p> <p>6.5 Analyze behaviors and situations that may result in increased risk for HIV and other sexually transmitted infections (STIs).</p> <p>6.6 Analyze situations where assertive communication and refusal skills can be used to avoid and escape risky situations.</p>

NHA Science Exemplar: The Nature of Science

The student will study and apply the strategies and practices of scientists having to do with scientific knowledge and inquiry. They will learn to develop hypotheses and make predictions while they create scientific investigations to test their theories.

Grade Seven

UNIT: Introduction to Science

NHA Science Content	NHA Objectives	MI GLCE
When similar investigations give different results, the scientific challenge is to judge whether the differences are trivial or significant, and it often takes further studies to decide. Even with similar results, scientists may wait until an investigation has been repeated many times before accepting the results as correct.	The Nature of Science, Scientific Knowledge Analyze similar investigations that yield different results to determine the cause of the difference and develop a plan to eliminate the variables	S.IA.07.14 Draw conclusions from sets of data from multiple trials of a scientific investigation to draw conclusions.
Although all scientific ideas are tentative and subject to change and improvement in principle, for most major ideas in science, there is much experimental and observational confirmation. Those ideas are not likely to change greatly in the future. Some of these ideas and knowledge are very old and still applicable. Scientists do and have changed their ideas about nature when they encounter new experimental evidence that does not match their existing explanations. When new experimental results are inconsistent with existing, well established ideas, scientists pursue further experimentation to determine whether the results are flawed or the existing ideas require modification.	The Nature of Science, Scientific Knowledge Trace the development of an idea to a scientific theory	There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.
Different kinds of questions suggest different kinds of scientific investigations. Some investigations involve observing and describing objects, organisms, or events; some involve collecting specimens; some involve experiments; some involve seeking more information; some involve discovery of new objects and phenomena; and some involve making models. Some matters cannot be examined usefully in a scientific way. Among them are matters that by their nature cannot be tested	The Nature of Science, Scientific Inquiry- The Scientific Method Propose questions and hypotheses that can be studied through scientific investigations and distinguish them from questions and hypothesis that cannot be examined scientifically	S.IP.07.11 Generate scientific questions based on observations, investigations, and research.

objectively and those that are essentially matters of morality. Science can sometimes be used to inform ethical decisions by identifying the likely consequences of particular actions but cannot be used to establish that some action is either moral or immoral.		
Variables and controls can affect the results of an investigation and ideally one variable should be tested at a time; however it is not always possible to identify and/or control all variables. If more than one variable changes at the same time in an experiment, the outcome of the experiment may not be clearly attributable to any one variable. Collaboration among investigators can often lead to research designs that are able to deal with situations where it is not possible to control all of the variables.	The Nature of Science, Scientific Inquiry- The Scientific Method Explain why only one variable (e.g., independent, dependent, control) can be manipulated at a time	S.IP.07.12 Design and conduct scientific investigations.
It is part of scientific inquiry to evaluate the results of scientific investigations, experiments, observations, theoretical models, and the explanations proposed by other scientists. Evaluation includes reviewing the experimental procedures, examining the evidence, identifying faulty reasoning, pointing out statements that go beyond the evidence, and suggesting alternative explanations for the same observations. In areas where active research is being pursued and in which there is not a great deal of experimental or observational evidence and understanding, it is normal for scientists to differ with one another about the interpretation of the evidence or theory being considered. Different scientists might publish conflicting experimental results or might draw different conclusions from the same data. Ideally, scientists acknowledge such conflict and work towards finding evidence that will resolve their disagreement.	The Nature of Science, Scientific Inquiry- The Scientific Method Describe why questioning, response to criticism, replication, accurate record keeping, and open communication are integral to the process of science	S.RS.07.14 Evaluate scientific explanations based on current evidence and scientific principles. S.RS.07.12 Describe limitations in personal and scientific knowledge. S.RS.07.11 Evaluate the strengths and weaknesses of claims, arguments, and data.

Technology used (safely) to gather data enhances accuracy and allows scientists to analyze and quantify results of investigations.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Use appropriate tools, technologies and metric measurements to gather, analyze, and interpret data and report results	S.IP.07.13 Use tools and equipment (spring scales, stop watches, meter sticks and tapes, models, hand lens, thermometer, models, sieves, microscopes, hot plates, pH meters) appropriate to scientific investigations. S.IP.07.14 Use metric measurement devices in an investigation.
	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Describe basic safety procedures in science such as recognizing potential hazards, cautiously manipulating materials and equipment and conducting appropriate procedures	There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.
Graphs can show a variety of possible relationships between two variables. As one variable increases uniformly, the other may do one of the following: increase or decrease steadily, increase or decrease faster and faster, get closer and closer to some limiting value, reach some intermediate maximum or minimum, alternately increase and decrease, increase or decrease in steps, or do something different from any of these. Graphs can also help to show patterns such as trends, varying rates of change, gaps, or clusters that are useful when making predictions about the phenomena being graphed.	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Organize, display, and interpret scientific data in tables, graphs (e.g. line, circle, bar, histogram) and plots (e.g. stem-and-leaf, box-and-whisker, scatter)	S.IP.07.15 Construct charts and graphs from data and observations. S.IP.07.16 Identify patterns in data.
	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Interpret and evaluate tables, charts, and graphs produced by others	S.IA.07.11 Analyze information from data tables and graphs to answer scientific questions. S.IA.07.12 Evaluate data, claims, and personal knowledge through collaborative science discourse.

	<p>The Nature of Science, Scientific Inquiry- Data Collection and Analysis Cite evidence from tables, charts, and/or graphs in making arguments and claims in oral and written reports</p>	<p>S.IA.07.12 Evaluate data, claims, and personal knowledge through collaborative science discourse. S.IA.07.15 Use multiple sources of information to evaluate strengths and weaknesses of claims, arguments, or data. S.RS.07.13 Identify the need for evidence in making scientific decisions. S.IA.17.13 Communicate and defend findings of observations and investigations.</p>
<p>People of all backgrounds and with diverse interests, talents, qualities, and motivations engage in fields of science and engineering; some of these people work in teams and others work alone, but all communicate extensively with others. The work of science requires a variety of human abilities, qualities, and habits of mind (e.g., reasoning, insight, energy, skill, creativity, intellectual honesty, tolerance of ambiguity, skepticism, openness to new ideas). Scientists are employed by colleges and universities, business and industry, hospitals, and many government agencies. Their places of work include offices, classrooms, laboratories, farms, factories, and natural field settings ranging from space to the ocean floor.</p>	<p>The Nature of Science, Scientific Enterprise- Science and Society Describe the diverse nature of science and scientists past and present</p>	<p>S.RS.07.19 Describe how science and technology have advanced because of the contributions of many people throughout history and across cultures.</p>
<p>Scientific knowledge and the procedures used by scientists influence the way many individuals think about themselves, others, and the environment. Social and economic forces strongly influence which science research programs are pursued and funded.</p>	<p>The Nature of Science, Scientific Enterprise- Science and Society Describe ways in which science and society influence one another</p>	<p>S.RS.07.17 Describe the effect humans and other organisms have on the balance of the natural world. S.RS.07.18 Describe what science and technology can and cannot reasonably contribute to society.</p>

<p>A system can include processes as well as things. Thinking about things as systems means looking for how every part relates to others. The output from one part of a system (which can include material, energy, or information) can become the input to other parts. Such feedback can serve to control what goes on in the system as a whole. Any system is usually connected to other systems, both internally and externally. Thus a system may be thought of as containing subsystems and as being a sub-system of a larger system. Some portion of the output of a system may be fed back to that system's input. Systems are defined by placing boundaries around collections of interrelated things to make them easier to study. Regardless of where the boundaries are placed, a system still interacts with its surrounding environment. Therefore, when studying a system, it is important to keep track of what enters or leaves the system. A system may stay the same because nothing is influencing it or the influences on it are balanced. Many systems contain feedback mechanisms that serve to keep changes within certain limits.</p>	<p>The Nature of Science, Common Themes in Science Analyze the parts, subsystems and interactions of a system</p>	<p>There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.</p>
<p>Symbolic equations can be used to summarize how the quantity of something changes over time or in response to other changes. Cycles, such as the seasons or body temperature, can be described by what their cycle length or frequency is, what their highest and lowest values are, and when these values occur. Different cycles range from many years down to a fraction of a second. Cyclic patterns evident in past events can be used to make predictions about future events. However, these predictions may not always match what actually happens. The way some systems behave is so erratic that patterns of change are not apparent. Small differences in how things start out can sometimes produce large differences in how they end up. Some events are so sensitive to small differences in initial conditions that their outcomes cannot be predicted. Trends based on what has happened in the past can be used to make predictions about what things will be like</p>	<p>The Nature of Science, Common Themes in Science Measure and graph change over time and analyze the results to determine patterns and trends or predict events</p>	<p>S.IP.07.16 Identify patterns in data.</p>

<p>in the future. However, these predictions may not always match what actually happens.</p>		
<p>Some properties of an object depend on its length, some depend on its area, and some depend on its volume (for instance, cooling rates of different-sized containers of water, strength of different-sized constructions from the same material, flight characteristics of different-sized model airplanes). As the complexity of any system increases, gaining an understanding of it depends increasingly on summaries, such as averages and ranges, and on descriptions of typical examples of that system. Natural phenomena often involve sizes, durations, and speeds that are extremely small or extremely large. These phenomena may be difficult to appreciate because they involve magnitudes far outside human experience.</p>	<p>The Nature of Science, Common Themes in Science Compare and contrast the properties of objects as they change in scale</p>	<p>There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.</p>

NHA Science Exemplar: The Living Environment

The student will explore the common themes that intertwine and connect all aspects of living things, such as the similarities of plants and animals, structure and functions of body parts, adaptations to new environments, and coexistence of animals in a variety of ecosystems.

Grade Seven

Different kinds of questions suggest different kinds of scientific investigations. Some investigations involve observing and describing objects, organisms, or events; some involve collecting specimens; some involve experiments; some involve seeking more information; some involve discovery of new objects and phenomena; and some involve making models. Some matters cannot be examined usefully in a scientific way. Among them are matters that by their nature cannot be tested objectively and those that are essentially matters of morality. Science can sometimes be used to inform ethical decisions by identifying the likely consequences of particular actions but cannot be used to establish that some action is either moral or immoral.	The Nature of Science, Scientific Inquiry- The Scientific Method Propose questions and hypotheses that can be studied through scientific investigations and distinguish them from questions and hypothesis that cannot be examined scientifically	S.IP.07.11 Generate scientific questions based on observations, investigations, and research.
Variables and controls can affect the results of an investigation and ideally one variable should be tested at a time; however it is not always possible to identify and/or control all variables. If more than one variable changes at the same time in an experiment, the outcome of the experiment may not be clearly attributable to any one variable. Collaboration among investigators can often lead to research designs that are able to deal with situations where it is not possible to control all of the variables.	The Nature of Science, Scientific Inquiry- The Scientific Method Explain why only one variable (e.g., independent, dependent, control) can be manipulated at a time	S.IP.07.12 Design and conduct scientific investigations.

<p>It is part of scientific inquiry to evaluate the results of scientific investigations, experiments, observations, theoretical models, and the explanations proposed by other scientists. Evaluation includes reviewing the experimental procedures, examining the evidence, identifying faulty reasoning, pointing out statements that go beyond the evidence, and suggesting alternative explanations for the same observations. In areas where active research is being pursued and in which there is not a great deal of experimental or observational evidence and understanding, it is normal for scientists to differ with one another about the interpretation of the evidence or theory being considered. Different scientists might publish conflicting experimental results or might draw different conclusions from the same data. Ideally, scientists acknowledge such conflict and work towards finding evidence that will resolve their disagreement.</p>	<p>The Nature of Science, Scientific Inquiry- The Scientific Method Describe why questioning, response to criticism, replication, accurate record keeping, and open communication are integral to the process of science</p>	<p>S.RS.07.14 Evaluate scientific explanations based on current evidence and scientific principles. S.RS.07.12 Describe limitations in personal and scientific knowledge. S.RS.07.11 Evaluate the strengths and weaknesses of claims, arguments, and data.</p>
<p>When similar investigations give different results, the scientific challenge is to judge whether the differences are trivial or significant, and it often takes further studies to decide. Even with similar results, scientists may wait until an investigation has been repeated many times before accepting the results as correct.</p>	<p>The Nature of Science, Scientific Knowledge Analyze similar investigations that yield different results to determine the cause of the difference and develop a plan to eliminate the variables</p>	<p>S.IA.07.12 Evaluate data, claims, and personal knowledge through collaborative science discourse. S.IA.07.14 Draw conclusions from sets of data from multiple trials of a scientific investigation to draw conclusions.</p>
<p>Graphs can show a variety of possible relationships between two variables. As one variable increases uniformly, the other may do one of the following: increase or decrease steadily, increase or decrease faster and faster, get closer and closer to some limiting value, reach some intermediate maximum or minimum, alternately increase and decrease, increase or decrease in steps, or do something different from any of these. Graphs can also help to show patterns such as trends, varying rates of change, gaps, or clusters that are useful when making predictions about the phenomena being graphed.</p>	<p>The Nature of Science, Scientific Inquiry- Data Collection and Analysis Organize, display, and interpret scientific data in tables, graphs (e.g. line, circle, bar, histogram) and plots (e.g. stem-and-leaf, box-and-whisker, scatter)</p>	<p>S.IP.07.15 Construct charts and graphs from data and observations. S.IP.07.16 Identify patterns in data.</p>

	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Interpret and evaluate tables, charts, and graphs produced by others	S.IA.07.11 Analyze information from data tables and graphs to answer scientific questions. S.IA.07.12 Evaluate data, claims, and personal knowledge through collaborative science discourse.
	The Nature of Science, Scientific Inquiry- Data Collection and Analysis Cite evidence from tables, charts, and/or graphs in making arguments and claims in oral and written reports	S.IA.07.12 Evaluate data, claims, and personal knowledge through collaborative science discourse. S.IA.07.15 Use multiple sources of information to evaluate strengths and weaknesses of claims, arguments, or data. S.RS.07.13 Identify the need for evidence in making scientific decisions. S.IA.17.13 Communicate and defend findings of observations and investigations.
People of all backgrounds and with diverse interests, talents, qualities, and motivations engage in fields of science and engineering; some of these people work in teams and others work alone, but all communicate extensively with others. The work of science requires a variety of human abilities, qualities, and habits of mind (e.g., reasoning, insight, energy, skill, creativity, intellectual honesty, tolerance of ambiguity, skepticism, openness to new ideas). Scientists are employed by colleges and universities, business and industry, hospitals, and many government agencies. Their places of work include offices, classrooms, laboratories, farms, factories, and natural field settings ranging from space to the ocean floor.	The Nature of Science, Scientific Enterprise- Science and Society Describe the diverse nature of science and scientists past and present	S.RS.07.19 Describe how science and technology have advanced because of the contributions of many people throughout history and across cultures.

NHA Science Exemplar: Earth and Space Science

The student will participate in the study of the physical characteristics of our Earth and the evidence of those characteristics all around us. Topics include: rocks and minerals; the properties and movement of water on the earth; the relationship between land, air, and water; and the motion of Earth in space.

Grade Seven

UNIT: Weather and Water (Foss Learning Kit: Weather and Water)

NHA Science Content	NHA Objectives	MI GLCE
<p>Weather Measurement</p> <ul style="list-style-type: none"> •Temperature (use of a thermometer) •Precipitation (use of a rain gauge) •Wind direction and speed (Use of a wind vanes and an anemometer) •Humidity (Use of a hair hygrometer) Pressure (Use of a barometer) 	<p>Earth and Space Science, Weather and Climate Analyze common weather instruments</p>	<p>There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.</p>
<p>The Atmosphere</p> <ul style="list-style-type: none"> •Characteristics <ul style="list-style-type: none"> •Density of fluids (including air) •Pressure of fluids (including air) •Temperature of fluids (including air) •Layers of the Atmosphere and their properties (density, pressure, temperature, composition) <ul style="list-style-type: none"> • Troposphere • Stratosphere <ul style="list-style-type: none"> • Ozone layer • Mesosphere • Thermosphere 	<p>Earth and Space Science, Atmosphere Describe the composition, characteristics, and structure of the Earth's atmosphere</p>	<p>E.FE.07.11 Describe the atmosphere as a mixture of gases. E.FE.07.12 Compare and contrast the composition of the atmosphere at different elevations.</p>

<p>Interaction of the Earth and Sun</p> <ul style="list-style-type: none"> •Earth in space <ul style="list-style-type: none"> • 23.5 degree tilt of axis causes heat differentiation •Heat differentiation and the influence on weather <ul style="list-style-type: none"> •Seasonal changes across the earth 	<p>Earth and Space Science, Weather and Climate Analyze how radiant energy from the sun heats earth materials and influences weather</p>	<p>E.ES.07.11 Demonstrate, using a model or drawing, the relationship between the warming by the sun of the Earth and the water cycle as it applies to the atmosphere (evaporation, water vapor, warm air rising, cooling, condensation, clouds). E.ES.07.12 Describe the relationship between the warming of the atmosphere of the Earth by the sun and convection within the atmosphere and oceans. E.ES.07.13 Describe how the warming of the Earth by the sun produces winds and ocean currents. P.EN.07.61 Identify that nuclear reactions take place in the sun, producing heat and light. P.EN.07.62 Explain how only a tiny fraction of light energy from the sun is transformed to heat energy on Earth. E.ES.07.72 Describe how different weather occurs due to the constant motion of the atmosphere from the energy of the sun reaching the surface of the Earth.</p>
<p>The Water Cycle</p> <ul style="list-style-type: none"> •From ground to air <ul style="list-style-type: none"> •Evaporation <ul style="list-style-type: none"> • Relative humidity •Sublimation •Evapo-transpiration •Water storage in the atmosphere <ul style="list-style-type: none"> •Condensation <ul style="list-style-type: none"> • Dew point • Condensation nuclei •Clouds and precipitation •Following Precipitation <ul style="list-style-type: none"> • Infiltration, runoff, evaporation • Force of gravity vs. energy of water molecule • Runoff vs. infiltration <ul style="list-style-type: none"> • Permeability • Saturation 	<p>Earth and Space Science, Water on Earth Describe the various paths a water molecule might follow in the water cycle and explain factors that influence each path</p>	<p>E E.ES.07.81 Explain the water cycle and describe how evaporation, transpiration, condensation, cloud formation, precipitation, infiltration, surface runoff, ground water, and absorption occur within the cycle.</p>

<ul style="list-style-type: none"> • Pore space 		
<p>The Water Cycle</p> <ul style="list-style-type: none"> • Distribution of Water on Earth <ul style="list-style-type: none"> • Solid, liquid, gas states (e.g. glaciers, snow on mountains, polar ice caps, icebergs, lakes, oceans, seas, water vapor) • Freshwater vs. saltwater • Oceans <ul style="list-style-type: none"> • Basic composition and physical characteristics of oceans (e.g. currents, waves, features of the ocean floor, salinity) • Watersheds • Wetlands <ul style="list-style-type: none"> • Function and value to humans • Groundwater <ul style="list-style-type: none"> • Water table, aquifers, manmade wells, artesian wells, springs 	<p>Earth and Space Science, Water on Earth Describe the basic distinguishing characteristics of various locations of water on Earth (E.g. glaciers, ice caps, oceans, wetlands, etc.)</p>	<p>E.ES.07.82 Analyze the flow of water between the components of a watershed, including surface features (lakes, streams, rivers, wetlands) and groundwater.</p>
<p>Weather vs. Climate</p> <ul style="list-style-type: none"> • Air Masses <ul style="list-style-type: none"> – Interaction of fronts 	<p>Earth and Space Science, Weather and Climate Explain how the interaction of air masses influences weather conditions</p>	<p>E.ES.07.74 Describe weather conditions associated with frontal boundaries (cold, warm, stationary, and occluded) and the movement of major air masses and the jet stream across North America using a weather map.</p>
<p>Weather vs. Climate</p> <ul style="list-style-type: none"> • Weather Maps <ul style="list-style-type: none"> • Satellite weather images • Weather maps <ul style="list-style-type: none"> • Symbols (precipitation, pressure, temperature, dew point, cloud cover, winds) • Temperature contours, pressure contours 	<p>Earth and Space Science, Weather and Climate Interpret weather maps to describe local, regional and national weather conditions</p>	<p>S.IA.07.11 Analyze information from data tables and graphs to answer scientific questions.</p>

<p>Weather vs. Climate</p> <ul style="list-style-type: none"> •Factors Affecting Climate in a Region <ul style="list-style-type: none"> •Latitude <ul style="list-style-type: none"> • Global convection currents and resulting climate patterns at different latitudes •Elevation •Proximity to bodies of water •Position relative to mountains •Climate Regions 	<p>Earth and Space Science, Weather and Climate Compare and contrast climate regions around the world</p>	<p>E.ES.07.71 Compare and contrast the difference and relationship between climate and weather. E.ES.07.73 Explain how the temperature of the oceans affects the different climates on Earth because water in the oceans holds a large amount of heat.</p>
<p>The following objectives are process skills. As you teach the content objectives above, include opportunities for students to practice the following science skills.</p>		
<p>Symbolic equations can be used to summarize how the quantity of something changes over time or in response to other changes. Cycles, such as the seasons or body temperature, can be described by what their cycle length or frequency is, what their highest and lowest values are, and when these values occur. Different cycles range from many years down to a fraction of a second. Cyclic patterns evident in past events can be used to make predictions about future events. However, these predictions may not always match what actually happens. The way some systems behave is so erratic that patterns of change are not apparent. Small differences in how things start out can sometimes produce large differences in how they end up. Some events are so sensitive to small differences in initial conditions that their outcomes cannot be predicted. Trends based on what has happened in the past can be used to make predictions about what things will be like in the future. However, these predictions may not always match what actually happens.</p>	<p>The Nature of Science, Common Themes in Science Measure and graph change over time and analyze the results to determine patterns and trends or predict events</p>	<p>S.IP.07.16 Identify patterns in data.</p>

NHA Science Exemplar: The Living Environment

The student will explore the common themes that intertwine and connect all aspects of living things, such as the similarities of plants and animals, structure and functions of body parts, adaptations to new environments, and coexistence of animals in a variety of ecosystems.

Grade Seven

UNIT: Health

NHA Science Content	Michigan Grade Level Content Expectations
<p>Healthy Body</p> <ul style="list-style-type: none"> • The human body <ul style="list-style-type: none"> - Interaction of body systems • Adolescent changes <ul style="list-style-type: none"> - Voice - Acne - Physical changes <ul style="list-style-type: none"> • Height • Weight • Illness/disease prevention <ul style="list-style-type: none"> - Awareness of risk factors <ul style="list-style-type: none"> • Lifestyle • Family history - Sanitation/spread of germs <ul style="list-style-type: none"> • Air, indirect contact, person-to-person contact • HIV/AIDS Prevention <ul style="list-style-type: none"> - Transmission of disease <ul style="list-style-type: none"> • Facts vs. myths - Strategies for protection <ul style="list-style-type: none"> • Awareness of risky situations/behaviors • Not touching blood or used needles - Community resources of information/help <p>Healthy Diet</p> <ul style="list-style-type: none"> • Use of dietary guidelines <ul style="list-style-type: none"> - Food labels • Restaurants/fast food choices <ul style="list-style-type: none"> - Food preparation methods • Benefits of having healthy eating habits <ul style="list-style-type: none"> - Dental health - Reduced health risks • Consequences of an unhealthy diet • Influences on food choices <ul style="list-style-type: none"> - Family/friends - Culture/religion 	<p>Strand 1: Nutrition and Physical Activity</p> <p>Standard 1: Core Concepts</p> <p>1.1 Summarize the benefits of healthy eating, being physically active, and keeping the body hydrated, and the potential consequences of not doing so.</p> <p>1.2 Describe the federal dietary guidelines for teenagers, and the recommended amount of physical activity needed to achieve health benefits.</p> <p>Standard 2: Access Information</p> <p>1.3 Use nutrition information on food labels to compare products and select foods for specific dietary goals.</p> <p>1.4 Determine the accuracy of health claims on food packages and advertisements in order to choose foods that have the most nutritional value.</p> <p>1.5 Demonstrate the ability to access resources regarding healthy weight management and unhealthy eating patterns; and assess the validity of the resources.</p> <p>Standard 3: Health Behaviors</p> <p>1.6 Analyze characteristics of restaurant menu items and methods of preparation to identify healthier food choices one can make when eating out, including at fast food restaurants.</p> <p>1.7 Evaluate a typical day's food intake according to the federal dietary guidelines for teenagers.</p> <p>1.8 Describe moderate-intensity physical activities that are personally enjoyed and that can be enjoyed for a lifetime.</p> <p>Standard 4: Influences</p> <p>1.9 Analyze the influence of television, computer, and video games on physical activity.</p> <p>Standard 5: Goal Setting</p> <p>1.10 Assess personal barriers to healthy eating and being physically active, and develop practical solutions to remove these barriers.</p> <p>1.11 Make a personal plan for improving one's nutrition and incorporating physical activity into daily routines.</p> <p>Standard 8: Advocacy</p> <p>1.12 Advocate for the availability of appealing, nutrient-dense foods in the school cafeteria and throughout the school environment.</p> <p>Standard 1: Core Concepts (Recommended)</p> <p>1.13 Summarize the characteristics of a healthy body image and factors that</p>

---	--

- Peer relationships
 - Exclusiveness
 - Discriminating
 - Risk-taking behaviors
 - Name-calling/prejudice
- Drug, alcohol, & other drug use
 - Long-term and short-term effects of use
 - Alcohol and impaired driving
 - Health benefits to avoiding use
 - Difficulty of fighting addictions
 - Negative effects on relationships
 - Effects on athletic performance and weight management
 - Legal perspectives
 - Use vs. misuse of prescription drugs
 - Influences that promote use
 - Peer pressure
 - Strategies to refuse use
 - Adult/peer modeling
 - Advertising/media
 - Availability/cost
 - Tools to avoid use
 - Self-control
 - Role play of refusal situations
 - Responding to negative social influence and peer pressure
 - Caffeine, diet pills, and other drugs
 - Community resources of information/help

Healthy Minds

- Negative effects of media
 - Influence from television, video games, movies, advertising
- Self-Image
 - Importance of healthy perception of weight and body image
- Stress management
 - Talking about problems
 - Understanding that feelings of isolation and depression will pass
 - Examining situation leading to feelings
- Social interactions
 - Recognition of positive self-esteem
 - Interpersonal communication
 - Building positive relationships with peers, parents
 - Communicating care and respect to all people
 - Safe and risky behaviors in relationships
 - Handling peer pressure

car with someone who has been using alcohol or other drugs.

Standard 7: Social Skills

2.10 Demonstrate ways to support people who are abstaining from and/or trying to quit using alcohol, tobacco, or other drugs.

2.11 Compose persuasive advice for peers on how to stay alcohol, tobacco, and drug free.

STRAND 3: Safety

Standard 2: Access Information

3.5 Describe the characteristics of situations for which adult help is needed, including intimidating and dangerous situations, where valid help can be located, and how to access it for self or others.

Standard 3: Health Behaviors

3.6 Evaluate potential responses to violence to determine the probability of a safe outcome.

3.7 Describe strategies to stay safe when using the Internet.

3.8 Demonstrate skills and strategies for avoiding or escaping potentially dangerous situations.

Standard 4: Influences

3.10 Evaluate individual, group, and societal influences that promote peace and respectful behaviors, and those that promote violence and disrespectful behaviors.

Standard 6: Decision Making

3.11 Apply the problem-solving steps to hypothetical situations involving assault and intimidation, including sexual harassment.

Standard 7: Social Skills

3.12 Apply conflict resolution skills to real or hypothetical situations involving peers.

3.13 Demonstrate skills for dealing with intimidation, including sexual harassment.

Standard 3: Health Behaviors (Recommended)

3.15 Demonstrate the ability to properly and consistently use a variety of safety gear, including seat belts.

3.16 Assess situations for safety hazards and consequences, and make recommendations regarding safety procedures or safety gear to alleviate the risks.

3.17 Commit to taking individual action to promote peace.

Standard 8: Advocacy

3.19 Advocate for changes in home, school, or community environments that would increase safety.

STRAND 4: Social and Emotional Health

Standard 1: Core Concepts

4.1 Distinguish between passive, aggressive, and assertive communication.

4.2 Describe the warning signs, risk factors, and protective factors for

<ul style="list-style-type: none"> - Management of feelings and behaviors (anger) • Communication <ul style="list-style-type: none"> - Passive/aggressive/assertive • Decision making and problem solving skills • Conflict resolution <ul style="list-style-type: none"> - Possible causes of conflict - Non-violent strategies to manage conflict - Refusal/negotiation 	<p>depression and suicide.</p> <p>Standard 2: Access Information</p> <p>4.3 Analyze situations as to whether they call for simple acts of caring among friends, or require getting the help of caring adults.</p> <p>4.4 Demonstrate how to ask trusted adults and friends for help with emotional or mental health concerns for oneself or others, including the risk of suicide.</p> <p>4.5 Demonstrate the ability to locate school and community resources to assist with problems related to emotional health concerns, including when someone is in danger of hurting self or others.</p> <p>Standard 3: Health Behaviors</p> <p>4.6 Describe the signs and symptoms of stress.</p> <p>4.7 Demonstrate the ability to use stress management techniques.</p> <p>Standard 4: Influences</p> <p>4.8 Explain internal and external factors that help to determine how one acts toward others.</p> <p>4.9 Demonstrate using the problem solving steps to solve a problem.</p> <p>Standard 7: Social Skills</p> <p>4.10 Demonstrate ways to show caring and respect for others, including those with real or perceived differences (e.g., cultural differences, disabilities, gender, & sexual orientation).</p> <p>4.11 Demonstrate the ability to use assertive communication skills.</p> <p>4.12 Apply conflict resolution skills to real or hypothetical situations involving peers.</p> <p>Standard 1: Core Concepts (Recommended)</p> <p>4.13 Describe essential character traits needed for personal success and well being.</p> <p>Standard 3: Health Behaviors</p> <p>4.14 Apply skills to manage strong feelings.</p> <p>Standard 6: Decision Making</p> <p>4.15 Apply character traits during the process of making a decision.</p> <p>Standard 7: Social Skills</p> <p>4.16 Evaluate behaviors, including one's own, to determine if they are examples of essential character traits.</p> <p>Standard 8: Advocacy</p> <p>4.17 Advocate for a school environment</p> <p>STRAND 5: Personal Health and Wellness</p> <p>Standard 1: Core Concepts</p> <p>5.1 Describe the importance of rest and sleep for personal health.</p> <p>5.2 Explain how common infectious diseases are transmitted by air, indirect contact, and person-to-person contact.</p> <p>Standard 2: Access Information</p> <p>5.3 Locate resources in one's school and community, and on the Internet, related to personal health issues and concerns; and assess the validity of the</p>
---	---

resources.

Standard 3: Health Behaviors

5.4 Apply health practices that can prevent the spread of illness, including food borne illness.

5.5 Demonstrate basic first aid skills (i.e., controlling bleeding, Heimlich maneuver).

5.6 Analyze the characteristics of an illness or injury to determine whether it is necessary to seek medical care.

5.7 Demonstrate the proper steps to protect against harm from the sun.

Standard 4: Influences

5.8 Analyze the social influences that encourage or discourage a person to practice sun safety.

Standard 5: Goal Setting

5.9 Create a plan to incorporate adequate rest and sleep in daily routines.

Standard 2: Access Information (Recommended)

5.10 Locate resources in one's school and community, and on the Internet, for first aid information and training; and assess the validity of the resources.

5.11 Demonstrate the ability to access information about personal health products (e.g., deodorant, shampoo, sun screen, and dental care products), and evaluate the information's validity.

Standard 3: Health Behaviors

5.12 Explain strategies to support youth who have illnesses such as asthma, epilepsy, or diabetes.

Standard 4: Influences

5.13 Analyze the influence of media on selection of personal health care products.

STRAND 6: HIV AND STIs Prevention

Standard 1: Core Concepts

6.1 Explain how HIV is and is not transmitted.

6.2 Distinguish between facts and myths regarding HIV infection and AIDS.

Standard 2: Access Information

6.3 Explain when it is important to get adult, medical, and/or counseling help.

6.4 Describe sources of accurate information and assistance in one's community.

Standard 3: Health Behaviors

6.5 Analyze behaviors and situations that may result in increased risk for HIV and other sexually transmitted infections (STIs).

6.6 Analyze situations where assertive communication and refusal skills can be used to avoid and escape risky situations.

STRAND 7: Sexuality Education

(Note: State law makes whether to offer sexuality education a local district decision. Course content must

be reviewed by the district's Sex Education Advisory Board to determine

whether it is consistent with the district's board policies and approved sexuality education curriculum. If the district chooses to offer sexuality education, certain content must be included in an age-appropriate fashion in the K-12 instructional program. This content is integrated into these content expectations. For the specific language of the law, see Sections 380.1507, 1507a, and 1507b of the Michigan Compiled Laws at www.michiganlegislature.org.)

Standard 1: Core Concepts

7.1 Summarize the benefits of staying within behavioral limits and remaining abstinent.

7.2 Compare characteristics of healthy and unhealthy relationships, and describe ways to express caring for a boyfriend or girlfriend while staying abstinent.

Standard 3: Health Behaviors

7.3 Set personal boundaries and limits related to physical intimacy and sexual behavior.

7.4 Demonstrate skills to avoid and escape risky situations.

Standard 4: Influences

7.5 Examine viewpoints of parents and other trusted adults regarding teen relationships, abstinence, and sexual decisions.

7.6 Evaluate the impact of alcohol and other drug use on decisions regarding sexual behavior.

Standard 5: Goal Setting

7.7 Create a plan to stay within behavioral limits which protect one from HIV and STIs.

Standard 7: Social Skills

7.8 Demonstrate the ability to communicate one's behavioral limits and to show respect for the limits of others related to physical intimacy and sexual behavior..

7.9 Demonstrate the ability to use verbal and non-verbal ways to refuse participation in sexual behavior.

Standard 8: Advocacy

7.10 Demonstrate the ability to be positive peer role models in the school and community.

NHA Science Content To Be Integrated Into Each Unit

SCIENTIFIC KNOWLEDGE

When similar investigations give different results, the scientific challenge is to judge whether the differences are trivial or significant, and it often takes further studies to decide. Even with similar results, scientists may wait until an investigation has been repeated many times before accepting the results as correct.

Although all scientific ideas are tentative and subject to change and improvement in principle, for most major ideas in science, there is much experimental and observational confirmation. Those ideas are not likely to change greatly in the future. Some of these ideas and knowledge are very old and still applicable. Scientists do and have changed their ideas about nature when they encounter new experimental evidence that does not match their existing explanations. When new experimental results are inconsistent with existing, well established ideas, scientists pursue further experimentation to determine whether the results are flawed or the existing ideas require modification.

SCIENTIFIC INQUIRY

Different kinds of questions suggest different kinds of scientific investigations. Some investigations involve observing and describing objects, organisms, or events; some involve collecting specimens; some involve experiments; some involve seeking more information; some involve discovery of new objects and phenomena; and some involve making models. Some matters cannot be examined usefully in a scientific way. Among them are matters that by their nature cannot be tested objectively and those that are essentially matters of morality. Science can sometimes be used to inform ethical decisions by identifying the likely consequences of particular actions but cannot be used to establish that some action is either moral or immoral.

Variables and controls can affect the results of an investigation and ideally one variable should be tested at a time; however it is not always possible to identify and/or control all variables. If more than one variable changes at the same time in an experiment, the outcome of the experiment may not be clearly

Michigan Grade Level Content Expectations

There are no Michigan Grade Level Content Expectations that meet this NHA content.

attributable to any one variable. Collaboration among investigators can often lead to research designs that are able to deal with situations where it is not possible to control all of the variables.

It is part of scientific inquiry to evaluate the results of scientific investigations, experiments, observations, theoretical models, and the explanations proposed by other scientists. Evaluation includes reviewing the experimental procedures, examining the evidence, identifying faulty reasoning, pointing out statements that go beyond the evidence, and suggesting alternative explanations for the same observations. In areas where active research is being pursued and in which there is not a great deal of experimental or observational evidence and understanding, it is normal for scientists to differ with one another about the interpretation of the evidence or theory being considered. Different scientists might publish conflicting experimental results or might draw different conclusions from the same data. Ideally, scientists acknowledge such conflict and work towards finding evidence that will resolve their disagreement.

Technology used (safely) to gather data enhances accuracy and allows scientists to analyze and quantify results of investigations.

Graphs can show a variety of possible relationships between two variables. As one variable increases uniformly, the other may do one of the following: increase or decrease steadily, increase or decrease faster and faster, get closer and closer to some limiting value, reach some intermediate maximum or minimum, alternately increase and decrease, increase or decrease in steps, or do something different from any of these. Graphs can also help to show patterns such as trends, varying rates of change, gaps, or clusters that are useful when making predictions about the phenomena being graphed.

SCIENTIFIC ENTERPRISE

People of all backgrounds and with diverse interests, talents, qualities, and motivations engage in fields of science and engineering; some of these people work in teams and others work alone, but all communicate extensively with others. The work of science requires a variety of human abilities, qualities, and habits of mind (e.g., reasoning, insight, energy, skill, creativity, intellectual honesty, tolerance of ambiguity, skepticism, openness to new ideas). Scientists are employed by colleges and universities, business and industry, hospitals, and many government agencies. Their places of work include offices, classrooms, laboratories, farms, factories, and natural field settings ranging from space to the ocean floor.

Scientific knowledge and the procedures used by scientists influence the way many individuals think about themselves, others, and the environment.

Societal challenges often inspire questions for scientific research. Social and economic forces strongly influence which science research programs are pursued and funded

COMMON THEMES

A system can include processes as well as things. Thinking about things as systems means looking for how every part relates to others. The output from one part of a system (which can include material, energy, or information) can become the input to other parts. Such feedback can serve to control what goes on in the system as a whole. Any system is usually connected to other systems, both internally and externally. Thus a system may be thought of as containing subsystems and as being a sub-system of a larger system. Some portion of the output of a system may be fed back to that system's input. Systems are defined by placing boundaries around collections of interrelated things to make them easier to study. Regardless of where the boundaries are placed, a system still interacts with its surrounding environment. Therefore, when studying a system, it is important to keep track of what enters or leaves the system. A system may stay the same because nothing is influencing it or the influences on it are balanced. Many systems contain feedback mechanisms that serve to keep changes within certain limits.

Symbolic equations can be used to summarize how the quantity of something changes over time or in response to other changes. Cycles, such as the seasons or body temperature, can be described by what their cycle length or frequency is, what their highest and lowest values are, and when these values occur. Different cycles range from many years down to a fraction of a second. Cyclic patterns evident in past events can be used to make predictions about future events. However, these predictions may not always match what actually happens. The way some systems behave is so erratic that patterns of change are not apparent. Small differences in how things start out can sometimes produce large differences in how they end up. Some events are so sensitive to small differences in initial conditions that their outcomes cannot be predicted. Trends based on what has happened in the past can be used to make predictions about what things will be like in the future. However, these predictions may not always match what actually happens.

Some properties of an object depend on its length, some depend on its area, and some depend on its volume (for instance, cooling rates of different-sized containers of water, strength of different-sized constructions from the same material, flight characteristics of different-sized model airplanes). As the complexity of any system increases, gaining an understanding of it depends increasingly on summaries, such as averages and ranges, and on descriptions of typical examples of that system. Natural phenomena often involve sizes,

durations, and speeds that are extremely small or extremely large. These phenomena may be difficult to appreciate because they involve magnitudes far outside human experience.

NHA Unit Objectives

- Analyze similar investigations that yield different results to determine the cause of the difference and develop a plan to eliminate the variables
- Trace the development of an idea to a scientific theory
- Propose questions and hypotheses that can be studied through scientific investigations and distinguish them from questions and hypothesis that cannot be examined scientifically
- Explain why only one variable (e.g., independent, dependent, control) can be manipulated at a time
- Describe why questioning, response to criticism, replication, accurate record keeping, and open communication are integral to the process of science
- Use appropriate tools, technologies and metric measurements to gather, analyze, and interpret data and report results
- Describe basic safety procedures in science such as recognizing potential hazards, cautiously manipulating materials and equipment and conducting appropriate procedures
- Organize, display, and interpret scientific data in tables, graphs (e.g. line, circle, bar, histogram) and plots (e.g. stem-and-leaf, box-and-whisker, scatter)
- Interpret and evaluate tables, charts, and graphs produced by others
- Cite evidence from tables, charts, and/or graphs in making arguments and claims in oral and written reports
- Describe the diverse nature of science and scientists past and present
- Describe ways in which science and society influence one another
- Analyze the parts, subsystems and interactions of a system
- Measure and graph change over time and analyze the results to determine patterns and trends or predict events
- Compare and contrast the properties of objects as they change in scale

NHA Science Exemplar: Earth and Space Science

The student will participate in the study of the physical characteristics of our Earth and the evidence of those characteristics all around us. Topics include: rocks and minerals; the properties and movement of water on the earth; the relationship between land, air, and water; and the motion of Earth in space.

Grade Eight

UNIT: Earth in Space (Delta Learning Kit: Earth, Moon, and Sun)

NOTE- This unit must be taught prior to the MEAP in the fall.

NHA Science Content	NHA Objectives	MI GLCE
<p>The Solar System</p> <ul style="list-style-type: none"> Sun, moon, and planets (e.g. temperatures, pressure conditions, surface features, gravitational pull, position in the Solar System, atmospheric conditions, actual and apparent motion, and ability to support life) Meteors, asteroids, and comets 	<p>Earth and Space Science, Characteristics of Objects in Space Compare and contrast the major characteristics of bodies in the Solar System</p>	<p>MI.E.ST.05.11 Design a model of the solar system that shows the relative order and scale of the planets, dwarf planets, comets, and asteroids to the sun.</p>
<p>Gravity in Space</p> <ul style="list-style-type: none"> Ideas of Galileo, Kepler, Newton, Einstein Gravity as a force affecting bodies in space <ul style="list-style-type: none"> Weight vs. mass (Weight=mass X acceleration due to gravity) Every object exerts gravitational force on every other object The amount of gravitational force depends on the mass of objects and the distance between them Orbits <ul style="list-style-type: none"> Floating vs. falling Forces in two dimensions 	<p>Earth and Space Science, Characteristics of Objects in Space Compare the size and distance of objects within systems in the universe using either astronomical units or light years, depending on the distance</p>	<p>(There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.)</p>
	<p>Earth and Space Science, Characteristics of Objects in Space Describe the appearance and apparent motion of groups of stars in the night sky relative to Earth and how various cultures have understood and used them for navigation and calendars</p>	<p>MI.E.ST.05.23 Explain the apparent motion of the stars (constellations) and the sun across the sky.</p>
<p>History of Astronomy</p> <ul style="list-style-type: none"> Aristotle and Ptolemy <ul style="list-style-type: none"> Geocentric model and epicycles Galileo <ul style="list-style-type: none"> Heliocentric model 	<p>Earth and Space Science, Characteristics of Objects in Space Describe basic characteristics of the Milky Way and recognize it as one galaxy among billions in the universe</p>	<p>There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.</p>

<p>Earth's Rotation and Revolution</p> <ul style="list-style-type: none"> The plane of the Earth and Sun and Earth's tilt on its axis Latitude and longitude lines and relationship to earth in space <ul style="list-style-type: none"> Tropic of Cancer Tropic of Capricorn <p>Phases of the Moon</p> <ul style="list-style-type: none"> First quarter, second quarter, new moon, 3rd quarter, full moon waxing vs. waning Gibbous vs. crescent <p>Eclipses</p> <ul style="list-style-type: none"> Solar eclipses Lunar eclipses <p>Tides</p> <ul style="list-style-type: none"> Neap and spring tides High and low tides <p>Distances in Space</p> <ul style="list-style-type: none"> Light years vs. astronomical units <ul style="list-style-type: none"> Nearest star to the Sun Distance across Milky Way Distance across universe <p>Stars</p> <ul style="list-style-type: none"> Distances and basic properties (e.g. sizes, life cycles) Actual and apparent motion of stars <ul style="list-style-type: none"> Big Dipper around Polaris <ul style="list-style-type: none"> Astrolabes and orienteering using Polaris <p>Galaxies</p> <ul style="list-style-type: none"> Characteristics of the Milky Way Number of galaxies and stars in the universe 	<p>Earth and Space Science, Interaction of the Sun, Earth, and Moon Analyze and describe the role of gravity in celestial phenomena</p>	<p>MI.E.ST.05.21 Describe the motion of planets and moons in terms of rotation on axis and orbits due to gravity.</p>
	<p>Earth and Space Science, Interaction of the Sun, Earth, and Moon Compare and contrast the ideas of Ptolemy, Aristotle, Copernicus, and Galileo regarding Earth's position and motion in space</p>	<p>There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.</p>
	<p>Earth and Space Science, Interaction of the Sun, Earth, and Moon Explain how the rotation and revolution of Earth and the tilt of Earth on its axis cause observed phenomena on Earth such as days/nights and seasons</p>	<p>MI.E.ST.05.21 Describe the motion of planets and moons in terms of rotation on axis and orbits due to gravity. MI.E.ES.05.61 Demonstrate and explain seasons using a model. MI.E.ES.05.62 Explain how the revolution of the Earth around the sun defines a year.</p>
	<p>Earth and Space Science, Interaction of the Sun, Earth, and Moon Correlate the pattern of change in the location and phase of the Moon with the actual motion of the Moon around Earth</p>	<p>MI.E.ST.05.22 Explain the phases of the moon.</p>
	<p>Earth and Space Science, Interaction of the Sun, Earth, and Moon Describe how the relative positions of the Sun, Earth , and Moon can result in solar and lunar eclipses</p>	<p>MI.E.ST.05.24 Explain lunar and solar eclipses.</p>
	<p>Earth and Space Science, Interaction of the Sun, Earth, and Moon Explain tides as they relate to the position and gravitational force of the Sun and Moon</p>	<p>MI.E.ST.05.25 Explain the tides of the oceans as they relate to the gravitational pull and orbit of the moon.</p>

NHA Science Exemplar: Earth and Space Science

The student will participate in the study of the physical characteristics of our Earth and the evidence of those characteristics all around us. Topics include: rocks and minerals; the properties and movement of water on the earth; the relationship between land, air, and water; and the motion of Earth in space.

Grade Eight

UNIT: Earth Systems

NHA Science Content	Michigan Grade Level Content Expectations
<p>Earth as a System</p> <ul style="list-style-type: none"> • Parts vs. whole <ul style="list-style-type: none"> - Hydrosphere - Atmosphere - Lithosphere - Biosphere - Cryosphere - Anthrosphere • Earth as a mechanistic system <ul style="list-style-type: none"> - Open vs. closed - Dynamic equilibrium <p>Impact of Events on Earth Systems</p> <ul style="list-style-type: none"> • Event to sphere, sphere to event and sphere to sphere interactions. Students research and propose possible interactions. <ul style="list-style-type: none"> - Forest fires (for example). <ul style="list-style-type: none"> • Destroy plants <ul style="list-style-type: none"> - Absence of plants leads to increased erosion because of fewer roots to hold soil <ul style="list-style-type: none"> • Increased erosion increases muddiness of water in streams <ul style="list-style-type: none"> - Increased muddiness could affect plants and animals in the stream - Deforestation - Volcanic eruptions - Earthquakes - Ice shelf disintegration - Hurricanes - Human events (for example) <ul style="list-style-type: none"> • Air pollution <ul style="list-style-type: none"> - Global warming <ul style="list-style-type: none"> • Increases in ocean temperatures <ul style="list-style-type: none"> - Algal blooms 	<p>There are no Michigan Grade Level Content Expectations that meet this NHA content.</p>

<ul style="list-style-type: none"> • Reduces oxygen in water and can cause other organisms to die - Damaged reefs <ul style="list-style-type: none"> • Organisms dependent on the reef habitat die - Polar ice caps melting <ul style="list-style-type: none"> • Ice caps are reflecting light (albedo effect) so less reflection means more absorption which causes more global warming • Fertilizers <ul style="list-style-type: none"> - Eutrophication of water bodies <ul style="list-style-type: none"> • Causes excess plant growth in the water <ul style="list-style-type: none"> - Excess plants block sunlight and cause death to plants • Dead plant decomposition reduces amount of oxygen in water and causes other organisms to die 	
NHA Unit Objectives	
<ul style="list-style-type: none"> • Compare the Earth system to other systems of parts that make up a whole • Compare and contrast different types of systems and identify what makes Earth an open mechanistic system • Analyze various events on Earth and describe the impact they have across multiple spheres of the Earth 	

NHA Science Exemplar: The Living Environment

The student will explore the common themes that intertwine and connect all aspects of living things, such as the similarities of plants and animals, structure and functions of body parts, adaptations to new environments, and coexistence of animals in a variety of ecosystems.

Grade Eight

UNIT: Species Over Time

NHA Science Content	Michigan Grade Level Content Expectations
<p>Adaptations of Animals</p> <ul style="list-style-type: none">Anatomical structuresPhysiological processesBehavioral adaptationLife cycles that aid in survival of the speciesInherited vs. acquired traits <p>Effects of Sexual vs. Asexual Reproduction</p> <ul style="list-style-type: none">Advantages and disadvantages of both<ul style="list-style-type: none">Comparing how each impacts the spread of traits that are detrimental or beneficial for survival <p>Natural Selection</p> <ul style="list-style-type: none">The impact of environmental factors on traits that are passed to offspring, and the resulting change in the dominant traits of the populationMutationsHeritable traits and varying reproductive success<ul style="list-style-type: none">There must be heritable variation in a trait, like beak size, color pattern, etc. in a populationThere must be differential survival and reproduction associated with the possession of that traitThe traits passed on can only be from the traits possessed by ancestors (for example, the polar bear would benefit from a white nose, but the trait so far hasn't been one available to be passed along)The example of antibiotic resistanceArtificial selection<ul style="list-style-type: none">Selective breeding- illustrates the concept and diverse results of natural selectionMicroevolution vs. macroevolution- Our focus at this level is on microevolution<ul style="list-style-type: none">Micro- a result of changes in the genetic composition of a population with each new generation	<p>There are no Michigan Grade Level Content Expectations that meet this NHA content.</p>

<ul style="list-style-type: none"> - Macro- the gradual branching of populations into separate species over time <p>Extinction of Species</p> <ul style="list-style-type: none"> • Fossil record • Human related causes • Natural events 	
NHA Unit Objectives	
<ul style="list-style-type: none"> • Analyze the inherited and learned structures, behavior and physiology of organisms that contribute to survival in their particular environment • Explain the impact of both sexual and asexual reproduction on the spread of traits that are detrimental or beneficial for the survival of an organism • Analyze the process of natural selection and evaluate evidence of it as a mechanism that leads to diversity of species over time • Describe how fossils provide evidence of the appearance, diversification, and extinction of organisms from the past 	

NHA Science Exemplar: The Living Environment

The student will explore the common themes that intertwine and connect all aspects of living things, such as the similarities of plants and animals, structure and functions of body parts, adaptations to new environments, and coexistence of animals in a variety of ecosystems.

Grade Eight

UNIT: Body Systems

NHA Science Content	Michigan Grade Level Content Expectations
<p>Body Organization</p> <ul style="list-style-type: none"> Cells→Tissues→Organs→Organ Systems <p>Review of Body Systems</p> <ul style="list-style-type: none"> Skeletal and muscular systems <ul style="list-style-type: none"> Function is locomotion Exoskeleton vs. endoskeleton Relationship of structure to mechanical advantage of simple machines Digestive system <ul style="list-style-type: none"> Function is to breakdown food for energy Upper gastrointestinal tract <ul style="list-style-type: none"> Mouth, pharynx esophagus, stomach Lower gastrointestinal tract <ul style="list-style-type: none"> Intestines, anus Circulatory system <ul style="list-style-type: none"> Function is to move materials between cells Heart, blood, veins, arteries Respiratory system <ul style="list-style-type: none"> Function is to provide oxygen so energy can be released, and remove carbon dioxide Nostrils, nasal cavity, trachea, lungs Excretory system <ul style="list-style-type: none"> Function is to dispose of waste Kidneys, bladder, urethra Nervous system <ul style="list-style-type: none"> Function is to coordinate the skeletal and muscular systems The brain, reflexes, senses Effects of drugs and alcohol Endocrine system <ul style="list-style-type: none"> Function is to regulate body processes and maintain equilibrium in systems Hormones 	<p>There are no Michigan Grade Level Content Expectations that meet this NHA content.</p>

<p>Comparison of Body Systems</p> <ul style="list-style-type: none"> • Adaptations in body systems relate to the needs of the species <p>Interaction of Body Systems</p> <ul style="list-style-type: none"> • Negative feedback • Homeostasis 	
NHA Unit Objectives	
<ul style="list-style-type: none"> • Compare the body systems of various animals and explain how differences relate to the needs of the animals in their habitats • Describe the interaction between each of the human body systems, including homeostasis and the mechanisms that maintain the balance of body systems 	

NHA Science Exemplar: Physical Science

The student will investigate the laws of the physical world that form our understanding of phenomena such as the motion of objects, the characteristics of matter, and the various forms of energy applicable to our lives.

Grade Eight

UNIT: Electricity and Magnetism (Delta Learning Kit: Electrical Connections)

--	---

- Personal influences on health
 - Food choices/exercise/sleep /activity
 - Importance of daily physical activity
 - Anything put into your body
- Family influences on health
 - Physical, emotional, social
 - Ability of family to provide for its members
- Peer relationships
 - Exclusiveness
 - Discriminating
 - Risk-taking behaviors
 - Name-calling/prejudice
- Drug, alcohol, & other drug use
 - Long-term and short-term effects of use
 - Alcohol and impaired driving
 - Health benefits to avoiding use
 - Difficulty of fighting addictions
 - Negative effects on relationships
 - Effects on athletic performance and weight management
 - Legal perspectives
 - Use vs. misuse of prescription drugs
 - Influences that promote use
 - Peer pressure
 - Strategies to refuse use
 - Adult/peer modeling
 - Advertising/media
 - Availability/cost
 - Tools to avoid use
 - Self-control
 - Role play of refusal situations
 - Responding to negative social influence and peer pressure
 - Caffeine, diet pills, and other drugs
 - Community resources of information/help

Healthy Minds

- Negative effects of media
 - Influence from television, video games, movies, advertising
 - Connection to decreased levels of physical activity
- Self-Image
 - Importance of healthy perception of weight and body image
- Stress management
 - Talking about problems
 - Understanding that feelings of isolation and depression will pass

2.9 Demonstrate skills to avoid hazards due to another's use of alcohol, tobacco, or other drugs, including avoiding secondhand smoke and riding in a car with someone who has been using alcohol or other drugs.

Standard 7: Social Skills

2.10 Demonstrate ways to support people who are abstaining from and/or trying to quit using alcohol, tobacco, or other drugs.

2.11 Compose persuasive advice for peers on how to stay alcohol, tobacco, and drug free.

STRAND 3: Safety

Standard 2: Access Information

3.5 Describe the characteristics of situations for which adult help is needed, including intimidating and dangerous situations, where valid help can be located, and how to access it for self or others.

Standard 3: Health Behaviors

3.6 Evaluate potential responses to violence to determine the probability of a safe outcome.

3.7 Describe strategies to stay safe when using the Internet.

3.8 Demonstrate skills and strategies for avoiding or escaping potentially dangerous situations.

Standard 4: Influences

3.10 Evaluate individual, group, and societal influences that promote peace and respectful behaviors, and those that promote violence and disrespectful behaviors.

Standard 6: Decision Making

3.11 Apply the problem-solving steps to hypothetical situations involving assault and intimidation, including sexual harassment.

Standard 7: Social Skills

3.12 Apply conflict resolution skills to real or hypothetical situations involving peers.

3.13 Demonstrate skills for dealing with intimidation, including sexual harassment.

Standard 3: Health Behaviors (Recommended)

3.15 Demonstrate the ability to properly and consistently use a variety of safety gear, including seat belts.

3.16 Assess situations for safety hazards and consequences, and make recommendations regarding safety procedures or safety gear to alleviate the risks.

3.17 Commit to taking individual action to promote peace.

Standard 8: Advocacy

3.19 Advocate for changes in home, school, or community environments that would increase safety.

STRAND 4: Social and Emotional Health

Standard 1: Core Concepts

<ul style="list-style-type: none"> - Examining situation leading to feelings • Social interactions <ul style="list-style-type: none"> - Positive vs. harmful relationships - Recognition of positive self-esteem - Interpersonal communication <ul style="list-style-type: none"> • Building positive relationships with peers, parents • Communicating care and respect to all people - Safe and risky behaviors in relationships - Handling peer pressure - Management of feelings and behaviors (anger) <ul style="list-style-type: none"> • Responding to violence • Communication <ul style="list-style-type: none"> - Passive/aggressive/assertive • Decision making and problem solving skills • Conflict resolution <ul style="list-style-type: none"> - Possible causes of conflict - Non-violent strategies to manage conflict - Refusal/negotiation 	<p>4.1 Distinguish between passive, aggressive, and assertive communication.</p> <p>4.2 Describe the warning signs, risk factors, and protective factors for depression and suicide.</p> <p>Standard 2: Access Information</p> <p>4.3 Analyze situations as to whether they call for simple acts of caring among friends, or require getting the help of caring adults.</p> <p>4.4 Demonstrate how to ask trusted adults and friends for help with emotional or mental health concerns for oneself or others, including the risk of suicide.</p> <p>4.5 Demonstrate the ability to locate school and community resources to assist with problems related to emotional health concerns, including when someone is in danger of hurting self or others.</p> <p>Standard 3: Health Behaviors</p> <p>4.6 Describe the signs and symptoms of stress.</p> <p>4.7 Demonstrate the ability to use stress management techniques.</p> <p>Standard 4: Influences</p> <p>4.8 Explain internal and external factors that help to determine how one acts toward others.</p> <p>4.9 Demonstrate using the problem solving steps to solve a problem.</p> <p>Standard 7: Social Skills</p> <p>4.10 Demonstrate ways to show caring and respect for others, including those with real or perceived differences (e.g., cultural differences, disabilities, gender, & sexual orientation).</p> <p>4.11 Demonstrate the ability to use assertive communication skills.</p> <p>4.12 Apply conflict resolution skills to real or hypothetical situations involving peers.</p> <p>Standard 1: Core Concepts (Recommended)</p> <p>4.13 Describe essential character traits needed for personal success and well being.</p> <p>Standard 3: Health Behaviors</p> <p>4.14 Apply skills to manage strong feelings.</p> <p>Standard 6: Decision Making</p> <p>4.15 Apply character traits during the process of making a decision.</p> <p>Standard 7: Social Skills</p> <p>4.16 Evaluate behaviors, including one's own, to determine if they are examples of essential character traits.</p> <p>Standard 8: Advocacy</p> <p>4.17 Advocate for a school environment in which everyone treats each other with caring and respect.</p> <p>Strand 5: Personal Health and Wellness</p> <p>Standard 1: Core Concepts</p> <p>5.1 Describe the importance of rest and sleep for personal health.</p> <p>5.2 Explain how common infectious diseases are transmitted by air, indirect contact, and person-to-person contact.</p>
---	--

	<p>Standard 2: Access Information</p> <p>5.3 Locate resources in one's school and community, and on the Internet, related to personal health issues and concerns; and assess the validity of the resources.</p> <p>Standard 3: Health Behaviors</p> <p>5.4 Apply health practices that can prevent the spread of illness, including food borne illness.</p> <p>5.5 Demonstrate basic first aid skills (i.e., controlling bleeding, Heimlich maneuver).</p> <p>5.6 Analyze the characteristics of an illness or injury to determine whether it is necessary to seek medical care.</p> <p>5.7 Demonstrate the proper steps to protect against harm from the sun.</p> <p>Standard 4: Influences</p> <p>5.8 Analyze the social influences that encourage or discourage a person to practice sun safety.</p> <p>Standard 5: Goal Setting</p> <p>5.9 Create a plan to incorporate adequate rest and sleep in daily routines.</p> <p>Standard 2: Access Information (Recommended)</p> <p>5.10 Locate resources in one's school and community, and on the Internet, for first aid information and training; and assess the validity of the resources.</p> <p>5.11 Demonstrate the ability to access information about personal health products (e.g., deodorant, shampoo, sun screen, and dental care products), and evaluate the information's validity.</p> <p>Standard 3: Health Behaviors</p> <p>5.12 Explain strategies to support youth who have illnesses such as asthma, epilepsy, or diabetes.</p> <p>Standard 4: Influences</p> <p>5.13 Analyze the influence of media on selection of personal health care products.</p> <p>STRAND 6: HIV AND STIs Prevention</p> <p>Standard 1: Core Concepts</p> <p>6.1 Explain how HIV is and is not transmitted.</p> <p>6.2 Distinguish between facts and myths regarding HIV infection and AIDS.</p> <p>Standard 2: Access Information</p> <p>6.3 Explain when it is important to get adult, medical, and/or counseling help.</p> <p>6.4 Describe sources of accurate information and assistance in one's community.</p> <p>Standard 3: Health Behaviors</p> <p>6.5 Analyze behaviors and situations that may result in increased risk for HIV and other sexually transmitted infections (STIs).</p> <p>6.6 Analyze situations where assertive communication and refusal skills can be used to avoid and escape risky situations.</p>

The Nature of Science
Measurement Topic: Scientific Inquiry - The Scientific Method
Kindergarten

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	Advanced grade level performance
3.5	Mastered grade level, some advanced grade level performance
Score 3.0	Mastered grade level expectations by: <ul style="list-style-type: none"> Generating basic questions (who, what, when, where, why, and "I wonder...") from observations of the natural world (Units Providing Good Scoring Opportunities: How Do We Learn, Seasons) Making observations related to the 5 senses about living things, nonliving objects, and events (Units Providing Good Scoring Opportunities: How Do We Learn, Introduction to Animals)

2.5	Basic understanding secure, progressing toward mastery
Score 2.0	Basic understanding achieved such as: <ul style="list-style-type: none"> Recognizing or recalling specific terminology such as: <ul style="list-style-type: none"> Question Observations Performing basic processes, such as: <ul style="list-style-type: none"> Recognizing or recalling accurate statements about the 5 senses Recognizing or recalling examples of basic questions
1.5	Basic understanding, with some assistance
1.0	Basic understanding, only with assistance
0.5	Some basic understanding, only with assistance

The Nature of Science
Measurement Topic: Scientific Inquiry – Data Collection and Analysis
Kindergarten

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	Advanced grade level performance
3.5	Mastered grade level, some advanced grade level performance
Score 3.0	Mastered grade level expectations by: <ul style="list-style-type: none"> • Making measurements of length, weight, temperature, capacity and volume using standard and nonstandard units and appropriate instruments in investigations (UNIT: How Do We Learn) • Safely using tools and instruments (<i>e.g., thermometers, magnifiers, rulers, balances, scissors, hammers, pliers, screwdrivers</i>) to construct, measure, and/or look at objects for investigations (UNIT: How Do We Learn) • Recording and communicating findings from observations of an investigation, using a variety of methods such as drawings, journaling, pictographs, and bar graphs (Units Providing Good Scoring Opportunities: How Do We Learn, Introduction to animals, Seasons)

2.5	Basic understanding secure, progressing toward mastery
Score 2.0	Basic understanding achieved such as: <ul style="list-style-type: none"> • Recognizing or recalling specific terminology such as: <ul style="list-style-type: none"> ○ Measurement ○ Tools • Performing basic processes, such as: <ul style="list-style-type: none"> ○ Making measurements of length, weight, temperature, capacity and volume in a practice situation ○ Demonstrating the safe use of tools and instruments ○ Recognizing or recalling accurate statements about the reasons for recording data
1.5	Basic understanding, with some assistance
1.0	Basic understanding, only with assistance
0.5	Some basic understanding, only with assistance

The Living Environment
Measurement Topic: Classification
 Kindergarten

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	Advanced grade level performance
3.5	Mastered grade level, some advanced grade level performance
Score 3.0	Mastered grade level expectations by: <ul style="list-style-type: none"> Categorizing organisms based on a variety of simple criteria (<i>e.g., body features, appendages, methods of movement, body covering</i>) (UNIT: Introduction to Animals)

2.5	Basic understanding secure, progressing toward mastery
Score 2.0	Basic understanding achieved such as: <ul style="list-style-type: none"> Recognizing or recalling specific terminology such as: <ul style="list-style-type: none"> Animal features Performing basic processes, such as: <ul style="list-style-type: none"> Identifying examples of animals that exhibit provided characteristics
1.5	Basic understanding, with some assistance
1.0	Basic understanding, only with assistance
0.5	Some basic understanding, only with assistance

The Living Environment
Measurement Topic: Needs of Organisms
 Kindergarten

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	Advanced grade level performance
3.5	Mastered grade level, some advanced grade level performance
Score 3.0	Mastered grade level expectations by: <ul style="list-style-type: none"> Describing the basic needs of a wide variety of animals, such as fish, snails, worms, birds, and other common animals native to the region (UNIT: Introduction to Animals) Explaining how food is used by animals (UNIT: Introduction to Animals) Comparing and contrasting the needs of animals with the needs of humans which include safety precautions, good hygiene and healthy habits(UNIT: Introduction to Animals)

2.5	Basic understanding secure, progressing toward mastery
Score 2.0	Basic understanding achieved such as: <ul style="list-style-type: none"> Recognizing or recalling specific terminology such as: <ul style="list-style-type: none"> Needs Growth Performing basic processes, such as: <ul style="list-style-type: none"> Recognizing or recalling examples of the basic needs of animals (e.g. air, water, food, shelter) recognizing or recalling examples of the basic needs of humans (e.g. food, water, shelter, security, good hygiene, exercise, good nutrition, avoiding harmful substances)
1.5	Basic understanding, with some assistance
1.0	Basic understanding, only with assistance
0.5	Some basic understanding, only with assistance

The Living Environment
Measurement Topic: Life Cycles of Plants and Animals
 Kindergarten

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	Advanced grade level performance
3.5	Mastered grade level, some advanced grade level performance
Score 3.0	Mastered grade level expectations by: <ul style="list-style-type: none"> Describing the basic differences in life cycles of common animals, including humans, as they grow and develop over time (UNIT: Introduction to Animals)

2.5	Basic understanding secure, progressing toward mastery
Score 2.0	Basic understanding achieved such as: <ul style="list-style-type: none"> Recognizing or recalling specific terminology such as: <ul style="list-style-type: none"> Life cycle Performing basic processes, such as: <ul style="list-style-type: none"> Recognizing or recalling accurate statements about the life cycles of animals
1.5	Basic understanding, with some assistance
1.0	Basic understanding, only with assistance
0.5	Some basic understanding, only with assistance

The Living Environment
Measurement Topic: Ecosystems
 Kindergarten

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	Advanced grade level performance
3.5	Mastered grade level, some advanced grade level performance
Score 3.0	Mastered grade level expectations by: <ul style="list-style-type: none"> Describing how the behavior of animals is influenced by the conditions of their environment (UNIT: Introduction to Animals)

2.5	Basic understanding secure, progressing toward mastery
Score 2.0	Basic understanding achieved such as: <ul style="list-style-type: none"> Recognizing or recalling specific terminology such as: <ul style="list-style-type: none"> Animal behavior Performing basic processes, such as: <ul style="list-style-type: none"> Recognizing or recalling accurate statements about the influence of the environment on the behavior of animals
1.5	Basic understanding, with some assistance
1.0	Basic understanding, only with assistance
0.5	Some basic understanding, only with assistance

The Living Environment
Measurement Topic: Animal Body Structures and Functions
 Kindergarten

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	Advanced grade level performance
3.5	Mastered grade level, some advanced grade level performance
Score 3.0	Mastered grade level expectations by: <ul style="list-style-type: none"> Identifying structures specific to a wide variety of animals, such as fish, snails, worms, birds, and other common animals native to the region (UNIT: Introduction to Animals)

2.5	Basic understanding secure, progressing toward mastery
Score 2.0	Basic understanding achieved such as: <ul style="list-style-type: none"> Recognizing or recalling specific terminology such as: <ul style="list-style-type: none"> Animal structures Performing basic processes, such as: <ul style="list-style-type: none"> Recognizing examples of structures specific to a wide variety of animals
1.5	Basic understanding, with some assistance
1.0	Basic understanding, only with assistance
0.5	Some basic understanding, only with assistance

Physical Science
Measurement Topic: Magnetism
 Kindergarten

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	Advanced grade level performance
3.5	Mastered grade level, some advanced grade level performance
Score 3.0	Mastered grade level expectations by: <ul style="list-style-type: none"> Explaining the effect of magnets on certain objects whether touching or not (UNIT: Magnetism) Describing some real-world applications of magnets (UNIT: Magnetism) Recalling objects that can be damaged by exposure to magnets (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Magnetism)

2.5	Basic understanding secure, progressing toward mastery
Score 2.0	Basic understanding achieved such as: <ul style="list-style-type: none"> Recognizing or recalling specific terminology such as: <ul style="list-style-type: none"> Magnet Performing basic processes, such as: <ul style="list-style-type: none"> Identifying objects attracted to magnets Recognizing or recalling examples of real-world applications of magnets Recognizing objects that can be damaged by exposure to magnets
1.5	Basic understanding, with some assistance
1.0	Basic understanding, only with assistance
0.5	Some basic understanding, only with assistance

Earth and Space Science
Measurement Topic: Weather and Climate
 Kindergarten

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	Advanced grade level performance
3.5	Mastered grade level, some advanced grade level performance
Score 3.0	Mastered grade level expectations by: <ul style="list-style-type: none"> Observing and describing the cyclical pattern of seasons (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Seasons) Correlating the different seasons with different life processes in plants and animals (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Seasons)

2.5	Basic understanding secure, progressing toward mastery
Score 2.0	Basic understanding achieved such as: <ul style="list-style-type: none"> Recognizing or recalling specific terminology such as: <ul style="list-style-type: none"> Cycle Performing basic processes, such as: <ul style="list-style-type: none"> Identifying the four seasons
1.5	Basic understanding, with some assistance

Earth and Space Science
Measurement Topic: Interaction of the Sun, Earth, and Moon
 Grade Eight

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	Advanced grade level performance
3.5	Mastered grade level, some advanced grade level performance
Score 3.0	Mastered grade level expectations by: <ul style="list-style-type: none"> Explaining how the rotation and revolution of Earth and the tilt of Earth on its axis cause observed phenomena on Earth such as days/nights and seasons (UNIT: Earth in Space) Comparing and contrasting the ideas of Ptolemy, Aristotle, Copernicus, and Galileo regarding Earth's position and motion in space (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) (UNIT: Earth in Space) Explaining tides (high, low, neap, spring) as they relate to the position and gravitational force of the Sun and Moon (UNIT: Earth in Space) Correlating the pattern of change in the location and phase of the Moon with the actual motion of the Moon around Earth (UNIT: Earth in Space) Describing how the relative positions of the Sun, Earth, and Moon can result in solar and lunar eclipses (UNIT: Earth in Space) Analyzing and describing the role of gravity in celestial phenomena (UNIT: Earth in Space)

2.5	Basic understanding secure, progressing toward mastery
Score 2.0	Basic understanding achieved such as: <ul style="list-style-type: none"> Recognizing or recalling specific terminology such as: <ul style="list-style-type: none"> Axis Neap tide Moon phases Performing basic processes, such as: <ul style="list-style-type: none"> Recognizing or recalling examples of constellations Recognizing or recalling accurate statements about the relationship between the rotation, revolution and tilt of the earth on days, nights and seasons Recognizing or recalling accurate statements about tides Recognizing or recalling accurate statements about the relationship between the phases of the moon and the motion of the moon around the earth Recognizing or recalling accurate statements solar and lunar eclipses
1.5	Basic understanding, with some assistance
1.0	Basic understanding, only with assistance
0.5	Some basic understanding, only with assistance

Earth and Space Science
Measurement Topic: Earth Systems
 Grade Eight

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	Advanced grade level performance
3.5	Mastered grade level, some advanced grade level performance
Score 3.0	Mastered grade level expectations by: <ul style="list-style-type: none"> Comparing the Earth system (hydrosphere, atmosphere, lithosphere, biosphere, cryosphere, anthrosphere) to other systems of parts that make up a whole (UNIT: Earth Systems) Comparing and contrasting different types of systems (open, closed) and identifying what makes Earth an open mechanistic system (UNIT: Earth Systems) Analyzing various events on Earth (<i>e.g., a volcano erupting</i>) and describing the impact they have across multiple spheres of the Earth (UNIT: Earth Systems)

2.5	Basic understanding secure, progressing toward mastery
Score 2.0	Basic understanding achieved such as: <ul style="list-style-type: none"> Recognizing or recalling specific terminology such as: <ul style="list-style-type: none"> Hydrosphere Atmosphere Open system Performing basic processes, such as: <ul style="list-style-type: none"> Recognizing or recalling accurate statements about the earth system Recognizing or recalling accurate statements about different types of systems and what makes Earth an open mechanistic system Recognizing or recalling examples of the impact an event can have on other parts of the earth system
1.5	Basic understanding, with some assistance
1.0	Basic understanding, only with assistance
0.5	Some basic understanding, only with assistance

QUARTER 1	
Michigan	
Science: Kindergarten	
Unit: How Do We Learn	
Year Long Curriculum Plan by Quarter	The Nature of Science: Scientific Inquiry- The Scientific Method <ul style="list-style-type: none"> Make observations related to the 5 senses about living things, nonliving objects, and events and identify this as something that scientists do to gain knowledge about the world Generate basic questions (who, what, when, where, why, and "I wonder...") from observations of the natural world
	The Nature of Science: Scientific Inquiry- Data Collection and Analysis <ul style="list-style-type: none"> Record and communicate findings from observations using a variety of methods such as drawings, journaling, pictographs, and bar graphs and identify this as something that scientists do to help them learn more about their observations Safely use tools and instruments (e.g., thermometers, magnifiers, rulers, balances, scissors, hammers, pliers, screwdrivers) to construct, measure, and/or look at objects Make measurements of length, weight, temperature, capacity and volume using standard and nonstandard units and appropriate instruments

QUARTER 2	
<i>Michigan</i>	
<i>Science: Kindergarten</i>	
Unit: Introduction to Animals	
Year Long Curriculum Plan by Quarter	The Living Environment: Animal Body Structures and Functions <ul style="list-style-type: none"> Identify structures specific to a wide variety of animals, such as fish, snails, worms, birds, and other common animals native to the region
	The Living Environment: Classification <ul style="list-style-type: none"> Categorize organisms based on a variety of simple criteria (e.g., body features, appendages, methods of movement, body covering)
	The Nature of Science: Scientific Inquiry- The Scientific Method <ul style="list-style-type: none"> Make observations related to the 5 senses about living things, nonliving objects, and events and identify this as something that scientists do to gain knowledge about the world
	The Nature of Science: Scientific Inquiry- Data Collection and Analysis <ul style="list-style-type: none"> Record and communicate findings from observations using a variety of methods such as drawings, journaling, pictographs, and bar graphs and identify this as something that scientists do to help them learn more about their observations

QUARTER 3	
<i>Michigan</i>	
<i>Science: Kindergarten</i>	
Unit: Introduction to Animals	
Year Long Curriculum Plan by Quarter	The Living Environment: Needs of Organisms <ul style="list-style-type: none"> Describe the basic needs of a wide variety of animals, such as fish, snails, worms, birds, and other common animals native to the region Explain how food is used by animals Compare and contrast the needs of animals with the needs of humans which include safety precautions, good hygiene and healthy habits
	The Living Environment: Ecosystems <ul style="list-style-type: none"> Describe how the behavior of animals is influenced by the conditions of their environment
	The Living Environment: Life Cycles of Plants and Animals <ul style="list-style-type: none"> Describe the basic differences in life cycles of common animals, including humans, as they grow and develop over time

QUARTER 4		
Michigan		
Science: Kindergarten		
Year Long Curriculum Plan by Quarter	Unit: Magnetism	Unit: Seasons
	Physical Science: Magnetism <ul style="list-style-type: none"> Explain the effect of magnets on certain objects whether touching or not Describe some real-world applications of magnets Recall objects that can be damaged by exposure to magnets (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) 	Earth and Space Science: Weather and Climate <ul style="list-style-type: none"> Observe and describe the cyclical pattern of seasons (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Correlate the different seasons with different life processes in plants and animals (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) The Nature of Science: Scientific Inquiry- The Scientific Method <ul style="list-style-type: none"> Generate basic questions (who, what, when, where, why, and "I wonder...") from observations of the natural world The Nature of Science: Scientific Inquiry- Data Collection and Analysis <ul style="list-style-type: none"> Record and communicate findings from observations using a variety of methods such as drawings, journaling, pictographs, and bar graphs and identify this as something that scientists do to help them learn more about their observations

QUARTER 1			
Michigan			
Science: Grade One			
Year Long Curriculum Plan by Quarter	Unit: Introduction to Science (Optional-objectives are integrated into other units)	Unit: Animal Adaptations	Unit: Ecosystems
	The Nature of Science: Scientific Knowledge <ul style="list-style-type: none"> Describe the consistency of the results of an experiment conducted multiple times Communicate a scientific idea using evidence 	The Living Environment: Plant and Animal Adaptations <ul style="list-style-type: none"> Describe the physical characteristics of a variety of North American animals that help them survive in their particular environments Identify the similarities and differences in features and characteristics of animals of the same species (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) 	The Living Environment: Food Chains and Webs <ul style="list-style-type: none"> Classify animals as plant eaters, animal eaters, or both plant and animal eaters and identify their primary food source
	The Nature of Science: Scientific Inquiry- The Scientific Method <ul style="list-style-type: none"> Make observations related to the 5 senses about living things, nonliving objects, and events Plan simple investigations as a strategy for evaluating predictions based on questions developed from observations of the natural world 	The Living Environment: Genetics and Heredity <ul style="list-style-type: none"> Describe similarities and differences between offspring and parents of a variety of animals 	The Living Environment: Ecosystems <ul style="list-style-type: none"> Describe evidence that all environments change, and often as a result of the organisms living there (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.)
	The Nature of Science: Scientific Inquiry- Data Collection and Analysis <ul style="list-style-type: none"> Record and communicate findings from observations using a variety of methods such as drawings, journaling, pictographs, and bar graphs Safely use tools and instruments (e.g., thermometers, magnifiers, rulers, balances, scissors, hammers, pliers, screwdrivers) to construct, measure, and/or look at objects Make measurements of length, weight, temperature, capacity and volume using standard and nonstandard units and appropriate instruments 	The Living Environment: Fossils and Extinction <ul style="list-style-type: none"> Describe fossils as evidence that there are kinds of animals that lived long ago that are no longer found on Earth (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) 	The Nature of Science: Common Themes in Science <ul style="list-style-type: none"> Identify and record instances of things that change and the different ways they change
	The Nature of Science: Common Themes in Science <ul style="list-style-type: none"> Identify the parts of things and how one part connects to and affects another (There is no GLCE that aligns with this NHA objective. 	The Nature of Science: Common Themes in Science <ul style="list-style-type: none"> Identify and record instances of things that change and the different ways they change Identify similarities and differences between a model of an object and the real thing Describe the different sizes, weights, ages, and speeds of things observed 	

	<p>Teach only as an enrichment objective as time permits.)</p> <ul style="list-style-type: none"> Identify and record instances of things that change and the different ways they change Identify similarities and differences between a model of an object and the real thing Describe the different sizes, weights, ages, and speeds of things observed 		
--	--	--	--

QUARTER 2			
Michigan			
Science: Grade One			
Unit: Properties			
Year Long Curriculum Plan by Quarter	Physical Science: Properties of Materials <ul style="list-style-type: none"> Explain that objects have properties that can be analyzed and described using the senses Describe, compare and classify objects by size, color, shape, texture, weight, magnetism, and ability to float 		
	Engineering and Technology: Engineering <ul style="list-style-type: none"> Describe the relationship between the properties of a material and its typical uses and determine the best material for a specific use (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Compare and contrast manmade and natural materials (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) 		
	The Nature of Science: Scientific Inquiry- Data Collection and Analysis <ul style="list-style-type: none"> Safely use tools and instruments (e.g., thermometers, magnifiers, rulers, balances, scissors, hammers, pliers, screwdrivers) to construct, measure, and/or look at objects Make measurements of length, weight, temperature, capacity and volume using standard and nonstandard units and appropriate instruments 		

QUARTER 3	
<i>Michigan</i>	
<i>Science: Grade One</i>	
Unit: The Surface of Earth	
Year Long Curriculum Plan by Quarter	Earth and Space Science: The Changing Earth <ul style="list-style-type: none"> Recall major features of the Earth's surface (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.)
	Earth and Space Science: Earth Materials and Responsible Use <ul style="list-style-type: none"> Describe the basic properties of rocks (e.g., color, composition, texture, size) Classify rock particles as boulders, cobble, pebbles, gravel, sand, silt, or clay Explain uses for different natural resources based upon their properties (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Compare and contrast soil samples by components (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.)
	The Nature of Science: Scientific Inquiry- Data Collection and Analysis <ul style="list-style-type: none"> Make measurements of length, weight, temperature, capacity and volume using standard and nonstandard units and appropriate instruments

QUARTER 4		
Michigan		
Science: Grade One		
Year Long Curriculum Plan by Quarter	Unit: Weather	Unit: Earth in Space
	<p>Earth and Space Science: Atmosphere</p> <ul style="list-style-type: none"> Explain that air is a substance that surrounds us, takes up space, moves as wind, and interacts with us and objects on earth (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) <p>Earth and Space Science: Daily Weather Measurement</p> <ul style="list-style-type: none"> Describe patterns of change in weather over time Describe various tools that are used in weather measurement <p>Earth and Space Science: Weather and Climate</p> <ul style="list-style-type: none"> Describe the effect of the Sun's rays on land, air, and water Compare and contrast cirrus, stratus, and cumulus clouds (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Describe examples of severe weather and appropriate safety precautions <p>The Nature of Science: Scientific Inquiry- The Scientific Method</p> <ul style="list-style-type: none"> Make observations related to the 5 senses about living things, nonliving objects, and events Plan simple investigations as a strategy for evaluating predictions based on questions developed from observations of the natural world <p>The Nature of Science: Scientific Knowledge</p> <ul style="list-style-type: none"> Describe the consistency of the results of an experiment conducted multiple times Communicate a scientific idea using evidence <p>The Nature of Science: Scientific Inquiry- Data Collection and Analysis</p> <ul style="list-style-type: none"> Record and communicate findings from observations using a variety of methods such as drawings, journaling, pictographs, and bar graphs Make measurements of length, weight, temperature, capacity and volume using standard and nonstandard units and appropriate instruments <p>The Nature of Science: Common Themes in Science</p> <ul style="list-style-type: none"> Identify and record instances of things that change and the different ways they change 	<p>Earth and Space Science: Interaction of the Sun, Earth, and Moon</p> <ul style="list-style-type: none"> Compare and contrast day and night by observing and recording differences in temperature, light, and objects visible in the sky (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) <p>Earth and Space Science: Characteristics of Objects in Space</p> <ul style="list-style-type: none"> Describe the changing look and location of the moon in the day and night sky (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) List observable characteristics of stars (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) <p>The Nature of Science: Common Themes in Science</p> <ul style="list-style-type: none"> Describe the different sizes, weights, ages, and speeds of things observed

QUARTER 1		
Michigan		
Science: Grade Two		
Year Long Curriculum Plan by Quarter	Unit: Introduction to Science (Optional- objectives are integrated into other units)	Unit: Plants
	<p>The Nature of Science: Scientific Knowledge</p> <ul style="list-style-type: none"> Describe the consistency of the results of an experiment conducted multiple times Communicate a scientific idea using evidence <p>The Nature of Science: Scientific Inquiry- The Scientific Method</p> <ul style="list-style-type: none"> Make observations related to the 5 senses about living things, nonliving objects, and events Plan simple investigations as a strategy for evaluating predictions based on questions developed from observations of the natural world <p>The Nature of Science: Scientific Inquiry- Data Collection and Analysis</p> <ul style="list-style-type: none"> Record and communicate findings from observations using a variety of methods such as drawings, journaling, pictographs, and bar graphs Safely use tools and instruments (e.g., thermometers, magnifiers, rulers, balances, scissors, hammers, pliers, screwdrivers) to construct, measure, and/or look at objects Make measurements of length, weight, temperature, capacity and volume using standard and nonstandard units and appropriate instruments <p>The Nature of Science: Common Themes in Science</p> <ul style="list-style-type: none"> Identify the parts of things and how one part connects to and affects another (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Identify and record instances of things that change and the different ways they change (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Identify similarities and differences between a model of an object and the real thing Describe the different sizes, weights, ages, and speeds of things observed 	<p>The Living Environment: Needs of Organisms</p> <ul style="list-style-type: none"> Describe evidence that plants are alive and need air, water, light, and nutrients to grow <p>The Living Environment: Life Cycles of Plants and Animals</p> <ul style="list-style-type: none"> Describe the changes observed in plants as they progress through their life cycle <p>The Living Environment: Plant Structures and Function</p> <ul style="list-style-type: none"> Compare and contrast flowering plants and grasses of different species in structure, life processes, and reaction to environmental influences (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Describe the structure and function of the stem, bulbs, and roots in the growth of new plants <p>The Nature of Science: Scientific Inquiry- The Scientific Method</p> <ul style="list-style-type: none"> Make observations related to the 5 senses about living things, nonliving objects, and events Plan simple investigations as a strategy for evaluating predictions based on questions developed from observations of the natural world <p>The Nature of Science: Scientific Knowledge</p> <ul style="list-style-type: none"> Describe the consistency of the results of an experiment conducted multiple times Communicate a scientific idea using evidence <p>The Nature of Science: Scientific Inquiry- Data Collection and Analysis</p> <ul style="list-style-type: none"> Record and communicate findings from observations using a variety of methods such as drawings, journaling, pictographs, and bar graphs <p>The Nature of Science: Common Themes in Science</p> <ul style="list-style-type: none"> Describe the different sizes, weights, ages, and speeds of things observed

QUARTER 2	
<i>Michigan</i>	
<i>Science: Grade Two</i>	
Unit: Motion and Forces	
Year Long Curriculum Plan by Quarter	Physical Science: Forces Effect on Motion <ul style="list-style-type: none"> Describe balance as a function of position and weight/counterweight (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Describe the effects that pushing or pulling have on the motion of objects Describe the observable effects of gravity on objects
	Physical Science: Measuring Motion <ul style="list-style-type: none"> Describe the position of an object relative to another object or background Compare and contrast the motion of different objects
	Physical Science: Simple Machines <ul style="list-style-type: none"> Describe simple machines and their purpose (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.)
	The Nature of Science: Scientific Inquiry- The Scientific Method <ul style="list-style-type: none"> Make observations related to the 5 senses about living things, nonliving objects, and events Plan simple investigations as a strategy for evaluating predictions based on questions developed from observations of the natural world
	The Nature of Science: Scientific Knowledge <ul style="list-style-type: none"> Describe the consistency of the results of an experiment conducted multiple times Communicate a scientific idea using evidence
	The Nature of Science: Scientific Inquiry- Data Collection and Analysis <ul style="list-style-type: none"> Record and communicate findings from observations using a variety of methods such as drawings, journaling, pictographs, and bar graphs
	The Nature of Science: Common Themes in Science <ul style="list-style-type: none"> Identify similarities and differences between a model of an object and the real thing Describe the different sizes, weights, ages, and speeds of things observed

QUARTER 3	
<i>Michigan</i>	
<i>Science: Grade Two</i>	
Unit: Energy	
Year Long Curriculum Plan by Quarter	<p>Physical Science: Energy Resources</p> <ul style="list-style-type: none"> Describe how energy is used in the household, in transportation, in toys, etc. (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Identify sources of energy, such as gasoline from oil, electricity, and food (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Demonstrate practical ways to conserve energy (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) <p>Physical Science: Forms of Energy and Their Interactions</p> <ul style="list-style-type: none"> Investigate and describe various methods for generating and transferring heat energy (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) <p>The Nature of Science: Scientific Inquiry- The Scientific Method</p> <ul style="list-style-type: none"> Make observations related to the 5 senses about living things, nonliving objects, and events Plan simple investigations as a strategy for evaluating predictions based on questions developed from observations of the natural world <p>The Nature of Science: Scientific Knowledge</p> <ul style="list-style-type: none"> Describe the consistency of the results of an experiment conducted multiple times Communicate a scientific idea using evidence <p>The Nature of Science: Scientific Inquiry- Data Collection and Analysis</p> <ul style="list-style-type: none"> Record and communicate findings from observations using a variety of methods such as drawings, journaling, pictographs, and bar graphs

QUARTER 4		
Michigan		
Science: Grade Two		
Year Long Curriculum Plan by Quarter	Unit: Matter, Mixtures, and Changes	Unit: The Water Cycle
	<p>Physical Science: Properties of Materials</p> <ul style="list-style-type: none"> Compare and contrast the characteristics of various solid objects <p>Physical Science: Physical States and Changes</p> <ul style="list-style-type: none"> Describe basic characteristics and properties of liquids Explain how different materials react to change (e.g. in temperature, pressure, forces) (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) <p>Physical Science: Mixtures and Solutions</p> <ul style="list-style-type: none"> Describe how mixtures can be created and separated using various tools Describe characteristics of solutions (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) <p>The Nature of Science: Scientific Inquiry- Data Collection and Analysis</p> <ul style="list-style-type: none"> Make measurements of length, weight, temperature, capacity and volume using standard and nonstandard units and appropriate instruments 	<p>Earth and Space Science: Water on Earth</p> <ul style="list-style-type: none"> Analyze precipitation such as snow, ice, rain, hail, and sleet as forms of water resulting from different conditions Compare and contrast the effect that surface type has on whether water seeps into the surface, runs off, or puddles Describe the effect of evaporation (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Describe the locations of solid and liquid water on Earth Investigate and explain the changes in state from solid to liquid made by water and the conditions necessary for these changes (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) MI.E.FE.02.12 Identify household uses of water (drinking, cleaning, food preparation) (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.) <p>The Nature of Science: Scientific Inquiry- The Scientific Method</p> <ul style="list-style-type: none"> Make observations related to the 5 senses about living things, nonliving objects, and events Plan simple investigations as a strategy for evaluating predictions based on questions developed from observations of the natural world <p>The Nature of Science: Scientific Inquiry- Data Collection and Analysis</p> <ul style="list-style-type: none"> Record and communicate findings from observations using a variety of methods such as drawings, journaling, pictographs, and bar graphs <p>The Nature of Science: Scientific Knowledge</p> <ul style="list-style-type: none"> Communicate a scientific idea using evidence Describe the consistency of the results of an experiment conducted multiple times

QUARTER 1			
Michigan			
Science: Grade Three			
Year Long Curriculum Plan by Quarter	Unit: Introduction to Science (Optional-objectives are integrated into other units)	Unit: Classification	Unit: Motion and Forces
	<p>The Nature of Science: Scientific Knowledge</p> <ul style="list-style-type: none"> Compare the results of similar experiments and determine reasons for any inconsistencies Differentiate between observation and inference in scientific explanations Construct reasonable explanations supported by facts found in books or evidence from observations and/or investigations <p>The Nature of Science: Scientific Inquiry- The Scientific Method</p> <ul style="list-style-type: none"> Plan and conduct simple investigations (e.g., formulate a testable question, plan a fair test, make systematic observations, and develop logical conclusions) <p>The Nature of Science: Scientific Inquiry- Data Collection and Analysis</p> <ul style="list-style-type: none"> Safely use appropriate tools and simple equipment to gather scientific data and extend the senses Make accurate measurements with appropriate units (centimeters, meters, Celsius, Fahrenheit, grams, seconds, minutes) Communicate the results of investigations and describe the investigations in ways that enable others to repeat them Organize, display and interpret data from observations and investigations in simple bar graphs, line plots, line graphs, and/or stem-and-leaf plots <p>The Nature of Science: Scientific Enterprise- Science and Society</p> <ul style="list-style-type: none"> Identify scientists of various groups (i.e. gender, country of origin, socioeconomic status, age) 	<p>The Living Environment: Classification</p> <ul style="list-style-type: none"> Classify organisms based on physical and environmental characteristics Classify vertebrates and invertebrates on the basis of observable physical characteristics <p>The Nature of Science: Scientific Enterprise- Science and Society</p> <ul style="list-style-type: none"> Identify scientists of various groups (i.e. gender, country of origin, socioeconomic status, age) and their contributions 	<p>Physical Science: Measuring Motion</p> <ul style="list-style-type: none"> Describe the position and change in position (motion) of an object in comparison to a reference point Calculate the speed of objects based on the distance traveled divided by the time it took to travel the distance <p>Physical Science: Forces Effect on Motion</p> <ul style="list-style-type: none"> Analyze changing motion of objects and identify forces acting on the object to cause change in motion Explain how the change in motion of an object is related to the strength of the force acting upon the object and to the mass of the object <p>The Nature of Science: Common Themes in Science</p> <ul style="list-style-type: none"> Identify and measure things that change and describe the different ways they change Explain the role of models in studying objects, events, and processes <p>The Nature of Science: Scientific Inquiry- The Scientific Method</p> <ul style="list-style-type: none"> Plan and conduct simple investigations (e.g., formulate a testable question, plan a fair test, make systematic observations, and develop logical conclusions) <p>The Nature of Science: Scientific Inquiry- Data Collection and Analysis</p> <ul style="list-style-type: none"> Make accurate measurements with appropriate units (centimeters, meters, Celsius, Fahrenheit, grams, seconds, minutes) Communicate the results of investigations and describe the investigations in ways that enable

QUARTER 2	
<i>Michigan</i>	
<i>Science: Grade Three</i>	
Unit: Earth in Space	
Year Long Curriculum Plan by Quarter	Earth and Space Science: Characteristics of Objects in Space <ul style="list-style-type: none"> Describe the major characteristics of the Sun, Moon, and planets Describe the motion and relative distance of the planets around the Sun Describe characteristics of stars
	Earth and Space Science: Interaction of the Sun, Earth, and Moon <ul style="list-style-type: none"> Describe the correlation between the rotation and revolution of the Earth and our days, nights, and years Describe the pattern of changes in the appearance of the moon throughout the cycle Describe the rotation and revolution of the Moon around Earth
	Engineering and Technology: Technology <ul style="list-style-type: none"> Describe some of the technologies that have advanced our knowledge of objects in space
	The Nature of Science: Common Themes in Science <ul style="list-style-type: none"> Identify and measure things that change and describe the different ways they change Explain the role of models in studying objects, events, and processes
	The Nature of Science: Scientific Enterprise- Science and Society <ul style="list-style-type: none"> Identify scientists of various groups (i.e. gender, country of origin, socioeconomic status, age) and their contributions

QUARTER 3		
Michigan		
Science: Grade Three		
Year Long Curriculum Plan by Quarter	Unit: Sound	Unit: Light
	<p>Physical Science: Sound</p> <ul style="list-style-type: none"> Describe the relationship between vibrations and the production of sound Explain how sound energy travels through solids, liquids, and gas (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Compare and contrast sounds produced by various objects in terms of pitch and amplitude Describe the variables that affect pitch <p>The Living Environment: Animal Body Structures and Functions</p> <ul style="list-style-type: none"> Describe the parts of the ear and their functions (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) <p>The Nature of Science: Scientific Inquiry- The Scientific Method</p> <ul style="list-style-type: none"> Plan and conduct simple investigations (e.g., formulate a testable question, plan a fair test, make systematic observations, and develop logical conclusions) <p>The Nature of Science: Scientific Inquiry- Data Collection and Analysis</p> <ul style="list-style-type: none"> Make accurate measurements with appropriate units (centimeters, meters, Celsius, Fahrenheit, grams, seconds, minutes) Communicate the results of investigations and describe the investigations in ways that enable others to repeat them Organize, display and interpret data from observations and investigations in simple bar graphs, line plots, line graphs, and/or stem-and-leaf plots <p>The Nature of Science: Scientific Knowledge</p> <ul style="list-style-type: none"> Compare the results of similar experiments and determine reasons for any inconsistencies <p>Construct reasonable explanations supported by facts found in books or evidence from observations and/or investigations</p>	<p>Physical Science: Light</p> <ul style="list-style-type: none"> Describe the refraction, reflection, transmission, and/or absorption of light as it interacts with objects that are transparent, translucent, and opaque Describe the visible spectrum of light (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) <p>The Nature of Science: Scientific Enterprise- Science and Society</p> <ul style="list-style-type: none"> Identify scientists of various groups (i.e. gender, country of origin, socioeconomic status, age) and their contributions

QUARTER 4		
Michigan		
Science: Grade Three		
Year Long Curriculum Plan by Quarter	Unit: Rocks and Minerals	Unit: The Changing Surface of Earth
	<p>Earth and Space Science: Earth Materials and Responsible Use</p> <ul style="list-style-type: none"> Compare and contrast types of earth materials Describe properties used to identify minerals and determine the mineral makeup of rocks Compare and contrast the observable features and formation processes of igneous, sedimentary, and metamorphic rocks Describe the identifying properties of common rock samples <p>The Nature of Science: Common Themes in Science</p> <ul style="list-style-type: none"> Identify and measure things that change and describe the different ways they change Explain the role of models in studying objects, events, and processes <p>The Nature of Science: Scientific Enterprise- Science and Society</p> <ul style="list-style-type: none"> Identify scientists of various groups (i.e. gender, country of origin, socioeconomic status, age) and their contributions 	<p>Earth and Space Science: The Changing Earth</p> <ul style="list-style-type: none"> Compare and contrast major features of the earth's surface Describe the variety of forces involved in weathering, erosion and deposition Describe how physical/mechanical weathering (e.g., wind, water, ice, and gravity) causes change to the Earth's surface over time <p>The Nature of Science: Common Themes in Science</p> <ul style="list-style-type: none"> Identify and measure things that change and describe the different ways they change Explain the role of models in studying objects, events, and processes <p>The Nature of Science: Scientific Enterprise- Science and Society</p> <ul style="list-style-type: none"> Identify scientists of various groups (i.e. gender, country of origin, socioeconomic status, age) and their contributions

QUARTER 1

Michigan

Science: Grade Four

Year Long Curriculum Plan by Quarter	Unit: Introduction to Science (Optional- objectives are integrated into other units)		Unit: Ecosystems	
	The Nature of Science: Scientific Knowledge		Earth and Space Science: Earth Materials and Responsible Use	
	<ul style="list-style-type: none"> Compare the results of similar experiments and determine reasons for any inconsistencies Differentiate between observation and inference in scientific explanations Construct reasonable explanations supported by facts found in books or evidence from observations and/or investigations 		<ul style="list-style-type: none"> Compare the components and properties of various soil types (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) 	
	The Nature of Science: Scientific Inquiry- The Scientific Method		The Living Environment: Food Chains and Webs	
	<ul style="list-style-type: none"> Plan and conduct simple investigations (e.g., formulate a testable question, plan a fair test, make systematic observations, and develop logical conclusions) 		<ul style="list-style-type: none"> Analyze the role of plants in food chains and webs Classify various organisms as producers, herbivores, carnivores, omnivores, or decomposers Compare and contrast simple food chains and food webs 	
	The Nature of Science: Scientific Inquiry- Data Collection and Analysis		The Living Environment: Needs of Organisms	
	<ul style="list-style-type: none"> Safely use appropriate tools and simple equipment to gather scientific data and extend the senses Make accurate measurements with appropriate units (centimeters, meters, Celsius, Fahrenheit, grams, seconds, minutes) Communicate the results of investigations and describe the investigations in ways that enable others to repeat them Organize, display and interpret data from observations and investigations in simple bar graphs, line plots, line graphs, and/or stem-and-leaf plots 		<ul style="list-style-type: none"> Explain the necessity of food for the survival, growth, and repair of animals 	
	The Nature of Science: Scientific Enterprise- Science and Society		The Living Environment: Ecosystems	
	<ul style="list-style-type: none"> Identify scientists of various groups (i.e. gender, country of origin, socioeconomic status, age) and their contributions 		<ul style="list-style-type: none"> Describe components of an ecosystem that have an effect on the behavior and types of organisms in the ecosystem (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Classify the interaction of organisms in an ecosystem (e.g., predator/prey, beneficial to both organisms, beneficial to one and harmful to another, or beneficial to one and neither harmful nor helpful to another) (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Describe changes to an ecosystem from natural causes (e.g., disease, fire, flood, erosion, drought, and succession) Describe changes to an ecosystem from human causes Describe changes (beneficial, neutral or detrimental) caused by organisms in the ecosystem 	
	The Nature of Science: Common Themes in Science		The Nature of Science: Scientific Enterprise- Science and Society	
	<ul style="list-style-type: none"> Describe how the parts of a system work together (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Identify and measure things that change and describe the different ways they change (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Explain the role of models in studying objects, events, and processes Identify objects that are at the extremes in sizes, weights, ages, and speeds (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) 		<ul style="list-style-type: none"> Identify scientists of various groups (i.e. gender, country of origin, socioeconomic status, age) and their contributions 	

	Engineering and Technology, Technology <ul style="list-style-type: none"> S.RS.04.16 Identify technology used in everyday life (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.) S.RS.04.17 Identify current problems that may be solved through the use of technology (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.) 	
--	---	--

QUARTER 2			
Michigan			
Science: Grade Four			
Year Long Curriculum Plan by Quarter	Unit: Plants	Unit: Animal Adaptations	Unit: Species Over Time
	The Living Environment: Plant Structures and Function <ul style="list-style-type: none"> Explain the function of each of the plant parts MI.L.OL.03.41 Classify plants on the basis of observable physical characteristics (roots, leaves, stems, and flowers). (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.) The Living Environment: Plant and Animal Adaptations <ul style="list-style-type: none"> Describe the adaptive features of plants native to habitats around the world The Living Environment: Life Cycles of Plants and Animals <ul style="list-style-type: none"> Compare the life cycles of common annuals, biennials, and perennials (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) The Nature of Science: Scientific Inquiry- The Scientific Method <ul style="list-style-type: none"> Plan and conduct simple investigations (e.g., formulate a testable question, plan a fair test, make systematic observations, and develop logical conclusions) 	The Living Environment: Animal Body Structures and Functions <ul style="list-style-type: none"> Identify the external structures of a variety of animals from around the world that perform particular functions critical to the survival of the animals The Living Environment: Life Cycles of Plants and Animals <ul style="list-style-type: none"> Explain ways that the stages of an animal's life cycle (including humans) contribute to the survival of the animal (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) The Living Environment: Plant and Animal Adaptations <ul style="list-style-type: none"> Identify the adaptive features (e.g. camouflage, behaviors, weapons) of animals native to common habitats around the world The Nature of Science: Scientific Inquiry- The Scientific Method <ul style="list-style-type: none"> Plan and conduct simple investigations (e.g., formulate a testable question, plan a fair test, make systematic observations, and develop logical conclusions) The Nature of Science: Scientific Inquiry- Data Collection and Analysis	The Living Environment: Genetics and Heredity <ul style="list-style-type: none"> Differentiate between those traits shared between parents and offspring that are inherited and those that are learned The Living Environment: Plant and Animal Adaptations <ul style="list-style-type: none"> Identify individual differences in organisms from the same population that could give them an advantage or disadvantage in the competition for resources and reproduction The Living Environment: Fossils and Extinction <ul style="list-style-type: none"> Analyze organisms and environmental conditions of the past using fossil evidence Compare fossils with each other and with living organisms to determine similarities and differences Describe processes that can

	The Nature of Science: Scientific Inquiry- Data Collection and Analysis <ul style="list-style-type: none"> Make accurate measurements with appropriate units (centimeters, meters, Celsius, Fahrenheit, grams, seconds, minutes) Organize, display and interpret data from observations and investigations in simple bar graphs, line plots, line graphs, and/or stem-and-leaf plots Communicate the results of investigations and describe the investigations in ways that enable others to repeat them 	<ul style="list-style-type: none"> Make accurate measurements with appropriate units (centimeters, meters, Celsius, Fahrenheit, grams, seconds, minutes) Organize, display and interpret data from observations and investigations in simple bar graphs, line plots, line graphs, and/or stem-and-leaf plots Communicate the results of investigations and describe the investigations in ways that enable others to repeat them 	<p>lead to the extinction of a species (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.)</p>
	The Nature of Science: Scientific Knowledge <ul style="list-style-type: none"> Compare the results of similar experiments and determine reasons for any inconsistencies Construct reasonable explanations supported by facts found in books or evidence from observations and/or investigations 	The Nature of Science: Scientific Knowledge <ul style="list-style-type: none"> Compare the results of similar experiments and determine reasons for any inconsistencies Construct reasonable explanations supported by facts found in books or evidence from observations and/or investigations 	The Nature of Science: Scientific Enterprise- Science and Society <ul style="list-style-type: none"> Identify scientists of various groups (i.e. gender, country of origin, socioeconomic status, age) and their contributions

QUARTER 3			
Michigan			
Science: Grade Four			
Year Long Curriculum Plan by Quarter	Unit: Conservation of Natural Resources	Unit: Properties of Materials	Unit: States of Matter
	Earth and Space Science: Earth Materials and Responsible Use <ul style="list-style-type: none"> Classify manufactured products according to the Earth materials from which they are made Demonstrate and describe the practices of reducing, reusing and recycling and other conservation measures S.RS.03&04.18 Describe the effect humans and other organisms have on the balance of the natural world (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.) MI.E.ES.03.51 Describe ways humans are dependent on the natural environment (forests, water, clean air, earth materials) and constructed environments (homes, neighborhoods, shopping malls, factories, and industry) (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.) MI.E.ES.03.41 Identify natural resources (metals, fuels, fresh water, farmland, and forests) (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.) 	The Nature of Science: Scientific Inquiry- Data Collection and Analysis <ul style="list-style-type: none"> Make accurate measurements with appropriate units (centimeters, meters, Celsius, Fahrenheit, grams, seconds, minutes) Physical Science: Properties of Materials <ul style="list-style-type: none"> Explain how the material make-up of an object determines some of the properties of the object The Nature of Science: Common Themes in Science <ul style="list-style-type: none"> Explain the role of models in studying objects, events, and processes Identify objects that are at the extremes in sizes, weights, ages, and speeds 	Physical Science: Physical States and Changes <ul style="list-style-type: none"> Compare and contrast the three states of matter by observable characteristics Explain the relationship between the temperature of an object and its state Describe the unique properties of water (expansion and contraction) as it is heated and cooled (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.)

	<ul style="list-style-type: none"> MI.E.ES.03.42 Classify renewable (fresh water, farmland, forests) and non-renewable (fuels, metals) resources (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.) <p>The Nature of Science: Scientific Enterprise- Science and Society</p> <ul style="list-style-type: none"> Identify scientists of various groups (i.e. gender, country of origin, socioeconomic status, age) and their contributions 		
--	--	--	--

QUARTER 4		
Michigan		
Science: Grade Four		
Year Long Curriculum Plan by Quarter	Unit: Electricity and Magnetism	Unit: Energy
	<p>Physical Science: Electricity</p> <ul style="list-style-type: none"> Construct simple circuits and describe the interaction of the circuit components Compare and contrast series and parallel circuits Categorize substances and/or objects as conductors or nonconductors of electricity based on tests Create a simple electromagnet and investigate variables affecting its strength <p>Physical Science: Magnetism</p> <ul style="list-style-type: none"> Describe the properties of magnets <p>The Nature of Science: Scientific Enterprise- Science and Society</p> <ul style="list-style-type: none"> Identify scientists of various groups (i.e. gender, country of origin, socioeconomic status, age) and their contributions <p>The Nature of Science: Scientific Inquiry- The Scientific Method</p> <ul style="list-style-type: none"> Plan and conduct simple investigations (e.g., formulate a testable question, plan a fair test, make systematic observations, and develop logical conclusions) <p>The Nature of Science: Scientific Inquiry- Data Collection and Analysis</p> <ul style="list-style-type: none"> Make accurate measurements with appropriate units (centimeters, meters, Celsius, Fahrenheit, grams, seconds, minutes) Organize, display and interpret data from observations and investigations in simple bar graphs, line plots, line graphs, and/or stem-and-leaf plots Communicate the results of investigations and describe the investigations in ways that enable others to repeat them <p>The Nature of Science: Scientific Knowledge</p> <ul style="list-style-type: none"> Compare the results of similar experiments and determine reasons for any inconsistencies Construct reasonable explanations supported by facts found in books or evidence from observations and/or investigations <p>The Nature of Science: Common Themes in Science</p> <ul style="list-style-type: none"> Explain the role of models in studying objects, events, and processes 	<p>Physical Science: Forms of Energy and Their Interactions</p> <ul style="list-style-type: none"> Describe forms of energy and provide a real-life example of each Describe how heat spreads from one object or place to another (e.g., conduction, convection, radiation) Investigate different materials to determine which are better conductors and which are better insulators of heat Describe the transformation of energy from one form to another <p>The Nature of Science: Scientific Inquiry- The Scientific Method</p> <ul style="list-style-type: none"> Plan and conduct simple investigations (e.g., formulate a testable question, plan a fair test, make systematic observations, and develop logical conclusions) <p>The Nature of Science: Scientific Inquiry- Data Collection and Analysis</p> <ul style="list-style-type: none"> Make accurate measurements with appropriate units (centimeters, meters, Celsius, Fahrenheit, grams, seconds, minutes) Organize, display and interpret data from observations and investigations in simple bar graphs, line plots, line graphs, and/or stem-and-leaf plots Communicate the results of investigations and describe the investigations in ways that enable others to repeat them <p>The Nature of Science: Scientific Knowledge</p> <ul style="list-style-type: none"> Compare the results of similar experiments and determine reasons for any inconsistencies Construct reasonable explanations supported by facts found in books or evidence from observations and/or investigations

QUARTER 1		
Michigan		
Science: Grade Five		
Year Long Curriculum Plan by Quarter	Unit: Introduction to Science	Unit: Technological Design
	<p>The Nature of Science: Scientific Knowledge</p> <ul style="list-style-type: none"> Compare the results of similar experiments and determine reasons for any inconsistencies Differentiate between observation and inference in scientific explanations (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Construct reasonable explanations supported by facts found in books or evidence from observations and/or investigations <p>The Nature of Science: Scientific Inquiry- The Scientific Method</p> <ul style="list-style-type: none"> Propose and test independent and dependent variables in a controlled experiment <p>The Nature of Science: Scientific Inquiry- Data Collection and Analysis</p> <ul style="list-style-type: none"> Safely use appropriate tools and simple equipment to gather scientific data and extend the senses Make accurate measurements with appropriate units (centimeters, meters, Celsius, Fahrenheit, grams, seconds, minutes) Communicate the results of investigations and describe the investigations in ways that enable others to repeat them Organize, display and interpret data from observations and investigations in simple bar graphs, line plots, line graphs, and/or stem-and-leaf plots <p>The Nature of Science: Scientific Enterprise- Science and Society</p> <ul style="list-style-type: none"> Identify scientists of various groups (i.e. gender, country of origin, socioeconomic status, age) and their contributions <p>The Nature of Science: Common Themes in Science</p> <ul style="list-style-type: none"> Describe how the parts of a system work together (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Identify and measure things that change and describe the different ways they change (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Explain the role of models in studying objects, events, and processes Identify objects that are at the extremes in sizes, weights, ages, and speeds (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) 	<p>Engineering and Technology: Engineering</p> <ul style="list-style-type: none"> Describe examples of mechanical systems that are designed to serve purposes similar to natural systems Design and construct something useful out of a variety of materials using a variety of tools Evaluate the usefulness of inventions and suggest ways that the product could be changed or improved Describe properties of materials that make them useful in design and construction (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) <p>Engineering and Technology: Technology</p> <ul style="list-style-type: none"> Describe positive and negative effects of technology on the environment and society <p>The Nature of Science: Scientific Enterprise- Science and Society</p> <ul style="list-style-type: none"> Identify scientists of various groups (i.e. gender, country of origin, socioeconomic status, age) and their contributions

QUARTER 2		
Michigan		
Science: Grade Five		
Year Long Curriculum Plan by Quarter	Unit: Earth in Space	Unit: Motion and Forces
	<p>Earth and Space Science, Characteristics of Objects in Space (There are no NHA Objectives that aligns with these GLCE. Include these objectives in your unit.)</p> <ul style="list-style-type: none"> MI.E.ST.05.11 Design a model of the solar system that shows the relative order and scale of the planets, dwarf planets, comets, and asteroids to the sun. MI.E.ST.05.23 Explain the apparent motion of the stars (constellations) and the sun across the sky. <p>Earth and Space Science, Interaction of the Sun, Earth, and Moon (There are no NHA Objectives that aligns with these GLCE. Include these objectives in your unit.)</p> <ul style="list-style-type: none"> MI.E.ST.05.21 Describe the motion of planets and moons in terms of rotation on axis and orbits due to gravity. MI.E.ES.05.61 Demonstrate and explain seasons using a model. MI.E.ES.05.62 Explain how the revolution of the Earth around the sun defines a year. MI.E.ST.05.22 Explain the phases of the moon. MI.E.ST.05.24 Explain lunar and solar eclipses. MI.E.ST.05.25 Explain the tides of the oceans as they relate to the gravitational pull and orbit of the moon. 	<p>Physical Science, Forces Effect on Motion (There are no NHA Objectives that align with the following GLCE. Include these objectives in your unit.)</p> <ul style="list-style-type: none"> P.FM.05.21 Distinguish between contact forces and non-contact forces. P.FM.05.22 Demonstrate contact and non-contact forces to change the motion of an object. P.FM.05.31 Describe what happens when two forces act on an object in the same or opposing directions. P.FM.05.32 Describe how constant motion is the result of balanced (zero net) forces. P.FM.05.33 Describe how changes in the motion of objects are caused by a non-zero net (unbalanced) force <p>Physical Science, Measuring Motion</p> <ul style="list-style-type: none"> P.FM.05.34 Relate the size of change in motion to the strength of unbalanced forces and the mass of the object. P.FM.05.41 Explain the motion of an object relative to its point of reference. P.FM.05.42 Describe the motion of an object in terms of distance, time and direction, as the object moves, and in relationship to other objects. P.FM.05.43 Illustrate how motion can be measured and represented on a graph.

QUARTER 3		
Michigan		
Science: Grade Five		
Year Long Curriculum Plan by Quarter	Unit: Body Systems	Unit: Species Over Time
	<p>The Living Environment: Animal Body Structures and Functions</p> <ul style="list-style-type: none"> Describe the functions of human body systems and major organs of the body (e.g., heart, lungs, skin) MI.L.OL.05.42 Explain how animal systems (digestive, circulatory, respiratory, skeletal, muscular, nervous, excretory, and reproductive) work together to perform selected activities (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.) <p>The Nature of Science: Common Themes in Science</p> <ul style="list-style-type: none"> Explain the role of models in studying objects, events, and processes <p>The Nature of Science: Scientific Enterprise- Science and Society</p> <ul style="list-style-type: none"> Identify scientists of various groups (i.e. gender, country of origin, socioeconomic status, age) and their contributions 	<p>The Living Environment, Plant and Animal Adaptations</p> <ul style="list-style-type: none"> Describe the functions of human body systems and major organs of the body (e.g., heart, lungs, skin) MI.L.OL.05.42 Explain how animal systems (digestive, circulatory, respiratory, skeletal, muscular, nervous, excretory, and reproductive) work together to perform selected activities (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.) MI.L.EV.05.11 Explain how behavioral characteristics (adaptation, instinct, learning, habit) of animals help them to survive in their environment (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.) MI.L.EV.05.12 Describe the physical characteristics (traits) of organisms that help them survive in their environment (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.) MI.L.HE.05.11 Explain that the traits of an individual are influenced by both the environment and the genetics of the individual (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.) MI.L.HE.05.12 Distinguish between inherited and acquired traits (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.) MI.L.EV.05.21 Relate degree of similarity in anatomical features to the classification of contemporary organisms (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.) MI.L.EV.05.13 Describe how fossils provide evidence about how living things and environmental conditions have changed (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.) MI.L.EV.05.14 Analyze the relationship of environmental change and catastrophic events (for example: volcanic eruption, floods, asteroid impacts, tsunami) to species extinction (There is no NHA Objective that aligns with this GLCE. Include this objective in your unit.)

QUARTER 4		
Michigan		
Science: Grade Five		
Year Long Curriculum Plan by Quarter	Unit: Mixtures and Solutions (Teach this unit only if time permits. There aren't 5 th grade GLCE that align to these objectives, though teaching them would help prepare students for 7 th grade chemistry.)	Unit: Weather and Water (Teach this unit only if time permits. There aren't 5 th grade GLCE that align to these objectives, though teaching them would help prepare students for 7 th grade weather.)
	<p>Physical Science: Mixtures and Solutions</p> <ul style="list-style-type: none"> Determine the appropriate tools and processes needed to separate various mixtures Describe factors that influence saturation in a solution Describe the appropriate tools and senses needed to compare and contrast the concentration levels of various solutions <p>Physical Science: Chemical Changes</p> <ul style="list-style-type: none"> Classify reactions as chemical or not based on the presence of color change, odor, light or heat emission, and/or gas 	<p>Earth and Space Science: Weather and Climate</p> <ul style="list-style-type: none"> Measure, record, and explain daily weather phenomena using the appropriate tools Correlate cloud types with general weather conditions Describe a variety of storm types, the weather conditions associated with each, and explain when they occur Compile and use weather data to determine climate trends Describe the effects geography can have on weather and climate <p>Earth and Space Science: Water on Earth</p> <ul style="list-style-type: none"> Analyze the distribution, location, and state of water on Earth Describe the processes of infiltration, runoff, evaporation, condensation, and precipitation as they relate to movement of water in the water cycle <p>The Nature of Science: Common Themes in Science</p> <ul style="list-style-type: none"> Explain the role of models in studying objects, events, and processes

QUARTER 1

Michigan

Science: Grade Six

Year Long Curriculum Plan by Quarter	Unit: Introduction to Science (Optional- objectives are integrated into other units)	Unit: Ecosystems
	The Nature of Science: Scientific Knowledge <ul style="list-style-type: none"> Analyze similar investigations that yield different results to determine the cause of the difference and develop a plan to eliminate the variables Trace the development of an idea to a scientific theory (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) 	The Living Environment: Food Chains and Webs <ul style="list-style-type: none"> Analyze the food webs formed by the interactions of producers, carnivores, herbivores and decomposers in an ecosystem Describe the process of photosynthesis Describe the flow of energy through an ecosystem Describe the cycle of nitrogen, carbon, and phosphorous in an ecosystem
	The Nature of Science: Scientific Inquiry- The Scientific Method <ul style="list-style-type: none"> Propose questions and hypotheses that can be studied through scientific investigations and distinguish them from questions and hypothesis that cannot be examined scientifically Explain why only one variable (e.g., independent, dependent, control) can be manipulated at a time Describe why questioning, response to criticism, replication, accurate record keeping, and open communication are integral to the process of science 	The Living Environment: Ecosystems <ul style="list-style-type: none"> Analyze and describe the relationships among biotic and abiotic factors and their effects on populations of terrestrial and aquatic ecosystems Analyze natural changes and human-caused changes in an ecosystem to evaluate, with evidential support, whether they are detrimental or beneficial to the survival of populations in that ecosystem Analyze the ecological succession of a variety of environment
	The Nature of Science: Scientific Inquiry- Data Collection and Analysis <ul style="list-style-type: none"> Use appropriate tools, technologies and metric measurements to gather, analyze, and interpret data and report results Organize, display, and interpret scientific data in tables, graphs (e.g. line, circle, bar, histogram) and plots (e.g. stem-and-leaf, box-and-whisker, scatter) Interpret and evaluate tables, charts, and graphs produced by others Cite evidence from tables, charts, and/or graphs in making arguments and claims in oral and written reports Describe basic safety procedures in science such as recognizing potential hazards, cautiously manipulating materials and equipment and conducting appropriate procedures 	The Nature of Science: Common Themes in Science <ul style="list-style-type: none"> Measure and graph change over time and analyze the results to determine patterns and trends or predict events
	The Nature of Science: Scientific Enterprise- Science and Society <ul style="list-style-type: none"> Describe the diverse nature of science and scientists past and present Describe ways in which science and society influence one another 	The Nature of Science: Scientific Inquiry- The Scientific Method <ul style="list-style-type: none"> Propose questions and hypotheses that can be studied through scientific investigations and distinguish them from questions and hypothesis that cannot be examined scientifically Explain why only one variable (e.g., independent, dependent, control) can be manipulated at a time Describe why questioning, response to criticism, replication, accurate record keeping, and open communication are integral to the process of science
	The Nature of Science: Common Themes in Science	The Nature of Science: Scientific Knowledge <ul style="list-style-type: none"> Analyze similar investigations that yield different results to determine the cause of the difference and develop a plan to eliminate the variables
		The Nature of Science: Scientific Inquiry- Data Collection and Analysis <ul style="list-style-type: none"> Organize, display, and interpret scientific data in tables, graphs (e.g. line, circle, bar, histogram) and plots (e.g. stem-and-leaf, box-and-whisker, scatter)

	<ul style="list-style-type: none"> Analyze the parts, subsystems and interactions of a system (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Measure and graph change over time and analyze the results to determine patterns and trends or predict events Compare and contrast the properties of objects as they change in scale (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) 	<ul style="list-style-type: none"> Interpret and evaluate tables, charts, and graphs produced by others Cite evidence from tables, charts, and/or graphs in making arguments and claims in oral and written reports <p>The Nature of Science: Scientific Enterprise- Science and Society</p> <ul style="list-style-type: none"> Describe the diverse nature of science and scientists past and present Describe ways in which science and society influence one another
--	---	--

QUARTER 2		
Michigan		
Science: Grade Six		
Year Long Curriculum Plan by Quarter	Unit: Models and Design	Unit: Energy
	<p>The Nature of Science: Common Themes in Science</p> <ul style="list-style-type: none"> Construct physical and conceptual models that mimic the characteristics of an unknown system and compare the model to the system Evaluate the usefulness of the model as a comparison tool <p>Engineering and Technology: Engineering</p> <ul style="list-style-type: none"> Develop a product that fulfills a set of requirements using a product development approach (i.e. design, construction of prototype, tests, evaluation of design, redesign) <p>Engineering and Technology: Technology</p> <ul style="list-style-type: none"> Evaluate various technologies in terms of drawbacks and benefits to society Explain how societies influence what types of technology are developed and used in a variety of fields Describe the similarities and differences between scientific inquiry and technological design (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) <p>The Nature of Science: Scientific Inquiry- The Scientific Method</p> <ul style="list-style-type: none"> Propose questions and hypotheses that can be studied through scientific investigations and distinguish them from questions and hypothesis that cannot be examined scientifically Explain why only one variable (e.g., independent, dependent, control) can be manipulated at a time Describe why questioning, response to criticism, replication, accurate record keeping, and open communication are integral to the process of science <p>The Nature of Science: Scientific Knowledge</p> <ul style="list-style-type: none"> Analyze similar investigations that yield different results to determine the cause of the difference and develop a plan to eliminate the variables <p>The Nature of Science: Scientific Inquiry- Data Collection and Analysis</p> <ul style="list-style-type: none"> Organize, display, and interpret scientific data in tables, graphs (e.g. line, circle, bar, histogram) and plots (e.g. stem-and-leaf, box-and-whisker, scatter) Interpret and evaluate tables, charts, and graphs produced by others 	<p>Physical Science: Forms of Energy and Their Interactions</p> <ul style="list-style-type: none"> Describe the various forms of potential and kinetic energy Trace the conversion of energy from one form to another in a system Explain the law of conservation of energy <p>Physical Science: Energy Resources</p> <ul style="list-style-type: none"> Evaluate energy sources in terms of advantages and disadvantages (e.g. cost, environmental consequences, sustainability) (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) <p>The Nature of Science: Scientific Enterprise- Science and Society</p> <ul style="list-style-type: none"> Describe ways in which science and society influence one another

	Cite evidence from tables, charts, and/or graphs in making arguments and claims in oral and written reports	
--	---	--

QUARTER 3		
Michigan		
Science: Grade Six		
Year Long Curriculum Plan by Quarter	Unit: Sound	Unit: Light (There are no GLCE that align with this unit. Teach only as an enrichment unit if time permits.)
	<p>Physical Science: Sound</p> <ul style="list-style-type: none"> Compare and contrast the properties of longitudinal and transverse waves and specify examples of each Describe the effect of the medium on sound Relate the amplitude of a wave (i.e. sound, seismic, water) to the amount of energy used to create the vibration of the object producing the wave Describe the changing pitch of sound in terms of the speed, frequency, and wavelength of the sound waves (speed=wavelength X frequency) (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) <p>The Nature of Science: Scientific Inquiry- The Scientific Method</p> <ul style="list-style-type: none"> Propose questions and hypotheses that can be studied through scientific investigations and distinguish them from questions and hypothesis that cannot be examined scientifically Explain why only one variable (e.g., independent, dependent, control) can be manipulated at a time Describe why questioning, response to criticism, replication, accurate record keeping, and open communication are integral to the process of science <p>The Nature of Science: Scientific Knowledge</p> <ul style="list-style-type: none"> Analyze similar investigations that yield different results to determine the cause of the difference and develop a plan to eliminate the variables <p>The Nature of Science: Scientific Inquiry- Data Collection and Analysis</p> <ul style="list-style-type: none"> Organize, display, and interpret scientific data in tables, graphs (e.g. line, circle, bar, histogram) and plots (e.g. stem-and-leaf, box-and-whisker, scatter) Interpret and evaluate tables, charts, and graphs produced by others Cite evidence from tables, charts, and/or graphs in making arguments and claims in oral and written reports 	<p>Physical Science: Light</p> <ul style="list-style-type: none"> Compare and contrast waves that make up the electromagnetic spectrum as versions of radiation that differ in wavelengths, frequencies, and energy levels Describe an everyday application of each of the waves of the electromagnetic spectrum Differentiate between color addition and color subtraction using colored lighting and filters Compare the reflection of light from various surfaces (e.g., loss of light, angle of reflection, reflected color) Investigate and describe the refraction of light passing through various materials (e.g., prisms, lenses, water) <p>The Living Environment: Animal Body Structures and Functions:</p> <ul style="list-style-type: none"> Analyze the form and function of the human eye <p>The Nature of Science: Scientific Enterprise- Science and Society</p> <ul style="list-style-type: none"> Describe the diverse nature of science and scientists past and present

QUARTER 4	
<i>Michigan</i>	
<i>Science: Grade Six</i>	
Unit: Geology	
Year Long Curriculum Plan by Quarter	Earth and Space Science: The Changing Earth <ul style="list-style-type: none"> Analyze and describe Earth's surface features using maps (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Compare the physical properties of the interior layers of Earth Describe agents of physical and chemical weathering and explain their connection to the formation of soil and sediment Analyze how physical/mechanical weathering (e.g. waves, wind, water, and glacier movements) shape and reshape Earth's surface over time Describe major geological events (mountain building, earthquakes, volcanic eruptions) as processes resulting from heat flow and movement of material within Earth Describe the three primary types of plate boundaries and the landforms associated with each Describe ways scientists learn about Earth's geologic history (e.g., seismographs, ground penetrating radar, core drillers, observations)
	Earth and Space Science: Earth Materials and Responsible Use <ul style="list-style-type: none"> Analyze observable and measurable soil properties to predict soil quality Classify sedimentary, igneous and metamorphic rocks
	The Nature of Science: Scientific Enterprise- Science and Society <ul style="list-style-type: none"> Describe the diverse nature of science and scientists past and present Describe ways in which science and society influence one another
	The Nature of Science: Common Themes in Science <ul style="list-style-type: none"> Measure and graph change over time and analyze the results to determine patterns and trends or predict events

QUARTER 1		
Michigan		
Science: Grade Seven		
Year Long Curriculum Plan by Quarter	Unit: Introduction to Science (Optional- objectives are integrated into other units)	Unit: Motion and Forces
	The Nature of Science: Scientific Knowledge <ul style="list-style-type: none"> Analyze similar investigations that yield different results to determine the cause of the difference and develop a plan to eliminate the variables Trace the development of an idea to a scientific theory (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) 	Physical Science: Forces Effect on Motion <ul style="list-style-type: none"> Explain the effects of contact and non-contact forces on objects using Newton's First Law Explain the relationship between the mass of the object, the size of the net force acting on the object, and the resulting change in motion of the object in real world examples of motion
	The Nature of Science: Scientific Inquiry- The Scientific Method <ul style="list-style-type: none"> Propose questions and hypotheses that can be studied through scientific investigations and distinguish them from questions and hypothesis that cannot be examined scientifically Explain why only one variable (e.g., independent, dependent, control) can be manipulated at a time Describe why questioning, response to criticism, replication, accurate record keeping, and open communication are integral to the process of science 	Physical Science: Measuring Motion <ul style="list-style-type: none"> Analyze the motion of objects in terms of direction and changes in motion Describe, measure, and graph quantities that characterize moving objects such as direction, speed, velocity, and acceleration
	The Nature of Science: Scientific Inquiry- Data Collection and Analysis <ul style="list-style-type: none"> Use appropriate tools, technologies and metric measurements to gather, analyze, and interpret data and report results Organize, display, and interpret scientific data in tables, graphs (e.g. line, circle, bar, histogram) and plots (e.g. stem-and-leaf, box-and-whisker, scatter) Interpret and evaluate tables, charts, and graphs produced by others Cite evidence from tables, charts, and/or graphs in making arguments and claims in oral and written reports Describe basic safety procedures in science such as recognizing potential hazards, cautiously manipulating materials and equipment and conducting appropriate procedures (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) 	The Nature of Science: Common Themes in Science <ul style="list-style-type: none"> Measure and graph change over time and analyze the results to determine patterns and trends or predict events Compare and contrast the properties of objects as they change in scale
	The Nature of Science: Scientific Inquiry- The Scientific Method <ul style="list-style-type: none"> Propose questions and hypotheses that can be studied through scientific investigations and distinguish them from questions and hypothesis that cannot be examined scientifically Explain why only one variable (e.g., independent, dependent, control) can be manipulated at a time Describe why questioning, response to criticism, replication, accurate record keeping, and open communication are integral to the process of science 	The Nature of Science: Scientific Inquiry- Data Collection and Analysis <ul style="list-style-type: none"> Organize, display, and interpret scientific data in tables, graphs (e.g. line, circle, bar, histogram) and plots (e.g. stem-and-leaf, box-and-whisker, scatter) Interpret and evaluate tables, charts, and graphs produced by others Cite evidence from tables, charts, and/or graphs in making arguments and claims
	The Nature of Science: Scientific Knowledge <ul style="list-style-type: none"> Analyze similar investigations that yield different results to determine the cause of the difference and develop a plan to eliminate the variables 	The Nature of Science: Scientific Enterprise- Science and Society <ul style="list-style-type: none"> Describe the diverse nature of science and scientists past and present Describe ways in which science and society influence one another

	<p>The Nature of Science: Common Themes in Science</p> <ul style="list-style-type: none"> Analyze the parts, subsystems and interactions of a system (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Measure and graph change over time and analyze the results to determine patterns and trends or predict events Compare and contrast the properties of objects as they change in scale (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) 	<p>in oral and written reports</p> <p>The Nature of Science: Scientific Enterprise- Science and Society</p> <ul style="list-style-type: none"> Describe the diverse nature of science and scientists past and present
--	---	---

QUARTER 2	
<i>Michigan</i>	
<i>Science: Grade Seven</i>	
Unit: Chemistry	
Year Long Curriculum Plan by Quarter	Physical Science: Properties of Materials <ul style="list-style-type: none"> Describe physical and chemical properties of a variety of substances Describe the function of the periodic table in describing and grouping common earth elements by their basic properties (e.g., symbol, reactivity, metal, non-metal or metalloid, natural state, what products contain them)
	Physical Science: Physical States and Changes <ul style="list-style-type: none"> Explain the physical properties of solids, liquids, gases and their changes (contraction & expansion) using the particulate nature of matter model Describe phases of matter and changes in phases in terms of particle kinetic energy and energy transfer
	Physical Science: Forms of Energy and Their Interactions <ul style="list-style-type: none"> Explain heat, heat energy transfer and temperature in terms of particle kinetic energy Compare and contrast conduction, convection, and radiation as methods of heat energy transfer
	The Nature of Science: Scientific Knowledge <ul style="list-style-type: none"> Trace the development of an idea to a scientific theory (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.)
	The Nature of Science: Scientific Enterprise- Science and Society <ul style="list-style-type: none"> Describe the diverse nature of science and scientists past and present
	Physical Science: Mixtures and Solutions <ul style="list-style-type: none"> Describe characteristics of a solution at the particle level, including the process of dissolving, saturation, and concentration (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.)
	Physical Science: Atoms and Molecules <ul style="list-style-type: none"> Explain how chemical reactions form new substances with new properties from the rearrangement and conservation of atoms

QUARTER 3	
<i>Michigan</i>	
<i>Science: Grade Seven</i>	
Unit: Weather and Water	
Year Long Curriculum Plan by Quarter	<p>Earth and Space Science: Weather and Climate</p> <ul style="list-style-type: none"> Analyze common weather instruments (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.) Explain how the interaction of air masses influences weather conditions Interpret weather maps to describe local, regional and national weather conditions Compare and contrast climate regions around the world Analyze how radiant energy from the sun heats earth materials and influences weather <p>Earth and Space Science: Atmosphere</p> <ul style="list-style-type: none"> Describe the composition, characteristics, and structure of the Earth's atmosphere <p>Earth and Space Science: Water on Earth</p> <ul style="list-style-type: none"> Describe the various paths a water molecule might follow in the water cycle and explain factors that influence each path Describe the basic distinguishing characteristics of various locations of water on Earth (E.g. glaciers, ice caps, oceans, wetlands, etc.) <p>The Nature of Science: Common Themes in Science</p> <ul style="list-style-type: none"> Measure and graph change over time and analyze the results to determine patterns and trends or predict events

QUARTER 4		
Michigan		
Science: Grade Seven		
Year Long Curriculum Plan by Quarter	Unit: Heredity	Unit: Cells
	<p>The Living Environment: Genetics and Heredity</p> <ul style="list-style-type: none"> Describe the relationship between genes, proteins, chromosomes, genomes, and DNA and explain their role in the process of heredity Compare how genetic material is transferred to offspring in sexual and asexual reproduction Use models such as Punnett squares or pedigree charts help determine the probability of traits being expressed <p>The Nature of Science: Scientific Enterprise- Science and Society</p> <ul style="list-style-type: none"> Describe the diverse nature of science and scientists past and present Describe ways in which science and society influence one another 	<p>The Living Environment: Cell Theory</p> <ul style="list-style-type: none"> Sequence the major points in the development of the cell theory, including important historical figures and technological advancements associated with the theory Explain the three components of the cell theory <p>The Living Environment: Cell Structure and Function</p> <ul style="list-style-type: none"> Describe the basic functions of cell organelles in plant and animal cells Describe how materials move into and out of cells in the processes of osmosis, diffusion, and active transport Explain how cellular respiration provides cells with the energy needed for them to carry on the functions that sustain life in organisms <p>The Nature of Science: Scientific Enterprise- Science and Society</p> <ul style="list-style-type: none"> Describe the diverse nature of science and scientists past and present

QUARTER 1

Michigan

Science: Grade Eight

Unit: Earth in Space

Earth and Space Science: Characteristics of Objects in Space

- Compare and contrast the major characteristics of bodies in the Solar System
- Compare the size and distance of objects within systems in the universe using either astronomical units or light years, depending on the distance (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.)
- Describe the appearance and apparent motion of groups of stars in the night sky relative to Earth and how various cultures have understood and used them for navigation and calendars
- Describe basic characteristics of the Milky Way and recognize it as one galaxy among billions in the universe (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.)

Earth and Space Science: Interaction of the Sun, Earth, and Moon

- Analyze and describe the role of gravity in celestial phenomena
- Compare and contrast the ideas of Ptolemy, Aristotle, Copernicus, and Galileo regarding Earth's position and motion in space (There is no GLCE that aligns with this NHA objective. Teach only as an enrichment objective as time permits.)
- Explain how the rotation and revolution of Earth and the tilt of Earth on its axis cause observed phenomena on Earth such as days/nights and seasons
- Correlate the pattern of change in the location and phase of the Moon with the actual motion of the Moon around Earth
- Describe how the relative positions of the Sun, Earth, and Moon can result in solar and lunar eclipses
- Explain tides as they relate to the position and gravitational force of the Sun and Moon

Year Long Curriculum Plan by Quarter

The Nature of Science: Scientific Knowledge

- Trace the development of an idea to a scientific theory

The Nature of Science: Scientific Enterprise- Science and Society

- Describe the diverse nature of science and scientists past and present

The Nature of Science: Common Themes in Science

- Analyze the parts, subsystems and interactions of a system
- Measure and graph change over time and analyze the results to determine patterns and trends or predict events

Compare and contrast the properties of objects as they change in scale

QUARTER 2		
Michigan		
Science: Grade Eight		
Year Long Curriculum Plan by Quarter	Unit: Introduction to Science (Optional- objectives are integrated into other units)	Unit: Body Systems
	<p>The Nature of Science: Scientific Knowledge</p> <ul style="list-style-type: none"> Analyze similar investigations that yield different results to determine the cause of the difference and develop a plan to eliminate the variables Trace the development of an idea to a scientific theory <p>The Nature of Science: Scientific Inquiry- The Scientific Method</p> <ul style="list-style-type: none"> Propose questions and hypotheses that can be studied through scientific investigations and distinguish them from questions and hypothesis that cannot be examined scientifically Explain why only one variable (e.g., independent, dependent, control) can be manipulated at a time Describe why questioning, response to criticism, replication, accurate record keeping, and open communication are integral to the process of science <p>The Nature of Science: Scientific Inquiry- Data Collection and Analysis</p> <ul style="list-style-type: none"> Use appropriate tools, technologies and metric measurements to gather, analyze, and interpret data and report results Organize, display, and interpret scientific data in tables, graphs (e.g. line, circle, bar, histogram) and plots (e.g. stem-and-leaf, box-and-whisker, scatter) Interpret and evaluate tables, charts, and graphs produced by others Cite evidence from tables, charts, and/or graphs in making arguments and claims in oral and written reports Describe basic safety procedures in science such as recognizing potential hazards, cautiously manipulating materials and equipment and conducting appropriate procedures <p>The Nature of Science: Scientific Enterprise- Science and Society</p> <ul style="list-style-type: none"> Describe the diverse nature of science and scientists past and present Describe ways in which science and society influence one another <p>The Nature of Science: Common Themes in Science</p> <ul style="list-style-type: none"> Analyze the parts, subsystems and interactions of a system Measure and graph change over time and analyze the results to determine patterns and trends or predict events Compare and contrast the properties of objects as they change in scale 	<p>The Living Environment: Animal Body Structures and Functions</p> <ul style="list-style-type: none"> Compare the body systems of various animals and explain how differences relate to the needs of the animals in their habitats Describe the interaction between each of the human body systems, including homeostasis and the mechanisms that maintain the balance of body systems <p>The Nature of Science: Common Themes in Science</p> <ul style="list-style-type: none"> Analyze the parts, subsystems and interactions of a system Measure and graph change over time and analyze the results to determine patterns and trends or predict events <p>The Nature of Science: Scientific Enterprise- Science and Society</p> <ul style="list-style-type: none"> Describe the diverse nature of science and scientists past and present Describe ways in which science and society influence one another

QUARTER 3		
Michigan		
Science: Grade Eight		
Year Long Curriculum Plan by Quarter	Unit: Electricity and Magnetism	Unit: Species Over Time
	<p>Physical Science: Electricity</p> <ul style="list-style-type: none"> Construct complex circuits and describe the interaction of the circuit components to produce heat, light, sound, and magnetic effects Analyze changing current flow in given circuits Describe the relationship between electric current and magnetism Analyze and describe the process for generating electrical energy from a variety of energy sources (e.g. sun, wind and coal) <p>The Nature of Science: Scientific Inquiry- The Scientific Method</p> <ul style="list-style-type: none"> Propose questions and hypotheses that can be studied through scientific investigations and distinguish them from questions and hypothesis that cannot be examined scientifically Explain why only one variable (e.g., independent, dependent, control) can be manipulated at a time Describe why questioning, response to criticism, replication, accurate record keeping, and open communication are integral to the process of science <p>The Nature of Science: Scientific Knowledge</p> <ul style="list-style-type: none"> Analyze similar investigations that yield different results to determine the cause of the difference and develop a plan to eliminate the variables <p>The Nature of Science: Scientific Inquiry- Data Collection and Analysis</p> <ul style="list-style-type: none"> Organize, display, and interpret scientific data in tables, graphs (e.g. line, circle, bar, histogram) and plots (e.g. stem-and-leaf, box-and-whisker, scatter) Interpret and evaluate tables, charts, and graphs produced by others Cite evidence from tables, charts, and/or graphs in making arguments and claims in oral and written reports 	<p>The Living Environment: Plant and Animal Adaptations</p> <ul style="list-style-type: none"> Analyze the inherited and learned structures, behavior and physiology of organisms that contribute to survival in their particular environment <p>The Living Environment: Genetics and Heredity</p> <ul style="list-style-type: none"> Explain the impact of both sexual and asexual reproduction on the spread of traits that are detrimental or beneficial for the survival of an organism Analyze the process of natural selection and evaluate evidence of it as a mechanism that leads to diversity of species over time <p>The Living Environment: Fossils and Extinction</p> <ul style="list-style-type: none"> Describe how fossils provide evidence of the appearance, diversification, and extinction of organisms from the past <p>The Nature of Science: Scientific Knowledge</p> <ul style="list-style-type: none"> Trace the development of an idea to a scientific theory <p>The Nature of Science: Scientific Enterprise- Science and Society</p> <ul style="list-style-type: none"> Describe the diverse nature of science and scientists past and present <p>The Nature of Science: Common Themes in Science</p> <ul style="list-style-type: none"> Measure and graph change over time and analyze the results to determine patterns and trends or predict events

QUARTER 4	
<i>Michigan</i>	
<i>Science: Grade Eight</i>	
Unit: Earth Systems	
Year Long Curriculum Plan by Quarter	Earth and Space Science: Earth Systems <ul style="list-style-type: none"> Compare the Earth system to other systems of parts that make up a whole Compare and contrast different types of systems and identify what makes Earth an open mechanistic system Analyze various events on Earth and describe the impact they have across multiple spheres of the Earth
	The Nature of Science: Scientific Knowledge <ul style="list-style-type: none"> Analyze similar investigations that yield different results to determine the cause of the difference and develop a plan to eliminate the variables
	The Nature of Science: Scientific Inquiry- The Scientific Method <ul style="list-style-type: none"> Propose questions and hypotheses that can be studied through scientific investigations and distinguish them from questions and hypothesis that cannot be examined scientifically Explain why only one variable (e.g., independent, dependent, control) can be manipulated at a time Describe why questioning, response to criticism, replication, accurate record keeping, and open communication are integral to the process of science
	The Nature of Science: Scientific Inquiry- Data Collection and Analysis <ul style="list-style-type: none"> Organize, display, and interpret scientific data in tables, graphs (e.g. line, circle, bar, histogram) and plots (e.g. stem-and-leaf, box-and-whisker, scatter) Interpret and evaluate tables, charts, and graphs produced by others Cite evidence from tables, charts, and/or graphs in making arguments and claims in oral and written reports
	The Nature of Science: Scientific Enterprise- Science and Society <ul style="list-style-type: none"> Describe the diverse nature of science and scientists past and present Describe ways in which science and society influence one another
	The Nature of Science: Common Themes in Science <ul style="list-style-type: none"> Measure and graph change over time and analyze the results to determine patterns and trends or predict events Compare and contrast the properties of objects as they change in scale

Social Studies Vertical Alignment

Vertical Alignment for the Measurement Topic: <i>Maps & Globes</i>	
Grade Eight	Not applicable
Grade Seven	Not applicable
Grade Six	<ul style="list-style-type: none"> Analyze the appropriate use and purposes of different types of maps (UNIT: Global Geography)
Grade Five	<ul style="list-style-type: none"> Determine location and distance (UNIT: US Geography) Interpret different types of maps and geographical representations (UNIT: US Geography)
Grade Four	<ul style="list-style-type: none"> Determine location and distance using map features and scale (UNIT: Geography Skills & Themes) Interpret different types of maps (UNIT: Geography Skills & Themes)
Grade Three	<ul style="list-style-type: none"> Interpret a map using its features (title, scale, grid) (UNIT: Map Features) Determine location and distance (cardinal directions, scale, grid) (UNIT: Map Features) Compare and contrast types of maps (political & physical) (UNIT: Map Features)
Grade Two	Not applicable
Grade One	<ul style="list-style-type: none"> Interpret a map using its features (cardinal directions, key) (UNIT: Earth's Continents)
Kindergarten	<ul style="list-style-type: none"> Explain how maps and globes are used (UNIT: Introduction to Maps) Describe how major landforms, bodies of water, and other features of the Earth are represented on maps and globes (UNIT: Introduction to Maps)

Social Studies Vertical Alignment

Vertical Alignment for the Measurement Topic: <i>Physical Features</i>	
Grade Eight	Not applicable
Grade Seven	<ul style="list-style-type: none"> Describe the physical features of different regions on Earth (UNITS: Canada Studies, Middle East Studies, Asia Studies, Africa Studies, Australia Studies)
Grade Six	<ul style="list-style-type: none"> Describe the physical features of different regions on Earth (UNITS: Latin America Studies, Europe Studies)
Grade Five	<ul style="list-style-type: none"> Describe specific landforms and rivers of the United States (UNIT: US Geography)
Grade Four	<ul style="list-style-type: none"> Compare physical features of their state to regions in the United States (UNITS: US Regions, State Studies)
Grade Three	<ul style="list-style-type: none"> Describe the physical features of various places on Earth (UNIT: Ancient Rome)
Grade Two	<ul style="list-style-type: none"> Locate major landforms, bodies of water, and other features of North America (UNIT: North American Geography) Describe the physical features of various places on Earth (UNITS: India & China, Ancient Greece)
Grade One	<ul style="list-style-type: none"> Identify and locate specific major landforms and bodies of water (UNIT: Earth's Continents) Describe the physical features of various places on Earth, including the local community (UNITS: My School & Community, Early People & Civilizations)
Kindergarten	<ul style="list-style-type: none"> Identify and locate specific major landforms, bodies of water, and other features of the Earth (UNIT: Introduction to Maps)

GRADE Kindergarten – MYSELF AND OTHERS

Using a familiar context for five and six year olds, kindergartners learn about the social studies disciplines (history, geography, civics and government, and economics) through the lens of “Myself and Others”. Accordingly, each discipline focuses on developing rudimentary understandings through an integrated approach to the field.

U1 - History

In history, students begin to develop a sense of time and chronology using events from their own lives setting the foundation for understanding the past in subsequent grades. The expectations are intended to enable teachers to integrate social studies with the language arts as students develop an understanding of the temporal order of stories. Additionally, students are introduced to how people learn about the past as a building block for understanding the discipline of history in later grades.

H2 Living and Working Together			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<i>Use historical thinking to understand the past</i> K-H2.0.1 Distinguish among yesterday, today, tomorrow. (new) K-H2.0.2 Create a timeline using events from their own lives (e.g., birth, crawling, walking, loss of first tooth, first day of school). (New) K-H2.0.3 Identify the beginning, middle, and end of historical narratives or stories. (new)			

<p>K-H2.0.4 Describe ways people learn about the past (e.g., photos, artifacts, diaries, stories, videos). (New)</p>			
---	--	--	--

U2 - Geography

Using the immediate environment, students develop geographic awareness. They begin to recognize that geographers use maps to represent places. As a prerequisite to developing a spatial perspective, students explore positional and directional words and their meaning to identify significant locations in the classroom. The introduction of the concept that people use the environment to fulfill human needs and wants prepares students for a more in-depth study of human-environment interactions in subsequent grades.

G1 – The World in Spatial Terms			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<i>Use geographic representations to acquire, process, and report information from a spatial perspective.</i> K-G1.0.1 Recognize that maps and globes represent places. (new) K-G1.0.2 Use environmental directions or positional words (up/down, in/out, above/below) to identify significant locations in the classroom.			Shares alignment at grade level NHA)
G2 – Places and Regions			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<i>Understand how regions are created from common physical and human characteristics.</i> K-G2.0.1 Identify and describe places in the immediate environment (e.g., classroom, home, playground).	Political Features <input type="checkbox"/> Identify and describe the immediate surroundings (neighborhood, address, phone number)	Physical Characteristics (Family) - Location - Neighborhood - Address & phone number	

G5 – Environment and Society			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<i>Understand the effects of human-environment interactions.</i> K-G5.0.1 Describe ways people use the environment to meet human needs and wants (e.g., food, shelter, and clothing)...			Shares alignment at grade level NHA

U3 – Civics and Government

The content expectations lay the foundation for the development of civics by focusing on the values and principles of American democracy. Using their classroom and own experiences, students begin to understand why rights have limits and are introduced to the concept of fairness in making group decisions. Students also begin to explore different symbols that represent ideals of our nation such as the American flag. Kindergarten also prepares students to become good citizens as they develop an appreciation of the importance of self-discipline and individual responsibility in a democratic republic.

C2 – Values and Principles of American Democracy			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<i>Understand values and principles of American constitutional democracy</i> K-C2.0.1 Describe our country's flag as an important symbol of the United States.	Citizenship-Awareness, Rights, & Responsibilities <input type="checkbox"/> Identify important symbols and landmarks of the United States	Civic Awareness – Symbols and Figures of	Shares alignment at K NHA

<p>K-C2.0.2 Explain why people do not have the right to do whatever they want (e.g., to promote fairness, ensure the common good, maintain safety). (new)</p> <p>K-C2.0.3 Describe fair ways for groups to make decisions. (new)</p>		<p>America -National Flag of the USA</p>	
C5 – Roles of the Citizen in American Democracy			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Explain important rights and how, when, and where American citizens demonstrate their responsibilities by participating in government</i></p> <p>K-C5.0.1 Describe situations in which they demonstrated self-discipline and individual responsibility (e.g., caring for a pet, completing chores, following school rules, working in a group, taking turns). (new)</p>			<p>Shares alignment at grade level NHA</p>

U4 - Economics

Students develop an understanding of economic concepts through practical examples. Students describe economic wants, distinguish between goods and services that fulfill those wants, and recognize exchanges in which they participate. These foundational ideas prepare students for a deeper understanding of economics in succeeding grades.

E1 Market Economy			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Use fundamental principles and concepts of economics to understand economic activity in a market economy</i></p> <p>K-E1.0.1 Describe economic wants they have experienced. (shares alignment at grade level NHA)</p> <p>K-E1.0.2 Distinguish between goods and services. (shares alignment at K NHA)</p>	<p>Economic Concepts</p> <ul style="list-style-type: none"> □ Define basic economic concepts <p>Economic Concepts</p> <ul style="list-style-type: none"> • Define basic economic concepts 	<p>Economic Concepts</p> <ul style="list-style-type: none"> - Wants & needs • All people have wants and needs <p>Economic Concepts</p> <ul style="list-style-type: none"> - Goods • Things people buy or sell (objects that are capable of satisfying people's wants) - Services • Work that one person does for another (actions that are capable of satisfying people's wants) <p>Economic Exchanges</p> <ul style="list-style-type: none"> - In an exchange, people can trade goods and services for money • Economic exchanges in 	<p>Resources:</p> <ul style="list-style-type: none"> • Beginning Economics at Home • Goods and Services Song <p>Shares alignment at grade level NHA</p>

K-E1.0.3 Recognize situations in which people trade.	Resources <input type="checkbox"/> Give an example of an economic exchange from personal experience	which students participate - In an exchange, people can trade goods and services for other goods and services <ul style="list-style-type: none"> Trading exchanges students have observed 	
---	---	---	--

U5 – Public Discourse, Decision Making, and Citizen Involvement

Using classroom issues as examples, kindergarten students are introduced to the idea of public issues and the importance of citizen action in a democratic republic. Kindergarten students learn that people have different opinions on issues and begun to develop competency in expressing their own opinions relative to classroom issues. Students also begin to construct and explain simple graphs as a way of interpreting and analyzing data relating to public issues. This foundational knowledge is built upon throughout the grades as students learn how, when, and where to communicate their positions on public issues with a reasoned argument.

P3.1 Identifying and Analyzing Public Issues			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<i>Clearly state a problem as a public policy issue, analyze various perspectives, and generate and evaluate possible alternative resolutions.</i> K-P3.1.1 Identify classroom issues. (new) K-P3.1.2 Use simple graphs to explain information about a classroom issue. (new)			

1-P3.1.3 Compare their viewpoint about a classroom issue with the viewpoint of another person. (new)			
P3.3 Persuasive Communication About a Public Issue			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<i>Communicate a reasoned position on a public issue</i> K-P3.3.1 Express a position on a classroom issue. (new)			
P4.2 Citizen Involvement			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<i>Act constructively to further the public good</i> 1-P4.2.1 Develop and implement an action plan to address or inform others about a public issue. (new) 1-P4.2.2 Participate in projects to help or inform others. (new)			

Additional NHA Content

The following content and/or units are not required by the Kindergarten Michigan GLCE's:

<p>Maps and Globes</p> <ul style="list-style-type: none"> • Explain how maps and globes are used <p>Physical Features</p> <ul style="list-style-type: none"> • Identify and locate specific major landforms, bodies of water, and other features of the Earth <p>Economics</p> <ul style="list-style-type: none"> • Resources- Explain how money is used in our economy <p>Human Characteristics (Me and My Family)</p> <ul style="list-style-type: none"> • Describe characteristics of themselves and their family 	<ul style="list-style-type: none"> • Interpret a map using its features (cardinal directions, key) (MT: Maps & Globes) • Identify and locate specific major landforms and bodies of water (MT: Physical Features) <ul style="list-style-type: none"> • Describe the human characteristics (e.g. man-made structures, cultures, traditions) of various places on Earth, including the local community (MT: Human Characteristics) <ul style="list-style-type: none"> • Locate their wider geographical area (MT: Political Features) • Describe how major landforms, bodies of water, and other features of the Earth are represented on maps & globes <ul style="list-style-type: none"> • Land & Water: Continents, Oceans, & Poles <ul style="list-style-type: none"> - Asia - Europe - Africa - North America - Atlantic & Pacific <ul style="list-style-type: none"> - North and South Poles • Money can be used to buy goods • Money can be used to buy services Physical Characteristics (Self) <ul style="list-style-type: none"> - Gender - Physical attributes and ethnicity <ul style="list-style-type: none"> - Languages - Self-Concept <ul style="list-style-type: none"> • Uniqueness & importance <ul style="list-style-type: none"> • Talents & abilities • Likes & dislikes • Personal wants and needs - People are alike and different in physical characteristics

GRADE ONE – Families and Schools

In first grade, students continue to explore the social studies disciplines of history, geography, civics and government, and economics through an integrated approach using the context of families and schools. This is the students' first introduction to social institutions as they draw upon knowledge learned in kindergarten to develop more sophisticated understandings of each discipline.

U1 - History

First grade students begin to develop the ability to think like a historian. Using a calendar, students begin to understand the passage of time. They then apply their understanding of time and chronology by using events from family and school, extending their understanding of the past to events beyond their own lifetimes. Using events to which they have a personal connection, students learn that history involves stories of the past. By exploring relevant primary sources such as photographs, diaries, and artifacts, students develop simple narratives of the history of families or school. Students also learn to draw generalizations and conclusions about changes over time by comparing family life, school, jobs, and methods of communication in their lives, to those in the past. In examining why certain events and people are celebrated through national holidays, students begin to appreciate the influence history has on their daily lives. The study of history through the lens of families and schools in first grade prepares students for more complex investigations of the past of their community, state, and country in later grades.

H2 Living and Working Together in Families and Schools			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<i>Use historical thinking to understand the past</i> 1-H2.0.1 Demonstrate chronological thinking by distinguishing among past, present, and future using family or school events. (new) 1-H2.0.2 Use a calendar to distinguish among days, weeks, and months (1st Grade Math)	Locate days, dates, and months on a calendar		<i>There are no ThinkMath! Lessons that match</i>

<p>1-H2.0.3 Investigate a family history for at least two generations, identifying various members and their connections in order to tell a narrative about family life. (new)</p> <p>1-H2.0.4 Retell in sequence important ideas and details from stories about families or schools. (1st Grade ELA?)</p> <p>1-H2.0.5 Use historical records and artifacts (e.g. photos, diaries, oral histories, and videos) to draw possible conclusions about family or school life in the past. (new)</p> <p>1-H2.0.6 Compare life today with life in the past using the criteria of family, school, jobs, or communication. (new, from 2nd Grade)</p> <p>1-H2.0.7 Identify the events or people</p>	<p>Write brief explanations of personal experiences with basic illustrations (personal narratives)</p> <p>Historical Societies & Lifestyles</p> <ul style="list-style-type: none"> Explain how the local community has changed over time <p>USH: Significant Events, Individuals, & Contributions</p>	<p>Tell about an experience; use transitional words; show a logical sequence of events (beginning, middle, end); use descriptive words</p> <p>The Community Around Me</p> <p>My community history</p> <ul style="list-style-type: none"> Development and change <p>Martin Luther King, Jr. Day – no specific plan or resources</p> <p>Presidents’ Day – no specific plan or resources, possibly Mt.</p>

---	--	--	--

		Thanksgiving <ul style="list-style-type: none"> - Motivations for leaving England - The Mayflower - Plymouth Rock - Thanksgiving Day celebration in early America 	

U2 - Geography

The expectations in first grade build upon simple understandings of maps. Students' spatial perspective is deepened by constructing classroom maps to illustrate aerial perspective and introducing absolute and relative location using the familiar contexts of home and school. Students begin to use personal directions to describe the relative location of different places in the school environment. Students use maps and globes to distinguish physical characteristics of Earth, such as landmasses and oceans. In introducing students to the concepts of region and human systems, first grade sets the stage for more sophisticated study of these concepts in later grades. By using their immediate school environment, students learn to distinguish between physical and human characteristics of place, and describe unifying characteristics of different regions within their classroom and school. Students begin to build an understanding of the different aspects of culture through a comparison of family life. They learn that people not only use the environment, but also modify or adapt to the environment.

U1.1 – The World in Spatial Terms			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<i>Use geographic representations to acquire, process, and report information from a spatial perspective.</i> 1-G1.0.1 Construct simple maps of the classroom to demonstrate aerial perspective. (new)	Political Features <input type="checkbox"/> Identify and describe the	School <ul style="list-style-type: none"> - Geographic location My Local Neighborhood <ul style="list-style-type: none"> - Name & location of the

	<p>water, and other features of the Earth are represented on maps & globes</p> <p>Physical Features</p> <p><input type="checkbox"/> Identify and locate specific major landforms, bodies of water, and other features of the Earth</p>		
U1.2 – Places and Regions			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Understand how regions are created from common physical and human characteristics.</i></p> <p>1-G2.0.1 Distinguish between physical (e.g., clouds, trees, weather) and human (e.g., buildings, playgrounds, sidewalks) characteristics of places. (?? Real vs. man-made? Science Five senses??)</p> <p>1-G2.0.2 Describe the unifying characteristics and/or boundaries of different school regions (e.g., playground, reading corner, library, and restroom). (New)</p>	<ul style="list-style-type: none"> Describe the human characteristics (e.g. man-made structures, cultures, traditions) of various places on Earth, including the local community (MT: Human Characteristics) 		

U1.4 – Human Systems			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Understand how human activities help shape the Earth's surface</i></p> <p>1-G4.0.1 Use components of culture (e.g., foods, language, religion, traditions) to describe diversity in family life. (new)</p>			
U1.5 – Environment and Society			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Understand the effects of human-environment interactions</i></p> <p>1-G5.0.1 Describe ways in which people modify (e.g., cutting down trees, building roads) and adapt to the environment (e.g. clothing, housing, transportation). (New??)</p>			

U3 – Civics and Government

The content expectations in civics use the school as a context for learning about the purposes of government, the values and principles of American democracy, and the roles of citizens. Building on the concept that people are not free to do whatever they want, students identify reasons for rules in school. Concepts of power and authority are introduced as students identify examples of people using power with and without authority in the school setting. Drawing upon the notion of fairness from Kindergarten, students explore fair ways to resolve conflicts at school. The expectations broaden students' understanding of the values and principles of American democracy using significant symbols of the United States. Notions of individual responsibilities introduced in Kindergarten are expanded to include civic responsibilities as members of a group or school community. Thus, students begin to recognize that respect for the rule of law and the rights of others is fundamental to our system of government.

U3.1 – Purposes of Government			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Explain why people create governments</i></p> <p>1-C1.0.1 Identify some reasons for rules in school (e.g., provide order, predictability, and safety). (shares alignment at K NHA)</p> <p>1-C1.0.2 Give examples of the use of power with authority in school (e.g., principal, teacher or bus driver enforcing school rules). (New??shares alignment at grade level NHA)</p> <p>1-C1.0.3 Give examples of the use of power without authority in school (e.g., types of bullying, taking cuts in line).</p>	<p>Human Characteristics</p> <ul style="list-style-type: none"> Recall school rules and consequences Define respect as it relates to classroom rules and expected behaviors 	<ul style="list-style-type: none"> -Role of school -School & classroom expectations • Rules & consequences • Respecting others • Respecting property 	

(New)			
U3.2 – Values and Principles of American Democracy			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Understand values and principles of American constitutional democracy</i></p> <p>1-C2.0.1 Explain how decisions can be made or how conflicts might be resolved in fair and just ways (e.g., majority rules). (Shares alignment at K NHA??)</p> <p>1-C2.0.2 Identify important symbols of the United States of America (e.g., Statue of Liberty, Uncle Sam, White House, and Bald Eagle). (shares alignment at grade level NHA)</p>	<p>Citizenship-Awareness, Rights, & Responsibilities</p> <ul style="list-style-type: none"> Identify important symbols and landmarks of the United States 	<p>Civic Awareness - Symbols & Figures of America</p> <ul style="list-style-type: none"> National Flag of the United States Statue of Liberty Mount Rushmore The White House Liberty Bell Eagle 	

Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
U3.5 – Roles of the Citizen in American Democracy			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Explain important rights and how, when, and where American citizens demonstrate their responsibilities by participating in government</i></p> <p>1-C5.0.1 Describe some responsibilities people have at home and at school (e.g., taking care of oneself, respect for the rights of others, following rules, getting along with others). (New)</p> <p>1-C5.0.2 Identify situations in which people act as good citizens in the school community (e.g., thoughtful and effective participation in the school decisions, respect for the rights of others, respect for rule of law, voting, volunteering, compassion, courage, honesty). (New)</p>			

U4 - Economics

First grade students extend their understanding of basic economic concepts. They distinguish between producers and consumers and examine ways in which their families consume goods and services. Using practical examples and personal experiences, students begin to learn how scarcity forces people to make choices. Students develop a deeper understanding of trade as they explore the reasons why people trade, how money simplifies trade, and how people earn money. These concepts lay the foundation for more complex studies of economic principles in later years.

U4.1 Market Economy			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Use fundamental principles and concepts of economics to understand economic activity in a market economy</i></p> <p>1-E1.0.1 Distinguish between producers and consumers of goods and services. (shares alignment at grade level NHA)</p> <p>1-E1.0.2 Describe ways in which families consume goods and services. U5 – Public Discourse, Decision Making, and Citizen Involvement

In first grade, students continue to develop an understanding of public issues and the importance of citizen action in a democratic republic. First grade students identify public issues in the school community and analyze data about them. They investigate different resolutions to these issues. Students begin to develop competency in expressing their own opinions relative to a public issue in school by justifying their opinions with reasons. This foundational knowledge is built upon throughout the grades as students develop a greater understanding of how, when, and where to communicate their positions on public issues with a reasoned argument.

U5.1 Identifying and Analyzing Public Issues			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Clearly state a problem as a public policy issue, analyze various perspectives, and generate and evaluate possible alternative resolutions.</i></p> <p>1-P3.1.1 Identify public issues in the school community. (new)</p> <p>1-P3.1.2 Use graphic data to analyze information about a public issue in the school community. (new)</p> <p>1-P3.1.3 Identify alternative resolutions to a public issue in the school community. (new)</p>			

U5.2 Persuasive Communication About a Public Issue			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<i>Communicate a reasoned position on a public issue</i> 1-P3.3.1 Express a position on a public policy issue in the school community and justify the position with a reasoned argument. (new)			
U5.3 Citizen Involvement			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<i>Act constructively to further the public good</i> 1-P4.2.1 Develop and implement an action plan to address or inform others about a public issue. (new) 1-P4.2.2 Participate in projects to help or inform others. (new)			

Additional NHA Content

The following content and/or units are not required by the 1st grade Michigan GLCE's and should no longer be taught in 1st grade:

<p>Maps & Globes</p> <ul style="list-style-type: none"> • Oceans • Continents • Features of the Earth <p>My Local Community</p> <p>People in Communities</p> <p>Describe ways people can be good citizens</p>	<ul style="list-style-type: none"> • Interpret a map using its features (cardinal directions, key) (MT: Maps & Globes) • Identify and locate specific major landforms and bodies of water (MT: Physical Features) <ul style="list-style-type: none"> • Locate their wider geographical area (MT: Political Features) <ul style="list-style-type: none"> • Maps have keys or legends with symbols and their uses <ul style="list-style-type: none"> • Find directions on a map: east, west, north, south • Physical characteristics: mountains, bodies of water (oceans, rivers, lakes), landforms (trees, forest, desert) <p>Definition of a community</p> <ul style="list-style-type: none"> • Define “community” <p>Describe the physical features of various places on Earth, including the local community</p> <ul style="list-style-type: none"> • Human characteristics: roads, parks, neighborhoods, buildings (shopping malls, airport, hospitals etc.) <p>Describe the human characteristics of various places on Earth, including the local community</p> <ul style="list-style-type: none"> - Government <ul style="list-style-type: none"> • Elected and appointed leaders • Workers – facilities, services and resources to supply needs and wants <ul style="list-style-type: none"> • Taxes - Government Systems • Identify the ways a local government serves the community <ul style="list-style-type: none"> - Citizenship • Rules and laws • Rights and responsibilities of people (e.g. voting to make group decisions) <ul style="list-style-type: none"> • Cooperation

GRADE TWO – The Local Community

In second grade, students continue the integrative approach to social studies through the context of the local community. This is the first time students are introduced to a social environment larger than their immediate surroundings and they draw upon knowledge learned in previous grades to develop more sophisticated understandings to explore the social studies disciplines of history, geography, civics and government, and economics.

U1 - History

In second grade, students further develop abilities to think like a historian by using the tools of the discipline. Students use a timeline of local community events to demonstrate chronological thinking. Using examples from the past, students start to understand the significant role of the individual in shaping history. The context expectations also introduce students to the concept of perspective by asking students to explain why people can describe the same event differently. Additionally, the expectations expand students' ability to think historically as they explore changes over time as well as localized events. In preparing students to evaluate decisions from the past in later grades, the expectations ask students to examine how a local community problem in the past was addressed. Students demonstrate their understanding of history by constructing a historical narrative of the local community, which serves as a building block for more sophisticated analysis and writing in subsequent grades.

U1.1 Living and Working Together in Communities			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<i>Use historical thinking to understand the past</i> 2-H2.0.1 Demonstrate chronological thinking by distinguishing among years and decades using a timeline of local community events (new)		The Community Around Me My community history <ul style="list-style-type: none"> Development and change Government and community leaders <ul style="list-style-type: none"> Mayor, City 	

<p>2-H2.0.2 Explain why descriptions of the same event in the local community can be different (new)</p> <p>2-H2.0.3 Use an example to describe the role of the individual in creating history (shares alignment at grade level NHA)</p> <p>2-H2.0.4 Describe changes in the local community over time (e.g., types of business, architecture and landscape, jobs, transportation, population) (shares alignment at grade level NHA)</p> <p>2-H2.0.5 Identify a problem in a community's past and describe how it was resolved (shares alignment at grade level NHA)</p> <p>2-H2.0.6 Construct a historical narrative about this history of the local community from a variety of sources (e.g., data gathered from local residents, artifacts, photographs)</p>	<p>Identify leaders in the local community (<i>Communities Around the World</i>)</p> <p>Explain how the local community has changed over time (<i>Communities Around the World</i>)</p>	<p>Council, business leaders</p>	
---	---	----------------------------------	--

(shares alignment at grade level NHA)			
--	--	--	--

U2 - Geography

In developing geographic understandings, students draw upon prior knowledge of spatial awareness, place, human systems, and human-environment interactions from earlier grades to create more complex understandings using the context of the local community. Geographic representations (maps) of areas outside their immediate environment introduce students to the use of symbols, labels, and legends to denote human and natural features. Students use maps to describe the spatial organization of their local community, applying relative location and using distance, direction, and scale. In addition to learning more elaborate distinctions between human and physical characteristics by studying the local community, students compare these characteristics to those of another community. They use these attributes to further their understanding of region by exploring how their local community is part of larger regions such as a county, state, and country. Students expand upon their concept of human systems and human-environment interactions by examining local land use, as well as the positive and negative consequences of changing the physical environment. As a starting point for understanding the global economy in later grades, the second grade expectations introduce students to the geographic theme of movement as they explore how people, goods, and ideas move within the local community. These foundations prepare students for a more elaborate understanding of geography, as they examine their state, country, and world in subsequent grades.

U2.1 – The World in Spatial Terms			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<i>Use geographic representations to acquire, process, and report information from a spatial perspective</i> 2-G1.0.1 Construct maps of the local community that contain symbols, labels, and legends denoting human and natural characteristics of place (new) 2-G1.0.2 Use maps to describe the spatial			

<p>organization of the local community by applying concepts including relative location and using distance, direction, and scale (shares alignment at 3rd grade NHA)</p>			
U2.2 – The World in Spatial Terms			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Understand how regions are created from common physical and human characteristics</i></p> <p>2-G2.0.1 Compare the physical and human characteristics of the local community with those of another community (shares alignment at grade level NHA)</p> <p>2-G2.0.2 Describe how the local community is part of a larger region (e.g., county, metropolitan area, state)</p>	<p>Describe common characteristics of people within a culture group (<i>Communities around the world</i>)</p>	<p>Communities Around the World Groups of people with similar characteristics</p> <p>Cultural and social similarities</p> <ul style="list-style-type: none"> • Language • Values • Celebration of accomplishments and achievements • Shared legends/histories

<p><i>environment interactions</i></p> <p>2-G5.0.1 Suggest ways people can responsibly interact with the environment in the local community (shares alignment at grade level NHA)</p> <p>2-G5.0.2 Describe positive and negative consequences of changing the physical environment of the local community (shares alignment at grade level NHA)</p>			
---	--	--	--

U3 – Civics and Government

In second grade, students explore government in the United States. Building upon earlier understandings of the purposes for rules in the classroom, second grade students explore the reasons why people form governments. Students begin to understand the distinction between government action and private action, which sets the foundation for understanding the powers and limits of governmental authority in later grades. Students also examine situations in which the local government seeks to balance individual rights with the common good in solving community problems. They describe how the Pledge of Allegiance reflects the core democratic value in patriotism. Using examples of how the local government makes, enforces, and interprets the laws, students begin to explore formal structures of government and how government influences the lives of citizens. These understandings provide foundations for the study of state and national government in later grades.

In second grade, students are introduced to the role of government in the economy as they learn about the role of taxes and fees in paying for government services. The expectations help to prepare students for responsible citizenship by exploring how citizens participate in community decisions and by examining why both personal and civic responsibility are important aspects of community life. Students apply this knowledge by designing and participating in community improvement projects.

U3.1 – Purpose of Government			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Explain why people create governments</i></p> <p>2-C1.0.1 Explain why people form governments (shares alignment at 3rd grade NHA)</p> <p>2-C1.0.2 Distinguish between government action and private action (shares alignment at 3rd grade NHA)</p>			
U3.2 – Values and Principles of American Democracy			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Understand values and principles of American constitutional democracy</i></p> <p>2-C2.0.1 Explain how local governments balance individual rights with the common good to solve local community problems (shares alignment at 1st grade NHA)</p> <p>2-C2.0.2 Describe how the Pledge of Allegiance reflects the core democratic value of patriotism</p>			

(shares alignment at 3 rd grade NHA)			
U3.3 – Structure and Functions of Government			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe the structure of government in the United States and how it functions to serve citizens</i></p> <p>2-C3.0.1 Give examples of how local governments make, enforce, and interpret laws (ordinances) in the local community (shares alignment at 1st grade NHA)</p> <p>2-C3.0.2 Use examples to describe how local government affects the lives of its citizens (shares alignment at 1st grade NHA)</p> <p>2-C3.0.3 Identify services commonly provided by local governments (e.g., police, fire department, schools, libraries, parks) (shares alignment at K NHA)</p>			
U3.4 – Roles of the Citizen in American Democracy			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<i>Explain important rights and how, when</i>			

<p><i>,and where American citizens demonstrate their responsibilities by participating in government</i></p> <p>2-C5.0.1 Identify ways citizens participate in community decisions (shares alignment at 1st grade NHA)</p> <p>2-C5.0.2 Distinguish between personal and civic responsibilities and explain why they are important in community life (shares alignment at grade level NHA)</p> <p>2-C5.0.3 Design and participate in community improvement projects that help or inform others (See P4.2.2) (shares alignment at 1st grade NHA)</p>	<p>Describe ways that people show citizenship in the US and in other countries of the world (<i>Communities Around the World</i>)</p>	<p>Citizenship in world communities National Anthems</p> <p>National Flags</p> <p>Celebration of holidays and festivals</p> <p>Monuments and memorials used to commemorate events and achievements</p>	
---	---	---	--

U4 - Economics

Second grade students build upon basic economic concepts they have applied to personal experiences in previous grades. They continue to work with the concepts of scarcity and choice and learn to identify opportunity cost in consumer decisions. Significantly, the expectations broaden the context of study of communities. Using the lens of the local community, students identify different types of businesses and make connections between local businesses and the economic wants of people or other businesses. Students are introduced to the concepts of natural, human, and capital resources using local community examples. In doing so, they begin to recognize examples of economic specialization and its relationship to trade.

U4.1 Market Economy			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Use fundamental principles and concepts of economics to understand economic activity in a market economy</i></p> <p>2-E1.0.1 Identify the opportunity cost involved in a consumer decision (shares alignment at grade level NHA)</p> <p>2-E1.0.2 Identify businesses in the local community (shares alignment at grade level NHA)</p> <p>2-E1.0.3 Describe how businesses in the local community meet economic wants of consumers (shares alignment at grade level NHA)</p> <p>2-E1.0.4 Describe the natural, human, and capital resources needed for</p>	<p>Give examples of categories of resources (natural, human, and capital) (<i>Grade 2 Economics</i>)</p> <p>Explain the concept of “market” (<i>Grade 2 Economics</i>)</p> <p>Describe how people make choices regarding resources (e.g., opportunity cost and scarcity) (<i>Grade 2 Economics</i>)</p>	<p>Natural Resources</p> <ul style="list-style-type: none"> • “Gifts” of nature • Present without intervention of humans • Role of natural resources in daily lives (use of trees for lumber in buildings) <p>Capital Resources</p> <ul style="list-style-type: none"> • Made by people • Used to make other goods • Used to provide other services • Role of capital resources in daily lives (production of automobiles) 	

<p>production of a good or service in a community (shares alignment at grade level NHA)</p> <p>2-E1.0.5 Use examples to show that people cannot produce everything they want (specialization) and depend on trade with others to meet their wants (shares alignment at grade level NHA)</p>		<p>Human Resources</p> <ul style="list-style-type: none"> • Also known as labor or human capital • The effort of people to produce goods or services • Used to provide other services • Role of human resources in daily lives (production of food) <p>Choices</p> <ul style="list-style-type: none"> • Scarcity • Opportunity cost • Peoples choices determine how resources are used <ul style="list-style-type: none"> • Scarcity of resources determine that some natural resources will be used in multiple ways <p>Market</p> <ul style="list-style-type: none"> • The concept of market <p>Economic Exchanges</p> <ul style="list-style-type: none"> • Bartering: People can trade goods and services for other goods and services to satisfy wants and

		needs. (does not use money)	
--	--	-----------------------------	--

U5 – Public Discourse, Decision Making, and Citizen Involvement

Students develop a more sophisticated understanding of public issues, and the importance of citizen action in a democratic republic. Second grade students begin to recognize that conflicts among core democratic values often lead people to want different resolutions to a public policy issue in the local community. They identify public issues in the local community, analyze data about these community issues, and evaluate alternatives resolutions. They use core democratic values to demonstrate why people may differ on the resolution of a community issue as they continue to develop competency in expressing their own opinions relative to these issues and justify their opinions with reasons. This foundational knowledge is built upon throughout the grades as students develop a greater understanding of how, when, and where to communicate their positions on public issues with a reasoned argument.

U5.1 Market Economy			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Clearly state a problem as a public policy issue, analyze various perspectives, and generate and evaluate possible alternative resolutions</i></p> <p>2-P3.1.1 Identify public issues in the local community that influence the daily lives of its citizens (new)</p> <p>2-P3.1.2 Use graphic data and other sources to analyze information about a public issue in the local community and evaluate alternative resolutions (new)</p>			

<p>2-P3.1.3 Give examples of how conflicts over core democratic values lead people to differ on resolutions to a public policy issue in the local community (new)</p>			
U5.2 Persuasive Communication About a Public Issue			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Communicate a reasoned position on a public issue</i></p> <p>2-P3.3.1 Compose a statement expressing a position on a public policy issue in the local community and justify the position with a reasoned argument (new)</p>			
U5.3 Citizen Involvement			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Act constructively to further the public good</i></p> <p>2-P4.2.1 Develop and implement an action plan to address or inform others about a public issue (new)</p> <p>2-P4.2.2 Participate in projects to help or inform others (new)</p>			

Additional NHA Content

The following content and/or units are not required by the 2nd grade Michigan GLCE's and should not longer be taught in 2nd grade:

NHA Social Studies Units

Geography: Grade Two - 2nd grade geography should focus on the local community, not the North American Continent

Early Civilizations: Asia – 7th grade GLCE's

Ancient Greece – 7th grade GLCE's

The Constitution - 8th grade GLCE's

The War of 1812 – 8th grade GLCE's

Westward Expansion - 8th grade GLCE's

The Civil War - 8th grade GLCE's

Immigration and Citizenship - 8th grade GLCE's

Symbols and Figures of America – Kindergarten GLCE

GRADE THREE – MICHIGAN STUDIES

Third grade students explore the social studies disciplines of history, geography, civics and government, and economics through the context of Michigan studies. Building on prior social studies knowledge and applying new concepts of each social studies discipline to the increasingly complex social environment of their state, the third grade content expectations prepare students for more sophisticated studies of their country and world in later grades.

U1 - History

In third grade, students refine their abilities to think like a historian by identifying the types of questions that historians ask. Building upon experiences of timeline construction, students sequence early periods of Michigan history from exploration through attaining statehood. The expectations move students from examining a variety of simple sources to understanding how historians use both primary and secondary sources to learn about the past. Students use both types of sources as they explore the early history of Michigan, providing a rich connection to the English language arts. Through traditional stories, students learn about the beliefs of American Indians. They compare how American Indians and settlers interacted with their environment through informational text. The skill of constructing historical narratives is developed using the context of daily life in the early settlements. The expectations build on students' sense of chronology by requiring students to describe causal relationships among events. These foundational understandings prepare students for more sophisticated writing and analyses as they prepare to study United States history in subsequent grades.

U1.1 History of Michigan (through Statehood)			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<i>Use historical thinking to understand the past</i>	None	None	<u>Needs to be developed</u>
3-H3.0.1 Identify questions historians ask in examining the past in Michigan (e.g., What happened? When did it happen? Who was involved? How and why did it happen?) (new) 3-H3.0.2 Explain how historians use primary and secondary sources to answer questions about the past.	None	None	<u>Incorporate in ELA??</u>

<p>(new)</p> <p>3-H3.0.3 Describe the causal relationships between three events in Michigan's past (e.g., Erie Canal, more people came, statehood). (shares alignment at 4th grade NHA)</p>	<p>Sequencing important historical events of their individual state (UNIT: State Studies)</p>	<p>Major historical events in the state in chronological order</p> <ul style="list-style-type: none"> <input type="checkbox"/> The role of the state in significant national events <input type="checkbox"/> Specific national events that influenced the state <input type="checkbox"/> Events may include but is not limited to: <ul style="list-style-type: none"> o The Colonial period: lifestyles o The Revolutionary periods: key individuals or groups o The American Revolution: key events and people o Statehood: key events and people o The Civil War: key events and people o Industrial growth and 	<p><u>Be sure the events are MI specific</u></p>
---	---	---	---

<p>3-H3.0.4 Draw upon traditional stories of American Indians (e.g., Anishinaabeg - Ojibway (Chippewa), Odawa (Ottawa), Potawatomi; Menominee; Huron Indians) who lived in Michigan in order to make generalizations about their beliefs. (shares alignment at 4th grade NHA)</p> <p>3-H3.0.5 Use informational text and visual data to compare how American Indians and settlers in the early history of Michigan adapted to, used, and modified their environment. (shares alignment at 4th grade NHA)</p>	<p>Describing the way of life of Native American tribes within their state (e.g., homes, traditional dress, foods, transportation, crafts, tools and other accomplishments) (UNIT: State Studies)</p> <p>· Explaining Native American influences on their state (UNIT: State Studies)</p> <p>Describe features of their own state using the 5 Themes of Geography (UNIT: State Studies)</p>	<p>expansion: key events and people in agricultural, industrial and business development</p> <ul style="list-style-type: none"> o Immigration o Urbanization: economic, political and social impacts o World War I & II o The Great Depression o Civil Rights Movement <p>Native Americans: origins and culture</p> <ul style="list-style-type: none"> <input type="checkbox"/> First inhabitants <input type="checkbox"/> Tribes inhabiting the state <input type="checkbox"/> Relationship with the environment: food, clothing, shelter, etc. <input type="checkbox"/> Culture: customs, traditions, arts, etc. <input type="checkbox"/> Important accomplishments or contributions 	<p><u>NHA covers more here than what the GLCE states</u></p> <p><u>More geography than history</u></p>
--	---	--	--

<p>3-H3.0.6 Use a variety of sources to describe interactions that occurred between American Indians and the first European explorers and settlers in Michigan. (shares alignment at 4th grade NHA)</p> <p>3-H3.0.7 Use a variety of primary and secondary sources to construct a historical narrative about daily life in the early settlements of Michigan (pre-statehood). (shares alignment at 4th grade NHA)</p> <p>3-H3.0.8 Use case studies or stories to describe how the ideas or actions of individuals affected the history of Michigan. (shares alignment at 4th grade NHA)</p>	<p>Sequencing important historical events of their individual state (UNIT: State Studies)</p> <p>Sequencing important historical events of their individual state (UNIT: State Studies)</p> <p>Sequencing important historical events of their individual state (UNIT: State Studies)</p>	<p>Five Themes of Geography</p> <ul style="list-style-type: none"> □ <u>Human-Environment Interaction</u>: Describe how the environment impacts the way people live and how humans alter the environment <ul style="list-style-type: none"> o Climate and weather on clothing, housing styles, recreational activity and food choice o Location, use and importance of natural resources o Development of roads, buildings and cities <p>Exploration & settlement</p> <ul style="list-style-type: none"> □ Explorers through the state and motivations □ Impact of exploration: social, cultural, economic, political, and geographic □ First settlers who migrated to the state and motivations 	<p><u>Good for a research project in ELA</u></p> <p><u>Also good ELA connections</u></p>
---	---	--	--

<p>3-H3.0.9 Describe how Michigan attained statehood. (shares alignment at 4th grade NHA)</p> <p>3-H3.0.10 Create a timeline to sequence early Michigan history (American Indians, exploration, settlement, and statehood). ---	---	---	---

U2 – Geography

Third grade students draw upon prior knowledge to create more complex understandings of geographic concepts using the context of Michigan. They further develop spatial awareness through the use of more complex maps of Michigan. Students refine the concept of regions as they explore different ways Michigan can be divided into regions and learn about the different geographic regions to which Michigan belongs. Building upon their knowledge of human systems, students investigate current economic activities in Michigan and explore factors that influence the location of these economic activities. The expectations also extend the geographic theme of movement as students describe current movements of goods, people, jobs, or information to, from, or within Michigan, and investigate the reasons for the movements. In addressing human-environment interactions, the expectations integrate history as students apply their knowledge of how people adapt to, use, and modify the environment to the more complex social environment of their state. More sophisticated understandings are also created as students locate different natural resources in Michigan and analyze the consequences of their use. These foundations prepare students for a more elaborate understanding of geography as they examine their country and world in subsequent grades.

Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Use geographic representations to acquire, process, and report information from a spatial perspective</i></p> <p>3-G1.0.1 Use cardinal directions (north, south, east, and west) to describe the relative location of significant places in the immediate environment.</p> <p>3-G1.0.2 Use thematic maps to identify and describe the physical and</p>	<p>Determine a location and distance (cardinal directions, scale, grid) (UNIT: Geography)</p> <p>Interpret different types of maps (UNIT: Maps and Globes)</p>	<p>Maps and Globes</p> <p>-Cardinal and intermediate directions</p> <p>Maps and Globes</p> <p>-Types of maps: Political, physical, climate, natural resources/land use,</p>	<p><u>Not the right kind of maps listed: political, physical, climate, natural resources/land</u></p>

human characteristics of Michigan. (shares alignment with 4 th grade NHA)		population	<u>use, population</u>
U2.2 – Places and Regions			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Understand how regions are created from common physical and human characteristics</i></p> <p>3-G2.0.1 Use a variety of visual materials and data sources to describe ways in which Michigan can be divided into regions. (shares alignment with 4th grade NHA)</p> <p>3-G2.0.2 Describe different regions to which Michigan belongs (e.g., Great Lakes Region, Midwest). (shares alignment with 4th grade NHA)</p>	<p>Describe features of their own state using the 5 Themes of Geography (UNIT: State Studies)</p> <p>Comparing physical features of their state to regions in the United States (UNITS: US Regions Studies, State Studies)</p>	<p>Introduction to the 5 Themes of Geography Region: An area with places which share similar features and processes Environmental regions (landforms and climate) Cultural regions (urban, suburban, rural) Economic regions (industries, farming)</p> <p>The United States can be broken into different types of regions <input type="checkbox"/> Regions of the U.S are described in various terms or ways <ul style="list-style-type: none"> o By landforms (e.g. Rocky Mountain Region; Plains Region, Mid- </p>	

		West can also be known as Great Lakes region)	
U2.3 – Human Systems			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Understand how human activities help shape the Earth's surface</i></p> <p>3-G4.0.1 Describe major kinds of economic activity in Michigan today, such as agriculture (e.g., corn, cherries, dairy), manufacturing (e.g., automobiles, wood products), services and tourism, research and development (e.g., Automation Alley, life sciences corridor, university communities), and explain the factors influencing the location of these economic activities. (E) (shares alignment with 4th grade NHA)</p> <p>3-G4.0.2 Describe diverse groups that have come into a region of Michigan and reasons why they came (push/pull factors). (H) (shares alignment with 4th grade NHA)</p> <p>3-G4.0.3 Describe some of the current movements of goods, people, jobs or information to, from, or within Michigan and explain reasons for the movements. (E)</p>	<p>Describe the economy of their state (UNIT: State Studies)</p> <p>Describing the cultural characteristics of people within their state (UNIT: State Studies)</p> <p>Describe the economy of their state (UNIT: State Studies)</p> <p>Describing the cultural</p>	<p>Economics</p> <ul style="list-style-type: none"> - Major products (goods), services and industries produced by the state <ul style="list-style-type: none"> <input type="checkbox"/> Natural resources <input type="checkbox"/> State specialization <p>Culture</p> <ul style="list-style-type: none"> - Cultural characteristics of various peoples, regions in the state <p>Economics</p> <ul style="list-style-type: none"> - State trade: major imports and exports 	

<p>(shares alignment with 4th grade NHA)</p> <p>3.G4.0.4 Use data and current information about the Anishinaabeg and other American Indians living in Michigan today to describe the cultural aspects of modern American Indian life; give an example of how another cultural group in Michigan today has preserved and built upon its cultural heritage.</p> <p>(shares alignment with 4th grade NHA)</p>	<p>characteristics of people within their state (UNIT: State Studies)</p>	<p>Culture</p> <p>- Cultural characteristics of various peoples, regions in the state</p>	
U2.4 – Environment and Society			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Understand the effects of human-environment interactions</i></p> <p>3-G5.0.1 Locate natural resources in Michigan and explain the consequences of their use.</p> <p>(shares alignment with 4th grade NHA)</p> <p>3-G5.0.2 Describe how people adapt to, use, and modify the natural resources of Michigan. (H)</p> <p>(shares alignment with 4th grade NHA)</p>	<p>Describe features of their own state using the 5 Themes of Geography (UNIT: State Studies)</p> <p>Describe features of their own state using the 5 Themes of Geography (UNIT: State Studies)</p>	<p><input type="checkbox"/> <u>Human-Environment Interaction</u>: Describe how the environment impacts the way people live and how humans alter the environment</p> <ul style="list-style-type: none"> o Climate and weather on clothing, housing styles, recreational activity and food choice o Location, use and importance of natural resources o Development of roads, buildings and cities 	<p>Find where the natural resources are and what would happen if they are used.</p> <p>Make this more about natural resources and how people adapt to, use, and modify them.</p>

U3 – Civics and Government

In extending students’ civic perspective beyond the family, neighborhood, and community to the state, the third grade content expectations prepare students for their role as responsible and informed citizens of Michigan. Building upon their knowledge of government of the local community, students distinguish the roles of state government from local government. Using the context of state government, students examine the concept of separation of powers by exploring the powers of each branch of state government. By examining how the state courts function to resolve conflicts, students deepen their understanding of the rule of law. The idea of representative government is introduced. By focusing on key concepts, such as citizens’ rights and responsibilities, separation of powers, individual rights, rules of law, representative government, and justice, students are prepared for the roles of citizens in our democratic republic.

U3.1 – Purpose of Government			
Michigan GLCE’s	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Explain why people create governments</i></p> <p>3-C1.0.1 Give an example of how Michigan state government fulfills one of the purposes of government (e.g., protecting individual rights, promoting the common good, ensuring equal treatment under the law).</p>	<p>Explaining the origin of Core Democratic Values and how they help define what it means to be a citizen (UNIT: America: Founding & Principles)</p>	<p>Are the fundamental beliefs and constitutional principles of American society which unite all Americans</p> <ul style="list-style-type: none"> <input type="checkbox"/> Liberty: Includes the freedom to believe what you want, freedom to choose your own friends, and to have your own ideas and opinions, to express your ideas in public, the right for people to meet in groups, and the right to have any lawful job or business. <input type="checkbox"/> Common Good: People should work together for the good of all. The government should make laws that are good for 	<p><u>Be sure to make these Michigan state government specific</u></p>

		<p>everyone.</p> <p><input type="checkbox"/> Equality: Everyone should get the same treatment regardless of where your parents or grandparents were born, your race or religion, or how much money you have. All people have political, social and economic equality.</p>	
--	--	---	--

U3.2 – Values and Principles of American Democracy

Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Understand values and principles of American constitutional democracy</i></p> <p>3-C2.0.1 Describe how Michigan state government reflects the principle of representative government. (new)</p>	None	None	

U3.3 – Structure and Functions of Government

Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe the structure of government in the United States and how it functions to serve citizens</i></p>	Ordering the levels of		

<p>3-C3.0.1 Distinguish between the roles of state and local government. (shares alignment with 4th grade NHA)</p> <p>3-C3.0.2 Identify goods and services provided by the state government and describe how they are funded (e.g., taxes, fees, fines). (new)</p> <p>3-C3.0.3 Identify the three branches of state government in Michigan and the powers of each. (shares alignment with 4th grade NHA)</p> <p>3-C3.0.4 Explain how state courts function to resolve conflict. (new)</p> <p>3-C3.0.5 Describe the purpose of the Michigan Constitution. (shares alignment with 4th grade NHA)</p>	<p>government (local, state, and national) in a hierarchy (UNIT: State Studies)</p> <p>None</p> <p>Describing the 3 Branches of Government (UNIT: State Studies)</p> <p>None</p> <p>Ordering the levels of government (local, state, and national) in a hierarchy (UNIT: State Studies)</p>	<p>- Levels & function of government <input type="checkbox"/> Local, state & federal</p> <p>None</p> <p><input type="checkbox"/> Structure and function of the branches of government: checks and balances to limit power o Legislative Branch: Congress – makes laws o Executive Branch: office of President – carries out laws o Judicial Branch: Supreme Court – interprets law</p> <p>None</p> <p>- Levels & function of government <input type="checkbox"/> State and US Constitution</p>	<p>Take out the national from NHA objective</p>
--	---	--	--

U3.4 – Roles of the Citizen in American Democracy

Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Explain important rights and how, when, and where American citizens demonstrate their responsibilities by participating in government</i></p> <p>3-C5.0.1 Identify rights (e.g., freedom of speech, freedom of religion, right to own property) and responsibilities of citizenship (e.g., respecting the rights of others, voting, obeying laws).</p>	<p>Explaining the origin of Core Democratic Values and how they help define what it means to be a citizen (UNIT: America: Founding & Principles)</p>	<ul style="list-style-type: none"> - Origins in the Declaration of Independence, the Preamble to the Constitution, United States Constitution, Bill of Rights, Pledge of Allegiance, speeches, songs and stories - Are the fundamental beliefs and constitutional principles of American society which unite all Americans <ul style="list-style-type: none"> <input type="checkbox"/> Life: Each person has the right to the protection of life. <input type="checkbox"/> Liberty: Includes the freedom to believe what you want, freedom to choose your own friends, and to have your own ideas and opinions, to express your ideas in public, the right for people to meet in groups, and the right to have any lawful job or business. <input type="checkbox"/> Pursuit of Happiness: Each person can find happiness in their own way, so long as they do not step on the rights of others. <input type="checkbox"/> Common Good: People should work together for 	<p>Do we need to cover all of these?</p>

		<p>the good of all. The government should make laws that are good for everyone.</p> <ul style="list-style-type: none"> <input type="checkbox"/> Justice: All people should be treated fairly in getting the advantages and disadvantages of our country. No group or person should be favored. <input type="checkbox"/> Diversity: Differences in language, dress, food, where parents or grandparents were born, race, and religion are not only allowed but accepted as important. <input type="checkbox"/> Equality: Everyone should get the same treatment regardless of where your parents or grandparents were born, your race or religion, or how much money you have. All people have political, social and economic equality. <input type="checkbox"/> Truth: The government and citizens should not lie. <input type="checkbox"/> Popular Sovereignty: The power of the government comes from the people. <input type="checkbox"/> Patriotism: A devotion to 	
--	--	--	--

		<p>our country and the core democratic values in word or deed.</p> <p><input type="checkbox"/> Rule of Law: Both the government and the people must obey the law.</p>	
--	--	---	--

U4 - Economics

Third grade students refine their understanding of the principles and concepts of economics. Building on a basic understanding of scarcity and choice, students learn to appreciate the relationships among scarcity, choice, and opportunity costs in making economic decisions. In addition, students are introduced to how incentives impact economic decision making. Students explore Michigan's economy by examining how natural resources have influenced economic development in the state. An introduction to the concepts of entrepreneurship, specialization, and interdependence allows students to explore the relationship of Michigan to the national and global economies. Finally, students use these concepts to consider the role of new business development in Michigan's future.

U4.1 Market Economy			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Use fundamental principles and concepts of economics to understand economic activity in a market economy</i></p> <p>3-E1.0.1 Explain how scarcity, opportunity costs, and choices affect what is produced and consumed in Michigan.</p>	<p>Describing basic economic concepts (UNIT: Economics)</p> <p>Proposing a way needs can be met considering choices available (opportunity cost) (UNIT: Economics)</p>	<p>- Supply & demand</p> <p><input type="checkbox"/> People buy less of a product when its price goes up</p> <p><input type="checkbox"/> People buy more of a product when its price goes down</p> <p>- Choices include trade-offs</p>	<p><u>Make it specific to Michigan</u></p>

<p>3-E1.0.2 Identify incentives (e.g., sales, tax breaks) that influence economic decisions people make in Michigan.</p>	<p>Describing basic economic concepts (UNIT: Economics)</p>	<p>(also known as opportunity cost)</p> <p><input type="checkbox"/> It may include giving up buying or doing little of one thing, in order to buy or do a little of something else</p>	<p><u>Specific to Michigan again</u></p>
<p>3-E1.0.3 Analyze how Michigan’s location and natural resources influenced its economic development (e.g., how waterways and other natural resources have influenced economic activities such as mining, lumbering, automobile manufacturing, and furniture making). (H, G) (new)</p>	<p>None</p>	<p>- Supply & demand</p> <p><input type="checkbox"/> People buy less of a product when its price goes up</p> <p><input type="checkbox"/> People buy more of a product when its price goes down</p> <p>None</p>	<p><u>Make it Michigan specific</u></p>
<p>3-E1.0.4 Describe how entrepreneurs combine natural, human, and capital resources to produce goods and services in Michigan. (H, G)</p>	<p>Comparing and contrasting different categories of resources (natural, human, and capital) (UNIT: Economics)</p> <p>Explaining the concept of “entrepreneurship” (UNIT: Economics)</p> <p>None</p>	<p>Entrepreneurship</p> <p>- Combining natural,</p>	

3-E1.0.5 Explain the role of business development in Michigan’s economic future. (new)		human and capital resources to produce various goods and services None	
U4.2 National Economy			
Michigan GLCE’s	NHA Unit Objectives	NHA Unit Content	Notes
<i>Use fundamental principles and concepts of economics to understand economic activity in the United States.</i> 3-E2.0.1 Using a Michigan example, describe how specialization leads to increased interdependence (cherries grown in Michigan are sold in Florida; oranges grown in Florida are sold in Michigan).	Describing basic economic concepts (UNIT: Economics)	- Specialization □ The concentration of production on fewer kinds of goods/services □ The performance of a specific task or job (division of labor)	<u>Make it Michigan specific</u>
U4.3 International Economy			
Michigan GLCE’s	NHA Unit Objectives	NHA Unit Content	Notes
<i>Use fundamental principles and concepts of economics to understand economic activity in the global economy.</i> 3-E3.0.1 Identify products produced in other countries and consumed by people in Michigan. (new)	None	None	

U5 – Public Discourse, Decision Making, and Citizen Involvement

Students continue to develop a more sophisticated understanding of public issues and the importance of citizen action in a democratic republic. Using the context of Michigan, third grade students identify public policy issues facing citizens in Michigan, use graphic data and other sources to analyze information about the issue, and evaluate alternative resolutions. By utilizing core democratic values to demonstrate why people may differ on the resolution of a state issue, students continue to develop competency in expressing their own opinions relative to these issues and justify their opinions with reasons. This foundational knowledge is built upon throughout the grades as students develop a greater understanding of how, when, and where to communicate their positions on public issues with a reasoned argument.

U5.1 Identifying and Analyzing Issues			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<i>Clearly state a problem as a public policy issue, analyze various perspectives, and generate and evaluate possible alternative resolutions</i>			
3-P3.1.1 Identify public issues in the local community that influence the daily lives of its citizens (standard aligns with 4th grade NHA)	Predicting the impact that the current events will have on the future of their state (UNIT: State Studies)	Current Events - Examine current state issues in the news	
3-P3.1.2 Use graphic data and other sources to analyze information about a public issue in the local community and evaluate alternative resolutions	None	None	
3-P3.1.3 Give examples of how conflicts over core democratic values lead people to differ on resolutions to a public policy issue in Michigan.	None	None	

U5.2 Persuasive Communication About a Public Issue			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Communicate a reasoned position on a public issue</i></p> <p>3-P3.3.1 Compose a statement expressing a position on a public policy issue in the local community and justify the position with a reasoned argument</p>	None	None	
U5.3 Citizen Involvement			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Act constructively to further the public good</i></p> <p>3-P4.2.1 Develop and implement an action plan to address or inform others about a public issue</p> <p>3-P4.2.2 Participate in projects to help or inform others</p>	None	None	
	None	None	

Additional NHA Content

The following content and/or units are not required by the 3rd grade Michigan GLCE's and should not longer be taught in 3rd grade:

NHA Social Studies Unit: Geography	
Content	Unit Objectives
Economics the bartering concept (Covered in 1st) Economics choices based on positive and negative incentives (Covered in 4th) Our America (just why historical figures were good citizens and the basic principles of government) Ancient Rome Vikings Middle Ages Explorers 13 Colonies	<p>Explaining the purpose of using money as opposed to bartering (UNIT: Economics)</p> <p>Analyze choices based on positive and negative incentives (UNIT: Economic Concepts)</p> <p>Using the definition of Core Democratic Values to explain why important American historical figures were good citizens (UNIT: America: Founding & Principles)</p> <p>Explaining the basic principles of the American system of government (UNIT: America: Founding & Principles)</p> <p>Locating the geographic area of the world where ancient civilizations existed (UNITS: Ancient Rome, The Vikings)</p> <p>Describing significant individuals in ancient history and the impact their accomplishments had on ancient and modern society (UNITS: Ancient Rome, The Vikings, Europe in the Middle Ages)</p> <p>Summarizing the causes and effects of major events in ancient world history (UNITS: Ancient Rome, The Vikings, Europe in the Middle Ages)</p> <p>Explaining the impact of individual warriors on 15th century Europe (Joan of Arc, William the Conqueror) (UNITS: Europe in the Middle Ages)</p> <p>Describing the major causes and outcome of the Hundred Years War (UNIT: Europe in the Middle Ages)</p> <p>Explaining the impact of the explorers' discoveries on modern society (UNIT: Early Exploration of North America)</p> <p>Comparing and contrasting the colonies as a region and individually (UNIT: The 13 Colonies)</p> <p>Sequencing the origins of civilizations and eras in time in chronological order (UNIT: Early Exploration of North America, Europe in the Middle Ages, The Vikings, Ancient Rome)</p> <p>Explaining how geographic locations of settlements and migration patterns influence</p>

	ancient societies (UNIT: Early Exploration of North America, Europe in the Middle Ages, The Vikings, Ancient Rome) Describing the structure of society in Europe in ancient civilizations (UNIT: Europe in the Middle Ages, The Vikings, Ancient Rome)

U2 - Geography

Students draw upon their knowledge of spatial awareness, regions, human systems, and human-environment interactions to create more sophisticated understandings of these concepts within the context of the United States. By focusing on the work of geographers, students explore the types of questions geographers ask and the tools they use to answer these questions. Students learn that maps can be used to describe elevation and climate, as well as to analyze patterns of population density. In preparation for the study of American history, students concentrate on the geography of the United States. Students expand their knowledge of human systems using case studies and stories to understand push and pull factors of migration and the influence of migration on culture within the United States. Students deepen their understanding of human-environment interactions by assessing positive and negative effects of human activities on the physical environment of the United States. The firm understanding of United States geography established in fourth grade prepares students for the study of American history in fifth grade and world geography in grades six and seven.

U2.1 – The World in Spatial Terms			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<i>Use geographic representations to acquire, process, and report information from a spatial perspective</i> 4-G1.0.1 Identify questions geographers	None	None	

<p>ask in examining the United States (e.g., Where it is? What is it like there? How is it connected to other places?). (new)</p> <p>4-G1.0.2 Use cardinal and intermediate directions to describe the relative location of significant places in the United States. (possibly new unless incorporated into US region studies)</p> <p>4-G1.0.3 Identify and describe the characteristics and purposes (e.g., measure distance, determine relative location, classify a region) of a variety of geographic tools and technologies (e.g., globe, map, satellite image). (second objective taken from 5th NHA)</p> <p>4-G1.0.4 Use geographic tools and technologies, stories, songs, and pictures to answer geographic questions about the United States. (Shares alignment with 5th grade NHA)</p>	<p>Determine a location and distance (cardinal directions, scale, grid) (UNIT: Geography)</p> <p>Determining location and distance using map features and scale (UNIT: Geography)</p> <p>Interpret different types of maps and geographical representations (UNIT: Maps and Globes)</p> <p>Interpret different types of maps and geographical representations (UNIT: Maps and Globes)</p>	<p>Maps and Globes -Cardinal and intermediate directions</p> <p>Longitude and latitude <input type="checkbox"/> Prime Meridian (0 degrees):Greenwich, England <input type="checkbox"/> 180° Line (International Date Line) <input type="checkbox"/> Equator</p> <p>Geographic Tools and Information Resources Satellite-produced images</p> <p>Geographic Tools and Information Resources - Geographic representation <input type="checkbox"/> Aerial photographs</p>	<p>Required at third as well but third only has to know directions not used to describe the relative location of significant places in the US</p>
--	---	---	--

<p>4-G1.0.5 Use maps to describe elevation, climate, and patterns of population density in the United States.</p>	<p>Interpret different types of maps (UNIT: Maps and Globes)</p>	<p>- Types of maps:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Political <input type="checkbox"/> Physical <input type="checkbox"/> Climate <input type="checkbox"/> Natural Resources/Land Use <input type="checkbox"/> Population 	
<p>U2.2 – Places and Regions</p>			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Understand how regions are created from common physical and human characteristics</i></p> <p>4-G2.0.1 Describe ways in which the United States can be divided into different regions (e.g., political regions, economic regions, landform regions, vegetation regions).</p>	<p>Grouping the United States into regions in a variety of ways (political, physical, economical) (UNIT: US Region Studies)</p>	<p>- Regions are areas with places which share similar features and processes</p> <p>- The United States can be broken into different types of regions</p> <ul style="list-style-type: none"> <input type="checkbox"/> Regions of the U.S are described in various terms or ways <ul style="list-style-type: none"> o By landforms (e.g. Rocky Mountain Region; Plains Region, Mid-West can also be known as Great Lakes region) 	<p>3^r grade describes just Michigan</p>

<p>4-G2.0.2 Compare human and physical characteristics of a region to which Michigan belongs (e.g., Great Lakes, Midwest) with those of another region in the United States.</p>	<p>Locating geographical areas within regions of the United States (states, capital cities, & major cities) (UNIT: US Region Studies) Comparing physical features of their state to regions in the United States (UNITS: US Regions Studies, State Studies)</p>	<p>o By political description (e.g. Northeast as New England etc.) o Described in a variety of ways according to the source of information: economic information, geographic information, climate information, vegetation/land use information, etc.</p> <p>US Region – The Northeast Political features (states and capitals, major cities) and physical features (landforms and bodies of water) US Region – The Southeast Political features (states and capitals, major cities) and physical features (landforms and bodies of water) US Region – The Mid-West Political features (states and capitals, major cities) and physical features (landforms</p>	<p>Ensure if 4th has to include significant events for each region</p> <p>See Teacher Central for a list of specific states, capitals, major cities, landforms, and bodies of water to cover</p> <p>3rd describes the regions to which Michigan belongs. No comparison btw human and physical at 3rd.</p>

		<p>and bodies of water)</p> <p>US Region – The Plains (Great Plains)</p> <p>Political features (states and capitals, major cities) and physical features (landforms and bodies of water)</p> <p>US Region – The Southwest</p> <p>Political features (states and capitals, major cities) and physical features (landforms and bodies of water)</p> <p>US Region – The Rocky Mountain</p> <p>Political features (states and capitals, major cities) and physical features (landforms and bodies of water)</p> <p>US Region – The Pacific</p> <p>Political features (states and capitals, major cities) and physical features (landforms and bodies of water)</p>	
U2.3 – Human Systems			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Understand how human activities help shape the Earth's surface</i></p> <p>4-G4.0.1 Use a case study or story about migration within or to the United States to identify push and pull factors (why they</p>			

<p>left, why they came) that influenced the migration. (H)</p> <p>4-G4.0.2 Describe the impact of immigration to the United States on the cultural development of different places or regions of the United States (e.g., forms of shelter, language, food). (H)</p>	<p>Describing the important individuals and events within each region of the United States (UNIT: US Region Studies)</p> <p>Explaining how the geographical location of these regions impact historical events in that region (UNIT: US Region Studies)</p> <p>Describing the important individuals and events within each region of the United States (UNIT: US Region Studies)</p> <p>Explaining how the</p>	<ul style="list-style-type: none"> - Significant events <ul style="list-style-type: none"> <input type="checkbox"/> Exploration <input type="checkbox"/> Colonization <input type="checkbox"/> The Revolutionary War - Significant Events <ul style="list-style-type: none"> <input type="checkbox"/> First settlements & colonies: St Augustine, Lost Colony & Jamestown <input type="checkbox"/> The Civil War <input type="checkbox"/> Civil Rights Movement <ul style="list-style-type: none"> <input type="checkbox"/> Hurricane Katrina - Significant events <ul style="list-style-type: none"> <input type="checkbox"/> Northwest Territory <input type="checkbox"/> Industrial Revolution <ul style="list-style-type: none"> o John Deere o The automobile - Significant events <ul style="list-style-type: none"> <input type="checkbox"/> Louisiana Purchase <input type="checkbox"/> Homestead Act 1862 <input type="checkbox"/> Indian territory and conflict - Significant Events <ul style="list-style-type: none"> <input type="checkbox"/> Spanish missions <input type="checkbox"/> The Alamo <input type="checkbox"/> Border control and 	<p>Exploration and colonization fit best with G4.0.1</p> <p>The rest of the events are copied off from Teacher central in the same order of the US regions as above. Would make sense to cover these as you teach each region.</p> <p>All the significant events listed match up with G4.0.2</p>
---	--	---	---

	geographical location of these regions impact historical events in that region (UNIT: US Region Studies)	<p>illegal immigrants</p> <ul style="list-style-type: none"> - Significant Events <ul style="list-style-type: none"> <input type="checkbox"/> Lewis and Clark exploration <input type="checkbox"/> Mining and “boomtowns” <input type="checkbox"/> Transcontinental Railroad - Significant events <ul style="list-style-type: none"> <input type="checkbox"/> Oregon Trail <input type="checkbox"/> Discovery of gold <input type="checkbox"/> Westward movement & settlement <input type="checkbox"/> Indian removal: reservations 	
U2.4 – Environment and Society			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Understand the effects of human-environment interactions</i></p> <p>4-G5.0.1 Assess the positive and negative effects of human activities on the physical environment of the United States.</p>	<p>Defining and listing an example of each of the 5 Themes of Geography (UNIT: Geography)</p>	<p>- Human / Environment Interaction: How people have changed their environment or how the environment influences the way people live</p>	<p>Some of the above significant events be tied into this objective.</p>

U3 – Civics and Government

Fourth grade students learn how the United States government works. Students examine the purposes of government as set forth in the Preamble to the U.S. Constitution, how our current form of government functions to serve those purposes, and the probable consequences of not having government, rules, or laws. Building upon their understanding of the structure and functions of government in Michigan, students use examples to explore how the powers of the federal government are limited. Students also begin to understand that the federal and state governments have different powers as a foundation for learning about federalism in fifth grade. Concepts of governmental taxing and spending are expanded from previous grades as students apply these concepts to the federal government. Students explore how key concepts such as popular sovereignty, rule of law, checks and balances, separation of powers, and individual rights serve to limit the power of government and how these ideas are manifested in the Constitution and Bill of Rights. Students learn how government affects their daily lives by identifying examples of rights guaranteed by the Constitution and Bill of Rights. Students explain why all rights have limits, describe the relationship between rights and responsibilities, and investigate ways people can work together to promote the values and principles of American democracy.

U3.1 – Purpose of Government			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Explain why people create governments</i></p> <p>4-C1.0.1 Identify questions political scientists ask in examining the United States (e.g., What does government do? What are the basic values and principles of American democracy? What is the relationship of the United States to other nations? What are the roles of the citizen in American democracy?). (new)</p> <p>4-C1.0.2 Explain probable consequences of an absence of government and of rules and laws.</p>	<p>Describing the rights and responsibilities involved with American citizenship (freedom of speech, voting, knowing representatives) (UNIT: State Studies)</p> <p>Identifying the major officeholders within their individual state and federal government representatives (UNIT: State Studies)</p>	<p>- Citizenship</p> <ul style="list-style-type: none"> □ Citizenship Rights <ul style="list-style-type: none"> o 1st Amendment rights o Opportunities to be educated □ Citizenship Responsibilities o Understanding and participating in the election process and voting <p>- Citizenship</p> <ul style="list-style-type: none"> o Knowing your representatives at local, state, and 	<p><u>A possible match</u></p> <p><u>Did not seem like a direct link from NHA to MI standards but might work?</u></p>

<p>4-C1.0.3 Describe the purposes of government as identified in the Preamble of the Constitution. (shares alignment with 5th grade NHA)</p>	<p>Explaining the early forms of government in the United States (UNIT: US Constitution & Government)</p>	<p>national levels o Know major state offices, duties and how they are chosen (elected or appointed) □ Governor, Lieutenant Governor, Secretary of State, state senators, and local representatives in the US Congress, etc.</p> <p>- Purpose of government □ To protect the rights of individuals, maintain order, and promote the common good as stated in the Preamble to the Constitution</p>	
<p>U3.2 – Values and Principles of American Democracy</p>			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Understand values and principles of American constitutional democracy</i></p>	<p>Comparing and contrasting the 3 Branches of Government and their</p>	<p>- 3 Branches of Government: Checks and Balances to limit</p>	

<p>4-C2.0.1 Explain how the principles of popular sovereignty, rule of law, checks and balances, separation of powers, and individual rights (e.g., freedom of religion, freedom of expression, freedom of press) serve to limit the powers of the federal government as reflected in the Constitution and Bill of Rights. (shares alignment with 5th NHA)</p> <p>4-C2.0.2 Identify situations in which specific rights guaranteed by the Constitution and Bill of Rights are involved (e.g., freedom of religion, freedom of expression, freedom of press). (shares alignment with 5th NHA)</p>	<p>functions (UNIT: US Constitution & Government) Defining each of the amendments in the Bill of Rights (UNIT: US Constitution & Government)</p> <p>Defining each of the amendments in the Bill of Rights (UNIT: US Constitution & Government)</p>	<p>power</p> <ul style="list-style-type: none"> □ Legislative Branch: Congress - made up of the Senate & House of Reps creates laws □ Executive Branch: Office of President – carries out laws made by the legislative branch □ Judicial Branch: Supreme Court – interprets laws made by the legislative branch to determine if they are constitutional <p>- The Bill of Rights: The first ten amendments guaranteeing individual freedoms</p> <p>- The Bill of Rights: The first ten amendments guaranteeing individual freedoms</p>	
U3.3 – Structure and Functions of Government			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe the structure of government in the United States and how it functions to serve citizens</i></p> <p>4-C3.0.1 Give examples of ways the</p>	<p>Ordering the levels of government (local, state, and</p>	<p>- Levels & function of</p>	

<p>Constitution limits the powers of the federal government (e.g., election of public officers, separation of powers, checks and balances, Bill of Rights).</p> <p>4-C3.0.2 Give examples of powers granted to the federal government (e.g., coining of money, declaring war) and those reserved for the states (e.g., driver's license, marriage license).</p> <p>4-C3.0.3 Describe the organizational structure of the federal government in the United States (legislative, executive, and judicial branches).</p> <p>4-C3.0.4 Describe how the powers of the federal government are separated among the branches.</p> <p>4-C3.0.5 Give examples of how the</p>	<p>national) in a hierarchy (UNIT: State Studies)</p> <p>None</p> <p>Describing the 3 Branches of Government (UNIT: State Studies)</p> <p>Describing the 3 Branches of Government (UNIT: State Studies)</p> <p>Describing the 3 Branches of Government (UNIT: State Studies)</p>	<p>government</p> <p><input type="checkbox"/> Local, state & federal</p> <p>None</p> <p><input type="checkbox"/> Structure and function of the branches of government: checks and balances to limit power</p> <ul style="list-style-type: none"> o Legislative Branch: Congress – makes laws o Executive Branch: office of President – carries out laws o Judicial Branch: Supreme Court – interprets laws <p><input type="checkbox"/> Same as above</p>	
--	--	--	--

<p>system of checks and balances limits the power of the federal government (e.g., presidential veto of legislation, courts declaring a law unconstitutional, congressional approval of judicial appointments).</p> <p>4-C3.0.6 Describe how the President, members of the Congress, and justices of the Supreme Court come to power (e.g., elections versus appointments). (new)</p> <p>4-C3.0.7 Explain how the federal government uses taxing and spending to serve the purposes of government.</p>	<p>Studies)</p> <p>None</p> <p>Ordering the levels of government (local, state, and national) in a hierarchy (UNIT: State Studies)</p>	<p>Same as above</p> <p>None</p> <p>- Levels & function of government <input type="checkbox"/> State and US Constitution</p>	
U3.4 – Roles of the Citizen in American Democracy			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Explain important rights and how, when, and where American citizens demonstrate their responsibilities by participating in government</i></p> <p>4-C5.0.1 Explain responsibilities of citizenship (e.g., initiating changes in laws or policy, holding public office, respecting the law, being informed and attentive to public issues, paying taxes, registering to vote and voting knowledgeably, serving as a juror).</p>	<p>Describing the rights and responsibilities involved with American citizenship (freedom of speech, voting, knowing representatives) (UNIT: State Studies)</p>	<p>- Citizenship <input type="checkbox"/> Citizenship Rights o 1st Amendment rights o Opportunities to be educated <input type="checkbox"/> Citizenship</p>	

<p>4-C5.0.2 Describe the relationship between rights and responsibilities of citizenship.</p> <p>4-C5.0.3 Explain why rights have limits. (shares alignment with 3rd grade NHA)</p> <p>4-C5.0.4 Describe ways citizens can work together to promote the values and principles of American democracy. (Shares alignment with 3rd grade NHA)</p>	<p>Describing the rights and responsibilities involved with American citizenship (freedom of speech, voting, knowing representatives) (UNIT: State Studies)</p> <p>Explaining the origin of Core Democratic Values and how they help define what it means to be a citizen (UNIT: America: Founding & Principles)</p>	<p>Responsibilities o Understanding and participating in the election process and voting</p> <p>Same as above</p> <p>- Are the fundamental beliefs and constitutional principles of American society which unite all Americans</p> <p><input type="checkbox"/> Life: Each person has the right to the protection of life.</p> <p><input type="checkbox"/> Liberty: Includes the freedom to believe what you want, freedom to choose your own friends, and to have your own ideas and opinions, to express your ideas in public, the right for people to meet in groups, and the right to have any</p>	<p>Both C5.0.3 and C5.0.4 are aligned with 3rd grades objectives and content listed on the left. However 3rd teaches a basic understanding of what the values mean NOT explaining why each has limits and NOT describing ways citizens can work together to promote these values</p>
---	--	---	---

		<p>lawful job or business.</p> <ul style="list-style-type: none"> <input type="checkbox"/> Pursuit of Happiness: Each person can find happiness in their own way, so long as they do not step on the rights of others. <input type="checkbox"/> Common Good: People should work together for the good of all. The government should make laws that are good for everyone. <input type="checkbox"/> Justice: All people should be treated fairly in getting the advantages and disadvantages of our country. No group or person should be favored. <input type="checkbox"/> Diversity: Differences in language, dress, food, where parents or grandparents were born, race, and religion are not only allowed but accepted as important. <input type="checkbox"/> Equality: Everyone should get the same treatment regardless of where your parents or grandparents were born, your race or religion, or how much money you have. All people have political, 	
--	--	--	--

		<p>social and economic equality.</p> <ul style="list-style-type: none"> <input type="checkbox"/> Truth: The government and citizens should not lie. <input type="checkbox"/> Popular Sovereignty: The power of the government comes from the people. <input type="checkbox"/> Patriotism: A devotion to our country and the core democratic values in word or deed. <input type="checkbox"/> Rule of Law: Both the government and the people must obey the law. 	
--	--	---	--

U4 - Economics

Fourth grade students continue to deepen their understanding of economic principles with a focus on the characteristics of market economies. They move beyond applying the economic concepts of scarcity, choice, and opportunity costs in personal economic decisions and begin to think like an economist, identifying the types of questions economists ask. Economic decision making is examined by applying the concepts of price, competition, and incentives. Students develop an understanding of specialization, division of labor, competition, and interdependence and explore their effects on productivity. Moreover, the circular flow model is introduced in fourth grade, providing a foundation for future studies in economics. Students build upon their knowledge of governmental taxing and spending as they explore why certain public goods are not privately owned. Students also take an increasingly sophisticated look at the global economy as the expectations explore the impact of global competition on the national economy.

U4.1 Market Economy			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<i>Use fundamental principles and concepts of economics to understand economic activity in a market economy</i>	Categorizing real-life	- Are the natural, human	

<p>4-E1.0.1 Identify questions economists ask in examining the United States (e.g., What is produced? How is it produced? How much is produced? Who gets what is produced? What role does the government play in the economy?).</p> <p>4-E1.0.2 Describe some characteristics of a market economy (e.g., private property rights, voluntary exchange, competition, consumer sovereignty, incentives, and specialization).</p> <p>4-E1.0.3 Describe how positive and negative incentives influence behavior in a market economy. (shares alignment with 3rd grade NHA)</p> <p>4-E1.0.4 Explain how price affects</p>	<p>examples of productive resources (natural, human, capital resources) (UNIT: Economics)</p> <p>Explaining how the government is an example of an economic system (UNIT: Economics)</p> <p>Analyzing the strengths and weaknesses of the concept of specialization (UNIT: Economics)</p> <p>Analyzing choices based on positive and negative incentives (UNIT: Economics)</p>	<p>and capital resources utilized by entrepreneurs to produce goods and services</p> <ul style="list-style-type: none"> - Role of government <ul style="list-style-type: none"> <input type="checkbox"/> Local, state and federal governments have the problem of scarcity o Limited budgets and may pay for goods and services through taxation and borrowing - Specialization: the concentration of production on fewer kinds of goods/services and/or the performance of a specific task or job <ul style="list-style-type: none"> <input type="checkbox"/> Advantages of specialization <input type="checkbox"/> Weaknesses of specialization - Peoples choices are

--	-------------	--	--

U4.2 National Economy			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<i>Use fundamental principles and concepts of economics to understand economic activity in the United States.</i> 4-E2.0.1 Explain how changes in the United States economy impact levels of employment and unemployment (e.g., changing demand for natural resources, changes in technology, and changes in competition). (H) (new)	None	None	
U4.3 International Economy			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<i>Use fundamental principles and concepts of economics to understand economic activity in the global economy.</i> 4-E3.0.1 Describe how global competition affects the national economy (e.g., outsourcing of jobs, Increased supply of goods, opening new markets, quality controls). (new)	None	None	

U5 – Public Discourse, Decision Making, and Citizen Involvement

Students deepen their understanding of public issues and the importance of citizen action in a democratic republic. Using the context of the United States, fourth grade students identify public policy issues facing citizens in the United States, use graphic data and other sources to analyze information about the issue, and evaluate alternative resolutions. By utilizing examples, students expand their understanding of how conflicts among core democratic values often lead people to want different resolutions to a public policy question. Students demonstrate competency in expressing their own opinions relative to a public issue in the United States and justify their opinions with a reasoned argument with increasing complexity. This foundational knowledge is built upon throughout the grades as students use their knowledge of how, when, and where to communicate and become more proficient in communicating positions on sophisticated public issues with a reasoned argument.

U5.1 Identifying and Analyzing Issues			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<i>Clearly state a problem as a public policy issue, analyze various perspectives, and generate and evaluate possible alternative resolutions</i>			
4-P3.1.1 Identify public issues in the local community that influence the daily lives of its citizens.	Predicting the impact that the current events will have on the future of their state (UNIT: State Studies)	Current Events - Examine current state issues in the news	
4-P3.1.2 Use graphic data and other sources to analyze information about a public issue in the local community and evaluate alternative resolutions	None	None	
4-P3.1.3 Give examples of how conflicts over core democratic values lead people to differ on resolutions to a public policy issue in Michigan.	None	None	

U5.2 Persuasive Communication About a Public Issue			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Communicate a reasoned position on a public issue</i></p> <p>4-P3.3.1 Compose a brief essay expressing a position on a public policy issue in the United States and justify the position with a reasoned argument.</p>	None	None	
U5.3 Citizen Involvement			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Act constructively to further the public good</i></p> <p>4-P4.2.1 Develop and implement an action plan to address or inform others about a public issue</p> <p>4-P4.2.2 Participate in projects to help or inform others</p>	None	None	
	None	None	

Additional NHA Content

The following content and/or units are not required by the 4th grade Michigan GLCE's and should not longer be taught in 4th grade:

NHA Social Studies Unit: Economics _____	
Content	Unit Objectives
<p>Explain the concept of “income: (generating income and using income) (UNIT: Resources)</p>	<p>Money</p> <ul style="list-style-type: none"> -Generating income: wages, salaries, rent, etc. -How income (money) can be used Spending, saving, other
<p>Define the purpose of an economic system (UNIT: Economies of the World)</p>	<p>Economics Systems</p> <ul style="list-style-type: none"> -All societies have an economic system -Systems have developed to allocate resources, and produce goods and services To answer the fundamental economic questions of what to produce, how to produce, and for whom to produce
<p>Explain how the government is an example of an economic system (UNIT: Economies of the World)</p>	<p>Role of Government</p> <p>Local, state, and federal governments have the problem of scarcity: limited budgets and may pay for goods and services through taxation and borrowing</p>

NHA Social Studies Unit: State Studies _____	
Content	Unit Objectives
<ul style="list-style-type: none"> · Describe the way of life of Native American tribes within their state (e.g., homes, traditional dress, foods, transportation, crafts, tools, and other accomplishments) · Explain Native American influences on their state (UNIT: Historical Societies & Lifestyles) 	<ul style="list-style-type: none"> - Native Americans: origins and culture <ul style="list-style-type: none"> □ First inhabitants □ Tribes inhabiting the state □ Relationship with the environment: food, clothing, shelter, etc. □ Culture: customs, traditions, arts, etc.

GRADE FIVE – Integrated U.S. History

The fifth grade social studies content expectations mark a departure from the social studies approach taken in previous grades. Building upon the geography, civics and government, and economics concepts of the United States mastered in fourth grade and historical inquiry from earlier grades, the fifth grade expectations begin a more discipline-centered approach concentrating on the early history of the United States. Students begin their study of American history with American Indian peoples before the arrival of European explorers and conclude with the adoption of the Bill of Rights in 1791. Although the content expectations are organized by historical era, they build upon students' understandings of the other social studies disciplines from earlier grades and require students to apply these concepts within the context of American history.

U1 - Era 1- Beginnings to 1620

Beginning with pre-Columbian times, the expectations focus on American Indians living in North America before European exploration. The geographic concepts of spatial awareness, places and regions, human systems, and human environment interactions are addressed throughout the era as students study American history to 1620. The expectations deliberately expand upon students' knowledge of American Indians living in Michigan and the concept of regions from previous grades. In examining European exploration and conquest, the expectations embed geographic, civics, and economic concepts, and revisit the case study method used by historians to explain the technological and political developments that made exploration possible. In deepening understanding of perspective, students also explore the goals, obstacles, motivations, and consequences of European exploration and the subsequent colonization of the Americas. The expectations also include an introduction to life in Africa as a foundation for examining interactions among Europeans, American Indians, and Africans from the 15th through the 17th centuries with a focus on how economic concepts influenced the behavior of people and nations. Students apply the tools of the historian by using primary and secondary sources to compare European and American Indian cultures, using previously established criteria. The expectations also focus on the interaction among Europeans, American Indians, and Africans, by exploring the impact of European contact on American Indian cultures, comparing the approaches of the British and French in their interactions with American Indians, and examining the Columbian Exchange and its impact on all three groups.

U1.1 American Indian Life in the Americas			
Michigan GLCE's	NHA Unit Objectives	NHA Content	Notes
<p><i>Describe the life of peoples living in North America before European exploration.</i></p> <p>5-U1.1.1 Use maps to locate peoples in the desert Southwest, the Pacific Northwest, the nomadic nations of the Great Plains, and the woodland peoples east of the Mississippi River (Eastern Woodland).</p> <p>5-U1.1.2 Compare how American Indians in the desert Southwest and the Pacific Northwest adapted to or modified the environment.</p> <p>5-U1.1.3 Describe Eastern Woodland American Indian life with respect to governmental and family structures, trade, and views</p>	<p>Compare and contrast the way of life of various Native American tribes within the United States (MT: Historical Societies & Lifestyles)</p>	<p>Native American Regions Main characteristics and lifestyles (shelter, food, clothing, natural resources, tribes) of North American Indian groups</p> <ul style="list-style-type: none"> • Northeast Woodlands (Iroquois League – Confederation) <ul style="list-style-type: none"> • Southeast • Plains • Great Basin & Plateau <ul style="list-style-type: none"> • Southwest • Pacific Northwest 	

on property ownership and land use.

U1.3 African Life Before the 17 th Century			
Michigan GLCE's	NHA Unit Objectives	NHA Content	Notes
<p><i>Describe the lives of peoples living in western Africa prior to the 16th century.</i></p> <p>New 5-U1.3.1 Use maps to locate the major regions of Africa (northern Africa, western Africa, central Africa, eastern Africa, and southern Africa). <i>Currently taught in 7th grade</i></p> <p>New 5-U1.3.2 Describe the life and cultural development of people living in western Africa before the 16th century with respect to economic (the ways people made a living) and family structures, and the growth of states, towns, and trade.</p>	New unit		

U1.4 Three World Interactions			
Michigan GLCE's	NHA Unit Objectives	NHA Content	Notes
<p><i>Describe the environmental, political, and cultural consequences of the interactions among European, African, and American Indian peoples in the late 15th through the 17th century.</i></p> <p>New 5-U1.4.1 Describe the convergence of Europeans, American Indians and Africans in North America after 1492 from the perspective of these three groups.</p> <p>New 5-U1.4.2 Use primary and secondary sources to compare Europeans and American Indians who converged in the western hemisphere after 1492 with respect to governmental structure, and views on property ownership and land use.</p> <p>5-U1.4.3 Explain the impact of European contact on American Indian cultures</p>	<p>Compare and contrast early English settlements in the United States with French and Spanish settlements (MT: Historical Societies & Lifestyles)</p> <p>Describe the explorers' influence on the conquered land (e.g. trade) (MT: Significant Events, Individuals, & Contributions (World History Exemplar))</p>	<p>French Colonies Quebec</p> <p>English Colonies Earliest colonies</p> <ul style="list-style-type: none"> • Roanoke • Jamestown <p>Columbian Exchange Effect on Native Americans, Europeans and Africans</p>	<p>NHA Unit – Colonization</p> <p>NHA Unit – Early Exploration of N. America</p> <p>NHA Unit - Colonization</p>

<p>by comparing the different approaches used by the British and French in their interactions with American Indians.</p> <p>5-U1.4.4 Describe the Columbian Exchange and its impact on Europeans, American Indians, and Africans.</p>			
--	--	--	--

U2 - Era 2- Colonization and Settlement (1585-1763)

In learning about the regional settlement patterns and significant developments of the three distinct colonial regions prior to the American Revolution, students apply their conceptual understanding of regions and the geography of the United States. They explore how the geography influenced peoples' daily lives and economic activities as three distinct colonial regions developed. The expectations require students to apply concepts of government and economics to further understand the Southern, New England, and Middle colonies as they learn about the establishment of colonial settlements, development of colonial governments, role of religion, relationships between colonists and American Indians, and development of the institution of slavery. Using geography, students explore how human systems such as religion, movement of people, and ethnic diversity led to the establishment of other colonies within particular regions. Special attention is paid to the European slave trade and slavery in Colonial America as students explore the lives of enslaved peoples and free Africans living in the American colonies. Fifth grade students enhance their understanding of historical perspective by analyzing the perspectives of different groups living in colonial America. By comparing the different colonial regions that developed with respect to politics, economics, religion, social institutions, and human-environment interactions, the expectations prepare students for American history in middle school serving as the precursor for the regional and racial issues that culminated in the Civil War.

U2.2 European Slave Trade and Slavery in Colonial America			
Michigan GLCE's	NHA Unit Objectives	NHA Content	Notes
<p><i>Analyze the development of the slave system in the Americas and its impact upon the life of Africans.</i></p> <p>5-U2.2.1 Describe Triangular Trade including: The trade routes The people and goods that were traded The Middle Passage Its impact on life in Africa</p> <p>5-U2.2.2 Describe life of enslaved Africans and free Africans in the American colonies.</p> <p>5-U2.2.3 Describe how Africans living in North America drew upon their African past and adapted elements of new cultures to develop a distinct African-American culture.</p>	<p>Analyze contributions of colonial regions on modern society (MT: Significant Events, Individuals, & Contributions (US History Exemplar))</p>	<p>The 13 English colonies: New England, Middle Atlantic & Southern colonies: settled for a variety of economic, political, and religious reasons:</p> <ul style="list-style-type: none"> • Social characteristics <ul style="list-style-type: none"> ○ Indentured servants and free black communities ○ Plantations and slave labor in the South • Economics: Triangle Trade 	<p>NHA Unit - Colonization</p>

U2.3 Life in Colonial America			
Michigan GLCE's	NHA Unit Objectives	NHA Content	Notes
<p><i>Distinguish among and explain the reasons for regional differences in colonial America.</i></p> <p>5-U2.3.1 Locate the New England, Middle, and Southern colonies on a map.</p> <p>5-U2.3.2 Describe the daily life of people living in the New England, Middle, and Southern Colonies.</p> <p>New 5-U2.3.3 Describe colonial life in America from the perspectives of at least three different groups of people.</p> <p>5-U2.3.4 Describe the development of the emerging labor force in the colonies.</p> <p>New 5-U2.3.5 Make generalizations about the reasons for regional differences in colonial America.</p>	<p>Analyze contributions of colonial regions on modern society (MT: Significant Events, Individuals, & Contributions (US History Exemplar))</p> <p>Explain how the way of life in the colonial regions (New England, Middle Atlantic, Southern Colonies) was influenced by social characteristics (families, class structure, religion, economies) (MT: Historical Societies & Lifestyles)</p>	<p>The 13 English colonies: New England, Middle Atlantic & Southern colonies: settled for a variety of economic, political, and religious reasons:</p> <ul style="list-style-type: none"> • Geographical characteristics • Religion <ul style="list-style-type: none"> ○ Separatists (Pilgrims) ○ Puritans ○ Quakers • Social characteristics <ul style="list-style-type: none"> ○ Hierarchical social order ○ Nuclear families ○ Indentured servants and free black communities ○ Plantations and slave labor in the South 	NHA Unit - Colonization

U3 - Era 3- Revolution and the New Nation (1754-1800)

In studying the American Revolution and the New Nation, the expectations deliberately build upon students' prior knowledge in government and economics. The political and economic aspects of the French and Indian War and its aftermath are stressed. Students deepen their understanding of perspective by comparing patriot and loyalist perspectives with respect to events that eventually culminated in the American Revolution. The expectations in this historical era emphasize significant ideas about government as reflected in the Declaration of Independence and the role of key individuals and groups in declaring independence. Students also apply concepts of power and authority to the perspectives of the colonists and the British during the revolutionary era. Emphasis is placed on how colonial experiences and ideas about government influenced the decision of the colonists to declare independence. Students examine the course, character, and consequences of the American Revolution using geography and economics students to compare the advantages and disadvantages of each side in the war. Students also describe the significant events and turning points during the war. In examining the challenges faced by the new nation under the Articles of Confederation, the expectations continue to build upon students' understanding of government. By exploring the political ideas underlying the Articles of Confederation and the subsequent adoption of the U.S. Constitution and Bill of Rights (with particular emphasis on the rights contained in first four amendments), the values and principles of American democracy are revisited through a historical context. Students examine how the Founders sought to limit the power of government through principles of separation of powers, checks and balances, dual sovereignty (federalism), protection of individual rights, popular sovereignty, and rule of law.

U3.1 Causes of the American Revolution			
Michigan GLCE's	NHA Unit Objectives	NHA Content	Notes
<p><i>Identify the major political, economic, and ideological reasons for the American Revolution.</i></p> <p>5-U3.1.1 Describe the role of the French and Indian War, how British policy toward the colonies in America changed from 1763 to</p>	<p>Explain important events in the Revolutionary Era that led to the independence of the United States from Britain (MT: Significant Events, Individuals, & Contributions (US History Exemplar)</p> <p>Analyze the impact of important individuals on the history of the United States (MT: Significant Events, Individuals, &</p>	<p><u>NHA Content</u></p> <p>Background Causes</p> <ul style="list-style-type: none"> • War debt (French and Indian War) • Taxation without representation <ul style="list-style-type: none"> ○ Stamp Act ○ Tea Act ○ “Intolerable Acts” <p>Shift from Protest to Separation</p> <ul style="list-style-type: none"> • Public forum shaped attitudes <ul style="list-style-type: none"> ○ Political bodies <ul style="list-style-type: none"> ▪ Sons of Liberty ▪ Committees of Correspondence 	<p>NHA Unit – The Revolutionary War</p>

P3.1 Identifying and Analyzing Public Issues			
Michigan GLCE's	NHA Unit Objectives	NHA Content	Notes
<p><i>Clearly state a problem as public policy issue, analyze various perspectives, and generate and evaluate possible alternative resolutions.</i></p> <p>5-P3.1.1 Identify contemporary public issues related to the United States Constitution and their related factual, definitional, and ethical questions.</p> <p>5-P3.1.2 Use graphic data and other sources to analyze information about a contemporary public issue related to the United States Constitution and</p>	<ul style="list-style-type: none"> Describe and explain current events facing the United States relating to government and civil rights (MT: Current Events in the Context of History (US History Exemplar)) Predict the impact that the current events will have on the future of the United States as well as the individual citizen (MT: Current Events in the Context of History (US History Exemplar)) 	<p>Elements of the Constitution</p> <ul style="list-style-type: none"> Democracy: government run by the people, where supreme power is given to the citizens <ul style="list-style-type: none"> Citizens are the source of the government's authority; run directly by people through elected representatives <ul style="list-style-type: none"> Purpose of government <ul style="list-style-type: none"> To protect the rights of individuals, maintain order, and promote the common good as stated in the Preamble to the Constitution 3 Branches of Government: Checks and Balances to limit power <ul style="list-style-type: none"> Legislative Branch: Congress - made up of the Senate & House of Reps creates laws Executive Branch: Office of 	<p>NHA Unit – The U.S. Constitution and Government</p>

<p>evaluate alternative resolutions.</p> <p>5-P3.1.3 Give examples of how conflicts over core democratic values lead people to differ on contemporary constitutional issues in the United States.</p>		<p>President – carries out laws made by the legislative branch</p> <ul style="list-style-type: none"> ○ Judicial Branch: Supreme Court – interprets laws made by the legislative branch to determine if they are constitutional • The Bill of Rights: The first ten amendments guaranteeing individual freedoms <p>Current Events Constitutional issues, civic responsibilities, individual rights etc.</p>	
--	--	--	--

P3-4 Public Discourse, Decision Making, and Citizen Involvement

The expectations continue to stress the importance of citizen action in a democratic republic as students expand their ability to address public policy issues. Students address contemporary public issues related to the Constitution and identify the related factual, definitional, and ethical questions. They use graphic data and other sources to analyze information about the issue, evaluate alternative resolutions, and use core democratic values to explain why people may differ on the resolution to a constitutional issue. Students are required to demonstrate increasing sophistication in their abilities to communicate a position on more complex national public policy issue and support it with a reasoned argument.

P3.3 Persuasive Communication About a Public Issue			
Michigan GLCE's	NHA Unit Objectives	NHA Content	Notes
<p><i>Communicate a reasoned position on a public issue.</i></p> <p>New 5-P3.3.1 Compose a short essay expressing a position on a contemporary public policy issue related to the Constitution and justify the position with a reasoned argument (5th Grade MT: Writing Applications)</p>	New unit		

P4.2 Citizen Involvement			
Michigan GLCE's	NHA Unit Objectives	NHA Content	Notes
<p><i>Act constructively to further the public good.</i></p> <p>New 5-P4.2.1 Develop and implement an action plan and know how, when, and where to address or inform others about a public issue.</p> <p>New 5-P4.2.2 Participate in projects to help or inform others.</p>	New unit		

Additional NHA Content

The following content and/or units are not required by the 5th grade Michigan GLCE's and should no longer be taught in 5th grade.

GRADE SIX – Western Hemisphere Studies

Sixth grade students will explore the tools and mental constructs used by historians and geographers. They will develop an understanding of Ancient World History, Eras 1 – 3, of the Western Hemisphere and will study contemporary geography of the Western Hemisphere. Contemporary civics/government and economics content is integrated throughout the year. As a capstone, the students will conduct investigations about past and present global issues. Using significant content knowledge, research, and inquiry, they will analyze an issue and propose a plan for the future. As part of the inquiry, they compose civic, persuasive essays using reasoned argument. Sixth Grade includes North America, Central America, the Caribbean, and South America. Europe and Russia are listed in the document in grade 7, but may be included with either Western or Eastern Hemisphere Studies. World History Eras 1, 2, and 3 are included in Grades 6 and 7 as a foundation for High School World History and Geography.

Note: The World in Temporal Terms and The World in Spatial Terms become foundational expectations for the 7th Grade study of the Eastern Hemisphere.

HISTORY

H1 The World in Temporal Terms: Historical Habits of Mind (Ways of Thinking)

Evaluate evidence, compare and contrast information, interpret the historical record, and develop sound historical arguments and perspectives on which informed decisions in contemporary life can be based.

Historians use conceptual devices (eras, periods, and calendars and time lines) to organize their study of the world. Chronology is based on time and reflects cultural and historical interpretations, including major starting points, and calendars based on different criteria (religious, seasonal, Earth-sun-and-moon relationships). Historians use eras and periods to organize the study of broad developments that have involved large segments of world's population and have lasting significance for future generations and to explain change and continuity. History is a process of reasoning based on evidence from the past. Historians use and interpret a variety of historical documents (including narratives), recognize the difference between fact and opinion, appreciate multiple historical perspectives while avoiding present mindedness (judging the past solely in term of norms and values of today), and explain that historical events often are the result of multiple causation. Students will conduct their own inquiry and analysis in their studies about the ancient history of the Western Hemisphere. Historians apply temporal perspective, historical inquiry, and analysis to spheres of human society to construct knowledge as historical understandings. These understandings are drawn from the record of human history and include human aspirations, strivings, accomplishments, and failures in spheres of human activity.

H1.1 Temporal Thinking			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Use historical conceptual devices to organize and study the past.</i></p> <p>6 – H1.1.1 Explain why and how historians use eras and periods as constructs to organize and explain human activities over time.</p> <p>6 – H1.1.2 Compare and contrast several different calendar systems used in the past and present and their cultural significance (e.g., Olmec and Mayan calendar systems, Aztec Calendar Stone, Sun Dial, Gregorian calendar – B.C./A.D.; contemporary secular – B.C.E./C.E. Note: in 7th grade Eastern Hemisphere the Chinese, Hebrew, and Islamic/Hijri calendars are included).</p>			

H1.2 Historical Inquiry and Analysis

Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Use historical inquiry and analysis to study the past.</i></p> <p>6 – H1.2.1 Explain how historians use a variety of sources to explore the past (e.g., artifacts, primary and secondary sources including narratives, technology, historical maps, visual/mathematical quantitative data, radiocarbon dating, DNA analysis).</p> <p>6 – H1.2.2 Read and comprehend a historical passage to identify basic factual knowledge and the literal meaning by indicating who was involved, what happened, where it happened, what events led to the development, and what consequences or outcomes followed.</p> <p>6 – H1.2.3 Identify the point of view (perspective of the author) and context</p>			

<p>when reading and discussing primary and secondary sources.</p> <p>6 – H1.2.4 Compare and evaluate competing historical perspectives about the past based on proof.</p> <p>6 – H1.2.5 Identify the role of the individual in history and the significance of one person's ideas.</p>			
--	--	--	--

H1.4 Historical Understanding			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Use historical concepts, patterns, and themes to study the past.</i></p> <p>6 – H1.4.1 Describe and use cultural institutions to study an era and a region (political, economic, religion/ belief, science/technology, written language, education, family).</p> <p>6 – H1.4.2 Describe and use themes of history to study patterns of change and continuity.</p> <p>6 – H1.4.3 Use historical perspective to analyze global issues faced by humans long ago and today.</p>			

W1 WHG Era 1 – The Beginnings of Human Society: Beginnings to 4000 B.C.E. /B.C.

Explain the basic features and differences between hunter-gatherer societies and pastoral nomads. Analyze and explain the geographic, environmental, biological, and cultural processes that influenced the rise of the earliest human communities, the migration and spread of people throughout the world, and the causes and consequences of the growth of agriculture.

In the first era of human history, people spread throughout the world. As communities of hunters, foragers, or fishers, they adapted creatively and continually to a variety of contrasting, changing environments in the Americas. The Agricultural Revolution was a major turning point in history that resulted in people and civilizations viewing and using the land in a systematic manner to grow food crops, raise animals, produce food surpluses, and the development of sedentary settlement.

W1.1 Peopling of the Earth			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe the spread of people in the Western Hemisphere in Era 1.</i></p> <p>6 – W1.1.1 Describe the early migrations of people among Earth's continents (including the Beringa Land Bridge).</p> <p>6 – W1.1.2 Examine the lives of hunting and gathering people during the earliest eras of human society (tools and weapons, language, fire).</p>	<p><u>NHA Unit Objectives</u></p> <p>Explain the influence that ancient civilizations had on modern society (government, contributions, religion/philosophy, trade, tools weapons, agriculture, migration/settlement) (MT: Historical Societies & Lifestyle)</p> <p>Evaluate how the social structure in ancient civilizations contributed to their success(or lack of) (MT: Historical Societies & Lifestyle)</p> <p>Evaluate lasting effects of gender roles and class structure</p>	<p>Native Inuit migration and way of life</p> <p>Native American Regions</p> <p>Native Central/Latin Americans</p> <p>Physical Geography of the western Hemisphere</p> <ul style="list-style-type: none"> • Appalachia • Canadian Shield <ul style="list-style-type: none"> • Plains • Arctic Islands <ul style="list-style-type: none"> • Mexico • Caribbean Islands <ul style="list-style-type: none"> • South America • Central America 	<p>Parts of the following - Grade 5 NHA Unit: Native American Cultures; Grade 6 NHA Unit Latin America Studies; Grade 7 NHA Unit: Canada Studies</p>

	<p>on the culture in different world regions(MT: Human Characteristics)</p> <p>Explain how historical events influenced the language spoken in regions of the world (MT: Human Characteristics)</p>		
--	---	--	--

W1.2 Agricultural Revolution			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe the Agricultural Revolution and Explain why it is a turning point in history.</i></p> <p>6 – W1.2.1 Describe the transition from hunter gatherers to sedentary agriculture (domestication of plants and animals).</p> <p>6 – W1.2.2 Describe the importance of the natural environment in</p>	<p><u>NHA Unit Objectives</u></p> <p>Explain the influence that ancient civilizations had on modern society (government, contributions, religion/philosophy, trade, tools weapons, agriculture, migration/settlement) (MT: Historical Societies & Lifestyle)</p> <p>Evaluate how the social structure in ancient civilizations contributed to their success(or lack of) (MT:</p>	<p>Native Inuit migration and way of life</p> <p>Native American Regions</p> <p>Native Central/Latin Americans</p> <p>Physical Geography of the western Hemisphere</p> <ul style="list-style-type: none"> • Appalachia • Canadian Shield <ul style="list-style-type: none"> • Plains • Arctic Islands 	<p>Parts of the following - Grade 5 NHA Unit: Native American Cultures; Grade 6 NHA Unit Latin America Studies; Grade 7 NHA Unit: Canada Studies</p> <p>GLCE not specifically addressed</p>

<p>the development of agricultural settlements in different locations (e.g., available water for irrigation, adequate precipitation, and suitable growing season).</p> <p>6 – W1.2.3 Explain the impact of the Agricultural Revolution (stable food supply, surplus, population growth, trade, division of labor, development of settlements).</p>	<p>Historical Societies & Lifestyle)</p> <p>Evaluate lasting effects of gender roles and class structure on the culture in different world regions(MT: Human Characteristics)</p> <p>Explain how historical events influenced the language spoken in regions of the world (MT: Human Characteristics)</p>	<ul style="list-style-type: none"> • Mexico • Caribbean Islands • South America Central America 	
---	---	--	--

W2 WHG Era 2 – Early Civilizations and Cultures and the Emergence of Pastoral Peoples, 4000 to 1000 B.C.E. /B.C.

Describe and differentiate defining characteristics of early civilization and pastoral societies, where they emerged, and how they spread.

During this era early agrarian civilizations and pastoral societies emerged. Many of the world's most fundamental institutions, discoveries, inventions, and techniques appeared. Pastoral societies developed cultures that reflected the geography and resources that enabled them to inhabit the more challenging physical environments such as the tundra and semi-arid regions of North and South America.

W2.1 Early Civilizations and Early Pastoral Societies			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe the characteristics of early Western Hemisphere civilizations and pastoral societies.</i></p> <p>6 – W2.1.1 Explain how the environment favored hunter gatherer, pastoral and small scale agricultural ways of life in different parts of the Western Hemisphere.</p> <p>6 – W2.1.2 Describe how the invention of agriculture led to the emergence of agrarian civilizations (seasonal harvests, specialized crops, cultivation, and development of villages and towns).</p>	<p><u>NHA Unit Objectives</u></p> <p>Explain the influence that ancient civilizations had on modern society (government, contributions, religion/philosophy, trade, tools weapons, agriculture, migration/settlement) (MT: Historical Societies & Lifestyle)</p> <p>Evaluate how the social structure in ancient civilizations contributed to their success(or lack of) (MT: Historical Societies & Lifestyle)</p> <p>Evaluate lasting effects of gender roles and class structure on the culture in different world regions(MT: Human Characteristics)</p>	<p>Native Inuit migration and way of life</p> <p>Native American Regions</p> <p>Native Central/Latin Americans</p> <p>Physical Geography of the western Hemisphere</p> <ul style="list-style-type: none"> • Appalachia • Canadian Shield <ul style="list-style-type: none"> • Plains • Arctic Islands <ul style="list-style-type: none"> • Mexico • Caribbean Islands • South America • Central America 	<p>Parts of the following - Grade 5 NHA Unit: Native American Cultures; Grade 6 NHA Unit Latin America Studies; Grade 7 NHA Unit: Canada Studies</p> <p>GLCE not specifically addressed</p>

<p>6 – W2.1.3 Use multiple sources of evidence to describe how the culture of early peoples of North America reflected the geography and natural resources available (e.g., Inuit of the Arctic, Kwakiutl of the Northwest Coast; Anasazi and Apache of the Southwest).</p> <p>6 – W2.1.4 Use evidence to identify defining characteristics of early civilizations and early pastoral nomads (government, language, religion, social structure, technology, and division of labor).</p>	<p>Explain how historical events influenced the language spoken in regions of the world (MT: Human Characteristics)</p>		
---	---	--	--

W3 WHG Era 3 – Classical Traditions and Major Empires, 1000 B.C.E. /B.C. to 300 C.E. /A.D.

(Note: Mayan, Aztec, and Incan societies had their beginnings in Era 3 but became more prominent as civilizations in Era 4.) Analyze the civilizations and empires that emerged during this era, noting their political, economic, and social systems and their changing interactions with the environment. Analyze the innovations and social, political, and economic changes that occurred through the emergence of agrarian societies of Mesoamerica and Andean South America and the subsequent urbanization and trading economies that occurred in the region. (Grade 6)

Civilizations and empires that emerged during this era were noted for their political, economic and social systems and their changing interactions with the environment and the agrarian civilizations that emerged in Mesoamerica and South America.

W3.1 Classical Traditions and Major Empires in the Western Hemisphere			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe empires and agrarian civilizations in Mesoamerica and South America.</i></p> <p>6 – W3.1.1 Analyze the role of environment in the development of early empires, referencing both useful environmental features and those that presented obstacles.</p> <p>6 – W3.1.2 Explain the role of economics in shaping the development of early civilizations (trade routes and their significance – Inca Road, supply and demand for products).</p> <p>6 – W3.1.3 Describe similarities and difference among Mayan, Aztec, and Incan societies, including economy,</p>	<p><u>NHA Unit Objectives</u></p> <p>Explain the influence that ancient civilizations had on modern society (government, contributions, religion/philosophy, trade, tools weapons, agriculture, migration/settlement) (MT: Historical Societies & Lifestyle)</p> <p>Evaluate how the social structure in ancient civilizations contributed to their success(or lack of) (MT: Historical Societies & Lifestyle)</p> <p>Evaluate lasting effects of gender roles and class structure on the culture in different world regions(MT: Human Characteristics)</p> <p>Explain how historical events influenced the language spoken in regions of the world (MT: Human Characteristics)</p>	<p>Physical Geography of Latin America</p> <p>The Olmec Civilization</p> <ul style="list-style-type: none"> • 1st in Latin America • Located near the Gulf of Mexico <p>The Maya Civilization</p> <ul style="list-style-type: none"> • Accomplishments as architects: pyramids and temples • Knowledge of astronomy and mathematics: developed 365 day calendar <p>The Inca Civilization</p> <ul style="list-style-type: none"> • Built great cities(Machu Picchu, Cuzco) high in the Andes, connected by a system of roads <p>The Aztec Civilization</p> <ul style="list-style-type: none"> • Warrior Culture • Island of Tenochtitlan: aqueducts, temples, etc. <ul style="list-style-type: none"> • Montezuma (Montezuma) • Ruler priests and human sacrifice 	<ul style="list-style-type: none"> • NHA Unit Latin American Studies

<p>religion, and role and class structure.</p> <p>6 – W3.1.4 Describe the regional struggles and changes in governmental systems among the Mayan, Aztec, and Incan Empires.</p> <p>6 – W3.1.5 Construct a timeline of main events on the origin and development of early and classic ancient civilizations of the Western Hemisphere (Olmec, Mayan, Aztec, and Incan).</p>		<p>Spanish exploration & Conquistadors</p> <ul style="list-style-type: none"> • Cortez and Pizzaro • Spanish weapons • Spread of European disease • Beginning of colonization 	<p>GLCE not specifically addressed</p>
--	--	--	--

GEOGRAPHY

G1 The World in Spatial Terms: Geographical Habits of Mind

Describe the relationships between people, places, and environments by using information that is in a geographic (spatial) context. Engage in mapping and analyzing the information to explain the patterns and relationships they reveal both between and among people, their cultures, and the natural environment. Identify and access information, evaluate it using criteria based on concepts and themes, and use geography in problem solving and decision making. Explain and use key conceptual devices (places and regions, spatial patterns and processes) that geographers use to organize information and inform their study of the world.

Geographers use published maps, sketch (mental) maps, and other geographic representations, tools, and technologies to acquire, organize, process, and report information from a spatial perspective. World maps made for specific purposes (population distribution, climate patterns, and vegetation patterns) are used to explain the importance of maps in presenting information that can be compared, contrasted, and examined to answer the questions “Where is something located?” and “Why is it located there?” Students will begin with global scale and then refocus the scale to study the region of the Western Hemisphere, and, finally, focus on a specific place. Geographers use information and skills to reach conclusions about significant questions regarding the relationships between people, their cultures, the environments in which they live, and the relationships within the larger world context. Students will reach their own conclusions using this information and make a reasoned judgment about the most justifiable conclusion based on the authenticity of the information, their skill at critically analyzing the information, and presenting the results of the inquiry. The nature and uses of geography as a discipline and the spatial perspective require that students observe, interpret, assess, and apply geographic information and skills. The uses of the subject and content of geography are essential in the development of geographical understanding. A spatial perspective enables student to observe, describe, and analyze the organizations of people, places, and environments at different scales and is central to geographic literacy.

G1.1 Spatial Thinking			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Use maps and other geographic tools to acquire and process information from a spatial perspective.</i></p> <p>6 – G1.1.1 Describe how geographers use mapping to represent places and natural and human phenomena in the world.</p> <p>6 – G1.1.2 Draw a sketch map from memory of the Western Hemisphere showing the major</p>	<p><u>NHA Unit Objectives</u></p> <p>Analyze the appropriate use and purposes of different types of maps (MT: Maps & Globes)</p>	<p>Maps and Globes</p> <p>Types of Maps</p> <ul style="list-style-type: none"> • Political • Physical • Relief & Contour • Climate • Natural Resources / Land Use • Population • Time Zone • Roadways • Historical • Sketch <p>Physical Geography of the western Hemisphere</p>	<p>NHA Grade Six Geography</p>

regions (Canada, United States, Mexico, Central America, South America, and Caribbean).		<ul style="list-style-type: none"> • Appalachia • Canadian Shield <ul style="list-style-type: none"> • Plains • Arctic Islands <ul style="list-style-type: none"> • Mexico • Caribbean Islands <ul style="list-style-type: none"> • South America • Central America

G2.2 Human Characteristics of Place			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe the human characteristics of places.</i></p> <p>6 – G2.2.1 Describe the human characteristics of the region under study (including languages, religion, economic system, governmental system, cultural traditions).</p> <p>6 – G2.2.2 Explain that communities are affected positively or negatively by changes in technology (e.g., Canada with regard to mining, forestry, hydroelectric power generation, agriculture, snowmobiles, cell phones, air travel).</p> <p>6 – G2.2.3 Analyze how culture and experience influence people's</p>	<p><u>NHA Unit Objectives</u></p> <p>Predict the consequences of movement on the physical environment (MT: 5 Themes of Geography)</p> <p>Analyze the appropriate use and purposes of different types of maps (MT: Maps & Globes)</p>	<p>Maps and Globes</p> <p>Types of Maps</p> <ul style="list-style-type: none"> • Political • Physical • Relief & Contour • Climate • Natural Resources / Land Use • Population • Time Zone • Roadways • Historical • Sketch 	<p>NHA Grade Six Geography Unit</p> <p>GLCE not specifically addressed</p>

<p>perception of places and regions (e.g., the Caribbean Region that presently displays enduring impacts of different immigrant groups – Africans, South Asians, Europeans – and the differing contemporary points of view about the region displayed by islanders and tourists).</p>			
---	--	--	--

G3 Physical Systems

Describe the physical processes that shape the Earth's surface which, along with plants and animals, are the basis for both sustaining and modifying ecosystems. Identify and analyze the patterns and characteristics of the major ecosystems on Earth.

G3.1 Physical Processes			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe the physical processes that shape the patterns of the Earth's surface.</i></p> <p>6 – G3.1.1 Construct and analyze climate graphs for two locations at different latitudes and elevations in the region to answer geographic questions and make predictions based on</p>	<p><u>NHA Unit Objectives</u></p> <p>Analyze the appropriate use and purposes of different types of maps (MT: Maps & Globes)</p>	<p>Maps and Globes</p> <p>Types of Maps</p> <ul style="list-style-type: none"> • Political • Physical • Relief & Contour • Climate • Natural Resources / Land Use • Population • Time Zone • Roadways 	<p>NHA Grade Six Geography Unit</p>

<p>patterns. (e.g., compare and contrast Buenos Aires and La Paz; Mexico City and Guatemala City; Edmonton and Toronto).</p>		<ul style="list-style-type: none"> • Historical • Sketch 	
--	--	--	--

G3.2 Ecosystems			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe the characteristics and spatial distribution of ecosystems on the Earth's surface.</i></p> <p>6 – G3.2.1 Explain how and why ecosystems differ as a consequence of differences in latitude, elevation, and human activities (e.g., South America's location relative to the equator, effects of elevations on temperature and growing season, proximity to bodies of water and the effects on temperature and rainfall, effects of annual flooding on vegetation along river flood plains such as the Amazon).</p> <p>6 – G3.2.2 Identify ecosystems and explain why some are more attractive for humans to use than are others (e.g., mid-latitude forest in North America, high</p>	<p><u>NHA Unit Objectives</u></p> <p>Analyze the appropriate use and purposes of different types of maps (MT: Maps & Globes)</p>	<p>Maps and Globes</p> <p>Types of Maps</p> <ul style="list-style-type: none"> • Political • Physical • Relief & Contour • Climate • Natural Resources / Land Use <ul style="list-style-type: none"> • Population • Time Zone • Roadways • Historical • Sketch <p>Consequences of Migration on Ecosystems</p> <ul style="list-style-type: none"> • Urbanization • Desertification • Deforestation 	<p>NHA Grade Six Geography Unit</p>

latitude of Peru, tropical forests in Honduras, fish or marine vegetation in coastal zones).			
--	--	--	--

G4 Human Systems

Explain that human activities may be seen on Earth's surface.

Human systems include the way people divide the land, decide where to live, develop communities that are part of the larger cultural mosaic, and engage in the cultural diffusion of ideas and products within and among groups.

G4.1 Cultural Mosaic			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe the characteristics, distribution and complexity of Earth's cultural mosaic.</i></p> <p>6 – G4.1.1 Identify and explain examples of cultural diffusion within the Americas (e.g., baseball, soccer, music, architecture, television, languages, health care, Internet, consumer brands, currency, restaurants, international migration).</p>			

G4.2 Technology Patterns and Networks			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe how technology creates patterns and networks that connect people, products, and ideas.</i></p> <p>6 – G4.2.1 List and describe the advantages and disadvantages of different technologies used to move people, products, and ideas throughout the world (e.g., call centers in the Eastern Hemisphere that service the Western Hemisphere; the United States and Canada as hubs for the Internet; transport of people and perishable products; and the spread of individuals' ideas as voice and image messages on</p>	<p><u>NHA Unit Objectives</u></p> <p>Analyze the appropriate use and purposes of different types of maps (MT: Maps & Globes)</p>	<p>Movement</p> <p>Push - pull factors that cause people to migrate</p>	<p>NHA Grade Six Geography Unit</p>

G4.4 Forces of Cooperation and Conflict			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Explain how forces of conflict and cooperation among people influence the division of the Earth's surface and its resources.</i></p> <p>6 – G4.4.1 Identify factors that contribute to conflict and cooperation between and among cultural groups (control/use of natural resources, power, wealth, and cultural diversity).</p> <p>6 – G4.4.2 Describe the cultural clash of First Peoples, French and English in Canada long ago, and the establishment of Nunavut in 1999.</p>	<p><u>NHA Unit Objectives</u></p> <p>Analyze the appropriate use and purposes of different types of maps (MT: Maps & Globes)</p>	<p>Movement</p> <p>Push - pull factors that cause people to migrate</p>	<p>NHA Grade Six Geography Unit GLCE not specifically addressed</p>

G5 Environment and Society

Explain that the physical environment is modified by human activities, which are influenced by the ways in which human society's value and use Earth's natural resources, and by Earth's physical features and processes. Explain how human action modifies the physical environment and how physical systems affect human systems.

G5.1 Humans and the Environment			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe how human actions modify the environment.</i></p> <p>6 – G5.1.1 Describe the environmental effects of human action on the atmosphere (air), biosphere (people, animals, and plants), lithosphere (soil), and hydrosphere (water) (e.g., changes in the tropical forest environments in Brazil, Peru, and Costa Rica).</p> <p>6 – G5.1.2 Describe how variations in technology affect human modifications of the landscape (e.g., clearing forests for agricultural land in South America, fishing in the Grand Banks of the Atlantic, expansion of cities in</p>	<p><u>NHA Unit Objectives</u></p> <p>Analyze the appropriate use and purposes of different types of maps (MT: Maps & Globes)</p>	<p>Consequences of Migration on Ecosystems</p> <ul style="list-style-type: none"> • Urbanization • Desertification • Deforestation 	<p>NHA Grade Six Geography Unit</p>

<p>South America, hydroelectric developments in Canada, Brazil and Chile, and mining the Kentucky and West Virginia).</p> <p>6 – G5.1.3 Identify the ways in which human-induced changes in the physical environment in one place can cause changes in other places (e.g., cutting forests in one region may result in river basin flooding elsewhere; building a dam floods land upstream and may permit irrigation in another region).</p>			
---	--	--	--

G5.2 Physical and Human Systems

Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe how physical and human systems shape patterns on the Earth's surface.</i></p> <p>6– G5.2.1 Describe the effects that a change in the physical environment could have on human activities and the choices people would have to make in adjusting to the change (e.g., drought in northern Mexico, disappearance of forest vegetation in the Amazon, natural hazards and disasters from volcanic eruptions in Central America and the Caribbean and earthquakes in Mexico City and Colombia).</p>	<p><u>NHA Unit Objectives</u></p> <p>Analyze the appropriate use and purposes of different types of maps (MT: Maps & Globes)</p>		<p>NHA Grade Six Geography Unit</p>

G6 Global Issues Past and Present (H1.4.3, G1.2.6)

Throughout the school year the students are introduced to topics that address global issues that integrate time and place. Included are capstone projects that entail the investigation of historical and contemporary global issues that have significance for the student and are clearly linked to the world outside the classroom. The topics and issues are developed as capstone projects within units and at the end of the course. Regular experiences with those topics and issues are necessary during each grade in order to build the background students will require to complete in-depth capstone projects.

Capstone projects require the student to use geography, history, economics, and government to inquire about major contemporary and historical issues and events linked to the world outside the classroom. The core disciplines are used to interpret the past and plan for the future. During the school year the students will

Complete at least three capstone projects. (National Geography Standards 17 and 18, p. 179 and 181)

G6.1 Global Topic Investigation and Issue Analysis (P2)			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
6 – G6.1.1 - Contemporary Investigations – Conduct research on contemporary global topics and issues, compose persuasive essays, and develop a plan for action. (H1.4.3, G1.2.6, See P3 and P4) Contemporary Investigation Topics Global Climate Change – Investigate the impact of global climate change and describe the significance for human/environment relationships. Globalization – Investigate the significance of	<u>NHA Unit Objectives</u> Describe conflict and cooperation that occurs in current events(when they arise) (MT: Current Events in the Context of History(World History Exemplar))	World Conflict & Cooperation Factors that contribute to cooperation within regions and countries – similarities in: <ul style="list-style-type: none"> • Religion • Language • Political Beliefs • Values Factors that contribute to conflict within regions and countries: <ul style="list-style-type: none"> • Economic competition for scarce resources • Boundary Disputes • Cultural Differences • Control of Strategic Locations 	NHA Grade Six Geography Unit GLCE not specifically addressed

---	--	--	--

Civics and Government

C1 Purposes of Government

Analyze how people identify, organize, and accomplish the purposes of government.

C1.1 Nature of Civic Life, Politics, and Government			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe Civic Life, Politics, and Government and explain their relationships.</i></p> <p>6 – C1.1.1 Analyze competing ideas about the purposes government should serve in a democracy and in a dictatorship (e.g., protecting individual rights, promoting the common good, providing economic security, molding the character of citizens, or promoting a particular religion).</p>	<p><u>NHA</u></p>		<p>Sections of NHA Units: Latin America Studies and Canada Studies</p>

C3 Structure and Functions of Government

Describe the major activities of government, including making and enforcing laws, providing services and benefits to individuals and groups, assigning individual and collective responsibilities, generating revenue, and providing national security.

C3.6 Characteristics of Nation-States			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe the characteristics of nation-states and how they may interact.</i></p> <p>6 – C3.6.1 Define the characteristics of a nation-state (a specific territory, clearly defined boundaries, citizens, and jurisdiction over people who reside there, laws, and government), and how Western Hemisphere nations interact.</p> <p>6 – C3.6.2 Compare and contrast a military dictatorship such as Cuba, a presidential system of representative democracy such as the United States, and a parliamentary system of representative democracy such as Canada.</p>	<p><u>NHA Unit Objectives</u></p> <p>Describe Different government systems used in countries around the world (MT: Government Systems)</p>	<p>Communism & dictatorships</p> <ul style="list-style-type: none"> • Cuba <p>Instability: History of Dictatorships</p> <ul style="list-style-type: none"> • Bolivia, Panama, Chile, Argentina <p>Parliamentary System</p> <ul style="list-style-type: none"> • Canadian Government <p>Citizen Rights and roles</p>	<p>Sections of NHA Units: Latin America Studies and Canada Studies</p>

C4 Relationship of United States to Other Nations AND World Affairs

Explain that nations interact with one another through trade, diplomacy, treaties and agreements, humanitarian aid, economic sanctions and incentives, and military force, and threat of force.

C4.3 Conflict and Cooperation Between and Among Nations			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Explain the various ways that nations interact both positively and negatively.</i></p> <p>6 – C4.3.1 Explain the geopolitical relationships between countries (e.g., petroleum and arms purchases in Venezuela and Ecuador; foreign aid for health care in Nicaragua).</p> <p>6 – C4.3.2 Explain the challenges to governments and the cooperation needed to address international issues in the Western Hemisphere (e.g., migration and human rights).</p> <p>6 – C4.3.3 Give examples of how countries work</p>	<p><u>NHA Unit Objectives</u></p> <p>Compare and Contrast rights and responsibilities of citizens in other countries to those in the United States (MT: Citizenship-Awareness, Rights, & Responsibilities)</p>		<p>Sections of NHA Units: Latin America Studies and Canada Studies</p>

together for mutual benefits through international organizations (e.g. North American Free Trade Agreement (NAFTA), Organization of American States (OAS), United Nations (UN)).			
--	--	--	--

Economics

E1 The Market Economy

Describe the market economy in terms of the relevance of limited resources, how individuals and institutions make and evaluate decisions, the role of incentives, how buyers and sellers interact to create markets, how markets allocate resources, and the economic role of government in a market economy.

E1.1 Individual, Business, and Government Choices			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe how individuals, businesses and government make economic decisions when confronting scarcity in the market economy.</i></p> <p>6 – E1.1.1 Explain how incentives vary in different economic systems (e.g. acquiring money, profit, goods, wanting to avoid loss in position in society, job</p>	<p><u>NHA Unit Objectives</u></p> <p>Describe the importance of banks within economic institutions (MT: Economic Institutions)</p> <p>Explain how economies are influenced by competition and the impact of that on modern society (MT: Economic Concepts)</p>	<p>Economic Systems</p> <p>Market System</p> <ul style="list-style-type: none"> Individual households/firms make decisions about production and distribution in a decentralized manner <p>Command System</p> <ul style="list-style-type: none"> A central authority makes the major decisions about production and 	NHA Grade Six Economics Unit

placement).		<p>distribution</p> <p>Traditional (tribal system)</p> <ul style="list-style-type: none"> • Found in rural / non-developed countries where decisions are based on customs and traditions 	
-------------	--	---	--

E2 The National Economy

Use economic concepts, terminology, and data to identify and describe how a national economy functions and to study the role of government as a provider of goods and services within a national economy.

E2.3 Role of Government			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe how national governments make decisions that affect the national economy</i></p> <p>6 – E2.3.1 Describe the impact of governmental policy (sanctions, tariffs, treaties) on that country and on other countries that use its resources.</p>	<p><u>NHA Unit Objectives</u></p> <p>Describe the importance of labor unions within economic institutions (MT: Economic Institutions)</p> <p>Describe how economies are influenced by a variety of factors (MT: Economic Concepts)</p>	<p>Economic Concepts</p> <p>Gross Domestic Product (GDP)</p> <ul style="list-style-type: none"> The value of all final goods and services, expressed in dollars, produced within a countries borders in a given year Used as an indicator of the state of the economy <p>Inflation: sustained increase in the average price level of the entire economy</p> <ul style="list-style-type: none"> Reduces the value of currency Peoples purchasing power declines if their incomes increase more slowly than the inflation rate <p>Economic Institutions</p> <p>Specialized Economic Institutions</p> <ul style="list-style-type: none"> Sole Proprietorships Corporations 	<p>NHA Grade Six Economics Unit</p>

		<ul style="list-style-type: none"> • Partnerships • Cooperatives <ul style="list-style-type: none"> • NPO's • Labor Unions <ul style="list-style-type: none"> • Banks <p>Market Economy (Free Enterprise) Relationship between supply, demand, and price in a competitive market</p> <p>Competition among producers & sellers</p> <ul style="list-style-type: none"> • Lower costs and prices • Higher product quality • Better customer service <p>Competition among consumers & buyers results in higher prices</p> <p>Competition is not solely based on price</p> <ul style="list-style-type: none"> • Style and quality • Advertising • Customer Service • Credit Policies <p>Prices</p> <ul style="list-style-type: none"> • The price of any one product is influenced by, and also influences, the prices of other products <p>Categories of earned income</p>

		<ul style="list-style-type: none"> • Wages • Salaries • Rent • Interest • Profit 	
--	--	---	--

E3 International Economy

Analyze reasons for individuals and businesses to specialize and trade, why individuals and businesses trade across international borders, and the comparisons of the benefits and costs of specialization and the resulting trade for consumers, producers, and governments.

E3.1 Economic Interdependence			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe patterns and networks of economic interdependence, including trade.</i></p> <p>6 – E3.1.1 Use charts and graphs to compare imports and exports of different countries in the Western Hemisphere and propose generalizations about patterns of economic interdependence.</p> <p>6 – E3.1.2 Diagram or map the movement of a consumer product from where it is manufactured to where it is sold to demonstrate the flow of materials, labor, and capital (e.g., global supply chain for</p>	<p><u>NHA Unit Objectives</u></p> <p>Distinguish the strengths and weaknesses of each economic system(MT: Economies of the World)</p> <p>Make generalizations about countries and their economies using basic economic concepts(GDP, inflation) (MT: Economic Concepts)</p> <p>Explain the concept of globalization (MT: Economies of the World)</p>	<p>Globalization</p> <p>The act, process, or policy of making something worldwide in scope or application</p> <p>Trade</p> <ul style="list-style-type: none"> • International trade promotes specialization • Role of trade barriers such as tariffs, quotas, embargos • Free trade <p>Exports: goods or services produced in one nation but sold to buyers in another nation</p> <p>Imports: goods or services bought from sellers in another nation</p> <ul style="list-style-type: none"> • Increasing interdependence & integration between people, companies, and nations across the world in relation to economics, technology, culture, etc... <p>Exchange rate: price of one</p>	<p>NHA Grade Six Economics Unit</p> <p>GLCE not specifically addressed</p>

computers, athletic shoes, and clothing).		nations currency in terms of another nations currency	
6 – E3.1.3 Explain how communications innovations have affected economic interactions and where and how people work (e.g., internet-based home offices, international work teams, international companies).			

E3.3 Economic Systems			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe how societies organize to allocate resources to produce and distribute goods and services.</i></p> <p>6 – E3.3.1 Explain and compare how economic systems (traditional, command, and market) answer four basic questions: What should be produced? How will it be produced? How</p>	<p><u>NHA Unit Objectives</u></p> <p>Distinguish the strengths and weaknesses of each economic system(MT: Economies of the World)</p> <p>Make generalizations about countries and their economies using basic economic concepts(GDP, inflation) (MT: Economic Concepts)</p> <p>Explain the concept of</p>	<p>Economic Systems</p> <p>Market System</p> <ul style="list-style-type: none"> Individual households/firms make decisions about production and distribution in a decentralized manner <p>Command System</p> <ul style="list-style-type: none"> A central authority makes the major decisions about production and 	<p>NHA Grade Six Economics Unit</p>

<p>will it be distributed? Who will receive the benefits of production? (e.g., compare United States and Cuba, or Venezuela and Jamaica.)</p>	<p>globalization (MT: Economies of the World)</p>	<p>distribution Traditional (tribal system)</p> <ul style="list-style-type: none"> • Found in rural / non- developed countries where decisions are based on customs and traditions 	
---	---	---	--

P3-4 Public Discourse, Decision Making, and Citizen Involvement

The expectations continue to stress the importance of citizen action in a democratic republic as students expand their ability to address public policy issues. Students address contemporary public issues related to the Constitution and identify the related factual, definitional, and ethical questions. They use graphic data and other sources to analyze information about the issue, evaluate alternative resolutions, and use core democratic values to explain why people may differ on the resolution to a constitutional issue. Students are required to demonstrate increasing sophistication in their abilities to communicate a position on more complex national public policy issue and support it with a reasoned argument.

P3.1 Identifying and Analyzing Issues, Decision Making, Persuasive Communication About a Public Issue, and Citizen Involvement			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
6 – P3.1.1 Clearly state an issue as a question or public policy, trace the origins of an issue, analyze various perspectives, and generate and evaluate alternative resolutions. Deeply examine policy issues in group discussions and debates to make reasoned and informed decisions. Write persuasive/argumentative essays expressing and justifying decisions on public policy issues. Plan and conduct activities intended to advance views on matters of public policy, report the	New Unit		

<p>results, and evaluate effectiveness.</p> <ul style="list-style-type: none"> • Identify public policy issues related to global topics and issues studied. • Clearly state the issue as a question of public policy orally or in written form. • Use inquiry methods to acquire content knowledge and appropriate data about the issue. • Identify the causes and consequences and analyze the impact, both positive and negative. <ul style="list-style-type: none"> • Share and discuss findings of research and issue analysis in group discussions and debates. • Compose a persuasive essay justifying the position with a reasoned argument. • Develop an action plan to address or inform others about the issue at the local to global scales. 			
---	--	--	--

P4.2 Citizen Involvement			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Act constructively to further the public good.</i></p> <p>6 – P4.2.1 Demonstrate knowledge of how, when, and where individuals would plan and conduct activities intended to advance views in matters of public policy, report the results, and evaluate effectiveness.</p> <p>6 – P4.2.2 Engage in activities intended to contribute to solving a national or international problem studied.</p> <p>6 – P4.2.3 Participate in projects to help or inform others (e.g., service learning projects).</p>	New Unit		

Additional NHA Content

The following content and/or units are not required by the 6th grade Michigan GLCE's and should no longer be taught in 6th grade.

NHA Social Studies Unit: Europe Studies
Content is covered by 7 th and 9 th grade Michigan GLCE's

GRADE SEVEN – Eastern Hemisphere Studies

Seventh grade students will review the tools and mental constructs used by historians and geographers. They will develop an understanding of Ancient World History, Eras 1 – 3, of the Eastern Hemisphere and will study contemporary geography of the Eastern Hemisphere. Contemporary civics/government and economics content is integrated throughout the year. As a capstone, the students will conduct investigations about past and present global issues. Using significant content knowledge, research, and inquiry, they will analyze the issue and propose a plan for the future. As part of the inquiry, they compose civic, persuasive essays using reasoned argument.

Seventh Grade includes Europe, Africa, Asia, and Australia. Europe and Russia are listed in the document for 7th grade, but may be included with either Western or Eastern Hemisphere Studies. World History Eras 1, 2, and 3 and The World in Temporal Terms and The World in Spatial Terms are included in Grades 6 and 7 as a foundation for World History and Geography in the high school. Capstone projects of historical and contemporary global issues that have significance for the student and clearly linked to the world outside the classroom are included.

- Note: All standards met by NHA come from 6th and 7th grade Units: Middle East Studies, Europe Studies, Asia Studies, Africa Studies, and Australia/South Pacific Studies.
- Note: High school World History begins with the Middle Ages, Middle school teachers can introduce these concepts but are not required to go further than this.

HISTORY

H1 The World in Temporal Terms: Historical Habits of Mind (foundational expectations addressed in grade 6)

Evaluate evidence, compare and contrast information, interpret the historical record, and develop sound historical arguments and perspectives on which informed decisions in contemporary life can be based.

Historians use conceptual devices (eras, periods, calendars, and time lines) to organize their study of the world. Chronology is based on time and reflects cultural and historical interpretations, including major starting points, and calendars based on different criteria (religious, seasonal, Earth-sun-and-moon relationships). Historians use eras and periods to organize the study of broad developments that have involved large segments of world's population and have lasting significance for future generations and to explain change and continuity. History is a process of reasoning based on evidence from the past. Historians use and interpret a variety of historical documents (including narratives), recognize the difference between fact and opinion, appreciate multiple historical perspectives while avoiding present mindedness (judging the past solely in term of norms and values of today), and explain that historical events often are the result of multiple causation. Students will conduct their own inquiry and analysis in their studies about the ancient history of the Eastern Hemisphere. Historians apply temporal perspective, historical inquiry, and analysis to spheres of human society to construct knowledge as historical understandings. These understandings are drawn from the record of human history and include human aspirations, strivings, accomplishments, and failures in spheres of human activity.

H1.1 Temporal Thinking			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Use historical conceptual devices to organize and study the past.</i></p> <p>New 7 – H1.1.1 Explain why and how historians use eras and periods as constructs to organize and explain human activities over time.</p> <p>New 7 – H1.1.2 Compare and contrast several different calendar systems used in the past and present and their cultural significance (e.g., Sun Dial, Gregorian calendar – B.C. /A.D.; contemporary secular – B.C.E. /C.E.; Chinese, Hebrew, and Islamic/Hijri calendars).</p>			

H1.2 Historical Inquiry and Analysis			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Use historical inquiry and analysis to study the past.</i></p> <p>New 7 – H1.2.1 Explain how historians use a variety of sources to explore the past (e.g., artifacts, primary and secondary sources including narratives, technology, historical maps, visual/mathematical quantitative data, radiocarbon dating, DNA analysis).</p> <p>New – H1.2.2 Read and comprehend a historical passage to identify basic factual knowledge and the literal meaning by indicating who was involved, what happened, where it happened, what events led to the development, and what consequences or outcomes followed.</p> <p>New 7 – H1.2.3 Identify the</p>			

<p>point of view (perspective of the author) and context when reading and discussing primary and secondary sources.</p> <p>New 7 – H1.2.4 Compare and evaluate competing historical perspectives about the past based on proof.</p> <p>New 7 – H1.2.5 Describe how historians use methods of inquiry to identify cause effect relationships in history noting that many have multiple causes.</p> <p>New 7 – H1.2.6 Identify the role of the individual in history and the significance of one person's ideas.</p>			
---	--	--	--

H1.4 Historical Understanding			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Use historical concepts, patterns, and themes to study the past.</i></p> <p>New 7 – H1.4.1 Describe and use cultural institutions to study an era and a region (political, economic, religion/ belief, science/technology, written language, education, family).</p> <p>New 7 – H1.4.2 Describe and use themes of history to study patterns of change and continuity.</p> <p>New 7 – H1.4.3 Use historical perspectives to analyze global issues faced by humans long ago and today.</p>			

W1 WHG Era 1 – The Beginnings of Human Society: Beginnings to 4000 B.C.E./B.C.

Explain the basic features and differences between hunter-gatherer societies and pastoral nomads. Analyze and explain the geographic, environmental, biological, and cultural processes that influenced the rise of the earliest human communities, the migration and spread of people throughout the world, and the causes and consequences of the growth of agriculture.

In the first era of human history, people spread throughout the world. As communities of hunters, foragers, or fishers, they adapted creatively and continually to a variety of contrasting, changing environments in Africa, Eurasia, and Australia. The Agricultural Revolution was a major turning point in history that resulted in people and civilizations viewing and using the land in a systematic manner to grow food crops, raise animals, produce food surpluses, and the development of sedentary settlement.

W1.1 Peopling of the Earth			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe the spread of people in the Eastern Hemisphere in Era 1.</i></p> <p>New 7 – W1.1.1 Explain how and when human communities populated major regions of the Eastern Hemisphere (Africa, Australia, Europe, and Asia) and adapted to a variety of environments.</p> <p>New 7 – W1.1.2 Explain what archaeologists have learned about Paleolithic and Neolithic patterns of living in Africa,</p>			

Western Europe, and Asia.			
---------------------------	--	--	--

W1.2 Agricultural Revolution			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe the Agricultural Revolution and explain why it was a turning point in history.</i></p> <p>7 – W1.2.1 Explain the importance of the natural environment in the development of agricultural settlements in different locations (e.g., available water for irrigation, adequate precipitation, and suitable growth season).</p> <p>7 – W1.2.2 Explain the impact of the Agricultural Revolution (stable food supply, surplus, population growth, trade, division of labor, development of settlements).</p> <p>7 – W1.2.3 Compare and</p>		<p>Middle East</p> <ul style="list-style-type: none"> • Earliest people and their interaction with the environment • Earliest civilization 	

<p>contrast the environmental, economic, and social institutions of two early civilizations from different world regions (e.g., Yangtze, Indus River Valley, Tigris/Euphrates, and Nile).</p>			
---	--	--	--

W2 WHG Era 2 – Early Civilizations and Cultures and the Emergence of Pastoral Peoples, 4000 to 1000 B.C.E. /B.C.

Describe and differentiate defining characteristics of early civilization and pastoral societies, where they emerged, and how they spread.

During this era early civilizations and pastoral societies emerged. Many of the world's most fundamental institutions, discoveries, inventions, and techniques appeared. Pastoral societies developed the herding of animals as a primary food source that enabled them to inhabit the semi-arid steppes of Eurasia and Africa. This era introduces students to one of the most enduring themes in history: the dynamic interplay, between herding and agrarian societies involving both conflict and mutual dependence

W2.1 Early Civilizations and Early Pastoral Societies			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Analyze early Eastern Hemisphere civilizations and pastoral societies.</i></p> <p>7 – W2.1.1 Describe the importance of the development of human language, oral and written, and its relationship to the development of culture:</p> <ul style="list-style-type: none"> • verbal vocalizations • standardization of physical (rock, bird) and abstract (love, fear) words • pictographs to abstract writing (governmental administration, laws, codes, history and artistic expressions) 		<p>Middle East</p> <ul style="list-style-type: none"> • Ancient Mesopotamia <ul style="list-style-type: none"> • Sumerians • The Fertile Crescent 	

<p>7 – W2.1.2 Use historical and modern maps and other sources to locate, describe, and analyze major river systems and discuss the ways these physical settings supported permanent settlements, and development of early civilizations (Tigris and Euphrates Rivers, Yangtze River, Nile River, Indus River).</p> <p>7 – W2.1.3 Examine early civilizations to describe their common features (ways of governing, stable food supply, economic and social structures, use of resources and technology, division of labor and forms of communication).</p> <p>7 – W2.1.4 Define the concept of cultural diffusion and how it resulted in the spread of ideas and technology from one region to another (e.g.,</p>			
---	--	--	--

<p>plants, crops, plow, wheel, bronze metallurgy).</p> <p>7 – W2.1.5 Describe pastoralism and explain how the climate and geography of Central Asia were linked to the rise of pastoral societies on the steppes.</p>			
--	--	--	--

W3 WHG Era 3 – Classical Traditions, World Religions, and Major Empires, 1000 B.C.E. /B.C. to 300 C.E. /A.D.

Analyze classical civilizations and empires and the emergence of major world religions and large-scale empires.

During this era, innovations and social, political, and economic changes occurred through emergence of classical civilizations in Africa and Eurasia. Africa and Eurasia moved in the direction of forming a single world of human interchange as a result of trade, empire building, and the diffusion of skills and ideas. Six of the world's major faiths and ethical systems emerged and classical civilizations established institutions, systems of thought, and cultural styles that would influence neighboring peoples and endure for centuries.

W3.1 Classical Traditions in Regions of the Eastern Hemisphere			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Analyze classical civilizations and empires and their lasting impact on institutions, political thought, structures, technology and art forms that grew in India, China, the Mediterranean basin, Africa, and Southwest and Central Asia during this era.</i></p> <p>7 – W3.1.1 Describe the characteristics that classical civilizations share (institutions, cultural styles, systems of thought that influenced neighboring peoples and have endured for several centuries).</p> <p>7 – W3.1.2 Using historic and</p>	<p>Explain the influence that ancient civilizations had on modern society (government, contributions, religion/philosophies, trade, tools/weapons, agriculture, migration/settlement)(MT: Historical Societies & Lifestyles)</p> <p>Explain the importance of specific people and places within society (MT: Historical Societies & Lifestyles)</p> <p>Analyze the causes and consequences of ancient Greek and Roman conflicts (MT: Historical Conflict(World History Exemplar))</p> <p>Evaluate how the social</p>	<p>Europe</p> <ul style="list-style-type: none"> • Ancient Greece • Ancient Rome <p>Middle East</p> <ul style="list-style-type: none"> • Israel • Gender roles <p>Asia</p> <ul style="list-style-type: none"> • Ancient Indus Valley civilization • Caste system • Ancient Huang Ho River Valley Civilization • Daoism • Confucianism <p>Africa</p> <ul style="list-style-type: none"> • Ancient Egypt • Medieval African Kingdoms: Ghana & 	

<p>modern maps, locate three major empires of this era, describe their geographic characteristics including physical features and climates, and propose a generalization about the relationship between geographic characteristics and the development of early empires.</p> <p>New 7– W3.1.3 Compare and contrast the defining characteristics of a city-state, civilization, and empire.</p> <p>7 – W3.1.4 Assess the importance of Greek ideas about democracy and citizenship in the development of Western political thought and institutions.</p> <p>7 – W3.1.5 Describe major achievements from Indian, Chinese, Mediterranean, African, and Southwest and</p>	<p>structure in ancient civilizations contributed to their success (or lack of) (MT: Historical Societies & Lifestyles)</p> <p>Explain contributions of ancient civilizations on modern society(MT: Significant Events, Individuals, & Contributions (World History Exemplar))</p> <p>Evaluate the legacy of artistic and civil rights movements and important individuals within these movements on modern society(MT: Significant Events, Individuals, & Contributions (World History Exemplar))</p> <p>Evaluate the lasting impact of gender roles and class structure in different world regions (MT: Human Characteristics)</p>	<p>Mali</p> <p>Australia (not colonized by Europeans until after the American Revolution)</p>	
--	--	---	--

<p>Central Asian civilizations in the areas of art, architecture and culture; science, technology and mathematics; political life and ideas; philosophy and ethical beliefs; and military strategy.</p> <p>7 – W3.1.6 Use historic and modern maps to locate and describe trade networks among empires in the classical era.</p> <p>7 – W3.1.7 Use a case study to describe how trade integrated cultures and influenced the economy within empires (e.g., Assyrian and Persian trade networks or networks of Egypt and Nubia/Kush; or Phoenician and Greek networks).</p> <p>7 – W3.1.8 Describe the role of state authority, military power, taxation</p>			
--	--	--	--

<p>systems, and institutions of coerced labor, including slavery, in building and maintaining empires (e.g., Han Empire, Maryann Empire, Egypt, Greek city-states and the Roman Empire).</p> <p>7 – W3.1.9 Describe the significance of legal codes, belief systems, written languages and communications in the development of large regional empires.</p> <p>New 7 – W3.1.10 Create a time line that illustrates the rise and fall of classical empires during the classical period.</p>			
--	--	--	--

W3.2 Growth and Development of World Religions			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Explain how world religions or belief systems of Hinduism, Judaism, Buddhism, Christianity, Confucianism and Islam grew and their significance. (Islam is included here even though it came after 300 C.E. /A.D.)</i></p> <p>7 – W3.2.1 Identify and describe the beliefs of the five major world religions.</p> <p>7 – W3.2.2 Locate the geographical center of major religions and map the spread through the 3rd century C.E. /A.D.</p> <p>7 – W3.2.3 Identify and describe the ways that religions unified people's perceptions of the world and contributed to cultural integration of large regions of Afro-Eurasia. (<i>National Geography Standard 6, p. 73</i>)</p>	<p>Explain the impact of major world religions on history and current events(MT: Significant Events, Individuals, & Contributions (World History Exemplar))</p> <p>Explain the impact of religious conflict on the people of a specific region (MT: Historical Conflict (World History Exemplar))</p>	<p>Europe</p> <ul style="list-style-type: none"> • Greek and Roman Polytheism <p>Middle East</p> <ul style="list-style-type: none"> • Birthplace of 3 religions (Christianity, Islam, Judaism) • Zionist Movement (late 19th century) <p>Asia</p> <ul style="list-style-type: none"> • Birthplace of 2 religions (Hinduism, Buddhism) <p>Africa</p> <p>Ancient Egyptian Polytheism</p>	

GEOGRAPHY

G1 The World in Spatial Terms: Geographical Habits of Mind (foundational expectations addressed in grade 6)

Study the relationships between people, places, and environments by using information that is in a geographic (spatial) context.

Engage in mapping and analyzing the information to explain the patterns and relationships they reveal both between and among people, their cultures, and the natural environment. Identify and access information, evaluate it using criteria based on concepts and themes, and use geography in problem solving and decision making. Explain and use key conceptual devices (places and regions, spatial patterns and processes) that geographers use to organize information and inform their study of the world.

Geographers use published maps, sketch (mental) maps, and other geographic representations, tools, and technologies to acquire, organize, process, and report information from a spatial perspective. World maps made for specific purposes (population distribution, climate patterns, vegetation patterns) are used to explain the importance of maps in presenting information that can be compared, contrasted, and examined to answer the questions “Where is something located?” and “Why is it located there?” Students will begin with global scale and then refocus the scale to study the region of the Eastern Hemisphere, and, finally, focus on a specific place. Geographers use information and skills to reach conclusions about significant questions regarding the relationships between people, their cultures, the environments in which they live, and the relationships within the larger world context. Students will reach their own conclusions using this information and make a reasoned judgment about the most justifiable conclusion based on the authenticity of the information, their skill at critically analyzing and synthesizing the information, and presenting the results of the inquiry. The nature and uses of geography as a discipline and the spatial perspective require that students observe, interpret, assess, and apply geographic information and skills. The uses of the subject and content of geography are essential in the development of geographical understanding. A spatial perspective enables students to observe, describe, and analyze the organizations of people, places, and environments at different scales and is central to geographic literacy.

G1.1 Spatial Thinking			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<i>Use maps and other geographic tools to acquire and process information from a spatial perspective.</i> New 7 – G1.1.1 Explain and use a variety of maps, globes, and web based geography technology to study the world,			

<p>including global, interregional, regional, and local scales.</p> <p>New 7 – G1.1.2 Draw an accurate sketch map from memory of the Eastern Hemisphere showing the major regions (Africa, Asia, Europe, Australia/Oceania, Antarctica).</p>			
---	--	--	--

G1.2 Geographical Inquiry and Analysis			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Use geographic inquiry and analysis to answer important questions about relationships between people, cultures, their environment, and relations within the larger world context.</i></p> <p>New 7 – G1.2.1 Locate the major landforms, rivers and climate regions of the Eastern Hemisphere.</p> <p>New 7 – G1.2.2 Explain why maps of the same place may vary as a result of the cultural or historical background of the cartographer.</p> <p>New 7 – G1.2.3 Use observations from air photos, photographs (print and CD), films (VCR and DVD) as the basis for answering geographic questions about the human and physical characteristics of places and regions.</p>			

<p>New 7 – G1.2.4 Draw the general population distribution of the Eastern Hemisphere on a map, analyze the patterns, and propose two generalizations about the location and density of the population.</p> <p>New 7 – G1.2.5 Use information from modern technology such as Geographic Positioning System (GPS), Geographic Information System (GIS), and satellite remote sensing to locate information and process maps and data to analyze spatial patterns of the Eastern Hemisphere to answer geographic questions.</p> <p>7 – G1.2.6 Apply the skills of geographic inquiry (asking geographic questions, acquiring</p>			
--	--	--	--

geographic information, organizing geographic information, analyzing geographic information, and answering geographic questions) to analyze a problem or issue of importance to a region of the Eastern Hemisphere.			
---	--	--	--

G1.3 Geographical Understanding			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Use geographic themes, knowledge about processes and concepts to study the Earth.</i></p> <p>New 7 – G1.3.1 Use the fundamental themes of geography (location, place, human environment interaction, movement, region) to describe regions or places on earth.</p> <p>New 7 – G1.3.2 Explain the locations and distributions of physical and human characteristics of Earth by using knowledge of</p>			

<p>spatial patterns.</p> <p>New 7 – G1.3.3 Explain the different ways in which places are connected and how those connections demonstrate interdependence and accessibility.</p>			
---	--	--	--

G2.2 Human Characteristics of Place			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe the human characteristics of places.</i></p> <p>7 – G2.2.1 Describe the human characteristics of the region under study (including languages, religion, economic system, governmental system, cultural traditions).</p>	<p>Locate geographical areas within regions of the world (countries, capital cities) (MT: Political features)</p>	<p>Geography (Political)</p> <p>Europe</p> <ul style="list-style-type: none"> • Division between east and west • Major Regions (UK, Scandinavia, Balkans, etc.) <ul style="list-style-type: none"> • Major Cities • Break up of the Soviet Union (New borders and Nations) 	

<p>7 – G2.2.2 Explain that communities are affected positively or negatively by changes in technology (e.g., increased manufacturing resulting in rural to urban migration in China, increased farming of fish, hydroelectric power generation at Three Gorges, pollution resulting from increased manufacturing and automobiles).</p> <p>7 – G2.2.3 Analyze how culture and experience influence people's perception of places and regions (e.g., that beaches are places where tourists travel, cities have historic buildings, northern places are cold,</p>		<p>Middle East</p> <ul style="list-style-type: none"> • Jerusalem: Holy city of 3 faiths <ul style="list-style-type: none"> • Major Countries • Major Cities • Asia <ul style="list-style-type: none"> • Major Countries • Major Cities • Africa <ul style="list-style-type: none"> • Major Countries • Australia <ul style="list-style-type: none"> • 3 regions of the Pacific • Other Island Nations of the Pacific (New Zealand) • Population centers of Australia • Major Cities of Australia 	
---	--	--	--

equatorial places are very warm).			
-----------------------------------	--	--	--

G2 Places and Regions

Describe the cultural groups and diversities among people that are rooted in particular places and in human constructs called regions. Analyze the physical and human characteristics of places and regions.

G2.1 Physical Characteristics of Place			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe the physical characteristics of places.</i></p> <p>7 – G2.1.1 Describe the landform features and the climate of the region (within the Western or Eastern Hemispheres) under study.</p> <p>7 – G2.1.2 Use information from GIS, remote sensing and the World Wide Web to compare and contrast the surface features and vegetation of the continents of the Eastern Hemisphere.</p>	<p>Describe the physical features of different regions on Earth (MT: Physical Features)</p>	<p>Geography (Physical)</p> <p>Europe</p> <ul style="list-style-type: none"> • North, Baltic, Mediterranean, & Caspian Seas • Alps & Ural Mountains <ul style="list-style-type: none"> • Coastlines • Danube, Rhine, Seine, & Volga rivers <p>Middle East</p> <ul style="list-style-type: none"> • Tigris, Euphrates, & Jordan Rivers <ul style="list-style-type: none"> • Fertile Crescent <ul style="list-style-type: none"> • Dead Sea • Persian Gulf <p>Asia</p> <ul style="list-style-type: none"> • Indian & Pacific Oceans <ul style="list-style-type: none"> • Bay of Bengal • Indus, Ganges, & Huang He Rivers 	

		<ul style="list-style-type: none"> • Himalayas, Mt. Everest, Mt. Fuji <ul style="list-style-type: none"> • Gobi Desert • Ring of Fire • Africa • Red & Mediterranean Seas • Atlantic and Indian Oceans <ul style="list-style-type: none"> • Cape of Good Hope <ul style="list-style-type: none"> • Madagascar • Atlas Mountains, Mt. Kilimanjaro <ul style="list-style-type: none"> • Great Rift Valley • Contrasting climate in different regions (Desert, Rainforest, Savanna) • Australia • Indian and Pacific Oceans <ul style="list-style-type: none"> • Desert Interior • Uluru (Ayers Rock) 	
--	--	--	--

G3 Physical Systems

Describe the physical processes that shape the Earth's surface which, along with plants and animals, are the basis for both sustaining and modifying ecosystems. Identify and analyze the patterns and characteristics of the major ecosystems on Earth.

The characteristics of major ecosystems on Earth's surface include forests, deserts, grasslands, mountains, high latitude/polar and the temperature and precipitation patterns that cause them.

G3.1 Physical Processes			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe the physical processes that shape the patterns of the Earth's surface.</i></p> <p>New 7 – G3.1.1 Construct and analyze climate graphs for locations at different latitudes and elevations in the region to answer geographic questions and make predictions based on patterns (e.g., compare and contrast Norway and France; Nairobi and Kilimanjaro; Mumbai and New Delhi)</p>			

G3.2 Ecosystems			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe the characteristics and spatial distribution of ecosystems on the Earth's surface.</i></p> <p>New 7 – G3.2.1 Explain how and why ecosystems differ as a consequence of differences in latitude, elevation, and human activities (e.g., effects of latitude on types of vegetation in Africa, proximity to bodies of water in Europe, and effects of annual river flooding in Southeast Asia and China).</p> <p>New 7 – G3.2.2 Identify ecosystems of a continent and explain why some provide greater opportunities (fertile soil, precipitation) for humans to use than do other ecosystems and how that changes with technology(e.g., China's humid east and</p>			

arid west and the effects of irrigation technology).			
--	--	--	--

G4 Human Systems

Explain that human activities may be seen on Earth's surface. Human systems include the way people divide the land, decide where to live, develop communities that are part of the larger cultural mosaic, and engage in the cultural diffusion of ideas and products within and among groups.

People are central to the study of geography. The characteristics, distribution, and complexity of human cultures create a cultural mosaic. Technology affects the patterns and networks that develop on Earth and that enable people, products, and ideas to be exchanged. Human settlements have a powerful influence in shaping the world's different cultural mosaics and political and economic systems. Patterns of settlement are shaped by trade, the movement of raw materials, finished products, people, and ideas (scientific, technological, and religious). Forces of cooperation and conflict divide Earth's space and involve the control of land, resources, strategic routes, and domination of other peoples.

G4.1 Cultural Mosaic			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe the characteristics, distribution and complexity of Earth's cultural mosaic.</i></p> <p>New 7 – G4.1.1 Identify and explain examples of cultural diffusion within the Eastern Hemisphere (e.g., the spread of sports, music, architecture, television, Internet, Bantu languages in Africa, Islam in Western Europe).</p>			

<p>New 7 – G4.1.2 Compare roles of women in traditional African societies in the past with roles of women as modern micro-entrepreneurs in current economies.</p>			
--	--	--	--

G4.2 Technology Patterns and Networks			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe how technology creates patterns and networks that connect people, products and ideas.</i></p> <p>New 7 – G4.2.1 List and describe the advantages and disadvantages of different technologies used to move people, products, and ideas throughout the world (e.g., opportunities for employment, entrepreneurial and educational</p>			

<p>opportunities using the Internet; the effects of technology on reducing the time necessary for communications and travel; the uses and effects of wireless technology in developing countries; and the spread of group and individual's ideas as voice and image messages on electronic networks such as the Internet).</p>			
--	--	--	--

G4.3 Patterns of Human Settlement			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe patterns, processes and functions of human settlement.</i></p> <p>New 7 – G4.3.1 Identify places in the Eastern Hemisphere that have been modified to be suitable for settlement by describing the modifications that were necessary (e.g., Nile River irrigation, reclamation of land along the North Sea, planting trees in areas that have become desertified in Africa).</p> <p>New 7 – G4.3.2 Describe patterns of settlement by using historical and modern maps (e.g., the location of the world's mega cities, other cities located near coasts and navigable rivers, regions under environmental stress such as the Sahel).</p>			

G4.4 Forces of Cooperation and Conflict			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Explain how forces of conflict and cooperation among people influence the division and control of the Earth's surface.</i></p> <p>New 7 – G4.4.1 Identify and explain factors that contribute to conflict and cooperation between and among cultural groups (e.g., natural resources, power, culture, wealth).</p> <p>New 7 – G4.4.2 Describe examples of cooperation and conflict within the European Union (e.g., European Parliament, Euro as currency in some countries but not others, open migration within the European Union, free trade, and cultural impacts such as a multi-lingual population).</p>			

G5 Environment and Society

Explain that the physical environment is modified by human activities, which are influenced by the ways in which human society's value and use Earth's natural resources, and by Earth's physical features and processes. Explain how human action modifies the physical environment and how physical systems affect human systems.

G5.1 Humans and the Environment			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe how human actions modify the environment.</i></p> <p>New 7 – G5.1.1 Describe the environmental effects of human action on the atmosphere (air), biosphere (people, animals, and plants), lithosphere (soil), and hydrosphere (water) (e.g., desertification in the Sahel Region of North Africa, deforestation in the Congo Basin, air pollution in urban center, and chemical spills in European Rivers).</p> <p>New 7 – G5.1.2 Describe how variations in technology affect human modifications of the landscape (e.g., clearing</p>			

<p>of agricultural land in Southeast Asia, fish factories in North Atlantic and Western Pacific Ocean, and damming rivers to meet needs for electricity).</p> <p>New 7 – G5.1.3 Identify the ways in which human-induced changes in the physical environment in one place can cause changes in other places (e.g., cutting forests in one region may result in river basin flooding elsewhere as has happened historically in China; building dams floods land upstream and permits irrigation downstream as in Southern Africa, the Aswan Dam flooded the upper Nile Valley and permitted irrigation downstream).</p>			
---	--	--	--

G5.2 Physical and Human Systems			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe how physical and human systems shape patterns on the Earth's surface.</i></p> <p>New 7 – G5.2.1 Describe the effects that a change in the physical environment could have on human activities and the choices people would have to make in adjusting to the change (e.g., drought in Africa, pollution from volcanic eruptions in Indonesia, earthquakes in Turkey, and flooding in Bangladesh).</p>			

G6 Global Issues Past and Present (H1.4.3, G1.2.6)

Throughout the school year the students are introduced to topics that address global issues that integrate time and place. Included are capstone projects that entail the investigation of historical and contemporary global issues that have significance for the student and are clearly linked to the world outside the classroom. The topics and issues are developed as capstone projects within units and at the end of the course. Regular experiences with those topics and issues are necessary during each grade in order to build the background students will require to complete in-depth capstone projects.

Capstone projects require the student to use geography, history, economics, and government to inquire about major contemporary and historical issues and events linked to the world outside the classroom. The core disciplines are used to interpret the past and plan for the future. During the school year the students will complete at least three capstone projects. (*National Geography Standards 17 and 18, p. 179 and 181*)

G6.1 Public Discourse, Decision Making, and Citizen Involvement (P3, P4)			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
7 – G6.1.1 Conduct research on contemporary global topics and issues, compose persuasive essays, and develop a plan for action. (H1.4.3, G1.2.6, See P3 and P4) Contemporary Investigation Topics Conflict, Stability, and Change – Investigate the significance of conflict, stability, and change in governmental systems within the region. Diversity and Nationalism – Investigate the tensions	<p>Apply the 5 themes of Geography to current events happening throughout the world (MT: Current events in the context of History (World History Exemplar))</p> <p>Predict the possible impact of current events throughout the world on the US (MT: Current events in the context of History (World History Exemplar))</p>		

<p>that may develop between cultural diversity and nationalism within a country and their consequences.</p> <p>Urbanization – Investigate urbanization and its consequences for the world's population.</p> <p>Oil and Society – Investigate the significance of how oil has changed nations as both consumers and producers of this natural resource.</p> <p>Children in the World – Investigate issues affecting children such as health, labor, and war.</p> <p>Regional Cooperation – Explain the significance of and barriers to regional cooperation.</p> <p>7 – G6.1.2 Conduct research on global topics and issues, compose persuasive essays, and develop a plan for action. (H1.4.3, G1.2.6, See P3 and P4) Note: Additional global</p>			
--	--	--	--

<p>investigation topics have been identified for connections to World History Eras 1, 2, and 3 studies. Students investigate contemporary topics and issues that they have studied in an ancient world history context. The investigations may be addressed at the conclusion of each Era or may be included at the conclusion of the course.</p> <p>Contemporary Investigation Topics – Related to Content in World History and Contemporary Geography</p> <p>WHG Era 1</p> <p>Population Growth and Resources – Investigate how population growth affects resource availability.</p> <p>Migration – Investigate the significance of migrations of peoples</p>			
---	--	--	--

<p>and the resulting benefits and challenges.</p> <p>WHG Era 2 Sustainable Agriculture – Investigate the significance of sustainable agriculture and its role in helping societies produce enough food for people.</p> <p>WHG Era 3 Development – Investigate economic effects on development in a region and its ecosystems and societies.</p> <p>Religious Conflict – Investigate conflict that arises from varying religious beliefs.</p>			
---	--	--	--

CIVICS AND GOVERNMENT

C1 Purposes of Government

Analyze how people identify, organize, and accomplish the purposes of government.

Political scientists analyze why people engage in the political process; the role citizens play in civic life; the concepts of power, authority, sovereignty, and legitimacy; and competing arguments about the purpose and necessity of government.

C1.1 Nature of Civic Life, Politics, and Government			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Analyze how people identify, organize, and accomplish the purposes of government.</i></p> <p>7 – C1.1.1 Explain how the purposes served by government affect relationships between the individual, government, and society as a whole and the differences that occur in monarchies, theocracies, dictatorships, and representative governments.</p>	<p>Describe different government systems used in countries around the world (MT: Government Systems)</p>	<p>Europe</p> <ul style="list-style-type: none"> • Monarchies • British Parliament • European Union <p>Middle East</p> <ul style="list-style-type: none"> • Islamic Fundamentalist States • Monarchy <p>Asia</p> <ul style="list-style-type: none"> • Communism <p>Africa</p> <ul style="list-style-type: none"> • From European Colonies to independence <p>Australia</p> <ul style="list-style-type: none"> • Commonwealth 	

C3 Structure and Functions of Government

Explain that governments are structured to serve the people. Describe the major activities of government, including making and enforcing laws, providing services and benefits to individuals and groups, assigning individual and collective responsibilities, generating revenue, and providing national security.

The world is organized politically into nation-states; each nation-state claims sovereignty over a defined territory and jurisdiction and everyone in it; these nation-states interact with one another using formal agreements and sanctions, which may be peaceful or may involve the use of force.

C3.6 Characteristics of Nation-States			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe the characteristics of nation-states and how nation-states may interact.</i></p> <p>New 7 – C3.6.1 Define the characteristics of a nation-state (a specific territory, clearly defined boundaries, citizens, and jurisdiction over people who reside there, laws, and government) and how Eastern Hemisphere nations interact.</p>			

C4 Relationship of United States to Other Nations and World Affairs

Explain that nations interact with one another through trade, diplomacy, treaties and agreements, humanitarian aid, economic sanctions and incentives, and military force and threat of force.

Governmental and nongovernmental organizations provide avenues through which nation-states can interact and attempt to manage their affairs and conflicts peacefully.

C4.3 Conflict and Cooperation Between and Among Nations			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Explain the various ways that nations interact both positively and negatively.</i></p> <p>7 – C4.3.1 Explain how governments address national issues and form policies, and how the policies may not be consistent with those of other countries (e.g., population pressures in China compared to Sweden; international immigration quotas, international aid, energy needs for natural gas and oil and military aid).</p> <p>New 7 – C4.3.2 Explain the challenges to governments and the</p>	<p>Evaluate the pros and cons of large intergovernmental organizations(European Union, Commonwealth of Nations) (MT: Government Systems)</p> <p>Compare and Contrast rights and responsibilities of citizens in other countries to those in the US (MT: Citizenship – Awareness, Rights & Responsibilities)</p>	<p>Europe Middle East Asia Africa Australia</p>	

<p>cooperation needed to address international issues (e.g., migration and human rights).</p> <p>7 – C4.3.3 Explain why governments belong to different types of international and regional organizations (e.g., United Nations (UN), North Atlantic Treaty Organization (NATO), Organization of the Petroleum Exporting Countries (OPEC), European Union (EU), and African Union (AU), G-8 countries (leading economic/political)).</p>			
---	--	--	--

ECONOMICS

E1 The Market Economy

Describe the market economy in terms of the relevance of limited resources, how individuals and institutions make and evaluate decisions, the role of incentives, how buyers and sellers interact to create markets, how markets allocate resources, and the economic role of government in a market economy.

Individuals, businesses, industries, and governments confront scarcity and choice when organizing, producing and using productive resources (land, labor, capital) to supply the market place.

E1.1 Individual, Business, and Government Choices			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe how individuals, businesses, and governments make economic decisions when confronting scarcity in the market economy.</i></p> <p>New 7 – E1.1.1 Explain the role of incentives in different economic systems (acquiring money, profit, goods, wanting to avoid loss, position in society, job placement).</p> <p>New 7 – E1.1.2 Describe the circular flow model (that businesses get money from households in exchange for goods and services and return that money to</p>			

households by paying for the factors of production that households			
--	--	--	--

E2 The National Economy

Use economic concepts, terminology, and data to identify and describe how a national economy functions. They study the role of government as a provider of goods and services within a national economy.

Governmental decisions on taxation, spending, protections, and regulation affect the national economy.

E2.3 Role of Government			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe how national governments make decisions that affect the national economy.</i></p> <p>New 7 – E2.3.1 Explain how national governments make decisions that impact both that country and other countries that use its resources (e.g., sanctions and tariffs enacted by a national government to prevent imports, most favored trade agreements, the impact China is having</p>			

on the global economy and the U.S. economy in particular).			
--	--	--	--

E3 International Economy

Analyze reasons for individuals and businesses to specialize and trade, why individuals and businesses trade across international borders, and the comparisons of the benefits and costs of specialization and the resulting trade for consumers, producers, and governments.

Economic interdependence (trade) and economic development result in challenges and benefits for individuals, producers, and governments.

An economic system is the institutional framework that a society uses to allocate its resources to produce and distribute goods and services. Every modern economy is a “mixed system,” having some features characteristic of traditional, command, and market economies. The “mix” varies from one economy to another.

E3.1 Economic Interdependence			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe patterns and networks of economic interdependence, including trade.</i></p> <p>7 – E3.1.1 Explain the importance of trade (imports and exports) on national economies in the Eastern Hemisphere (e.g., natural gas in North Africa, petroleum Africa, mineral</p>	<p>Explain the Impact of trade on a country's economy and relations with other counties (MT: Economies of the World)</p> <p>Compare the economies of different world regions to each other and to the US using basic economic concepts (MT: Economies of the World)</p>	<p>Major resources, products, services & industries</p> <ul style="list-style-type: none"> • Europe • Middle East (oil) <ul style="list-style-type: none"> • Asia • Africa • Australia <p>GDP of select nations compared to the US and other nations</p>	

<p>resources in Asia).</p> <p>New 7 – E3.1.2 Diagram or map the movement of a consumer product from where it is manufactured to where it is sold to demonstrate the flow of materials, labor, and capital (e.g., global supply chain for computers, athletic shoes, and clothing).</p> <p>7 – E3.1.3 Determine the impact of trade on a region of the Eastern Hemisphere by graphing and analyzing the gross Domestic Product of the region for the past decade and comparing the data with trend data on the total value of imports and exports over the same period.</p> <p>New 7 – E3.1.4 Explain how communications innovations have affected economic interactions and where</p>		<p>Value of currencies and exchange rates</p>	
--	--	---	--

and how people work (e.g., internet home offices, international work teams, international companies).			
---	--	--	--

E3.3 Economic Systems			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Describe how societies organize to allocate resources to produce and distribute goods and services.</i></p> <p>New 7 – E3.3.1 Explain and compare how economic systems (traditional, command, and market) answer four basic questions: What should be produced? How will it be produced? How will it be distributed? Who will receive the benefits of production? (e.g., market economies in Africa, Europe; command economy in North Korea; and the transition to market economies in Vietnam and China).</p>			

P3-4 PUBLIC DISCOURSE, DECISION MAKING, AND CITIZEN INVOLVEMENT

The expectations continue to stress the importance of citizen action in a democratic republic as students expand their ability to address public policy issues. Students address contemporary public issues related to the Constitution and identify the related factual, definitional, and ethical questions. They use graphic data and other sources to analyze information about the issue, evaluate alternative resolutions, and use core democratic values to explain why people may differ on the resolution to a constitutional issue. Students are required to demonstrate increasing sophistication in their abilities to communicate a position on more complex national public policy issue and support it with a reasoned argument.

P3.1 Identifying and Analyzing Issues, Decision Making, Persuasive Communication About a Public Issue, and Citizen Involvement			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p>New 7 – P3.1.1 Clearly state an issue as a question or public policy, trace the origins of an issue, analyze and synthesize various perspectives, and generate and evaluate alternative resolutions. Deeply examine policy issues in group discussions and debates to make reasoned and informed decisions. Write persuasive/argumentative essays expressing and justifying decisions on public policy issues. Plan and conduct activities intended to advance views on</p>			

<p>matters of public policy, report the results, and evaluate effectiveness.</p> <ul style="list-style-type: none"> • Identify public policy issues related to global topics and issues studied. • Clearly state the issue as a question of public policy orally or in written form. • Use inquiry methods to acquire content knowledge and appropriate data about the issue. • Identify the causes and consequences and analyze the impact, both positive and negative. • Share and discuss findings of research and issue analysis in group discussions and debates. • Compose a persuasive essay justifying the position with a

Additional NHA Content

The following content and/or units are not required by the 7th grade Michigan GLCE's and should no longer be taught in 7th grade.

NHA Social Studies Unit: Canada Studies
Content
Content is included in 6th grade Michigan GLCE's

GRADE EIGHT – Integrated U.S. History

Eighth grade students continue their study of United States History from the writing of the Constitution through Reconstruction. Geographic, civics/government, and economics content is integrated within the historical context. Using significant content knowledge, research, and inquiry, the students analyze an issue and propose a plan for civic action. They develop reasoned arguments and write a persuasive civic essay addressing issues from the past within a historical context. Where appropriate, they make comparisons to relevant contemporary issues.

F1 - Foundational Issues in Eras 1-3 (Review of Grade 5 Social Studies)

These foundational expectations are included to help students draw upon their previous study of American history and connect 8th grade United States history with the history studied in 5th grade. To set the stage for the study of U.S. history that begins with the creation of the U.S. Constitution, students should be able to draw upon an understanding of these politics and intellectual understandings.

F1 Political and Intellectual Transformations			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
F1.1 Describe the ideas, experiences, and interactions that influenced the colonists' decisions to declare independence by analyzing <ul style="list-style-type: none"> <i>colonial ideas about government (e.g., limited government, republicanism, protecting individual rights and promoting the common good, representative government, natural</i> 	<p>Explain how political beliefs and government policies influenced society in the United States (MT : Historical Societies & Lifestyles)</p> <p>Evaluate how different attitudes, governmental policies, and individual opinions influenced the American Revolution (MT: Significant events, Individuals, & Contributions (US History Exemplar))</p>	<p>Early English Colonization</p> <ul style="list-style-type: none"> Jamestown / House of Burgesses The Mayflower Compact <p>Background Causes</p> <ul style="list-style-type: none"> Mercantilism Cost of Colonial Wars Against the French Impact of the French & Indian War: Albany Plan of Union Political Thought of the Enlightenment 	<p>NHA Units:</p> <p>Early America: Overview</p> <p>The American Revolutionary Era</p>

U3 - ERA 3 – Revolution and the New Nation (1754-1800s)

Explain the challenges faced by the new nation and analyze the development of the Constitution as a new plan for governing.
[Foundations for Civics HSCE Standard 2.2.]

Note: Expectations U3.3.1–U3.3.5 address content that was introduced in Grade 5, but ask for explanation and analysis at a higher level than expected in Grade 5. They are included here to support in-depth discussion of the historical and philosophical origins of constitutional government in the United States. (U3.3.6)

U3.3 Creating New Government(s) and a New Constitution			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Explain the challenges faced by the new nation and analyze the development of the Constitution as a new plan for governing</i> [Foundations for Civics HSCE Standard 2.2]</p> <p>8– U3.3.1 Explain the reasons for the adoption and subsequent failure of the Articles of Confederation (e.g., why its drafters created a weak central government, challenges the nation faced under the Articles, Shays' Rebellion, and disputes over western lands). (C2)</p>	<p>Explain causes and Effects of the American Revolution, and the impact of these events on US history(MT: Historical Conflict(US History))</p> <p>Defend each side of the major debates proposed at the Constitutional Convention and in the process of ratifying the Constitution (MT: Government Systems)</p> <p>Explain how the strengths and weaknesses of early forms of government and influential writings led to the formation of the US Constitution (MT: Government Systems)</p>	<p>Structure of Government under the Articles of Confederation</p> <ul style="list-style-type: none"> • Congress is the only branch of government • Each state has equal power • Powers of congress • Achievements and contributions <ul style="list-style-type: none"> • Weaknesses • Annapolis Convention <p>Constitutional Convention</p> <ul style="list-style-type: none"> • Historical and Philosophical influences on American government • Major Issues • Compromise 	<p>NHA Unit: The Constitutional Era</p>

<p>8 – U3.3.2 Identify economic and political questions facing the nation during the period of the Articles of Confederation and the opening of the Constitutional Convention. (E1.4)</p> <p>8 – U3.3.3 Describe the major issues debated at the Constitutional Convention including the distribution of political power, conduct of foreign affairs, rights of individuals, rights of states, election of the executive, and slavery as a regional and federal issue.</p> <p>8 – U3.3.4 Explain how the new constitution resolved (or compromised) the major issues including sharing, separating, and checking of power among federal government institutions,</p>		<ul style="list-style-type: none"> • Underlying legal and political principles • The constitution and the functioning government <p>The Constitution as a living Document</p> <ul style="list-style-type: none"> • The Amendment Process (Article V) • The Bill of Rights <p>The Ratification Process</p> <ul style="list-style-type: none"> • Debates in the States • The Federalist Papers • Poughkeepsie Convention <p>Formal ratification launches the new government</p>	
---	--	--	--

<p>dual sovereignty(state-federal power), rights of individuals, the Electoral College, the Three-Fifths Compromise, and the Great Compromise.</p> <p>8 – U3.3.5 Analyze the debates over the ratification of the Constitution from the perspectives of Federalists and Anti-Federalists and describe how the states ratified the Constitution. (C2) <i>(National Geography Standard 3, p. 148)</i></p> <p>8 – U3.3.6 Explain how the Bill of Rights reflected the concept of limited government, protections of basic freedoms, and the fear of many Americans of a strong central government. (C3)</p> <p>8 – U3.3.7 Using important documents (e.g., Mayflower Compact, Iroquois Confederacy,</p>			
---	--	--	--

<p>Common Sense, Declaration of Independence, Northwest Ordinance, Federalist Papers), describe the historical and philosophical origins of constitutional government in the United States using the ideas of social compact, limited government, natural rights, right of revolution, separation of powers, bicameralism, republicanism, and popular participation in government. (C2)</p>			
---	--	--	--

U4 - ERA 4 – Expansion and Reform (1792-1861)

4.1 Challenges to an Emerging Nation

4.2 Regional and Economic Growth

4.3 Reform Movements

U4.1 Challenges to an Emerging Nation			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Analyze the challenges the new government faced and the role of political and social leaders in meeting these challenges.</i></p> <p>8 – U4.1.1 Use Washington's Farewell Address to analyze the most significant challenges the new nation faced and the extent to which subsequent Presidents heeded Washington's advice. (C4)</p> <p>8 – U4.1.2 Explain the changes in America's relationships with other nations by analyzing treaties with American Indian nations, Jay's Treaty (1795), French</p>	<p>Explain how political beliefs and government policies influenced society in the US (MT: Historical Societies and Lifestyles)</p> <p>Compare and Contrast the political process (elections, political parties) from the 1700 and 1800s to today (MT: Significant events, Individuals, & Contributions (US History Exemplar))</p> <p>Evaluate the impact of important individuals' contributions to US History (MT: Significant Events, Individuals, & Contributions (US History Exemplar))</p>	<p>Washington's Presidency</p> <ul style="list-style-type: none"> • Precedents • The Cabinet • Two term tradition • Farewell address <p>Establishing Stability</p> <ul style="list-style-type: none"> • Hamilton's Plan • The Whiskey Rebellion • Judicial review: <i>Marbury v. Madison</i> • Development of political parties (Federalists v. Democratic Republicans) <ul style="list-style-type: none"> • Election of 1800 <p>Expanding the Nations Boundaries</p> <ul style="list-style-type: none"> • Northwest Ordinance • Pinckney Treaty with Spain • Louisiana Purchase and Lewis and Clark • Purchase of Florida 	<p>NHA Unit: Life in the New Nation</p>

<p>Revolution, Pinckney's Treaty (1795), Louisiana Purchase, War of 1812, Transcontinental Treaty (1819), and the Monroe Doctrine. (C4) <i>(National Geography Standard 13, p. 169)</i></p> <p>8 – U4.1.3 Explain how political parties emerged out of the competing ideas, experiences, and fears of Thomas Jefferson and Alexander Hamilton (and their followers), despite the worries the Founders had concerning the dangers of political division, by analyzing disagreements over</p> <ul style="list-style-type: none"> relative power of the national government (e.g., Whiskey Rebellion, Alien and Sedition Acts) and of the executive branch (e.g., during the Jacksonian era) (C3) 		<ul style="list-style-type: none"> War of 1812 The Monroe Doctrine <p>Era of Good Feelings</p> <ul style="list-style-type: none"> Internal Expansion: roads, canals, and railroads Henry Clays system National Assertions: <i>Gibbons v. U6 - ERA 6 – The Development of an Industrial, Urban, and Global United States (1870-1930)

Grade 8 begins to address trends and patterns in the last half of the 19th century, through 1898.

The purpose of this section is to introduce some of the major changes in American society and the economy in the last part of the 19th Century. This era will be addressed in-depth and with greater intellectual sophistication in the high school United History and Geography content expectations

U6.1 America in the Last Half of the 19th Century			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Analyze the major changes in communication, transportation, demography, and urban centers, including the location and growth of cities linked by industry and trade, in last half of the 19th century.</i></p> <p>8 – U6.1.1 Compare and contrast the United States in 1800 with the United States in 1898 focusing on similarities and differences in:</p> <ul style="list-style-type: none"> territory, including the size of the United States and land use (<i>National Geography Standards 1 and 16, pp. 144 and 196</i>) population, including immigration, reactions 	<p>Describe how geographic and economic conditions led to changes in society (MT: Historical Societies & Lifestyles)</p> <p>Describe how the growth of technology changes life in the US in the 19th century (MT: Historical Societies & Lifestyles)</p> <p>Describe how land acquisition lead to conflict in US History (MT: Historical Conflict (US History Exemplar))</p> <p>Evaluate the importance of knowing one's civil and legal responsibilities when entering a new country (MT: Citizenship-Awareness, Rights, &</p>	<p>Immigration</p> <p>Two distinct waves</p> <ul style="list-style-type: none"> 1840s to 1890s 1890s to 1920s <p>Differences based on National origin, cultural patterns, and religion</p> <p>Similarities included motivation for coming and patterns of community settlement</p> <ul style="list-style-type: none"> Immigrants as settlers in the mid-west The Chinese in the Far West <ul style="list-style-type: none"> Mexicans in the Southwest Irish Immigration: mass starvation in Ireland (the Potato Famine) <p>Citizenship for Immigrants</p>	<p>NHA Unit: Late 19th Century to Early 20th Century</p>

U6.2 Investigation Topics and Issue Analysis (P2)			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Use the historical perspective to investigate a significant historical topic from United States History Eras 3-6 that also has significance as an issue or topic in the United States today.</i></p> <p>8 – U6.2.1 Use historical perspectives to analyze issues in the United States from the past and the present; conduct research on a historical issue or topic, identify a connection to a contemporary issue, and present findings (e.g., oral, visual, video, or electronic presentation, persuasive essay, or research paper); include causes and consequences of the historical action and predict possible consequences of the contemporary action. (<i>National Geography Standards 9 and 10, pp.</i></p>	<p>Compare and Contrast industrial development in the late 1800s to modern technological advancement(MT: Significant Events, Individuals, & Contributions (US History Exemplar))</p> <p>Explain the impact of the outcome of conflict in US History on modern society (MT: Historical Conflict (US History Exemplar))</p> <p>Determine current examples of obtaining citizenship(real life applications of the citizenship process) (MT: Citizenship – Awareness, Rights, & Responsibilities)</p> <p>Explain the impact of early governmental policies on modern society (MT: Significant Events, Individuals, & Contributions (US History Exemplar))</p> <p>Compare and Contrast the</p>		<p>New Unit / Project: can include information from any preceding Unit</p>

<p><i>160 and 162)</i></p> <p>Examples of Investigation Topics and Questions (and examples from United States History)</p> <p>Balance of Power – How has the nation addressed tensions between state and federal governmental power? (e.g., Articles of Confederation, U.S. Constitution, states' rights issues, secession, others)</p> <p>Liberty vs. Security – How has the nation balanced liberty interests with security interests? (e.g., Alien and Sedition Acts, suspension of habeas corpus during the Civil War)</p> <p>The Government and Social Change – How have governmental policies, the actions of reformers, and economic and demographic changes affected social change? (e.g., abolitionist movement, women's movement,</p>	<p>political process from the 1700 and 1800s to today (MT: Significant Events, Individuals, & Contributions (US History Exemplar))</p>		
---	--	--	--

Reconstruction policies) Movement of People – How has the nation addressed the movement of people into and within the United States? (e.g., American Indians, immigrants)			
---	--	--	--

P3 / P4 - Public Discourse, Decision Making, and Citizen Involvement

The expectations continue to stress the importance of citizen action in a democratic republic as students expand their ability to address public policy issues. Students address contemporary public issues related to the Constitution and identify the related factual, definitional, and ethical questions. They use graphic data and other sources to analyze information about the issue, evaluate alternative resolutions, and use core democratic values to explain why people may differ on the resolution to a constitutional issue. Students are required to demonstrate increasing sophistication in their abilities to communicate a position on more complex national public policy issue and support it with a reasoned argument.

P3.1 Identifying and Analyzing Issues, Decision Making, Persuasive Communication About a Public Issue, and Citizen Involvement			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
New 8 – P3.1.1 Identify, research, analyze, discuss, and defend a position on a national public policy issue. <ul style="list-style-type: none"> Identify a national public policy issue. Clearly state the issue as a question of public policy orally or in written form. 			

<ul style="list-style-type: none"> • Use inquiry methods to trace the origins of the issue and to acquire data about the issue. • Generate and evaluate alternative resolutions to the public issue and analyze various perspectives (causes, consequences, positive and negative impact) on the issue. • Identify and apply core democratic values or constitutional principles. • Share and discuss findings of research and issue analysis in group discussions and debates. • Compose a persuasive essay justifying the position with a reasoned argument. • Develop an action plan to address or inform others about the issue 			
---	--	--	--

P4.2 Citizen Involvement			
Michigan GLCE's	NHA Unit Objectives	NHA Unit Content	Notes
<p><i>Act constructively to further the public good.</i></p> <p>New 8 – P4.2.1 Demonstrate knowledge of how, when, and where individuals would plan and conduct activities intended to advance views in matters of public policy, report the results, and evaluate effectiveness.</p> <p>New 8 – P4.2.2 Engage in activities intended to contribute to solving a national or international problem studied.</p> <p>New 8 – P4.2.3 Participate in projects to help or inform others (e.g., service learning projects).</p>

Measurement Topic: Government Systems

Grade One

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	Advanced grade level performance
3.5	Mastered grade level, some advanced grade level performance
Score 3.0	Mastered grade level expectations by: <ul style="list-style-type: none"> Identifying the ways a local government serves the community (UNIT: My School & Community)

2.5	Basic understanding secure, progressing toward mastery
Score 2.0	Basic understanding achieved such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology, events, people, and locations such as: <ul style="list-style-type: none"> Community Government Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Identifying people or processes involved in local government
1.5	Basic understanding, with some assistance
1.0	Basic understanding, only with assistance
0.5	Some basic understanding, only with assistance

PEOPLE, CULTURE, & CIVILIZATIONS

Measurement Topic: Human Characteristics

Grade One

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	Advanced grade level performance
3.5	Mastered grade level, some advanced grade level performance
Score 3.0	Mastered grade level expectations by: <ul style="list-style-type: none"> Describing human characteristics of various place on Earth, including the local community (UNITS: Earth's Continents, My School and Community) Describing the roles of various people in the school (UNIT: My School & Community) Defining "community" (UNIT: My School and Community)

2.5	Basic understanding secure, progressing toward mastery
Score 2.0	Basic understanding achieved such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology, events, people, and locations such as: <ul style="list-style-type: none"> Human characteristics School Community Performing basic processes such as: <ul style="list-style-type: none"> Providing examples of human characteristics Identifying roles of people in the school
1.5	Basic understanding, with some assistance
1.0	Basic understanding, only with assistance
0.5	Some basic understanding, only with assistance

PEOPLE, CULTURE, & CIVILIZATIONS

Measurement Topic: Historical Societies & Lifestyles

Grade One

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	Advanced grade level performance
3.5	Mastered grade level, some advanced grade level performance
Score 3.0	Mastered grade level expectations by: <ul style="list-style-type: none"> Explaining the importance of available resources to ancient civilizations (UNITS: Early People & Civilizations, The New World) Describing the way of life of various ancient civilizations (important people in society, migration, and customs) (UNITS: Early People & Civilizations, The New World)

2.5	Basic understanding secure, progressing toward mastery
Score 2.0	Basic understanding achieved such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology, events, people, and locations such as: <ul style="list-style-type: none"> Migration Customs Civilizations Performing basic processes such as: <ul style="list-style-type: none"> Listing or locating resources available in ancient civilizations Identifying that the way of life of an ancient civilization is different from their own way of life
1.5	Basic understanding, with some assistance
1.0	Basic understanding, only with assistance
0.5	Some basic understanding, only with assistance

GEOGRAPHY

Measurement Topic: Physical Features

Grade Two

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	Advanced grade level performance
3.5	Mastered grade level, some advanced grade level performance
Score 3.0	Mastered grade level expectations by: <ul style="list-style-type: none"> Locating major landforms, bodies of water, and other features of North America (UNIT: North American Geography) Describing the physical features of various places on Earth (UNITS: India & China, Ancient Greece)

2.5	Basic understanding secure, progressing toward mastery
Score 2.0	Basic understanding achieved such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology, events, people, and locations such as: <ul style="list-style-type: none"> Physical feature Himalayas Performing basic processes such as: <ul style="list-style-type: none"> Naming major landforms, bodies of water, and other features of North America Naming physical features of various places on Earth
1.5	Basic understanding, with some assistance
1.0	Basic understanding, only with assistance
0.5	Some basic understanding, only with assistance

GEOGRAPHY

Measurement Topic: Political Features

Grade Two

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	Advanced grade level performance
3.5	Mastered grade level, some advanced grade level performance
Score 3.0	Mastered grade level expectations by: <ul style="list-style-type: none"> Explaining the difference between a continent and a country (UNIT: North American Geography) Comparing and contrasting urban, suburban, and rural communities (UNIT: Communities Around the World) Locating the geographic area of the world where ancient civilizations existed (UNITS: India & China, Ancient Greece)

2.5	Basic understanding secure, progressing toward mastery
Score 2.0	Basic understanding achieved such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology, events, people, and locations such as: <ul style="list-style-type: none"> Continent Country Urban community Rural community Suburban community Performing basic processes such as: <ul style="list-style-type: none"> Describing characteristics of a continent and a country Describing characteristics of urban, suburban, and rural communities Identifying ancient civilizations and the corresponding area of the world in which they existed
1.5	Basic understanding, with some assistance
1.0	Basic understanding, only with assistance
0.5	Some basic understanding, only with assistance

GEOGRAPHY

Measurement Topic: 5 Themes of Geography

Grade Two

Evidence shows student has met or exceeded
the learning target

4.0	Advanced grade level performance
3.5	Mastered grade level, some advanced grade level performance
Score 3.0	Mastered grade level expectations by: <ul style="list-style-type: none"> Evaluating the advantages and disadvantages of different modes of transportation (UNIT: Communities Around the World)

Evidence shows misunderstanding,
misconceptions, or omissions

2.5	Basic understanding secure, progressing toward mastery

Evidence shows misunderstanding,

2.5	Basic understanding secure, progressing toward mastery
Score 2.0	Basic understanding achieved such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> Colonization Immigration Slavery Performing basic processes such as: <ul style="list-style-type: none"> Describing important political beliefs and policies in early United States history Identifying geographical and economic conditions that led to change Describing reform movements in 19th century United States history and their leaders Describing technological advancement in the late 1800s-early 1900s
1.5	Basic understanding, with some assistance
1.0	Basic understanding, only with assistance
0.5	Some basic understanding, only with assistance

Kindergarten- SS Instructional Sequence Plan

UNIT: Introduction to Maps				
Objectives	Instructional Sequence			
Geography: Maps & Globes <ul style="list-style-type: none"> Explain how maps and globes are used Describe how major landforms, bodies of water, and other features of the Earth are represented on maps and globes 				
Geography: Physical Features <ul style="list-style-type: none"> Identify and locate specific major landforms, bodies of water, and other features of the Earth 				
UNIT: Introduction to Market Economics				
Objectives	Instructional Sequence			
Economics: Economic Concepts <ul style="list-style-type: none"> Define basic economic concepts 				
Economics: Resources <ul style="list-style-type: none"> Explain how money is used in our economy Give an example of an economic exchange from personal experience 				
UNIT: Me & My World				
Objectives	Instructional Sequence			
Geography: Political Features <ul style="list-style-type: none"> Name and locate their geographical area using a map (school, city, state, and country) Identify and describe the immediate surroundings (neighborhood, address, phone number) 				
Economics: Economic Concepts <ul style="list-style-type: none"> Give examples of basic economic concepts found in the community 				
Civics & Government: Citizenship: Awareness, Rights, & Responsibilities <ul style="list-style-type: none"> Identify important symbols and landmarks of the United States Explain why rules and laws are important to have in a community 				

People, Culture, & Civilizations: Human Characteristics <ul style="list-style-type: none"> Describe characteristics of themselves and their family Recall school rules and consequences Define respect as it relates to classroom rules and expected behaviors 				
People, Culture, & Civilizations: Historical Societies & Lifestyles <ul style="list-style-type: none"> Describe the history, customs, and beliefs shared by their personal family 				
UNIT: Native Americans				
Objectives	Instructional Sequence			
People, Culture, & Civilizations: Historical Societies & Lifestyles <ul style="list-style-type: none"> Describe the way of life of one Native American tribe (e.g., location, homes, traditional dress, foods, transportation, crafts, and tools) 				
UNIT: Christopher Columbus				
Objectives	Instructional Sequence			
World History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Describe important people, things, and events in the story of Columbus's voyage to the Americas Explain how and why Columbus named the land and people of the Americas Give examples of Moral Focus concepts demonstrated by Columbus 				
UNIT: The Pilgrims				
Objectives	Instructional Sequence			
US History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Describe how the story of the Pilgrims led to the modern celebration of Thanksgiving Day 				

UNIT: July 4- Independence Day				
Objectives	Instructional Sequence			
US History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Explain the terms “independence” and “democracy” and their significance to the July 4th holiday 				
UNIT: The Presidents				
Objectives	Instructional Sequence			
US History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Identify the names of the four presidents on Mt. Rushmore and an important contribution of each Describe how past presidents showed examples of Moral Focus concepts 				
US History: Current Events in the Context of History <ul style="list-style-type: none"> Describe how the current president shows examples of Moral Focus concepts 				

1st Grade- SS Instructional Sequence Plan

UNIT: Earth's Continents				
Objectives	Instructional Sequence			
Geography: Maps & Globes <ul style="list-style-type: none"> Interpret a map using its features (cardinal directions, key) 				
Geography: Physical Features <ul style="list-style-type: none"> Identify and locate specific major landforms and bodies of water 				
Geography: Political Features <ul style="list-style-type: none"> Locate their wider geographical area 				
People, Culture, & Civilizations: Human Characteristics <ul style="list-style-type: none"> Describe human characteristics (e.g., man-made structures, cultures, traditions) of various place on Earth, including the local community 				
UNIT: Economic Choices				
Objectives	Instructional Sequence			
Economics: Economic Concepts <ul style="list-style-type: none"> Distinguish between basic economic concepts (goods & services, benefits & costs) Explain how choices influence economic decisions 				
Economics: Resources <ul style="list-style-type: none"> Explain the concept of “price” 				
UNIT: My School & Community				
Objectives	Instructional Sequence			
Geography: Physical Features <ul style="list-style-type: none"> Describe the physical features of various places on Earth, including the local community 				
Geography: Political Features <ul style="list-style-type: none"> Locate their wider geographical area 				

Civics & Government: Citizenship: Awareness, Rights, & Responsibilities <ul style="list-style-type: none"> Describe ways people can be good citizens 				
Civics & Government: Government Systems <ul style="list-style-type: none"> Identify the ways a local government serves the community 				
People, Culture, & Civilizations: Human Characteristics <ul style="list-style-type: none"> Describe the human characteristics of various place on Earth, including the local community Describe the roles of various people in the school Define “community” 				
UNIT: Early People & Civilizations				
Objectives	Instructional Sequence			
World History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Describe important people and places and their impact on Ancient Mesopotamian civilization Explain how written language and laws are important in developing a civilization 				
Geography: Physical Features <ul style="list-style-type: none"> Describe the physical features of various places on Earth, including the local community 				
Geography: Political Features <ul style="list-style-type: none"> Locate the geographic area of the world where specific ancient civilizations existed 				
People, Culture, & Civilizations: Historical Societies & Lifestyles <ul style="list-style-type: none"> Explain the importance of available resources to ancient civilizations Describe the way of life of various ancient civilizations (e.g., important people in society, migration, and customs. 				

UNIT: The New World				
Objectives	Instructional Sequence			
World History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Identify conquistadors and locate the civilizations they conquered Describe the reasons for conquering new land Describe the explorers' influence on the conquered land 				
US History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Describe how the Roanoke and Virginia colonies were established Identify important individuals and their contributions to the development of the United States 				
People, Culture, & Civilizations: Historical Lifestyles & Societies <ul style="list-style-type: none"> Explain the importance of available resources to ancient civilizations Describe the way of life of various ancient civilizations (e.g., important people in society, migration, and customs) 				
UNIT: The American Revolution				
Objectives	Instructional Sequence			
US History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Identify important individuals and their contributions to the development of the United States 				
US History: Historical Conflict <ul style="list-style-type: none"> Identify the causes of the Revolutionary War Compare and contrast "Minutemen" and "Redcoats" (American and British armies) in the battle of Lexington & Concord 				

UNIT: The American West				
Objectives	Instructional Sequence			
US History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Identify important individuals and their contributions to the development of the United States Explain how early explorers of the American west showed Moral Focus concepts 				
UNIT: Symbols and Figures of America				
Objectives	Instructional Sequence			
Civics & Government: Citizenship: Awareness, Rights & Responsibilities <ul style="list-style-type: none"> Explain what important national symbols represent 				

2nd Grade-SS Instructional Sequence Plan

UNIT: North American Geography				
Objectives		Instructional Sequence		
Geography: Physical Features <ul style="list-style-type: none"> Locate major landforms, bodies of water, and other features of North America 				
Geography: Political Features <ul style="list-style-type: none"> Explain the difference between a continent and a country 				
UNIT: Market Resources				
Objectives		Instructional Sequence		
Economics: Economic Concepts <ul style="list-style-type: none"> Explain the concept of “market” Describe how people make choices regarding resources (e.g., opportunity cost & scarcity) 				
Economics: Resources <ul style="list-style-type: none"> Give examples of categories of resources (natural, human, and capital) 				
UNIT: Communities Around the World				
Objectives		Instructional Sequence		
Geography: Political Features <ul style="list-style-type: none"> Compare and contrast urban, suburban, and rural communities 				
Geography: 5 Themes of Geography <ul style="list-style-type: none"> Evaluate the advantages and disadvantages of different modes of transportation 				
Civics & Government: Citizenship: Awareness, Rights, & Responsibilities <ul style="list-style-type: none"> Describe ways that people show citizenship in the United States and in other countries of the world 				
People, Culture, & Civilizations: Human Characteristics <ul style="list-style-type: none"> Describe common characteristics of people within a culture 				

group				
People, Culture, & Civilizations: Historical Societies & Lifestyles				
<ul style="list-style-type: none"> Explain how the local community has changed over time 				
UNIT: India & China				
Objectives	Instructional Sequence			
Geography: Physical Features				
<ul style="list-style-type: none"> Describe the physical features of various places on Earth 				
Geography: Political Features				
<ul style="list-style-type: none"> Locate the geographic area of the world where ancient civilizations existed 				
World History: Significant Events, Individuals, & Contributions				
<ul style="list-style-type: none"> Explain the purpose for building the Great Wall of China Explain the impact of inventions and contributions on ancient and modern society 				
People, Culture, & Civilizations: Historical Societies & Lifestyles				
<ul style="list-style-type: none"> Explain the importance of available resources to ancient civilizations Compare and contrast the ways of life, customs, beliefs, and contributions to modern society of different ancient civilizations in the same geographical area (Asia, Ancient Greece) 				
UNIT: Ancient Greece				
Objectives	Instructional Sequence			
Geography: Physical Features				
<ul style="list-style-type: none"> Describe the physical features of various places on Earth 				
Geography: Political Features				
<ul style="list-style-type: none"> Locate the geographic area of the world where ancient civilizations existed 				

World History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Explain the significance of the accomplishments of Alexander the Great Explain the impact of inventions and contributions on ancient and modern society 				
World History: Historical Conflict <ul style="list-style-type: none"> Describe major battles in the Persian Wars 				
People, Culture, & Civilizations: Historical Lifestyles <ul style="list-style-type: none"> Compare and contrast the ways of life, customs, beliefs, and contributions to modern society of different ancient civilizations in the same geographical area (Asia, Ancient Greece) 				
UNIT: American Government				
Objectives	Instructional Sequence			
Civics & Government: Government Systems <ul style="list-style-type: none"> Explain James Madison's contribution to the Constitution of the United States 				
UNIT: War of 1812				
Objectives	Instructional Sequence			
US History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Describe important individuals in American wars and the impact their contributions had on modern society 				
US History: Historical Conflict <ul style="list-style-type: none"> Identify the causes of American wars Describe participants in conflicts in United States history 				
UNIT: Westward Expansion				
Objectives	Instructional Sequence			
US History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Compare and contrast transportation in the 1800s with transportation today 				
People, Cultures, & Civilizations: Historical Societies &				

Lifestyles <ul style="list-style-type: none"> Describe the way of life of Native Americans in the 1800s Describe the relationship between Native Americans and the United States government 				
UNIT: The Civil War				
Objectives	Instructional Sequence			
US History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Describe important individuals in American wars and the impact their contributions had on modern society 				
US History: Historical Conflict <ul style="list-style-type: none"> Identify the causes of American wars Describe participants in conflicts in United States history 				
UNIT: Immigration & Citizenship				
Objectives	Instructional Sequence			
Civics & Government: Citizenship: Awareness, Rights, & Responsibilities <ul style="list-style-type: none"> Explain “e pluribus unum” Describe ways that people show citizenship in the United States and in other countries of the world Identify the ways one can become an American citizen 				
People, Culture, & Civilizations Historical Societies & Lifestyles <ul style="list-style-type: none"> Explain reasons why people migrated to the United States Describe the journey of immigrants to the United States (how they traveled to the country, where they settled) 				
UNIT: Symbols & Figures of America				
Objectives	Instructional Sequence			
Civics & Government: Citizenship: Awareness, Rights, & Responsibilities <ul style="list-style-type: none"> Explain what important specific national symbols represent 				

3rd Grade- SS Instructional Sequence Plan

UNIT: Map Features				
Objectives	Instructional Sequence			
Geography: Maps & Globes <ul style="list-style-type: none"> Interpret a map using its features (title, scale, grid) Determine location and distance (cardinal directions, scale, grid) Compare and contrast types of maps (political & physical) 				
Geography: 5 Themes of Geography <ul style="list-style-type: none"> Define and describe “Human-Environment Interaction”, one of the 5 Themes of Geography 				
UNIT: Entrepreneurs				
Objectives	Instructional Sequence			
Economics: Economic Concepts <ul style="list-style-type: none"> Describe basic economic concepts Analyze choices based on positive and negative incentives Propose a way needs can be met considering choices available (opportunity cost) 				
Economics: Resources <ul style="list-style-type: none"> Compare and contrast different categories of resources (natural, human, and capital) Explain the concept of “entrepreneurship” Explain the purpose of using money as opposed to bartering 				
UNIT: Ancient Rome				
Objectives	Instructional Sequence			
Geography: Physical Features <ul style="list-style-type: none"> Describe the physical features of various places on Earth 				
Geography: Political Features <ul style="list-style-type: none"> Locate the geographic area of the world where ancient civilizations existed 				
World History: Significant Events, Individuals, & Contributions				

<ul style="list-style-type: none"> Describe significant individuals in ancient history and the impact their accomplishments had on ancient and modern society Summarize the causes and effects of major events in ancient world history 				
People, Culture, & Civilizations: Historical Societies & Lifestyles <ul style="list-style-type: none"> Sequence the origins of civilizations and eras in time in chronological order Describe the structure of society in ancient civilizations Explain how geographic locations of settlements and migration patterns influence ancient societies 				
UNIT: The Vikings				
Objectives	Instructional Sequence			
Geography: Political Features <ul style="list-style-type: none"> Locate the geographic area of the world where ancient civilizations existed 				
World History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Describe significant individuals in ancient history and the impact their accomplishments had on ancient and modern society Summarize the causes and effects of major events in ancient world history 				
People, Culture, & Civilizations: Historical Societies & Lifestyles <ul style="list-style-type: none"> Sequence the origins of civilizations and eras in time in chronological order Describe the structure of society in ancient civilizations Explain how geographic locations of settlements and migration patterns influence ancient societies 				

UNIT: Europe in the Middle Ages				
Objectives	Instructional Sequence			
World History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Describe significant individuals in ancient history and the impact their accomplishments had on ancient and modern society Summarize the causes and effects of major events in ancient world history Explain the impact of individual warriors on 15th century Europe (Joan of Arc, William the Conqueror) 				
World History: Historical Conflicts <ul style="list-style-type: none"> Describe the major causes and outcome of the Hundred Years War 				
People, Culture, & Civilizations: Historical Societies & Lifestyles <ul style="list-style-type: none"> Sequence the origins of civilizations and eras in time in chronological order Describe the structure of society in ancient civilizations Explain how geographic locations of settlements and migration patterns influence ancient societies 				
UNIT: Early Exploration of North America				
Objectives	Instructional Sequence			
US History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Explain the impact of the explorers' discoveries on modern society 				
People, Culture, & Civilizations: Historical Societies & Lifestyles <ul style="list-style-type: none"> Sequence the origins of civilizations and eras in time in chronological order Explain how geographic locations of settlements and migration patterns influence ancient societies 				

UNIT: The 13 Colonies				
Objectives		Instructional Sequence		
US History: Significant Events, Individuals, & Contributions				
<ul style="list-style-type: none"> Compare and contrast the colonies as a region and individually 				
UNIT: Our America				
Objectives		Instructional Sequence		
Civics & Government: Citizenship-Awareness, Rights, & Responsibilities				
<ul style="list-style-type: none"> Explain the origin of Core Democratic Values and how they help define what it means to be a citizen Use the definition of Core Democratic Values to explain why important American historical figures were good citizens 				
Civics & Government: Government Systems				
<ul style="list-style-type: none"> Explain the basic principles of the American system of government 				

4th Grade- SS Instructional Sequence Plan

UNIT: Geography Skills & Themes				
Objectives	Instructional Sequence			
Geography: Maps & Globes <ul style="list-style-type: none"> Determine location and distance using map features and scale Interpret different types of maps 				
Geography: 5 Themes of Geography <ul style="list-style-type: none"> Define and list an example of each of the 5 Themes of Geography 				
UNIT: Economic Systems				
Objectives	Instructional Sequence			
Economics: Economic Concepts <ul style="list-style-type: none"> Analyze the strengths and weaknesses of the concept of specialization 				
Economics: Resources <ul style="list-style-type: none"> Categorize real-life examples of productive resources (natural, human, capital) Explain the concept of “income” (generating income and using income) 				
Economics: Economies of the World <ul style="list-style-type: none"> Define the purpose of an economic system Explain how the government is an example of an economic system 				
UNIT: US Regions				
Objectives	Instructional Sequence			
Geography: Physical Features <ul style="list-style-type: none"> Compare physical features of their state to regions in the United States 				
Geography: Political Features <ul style="list-style-type: none"> Group the United States into regions in a variety of ways 				

<p>(political, physical, economical)</p> <ul style="list-style-type: none"> Locate geographical areas within regions of the United States (states, capital cities, & major cities) 				
<p>US History: Significant Events, Individuals, & Contributions</p> <ul style="list-style-type: none"> Describe the important individuals and events within each region of the United States Explain how the geographical location of these regions impact historical events in that region 				
UNIT: State Studies				
Objectives	Instructional Sequence			
<p>Geography: Physical Features</p> <ul style="list-style-type: none"> Compare physical features of their state to regions in the United States 				
<p>Geography: Political Features</p> <ul style="list-style-type: none"> Locate and identify geographical areas of their own state (boundaries, capital city, other major cities) 				
<p>Geography: 5 Themes of Geography</p> <ul style="list-style-type: none"> Describe features of their own state using the 5 Themes of Geography 				
<p>Economics: Economies of the World</p> <ul style="list-style-type: none"> Describe the economy of their state 				
<p>US History: Significant Events, Individuals, & Contributions</p> <ul style="list-style-type: none"> Sequence important historical events of their individual state Explain the impact of national historical events on their individual state (exploration, conflicts, and other important events that are applicable) 				
<p>US History: Current Events in the Context of History</p> <ul style="list-style-type: none"> Predict the impact that the current events will have on the future of their state 				
<p>Civics & Government: Citizenship-Awareness, Rights, &</p>				

Responsibilities <ul style="list-style-type: none"> Describe the rights and responsibilities involved with American citizenship (freedom of speech, voting, knowing representatives) Identify the major officeholders within their individual state and federal government representatives 				
Civics & Government: Government Systems <ul style="list-style-type: none"> Describe the 3 Branches of Government Order the levels of government (local, state, and national) in a hierarchy 				
People, Cultures, & Civilizations: Human Characteristics <ul style="list-style-type: none"> Describe the cultural characteristics of people within their state 				
People, Cultures, & Civilizations: Historical Societies & Lifestyles <ul style="list-style-type: none"> Describe the way of life of Native American tribes within their state (e.g., homes, traditional dress, foods, transportation, crafts, tools and other accomplishments) Explain Native American influences on their state 				

5th Grade- SS Instructional Sequence Plan

UNIT: US Geography				
Objectives		Instructional Sequence		
Geography: Maps & Globes <ul style="list-style-type: none"> Determine location and distance Interpret different types of maps and geographical representations 				
Geography: Physical Features <ul style="list-style-type: none"> Describe specific landforms and rivers of the United States 				
UNIT: US Economics				
Objectives		Instructional Sequence		
Economics: Economic Concepts <ul style="list-style-type: none"> Describe consequences of competition on an economy (among producers & sellers, consumers & buyers) Describe the relationships of economic concepts in a competitive market 				
Economics: Resources <ul style="list-style-type: none"> Explain ways to improve human productivity and resources and the impact that would have on an economy Evaluate personal choices made with money (e.g., budgets, spending vs. saving, and credit) 				
Economics: Economies of the World <ul style="list-style-type: none"> Describe different economic systems and where they are practiced around the world Describe the economy of the United States 				
Economics: Economic Institutions <ul style="list-style-type: none"> Explain the role of banks in the economic system 				
UNIT: Native Americans				
Objectives		Instructional Sequence		
People, Cultures, and Civilizations: Historical Lifestyles & Societies <ul style="list-style-type: none"> Compare and contrast the way of life of various Native 				

American tribes within the United States				
UNIT: Early Exploration				
Objectives	Instructional Sequence			
World History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Describe the explorers' influence on the conquered land (e.g. trade) Determine the reasons that motivated the explorers toward discovery Explain the impact of new technology on the voyages of the explorers 				
People, Cultures, and Civilizations: Historical Lifestyles & Societies <ul style="list-style-type: none"> Compare and contrast early English settlements in the United States with French and Spanish settlement 				
UNIT: Colonization				
Objectives	Instructional Sequence			
US History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Analyze contributions of colonial regions on modern society 				
People, Cultures, and Civilizations: Historical Lifestyles & Societies <ul style="list-style-type: none"> Explain how the way of life in the colonial regions (New England, Middle Atlantic, Southern Colonies) was influenced by social characteristics (families, class structure, religion, economies) Compare and contrast early English settlements in the United States with French and Spanish settlements 				
UNIT: The Revolutionary War				
Objectives	Instructional Sequence			
US History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Explain important events in the Revolutionary Era that led to the independence of the United States from Britain Analyze the impact of important individuals on the history of the United States 				

US History: Historical Conflict <ul style="list-style-type: none"> • Compare and contrast the strengths and weaknesses of the American and British armies in the Revolutionary War • Describe participants (groups of people, allies) in conflicts in United States history • Describe the causes and effects of conflicts in United States history (reasons for wars, lasting impact of treaties) • Describe important battles in the Revolutionary War 				
UNIT: The US Constitution				
Objectives	Instructional Sequence			
US History: Current Events in the Context of History <ul style="list-style-type: none"> • Describe and explain current events facing the United States relating to government and civil rights • Predict the impact that the current events will have on the future of the United States as well as the individual citizen 				
Civics & Government: Government Systems <ul style="list-style-type: none"> • Explain the early forms of government in the United States • Explain the impact of individual influence on the Constitutional Convention • Compare and contrast the 3 Branches of Government and their functions • Define each of the amendments in the Bill of Rights 				
UNIT: Westward Expansion				
Objectives	Instructional Sequence			
US History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> • Analyze the impact of important individuals on the history of the United States • Explain the concept “Manifest Destiny” 				
US History: Historical Conflict <ul style="list-style-type: none"> • Describe participants (groups of people, allies) in conflicts in United States history • Describe the causes and effects of conflicts in United States history (reasons for wars, lasting impact of treaties) 				

UNIT: The Civil War				
Objectives	Instructional Sequence			
US History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Analyze the impact of important individuals on the history of the United States Explain the causes and eventual effects of events leading to the Civil War 				
US History: Historical Conflict <ul style="list-style-type: none"> Describe important battles in the Civil War 				

6th Grade- SS Instructional Sequence Plan

UNIT: Global Geography				
Objectives	Instructional Sequence			
Geography: Maps & Globes <ul style="list-style-type: none"> Analyze the appropriate use and purposes of different types of maps 				
Geography: 5 Themes of Geography <ul style="list-style-type: none"> Describe features of different world regions using the 5 Themes of Geography Predict the impact of natural disasters on both the physical environment and human response to the disasters Predict the consequences of movement on the physical environment 				
World History: Current Events in the Context of History <ul style="list-style-type: none"> Describe conflict and cooperation that occurs in current events (where they arise) 				
UNIT: Global Economics				
Objectives	Instructional Sequence			
Economics: Economic Concepts <ul style="list-style-type: none"> Make generalizations about countries and their economies using basic economic concepts (GDP, inflation) Explain how economies are influenced by competition and the impact of that on modern society Describe how different categories of earned income are influenced by a variety of factors 				
<u>Economics: Economies of the World</u> <ul style="list-style-type: none"> Distinguish the strengths and weaknesses of each economic system Explain the concept of “globalization” 				
<u>Economics: Economic Institutions</u> <ul style="list-style-type: none"> Describe the importance of banks within economic institutions Describe the importance of labor unions within economic institutions 				

UNIT: Europe Studies				
Objectives		Instructional Sequence		
<u>Geography: Physical Features</u>				
<ul style="list-style-type: none"> Describe the physical features of different regions on Earth 				
<u>Geography: Political Features</u>				
<ul style="list-style-type: none"> Locate geographical areas within regions of the world (countries, capital cities, & major cities) 				
<u>Economics: Economies of the World</u>				
<ul style="list-style-type: none"> Explain the impact of trade on a country's economy and relations with other countries Compare the economies of different world regions to each other and to the United States using basic economic concepts 				
<u>World History: Significant Events, Individuals, & Contributions</u>				
<ul style="list-style-type: none"> Explain contributions of ancient civilizations and their influence on modern (today's) society Evaluate the legacy of artistic and civil rights movements and important individuals within these movements on modern society Explain the impact of major world religions on history and current events 				
<u>World History: Current Events in the Context of History</u>				
<ul style="list-style-type: none"> Apply the 5 Themes of Geography to current events happening throughout the world Predict the possible impact of current events throughout the world on the United States 				
<u>World History: Historical Conflicts</u>				
<ul style="list-style-type: none"> Analyze the causes and consequences of ancient Greek and Roman conflicts Explain the impact of religious conflict on the people of a specific region 				

Civics & Government: Government Systems <ul style="list-style-type: none"> Describe different government systems used in countries around the world Evaluate the pros and cons of large intergovernmental organizations (European Union, Commonwealth of Nations) 				
People, Culture, & Civilizations: Historical Societies & Lifestyles <ul style="list-style-type: none"> Explain the influence that ancient civilizations had on modern society (government, contributions, religion/philosophies, trade, tools/weapons, agriculture, migration/settlement) Explain the importance of specific people and places within society Evaluate how the social structure in ancient civilizations contributed to their success (or lack of) 				
UNIT: Latin America Studies				
Objectives	Instructional Sequence			
Geography: Physical Features <ul style="list-style-type: none"> Describe the physical features of different regions on Earth 				
Geography: Political Features <ul style="list-style-type: none"> Locate geographical areas within regions of the world (countries, capital cities, & major cities) 				
Economics: Economies of the World <ul style="list-style-type: none"> Explain the impact of trade on a country's economy and relations with other countries Compare the economies of different world regions to each other and to the United States using basic economic concepts 				
World History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Describe important individuals and their accomplishments in various independence movements around the world Explain the impact of individual explorers and conquistadors on the places they colonized 				

World History: Current Events in the Context of History <ul style="list-style-type: none"> • Apply the 5 Themes of Geography to current events happening throughout the world • Predict the possible impact of current events throughout the world on the United States 				
Civics & Government: Citizenship-Awareness, Rights, & Responsibilities <ul style="list-style-type: none"> • Compare and contrast rights and responsibilities of citizens in other countries to those in the United States 				
Civics & Government: Government Systems <ul style="list-style-type: none"> • Describe different government systems used in countries around the world 				
People, Culture, & Civilizations: Human Characteristics <ul style="list-style-type: none"> • Explain how historical events influenced the language spoken in regions of the world • Evaluate the lasting impact of gender roles and class structure on the culture in different world regions 				
People, Culture, & Civilizations: Historical Societies & Lifestyles <ul style="list-style-type: none"> • Explain the influence that ancient civilizations had on modern society (government, contributions, religion/philosophies, trade, tools/weapons, agriculture, migration/settlement) • Explain the importance of specific people and places within society • Evaluate how the social structure in ancient civilizations contributed to their success (or lack of) 				

7th Grade- SS Instructional Sequence Plan

UNIT: Canada Studies				
Objectives	Instructional Sequence			
Geography: Physical Features <ul style="list-style-type: none"> Describe the physical features of different regions on Earth 				
Geography: Political Features <ul style="list-style-type: none"> Locate geographical areas within regions of the world (countries, capital cities, & major cities) 				
Economics: Economies of the World <ul style="list-style-type: none"> Explain the impact of trade on a country's economy and relations with other countries Compare the economies of different world regions to each other and to the United States using basic economic concepts 				
World History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Explain the impact of individual explorers and conquistadors on the places they colonized 				
World History: Current Events in the Context of History <ul style="list-style-type: none"> Apply the 5 Themes of Geography to current events happening throughout the world Predict the possible impact of current events throughout the world on the United States 				
Civics & Government: Government Systems <ul style="list-style-type: none"> Describe different government systems used in countries around the world 				
People, Culture, & Civilizations: Human Characteristics <ul style="list-style-type: none"> Explain how historical events influenced the language spoken in regions of the world 				

People, Culture, & Civilizations: Historical Societies & Lifestyles <ul style="list-style-type: none"> Explain the influence that ancient civilizations had on modern society (government, contributions, religion/philosophies, trade, tools/weapons, agriculture, migration/settlement) 				
UNIT: Middle East Studies				
Objectives	Instructional Sequence			
Geography: Physical Features <ul style="list-style-type: none"> Describe the physical features of different regions on Earth 				
Geography: Political Features <ul style="list-style-type: none"> Locate geographical areas within regions of the world (countries, capital cities, & major cities) 				
Economics: Economies of the World <ul style="list-style-type: none"> Explain the impact of trade on a country's economy and relations with other countries Compare the economies of different world regions to each other and to the United States using basic economic concepts 				
World History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Explain contributions of ancient civilizations and their influence on modern society Explain the impact of major world religions on history and current events 				
World History: Current Events in the Context of History <ul style="list-style-type: none"> Apply the 5 Themes of Geography to current events happening throughout the world Predict the possible impact of current events throughout the world on the United States 				

Civics & Government: Citizenship-Awareness, Rights, & Responsibilities <ul style="list-style-type: none"> Compare and contrast rights and responsibilities of citizens in other countries to those in the United States 				
Civics & Government: Government Systems <ul style="list-style-type: none"> Describe different government systems used in countries around the world 				
People, Culture, & Civilizations: Human Characteristics <ul style="list-style-type: none"> Evaluate the lasting impact of gender roles and class structure on the culture in different world regions 				
People, Culture, & Civilizations: Historical Societies & Lifestyles <ul style="list-style-type: none"> Explain the influence that ancient civilizations had on modern society (government, contributions, religion/philosophies, trade, tools/weapons, agriculture, migration/settlement) Explain the importance of specific people and places within society Evaluate how the social structure in ancient civilizations contributed to their success (or lack of) 				
UNIT: Asia Studies				
Objectives	Instructional Sequence			
<u>Geography: Physical Features</u> <ul style="list-style-type: none"> Describe the physical features of different regions on Earth 				
<u>Geography: Political Features</u> <ul style="list-style-type: none"> Locate geographical areas within regions of the world (countries, capital cities, & major cities) 				
<u>Economics: Economies of the World</u> <ul style="list-style-type: none"> Explain the impact of trade on a country's economy and relations with other countries Compare the economies of different world regions to each other and to the United States using basic economic concepts 				

World History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Describe important individuals and their accomplishments in various independence movements around the world Evaluate the legacy of artistic and civil rights movements and important individuals within these movements on modern society Explain the impact of major world religions on history and current events 				
World History: Current Events in the Context of History <ul style="list-style-type: none"> Apply the 5 Themes of Geography to current events happening throughout the world Predict the possible impact of current events throughout the world on the United States 				
Civics & Government: Citizenship-Awareness, Rights, & Responsibilities <ul style="list-style-type: none"> Compare and contrast rights and responsibilities of citizens in other countries to those in the United States 				
Civics & Government: Government Systems <ul style="list-style-type: none"> Describe different government systems used in countries around the world 				
People, Culture, & Civilizations: Human Characteristics <ul style="list-style-type: none"> Evaluate the lasting impact of gender roles and class structure on the culture in different world regions 				
People, Culture, & Civilizations: Historical Societies & Lifestyles <ul style="list-style-type: none"> Explain the influence that ancient civilizations had on modern society (government, contributions, religion/philosophies, trade, tools/weapons, agriculture, migration/settlement) Explain the importance of specific people and places within society Evaluate how the social structure in ancient civilizations contributed to their success (or lack of) 				

UNIT: Africa Studies				
Objectives	Instructional Sequence			
Geography: Physical Features <ul style="list-style-type: none"> Describe the physical features of different regions on Earth 				
Geography: Political Features <ul style="list-style-type: none"> Locate geographical areas within regions of the world (countries, capital cities, & major cities) 				
Economics: Economies of the World <ul style="list-style-type: none"> Explain the impact of trade on a country's economy and relations with other countries Compare the economies of different world regions to each other and to the United States using basic economic concepts 				
World History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Explain contributions of ancient civilizations and their influence on modern society Analyze the impact of trade on the development of African civilizations and the reasons for European colonization of Africa 				
World History: Current Events in the Context of History <ul style="list-style-type: none"> Apply the 5 Themes of Geography to current events happening throughout the world Predict the possible impact of current events throughout the world on the United States 				
People, Culture, & Civilizations: Historical Societies & Lifestyles <ul style="list-style-type: none"> Explain the influence that ancient civilizations had on modern society (government, contributions, religion/philosophies, trade, tools/weapons, agriculture, migration/settlement) Explain the importance of specific people and places within society Evaluate how the social structure in ancient civilizations contributed to their success (or lack of) 				

UNIT: Australia Studies				
Objectives	Instructional Sequence			
Geography: Physical Features <ul style="list-style-type: none"> Describe the physical features of different regions on Earth 				
Geography: Political Features <ul style="list-style-type: none"> Locate geographical areas within regions of the world (countries, capital cities, & major cities) 				
World History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Explain the impact of individual explorers and conquistadors on the places they colonized 				
World History: Current Events in the Context of History <ul style="list-style-type: none"> Apply the 5 Themes of Geography to current events happening throughout the world Predict the possible impact of current events throughout the world on the United States 				
Civics & Government: Government Systems <ul style="list-style-type: none"> Describe different government systems used in countries around the world Evaluate the pros and cons of large intergovernmental organizations (European Union, Commonwealth of Nations) 				

8th grade- SS Instructional Sequence Plan

UNIT: Early America				
Objectives	Instructional Sequence			
US History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Analyze how early exploration and governmental policies affected Native Americans in the United States 				
People, Culture, & Civilizations: Historical Societies & Lifestyles <ul style="list-style-type: none"> Explain how political beliefs and government policies influenced society in the United States Describe how geographic and economic conditions led to changes in society (colonization, immigration, slavery) 				
UNIT: The American Revolution				
Objectives	Instructional Sequence			
US History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Evaluate the impact of important individuals' contributions to United States history Evaluate how different attitudes, governmental policies, and individual opinions influenced the American Revolution Explain the impact of early governmental policies on modern society 				
US History: Historical Conflict <ul style="list-style-type: none"> Explain causes and effects of the American Revolution and the impact of these events on United States history Evaluate how strengths and weaknesses of participants in conflict in United States history influence the outcome of the conflict Explain the impact of the outcome of conflict in United States history on modern society 				
UNIT: The US Constitution				
Objectives	Instructional Sequence			
Civics & Government: Government Systems <ul style="list-style-type: none"> Explain how the strengths and weaknesses of early forms of government and influential writings led to the formation of the current US Constitution Defend each side of the major debates proposed at the 				

<p>Constitutional Convention and in the process of ratifying the Constitution</p> <ul style="list-style-type: none"> Determine current examples of the function of the federal government as outlined in the Constitution (real-life applications of the 3 Branches of Government and the Bill of Rights) 				
UNIT: Life in the New Nation				
Objectives	Instructional Sequence			
<p>US History: Significant Events, Individuals, & Contributions</p> <ul style="list-style-type: none"> Explain the impact of early governmental policies on modern society Compare and contrast the political process (elections, political parties) from the 1700 and 1800s to today 				
<p>US History: Historical Conflict</p> <ul style="list-style-type: none"> Explain the impact of the outcome of conflict in United States history on modern society 				
<p>People, Culture, & Civilizations: Historical Societies & Lifestyles</p> <ul style="list-style-type: none"> Explain how political beliefs and government policies influenced society in the United States 				
UNIT: Westward Expansion				
Objectives	Instructional Sequence			
<p>US History: Significant Events, Individuals, & Contributions</p> <ul style="list-style-type: none"> Explain the government's reasons for land acquisition in the 1800s Analyze how early exploration and governmental policies affected Native Americans in the United States Explain the impact of early governmental policies on modern society 				
<p>US History: Historical Conflict</p> <ul style="list-style-type: none"> Explain the impact of the outcome of conflict in United States history on modern society Describe how land acquisition lead to conflict in United States history 				

UNIT: 19 th Century Culture & Reform				
Objectives		Instructional Sequence		
People, Culture, & Civilizations: Historical Societies & Lifestyles <ul style="list-style-type: none"> Explain how political beliefs and government policies influenced society in the United States Evaluate the success of reform movements in regards to their impact on modern society 				
UNIT: The Civil War				
Objectives		Instructional Sequence		
US History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Evaluate the impact of important individuals' contributions to United States history Explain the impact of early governmental policies on modern society Evaluate how different attitudes, governmental policies, and individual opinions influenced the Civil War and African-American society in the United States 				
US History: Historical Conflict <ul style="list-style-type: none"> Evaluate how strengths and weaknesses of participants in conflict in United States history influence the outcome of the conflict Explain the impact of the outcome of conflict in United States history on modern society 				
People, Culture, & Civilizations: Historical Societies & Lifestyles <ul style="list-style-type: none"> Explain how political beliefs and government policies influenced society in the United States Describe how geographic and economic conditions led to changes in society (colonization, immigration, slavery) 				
UNIT: Late 19 th Century to Early 20 th Century				
Objectives		Instructional Sequence		
US History: Significant Events, Individuals, & Contributions <ul style="list-style-type: none"> Compare and contrast industrial development in the late-1800s/early-1900s to modern technological advancement 				

<p>US History: Historical Conflict</p> <ul style="list-style-type: none"> • Explain the impact of the outcome of conflict in United States history on modern society • Describe how land acquisition lead to conflict in United States history 				
<p>Civics & Government: Citizenship-Awareness, Rights, & Responsibilities</p> <ul style="list-style-type: none"> • Determining current examples of obtaining citizenship (real-life applications of the citizenship process) • Evaluate the importance of knowing one's civil and legal responsibilities when entering a new country 				
<p>People, Culture, & Civilizations: Historical Societies & Lifestyles</p> <ul style="list-style-type: none"> • Describe how the growth of technology changed life in the United States in the 19th century • Describe how geographic and economic conditions led to changes in society (colonization, immigration, slavery) 				

MOVEMENT AND CONCEPT DEVELOPMENT
Measurement Topic: Movement and Movement Patterns
 Kindergarten

Evidence shows student has met or exceeded the learning target

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> • Performing basic locomotor skills • Performing basic non-locomotor skills • Performing basic skills to manipulate objects (hand-eye coordination) • Moving in different directions using a variety of locomotor movements

Evidence shows misunderstanding, misconceptions, or omissions

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> • Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> ◦ Locomotor example: Run (See Appendix) ◦ Non-locomotor example: Balance (See Appendix) ◦ Manipulative example: Bounce (See Appendix) • Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> ◦ Performing limited basic locomotor skills ◦ Performing some basic non-locomotor skills ◦ Performing manipulative skills with limited proficiency or consistency ◦ Moving in different directions using limited locomotor movements
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

MOVEMENT AND CONCEPT DEVELOPMENT

Measurement Topic: Movement Concepts

Kindergarten

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> Demonstrating awareness of personal space by moving safely and purposefully Demonstrating basic movement vocabulary (directional vocabulary such as forward, backward, sideways, left, right; spatial vocabulary such as high, low, under, over; temporal vocabulary such as fast and slow) Following simple directions for basic games and activities

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> Spatial awareness example: Personal space (See Appendix) Directional example: Forward (See Appendix) Temporal example: Fast (See Appendix) Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Demonstrating a limited awareness of personal space Demonstrating basic movement vocabulary with partial accuracy Following directions for basic games and activities some of the time
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

PHYSICAL FITNESS AND WELLNESS

Measurement Topic: Personal Fitness

Kindergarten

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> Describing how increased activity affects the body (heart beating faster, breathing faster, tired muscles) Building endurance through increased activity (e.g., moving continuously for one minute, holding own body weight for 5 seconds)

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> Heart-beat Breath / Breathe / Breathing Muscles Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Describing physical feelings after exercise Building or displaying limited endurance during activity
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

PHYSICAL FITNESS AND WELLNESS
Measurement Topic: Health Concepts for Life
Kindergarten

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> Recognizing healthy and unhealthy foods Describing the necessity of drinking water daily Identifying household products that are harmful to the body if ingested, or inhaled Identifying the feelings that result from participation in physical activity (e.g., happy, tired, excited)

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> Healthy Unhealthy Ingest (i.e., eat) Inhale (i.e., breathe in) Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Recognizing healthy and unhealthy foods with limited accuracy Recognizing some harmful household products
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

PHYSICAL FITNESS AND WELLNESS
Measurement Topic: Teamwork and Sportsmanship
Kindergarten

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> • Taking turns and working with partners or teams during activities • Sharing equipment with others

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> • Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> ◦ Sharing • Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> ◦ Taking turns and working with partners or teams most of the time ◦ Sharing equipment with others on a limited basis
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

Appendix
Recommended Skills and Concepts
Grades K-2

Motor Skills

- Locomotor: Run, walk, jog, jump, hop, gallop, slide, skip
- Non-locomotor: Balance, bend, push, pull, stretch, rock, twist, turn
- Manipulative: Toss, throw, catch, bounce, roll, strike, trap, dribble, kick, punt, swing

Movement Concepts

- Space Awareness: Personal space, general space, high, low, under, over
- Directional: Forward, backward, sideways, left, right, zigzag
- Temporal: Fast, medium, slow

MOVEMENT AND CONCEPT DEVELOPMENT
Measurement Topic: Movement and Movement Patterns
 Grade One

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> • Performing locomotor skills in basic combinations • Performing non-locomotor skills with increasing coordination • Performing skills to manipulate objects demonstrating increased control • Moving in different directions using a variety of locomotor movements

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> • Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> ◦ Locomotor example: Hop (See Appendix) ◦ Non-locomotor example: Stretch (See Appendix) ◦ Manipulative example: Toss (See Appendix) • Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> ◦ Performing combinations of locomotor skills with limited accuracy or consistency ◦ Performing non-locomotor skills with some coordination ◦ Performing manipulative skills demonstrating minimal control ◦ Moving in different directions using limited locomotor movements
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

MOVEMENT AND CONCEPT DEVELOPMENT

Measurement Topic: Movement Concepts

Grade One

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> Identifying techniques for efficient and safe movement during physical activities Demonstrating variations in movement by changing directions (left, right, back, forward); speeds (slow, medium, fast); and patterns (straight, zig-zag, curved) Recognizing and describing the basic rules of games played as a part of physical activity

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> Spatial awareness example: General space (See Appendix) Directional example: Backward (See Appendix) Temporal example: Medium (See Appendix) Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Recognizing basic techniques for efficient and safe movement during physical activities Demonstrating variations in movement by changing directions, speeds, and patterns with partial accuracy Describing some of the basic rules of games played as a part of physical activity
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

PHYSICAL FITNESS AND WELLNESS

Measurement Topic: Personal Fitness

Grade One

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> Describing the basic effect of physical activity on muscles, including the heart (e.g., as your activity increases, the heart rate increases) Demonstrating activities that increase flexibility and strength (e.g., squats, lunges, sprints, touching toes, hanging on bars) Demonstrating endurance by engaging in physically challenging activities for increasingly longer periods of time

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> Heart Rate Exercise (i.e., physical activity) Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Describing differences in physical feelings before, during, and after exercise Demonstrating some basic activities that increase flexibility and strength Demonstrating limited endurance when engaging in physically challenging activities for increasingly longer periods of time
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

PHYSICAL FITNESS AND WELLNESS
Measurement Topic: Health Concepts for Life
 Grade One

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> • Explaining the connection between healthy food and a healthy body • Describing indicators of thirst • Identifying products that can be harmful to the body if ingested, or inhaled, including OTC/prescription drugs, alcohol and tobacco • Describing the feelings that result from participation in physical activity (i.e., emotional, physical)

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> • Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> ◦ Hydration ◦ Dehydration ◦ Alcohol ◦ Tobacco • Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> ◦ Identifying healthy and unhealthy foods ◦ Recognizing when thirsty ◦ Recognizing some products that can be harmful to the body if ingested or inhaled ◦ Describing some of the feelings that result from participation in physical activity
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

PHYSICAL FITNESS AND WELLNESS
Measurement Topic: Teamwork and Sportsmanship
Grade One

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> • Participating with partners or teams during activities • Showing a willingness to play along-side others • Explaining the importance of following game rules (e.g., safety, fairness, organization)

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> • Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> ◦ Team ◦ Partner ◦ Rules • Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> ◦ Participating with partners or teams during activities some of the time ◦ Demonstrating limited willingness to play along-side others ◦ Recognizing basic game rules
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

Appendix
Recommended Skills and Concepts
Grades K-2

Motor Skills

- Locomotor: Run, walk, jog, jump, hop, gallop, slide, skip
- Non-locomotor: Balance, bend, push, pull, stretch, rock, twist, turn
- Manipulative: Toss, throw, catch, bounce, roll, strike, trap, dribble, kick, punt, swing

Movement Concepts

- Space Awareness: Personal space, general space, high, low, under, over
- Directional: Forward, backward, sideways, left, right, zigzag
- Temporal: Fast, medium, slow

MOVEMENT AND CONCEPT DEVELOPMENT
Measurement Topic: Movement and Movement Patterns
 Grade Two

Evidence shows student has met or exceeded the learning target

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> Performing locomotor and manipulative skills in combinations (e.g., run and kick a ball; swing and jump over a jump rope) Performing stability skills in combinations (e.g., walking on a balance beam, standing on one leg while balanced on an object; bear walk; crab walk; forward roll) Performing fundamental movements to rhythmic beats (e.g., jumping rope to a consistent beat, using locomotor skills to move to music; simple dance steps)

Evidence shows misunderstanding, misconceptions, or omissions

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> Locomotor example: Skip (See Appendix) Non-locomotor example: Twist (See Appendix) Manipulative example: Kick (See Appendix) Rhythm Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Performing locomotor and manipulative skills in combinations with limited proficiency Performing basic stability skills in combinations Performing fundamental movements to rhythmic beats with partial success
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

MOVEMENT AND CONCEPT DEVELOPMENT

Measurement Topic: Movement Concepts

Grade Two

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> • Demonstrating knowledge of efficient and safe movement techniques when working with a partner or group • Demonstrating efficient movement with objects that provide balance, change of direction, and spatial awareness challenges • Understanding and demonstrating basic game-playing strategies

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> • Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> ◦ Spatial awareness example: High and low (See Appendix) ◦ Directional example: Sideways (See Appendix) ◦ Temporal Example: Slow (See Appendix) • Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> ◦ Demonstrating basic knowledge of efficient and safe movement techniques ◦ Demonstrating limited efficient movement with objects that provide balance, change of direction, and spatial awareness challenges ◦ Identifying basic game-playing strategies with partial accuracy
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

PHYSICAL FITNESS AND WELLNESS

Measurement Topic: Personal Fitness

Grade Two

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> Describing the components of health-related physical fitness (e.g., flexibility, strong muscles, endurance) Demonstrating increasing levels of flexibility and strength through a variety of activities Understanding and performing various high, medium, and low intensity activities to develop cardio-respiratory endurance

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> Flexibility Strength Endurance Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Describing basic components of health-related physical fitness Demonstrating limited levels of flexibility and strength despite involvement in a variety of activities Identifying various high, medium, and low intensity activities with accuracy; performing activities with limited proficiency
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

PHYSICAL FITNESS AND WELLNESS
Measurement Topic: Health Concepts for Life
Grade Two

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> • Describing a balanced diet • Explaining how much water intake is essential for a healthy body • Distinguishing between “use” and “abuse” of products such as alcohol, caffeine, prescription drugs • Identifying the benefits of physical activity and healthy behaviors to well-being (i.e., health benefits, emotional benefits)

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> • Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> ◦ Diet ◦ Caffeine • Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> ◦ Identifying healthy and unhealthy foods and explaining how each affects the body ◦ Identifying the health benefits of drinking water ◦ Explaining the positive and/or negative effects of products such as alcohol, caffeine, prescription drugs ◦ Identifying some of the benefits of physical activity and healthy behaviors
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

PHYSICAL FITNESS AND WELLNESS
Measurement Topic: Teamwork and Sportsmanship
 Grade Two

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> Working with others towards a common goal Demonstrating a willingness to participate with others of various abilities Identifying and demonstrating “fair play”

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> Fair play Team work Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Working with others on an inconsistent basis Demonstrating limited willingness to participate with others of various abilities Identifying game rules and describing how they support “fair play”
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

Appendix
Recommended Skills and Concepts
Grades K-2

Motor Skills

- Locomotor: Run, walk, jog, jump, hop, gallop, slide, skip
- Non-locomotor: Balance, bend, push, pull, stretch, rock, twist, turn
- Manipulative: Toss, throw, catch, bounce, roll, strike, trap, dribble, kick, punt, swing

Movement Concepts

- Space Awareness: Personal space, general space, high, low, under, over
- Directional: Forward, backward, sideways, left, right, zigzag
- Temporal: Fast, medium, slow

MOVEMENT AND CONCEPT DEVELOPMENT
Measurement Topic: Movement and Movement Patterns
 Grade Three

Evidence shows student has met or exceeded the learning target

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> • Performing locomotor and manipulative skills with variations (e.g., vertical and horizontal jumping, throwing a ball with two hands, underhand, side arm) • Demonstrating use of manipulative equipment combined with movement skills to perform specific sport skills • Performing movement skills and patterns following specific rhythms (e.g., pass and catch with a partner in rhythm to music)

Evidence shows misunderstanding, misconceptions, or omissions

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> • Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> ◦ Vertical ◦ Side arm • Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> ◦ Performing locomotor and manipulative skills with limited variations or proficiency ◦ Demonstrating use of some manipulative equipment combined with movement skills to perform specific sport skills ◦ Performing basic movement skills and patterns following specific rhythms
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

MOVEMENT AND CONCEPT DEVELOPMENT

Measurement Topic: Movement Concepts

Grade Three

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> • Demonstrating safe and efficient movement techniques during physical activities and games • Demonstrating and describing various forms of balance • Demonstrating and describing basic game-playing strategies

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> • Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> ◦ Balance ◦ Strategy • Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> ◦ Demonstrating safe and efficient movement techniques during physical activities and games with partial accuracy ◦ Demonstrating and describing various forms of balance with limited consistency ◦ Demonstrating and describing some basic game-playing strategies
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

PHYSICAL FITNESS AND WELLNESS

Measurement Topic: Personal Fitness

Grade Three

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> Identifying strength and areas for improvement of health-related physical fitness Defining and developing components of health-related physical fitness (cardiorespiratory, muscular strength, muscular endurance, flexibility)

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> Cardiorespiratory Endurance Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Identifying strength and areas for improvement of health-related physical fitness with limited accuracy Defining and developing some components of health-related physical fitness
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

PHYSICAL FITNESS AND WELLNESS
Measurement Topic: Health Concepts for Life
 Grade Three

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> Identifying the categories of the food pyramid Comparing the health benefits of drinking water to other beverages Describing the negative effects of using alcohol, caffeine, and tobacco Explaining the relationship between enjoyable activities and reduced stress

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> Food pyramid Stress Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Identifying some categories of the food pyramid Recognizing the health effects of drinking water and other beverages Recognizing the negative effects of alcohol, caffeine, and tobacco use Identifying enjoyable activities and describing some of their physical and emotional benefits
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

PHYSICAL FITNESS AND WELLNESS
Measurement Topic: Teamwork and Sportsmanship
 Grade Three

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> • Exhibiting positive attitudes about participation in physical activity including in groups or teams • Demonstrating patience with self and others when applying new skills while participating in groups or teams • Following rules of a game when participating in groups or teams

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> • Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> ◦ (To be determined by PE Teacher) • Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> ◦ Exhibiting positive attitudes about participation in physical activity including in groups or teams some of the time ◦ Demonstrating limited patience with self and others when applying new skills while participating in groups or teams ◦ Following rules of a game when participating in groups or teams with partial consistency
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

MOVEMENT AND CONCEPT DEVELOPMENT
Measurement Topic: Movement and Movement Patterns
 Grade Four

Evidence shows student has met or exceeded the learning target

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> • Performing locomotor, non-locomotor and manipulative skills combinations in movement patterns • Performing combinations of movement skills, with and without manipulative equipment, to perform specific sport skills • Demonstrating complex patterns of movement with and without specific rhythms

Evidence shows misunderstanding, misconceptions, or omissions

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> • Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> ◦ (To be determined by PE Teacher; specific to sport skills) • Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> ◦ Performing some locomotor, non-locomotor and manipulative skills combinations in movement patterns ◦ Performing combinations of movement skills, with and without manipulative equipment, to perform specific sport skills with limited consistency ◦ Demonstrating some complex patterns of movement with and without specific rhythms
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

MOVEMENT AND CONCEPT DEVELOPMENT

Measurement Topic: Movement Concepts

Grade Four

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> • Demonstrating and describing safety with manipulative equipment during physical activities and games • Demonstrating and describing critical elements of basic movement patterns for movement skills (e.g., when dribbling a ball) • Integrating appropriate game-playing strategies in a variety of contexts

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> • Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> ◦ (To be determined by PE Teacher; specific to activities or games) • Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> ◦ Demonstrating and describing safety with manipulative equipment during some physical activities and games ◦ Demonstrating and describing critical elements of some basic movement patterns for movement skills ◦ Integrating appropriate game-playing strategies in a variety of contexts with limited consistency
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

PHYSICAL FITNESS AND WELLNESS

Measurement Topic: Personal Fitness

Grade Four

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> • Demonstrating strategies to determine specific levels of fitness (e.g., heart rate, muscle strength) • Establishing personal goals for physical fitness levels in specific fitness components • Describing exercises or activities that improve specific fitness components

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> • Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> ◦ Heart rate • Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> ◦ Demonstrating some strategies to determine specific levels of fitness ◦ Establishing limited or unreasonable personal goals for physical fitness levels in specific fitness components ◦ Recognizing exercises or activities that improve specific fitness components
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

PHYSICAL FITNESS AND WELLNESS
Measurement Topic: Health Concepts for Life
 Grade Four

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> • Describing the food groups and recommended portions from each • Describing indicators of dehydration • Describing the long-term effects of using tobacco • Explaining health risks associated with stress

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> • Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> ◦ Dehydration ◦ Tobacco • Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> ◦ Identifying the food groups ◦ Describing some of the indicators of dehydration ◦ Describing the long-term effects of using tobacco with limited proficiency ◦ Explaining health risks associated with stress with partial accuracy
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

PHYSICAL FITNESS AND WELLNESS
Measurement Topic: Teamwork and Sportsmanship
 Grade Four

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> • Demonstrating interdependence to achieve a goal in a group or team context • Demonstrating positive qualities of a competent and enthusiastic player when participating in groups or teams (e.g., accept partners and teammates regardless of personal differences) • Describing how the rules of a game ensure “fair play”

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> • Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> ◦ Fair play • Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> ◦ Demonstrating limited interdependence to achieve a goal in a group or team context ◦ Demonstrating some positive qualities of a competent and enthusiastic player when participating in groups or teams ◦ Describing how the rules of a game ensure “fair play” with partial accuracy
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

MOVEMENT AND CONCEPT DEVELOPMENT
Measurement Topic: Movement and Movement Patterns
 Grade Five

Evidence shows student has met or exceeded the learning target

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> • Demonstrating integration of locomotor and non-locomotor movements in complex patterns • Demonstrating ability to manipulate objects to participate in games and activities • Performing complex rhythmic skills alone and with a partner

Evidence shows misunderstanding, misconceptions, or omissions

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> • Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> ◦ (To be determined by PE Teacher; specific to sport skills) • Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> ◦ Demonstrating integration of locomotor and non-locomotor movements in basic patters ◦ Demonstrating ability to manipulate objects to participate in games and activities with limited proficiency ◦ Performing basic rhythmic skills alone and with a partner
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

MOVEMENT AND CONCEPT DEVELOPMENT

Measurement Topic: Movement Concepts

Grade Five

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> Explaining the importance of safe movement techniques when performing individually or with others Recognizing and describing critical elements of complex movement patterns that combine multiple skills Observing the performance of others and providing appropriate feedback to help others improve skills Performing varying strategies for offense and defense in basic games

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> Offense Defense Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Explaining the importance of some safe movement techniques when performing individually or with others Recognizing and describing critical elements of basic movement patterns that combine multiple skills Observing the performance of others and providing appropriate feedback to help others improve skills with limited consistency Performing limited strategies for offense and defense in basic games
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

PHYSICAL FITNESS AND WELLNESS

Measurement Topic: Personal Fitness

Grade Five

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> Establishing personal goals to achieve physical fitness levels in all fitness components Demonstrating appropriate levels of muscular strength and endurance for major muscle groups Performing exercise or activities that improve specific fitness components

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> Major muscle groups (e.g., abdominal; biceps; triceps; deltoids; gluteus; hamstrings; quadriceps) Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Establishing personal goals to achieve physical fitness levels in some fitness components Demonstrating limited levels of muscular strength and endurance for major muscle groups Performing exercise or activities that improve specific fitness components with limited consistency
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

PHYSICAL FITNESS AND WELLNESS
Measurement Topic: Health Concepts for Life
Grade Five

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> • Explaining how healthy food provides energy for physical activity • Demonstrating adequate daily water intake • Describing health benefits from abstaining from or stopping tobacco use • Distinguishing between signs of healthy stress and unhealthy stress

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> • Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> ◦ Healthy stress ◦ Unhealthy stress ◦ Water intake • Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> ◦ Identifying the nutritional benefits of healthy food ◦ Demonstrating adequate daily water intake with limited consistency ◦ Describing health benefits from abstaining from or stopping tobacco use with partial accuracy ◦ Distinguishing between basic signs of healthy stress and unhealthy stress
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

PHYSICAL FITNESS AND WELLNESS
Measurement Topic: Teamwork and Sportsmanship
 Grade Five

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> • Demonstrating appreciation of the accomplishments of all members in a group or team context • Exhibiting a positive attitude when learning a new skill in individual and group contexts • Demonstrating willingness to resolve conflict when participating in groups or teams

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> • Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> ◦ (To be determined by PE Teacher) • Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> ◦ Demonstrating appreciation of the accomplishments of all members in a group or team context with limited frequency ◦ Exhibiting a positive attitude when learning a new skill in individual and group concepts some of the time ◦ Demonstrating limited willingness to resolve conflict when participating in groups or teams
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

MOVEMENT AND CONCEPT DEVELOPMENT
Measurement Topic: Movement and Movement Patterns
 Grade Six

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> Performing advanced forms in locomotor, non-locomotor, and manipulative skills (e.g., dribble a basketball around objects using either hand with control) Demonstrating competency in more specialized movement skills related to specific physical activities

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> (To be determined by PE Teacher; specific to sport skills) Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Performing basic forms in locomotor, non-locomotor, and manipulative skills Demonstrating limited competency in more specialized skills related to specific physical activities
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

MOVEMENT AND CONCEPT DEVELOPMENT

Measurement Topic: Movement Concepts

Grade Six

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> Analyzing movement and safety techniques to improve performance Identifying movement concepts utilized to refine movement skills (e.g., timing and power improves performance) Demonstrating and describing critical elements of complex movement patterns that combine multiple skills and integrate manipulative equipment Demonstrating and describing strategies for offense and defense in games

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> Timing Power Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Analyzing movement and safety techniques to improve performance with limited success Identifying some movement concepts utilized to refine movement skills Demonstrating and describing critical elements of complex movement patterns that combine multiple skills and integrate manipulative equipment with partial proficiency Demonstrating and describing some strategies for offense and defense in games
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

PHYSICAL FITNESS AND WELLNESS

Measurement Topic: Personal Fitness

Grade Six

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> Measuring and developing personal goals for physical fitness components Demonstrating increasing intensity and duration of an activity while performing locomotor skills

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> Intensity Duration Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Measuring and developing personal goals for some physical fitness components Demonstrating limited increasing intensity and duration of an activity while performing locomotor skills
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

PHYSICAL FITNESS AND WELLNESS
Measurement Topic: Health Concepts for Life
Grade Six

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> • Explaining how exercise and intake relate to balanced weight • Investigating and describing how physical performance is affected by water intake • Demonstrating effective refusal skills to counter pressure to use alcohol, tobacco, or other drugs • Distinguishing between healthy and unhealthy stress management techniques

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> • Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> ◦ Alcohol ◦ Stress management • Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> ◦ Explaining how exercise and intake relate to balanced weight with partial accuracy ◦ Identifying the effects of water intake on physical performance ◦ Demonstrating some effective refusal skills to counter pressure to use alcohol, tobacco, or other drugs ◦ Identifying some healthy and unhealthy stress management techniques
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

PHYSICAL FITNESS AND WELLNESS
Measurement Topic: Teamwork and Sportsmanship
Grade Six

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> • Demonstrating willingness to participate in cooperative games that require a contribution from all team members • Applying rules of a game to ensure personal and group enjoyment when participating in group or team activities

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> • Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> ◦ (To be determined by PE Teacher) • Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> ◦ Demonstrating limited willingness to participate in cooperative games that require contribution from all team members ◦ Applying rules of a game to ensure personal and group enjoyment when participating in group or team activities with partial consistency
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

MOVEMENT AND CONCEPT DEVELOPMENT
Measurement Topic: Movement and Movement Patterns
 Grade Seven

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> • Demonstrating a movement sequence for a variety of physical activities and games • Performing complex combinations of movement forms in various sports and rhythmic activities

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> • Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> ◦ (To be determined by PE Teacher; specific to sport skills) • Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> ◦ Demonstrating a movement sequence for some physical activities and games ◦ Performing complex combinations of movement forms in various sports and rhythmic activities with partial accuracy
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

MOVEMENT AND CONCEPT DEVELOPMENT

Measurement Topic: Movement Concepts

Grade Seven

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> Analyzing movement and safety techniques that improve performance in specific sports Explaining and applying the idea that practice of movement skills improves performance Analyzing strategies for offense and defense in specific sports

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> (To be determined by PE Teacher; specific to sports skills) Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Analyzing movement and safety techniques that improve performance in specific sports with limited success Explaining and applying the idea that practice of movement skills improves performance with partial accuracy Identifying strategies for offense and defense in specific sports
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

PHYSICAL FITNESS AND WELLNESS

Measurement Topic: Personal Fitness

Grade Seven

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> Utilizing self-assessment of physical fitness to identify strengths and weaknesses to develop a personal fitness plan Demonstrating importance all of components of physical fitness to achieve a healthy level of physical fitness

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> Fitness plan Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Utilizing self-assessment of physical fitness to identify some strengths and weaknesses to develop a personal fitness plan Recognizing the importance of all components of physical fitness to achieve a healthy level of physical fitness
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

PHYSICAL FITNESS AND WELLNESS
Measurement Topic: Health Concepts for Life
 Grade Seven

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> Analyzing essential nutrients for the body (i.e., sources of nutrients, uses of each in the body, symptoms of deficiencies) Describing the physiological effects of inadequate and adequate water intake Explaining the short- and long-term effects of caffeine, alcohol, tobacco, marijuana, pain killers, and performance-enhancing drugs Evaluating personal stress and stress management abilities

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> Nutrients Physiological effects Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Identifying essential nutrients for the body Recognizing the physiological effects of inadequate and adequate water intake Explaining some of the short- and long-term effects of caffeine, alcohol, tobacco, marijuana, pain killers, and performance-enhancing drugs Evaluating some personal stress and stress management abilities
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

PHYSICAL FITNESS AND WELLNESS
Measurement Topic: Teamwork and Sportsmanship
 Grade Seven

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> • Demonstrating responsibility for being part of a team and striving to make contributions to team success • Contributing to the development of and adherence to rules that provide safe and enjoyable participation in group and team experiences in physical activity context

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> • Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> ◦ (To be determined by PE Teacher) • Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> ◦ Demonstrating responsibility for being part of a team and striving to make contributions to team success with limited frequency ◦ Identifying rules that provide safe and enjoyable participation in group and team experiences in physical activity context
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

MOVEMENT AND CONCEPT DEVELOPMENT
Measurement Topic: Movement and Movement Patterns
 Grade Eight

Evidence shows student has met or exceeded the learning target

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> Combining and refining fundamental techniques in complex physical activities and games Creating and performing rhythmic movement patterns that demonstrate steady beat, tempo, and phrasing of music

Evidence shows misunderstanding, misconceptions, or omissions

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> (To be determined by PE Teacher; specific to sport skills) Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Combining and refining fundamental techniques in some physical activities and games Creating and performing rhythmic movement patterns that demonstrate steady beat, tempo, and phrasing of music with partial accuracy
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

MOVEMENT AND CONCEPT DEVELOPMENT

Measurement Topic: Movement Concepts

Grade Eight

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> • Correcting unsafe situations related to participation in physical activities • Demonstrating and describing variations of movement skills that occur in specific sports (locomotor, non-locomotor, manipulative) • Describing basic physics principles that are utilized in specific sports (e.g., action-reaction, trajectory, linear velocity)

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> • Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> ◦ Trajectory ◦ Velocity • Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> ◦ Correcting unsafe situations related to participation in physical activities some of the time ◦ Demonstrating and describing some variations of movement skills that occur in specific sports ◦ Identifying basic physics principles that are utilized in specific sports
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

PHYSICAL FITNESS AND WELLNESS

Measurement Topic: Personal Fitness

Grade Eight

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> Assessing personal fitness levels and developing a plan to maintain or improve all fitness components Evaluating progress on fitness components based on personal plan

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> (To be determined by PE Teacher) Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Assessing personal fitness levels and developing a plan to maintain or improve some fitness components Evaluating progress on some fitness components based on personal plan
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

PHYSICAL FITNESS AND WELLNESS
Measurement Topic: Health Concepts for Life
 Grade Eight

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> Evaluating personal diet choices and predicting future health based on current practices (i.e., in relation to the food pyramid, recommended portions, and intake of essential nutrients) Evaluating personal water intake (i.e., in relation to symptoms of thirst, dehydration, and physical performance) Analyzing the negative impact that alcohol, tobacco, and other drugs have on the user, friends, family members, and community members Evaluating a variety of stress management techniques for effectiveness

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> (To be determined by PE Teacher) Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Evaluating some personal diet choices and predicting future health based on current practices Identifying and describing symptoms of thirst and dehydration Analyzing some of the negative impact that alcohol, tobacco, and other drugs have on the user, friends, family members, and community members Evaluating some stress management techniques for effectiveness
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

PHYSICAL FITNESS AND WELLNESS
Measurement Topic: Teamwork and Sportsmanship
 Grade Eight

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> Exhibiting winning and losing gracefully in physical activity context Demonstrating respect for and encouragement of others while participating in physical activity context Analyzing how “fair play” contributes to successful group and team experiences in physical activity context (regardless of winning or losing)

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> (To be determined by PE Teacher) Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Exhibiting winning and losing gracefully in physical activity context with limited frequency Demonstrating respect for and encouragement of others while participating in physical activity context some of the time Identifying the rules of the game and recognizing how those rules affect “fair play”
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

Vertical Alignment for the Measurement Topic: <i>Movement and Movement Patterns</i>	
Grade Eight	<ul style="list-style-type: none"> Combine and refine fundamental techniques in complex physical activities and games Create and perform rhythmic movement patterns that demonstrate steady beat, tempo and phrasing of music
Grade Seven	<ul style="list-style-type: none"> Demonstrate a movement sequence for a variety of physical activities and games Perform complex combinations of movement forms in various sports and rhythmic activities
Grade Six	<ul style="list-style-type: none"> Perform advanced forms in locomotor, non-locomotor, and manipulative skills (e.g., dribble a basketball around objects using either hand with control) Demonstrate competency in more specialized movement skills related to specific physical activities
Grade Five	<ul style="list-style-type: none"> Demonstrate integration of locomotor, non-locomotor movements in complex patterns Demonstrate ability to manipulate objects to participate in games and activities Perform complex rhythmic skills alone and with a partner
Grade Four	<ul style="list-style-type: none"> Perform locomotor, non-locomotor and manipulative skills combinations in movement patterns Perform combinations of movement skills, with and with manipulative equipment, to perform specific sport skills Demonstrate complex patterns of movement with and without specific rhythms
Grade Three	<ul style="list-style-type: none"> Perform locomotor and manipulative skills with variations (e.g., vertical and horizontal jumping, throwing a ball with two hands, underhand, side arm) Demonstrate use of manipulative equipment combined with movement skills to perform specific sport skills Perform movement skills and patterns following specific rhythms (e.g., pass and catch with a partner in rhythm to music)
Grade Two	<ul style="list-style-type: none"> Perform locomotor and manipulative skills in combinations (e.g., run and kick a ball; swing and jump over a jump rope) Perform stability skills in combinations (e.g., walk on a balance beam, stand on one leg while balanced on an object; bear walk; crab walk; forward roll) Perform fundamental movements to rhythmic beats (e.g., jumping rope to a consistent beat, using locomotor skills to move to music; simple dance steps)
Grade One	<ul style="list-style-type: none"> Perform locomotor skills in basic combinations Perform non-locomotor skills with increasing coordination Perform skills to manipulate objects demonstrating increased control Move in different directions using a variety of locomotor movements
Kindergarten	<ul style="list-style-type: none"> Perform basic locomotor skills (see Appendix) Perform basic non-locomotor skills(see Appendix) Perform basic skills to manipulate objects (hand-eye coordination) Move in different directions using a variety of locomotor movements

Vertical Alignment for the Measurement Topic: <i>Movement Concepts</i>	
Grade Eight	<ul style="list-style-type: none"> • Correct unsafe situations related to participation in physical activities • Demonstrate and describe variations of movement skills that occur in specific sports (locomotor, non-locomotor, manipulative) • Describe basic physics principles that are utilized in specific sports (e.g., action-reaction, trajectory, linear velocity)
Grade Seven	<ul style="list-style-type: none"> • Analyze movement and safety techniques that improve performance in specific sports • Explain and apply the idea that practice of movement skills improves performance • Analyze strategies for offense and defense in specific sports
Grade Six	<ul style="list-style-type: none"> • Analyze movement and safety techniques to improve performance • Identify movement concepts utilized to refine movement skills (e.g., timing and power improves performance) • Demonstrate and describe critical elements of complex movement patterns that combine multiple skills and integrate manipulative equipment • Demonstrate and describe strategies for offense and defense in games
Grade Five	<ul style="list-style-type: none"> • Explain the importance of safe movement techniques when performing individually or with others • Recognize and describe critical elements of complex movement patterns that combine multiple skills • Observe the performance of others and provide appropriate feedback to help others improve skills • Perform varying strategies for offense and defense in basic games
Grade Four	<ul style="list-style-type: none"> • Demonstrate and describe safety with manipulative equipment during physical activities and games • Demonstrate and describe critical elements of basic movement patterns for movement skills (e.g., when dribbling a ball) • Integrate appropriate game-playing strategies in a variety of contexts
Grade Three	<ul style="list-style-type: none"> • Demonstrate safe and efficient movement techniques during physical activities and games • Demonstrate and describe various forms of balance • Demonstrate and describe basic game-playing strategies
Grade Two	<ul style="list-style-type: none"> • Demonstrate knowledge of efficient and safe movement techniques when working with a partner or group • Demonstrate efficient movement with objects that provide balance, change of direction, and spatial awareness challenges • Understand and demonstrate basic game-playing strategies
Grade One	<ul style="list-style-type: none"> • Identify techniques for efficient and safe movement during physical activities • Demonstrate variations in movement by changing directions (left, right, back, forward); speeds (slow, medium, fast); and patterns (straight, zig-zag, curved) • Recognize and describe the basic rules of games played as a part of physical activity
Kindergarten	<ul style="list-style-type: none"> • Demonstrate awareness of personal space by moving safely and purposefully • Demonstrate basic movement vocabulary (directional vocabulary such as forward, backward, sideways, left, right; spatial vocabulary such as high, low, under, over; temporal vocabulary such as fast and slow) • Follows simple directions for basic games and activities

Vertical Alignment for the Measurement Topic: <i>Personal Fitness</i>	
Grade Eight	<ul style="list-style-type: none"> Assess personal fitness levels and develop a plan to maintain or improve all fitness components Evaluate progress on fitness components based on personal plan
Grade Seven	<ul style="list-style-type: none"> Utilize self-assessment of physical fitness to identify strengths and weaknesses to develop a personal fitness plan Demonstrate importance all of components of physical fitness to achieve a healthy level of physical fitness
Grade Six	<ul style="list-style-type: none"> Measure and develop personal goals for physical fitness components Demonstrate increasing intensity and duration of an activity while performing locomotor skills
Grade Five	<ul style="list-style-type: none"> Establish personal goals to achieve physical fitness levels in all fitness components Demonstrate appropriate levels of muscular strength and endurance for major muscle groups Perform exercise or activities that improve specific fitness components
Grade Four	<ul style="list-style-type: none"> Demonstrate strategies to determine specific levels of fitness (e.g., heart rate, muscle strength) Establish person goals for physical fitness levels in specific fitness components Describe exercises or activities that improve specific fitness components
Grade Three	<ul style="list-style-type: none"> Identify strength and areas for improvement of health-related physical fitness Define and develop components of health-related physical fitness (cardiorespiratory, muscular strength, muscular endurance, flexibility)
Grade Two	<ul style="list-style-type: none"> Describe the components of health-related physical fitness (e.g., flexibility, strong muscles, endurance) Demonstrate increasing levels of flexibility and strength through a variety of activities Understand and perform various high, medium, and low intensity activities to develop cardio-respiratory endurance
Grade One	<ul style="list-style-type: none"> Describe the basic effect of physical activity on muscles, including the heart (e.g., as your activity increases, the heart rate increases) Demonstrate activities that increase flexibility and strength (e.g., squats, lunges, sprints, touching toes, hanging on bars) Demonstrate endurance by engaging in physically challenging activities for increasingly longer periods of time
Kindergarten	<ul style="list-style-type: none"> Describe how increased activity affects the body (heart beating faster, breathing faster, tired muscles) Build endurance through increased activity (e.g., move continuously for one minute, hold own body weight for 5 seconds)

Vertical Alignment for the Measurement Topic: <i>Health Concepts for Life</i>	
Grade Eight	<ul style="list-style-type: none"> • Evaluate personal diet choices and predict future health based on current practices (i.e. in relation to the food pyramid, recommended portions, and intake of essential nutrients) • Evaluate personal water intake (i.e. in relation to symptoms of thirst, dehydration, and physical performance) • Analyze the negative impact that alcohol, tobacco, and other drugs have on the user, friends, family members, and community members • Evaluate a variety of stress management techniques for effectiveness
Grade Seven	<ul style="list-style-type: none"> • Analyze essential nutrients for the body (i.e. sources of nutrients, uses of each in the body, symptoms of deficiencies) • Describe the physiological effects of inadequate and adequate water intake • Explain the short- and long- term effects of caffeine, alcohol, tobacco, marijuana, pain killers, and performance-enhancing drugs • Evaluate personal stress and stress management abilities
Grade Six	<ul style="list-style-type: none"> • Explain how exercise and intake relate to balanced weight • Investigate and describe how physical performance is affected by water intake • Demonstrate effective refusal skills to counter pressure to use alcohol, tobacco, or other drugs • Distinguish between healthy and unhealthy stress management techniques
Grade Five	<ul style="list-style-type: none"> • Explain how healthy food provides energy for physical activity • Demonstrate adequate daily water intake • Describe health benefits from abstaining from or stopping tobacco use • Distinguish between signs of healthy stress and unhealthy stress
Grade Four	<ul style="list-style-type: none"> • Describe the food groups and recommended portions from each • Describe indicators of dehydration • Describe the long-term effects of using tobacco • Explain health risks associated with stress
Grade Three	<ul style="list-style-type: none"> • Identify the categories of the food pyramid • Compare the health benefits of drinking water to other beverages • Describe the negative effects of using alcohol, caffeine, and tobacco • Explain the relationship between enjoyable activities and reduced stress
Grade Two	<ul style="list-style-type: none"> • Describe a balanced diet • Explain how much water intake is essential for a healthy body • Distinguish between “use” and “abuse” of products such as alcohol, caffeine, prescription drugs • Identify the benefits of physical activity and healthy behaviors to well-being (i.e., health benefits, emotional benefits)
Grade One	<ul style="list-style-type: none"> • Explain the connection between healthy food and a healthy body • Describe indicators of thirst • Identify products that can be harmful to the body if ingested, or inhaled, including OTC/prescription drugs, alcohol and tobacco • Describe the feelings that result from participation in physical activity (i.e., emotional, physical)
Kindergarten	<ul style="list-style-type: none"> • Recognize healthy and unhealthy foods • Describe the necessity of drinking water daily • Identify household products that are harmful to the body if ingested, or inhaled • Identify the feelings that result from participation in physical activity (e.g., happy, tired, excited)

Vertical Alignment for the Measurement Topic: <i>Teamwork and Sportsmanship</i>	
Grade Eight	<ul style="list-style-type: none"> • Exhibit winning and losing gracefully in physical activity context • Demonstrate respect for and encouragement of others while participating in physical activity context • Analyze how “fair play” contributes to successful group and team experiences in physical activity context (regardless of winning or losing)
Grade Seven	<ul style="list-style-type: none"> • Demonstrate responsibility for being part of a team and strive to make contributions to team success • Contribute to the development of and adherence to rules that provide of safe and enjoyable participation in group and team experiences in physical activity context
Grade Six	<ul style="list-style-type: none"> • Demonstrate willingness to participate in cooperative games that require a contribution from all team members • Apply rules of a game to ensure personal and group enjoyment when participating in group or team activities
Grade Five	<ul style="list-style-type: none"> • Demonstrate appreciation of the accomplishments of all members in a group or team context • Exhibit a positive attitude when learning a new skill in individual and group contexts • Demonstrate willingness to resolve conflict when participating in groups or teams
Grade Four	<ul style="list-style-type: none"> • Demonstrate interdependence to achieve a goal in a group or team context • Demonstrate positive qualities of a competent and enthusiastic player when participating in groups or teams (e.g., accept partners and teammates regardless of personal differences • Describe how the rules of a game ensures “fair play”
Grade Three	<ul style="list-style-type: none"> • Exhibit positive attitudes about participation in physical activity including in groups or teams • Demonstrate patience with self and others when applying new skills while participating in groups or teams • Follow rules of a game when participating in groups or teams
Grade Two	<ul style="list-style-type: none"> • Work with others towards a common goal • Demonstrate a willingness to participate with others of various abilities • Identify and demonstrate “fair play”
Grade One	<ul style="list-style-type: none"> • Participate with partners or teams during activities • Show a willingness to play along-side others • Explain the importance of following game rules (e.g., safety, fairness, organization)
Kindergarten	<ul style="list-style-type: none"> • Take turns and work with partners or teams during activities • Share equipment with others

NHA EXEMPLARS

Movement and Concept Development

Movement and Movement Patterns
Movement Concepts

Physical Fitness and Wellness

Personal Fitness
Health Concepts for Life
Teamwork and Sportsmanship

NHA Physical Education Exemplar: Movement and Concept Development

Grade One

NHA Objectives

Measurement Topic: Movement and Movement Patterns

- Perform locomotor skills in basic combinations
- Perform non-locomotor skills with increasing coordination
- Perform skills to manipulate objects demonstrating increased control
- Move in different directions using a variety of locomotor movements

Measurement Topic: Movement Concepts

- Identify techniques for efficient and safe movement during physical activities
- Demonstrate variations in movement by changing directions (left, right, back, forward); speeds (slow, medium, fast); and patterns (straight, zig-zag, curved)
- Recognize and describe the basic rules of games played as a part of physical activity

NHA Physical Education Exemplar: Physical Fitness and Wellness

Grade One

NHA Objectives

Measurement Topic: Personal Fitness

- Describe the basic effect of physical activity on muscles, including the heart (e.g., as your activity increases, the heart rate increases)
- Demonstrate activities that increase flexibility and strength (e.g., squats, lunges, sprints, touching toes, hanging on bars)
- Demonstrate endurance by engaging in physically challenging activities for increasingly longer periods of time

Measurement Topic: Health Concepts for Life

- Explain the connection between healthy food and a healthy body
- Describe indicators of thirst
- Identify products that can be harmful to the body if ingested, or inhaled, including OTC/prescription drugs, alcohol and tobacco
- Describe the feelings that result from participation in physical activity (i.e., emotional, physical)

Measurement Topic: Teamwork and Sportsmanship

- Participate with partners or teams during activities
- Show a willingness to play along-side others
- Explain the importance of following game rules (e.g., safety, fairness, organization)

Grade Two Physical Education

Movement and Concept Development

Movement and Movement Patterns
Movement Concepts

Physical Fitness and Wellness

Personal Fitness
Health Concepts for Life
Teamwork and Sportsmanship

NHA Physical Education Exemplar: Movement and Concept Development

Grade Two

NHA Objectives

Measurement Topic: Movement and Movement Patterns

- Perform locomotor and manipulative skills in combinations (e.g., run and kick a ball; swing and jump over a jump rope)
- Perform stability skills in combinations (e.g., walk on a balance beam, stand on one leg while balanced on an object; bear walk; crab walk; forward roll)
- Perform fundamental movements to rhythmic beats (e.g., jumping rope to a consistent beat, using locomotor skills to move to music; simple dance steps)

Measurement Topic: Movement Concepts

- Demonstrate knowledge of efficient and safe movement techniques when working with a partner or group
- Demonstrate efficient movement with objects that provide balance, change of direction, and spatial awareness challenges
- Understand and demonstrate basic game-playing strategies

NHA Physical Education Exemplar: Physical Fitness and Wellness

Grade Two

NHA Objectives

Measurement Topic: Personal Fitness

- Describe the components of health-related physical fitness (e.g., flexibility, strong muscles, endurance)
- Demonstrate increasing levels of flexibility and strength through a variety of activities
- Understand and perform various high, medium, and low intensity activities to develop cardio-respiratory endurance

Measurement Topic: Health Concepts for Life

- Describe a balanced diet
- Explain how much water intake is essential for a healthy body
- Distinguish between “use” and “abuse” of products such as alcohol, caffeine, prescription drugs
- Identify the benefits of physical activity and healthy behaviors to well-being (i.e., health benefits, emotional benefits)

Measurement Topic: Teamwork and Sportsmanship

- Work with others towards a common goal
- Demonstrate a willingness to participate with others of various abilities
- Identify and demonstrate “fair play”

Health Concepts for Life
Teamwork and Sportsmanship

NHA Physical Education Exemplar: Movement and Concept Development

Grade Three

NHA Objectives

Measurement Topic: Movement and Movement Patterns

- Perform locomotor and manipulative skills with variations (e.g., vertical and horizontal jumping, throwing a ball with two hands, underhand, side arm)
- Demonstrate use of manipulative equipment combined with movement skills to perform specific sport skills
- Perform movement skills and patterns following specific rhythms (e.g., pass and catch with a partner in rhythm to music)

Measurement Topic: Movement Concepts

- Demonstrate safe and efficient movement techniques during physical activities and games
- Demonstrate and describe various forms of balance
- Demonstrate and describe basic game-playing strategies

NHA Physical Education Exemplar: Physical Fitness and Wellness

Grade Three

NHA Objectives

Measurement Topic: Personal Fitness

- Identify strength and areas for improvement of health-related physical fitness
- Define and develop components of health-related physical fitness (cardio-respiratory, muscular strength, muscular endurance, flexibility)

Measurement Topic: Health Concepts for Life

- Identify the categories of the food pyramid
- Compare the health benefits of drinking water to other beverages
- Describe the negative effects of using alcohol, caffeine, and tobacco
- Explain the relationship between enjoyable activities and reduced stress

Measurement Topic: Teamwork and Sportsmanship

- Exhibit positive attitudes about participation in physical activity including in groups or teams
- Demonstrate patience with self and others when applying new skills while participating in groups or teams
- Follow rules of a game when participating in groups or teams

NHA Physical Education Exemplar: Movement and Concept Development

Grade Four

NHA Objectives

Measurement Topic: Movement and Movement Patterns

- Perform locomotor, non-locomotor and manipulative skills combinations in movement patterns
- Perform combinations of movement skills, with and with manipulative equipment, to perform specific sport skills
- Demonstrate complex patterns of movement with and without specific rhythms

Measurement Topic: Movement Concepts

- Demonstrate and describe safety with manipulative equipment during physical activities and games
- Demonstrate and describe critical elements of basic movement patterns for movement skills (e.g., when dribbling a ball)
- Integrate appropriate game-playing strategies in a variety of contexts

NHA Physical Education Exemplar: Physical Fitness and Wellness

Grade Four

NHA Objectives

Measurement Topic: Personal Fitness

- Demonstrate strategies to determine specific levels of fitness (e.g., heart rate, muscle strength)
- Establish person goals for physical fitness levels in specific fitness components
- Describe exercises or activities that improve specific fitness components

Measurement Topic: Health Concepts for Life

- Describe the food groups and recommended portions from each
- Describe indicators of dehydration
- Describe the long-term effects of using tobacco
- Explain health risks associated with stress

Measurement Topic: Teamwork and Sportsmanship

- Demonstrate interdependence to achieve a goal in a group or team context
- Demonstrate positive qualities of a competent and enthusiastic player when participating in groups or teams (e.g., accept partners and teammates regardless of personal differences)
- Describe how the rules of a game ensures “fair play”

Movement Concepts

Physical Fitness and Wellness

Personal Fitness
Health Concepts for Life
Teamwork and Sportsmanship

NHA Physical Education Exemplar: Movement and Concept Development

Grade Five

NHA Objectives

Measurement Topic: Movement and Movement Patterns

- Demonstrate integration of locomotor, non-locomotor movements in complex patterns
- Demonstrate ability to manipulate objects to participate in games and activities
- Perform complex rhythmic skills alone and with a partner

Measurement Topic: Movement Concepts

- Explain the importance of safe movement techniques when performing individually or with others
- Recognize and describe critical elements of complex movement patterns that combine multiple skills
- Observe the performance of others and provide appropriate feedback to help others improve skills
- Perform varying strategies for offense and defense in basic games

NHA Physical Education Exemplar: Physical Fitness and Wellness

Grade Five

NHA Objectives

Measurement Topic: Personal Fitness

- Establish personal goals to achieve physical fitness levels in all fitness components
- Demonstrate appropriate levels of muscular strength and endurance for major muscle groups
- Perform exercise or activities that improve specific fitness components

Measurement Topic: Health Concepts for Life

- Explain how healthy food provides energy for physical activity
- Demonstrate adequate daily water intake
- Describe health benefits from abstaining from or stopping tobacco use
- Distinguish between signs of healthy stress and unhealthy stress

Measurement Topic: Teamwork and Sportsmanship

- Demonstrate appreciation of the accomplishments of all members in a group or team context
- Exhibit a positive attitude when learning a new skill in individual and group contexts
- Demonstrate willingness to resolve conflict when participating in groups or teams

Grade Six Physical Education

Movement and Movement Patterns
Movement Concepts

Physical Fitness and Wellness

Personal Fitness
Health Concepts for Life
Teamwork and Sportsmanship

NHA Physical Education Exemplar: Movement and Concept Development

Grade Six

NHA Objectives

Measurement Topic: Movement and Movement Patterns

- Perform advanced forms in locomotor, non-locomotor, and manipulative skills (e.g., dribble a basketball around objects using either hand with control)
- Demonstrate competency in more specialized movement skills related to specific physical activities

Measurement Topic: Movement Concepts

- Analyze movement and safety techniques to improve performance
- Identify movement concepts utilized to refine movement skills (e.g., timing and power improves performance)
- Demonstrate and describe critical elements of complex movement patterns that combine multiple skills and integrate manipulative equipment
- Demonstrate and describe strategies for offense and defense in games

NHA Physical Education Exemplar: Physical Fitness and Wellness

Grade Six

NHA Objectives

Measurement Topic: Personal Fitness

- Measure and develop personal goals for physical fitness components
- Demonstrate increasing intensity and duration of an activity while performing locomotor skills

Measurement Topic: Health Concepts for Life

- Explain how exercise and intake relate to balanced weight
- Investigate and describe how physical performance is affected by water intake
- Demonstrate effective refusal skills to counter pressure to use alcohol, tobacco, or other drugs
- Distinguish between healthy and unhealthy stress management techniques

Measurement Topic: Teamwork and Sportsmanship

- Demonstrate willingness to participate in cooperative games that require a contribution from all team members
- Apply rules of a game to ensure personal and group enjoyment when participating in group or team activities

Movement and Movement Patterns
Movement Concepts

Physical Fitness and Wellness

Personal Fitness
Health Concepts for Life
Teamwork and Sportsmanship

NHA Physical Education Exemplar: Movement and Concept Development

Grade Seven

NHA Objectives

Measurement Topic: Movement and Movement Patterns

- Demonstrate a movement sequence for a variety of physical activities and games
- Perform complex combinations of movement forms in various sports and rhythmic activities

Measurement Topic: Movement Concepts

- Analyze movement and safety techniques that improve performance in specific sports
- Explain and apply the idea that practice of movement skills improves performance
- Analyze strategies for offense and defense in specific sports

NHA Physical Education Exemplar: Physical Fitness and Wellness

Grade Seven

NHA Objectives

Measurement Topic: Personal Fitness

- Utilize self-assessment of physical fitness to identify strengths and weaknesses to develop a personal fitness plan
- Demonstrate importance all of components of physical fitness to achieve a healthy level of physical fitness

Measurement Topic: Health Concepts for Life

- Analyze essential nutrients for the body (i.e. sources of nutrients, uses of each in the body, symptoms of deficiencies)
- Describe the physiological effects of inadequate and adequate water intake
- Explain the short- and long- term effects of caffeine, alcohol, tobacco, marijuana, pain killers, and performance-enhancing drugs
- Evaluate personal stress and stress management abilities

Measurement Topic: Teamwork and Sportsmanship

- Demonstrate responsibility for being part of a team and strive to make contributions to team success
- Contribute to the development of and adherence to rules that provide of safe and enjoyable participation in group and team experiences in physical activity context

Grade Eight Physical Education

NATIONAL HERITAGE ACADEMIES CURRICULUM Physical Education

Movement and Concept Development

Movement and Movement Patterns
Movement Concepts

Physical Fitness and Wellness

Personal Fitness
Health Concepts for Life
Teamwork and Sportsmanship

NHA Physical Education Exemplar: Movement and Concept Development

Grade Eight

NHA Objectives

Measurement Topic: Movement and Movement Patterns

- Combine and refine fundamental techniques in complex physical activities and games
- Create and perform rhythmic movement patterns that demonstrate steady beat, tempo and phrasing of music

Measurement Topic: Movement Concepts

- Correct unsafe situations related to participation in physical activities
- Demonstrate and describe variations of movement skills that occur in specific sports (locomotor, non-locomotor, manipulative)
- Describe basic physics principles that are utilized in specific sports (e.g., action-reaction, trajectory, linear velocity)

NHA Physical Education Exemplar: Physical Fitness and Wellness

Grade Eight

NHA Objectives

Measurement Topic: Personal Fitness

- Assess personal fitness levels and develop a plan to maintain or improve all fitness components
- Evaluate progress on fitness components based on personal plan

Measurement Topic: Health Concepts for Life

- Evaluate personal diet choices and predict future health based on current practices (i.e. in relation to the food pyramid, recommended portions, and intake of essential nutrients)
- Evaluate personal water intake (i.e. in relation to symptoms of thirst, dehydration, and physical performance)
- Analyze the negative impact that alcohol, tobacco, and other drugs have on the user, friends, family members, and community members
- Evaluate a variety of stress management techniques for effectiveness

Measurement Topic: Teamwork and Sportsmanship

- Exhibit winning and losing gracefully in physical activity context
- Demonstrate respect for and encouragement of others while participating in physical activity context
- Analyze how “fair play” contributes to successful group and team experiences in physical activity context (regardless of winning or losing)

VISUAL ARTS

Interaction of Disciplines

Developing knowledge and skills in each discipline requires the application of strategies, and content from other disciplines.

Art knowledge and skill is developed through the application of perceiving art, producing art, and, learning about art in the historical, cultural and social contexts of their everyday existence. It requires of students the tasks of communicating ideas, evaluating works and connecting the arts to other disciplines in life. This involves using a variety of skill and strategies inherent in ELA, Math, History & Technology.

NHA Exemplar: Art Expression

The student will develop and expand their knowledge/skills in the visual arts through the use of media, techniques, and processes to express their own ideas creatively in artwork. The student will analyze, assess, judge merit and derive meaning from works of art, including their own, according to the elements of art, the principles of design, and aesthetic qualities.

NHA Exemplar: Art Connections

The student will demonstrate knowledge of artists, art history, and world cultures by investigating works of art from different times and places. The student will apply their knowledge of visual arts to other disciplines and everyday life

General Scoring Scales	
Score 4.0:	The student demonstrates learning that <i>goes beyond</i> what was taught in class.
Score 3.5:	The student attempts to go beyond what was taught in class, but is <i>only partially successful</i> .
Score 3.0:	The student is meeting learning goals at their grade level. This is the expected level of learning.
Score 2.5:	The student understands basic information and is <i>partially successful</i> in meeting grade level learning goals.
Score 2.0:	The student understands basic details and processes but is not yet successful in meeting grade-level learning goals.
Score 1.5:	The student is beginning to perform basic skills but <i>needs some assistance</i> .
Score 1.0:	The student can perform basic skills but <i>only with teacher assistance</i> .
Score 0.5:	The student can perform <i>some basic skills</i> but only with teacher assistance.
Score 0:	The student cannot perform basic skills even with teacher assistance.

ART EXPRESSION
Measurement Topic: Art Creation
 Kindergarten

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	Advanced grade level performance
3.5	Mastered grade level, some advanced grade level performance
Score 3.0	Mastered grade level expectations by: <ul style="list-style-type: none"> Identifying and using basic art materials (see Appendix) Using basic skills and processes to produce works (see Appendix) Using appropriate vocabulary to name various art forms (painting, drawing, sculpture) Following step-by step directions to create works using ideas from environment, experience, and imagination (2D and 3D) Using art materials and tools in a safe and appropriate manner

2.5	Basic understanding secure, progressing toward mastery
Score 2.0	Basic understanding achieved such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> Media example: paint (see Appendix) Process example: stamping (See Appendix) Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Using basic art materials to create artwork Using some basic art techniques, either in isolation or to create larger works Naming limited number of basic art forms Following directions to create different artworks or techniques Following procedures and using materials appropriately most of the time
1.5	Basic understanding, with some assistance
1.0	Basic understanding, only with assistance
0.5	Some basic understanding, only with assistance

Score 3.0	Mastered grade level expectations by: <ul style="list-style-type: none"> Identifying art in other subject areas (illustrations in stories, shapes in math, paintings of famous people or events in social studies, symbols of our country)

2.5	Basic understanding secure, progressing toward mastery
Score 2.0	Basic understanding achieved such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> (Integrate Content Area Academic Vocabulary whenever possible) Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Recognizing connections between art and some subject areas
1.5	Basic understanding, with some assistance
1.0	Basic understanding, only with assistance
0.5	Some basic understanding, only with assistance

Appendix
Recommended Media and Processes
Grades K-2

Drawing

Media: pencils, markers, chalks and chalk pastels, crayons

Processes: contour line, rendering, sketching

Painting

Media: tempera, finger paint, watercolor crayons, watercolor; variety of brushes and paint applicators

Processes: brush techniques, wet-on-wet, wet-on-dry, sponge, wash

Printmaking

Media: found objects, printing ink, polystyrene foam, stencil

Processes: stamping, monoprint, rubbings, stenciling, relief

Ceramics

Media: modeling clay, clay substitutes, pottery clay, glazes, stains, paint

Processes: pinch and pulled forms, slab, imprinted decoration, coil, surface decoration techniques

Sculpture/Architecture/Jewelry

Media: paper, clay, plaster, fiber cardboard, wood, paper, foil, found objects, beads, polystyrene foam

Processes: carving, additive, subtractive, modeling, constructing

Fibers

Media: cloth, yarn, ribbon, found objects

Processes: pulling threads, weaving, stitchery, tying and wrapping techniques

Mixed Media

Media: tissue, photos, found objects, foil, fiber, paint, paper

Processes: collage, bas-relief

Alternative Media

Media: computer, camera, video, photography, film

Processes: computer processes such as draw, paint, save, edit, and print

Appendix
Recommended Media and Processes
Grades K-2

Drawing

Media: pencils, markers, chalks and chalk pastels, crayons

Processes: contour line, rendering, sketching

Painting

Media: tempera, finger paint, watercolor crayons, watercolor; variety of brushes and paint applicators

Processes: brush techniques, wet-on-wet, wet-on-dry, sponge, wash

Printmaking

Media: found objects, printing ink, polystyrene foam, stencil

Processes: stamping, monoprint, rubbings, stenciling, relief

Ceramics

Media: modeling clay, clay substitutes, pottery clay, glazes, stains, paint

Processes: pinch and pulled forms, slab, imprinted decoration, coil, surface decoration techniques

Sculpture/Architecture/Jewelry

Media: paper, clay, plaster, fiber cardboard, wood, paper, foil, found objects, beads, polystyrene foam

Processes: carving, additive, subtractive, modeling, constructing

Fibers

Media: cloth, yarn, ribbon, found objects

Processes: pulling threads, weaving, stitchery, tying and wrapping techniques

Mixed Media

Media: tissue, photos, found objects, foil, fiber, paint, paper

Processes: collage, bas-relief

Alternative Media

Media: computer, camera, video, photography, film

Processes: computer processes such as draw, paint, save, edit, and print

Appendix
Recommended Media and Processes
Grades 3-5

Drawing

Media: pencils, colored pencils, markers, crayons, oil pastels, chalk pastels

Processes: contour line, rendering, sketching, shading, crosshatching, stippling

Painting

Media: tempera, watercolor, watercolor crayons; a variety of surfaces, brushes, and paint applicators

Processes: wet-on-wet, wet-on-dry, sponge, wash, sponging, salting, and masking

Printmaking

Media: found objects, printing ink, polystyrene foam, stencil, textile ink, scratchboard

Processes: collograph, relief (linoleum cutting) frottage (rubbing), silkscreen, etching

Ceramics

Media: modeling clay, pottery clay, clay substitutes, glazes, stains, paint

Processes: pinch and pulled forms, slab, drape mold, coil, surface decoration techniques

Sculpture/Architecture/Jewelry

Media: paper, papier-mâché, clay, plaster, fiber cardboard, wood, foil, found objects, beads, wire, foam, sand, balsa

Processes: carving, additive, subtractive, modeling, constructing 2-D and 3-D objects, casting

Fibers

Media: cloth, yarn, ribbon, found objects, paper, reeds, rope, string

Processes: pulling threads, weaving, stitchery, tying and wrapping techniques, braiding, basketry

Mixed Media

Media: tissue, photos, found objects, foil, fiber, paint, paper

Processes: collage, bas-relief

Alternative Media

Media: computer, camera, video, photography, film

Processes: computer processes such as editing, creating color palettes, copy and paste, animation, and integration of other technology media

Processes: pinch and pulled forms, slab, drape mold, coil, surface decoration techniques, incising, scratching, wax resist, hand hewn

Sculpture/Architecture/Jewelry

Media: paper, papier-mâché, clay, plaster, fiber cardboard, wood, foil, found objects, beads, sand, balsa, wire, foam, copper, foam core

Processes: carving, additive, subtractive, modeling, constructing 2-D, 3-D and kinetic art, casting, enameling

Fibers

Media: cloth, yarn, batik wax and dyes, ribbon, found objects, paper, reeds, rope

Processes: pulling threads, weaving, stitchery, tying and wrapping techniques, braiding, basketry, tie-dye, quilting, batik

Mixed Media

Media: tissue, photos, found objects, foil, fiber, paint, paper

Processes: collage, bas-relief

Other Media

Media: computer, interactive computer programs, disposable camera, digital camera, video, photography, film

Processes: computer processes in various open source and commercial programs

Kindergarten Visual Arts

NATIONAL HERITAGE ACADEMIES CURRICULUM Visual Arts

NHA EXEMPLARS

Art Expression

Art Creation
Elements and Principles of Art and Design
Critical Analysis

Art Connections

History, Culture, and Society
Real World Connections
Connections to Other Disciplines

NHA Visual Arts Exemplar: Art Expression

The student will develop and expand their knowledge/skills in the visual arts through the use of media, techniques, and processes to express their own ideas creatively in artwork. The student will analyze, assess, judge merit and derive meaning from works of art, including their own, according to the elements of art, the principles of design, and aesthetic qualities.

Kindergarten

NHA Objectives

Measurement Topic: Art Creation

- Identify and use basic art materials (see Appendix)
- Use basic skills and processes to produce works (see Appendix)
- Use appropriate vocabulary to name various art forms (painting, drawing, sculpture)
- Follow step-by step directions to create works using ideas from environment, experience, and imagination (2D and 3D)
- Use art materials and tools in a safe and appropriate manner

Measurement Topic: Elements and Principles of Art and Design

- Identify and use basic elements of art (line, shape/form, color, texture, pattern) and describe characteristics of each (e.g., thick, thin, zigzag, circle, square, rectangle, smooth, bumpy, scratchy, etc.)
- Name and identify basic colors

Measurement Topic: Critical Analysis

- Discuss favorite artworks using appropriate vocabulary; explain why it is their favorite
- Find and describe images, objects, subjects, or symbols within artworks
- Recognize basic similarities and differences between artworks from different artists or of different styles
- Express feelings about their own artwork and the artwork of others

NHA Visual Arts Exemplar: Art Connections

The student will demonstrate knowledge of artists, art history, and world cultures by investigating works of art from different times and places. The student will apply their knowledge of visual arts to other disciplines and everyday life

Kindergarten

NHA Objectives

Measurement Topic: History, Culture, and Society

- Look at and discuss works of art from different artists, times, and places using words or pictures (see list of possible topics below)

Measurement Topic: Real World Connections

- Name reasons people make art
- Describe the job of an illustrator
- Name examples of art at home, at school, or in the community

Measurement Topic: Connections to Other Disciplines

- Identify art in other subject areas (illustrations in stories, shapes in math, paintings of famous people or events in social studies, symbols of our country)

Kindergarten Social Studies Topics: Native Americans, American Symbols, Colonial times

Appendix Recommended Media and Processes *Grades K-2*

Drawing

Media: pencils, markers, chalks and chalk pastels, crayons

Processes: contour line, rendering, sketching

Painting

Media: tempera, finger paint, watercolor crayons, watercolor; variety of brushes and paint applicators

Processes: brush techniques, wet-on-wet, wet-on-dry, sponge, wash

Printmaking

Media: found objects, printing ink, polystyrene foam, stencil

Processes: stamping, monoprint, rubbings, stenciling, relief

Ceramics

Media: modeling clay, clay substitutes, pottery clay, glazes, stains, paint

Processes: pinch and pulled forms, slab, imprinted decoration, coil, surface decoration techniques

Sculpture/Architecture/Jewelry

Media: paper, clay, plaster, fiber cardboard, wood, paper, foil, found objects, beads, polystyrene foam

Processes: carving, additive, subtractive, modeling, constructing

Fibers

Media: cloth, yarn, ribbon, found objects

Processes: pulling threads, weaving, stitchery, tying and wrapping techniques

Mixed Media

Media: tissue, photos, found objects, foil, fiber, paint, paper

Processes: collage, bas-relief

Alternative Media

Media: computer, camera, video, photography, film

Processes: computer processes such as draw, paint, save, edit, and print

Grade One Visual Arts

NATIONAL HERITAGE ACADEMIES CURRICULUM Visual Arts

NHA EXEMPLARS

Art Expression

Art Creation
Elements and Principles of Art and Design
Critical Analysis

Art Connections

History, Culture, and Society
Real World Connections
Connections to Other Disciplines

NHA Visual Arts Exemplar: Art Expression

The student will develop and expand their knowledge/skills in the visual arts through the use of media, techniques, and processes to express their own ideas creatively in artwork. The student will analyze, assess, judge merit and derive meaning from works of art, including their own, according to the elements of art, the principles of design, and aesthetic qualities.

Grade One

NHA Objectives

Measurement Topic: Art Creation

- Create artworks using a variety of materials (see Appendix)
- Use a variety of art techniques to produce works (see Appendix)
- Follow step-by-step directions to create works using ideas from the environment, experience, and imagination (2D and 3D)
- Use art materials and tools in a safe and appropriate manner

Measurement Topic: Elements and Principles of Art and Design

- Name and identify primary, secondary, warm and cool colors
- Make secondary colors from primary colors and explain the process; recognize black, gray, brown, and white
- Identify art elements in nature, in the environment, and in artworks such as line, shape, form, texture, and color
- Describe and create patterns and repetition in artwork

Measurement Topic: Critical Analysis

- Discuss artworks using appropriate vocabulary; focus on art elements such as line, shape, texture, color and space and the types of media used to create the artwork (paint, pencil, clay, etc.)
- Describe subject matter and feelings produced by art, and how the artist used art elements to express emotions (e.g., color to express feelings)
- Explain similarities and differences between two artworks based the same subject matter

NHA Visual Arts Exemplar: Art Connections

The student will demonstrate knowledge of artists, art history, and world cultures by investigating works of art from different times and places. The student will apply their knowledge of visual arts to other disciplines and everyday life

Grade One

NHA Objectives

Measurement Topic: History, Culture, and Society

- Look at and discuss works of art from different artists, times, and places (see list of possible topics below))
- Find similarities and differences between artwork from a variety of cultures

Measurement Topic: Real World Connections

- Describe different purposes for art (to illustrate, express feelings, for useful purposes, symbols)
- Identify objects at home, at school or in the community that were designed by artists (cars, buildings, furniture, posters, signs)

Measurement Topic: Connections to Other Disciplines

- Identify art concepts in other subject areas (finding and extending patterns in math; describing 2D and 3D figures; using positional words such as below, above, next to, left, right when describing an artwork; identifying triangles, rectangles, squares, parallelograms, rhomboids; relating familiar objects to 2D and 3D figures; paintings of famous people and events in social studies {Colonial America, ancient Latin America})

Grade Two Social Studies Topics: Ancient Civilizations of Mesopotamia, Egypt, Mayan, Aztec, and Incas; Colonial America

Appendix Recommended Media and Processes *Grades K-2*

Drawing

Media: pencils, markers, chalks and chalk pastels, crayons

Processes: contour line, rendering, sketching

Painting

Media: tempera, finger paint, watercolor crayons, watercolor; variety of brushes and paint applicators

Processes: brush techniques, wet-on-wet, wet-on-dry, sponge, wash

Printmaking

Media: found objects, printing ink, polystyrene foam, stencil

Processes: stamping, monoprint, rubbings, stenciling, relief

Ceramics

Media: modeling clay, clay substitutes, pottery clay, glazes, stains, paint

Processes: pinch and pulled forms, slab, imprinted decoration, coil, surface decoration techniques

Sculpture/Architecture/Jewelry

Media: paper, clay, plaster, fiber cardboard, wood, paper, foil, found objects, beads, polystyrene foam

Processes: carving, additive, subtractive, modeling, constructing

Fibers

Media: cloth, yarn, ribbon, found objects

Processes: pulling threads, weaving, stitchery, tying and wrapping techniques

Mixed Media

Media: tissue, photos, found objects, foil, fiber, paint, paper

Processes: collage, bas-relief

Alternative Media

Media: computer, camera, video, photography, film

Processes: computer processes such as draw, paint, save, edit, and print

Grade Two Visual Arts

NATIONAL HERITAGE ACADEMIES CURRICULUM Visual Arts

NHA EXEMPLARS

Art Expression

Art Creation
Elements and Principles of Art and Design
Critical Analysis

Art Connections

History, Culture, and Society
Real World Connections
Connections to Other Disciplines

NHA Visual Arts Exemplar: Art Expression

The student will develop and expand their knowledge/skills in the visual arts through the use of media, techniques, and processes to express their own ideas creatively in artwork. The student will analyze, assess, judge merit and derive meaning from works of art, including their own, according to the elements of art, the principles of design, and aesthetic qualities.

Grade Two

NHA Objectives

Measurement Topic: Art Creation

- Create artworks using a variety of materials (see Appendix)
- Use a variety of art techniques to produce works (see Appendix)
- Use art materials safely and appropriately; follow procedures to set up and clean up
- Demonstrate quality craftsmanship
- Create works using ideas from the environment, experience, and imagination (2D and 3D)

Measurement Topic: Elements and Principles of Art and Design

- Identify colors, shapes, lines, patterns, and textures and use appropriate vocabulary to describe subtle differences (e.g. blue-green, nubby, smooth, thick, fine, shaded, etc.)
- Use symmetry to create balance
- Create artwork using warm, cool, and neutral colors, and describe how these colors are used to express mood or evoke feelings

Measurement Topic: Critical Analysis

- Describe artworks using appropriate vocabulary; focus on art elements such as line, shape, texture, color and space, types of media used to create the artwork, and type of work produced (painting, collage, sculpture, mobile, found art, prints)
- Analyze their own artwork and the artwork of others for elements of art, expressive qualities, and quality of techniques
- Describe subject matter and feelings produced by art, and how the artist used art elements to express emotions (e.g., color to express feelings)
- Explain similarities and differences between two artworks based the same subject matter

NHA Visual Arts Exemplar: Art Connections

The student will demonstrate knowledge of artists, art history, and world cultures by investigating works of art from different times and places. The student will apply their knowledge of visual arts to other disciplines and everyday life

Grade Two

NHA Objectives

Measurement Topic: History, Culture, and Society

- Identify and describe works of art from different artists, times, and places (see list of possible topics below)
- Find similarities and differences between artwork from a variety of cultures, including cultures relevant to student's background
- Discuss the chronological order of art from different time periods

Measurement Topic: Real World Connections

- Describe different purposes for art (to commemorate an event, for celebration, to convey messages, and to communicate and evoke emotions)
- Identify art elements in artwork and objects at home, at school, and in the environment

Measurement Topic: Connections to Other Disciplines

- Identify art concepts in other subject areas (understanding the concept of balance from science; connection between the medium of clay and the properties of soil in science; the aesthetic structure of plants in science; combining or separating shapes to create new shapes in math; concept of symmetry in math;; paintings of famous people and events in social studies {China, ancient Greece, Westward expansion}; connections between of art in music, theatre and dance (tone, repetition, balance, rhythm)

Grade Two Social Studies Topics: Ancient China, Ancient Greece, Native Americans, Westward Expansion

Appendix Recommended Media and Processes *Grades K-2*

Drawing

Media: pencils, markers, chalks and chalk pastels, crayons

Processes: contour line, rendering, sketching

Painting

Media: tempera, finger paint, watercolor crayons, watercolor; variety of brushes and paint applicators

Processes: brush techniques, wet-on-wet, wet-on-dry, sponge, wash

Printmaking

Media: found objects, printing ink, polystyrene foam, stencil

Processes: stamping, monoprint, rubbings, stenciling, relief

Ceramics

Media: modeling clay, clay substitutes, pottery clay, glazes, stains, paint

Processes: pinch and pulled forms, slab, imprinted decoration, coil, surface decoration techniques

Sculpture/Architecture/Jewelry

Media: paper, clay, plaster, fiber cardboard, wood, paper, foil, found objects, beads, polystyrene foam

Processes: carving, additive, subtractive, modeling, constructing

Fibers

Media: cloth, yarn, ribbon, found objects

Processes: pulling threads, weaving, stitchery, tying and wrapping techniques

Mixed Media

Media: tissue, photos, found objects, foil, fiber, paint, paper

Processes: collage, bas-relief

Alternative Media

Media: computer, camera, video, photography, film

Processes: computer processes such as draw, paint, save, edit, and print

Grade Three Visual Arts

NATIONAL HERITAGE ACADEMIES CURRICULUM Visual Arts

NHA EXEMPLARS

Art Expression

Art Creation
Elements and Principles of Art and Design
Critical Analysis

Art Connections

History, Culture, and Society
Real World Connections
Connections to Other Disciplines

NHA Visual Arts Exemplar: Art Expression

The student will develop and expand their knowledge/skills in the visual arts through the use of media, techniques, and processes to express their own ideas creatively in artwork. The student will analyze, assess, judge merit and derive meaning from works of art, including their own, according to the elements of art, the principles of design, and aesthetic qualities.

Grade Three

NHA Objectives

Measurement Topic: Art Creation

- Create artworks using a variety of materials (see Appendix)
- Use a variety of art techniques to produce works(see Appendix)
- Use art materials safely and appropriately; follow procedures to set up and clean up
- Demonstrate quality craftsmanship
- Create works that replicate techniques or styles, express emotions, and communicate ideas or messages

Measurement Topic: Elements and Principles of Art and Design

- Identify, create and use secondary and intermediate colors
- Describe and create intensity and value of colors by using tints and shades
- Use symmetry and asymmetry for effect
- Apply art elements (line, shape, form, texture, space, and color) and art principles (repetition, proportion, balance) to create artwork
- Create artwork based on visual observation
- Identify and use geometric and organic shapes in artwork

Measurement Topic: Critical Analysis

- Describe artworks using appropriate vocabulary; focus on art elements and principles such as color, balance, repetition, proportion, types of media used to create the artwork, and type of work produced
- Analyze artworks and describe how artists use color to convey emotion or draw attention and repetition for movement and balance
- Compare size and position of objects in space and identify foreground, middle ground, background and details
- Categorize artwork as portrait, landscape, still life, or narrative (tells a story)
- Analyze their own artwork and the artwork of others for elements of art, expressive qualities, and quality of techniques

NHA Visual Arts Exemplar: Art Connections

The student will demonstrate knowledge of artists, art history, and world cultures by investigating works of art from different times and places. The student will apply their knowledge of visual arts to other disciplines and everyday life

Grade Three

NHA Objectives

Measurement Topic: History, Culture, and Society

- Identify and describe works of art from different artists, times, and places (see list of possible topics below)
- Find similarities and differences between artwork from a variety of cultures, including cultures relevant to student's background
- Recognize the purpose, significance, and relative chronological age of artworks from other places and times

Measurement Topic: Real World Connections

- Describe different purposes for art (to express ideas or emotions, to persuade, to tell a story)
- Identify artwork found in the community (monuments, stained glass, murals, billboards, buildings, sculptures)
- Describe occupations associated with art (advertiser, graphic designer, teacher, architect)

Measurement Topic: Connections to Other Disciplines

- Identify art concepts in other subject areas (properties of materials from science; combining or separating shapes to create new shapes in math; concept of symmetry in math; drawing lines, line segments, and rays in math; paintings of famous people and events in social studies {Ancient Rome, Middle Ages, Vikings, American Colonies}); properties of color and light in science; connections between art in music, theatre and dance (tone, repetition, balance, rhythm)

Grade Three Social Studies Topics: Ancient Rome, the Middle Ages, Vikings, American Colonies)

Appendix Recommended Media and Processes *Grades 3-5*

Drawing

Media: pencils, colored pencils, markers, crayons, oil pastels, chalk pastels

Processes: contour line, rendering, sketching, shading, crosshatching, stippling

Painting

Media: tempera, watercolor, watercolor crayons; a variety of surfaces, brushes, and paint applicators

Processes: wet-on-wet, wet-on-dry, sponge, wash, sponging, salting, and masking

Printmaking

Media: found objects, printing ink, polystyrene foam, stencil, textile ink, scratchboard

Processes: collograph, relief (linoleum cutting) frottage (rubbing), silkscreen, etching

Ceramics

Media: modeling clay, pottery clay, clay substitutes, glazes, stains, paint

Processes: pinch and pulled forms, slab, drape mold, coil, surface decoration techniques

Sculpture/Architecture/Jewelry

Media: paper, papier-mâché, clay, plaster, fiber cardboard, wood, foil, found objects, beads, wire, foam, sand, balsa

Processes: carving, additive, subtractive, modeling, constructing 2-D and 3-D objects, casting

Fibers

Media: cloth, yarn, ribbon, found objects, paper, reeds, rope, string

Processes: pulling threads, weaving, stitchery, tying and wrapping techniques, braiding, basketry

Mixed Media

Media: tissue, photos, found objects, foil, fiber, paint, paper

Processes: collage, bas-relief

Alternative Media

Media: computer, camera, video, photography, film

Processes: computer processes such as editing, creating color palettes, copy and paste, animation, and integration of other technology media

Grade Four Visual Arts

NATIONAL HERITAGE ACADEMIES CURRICULUM Visual Arts

NHA EXEMPLARS

Art Expression

Art Creation
Elements and Principles of Art and Design
Critical Analysis

Art Connections

History, Culture, and Society
Real World Connections
Connections to Other Disciplines

NHA Visual Arts Exemplar: Art Expression

The student will develop and expand their knowledge/skills in the visual arts through the use of media, techniques, and processes to express their own ideas creatively in artwork. The student will analyze, assess, judge merit and derive meaning from works of art, including their own, according to the elements of art, the principles of design, and aesthetic qualities.

Grade Four

NHA Objectives

Measurement Topic: Art Creation

- Create artworks using a variety of materials (see Appendix)
- Use a variety of art techniques to produce works(see Appendix)
- Use art materials safely and appropriately; follow procedures to set up and clean up
- Demonstrate quality craftsmanship
- Create works that replicate techniques or styles, express emotions, and communicate ideas or messages
- Create artwork using imagery, symbols, and color to express ideas, experiences, or emotions

Measurement Topic: Elements and Principles of Art and Design

- Create and use color characteristics of shade, tint, and intensity
- Identify complementary colors
- Use shading techniques to create dimensionality
- Draw human faces and forms with accurate proportions
- Identify and use positive and negative space in artwork
- Apply art elements (texture, space, and color) and art principles (variety, repetition, proportion, balance) to create artwork

Measurement Topic: Critical Analysis

- Describe artworks using appropriate vocabulary; focus on art elements and principles such as space, texture, repetition, proportion, types of media used to create the artwork, and type of work produced
- Analyze artworks and describe how artists use techniques to create texture, positive and negative space, and repetition or variety in a composition
- Identify common themes, subject matter, and ideas expressed across multiple works
- Categorize artwork as abstract, representational (realistic) and non-representational (non-objective)
- Analyze their own artwork and the artwork of others for elements of art, expressive qualities, and quality of techniques
- Describe the effective use of one element in an artwork using descriptive and sensory words

NHA Visual Arts Exemplar: Art Connections

The student will demonstrate knowledge of artists, art history, and world cultures by investigating works of art from different times and places. The student will apply their knowledge of visual arts to other disciplines and everyday life

Grade Four

NHA Objectives

Measurement Topic: History, Culture, and Society

- Describe the types of functional, narrative, or ceremonial artwork produced by different artists, times, and places (see list of possible topics below)
- Analyze the artwork of a famous artist from the state
- Categorize works of art based on style, subject matter, and regions

Measurement Topic: Real World Connections

- Describe different purposes for art (to express ideas or emotions, to persuade, narrative, functional)
- Identify artwork found in the community (monuments, stained glass, murals, billboards, buildings, sculptures)
- Recognize and describe occupations associated with art (museum curator, art historian, art critic, muralist)

Measurement Topic: Connections to Other Disciplines

- Identify art concepts in other subject areas (observation drawing in social studies and science; the purpose of color, pattern, and texture of animal adaptations in science; rhythm and pattern in math, music, movement, and language arts; symmetry, translations, reflections and rotations in math; landscape and seascape painting in science and social studies; and clay in science and social studies)

Grade Four Social Studies Topics: Native American cultures of the State; U.S. Regions; physical landforms (mountains) and bodies of water (oceans, lakes, rivers)

Recommended Media and Processes

Grades 3-5

Drawing

Media: pencils, colored pencils, markers, crayons, oil pastels, chalk pastels

Processes: contour line, rendering, sketching, shading, crosshatching, stippling

Painting

Media: tempera, watercolor, watercolor crayons; a variety of surfaces, brushes, and paint applicators

Processes: wet-on-wet, wet-on-dry, sponge, wash, sponging, salting, and masking

Printmaking

Media: found objects, printing ink, polystyrene foam, stencil, textile ink, scratchboard

Processes: collograph, relief (linoleum cutting) frottage (rubbing), silkscreen, etching

Ceramics

Media: modeling clay, pottery clay, clay substitutes, glazes, stains, paint

Processes: pinch and pulled forms, slab, drape mold, coil, surface decoration techniques

Sculpture/Architecture/Jewelry

Media: paper, papier-mâché, clay, plaster, fiber cardboard, wood, foil, found objects, beads, wire, foam, sand, balsa

Processes: carving, additive, subtractive, modeling, constructing 2-D and 3-D objects, casting

Fibers

Media: cloth, yarn, ribbon, found objects, paper, reeds, rope, string

Processes: pulling threads, weaving, stitchery, tying and wrapping techniques, braiding, basketry

Mixed Media

Media: tissue, photos, found objects, foil, fiber, paint, paper

Processes: collage, bas-relief

Alternative Media

Media: computer, camera, video, photography, film

Processes: computer processes such as editing, creating color palettes, copy and paste, animation, and integration of other technology media

Grade Five Visual Arts

NATIONAL HERITAGE ACADEMIES CURRICULUM Visual Arts

NHA EXEMPLARS

Art Expression

Art Creation
Elements and Principles of Art and Design
Critical Analysis

Art Connections

History, Culture, and Society
Real World Connections
Connections to Other Disciplines

NHA Visual Arts Exemplar: Art Expression

The student will develop and expand their knowledge/skills in the visual arts through the use of media, techniques, and processes to express their own ideas creatively in artwork. The student will analyze, assess, judge merit and derive meaning from works of art, including their own, according to the elements of art, the principles of design, and aesthetic qualities.

Grade Five

NHA Objectives

Measurement Topic: Art Creation

- Create artworks using a variety of materials (see Appendix)
- Use a variety of art techniques to produce works(see Appendix)
- Use art materials safely and appropriately; follow procedures to set up and clean up
- Demonstrate quality craftsmanship
- Create artwork to express emotions, and communicate ideas or messages
- Design and produce artwork using styles and techniques of different artists, and/or cultures past and present

Measurement Topic: Elements and Principles of Art and Design

- Use color characteristics in artwork (value {lightness or darkness}, hues, shades, tints, complementary colors, intermediate colors {tertiary}, contrast)
- Identify and use contrast, repetition, and variety in artwork
- Use perspective drawing (one point) and shading techniques to create dimensionality
- Apply art elements (line, shape, color, texture, form, and space) and art principles (variety, repetition, proportion, balance) to create artwork

Measurement Topic: Critical Analysis

- Describe artworks using appropriate vocabulary; focus on art elements and principles such as space, texture, repetition, proportion, value, types of media used to create the artwork, and type of work produced
- Analyze artworks and recognize the principle of unity in a composition
- Identify common themes, subject matter, and ideas expressed across multiple works from different time periods
- Compare size and position of objects in space and identify foreground, middle ground, background and details in 2D artwork
- Analyze their own artwork and the artwork of others for elements of art, expressive qualities, and quality of techniques

NHA Visual Arts Exemplar: Art Connections

The student will demonstrate knowledge of artists, art history, and world cultures by investigating works of art from different times and places. The student will apply their knowledge of visual arts to other disciplines and everyday life

Grade Five

NHA Objectives

Measurement Topic: History, Culture, and Society

- Describe the types of functional, narrative, or ceremonial artwork produced by different artists, times, and places (see list of possible topics below)
- Find similarities and differences between artwork from a variety of cultures, including cultures relevant to student's background
- Identify the influence of historic events on artists and their artwork

Measurement Topic: Real World Connections

- Identify the purpose of a variety of artworks found in the community (artistic expression, persuasive, narrative, functional, ceremonial)
- Identify artwork found in the community (architecture, posters, advertisements)
- Recognize and describe occupations associated with art (photographer, interior designer, fashion designer, animators)

Measurement Topic: Connections to Other Disciplines

- Identify art concepts in other subject areas (observation drawing in social studies and science; rhythm and pattern in math, music, movement, and language arts; symmetry, congruence, and transformation in math; and engineering design in science, math, and music; landscape and seascape painting in science and social studies; and clay in science and social studies)

Grade Five Social Studies Topics: Native American Cultures, American Colonies, Revolutionary Era, Westward Expansion, Civil War

Recommended Media and Processes *Grades 3-5*

Drawing

Media: pencils, colored pencils, markers, crayons, oil pastels, chalk pastels

Processes: contour line, rendering, sketching, shading, crosshatching, stippling

Painting

Media: tempera, watercolor, watercolor crayons; a variety of surfaces, brushes, and paint applicators

Processes: wet-on-wet, wet-on-dry, sponge, wash, sponging, salting, and masking

Printmaking

Media: found objects, printing ink, polystyrene foam, stencil, textile ink, scratchboard

Processes: collograph, relief (linoleum cutting) frottage (rubbing), silkscreen, etching

Ceramics

Media: modeling clay, pottery clay, clay substitutes, glazes, stains, paint

Processes: pinch and pulled forms, slab, drape mold, coil, surface decoration techniques

Sculpture/Architecture/Jewelry

Media: paper, papier-mâché, clay, plaster, fiber cardboard, wood, foil, found objects, beads, wire, foam, sand, balsa

Processes: carving, additive, subtractive, modeling, constructing 2-D and 3-D objects, casting

Fibers

Media: cloth, yarn, ribbon, found objects, paper, reeds, rope, string

Processes: pulling threads, weaving, stitchery, tying and wrapping techniques, braiding, basketry

Mixed Media

Media: tissue, photos, found objects, foil, fiber, paint, paper

Processes: collage, bas-relief

Alternative Media

Media: computer, camera, video, photography, film

Processes: computer processes such as editing, creating color palettes, copy and paste, animation, and integration of other technology media

Grade Six Visual Arts

NATIONAL HERITAGE ACADEMIES CURRICULUM Visual Arts

NHA EXEMPLARS

Art Expression

Art Creation
Elements and Principles of Art and Design
Critical Analysis

Art Connections

History, Culture, and Society
Real World Connections
Connections to Other Disciplines

NHA Visual Arts Exemplar: Art Expression

The student will develop and expand their knowledge/skills in the visual arts through the use of media, techniques, and processes to express their own ideas creatively in artwork. The student will analyze, assess, judge merit and derive meaning from works of art, including their own, according to the elements of art, the principles of design, and aesthetic qualities.

Grade Six

NHA Objectives

Measurement Topic: Art Creation

- Create artworks using a variety of materials (see Appendix)
- Use various techniques to produce a desired effect (see Appendix)
- Use art materials safely and appropriately; follow procedures to set up and clean up
- Demonstrate quality craftsmanship
- Create artwork to communicate ideas, personal experiences, and expression
- Use imagination, personal experience, and observation as sources for images and symbols

Measurement Topic: Elements and Principles of Art and Design

- Use color relationships from the color wheel in design
- Identify and use all the elements of art
- Create artwork that has visual and tactile texture
- Use perspective drawing (two point) and shading techniques to create dimensionality
- Understand and the effects of light on 3-D objects and apply in artwork (shadows, chiaroscuro)
- Apply art principles (variety, rhythm, proportion, texture) to create artwork

Measurement Topic: Critical Analysis

- Analyze artworks for elements of art and design principles, art techniques, and media and describe using appropriate vocabulary
- Understand the meaning of “aesthetics” as it pertains to art
- Describe sensory and emotional responses to artwork orally or in writing
- Interpret meanings derived from the images, symbols, techniques, art elements, or design principles used in artwork
- Evaluate their own artwork and the artwork of others for elements of art, expressive qualities, and quality of techniques

NHA Visual Arts Exemplar: Art Connections

The student will demonstrate knowledge of artists, art history, and world cultures by investigating works of art from different times and places. The student will apply their knowledge of visual arts to other disciplines and everyday life

Grade Six

NHA Objectives

Measurement Topic: History, Culture, and Society

- Identify major art movements and artists in culture and history
- Identify individual artist's style, including materials, design, methods, and subject matter
- Analyze the relationship between an artwork and the history, geography, and technology of a culture

Measurement Topic: Real World Connections

- Identify and describe uses of imagery in the environment (advertising, magazines, the Internet, movies, television)
- Describe places in the community that have functional and/or decorative art
- Recognize and describe occupations associated with art (videographer, art director for film and video, teacher)

Measurement Topic: Connections to Other Disciplines

- Identify art concepts in other subject areas (observation drawing in social studies and science; rhythm and pattern in math, music, movement, and language arts; translation, reflection, and rotation of shapes in math; engineering design in science, math, and music; and graphic display images of data in science and math; connections to literature in ELA)

Grade Six Social Studies Topics: Europe Studies, Latin American Studies (IN, MI, NC, NY, CO, LA, GA); or Middle East Studies, Asia Studies, Africa Studies, Canada Studies, Australian (South Pacific) Studies (OH)

Recommended Media and Processes

Grades 6-8

Drawing

Media: pencils, colored pencils, markers, ink, chalks, oil pastels, charcoals, oil pastels

Processes: contour line, rendering, sketching, value, shading, crosshatching, stippling, one- and two-point perspective

Painting

Media: tempera, watercolor, water-soluble oils, watercolor crayons; variety of surfaces, brushes and paint applicators

Processes: wet-on-wet, wet-on-dry, wash, resist, dry brush, watercolor techniques of sponging, salting, and masking

Printmaking

Media: found objects, printing ink, polystyrene foam, stencil, textile ink

Processes: calligraphic, collograph, silkscreen, etching, embossing, relief (linocuts)

Ceramics

Media: modeling clay, pottery clay, clay substitutes, glazes, stains, paint

Processes: pinch and pulled forms, slab, drape mold, coil, surface decoration techniques, incising, scratching, wax resist, hand hewn

Sculpture/Architecture/Jewelry

Media: paper, papier-mâché, clay, plaster, fiber cardboard, wood, foil, found objects, beads, sand, balsa, wire, foam, copper, foam core

Processes: carving, additive, subtractive, modeling, constructing 2-D, 3-D and kinetic art, casting, enameling

Fibers

Media: cloth, yarn, batik wax and dyes, ribbon, found objects, paper, reeds, rope

Processes: pulling threads, weaving, stitchery, tying and wrapping techniques, braiding, basketry, tie-dye, quilting, batik

Mixed Media

Media: tissue, photos, found objects, foil, fiber, paint, paper

Processes: collage, bas-relief

Other Media

Media: computer, interactive computer programs, disposable camera, digital camera, video, photography, film

Processes: computer processes in various open source and commercial programs

Grade Seven Visual Arts

NATIONAL HERITAGE ACADEMIES CURRICULUM Visual Arts

Elements and Principles of Art and Design
Critical Analysis

Art Connections

History, Culture, and Society
Real World Connections
Connections to Other Disciplines

NHA Visual Arts Exemplar: Art Expression

The student will develop and expand their knowledge/skills in the visual arts through the use of media, techniques, and processes to express their own ideas creatively in artwork. The student will analyze, assess, judge merit and derive meaning from works of art, including their own, according to the elements of art, the principles of design, and aesthetic qualities.

Grade Seven

NHA Objectives

Measurement Topic: Art Creation

- Create artwork by selecting media, techniques, and processes to produce desired effects (see Appendix)
- Use art materials safely and appropriately; follow procedures to set up and clean up
- Demonstrate quality craftsmanship
- Create illustrations to communicate ideas, personal experiences, and expression
- Use processes to create artwork, including sketches, drafts, and a connected series
- Use subjects, themes, images, and symbols to demonstrate meaning in artwork

Measurement Topic: Elements and Principles of Art and Design

- Use analogous, complementary, and monochromatic color schemes in artwork
- Create contrast using line variations including width, directionality, and implied line
- Create the illusion of movement in 2-D and 3-D artwork
- Use techniques to create depth, including: overlapping, perspective, diminishing size and detail, and object placement on the picture plane
- Produce effects of depth using value, color, and line
- Identify and use all the elements of art and principles of design (focus on form, movement, value, color, and line)

Measurement Topic: Critical Analysis

- Analyze artworks for elements of art and design principles, art techniques, and media and describe using appropriate vocabulary
- Generate questions about artwork; provide opinions, personal responses, and possible answers to questions about artwork
- Interpret meanings derived from the images, symbols, techniques, art elements, or design principles used in artwork
- Evaluate their own artwork and the artwork of others for elements of art, principles of design, expressive qualities, quality of techniques, and aesthetics

NHA Visual Arts Exemplar: Art Connections

The student will demonstrate knowledge of artists, art history, and world cultures by investigating works of art from different times and places. The student will apply their knowledge of visual arts to other disciplines and everyday life

Grade Seven

NHA Objectives

Measurement Topic: History, Culture, and Society

- Identify major art movements and artists in cultural context and history
- Identify individual artist's style, including materials, design, methods, and subject matter
- Compare and contrast the characteristics of two or more art forms that have similar subject matter, historical periods, or cultural context
- Describe how social and cultural beliefs influence responses to art

Measurement Topic: Real World Connections

- Identify and explain how art is used to influence and persuade in print and electronic media
- Identify characteristics of artwork in current culture and society, making personal connections (advertising, Internet, television, movies, video)
- Recognize and describe occupations associated with art (animator, web designer, package designer)

Measurement Topic: Connections to Other Disciplines

- Identify art concepts in other subject areas (observation and contour drawing in social studies and science; rhythm and pattern in math, music, movement, and language arts; linear drawings, angles, diagonals, characteristics of geometric shapes , transformations, and scaling of objects in math; engineering design, light, and motion in science; and graphic display images of data in science and math; connections to literature in ELA)

Grade Seven Social Studies Topics: Europe Studies, Latin American Studies (OH); or Middle East Studies, Asia Studies, Africa Studies, Canada Studies, Australian (South Pacific) Studies (IN, MI, NC, NY, CO, LA, GA)

Recommended Media and Processes

Grades 6-8

Drawing

Media: pencils, colored pencils, markers, ink, chalks, oil pastels, charcoals, oil pastels

Processes: contour line, rendering, sketching, value, shading, crosshatching, stippling, one- and two-point perspective

Painting

Media: tempera, watercolor, water-soluble oils, watercolor crayons; variety of surfaces, brushes and paint applicators

Processes: wet-on-wet, wet-on-dry, wash, resist, dry brush, watercolor techniques of sponging, salting, and masking

Printmaking

Media: found objects, printing ink, polystyrene foam, stencil, textile ink

Processes: calligraphic, collograph, silkscreen, etching, embossing, relief (linocuts)

Ceramics

Media: modeling clay, pottery clay, clay substitutes, glazes, stains, paint

Processes: pinch and pulled forms, slab, drape mold, coil, surface decoration techniques, incising, scratching, wax resist, hand hewn

Sculpture/Architecture/Jewelry

Media: paper, papier-mâché, clay, plaster, fiber cardboard, wood, foil, found objects, beads, sand, balsa, wire, foam, copper, foam core

Processes: carving, additive, subtractive, modeling, constructing 2-D, 3-D and kinetic art, casting, enameling

Fibers

Media: cloth, yarn, batik wax and dyes, ribbon, found objects, paper, reeds, rope

Processes: pulling threads, weaving, stitchery, tying and wrapping techniques, braiding, basketry, tie-dye, quilting, batik

Mixed Media

Media: tissue, photos, found objects, foil, fiber, paint, paper

Processes: collage, bas-relief

Other Media

Media: computer, interactive computer programs, disposable camera, digital camera, video, photography, film

Processes: computer processes in various open source and commercial programs

Grade Eight Visual Arts

NATIONAL HERITAGE ACADEMIES CURRICULUM Visual Arts

NHA EXEMPLARS

Art Expression

Art Creation
Elements and Principles of Art and Design
Critical Analysis

Art Connections

History, Culture, and Society
Real World Connections
Connections to Other Disciplines

NHA Visual Arts Exemplar: Art Expression

The student will develop and expand their knowledge/skills in the visual arts through the use of media, techniques, and processes to express their own ideas creatively in artwork. The student will analyze, assess, judge merit and derive meaning from works of art, including their own, according to the elements of art, the principles of design, and aesthetic qualities.

Grade Eight

NHA Objectives

Measurement Topic: Art Creation

- Create artwork by selecting media, techniques, and processes to produce desired effects (see Appendix)
- Use art materials safely and appropriately; follow procedures to set up and clean up
- Demonstrate quality craftsmanship
- Use problem solving to produce desired visual effects in artwork
- Use subjects, themes, images, symbols, and art elements and principles to express meaning in artwork

Measurement Topic: Elements and Principles of Art and Design

- Create artwork using multiple-point perspective to give the illusion of depth
- Use organizational structures as a way to communicate ideas and express meaning
- Create multiple types of 3-D art using various media and processes
- Demonstrate form, shape, line, and proportion when creating natural forms (human, animal, plant, etc.)
- Use techniques such as distortion, exaggeration, and optical illusion
- Identify and use all the elements of art and principles of design (focus on unity, space, repetition, proportion, variety)

Measurement Topic: Critical Analysis

- Analyze artworks for elements of art and design principles, art techniques, and media and describe using appropriate vocabulary
- Analyze media, techniques, and processes to determine what makes them effective or ineffective
- Interpret meanings derived from the images, symbols, techniques, art elements, or design principles used in artwork
- Generate questions about artwork; provide opinions, personal responses, and possible answers to questions about artwork
- Evaluate their own artwork and the artwork of others for elements of art, principles of design, expressive qualities, quality of techniques, and aesthetics

NHA Visual Arts Exemplar: Art Connections

The student will demonstrate knowledge of artists, art history, and world cultures by investigating works of art from different times and places. The student will apply their knowledge of visual arts to other disciplines and everyday life

Grade Eight

NHA Objectives

Measurement Topic: History, Culture, and Society

- Identify individual artist's style, including materials, design, methods, and subject matter
- Explain how political, social, geographical, and cultural factors influence how and what artists create
- Compare characteristics of artwork within a particular historical period or style with ideas, issues, or themes of the times
- Demonstrate knowledge of art history by placing artists, famous artworks, and art movements in chronological order

Measurement Topic: Real World Connections

- Identify examples of visual art as a part of own culture (advertising, political cartoons, product design, graphic novels, comic books, video games)
- Recognize and describe occupations associated with art (art therapist, video game designer, computer art and design, illustrator, set designer)
- Describe the types of skills and education required for art-related careers

Measurement Topic: Connections to Other Disciplines

- Identify art concepts in other subject areas (observation and contour drawing in social studies and science; rhythm and pattern in math, music, movement, and language arts; multiple 2-D views of 3-D object, nets of 3-D objects, transformations, scale drawings, use of measurement tools math; engineering design, light, and motion in science; and graphic display images of data in science and math; use visual media to enhance communication in other content areas; connections to literature in ELA)

Grade Eight Social Studies Topics: Early America, American Revolution, Westward Expansion, 19th Century America, Civil War, Late 19th to Early 20th Century America

Recommended Media and Processes

Grades 6-8

Drawing

Media: pencils, colored pencils, markers, ink, chalks, oil pastels, charcoals, oil pastels

Processes: contour line, rendering, sketching, value, shading, crosshatching, stippling, one- and two-point perspective

Painting

Media: tempera, watercolor, water-soluble oils, watercolor crayons; variety of surfaces, brushes and paint applicators

Processes: wet-on-wet, wet-on-dry, wash, resist, dry brush, watercolor techniques of sponging, salting, and masking

Printmaking

Media: found objects, printing ink, polystyrene foam, stencil, textile ink

Processes: calligraphic, collograph, silkscreen, etching, embossing, relief (linocuts)

Ceramics

Media: modeling clay, pottery clay, clay substitutes, glazes, stains, paint

Processes: pinch and pulled forms, slab, drape mold, coil, surface decoration techniques, incising, scratching, wax resist, hand hewn

Sculpture/Architecture/Jewelry

Media: paper, papier-mâché, clay, plaster, fiber cardboard, wood, foil, found objects, beads, sand, balsa, wire, foam, copper, foam core

Processes: carving, additive, subtractive, modeling, constructing 2-D, 3-D and kinetic art, casting, enameling

Fibers

Media: cloth, yarn, batik wax and dyes, ribbon, found objects, paper, reeds, rope

Processes: pulling threads, weaving, stitchery, tying and wrapping techniques, braiding, basketry, tie-dye, quilting, batik

Mixed Media

Media: tissue, photos, found objects, foil, fiber, paint, paper

Processes: collage, bas-relief

Other Media

Media: computer, interactive computer programs, disposable camera, digital camera, video, photography, film

Processes: computer processes in various open source and commercial programs

General Scoring Scales
Score 4.0: The student demonstrates learning that <i>goes beyond</i> what was taught in class.
Score 3.5: The student attempts to go beyond what was taught in class, but is <i>only partially successful</i> .
Score 3.0: The student is meeting learning goals at their grade level. This is the expected level of learning.
Score 2.5: The student understands basic information and is <i>partially successful</i> in meeting grade level learning goals.
Score 2.0: The student understands basic details and processes but is not yet successful in meeting grade-level learning goals.
Score 1.5: The student is beginning to perform basic skills but <i>needs some assistance</i> .
Score 1.0: The student can perform basic skills but <i>only with teacher assistance</i> .
Score 0.5: The student can perform <i>some basic skills</i> but only with teacher assistance.
Score 0: The student cannot perform basic skills even with teacher assistance.

Year-Long Planner

NHA Music Exemplar: Music Creation

Kindergarten

Measurement Topic: Music Composition and Performance

NHA ELA Objectives	Instructional Sequence			
• Create and play simple rhythmic patterns with a steady beat				
• Create and sing a short melodic pattern				
• Imitate a four beat rhythmic pattern using percussion instruments or clapping				
• Imitate melodic patterns sung by another				
• Demonstrate call and response in music				
• Recall short songs and perform them with a steady beat				

Measurement Topic: Music Theory

• Model short and long sounds vocally and instrumentally				
• Read beat icons and perform short patterns				

Measurement Topic: Music Analysis

• Identify reasons for listening to music				
• Identify the different contexts in which music is heard				
• Use movement to demonstrate simple rhythmic and pitch patterns				
• Distinguish between vocal, instrumental, and environmental sounds				
• Distinguish between musical sounds that are high or low, fast or slow, loud or soft, happy or sad				
• Compare and contrast singing, whispering, and speaking				

NHA Music Exemplar: Music Awareness

Measurement Topic: History, Culture, and Society

NHA ELA Objectives	Instructional Sequence			
• Identify “The Star-Spangled Banner” and “America the Beautiful”				
• List two ways the Native Americans used music				
• Identify different styles of music (e.g., Patriotic, folk, lullabies, or classical)				

Measurement Topic: Real World Connections

NHA ELA Objectives	Instructional Sequence			
• Connect music to situations in daily life				

Measurement Topic: Integrated Studies

NHA ELA Objectives	Instructional Sequence			
Not Applicable				

Music

Interaction of Disciplines

Developing knowledge and skills in each discipline requires the application of strategies, and content from other disciplines.

Music knowledge and skill is developed through the application of creating and performing music, analyzing music, learning about music in the historical context, communicating ideas, movement, and connecting music to other disciplines in life. This requires a variety of skills and strategies inherent in ELA, Math, History and Technology.

NHA Music Exemplar: Music Performance

The student will develop and use a variety of basic skills in order to perform both musical pieces both vocally and instrumentally. Students will engage in both group and individual music-related tasks.

NHA Music Exemplar: Music Creation

The student will be able to create, read, and describe music through knowledge of basic musical concepts.

NHA Music Exemplar: Music Awareness

The students will recognize the historical, cultural and social impact of music. They will be able to critically analyze and critique a variety of music from a variety of sources. Students will be exposed to a variety of music and determine the impact it had both locally and globally.

Vertical Alignment for the Measurement Topic: <i>Music Composition and Performance</i>	
Grade Eight	<ul style="list-style-type: none"> Sing or play a musical piece using expression Sing or play a musical piece from memory Identify I, IV, and V chord patterns
Grade Seven	<ul style="list-style-type: none"> Sing or play a musical piece using a score while following the cues of a conductor Apply notation and composition skills (e.g., reorchestrate, revoice, or compose a short piece) Improvise a short piece
Grade Six	<ul style="list-style-type: none"> Sing or play scales and intervals Improvise solo rhythms on a single pitch Compose and notate short melodic patterns
Grade Five	<ul style="list-style-type: none"> Perform 2- and 3- part songs Improvise accompaniments on classroom instruments (e.g., mallet instruments, rhythm instruments, keyboards, etc.) Identify and perform intervals in major scales (eg., half/whole, step/skip, or 2nd/3rd)
Grade Four	<ul style="list-style-type: none"> Play musical patterns with correct rhythm, tempo, and dynamics by rote and by reading Play pitched classroom instruments using correct techniques (e.g., recorders, xylophone, or keyboard) Sing or play partner songs, rounds, ostinatos, and descants using dynamics and phrasing Improvise a variation of a familiar song or musical phrase
Grade Three	<ul style="list-style-type: none"> Perform ostinatos on classroom instruments independently and with a group Perform vocally using appropriate phrasing Sing rounds and ostinatos Improvise a short piece using non-traditional mediums (e.g., household sounds, environmental sounds, etc.) Compose lyrics to match a melody or rhythm Use classroom instruments to create an accompaniment for readings or dramatizations
Grade Two	<ul style="list-style-type: none"> Improvise a short melody (e.g., vocally, instrumentally) Create and perform short rhythmic and melodic phrases Use loud/soft dynamics when playing and singing Perform an ostinato as an individual or in group sing Interpret and follow the cues of a conductor in regards to tempo, dynamics, beginning, and ending
Grade One	<ul style="list-style-type: none"> Demonstrate a steady beat while singing songs Perform a short ostinato to be sung or played with a familiar song or poem Create and perform short rhythmic and melodic patterns using voice, clapping, or classroom instruments
Kindergarten	<ul style="list-style-type: none"> Create and play simple rhythmic patterns with a steady beat Create and sing a short melodic pattern Imitate a four beat rhythmic pattern using percussion instruments or clapping Imitate melodic patterns sung by another Demonstrate call and response in music Recall short songs and perform them with a steady beat

Vertical Alignment for the Measurement Topic: <i>Music Theory</i>	
Grade Eight	<ul style="list-style-type: none"> Identify and apply 2/4, 3/4, 4/4, 6/8, and alla breve meters Apply musical terms for dynamics, tempo, and articulation
Grade Seven	<ul style="list-style-type: none"> Read and notate music using a variety of notes and rests (e.g.; whole, half, dotted half, quarter, dotted quarter, eighth, and sixteenth notes) Notate melodies from aural examples Describe elements of non-standard notation
Grade Six	<ul style="list-style-type: none"> Sight read music written in major keys Sight read music in duple meter Apply musical symbols found in scores
Grade Five	<ul style="list-style-type: none"> Identify and apply key signatures Read and notate a short melody Identify and apply meters Define and apply dynamic markings (e.g., forte, piano, decrescendo, crescendo) Identify and apply the musical symbol for <i>staccato</i>, <i>accent</i>, <i>formatta</i>, and repeat signs
Grade Four	<ul style="list-style-type: none"> Read and notate quarter, dotted quarter, eighth, half, dotted half, sixteenth, and whole notes, and quarter, half, and whole rests in duple and triple meters Read and perform songs from notation Identify and define the musical symbols for <i>fermata</i>, <i>octave</i>, and <i>D.C. al fine</i> Identify the symbols for sharps, flats, and naturals Define the dynamic markings <i>forte</i>, <i>mezzo forte</i>, <i>piano</i>, <i>mezzo piano</i>, <i>crescendo</i>, and <i>diminuendo (decrescendo)</i> Identify AB, ABA, theme and variations, and rondo forms
Grade Three	<ul style="list-style-type: none"> Read and notate quarter, eighth, half, dotted quarter and half, and whole notes, and quarter, half, and whole rests Read and perform pitch patterns and songs using solfege and letter names of the treble clef Identify strong and weak beats and apply to 4/4 and 3/4 meter
Grade Two	<ul style="list-style-type: none"> Read and notate iconically quarter, eighth, and half notes, and quarter and half rests Determine simple pitch patterns by using solfege and hand signs Identify and classify groups of instruments (e.g., woodwinds, percussion, etc.) Identify voices as child, adult male, or adult female
Grade One	<ul style="list-style-type: none"> Identify quarter notes, eighth notes, and quarter rests represented iconically in simple four beat patterns Match pitch patterns using the notes of the pentatonic scale (e.g., do-re-mi-sol-la)
Kindergarten	<ul style="list-style-type: none"> Model short and long sounds vocally and instrumentally Read beat icons and perform short patterns

Vertical Alignment for the Measurement Topic: <i>Music Analysis</i>	
Grade Eight	<ul style="list-style-type: none"> Identify characteristics of effective performance Define characteristics of effective musical works
Grade Seven	<ul style="list-style-type: none"> Use musical terms to describe various musical styles, genres, or time periods Compare and contrast two musical pieces from the same style or genre using basic musical terminology
Grade Six	<ul style="list-style-type: none"> Identify basic musical form, style, and genre in musical pieces Identify musical elements that convey a certain emotion or mood Establish criteria to be used in evaluating the quality of a performance
Grade Five	<ul style="list-style-type: none"> Distinguish between major and minor keys Identify the form of longer musical pieces Compare pieces in terms of tone and mood
Grade Four	<ul style="list-style-type: none"> Describe tempo, dynamics, articulation, and rhythmic and melodic elements Classify singers based on vocal range and performance style (e.g., SATB, opera, country, jazz, etc.)
Grade Three	<ul style="list-style-type: none"> Describe changes in tempo using musical terms and movement Identify orchestral instruments by sight and by sound Explain personal preference for musical works by contrasting two styles of composition
Grade Two	<ul style="list-style-type: none"> Describe personal preference for musical works Compare two contrasting styles of composition using basic terms (e.g., high/low pitch, beat, repeated rhythmic patterns, fast/slow) Describe the mood and style of a variety of musical pieces
Grade One	<ul style="list-style-type: none"> Recognize vocal and instrumental sounds Use movement to demonstrate changes in tempo, dynamics, and mood in music Compare and contrast patterns of a song and listen for repetition of patterns
Kindergarten	<ul style="list-style-type: none"> Identify reasons for listening to music Identify the different contexts in which music is heard Use movement to demonstrate simple rhythmic and pitch patterns Distinguish between vocal, instrumental, and environmental sounds Distinguish between musical sounds that are high or low, fast or slow, loud or soft, happy or sad Compare and contrast singing, whispering, and speaking

Vertical Alignment for the Measurement Topic: <i>History, Culture, and Society</i>	
Grade Eight	<ul style="list-style-type: none"> Identify musicians within American genres (e.g.; jazz, blues, hip hop, country, etc.) Identify the origins of American musical genres
Grade Seven	<ul style="list-style-type: none"> Evaluate contemporary uses of music to influence societal changes (e.g.; campaign songs, songs of protest, etc.) Identify performing artists that influenced American culture
Grade Six	<ul style="list-style-type: none"> Identify the cultural origin and evolution of specific instruments (e.g., drums, guitar, keyboard, band, or orchestral instruments) Describe the historical background, composer, genre, and style of music pieces being studied
Grade Five	<ul style="list-style-type: none"> Listen to music of other cultures and explore the role of music and musicians related to the cultures Identify instruments associated with world cultures (e.g; sitar, maracas, accordion) Analyze the roles that musicians play in the media
Grade Four	<ul style="list-style-type: none"> Identify musical genres, musicians, or songs unique to your state or region
Grade Three	<ul style="list-style-type: none"> Perform music and dances from different cultures Compare music for special occasions in the United States to that of other world cultures
Grade Two	<ul style="list-style-type: none"> Describe the role that music plays in different cultures (e.g, Greek, India, China) Identify instruments associated with different cultures Perform a dance from a different culture
Grade One	<ul style="list-style-type: none"> Identify and describe the importance of music at home and other places in the community Identify different musical styles (e.g., jazz, folk, patriotic, or classical) Recall and perform short cultural songs
Kindergarten	<ul style="list-style-type: none"> Identify “The Star-Spangled Banner” and “America the Beautiful” List two ways the Native Americans used music Identify different styles of music (e.g., Patriotic, folk, lullabies, or classical)

Vertical Alignment for the Measurement Topic: <i>Real World Connections</i>	
Grade Eight	<ul style="list-style-type: none"> Identify career opportunities in music within other cultures
Grade Seven	<ul style="list-style-type: none"> Identify career opportunities related to American music
Grade Six	<ul style="list-style-type: none"> Respond to musical examples heard in class
Grade Five	<ul style="list-style-type: none"> Report on a community musician Evaluate a live musical performance
Grade Four	<ul style="list-style-type: none"> Identify local musicians and define their role in the community
Grade Three	<ul style="list-style-type: none"> Identify production careers associated with music (e.g., set designer, sound engineer, lighting technician, vocal coach, etc.)
Grade Two	<ul style="list-style-type: none"> Identify music for various special occasions and determine the role that it plays Demonstrate appropriate listening behavior during any performance Describe the roles that musicians play in the community
Grade One	<ul style="list-style-type: none"> Demonstrate appropriate listening behavior during any performance Identify musical professions (e.g., instrumentalist, vocalist, conductor)
Kindergarten	<ul style="list-style-type: none"> Connect music to situations in daily life

Vertical Alignment for the Measurement Topic: <i>Integrated Studies</i>	
Grade Eight	<ul style="list-style-type: none"> Compare the elements of music and art
Grade Seven	<ul style="list-style-type: none"> Interpret a piece of music using art, poetry, or writing
Grade Six	<ul style="list-style-type: none"> Identify the physical properties of sound including frequency, amplitude, and wavelength Apply mathematical concepts to the rhythms encountered in music (e.g., fractions to meter, patterns to form or rhythm)
Grade Five	<ul style="list-style-type: none"> Interpret music using dance, art, or writing
Grade Four	<ul style="list-style-type: none"> Compose a short musical piece based on a piece of artwork (e.g., painting, sculpture, etc.) Analyze how understanding of music could enhance understanding in another discipline (e.g., meter and fractions, musical phrases and language phrases)
Grade Three	<ul style="list-style-type: none"> Identify terms that apply to music as well as reading, writing, and mathematics (e.g., tone, pattern, phrase, meter, etc.)
Grade Two	<ul style="list-style-type: none"> Identify a specific emotion in a piece of music Identify the musical concepts of tone, repetition, and contrast and how they are used in other disciplines (e.g., tone of writing, patterns in math, contrasting two characters in a book)
Grade One	<ul style="list-style-type: none"> Represent musical terms and concepts through other art forms (e.g., drawing, dancing or movement, writing) Identify musical terms and concepts that are also used in other subjects (e.g., fast can be used in music or exercising, patterns in math)

Students will engage in both group and individual music-related tasks. They will use this knowledge to analyze, assess, judge merit and determine meaning from music, including their own.

Grade Two

NHA Objectives

Measurement Topic: Music Composition and Performance

- Improvise a short melody (e.g., vocally, instrumentally)
- Create and perform short rhythmic and melodic phrases
- Use loud/soft dynamics when playing and singing
- Perform an ostinato as an individual or in group sing
- Interpret and follow the cues of a conductor in regards to tempo, dynamics, beginning, and ending

Measurement Topic: Music Theory

- Read and notate iconically quarter, eighth, and half notes, and quarter and half rests
- Determine simple pitch patterns by using solfege and hand signs
- Identify and classify groups of instruments (e.g., woodwinds, percussion, etc.)
- Identify voices as child, adult male, or adult female

Measurement Topic: Analysis of Music

- Describe personal preference for musical works
- Compare two contrasting styles of composition using basic terms (e.g., high/low pitch, beat, repeated rhythmic patterns, fast/slow)
- Describe the mood and style of a variety of musical pieces

NHA Music Exemplar: Music Awareness

The student will recognize the historical, cultural and social impact of music. They will be able to critically analyze and critique a variety of music from different eras, genres, and sources. Student will be exposed to a variety of music and determine the impact it had both locally and globally.

Grade Two

NHA Objectives

Measurement Topic: History, Culture, and Society

- Describe the role that music plays in different cultures (e.g, Greek, India, China)
- Identify instruments associated with different cultures
- Perform a dance from a different culture

Measurement Topic: Real World Connections

- Identify music for various special occasions and determine the role that it plays
- Demonstrate appropriate listening behavior during any performance
- Describe the roles that musicians play in the community

Measurement Topic: Integrated Studies

- Identify a specific emotion in a piece of music
- Identify the musical concepts of tone, repetition, and contrast and how they are used in other disciplines (e.g., tone of writing, patterns in math, contrasting two characters in a book)

Grade Three Music

NATIONAL HERITAGE ACADEMIES CURRICULUM Music

NHA EXEMPLARS

Music Expression

Music Composition and Performance
Music Theory
Analysis of Music

Music Awareness

History, Culture, and Society
Real World Connections
Integrated Studies

NHA Music Exemplar: Music Expression

The student will develop knowledge and a variety of skills in order to perform, create, read, and describe musical pieces through knowledge of basic musical concepts. Students will engage in both group and individual music-related tasks. They will use this knowledge to analyze, assess, judge merit and determine meaning from music, including their own.

Grade Three

NHA Objectives

Measurement Topic: Music Composition and Performance

- Perform ostinatos on classroom instruments independently and with a group
- Perform vocally using appropriate phrasing
- Sing rounds and ostinatos
- Improvise a short piece using non-traditional mediums (e.g., household sounds, environmental sounds, etc.)
- Compose lyrics to match a melody or rhythm
- Use classroom instruments to create an accompaniment for readings or dramatizations

Measurement Topic: Music Theory

- Read and notate quarter, eighth, half, dotted quarter and half, and whole notes, and quarter, half, and whole rests
- Read and perform pitch patterns and songs using solfege and letter names of the treble clef
- Identify strong and weak beats and apply to 4/4 and 3/4 meter

Measurement Topic: Analysis of Music

- Describe changes in tempo using musical terms and movement
- Identify orchestral instruments by sight and by sound
- Explain personal preference for musical works by contrasting two styles of composition

NHA Music Exemplar: Music Awareness

The student will recognize the historical, cultural and social impact of music. They will be able to critically analyze and critique a variety of music from different eras, genres, and sources. Student will be exposed to a variety of music and determine the impact it had both locally and globally.

Grade Three

NHA Objectives

Measurement Topic: History, Culture, and Society

- Perform music and dances from different cultures
- Compare music for special occasions in the United States to that of other world cultures

Measurement Topic: Real World Connections

- Identify production careers associated with music (e.g., set designer, sound engineer, lighting technician, vocal coach, etc.)

Measurement Topic: Integrated Studies

- Identify terms that apply to music as well as reading, writing, and mathematics (e.g., tone, pattern, phrase, meter, etc.)

Grade Four Music

NATIONAL HERITAGE ACADEMIES CURRICULUM Music

NHA EXEMPLARS

Music Expression

Music Composition and Performance
Music Theory
Analysis of Music

Music Awareness

History, Culture, and Society
Real World Connections
Integrated Studies

NHA Music Exemplar: Music Expression

The student will develop knowledge and a variety of skills in order to perform, create, read, and describe musical pieces through knowledge of basic musical concepts. Students will engage in both group and individual music-related tasks. They will use this knowledge to analyze, assess, judge merit and determine meaning from music, including their own.

Grade Four

NHA Objectives

Measurement Topic: Music Composition and Performance

- Play musical patterns with correct rhythm, tempo, and dynamics by rote and by reading
- Play pitched classroom instruments using correct techniques (e.g., recorders, xylophone, or keyboard)
- Sing or play partner songs, rounds, ostinatos, and descants using dynamics and phrasing
- Improvise a variation of a familiar song or musical phrase

Measurement Topic: Music Theory

- Read and notate quarter, dotted quarter, eighth, half, dotted half, sixteenth, and whole notes, and quarter, half, and whole rests in duple and triple meters
- Read and perform songs from notation
- Identify and define the musical symbols for *fermata*, *octave*, and *D.C. al fine*
- Identify the symbols for sharps, flats, and naturals
- Define the dynamic markings *forte*, *mezzo forte*, *piano*, *mezzo piano*, *crescendo*, and *diminuendo (decrescendo)*
- Identify AB, ABA, theme and variations, and rondo forms

Measurement Topic: Analysis of Music

- Describe tempo, dynamics, articulation, and rhythmic and melodic elements
- Classify singers based on vocal range and performance style (e.g., SATB, opera, country, jazz, etc.)

NHA Music Exemplar: Music Awareness

The student will recognize the historical, cultural and social impact of music. They will be able to critically analyze and critique a variety of music from different eras, genres, and sources. Student will be exposed to a variety of music and determine the impact it had both locally and globally.

Grade Four

NHA Objectives

Measurement Topic: History, Culture, and Society

- Identify musical genres, musicians, or songs unique to your state or region

Measurement Topic: Real World Connections

- Identify local musicians and define their role in the community

Measurement Topic: Integrated Studies

- Compose a short musical piece based on a piece of artwork (e.g., painting, sculpture, etc.)
- Analyze how understanding of music could enhance understanding in another discipline (e.g., meter and fractions, musical phrases and language phrases)

Grade Five Music

NATIONAL HERITAGE ACADEMIES CURRICULUM Music

NHA EXEMPLARS

The student will develop knowledge and a variety of skills in order to perform, create, read, and describe musical pieces through knowledge of basic musical concepts. Students will engage in both group and individual music-related tasks. They will use this knowledge to analyze, assess, judge merit and determine meaning from music, including their own.

Grade Five

NHA Objectives

Measurement Topic: Music Composition and Performance

- Perform 2- and 3- part songs
- Improvise accompaniments on classroom instruments (e.g., mallet instruments, rhythm instruments, keyboards, etc.)
- Identify and perform intervals in major scales (eg., half/whole, step/skip, or 2nd/3rd)

Measurement Topic: Music Theory

- Identify and apply key signatures
- Read and notate a short melody
- Identify and apply meters
- Define and apply dynamic markings (e.g., forte, piano, decrescendo, crescendo)
- Identify and apply the musical symbol for *staccato*, *accent*, *formatta*, and repeat signs

Measurement Topic: Analysis of Music

- Distinguish between major and minor keys
- Identify the form of longer musical pieces
- Compare pieces in terms of tone and mood

NHA Music Exemplar: Music Awareness

The student will recognize the historical, cultural and social impact of music. They will be able to critically analyze and critique a variety of music from different eras, genres, and sources. Student will be exposed to a variety of music and determine the impact it had both locally and globally.

Grade Five

NHA Objectives

Measurement Topic: History, Culture, and Society

- Listen to music of other cultures and explore the role of music and musicians related to the cultures
- Identify instruments associated with world cultures (e.g; sitar, maracas, accordion)
- Analyze the roles that musicians play in the media

Measurement Topic: Real World Connections

- Report on a community musician
- Evaluate a live musical performance

Measurement Topic: Integrated Studies

- Interpret music using dance, art, or writing

Grade Six Music

Students will engage in both group and individual music-related tasks. They will use this knowledge to analyze, assess, judge merit and determine meaning from music, including their own.

Grade Six

NHA Objectives

Measurement Topic: Music Composition and Performance

- Sing or play scales and intervals
- Improvise solo rhythms on a single pitch
- Compose and notate short melodic patterns

Measurement Topic: Music Theory

- Sight read music written in major keys
- Sight read music in duple meter
- Apply musical symbols found in scores

Measurement Topic: Analysis of Music

- Identify basic musical form, style, and genre in musical pieces
- Identify musical elements that convey a certain emotion or mood
- Establish criteria to be used in evaluating the quality of a performance

NHA Music Exemplar: Music Awareness

The student will recognize the historical, cultural and social impact of music. They will be able to critically analyze and critique a variety of music from different eras, genres, and sources. Student will be exposed to a variety of music and determine the impact it had both locally and globally.

Grade Six

NHA Objectives

Measurement Topic: History, Culture, and Society

- Identify the cultural origin and evolution of specific instruments (e.g., drums, guitar, keyboard, band, or orchestral instruments)
- Describe the historical background, composer, genre, and style of music pieces being studied

Measurement Topic: Real World Connections

- Respond to musical examples heard in class

Measurement Topic: Integrated Studies

- Identify the physical properties of sound including frequency, amplitude, and wavelength
- Apply mathematical concepts to the rhythms encountered in music (e.g., fractions to meter, patterns to form or rhythm)

Grade Seven Music

Students will engage in both group and individual music-related tasks. They will use this knowledge to analyze, assess, judge merit and determine meaning from music, including their own.

Grade Seven

NHA Objectives

Measurement Topic: Music Composition and Performance

- Sing or play a musical piece using a score while following the cues of a conductor
- Apply notation and composition skills (e.g., reorchestrate, revoice, or compose a short piece)
- Improvise a short piece

Measurement Topic: Music Theory

- Read and notate music using a variety of notes and rests (e.g.; whole, half, dotted half, quarter, dotted quarter, eighth, and sixteenth notes)
- Notate melodies from aural examples
- Describe elements of non-standard notation

Measurement Topic: Analysis of Music

- Use musical terms to describe various musical styles, genres, or time periods
- Compare and contrast two musical pieces from the same style or genre using basic musical terminology

NHA Music Exemplar: Music Awareness

The student will recognize the historical, cultural and social impact of music. They will be able to critically analyze and critique a variety of music from different eras, genres, and sources. Student will be exposed to a variety of music and determine the impact it had both locally and globally.

Grade Seven

NHA Objectives

Measurement Topic: History, Culture, and Society

- Evaluate contemporary uses of music to influence societal changes (e.g.; campaign songs, songs of protest, etc.)
- Identify performing artists that influenced American culture

Measurement Topic: Real World Connections

- Identify career opportunities related to American music

Measurement Topic: Integrated Studies

- Interpret a piece of music using art, poetry, or writing

Students will engage in both group and individual music-related tasks. They will use this knowledge to analyze, assess, judge merit and determine meaning from music, including their own.

Grade Eight

NHA Objectives

Measurement Topic: Music Composition and Performance

- Sing or play a musical piece using expression
- Sing or play a musical piece from memory
- Identify I, IV, and V chord patterns

Measurement Topic: Music Theory

- Identify and apply 2/4, 3/4, 4/4, 6/8, and alla breve meters
- Apply musical terms for dynamics, tempo, and articulation

Measurement Topic: Analysis of Music

- Identify characteristics of effective performance
- Define characteristics of effective musical works

NHA Music Exemplar: Music Awareness

The student will recognize the historical, cultural and social impact of music. They will be able to critically analyze and critique a variety of music from different eras, genres, and sources. Student will be exposed to a variety of music and determine the impact it had both locally and globally.

Grade Eight

NHA Objectives

Measurement Topic: History, Culture, and Society

- Identify musicians within American genres (e.g.; jazz, blues, hip hop, country, etc.)
- Identify the origins of American musical genres

Measurement Topic: Real World Connections

- Identify career opportunities in music within other cultures

Measurement Topic: Integrated Studies

- Compare the elements of music and art

3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> Identify characteristics of effective performance Define characteristics of effective musical works

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> Style Meter Form Intonation Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Define and use a variety of musical terms
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

MUSIC AWARENESS
Measurement Topic: History, Culture, and Society
 Grade Eight

Evidence shows student has met or exceeded the learning target

Evidence shows misunderstanding, misconceptions, or omissions

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> Identify musicians within American genres (e.g.; jazz, blues, hip hop, country, etc.) Identify the origins of American musical genres

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> Genre Origin Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Identify musical genres unique to the United States
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

MUSIC AWARENESS
Measurement Topic: Real World Connections
 Grade Eight

Evidence shows student has met or exceeded the learning target

4.0	In addition to score 3.0, in-depth inferences and applications that go beyond what was taught
3.5	In addition to score 3.0, in-depth inferences and applications with partial success
Score 3.0	Student exhibits no major errors or omissions and demonstrates understanding by: <ul style="list-style-type: none"> Identify career opportunities in music within other cultures

Evidence shows misunderstanding, misconceptions, or omissions

2.5	No major errors or omissions regarding score 2.0 elements with partial knowledge of score 3.0 elements
Score 2.0	Student exhibits major errors or omissions with score 3.0 elements. No major errors or omissions regarding the simpler details and processes such as: <ul style="list-style-type: none"> Recognizing and recalling specific terminology such as: <ul style="list-style-type: none"> Career Producer Composer Performing basic processes and recognizing and recalling the accuracy of basic solutions and information such as: <ul style="list-style-type: none"> Identify career opportunities in music within American culture
1.5	Partial knowledge of score 2.0 elements Major errors or omissions regarding score 3.0 elements
1.0	With assistance, student demonstrates partial understanding of some of score 2.0 elements and some of score 3.0 elements
0.5	With assistance, a partial understanding of some of score 2.0 elements but not score 3.0 elements

MUSIC AWARENESS
Measurement Topic: Integrated Studies
 Grade Eight

SECTION E

METHODS OF PUPIL ASSESSMENT

METHODS OF PUPIL ASSESSMENT

Pursuant to Applicable Law and the Terms and Conditions of this Contract, including Article VI, Section 6.5, the Academy shall properly administer all state-mandated academic assessments identified in the Code, as applicable, and all academic assessments identified in the Public School Academy Chartering Policies adopted by the University Board, as applicable, in accordance with the requirements detailed in the Master Calendar annually issued by the Center.

The Academy shall authorize the Center to have access to the Academy’s Student/School Data Applications through the Center for Educational Performance and Information and to the electronic reporting system administered by the Michigan Department of Education to access the Academy’s state assessment results, as applicable. The Academy shall ensure that those involved with the administration of these assessments are properly trained and adhere to the ethical standards and testing procedures associated with these assessments.

Academic Assessments to Be Administered:

<u>Grade(s)</u>	<u>Academic Assessment(s)</u>
Grades 2-8	assessments as identified in Schedule 7b including all state-mandated assessments.

SECTION F

APPLICATION AND ENROLLMENT OF STUDENTS

APPLICATION AND ENROLLMENT OF STUDENTS

Pursuant to Applicable Law and the Terms and Conditions of this Contract, including Article VI, Sections 6.6 and 6.16, the Academy shall comply with the application and enrollment requirements identified in this Schedule.

Enrollment Limits

The Academy will offer kindergarten through eighth grade. The maximum enrollment shall be 825 students. The Academy Board will annually adopt maximum enrollment figures prior to its application and enrollment period.

Requirements

Section 504 of the Code provides that public school academies shall not charge tuition and shall not discriminate in its pupil admissions policies or practices on the basis of intellectual or athletic ability, measures of achievement or aptitude, status as a student with a disability, or any other basis that would be illegal if used by a Michigan school district. However, a public school academy may limit admission to pupils who are within a particular range of age or grade level or on any other basis that would be legal if used by a Michigan school district and may give enrollment priority as provided below.

- Academy enrollment shall be open to all individuals who reside in Michigan. Except for a foreign exchange student who is not a United States citizen, a public school academy shall not enroll a pupil who is not a Michigan resident.
- Academy admissions may be limited to pupils within a particular age range/grade level or on any other basis that would be legal if used by a Michigan school district.
- The Academy shall allow any pupil who was enrolled in the Academy in the immediately preceding school year to enroll in the Academy unless the appropriate grade is not offered.
- No student may be denied participation in the application process due to lack of student records.
- If the Academy receives more applications for enrollment than there are spaces available, pupils shall be selected for enrollment through a random selection drawing.

The Academy may give enrollment priority to one (1) or more of the following:

- A sibling of a pupil enrolled in the Academy.
- A pupil who transfers to the Academy from another public school pursuant to a matriculation agreement between the Academy and other public school that provides for this enrollment priority, if all of the following requirements are met:
 1. Each public school that enters into the matriculation agreement remains a separate and independent public school.
 2. The Academy shall select at least 5% of its pupils for enrollment using a random selection process.

3. The matriculation agreement allows any pupil who was enrolled at any time during elementary school in a public school that is party to the matriculation agreement and who was not expelled from the public school to enroll in the public school academy giving enrollment priority under the matriculation agreement.
- A child, including an adopted child or legal ward, of a person who is employed by or at the Academy or who is on the Academy Board.

Matriculation Agreement

- The Academy Board may enter into a matriculation agreement with another public school pursuant to section 504(4) of the Code.
- However, before the Academy Board approves a matriculation agreement, the Academy shall provide a draft copy of the agreement to the Center for review.
- Any matriculation agreement entered into by the Academy shall be added to this Schedule 7f through a contract amendment approved in accordance with Article IX in the Terms and Conditions of this Contract.
- Until the matriculation agreement is incorporated into this Contract, the Academy is prohibited from granting an enrollment priority to any student pursuant to that matriculation agreement.

Application Process

- The Academy shall make reasonable effort to advertise its enrollment openings.
- The Academy's open enrollment period shall be a minimum of two weeks (14 calendar days) in duration and shall include evening and weekend times.
- The Academy shall accept applications all year. If openings occur during the academic year, students shall be enrolled. If openings do not exist, applicants shall be placed on the official waiting list. The waiting list shall cease to exist at the beginning of the Academy's next open enrollment period.
- In the event there are openings in the class for which students have applied, students shall be admitted according to the official waiting list. The position on the waiting list shall be determined by the random selection drawing. If there is no waiting list, students shall be admitted on a first-come, first-served basis.
- The Academy may neither close the application period nor hold a random selection drawing for unauthorized grades prior to receipt of written approval from the Center.

Legal Notice or Advertisement

- The Academy shall provide legal notice or advertisement of the application and enrollment process in a local newspaper of general circulation. A copy of the legal notice or advertisement shall be forwarded to the Center.
- At a minimum, the legal notice or advertisement must include:

1. The process and/or location(s) for requesting and submitting applications.
 2. The beginning date and the ending date of the application period.
 3. The date, time, and place the random selection drawing(s) will be held, if needed.
- The legal notice or advertisement of the application period shall be designed to inform individuals that are most likely to be interested in attending the Academy.
 - The Academy, being an equal opportunity educational institution, shall be committed to good-faith affirmative action efforts to seek out, create and serve a diverse student body.

Re-enrolling Students

- The Academy shall notify parents or guardians of all enrolled students of the deadline for notifying the Academy that they wish to re-enroll their child.
- If the Academy Board has a sibling preference policy, the re-enrollment notice must also request that the parent or guardian indicate whether a sibling(s) seeks to enroll for the upcoming academic year.
- An enrolled student who does not re-enroll by the specified date can only apply to the Academy during the application period for new students.
- An applicant on the waiting list at the time a new application period begins must reapply as a new student.
- After collecting the parent or guardian responses, the Academy must determine the following:
 1. The number of students who have re-enrolled per grade or grouping level.
 2. The number of siblings seeking admission for the upcoming academic year per grade.
 3. If space is unavailable, the Academy must develop a waiting list for siblings of re-enrolled students.
 4. The number of spaces remaining, per grade, after enrollment of current students and siblings.

Random Selection Drawing

A random selection drawing is required if the number of applications exceeds the number of available spaces. Prior to the application period, the Academy shall:

- Establish written procedures for conducting a random selection drawing.
- Establish the maximum number of spaces available per grade or age grouping level.
- Establish the date, time, place and person to conduct the random selection drawing.
- Notify the Center of both the application period and the date of the random selection drawing, if needed. The Center may have a representative on-site to monitor the random selection drawing process.

The Academy shall use a credible, impartial individual who is not employed by, under contract with, a member of the Board of, or otherwise affiliated with the Academy to conduct the random selection drawing. Further, the Academy shall:

- Conduct the random selection drawing in a manner that is open to parents, community members and members of the public who want to observe the process.
- Use numbers, letters, or another system that guarantees fairness and does not give an advantage to any applicant.

The Academy shall notify applicants not chosen in the random selection drawing that they were not selected and that their name has been placed on the Academy's official waiting list for openings that may occur during the academic year. Students shall appear on the official waiting list in the order they were selected in the random selection drawing.

Matriculation Agreement

This Matriculation Agreement ("Agreement") is entered into as of the 1st day of July, 2014, between Arbor Preparatory High School, a body corporate and public school academy ("Receiving School") and South Arbor Charter Academy, a body corporate and public school academy ("Sending School")(both parties referred to as "Schools").

Both the Sending School and the Receiving School are separate and independent public school academies, organized as such under the Michigan Revised School Code (the "Code"). Both schools hold separate charters from valid authorizing bodies, pursuant to their respective charter contracts. Both schools operate independent of the other.

Because the Sending School does not offer an educational program for high school students and the Receiving School desires to provide an enrollment preference for students entering its high school program, the parties desire to establish this arrangement for the matriculation of qualifying students from the Sending School to the Receiving School.

Michigan law permits any pupil who was enrolled at any time during elementary school in the Sending School and who was not expelled from the Sending School to have an enrollment priority in the Receiving School provided the Schools have a matriculation agreement. MCL 380.504(4)(b).

Therefore, for good and valuable consideration, the receipt of which is hereby acknowledged, it is mutually agreed as follows:

1. **Term.** This Agreement shall be effective as of July 1st, 2014, provided that it has been approved by each School's governing board and their respective authorizing bodies. This shall be a perpetual contract unless rescinded by either party by adopting a board resolution.
2. **Qualifying Students.** Students who meet all of the following requirements are deemed to be "Qualifying Students" for enrollment priority under this Agreement:
 - a. the student was enrolled in and attended the Sending School at any time during elementary school;
 - b. the student was not expelled from the Sending School;
 - c. the student has completed 8th grade from any school, including home school; and
 - d. the student is eligible to enroll in a public school in Michigan.
3. **Application for matriculation.** Qualifying Students who desire an enrollment priority in the Receiving School must complete the Receiving School application for the applicable school year and submit it to the Receiving School during its Open Enrollment Period as set forth in the Receiving School's Admission and Enrollment Practices and Procedures incorporated as Exhibit A to this Agreement.
4. **Enrollment Priority.** The enrollment priority of Qualifying Students shall be determined according to the Receiving School's Admission and Enrollment Policy and the Admission and Enrollment Practices and Procedures incorporated as Exhibit A to this Agreement.
5. **Enrollment.** Qualifying Students must attend school at the Receiving School on the first day

of school in order to be enrolled. Any Qualifying Student who does not attend the first day of school and who does not obtain an excused absence from the Receiving School before the end of that school day, shall forfeit his or her priority to enroll in the Receiving School.

6. **Record Transfer.** Upon receipt of a properly completed records release form from the Receiving School and parent of the student, the Sending School shall transfer all student records of Qualifying Students to the Receiving School no later than 30 days after receipt of the request for transfer of records from the Receiving School.
7. **Termination.** This Agreement may be terminated by either party at any time for any reason upon providing ninety (90) days' written notice. If such notice is given more than ninety (90) days before the end of the Open Enrollment Period, there shall be no enrollment priority for Qualifying Students for the subsequent school year. If the notice is given any time thereafter, the Qualifying Students who applied for enrollment priority at the Receiving School shall receive the priority for the subsequent school year pursuant to the terms of this Agreement. This Agreement shall be terminated automatically if the Charter Contract for either the Sending School or the Receiving School is terminated or revoked.
8. **Effective Date.** As to each School, this Agreement shall be effective on the date this Agreement is incorporated into the School's Charter Contract by amendment.
9. **Entire Agreement.** This Agreement constitutes the entire agreement and understanding of the parties and there are no other promises, assurances or terms of agreement among the parties other than those written herein. Nothing in this Agreement shall give rights to any other person. This agreement shall not be modified except in writing and signed by each of the parties.

IN WITNESS WHEREOF, the parties have executed this Agreement on the date shown below.

Receiving School: Arbor Preparatory High School

Name: Robert Crowner
Title: Board President

Sending School: South Arbor Charter Academy

By:  Date: 5/14/14, 2014
Name: Christopher Andrews
Title: Board President

Exhibit A

Admission and Enrollment Practices and Procedures

The school will comply with all applicable federal and state laws related to admissions and enrollment.

Non-Discrimination

The school will not discriminate on the basis of intellectual or athletic abilities, measures of achievement or aptitude, disability, status as a handicapped person, homeless status, English proficiency, religion, creed, race, sex, color, national origin or any other basis that would be illegal for an existing school district.

Open Enrollment Period and Notice

The "Open Enrollment Period" is from the first day of school of the current school year until 5:00 p.m. on the last day of business in February of the current school year. Notice of the Open Enrollment Period and application process will be designed to inform the persons most likely to be interested in the school.

PrepNet or the school will provide notice of open enrollment on their websites and by (a) printing a legal notice of the enrollment period in a local newspaper of general circulation; (b) mailing a written notice of the open enrollment period and an application to all families who inquire about school enrollment; and (c) posting a written notice of the open enrollment period at the PrepNet offices, as applicable, and the school. In addition, notice may also be provided by airing a public service announcement on local television.

As part of the enrollment process, the school staff will seek to meet with families, parents/guardians and students prior to the first day of school via orientation meetings. In this way, applicants and their parents/guardians will have the opportunity to become fully informed as to the nature and scope of the school, its curriculum, and requirements.

Application Procedures

Interested parties may obtain applications at:

- The offices of the school
- The school's website www.arborprep.com
- The service center of PrepNet at 3755 36th Street SE, Grand Rapids, MI 49512
- By calling PrepNet at (734) 961-9700
- The offices of schools with a matriculation agreement with the school

Applications will be mailed, emailed or faxed to anyone requesting an application by telephone.

Applications for the current school year will be accepted until the end of the current school year and available seats will be filled at any time during the school year. Applications for the subsequent school year are received during the Open Enrollment Period. If applications received exceed offered seats in any grade level ("over-subscribed grades"), a random selection process will take place for all affected grade levels. If applications received are fewer than offered seats in each and every grade level ("under-subscribed grades"), all eligible applicants will be accepted and a random selection process will not be conducted.

All applications received after the Open Enrollment Period will not be eligible to participate in the random selection process, and will be added to the end of the accepted list if offered seats are still available after the random selection process, or to the resulting waiting list created at the time of the random selection process.

Accepted applicants must confirm their intent to attend the school within four weeks of acceptance by returning certain initial forms, including an Admissions Form and an Official Release of Records Form. The school will send letters to parents reminding them of this obligation in order to enroll their child. The school will send all applicants a postcard to inform parents/guardians that if the student does not attend the first day of school or call in to request an excused absence by the date and time indicated, the student will

Effective: May 1, 2014

forfeit his/her registered status in the school and will not be enrolled. The school will attempt to call all applicants who have not responded to inquire whether the applicant is still planning to attend.

Once students are enrolled and remain enrolled, they will remain eligible to be re-enrolled at the school for successive years without having to re-enter the random selection process. However, they will be requested to complete a re-enrollment form by the end of the Open Enrollment Period showing intent to re-enroll for the subsequent school year. All applicants on a waiting list must re-submit an application for the following school year during the next Open Enrollment Period.

Random Selection Process

The random selection process shall be open to the public and the school will notify all applicants of the time and place. A neutral third party person will be present during the random selection process. This person will not be related to any student, staff member, or anyone applying to the school. Names will be randomly selected until all offered seats have been filled. Any remaining names will be randomly selected to establish waiting list priority used to fill available offered seats prior to and during the school year for which the student applied. After all eligible names have been randomly selected, the school will add the names of applicants who submitted applications after the Open Enrollment Period in the order in which they were received. The random selection process is open to the public and will be videotaped. In the event of any discrepancy, the video tape will be the official record of placement of students.

Class Size and Offered Seats

Class size and offered seats will be recommended by PrepNet and submitted to the school board of directors for approval. In order to make provision for student attrition (reenrolling students who indicate that they are coming back but do not return on the first day of school) and erosion (new students who have been accepted for offered seats but are absent without excuse on the first day of school), the school may over-subscribe grades. The number of students to be over-subscribed will be determined based on historical and forecasted attrition and erosion. In addition, the number of classrooms may fluctuate in the event the number of students enrolled warrants the increase or decrease in number of classrooms. In no event will over-subscription, or fluctuations in the number of classrooms result in a violation of any provision or limit contained within the school's Charter Contract or applicable law.

Enrollment Preferences

Enrollment preference is first given to currently enrolled students. Next preference is given to the following ordered categories of applicants:

- Siblings of currently enrolled students
- Qualifying Students pursuant to matriculation agreements
- Siblings of Qualifying Students
- Siblings of students selected in the random selection process
- All remaining applicants

If a student is selected for a grade level that still has offered seats available and the student has a sibling applying for a grade that no longer has offered seats available, the student will be accepted for his/her grade level and the student's sibling will be placed on the waiting list for his/her grade level with sibling preference. Therefore, while sibling preference applies, siblings are not guaranteed a seat.

The school shall enroll at least five percent (5%) of its students through a random selection process.

Standby Opportunity Plan

The Standby Opportunity Plan (SOP) is a procedure by which the school may decide to revise its waiting list on the first day of school. If the school follows this procedure, the school will send all applicants on the waiting list a registration card prior to the first day of school. To be included in the SOP, the applicant must return the card to the school by the date indicated and include phone numbers where the applicant can be

Effective: May 1, 2014

reached the first day of school between the times listed on the card. In the event of an offered seat becoming available, the school will attempt to reach the parent/guardian participating in the SOP and offer the seat. If the school cannot reach the parent/guardian at the phone numbers and during the times provided on the card, the school will contact the next person on the waiting list who is participating in the SOP. If a student participates in the SOP and a seat is not available for them, they will receive a higher waiting list priority than those students who did not participate.

Procedural Steps

Step 1: Setup

A list with the name of each student who submitted an application during the Open Enrollment Period will be created. The list will include the student's name, grade level to which the student is applying, street address, telephone number, parent/guardian email address and names and grade levels of any siblings who are also applying for admission to the school.

Step 2: Admission of Applicants Applying for Under-Subscribed Grades

A neutral third-party person (as previously described) will randomly select the names of each applicant for each under-subscribed grade level. If the accepted student has siblings who are also applying for admission, the siblings will be accepted if there are offered seats available, or placed on the waiting list with sibling preference if offered seats are not available. This admissions process will continue for the successive under-subscribed grades for all students until all names have been selected with their associated siblings.

Step 3: Admission of Applicants Applying for Over-Subscribed Grades

A neutral third-party person will then randomly select the order in which over-subscribed grades will be filled. Students will be randomly selected for available seats or placed on the waiting list if an offered seat is not available. If the selected student is accepted and has siblings who are also applying for admission, the siblings will be accepted if there are offered seats available or placed on the waiting list with sibling preference if offered seats are not available. If the selected student is placed on the waiting list and has siblings who are also applying, the siblings' names will not be selected at this time, but will wait until their grade level is selected.

Step 4: Waiting List Priority

Students will continue to be randomly selected until all names are selected. After a grade level's seats are full, all remaining names will be placed on the waiting list in the order in which they are selected. Applications received after the Open Enrollment Period will be added to the end of the waiting list for the appropriate grade in the order in which they were received.

When a seat becomes available in a particular grade due to attrition, erosion, or other event, if that particular grade has a waiting list, that available seat will be filled by the first student on the waiting list for that particular grade. If a waiting list does not exist for that particular grade, but exists for another grade, the school may (subject to applicable enrollment limits and board approved offered seats) fill the available seat using the first student on the waiting list in a different grade, the grade deemed most beneficial to student and school considering class size, teacher capacity, and other school operational factors.

Appeals

Any parent or guardian who wishes to contest or appeal any aspect of the random selection process may do so in writing to the school's board sent to the school's address. Following receipt of the parent's/guardian's written appeal, a school board designee will contact the parent/guardian to discuss the nature of the concern or objection. Final decisions will be made by the school board.

Effective: May 1, 2014

SECTION G

SCHOOL CALENDAR AND SCHOOL DAY SCHEDULE

SCHOOL CALENDAR AND SCHOOL DAY SCHEDULE

Pursuant to Applicable Law and the Terms and Conditions of this Contract, including Article VI, Section 6.7, the Academy shall comply with the school calendar and school day schedule requirements identified in this schedule.

School Calendar

The Academy's school calendar shall comply with Sections 1175, 1284 and 1284a, if applicable, of the Code. The Academy's school calendar shall also comply with the minimum requirements set forth in Section 101 of the School Aid Act of 1979 (MCL 388.1701). The Academy Board must submit a copy of the Academy's school calendar to The Center for Charter Schools ("The Center") in accordance with the Master Calendar of Reporting Requirements.

School Day Schedule

The Academy Board must structure the Academy's school day schedule to meet the required number of instructional days and hours. The Academy Board must submit the school day schedule to The Center prior to the commencement of each academic year.

SECTION H

AGE OR GRADE RANGE OF PUPILS

AGE OR GRADE RANGE FOR PUPILS TO BE ENROLLED

Pursuant to Applicable Law and the Terms and Conditions of this Contract, including Article VI, Section 6.8, the Academy shall comply with the age or grade ranges as stated in this schedule.

The Academy will enroll students in kindergarten through eighth grade. The Academy may add grades with the prior written approval of the authorizing body.

Students of the Academy will be children who have reached the age of 5 by the dates outlined in the Revised School Code.

SCHEDULE 8

**INFORMATION AVAILABLE TO
THE PUBLIC AND TO THE CENTER**

INFORMATION AVAILABLE TO THE PUBLIC AND THE CENTER

Pursuant to Applicable Law and the Terms and Conditions of this Contract, including Article XI, Section 11.8, the Academy shall comply with this Schedule.

Information Available to the Public and The Center

The Code provides that the board of directors of a public school academy shall make information concerning its operation and management available to the public and to the Center in the same manner as is required by state law for school districts.

The Code provides that the board of directors of a public school academy shall collect, maintain, and make available to the public and The Center, in accordance with applicable law and the Contract, at least all of the following information concerning the operation and management of the Academy:

1. A copy of the Academy's Charter Contract.
2. A list of currently serving members of the Academy Board, including name, address, and term of office.
3. Copies of policies approved by the Academy Board.
4. The Academy Board meeting agendas and minutes.
5. The budget approved by the Academy Board and of any amendments to the budget.
6. Copies of bills paid for amounts of \$10,000.00 or more, as submitted to the Academy Board.
7. Quarterly financial reports submitted to The Center.
8. A current list of teachers and administrators working at the Academy that includes individual salaries as submitted to the Registry of Educational Personnel.
9. Copies of the teaching or administrator's certificates or permits of current teaching and administrative staff.
10. Evidence of compliance with the criminal background and records checks and unprofessional conduct check required under sections 1230, 1230a, and 1230b of the Code for all teachers and administrators working at the Academy.
11. Curriculum documents and materials given to The Center.
12. Proof of insurance as required by the Contract.
13. Copies of facility leases or deeds, or both.
14. Copies of any equipment leases.
15. Copies of any management contracts or services contracts approved by the Academy Board.
16. All health and safety reports and certificates, including those relating to fire safety, environmental matters, asbestos inspection, boiler inspection, and food service.
17. Any management letters issued as part of the Academy's annual financial audit, required under Article VI, Section 6.11 of the Terms and Conditions of this Contract.
18. Any other information specifically required under the Code.

Information to be Provided by the Academy's Educational Service Provider (if any)

Pursuant to the Terms and Conditions of this Contract, including Article III, Section 3.6, the University Board authorizes the Academy Board to employ or contract for personnel according to the position information outlined in Schedule 5. Any Educational Service Provider Management Agreement entered into by the Academy must contain a provision requiring the educational service provider to provide to the Academy Board information concerning the operation and management of the Academy (including without limitation, but not limited to, the items identified above and annually the information that a school district is required to disclose under Section 18(2) of the State School Aid Act of 1979, MCL 388.1618) available to the Academy Board in order to enable the Academy to fully satisfy its obligations under Section 11.8(a) of the Terms and Conditions.

AMENDMENT NO. 1

to the
July 1, 2016 Contract to Charter
A School of Excellence and Related Documents

Issued To

SOUTH ARBOR CHARTER ACADEMY
(A SCHOOL OF EXCELLENCE)

By

THE CENTRAL MICHIGAN UNIVERSITY
BOARD OF TRUSTEES
(AUTHORIZING BODY)

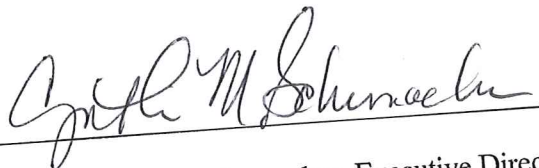

CONTRACT AMENDMENT NO. 1

SOUTH ARBOR CHARTER ACADEMY

In accordance with Article IX of the Terms and Conditions of the Contract (the "Contract"), dated July 1, 2016, issued by the CENTRAL MICHIGAN UNIVERSITY BOARD OF TRUSTEES (the "University Board") to SOUTH ARBOR CHARTER ACADEMY (the "Academy"), the parties agree to amend the Contract as follows:

- 1.) Amend Schedule 7, Section e: Methods of Pupil Assessment, by replacing the materials contained therein with the materials attached as Tab 1.

This entire amendment is hereby approved by the University Board and the Academy Board through their authorized designees, and shall have an effective date of July 1, 2016.

Contract Amendment No. 1

Tab 1

METHODS OF PUPIL ASSESSMENT

Pursuant to Applicable Law and the Terms and Conditions of this Contract, including Article VI, Section 6.5, the Academy shall properly administer all state-mandated academic assessments identified in the Code, as applicable, and all academic assessments identified in the Public School Academy Chartering Policies adopted by the University Board, as applicable, in accordance with the requirements detailed in the Master Calendar annually issued by the Center.

The Academy shall authorize the Center to have access to the Academy's Student/School Data Applications through the Center for Educational Performance and Information and to the electronic reporting system administered by the Michigan Department of Education to access the Academy's state assessment results, as applicable. The Academy shall ensure that those involved with the administration of these assessments are properly trained and adhere to the ethical standards and testing procedures associated with these assessments.

Academic Assessments to Be Administered:

Assessments as identified in Schedule 7b and all state-mandated assessments.

AMENDMENT NO. 2

to the
July 1, 2016 Contract to Charter
A School of Excellence and Related Documents

Issued To

SOUTH ARBOR CHARTER ACADEMY
(A SCHOOL OF EXCELLENCE)

By

THE CENTRAL MICHIGAN UNIVERSITY
BOARD OF TRUSTEES
(AUTHORIZING BODY)

CONTRACT AMENDMENT NO. 2

SOUTH ARBOR CHARTER ACADEMY

In accordance with Article IX of the Terms and Conditions of the Contract (the “Contract”), dated July 1, 2016, issued by the CENTRAL MICHIGAN UNIVERSITY BOARD OF TRUSTEES (the “University Board”) to SOUTH ARBOR CHARTER ACADEMY (the “Academy”), as amended, the parties agree to further amend the Contract as follows:

- 1.) Amend the Terms and Conditions of Contract by inserting at the end of Section 1.1. Certain Definitions, the definitions attached as Tab 1.
- 2.) Amend Article II: Relationship Between the Academy and the University Board, Article III: Role of the University Board as Authorizing Body, Article IX: Amendment, Article X: Contract Revocation, Termination, and Suspension, and Article XII: General Terms, of the Terms and Conditions of Contract by inserting at the end of these Articles the corresponding language attached as Tab 2.
- 3.) Amend Section 2.1. Constitutional Status of Central Michigan University, Section 10.3. Automatic Amendment or Revocation and Procedures Initiated by State of Michigan, Section 10.4. Material Breach of Contract and Automatic Termination Caused by Placement of Academy in State School Reform/Redesign School District, Section 10.5. Grounds and Procedures for Academy Termination of Contract, Section 10.6. Grounds and Procedures for University Termination of Contract, Section 10.7(d). University Board’s Contract Reconstitution Provision, and Section 11.1. The Academy Budget, of the Terms and Conditions of Contract by replacing the language contained within these Sections with the corresponding language attached as Tab 3.
- 4.) Amend Schedule 1: Restated Articles of Incorporation, by replacing the materials contained therein with the materials attached as Tab 4.
- 5.) Amend Schedule 2: Amended Bylaws, by inserting at the end of Article XI: Amendments, the language attached as Tab 5.
- 6.) Amend Schedule 7, Section b: Educational Goal and Related Measures, by replacing the materials contained therein with the materials attached as Tab 6.

This space left intentionally blank.

Christopher Andrews

This entire amendment is hereby approved by the University Board and the Academy Board through their authorized designees, and shall have an effective date of July 1, 2017.

Contract Amendment No. 2

Tab 1

- (x) “Accountability Plan” means a Community District accountability plan established, implemented and administered by the State School Reform/Redesign Officer under section 390 of the Code, MCL 380.390.
- (y) “Community District” means a community school district created under part 5B of the Code, MCL 380.381 et seq.
- (z) “State School Reform/Redesign Office” means the office created within the Michigan Department of Technology Management and Budget by Executive Reorganization Order 2015-02 and codified at MCL 18.445.
- (aa) “State School Reform/Redesign Officer” means the officer described in Section 1280c(9) of the Revised School Code, 1976 PA 451, MCL 380.1280c, and authorized to act as the superintendent of the State School Reform/Redesign District under Section 1280c(6)(b) of the Revised School Code, 1976 PA 451, MCL 380.1280c.

South Arbor Charter Academy

Contract Amendment No. 2

Tab 2

Section 2.5. Academy Site Is Former Site of Closed Community District School; State School Reform/Redesign Officer Approval Required. If the Academy's proposed site is located within the geographical boundaries of a Community District and is a site that was a former site of a Community District school closed by the State School Reform/Redesign Office within the last 3 school years, then the University Board shall not issue the Contract unless (a) the new Academy site has a substantially different leadership structure and curricular offering than the previous Community District school that operated at the site; and (b) the State School Reform/Redesign Officer has approved the Academy's use of the site.

Section 2.6. New Public School Academies Located Within the Boundaries of a Community District. If the circumstances listed below in (a) and (b) or (c) apply to the Academy's site, the Academy represents to the University Board, intending that the University Board rely on such representation as a precondition to issuing a contract for a new public school academy, that the Academy will have a substantially different governance, leadership and curriculum than the public school previously operating at the site:

- (a) The Academy's proposed site is the same location as a public school that (i) is currently on the list of the public schools in this State that the State School Reform/Redesign Office has determined to be among the lowest achieving 5% of all public schools, under Section 1280c(1) of the Code; or (ii) has been on the list during the immediately preceding 3 school years.
- (b) If an Accountability System has been in effect for at least 3 full school years, the Academy's proposed site is at the same location as a public school that has been assigned a grade of "F" under the Accountability System for 3 of the preceding 5 school years; or
- (c) The Academy's proposed site is the same location of another public school academy, urban high school academy, school of excellence or strict discipline academy whose contract was revoked or terminated by an authorizing body.

Section 3.10. Reimbursement of University Board Services. The University Board shall be reimbursed for the actual cost of University services associated with responding to third party subpoenas and freedom of information act (FOIA) requests under the following circumstances:

If the University receives a subpoena or FOIA request from a third party (including the Academy, its counsel, the Academy's ESP or its counsel) demanding the production of Academy documents related to pending litigation or proceedings involving the Academy, the Academy's ESP (or any subcontractor of the ESP or other contractors of the Academy) or a third party, the University may charge the Academy for the actual cost of the services associated with the University's response to the subpoena or FOIA request(s) (including actual attorney's fees in fulfilling the request). The parties agree that the Academy may reduce or avoid the obligation to pay for services by the University Board associated with such responses by directly producing Academy documents to the requesting party.

Section 9.6. Emergency Action on Behalf of University Board. Notwithstanding any other provision of this Contract to the contrary, the contents of this Section shall govern in the event of an emergency situation that arises between meetings of the University Board. An emergency situation shall be deemed to occur if the University President, in his or her sole discretion, determines that the facts and circumstances warrant that emergency action take place before the next meeting of the University Board. Upon the determination that an emergency situation exists, the University President may temporarily take action on behalf of the University Board with regard to the Academy or the Contract, so long as such action is in the best interest of the University Board and the University President consults with the University Board Chairperson prior to taking the intended actions. When acting during an emergency situation, the University President shall have the authority to act in place of the University Board, and such emergency action shall only be effective in the interim before the earlier of (a) rejection of the emergency action by the Chairperson of the University Board; or (b) the next meeting of the University Board. The University President shall immediately report such action to the University Board for confirmation at the next meeting so that the emergency action continues or, upon confirmation by the University Board, becomes permanent.

Section 10.9. Appointment of Conservator/Trustee. Notwithstanding any other provision of the Contract, when the University Board determines that conditions or circumstances exist to lead the University Board to believe that the health, safety, educational or economic interest of the Academy or its students are at risk, the University Board may take immediate action against the Academy by appointing a conservator/trustee to manage the day to day operations of the Academy in place of the Academy Board for a definitive period of time. A conservator/trustee appointed by the University Board shall have all the powers and authority of the Academy Board under this Contract and Applicable Law. Upon the appointment of a conservator/trustee, the appointment and term of office for each Academy Board member shall be automatically suspended and the conservator/trustee shall act in the place and stead of the Academy Board and its members. The Center Director shall provide the Academy Board with a copy of the University Board's appointment. All Academy Board members, officers, employees, consultants and vendors (including any ESP and its members, officers, employees, consultants and subcontractors) shall cooperate with the conservator/trustee and provide the conservator/trustee with requested information or documentation in a timely manner. At the sole discretion of the University Board, the University Board shall rescind the appointment of the conservator/trustee and return governance and operational control of the Academy to the Academy Board when the conditions or circumstances leading the University Board to believe the health, safety, educational or economic interest of the Academy or its students are no longer at risk. The Center Director shall work with the conservator/trustee and the Academy Board to facilitate the appointment of the conservator/trustee and the transition back from conservator/trustee to Academy Board governance.

Section 12.17. Termination of Responsibilities. Upon termination or revocation of the Contract, the University Board or its designee shall have no further obligations or responsibilities under this Contract to the Academy or any other person or persons in connection with this Contract. Upon termination or revocation of the Contract, the Academy may amend its articles of incorporation or bylaws as necessary to allow the Academy Board to: (a) take action to appoint Academy Board members in order to have a quorum necessary to take Academy Board action; or (b) effectuate a dissolution, provided that the Academy Board may not amend the articles of incorporation with regard to the disposition of assets upon dissolution.

South Arbor Charter Academy

Contract Amendment No. 2

Tab 3

Section 2.1. Constitutional Status of Central Michigan University. Central Michigan University is a constitutionally established body corporate operating as a state public university. The University Board is an authorizing body as defined by the Code. In approving this Contract, the University Board voluntarily exercises additional powers given to the University under the Code. Nothing in this Contract shall be deemed to be any waiver of Central Michigan University's powers or independent status and the Academy shall not be deemed to be a part of Central Michigan University. If applicable, the University Board has provided to the State School Reform/Redesign Officer the accreditation notice required under Section 551.

Section 10.3. Automatic Amendment Of Contract; Automatic Termination of Contract If All Academy Sites Closed Or Placed In State School Reform/Redesign District; Voluntary Joint Termination of Contract Based On Economic Hardship. Except as otherwise provided in this Section 10.3, if the University Board is notified by the State School Reform/Redesign Officer that either (i) an Academy site is subject to closure under section 507 of the Code, MCL 380.507 (“State’s Automatic Closure Notice”), or (ii) an Academy site is being placed in the State School Reform/Redesign District (“State’s Reform District Notice”) pursuant to section 1280c(6) of the Code, MCL 380.1280c, then this Contract shall automatically be amended to eliminate the Academy’s authority to operate certain age and grade levels at the site or sites identified in the State’s Automatic Closure Notice or the State’s Reform District Notice. If the State’s Automatic Closure Notice or State’s Reform District Notice includes all of the Academy’s existing sites, then this Contract shall automatically be terminated at the end of the current school year in which either the State’s Automatic Closure Notice or the State’s Reform District Notice is received without any further action of the University Board or the Academy. If the Center Director determines, in his or her discretion, that either the closure of one or more Academy sites, or the placement of one or more Academy sites in the State School Reform/Redesign District, creates a significant economic hardship for the Academy as a going concern, then the Center Director may recommend that the University Board terminate the Contract at the end of the current school year. The University Board’s revocation procedures set forth in Section 10.7(c) do not apply to an automatic termination initiated by the State School Reform/Redesign Officer or a termination by the University Board under this Section 10.3.

Following receipt of the State’s Automatic Closure Notice or the State’s Reform District Notice, the Center Director shall forward a copy of the notice to the Academy Board and request a meeting with the Academy Board representatives to discuss the Academy’s plans and procedures for the elimination of certain age or grade levels at the identified site or sites, or if all of the Academy’s existing sites are included in that notice, then wind-up and dissolution of the Academy corporation at the current school year. All Academy inquiries and requests for reconsideration of the State’s Automatic Closure Notice or the State’s Reform District Notice, including the granting of any hardship exemption rescinding the State’s Automatic Closure Notice, shall be directed to the State School Reform/Redesign Officer, in a form and manner determined by the State School Reform/Redesign Office or the Michigan Department of Technology Management and Budget.

If the State School Reform/Redesign Officer rescinds the State’s Automatic Closure Notice or the State’s Reform District Notice for an Academy site or sites, the Academy is not required to close the identified site(s), but shall present to the Center a proposed Contract amendment incorporating the State School Reform/Redesign Officer’s school improvement plan, if applicable, for the identified site(s).

Section 10.4. Material Breach of Contract; Termination of Contract By University Board Caused By State School Reform/Redesign Officer Order. If the University Board receives notice that (i) an order has been issued by the State School Reform/Redesign Officer under Section 1280c(2) of the Code, MCL 380.1280c(2), placing an Academy site or sites under the supervision of the State School Reform/Redesign Officer; or (ii) an order is issued by the State School Reform/Redesign Officer appointing a Chief Executive Officer to take control of an Academy site or sites pursuant to Section 1280c(7) of the Code, MCL 380.1280c(7), the Center Director may, at his or her discretion, deem such actions a material breach of this Contract. If the Center Director determines that the issuance of such an order constitutes a material breach of this Contract, the Center Director shall notify the Academy of the material breach and request a meeting with Academy Board representatives to discuss the matter. To remedy the material breach, the Academy shall work toward the development of a corrective action plan within thirty (30) days that is acceptable to the Center Director. In addition to other matters, the corrective action plan shall include the Academy’s redesign plan, if applicable, prepared pursuant to section 1280c of the Code. The development of a corrective action plan under this Section 10.4 shall not in any way limit the rights of the University Board to revoke, terminate, or suspend this Contract. If the Center Director determines that the Academy is unable

to develop a corrective action plan that can remedy the material breach and that is acceptable to the University, the Center Director shall recommend that the University Board terminate the Contract at the end of the current school year. If the University Board approves to terminate the Contract under this Section 10.4, the Contract shall be terminated at the end of the current school year without any further action of either party. If this Contract is terminated pursuant to this Section 10.4, the termination and revocation procedures in Section 10.6 and Section 10.7 shall not apply.

Section 10.5. Grounds and Procedures for Academy Termination of Contract. The Academy Board, by majority vote of its Directors, may, at any time and for any reason, request termination of this Contract. The Academy Board's request for termination shall be made to the Center Director not less than six (6) calendar months in advance of the Academy's proposed effective date of termination. Upon receipt of an Academy request for termination, the Center Director shall present the Academy Board's request for termination to the University Board. A copy of the Academy Board's resolution approving of the Contract termination, including a summary of the reasons for terminating the Contract, shall be included with the Academy Board's request for termination. Upon receipt of the Academy Board's request for termination, the University Board shall consider and vote on the proposed termination request. The University Board may, in its sole discretion, waive the six (6) month advance notice requirement for terminating this Contract.

Section 10.6. Grounds and Procedures for University Termination of Contract. The University Board, in its sole discretion, reserves the right to terminate the Contract (i) for any reason or for no reason provided that such termination shall not take place less than six (6) months from the date of the University Board's action; or (ii) if there is a change in Applicable Law that the University Board, in its sole discretion, determines impairs its rights and obligations under the Contract or requires the University Board to make changes in the Contract that are not in the best interest of the University Board or the University, then such termination shall take effect at the end of the current Academy fiscal year. Following University Board approval, the Center Director shall provide notice of the termination to the Academy. If during the period between the University Board action to terminate and the effective date of termination, the Academy has violated the Contract or Applicable Law, the Contract may be revoked or suspended sooner pursuant to this Article X. If this Contract is terminated pursuant to this Section 10.6, the revocation procedures in Section 10.7 shall not apply.

Section 10.7(d). University Board's Contract Reconstitution Provision. The Center Director may reconstitute the Academy in an effort to improve student educational performance or to avoid interruption of the educational process. Reconstitution may include, but is not limited to, one of the following actions: (i) removal of 1 or more members of the Academy Board; (ii) termination of at-will board appointments of 1 or more Academy Board members in accordance with The Method of Selection, Appointment and Removal Resolution; (iii) withdrawing approval of a contract under Section 506 of the Code; or (iv) the appointment of a new Academy Board of Directors or a conservator/trustee to take over operations of the Academy.

Except as otherwise provided in this subsection, reconstitution of the Academy does not restrict the State School Reform/Redesign Officer from issuing an order under section 507 of the Code, MCL 380.507, directing the automatic closure of the Academy's site(s). If, however, the Academy is located within the boundaries of a Community District and an Accountability Plan is in place, the Center shall notify the State School Reform/Redesign Officer that the Plan of Correction includes a reconstitution of the Academy to ensure that the Academy is not subject to automatic closure by the State School Reform/Redesign Officer under section 507 of the Code, MCL 380.507.

Section 11.1. The Academy Budget; Transmittal of Budgetary Assumptions; Budget Deficit; Enhanced Deficit Elimination Plan. The Academy agrees to comply with all of the following:

- (a) The Academy Board is responsible for establishing, approving, and amending an annual budget in accordance with the Uniform Budgeting and Accounting Act, MCL 141.421, et seq. The Academy Board shall submit to the Center a copy of its annual budget for the upcoming fiscal year in accordance with the Master Calendar. The budget must detail budgeted expenditures at the object level as described in the Michigan Department of Education's Michigan School Accounting Manual. In addition, the Academy Board is responsible for approving all revisions and amendments to the annual budget. In accordance with the Master Calendar, revisions or amendments to the Academy's budget shall be submitted to the Center following Academy Board approval.
- (b) Unless exempted from transmitting under section 1219 of the Code, MCL 380.1219, the Academy, on or before July 7th of each school fiscal year, shall transmit to the Center for Educational Performance and Information ("CEPI") the budgetary assumptions used when adopting its annual budget pursuant to the Uniform Budgeting and Accounting Act, MCL 141.421 et seq.
- (c) The Academy shall not adopt or operate under a deficit budget, or incur an operating deficit in a fund during any fiscal year. At any time during the term of this Contract, the Academy shall not have an existing deficit fund balance, incur a deficit fund balance, or adopts a current year budget that projects a deficit fund balance. If the Academy has an existing deficit fund balance, incurs a deficit fund balance in the most recently completed school fiscal year, or adopts a current year budget that projects a deficit fund balance, all of the following apply:
 - i. The Academy shall notify the Superintendent and the State Treasurer immediately upon the occurrence of the circumstance, and provide a copy of the notice to the Center.
 - ii. Within 30 days after making notification under subdivision (i), the Academy shall submit to the Superintendent in the form and manner prescribed by the Department an amended budget for the current school fiscal year and a deficit elimination plan approved by the Academy Board, with a copy to the State Treasurer. The Academy shall transmit a copy of the amended budget and the deficit elimination plan to the Center.
 - iii. After the Superintendent approves Academy's deficit elimination plan, the Academy shall post the deficit elimination plan on the Academy's website.
- (d) If the Academy is required by the State Treasurer to submit an enhanced deficit elimination plan under section 1220 of the Code, MCL 380.1220, the Academy shall do all of the following:
 - i. The enhanced deficit elimination plan shall be approved by the Academy Board before submission.
 - ii. After the State Treasurer approves an enhanced deficit elimination plan for the Academy, the Academy shall post the enhanced deficit elimination plan on the Academy's website.
 - iii. As required, submit to the Superintendent and State Treasurer an enhanced monthly monitoring reports in a form and manner prescribed by the State Treasurer and post such monthly reports on the Academy's website.

RESTATED ARTICLES OF INCORPORATION
For Use by Domestic Nonprofit Corporations

OF

SOUTH ARBOR CHARTER ACADEMY

Pursuant to the provisions of the Michigan Nonprofit Corporation Act (Act 162) of 1982, as amended (the "Act"), being MCL 450.2101 et seq. and Revised School Code (the "Code") as amended, being Sections 380.551 et seq. of the Michigan Compiled Laws, the undersigned corporation executes the following Restated Articles:

The present name of the corporation is: South Arbor Charter Academy.

The corporation identification number ("CID") assigned by the Bureau is: 762564.

The corporation has used no other names.

The date of filing the original Articles of Incorporation was: July 13, 1999.

The dates of filing restated Articles of Incorporation were: July 14, 2011.

The following Restated Articles of Incorporation supersede the Articles of Incorporation and shall be the Articles of Incorporation for the corporation:

ms 4/10/00 C&I BAF 730609

ARTICLE I

The name of the corporation is: South Arbor Charter Academy.

The authorizing body for the corporation is: Central Michigan University Board of Trustees.

ARTICLE II

The purpose or purposes for which the corporation is organized are:

1. The corporation is organized for the purpose of operating as a School of Excellence in the State of Michigan pursuant to Part 6E of the Code, being Section 380.551 et seq. of the Michigan Compiled Laws.

2. The corporation, including all activities incident to its purposes, shall at all times be conducted so as to be a governmental entity pursuant to Section 115 of the United States Internal Revenue Code ("IRC") or any successor law. Notwithstanding any other provision of these Restated Articles, the corporation shall not carry on any other activity not permitted to be carried on by a governmental instrumentality exempt from federal income tax under Section 115 of the IRC or by a nonprofit corporation organized under the laws of the State of Michigan and subject to a Contract authorized under the Code.

ARTICLE III

The corporation is organized on a non-stock basis.

The value of assets which the corporation possesses is:

Real Property: \$0.00

Personal Property: \$10,125.02 (playground)

The corporation is to be financed under the following general plan:

- a. State school aid payments received pursuant to the State School Aid Act of 1979 or any successor law.
- b. Federal funds.
- c. Donations.
- d. Fees and charges permitted to be charged by schools of excellence.
- e. Other funds lawfully received.

The corporation is organized on a directorship basis.

ARTICLE IV

The name of the resident agent at the registered office is LaRae G. Munk.

The address of its registered office in Michigan is: CS3 LAW PLLC, 125 Ottawa Ave. NW Ste. 245, Grand Rapids, MI 49503.

The mailing address of the registered office in Michigan is: CS3 LAW PLLC, 125 Ottawa Ave. NW, Ste. 245, Grand Rapids, MI 49503.

ARTICLE V

The corporation is a governmental entity.

ARTICLE VI

The corporation and its incorporators, board members, officers, employees, and volunteers have governmental immunity as provided in section 7 of Act No. 170 of the Public Acts of 1964, being section 691.1407 of the Michigan Compiled Laws.

ARTICLE VII

Before execution of a Contract to charter a School of Excellence between the corporation and Central Michigan University Board of Trustees (the "University Board"), the method of selection, length of term, and the number of members of the Board of Directors of the corporation shall be approved by a resolution of the University Board as required by the Code.

ARTICLE VIII

The Board of Directors shall have all the powers and duties permitted by law to manage the business, property and affairs of the corporation.

ARTICLE IX

The officers of the corporation shall be a President, Vice-President, Secretary and a Treasurer, each of whom shall be a member of the Board of Directors and shall be selected by the Board of Directors. The Board of Directors may select one or more assistants to the Secretary or Treasurer, and may also appoint such other agents as it may deem necessary for the transaction of the business of the corporation.

ARTICLE X

No part of the net earnings of the corporation shall inure to the benefit of or be distributable to its board, directors, officers or other private persons, or organization organized and operated for a profit (except that the corporation shall be authorized and empowered to pay reasonable compensation for services rendered and to make payments and distributions in the furtherance of the purposes set forth in Article II hereof). Notwithstanding any other provision

of these Restated Articles, the corporation shall not carry on any other activities not permitted to be carried on by a governmental entity exempt from federal income tax under section 115 of the IRC, or comparable provisions of any successor law.

To the extent permitted by law, upon the dissolution of the corporation, the board shall after paying or making provision for the payment of all of the liabilities of the corporation, dispose of all of the assets of the corporation to the University Board for forwarding to the state school aid fund established under article IX, section 11 of the Constitution of the State of Michigan of 1963, as amended.

ARTICLE XI

These Restated Articles of Incorporation shall not be amended except by the process provided in Article IX of the Terms and Conditions incorporated as part of the Contract. This process is as follows:

The corporation, by a majority vote of its Board of Directors, may, at any time, propose specific changes to these Restated Articles of Incorporation or may propose a meeting to discuss potential revision to these Restated Articles of Incorporation. The proposal will be made to the University Board through its designee. The University Board delegates to The Governor John Engler Center for Charter Schools' ("The Center") Executive Director the review and approval of changes or amendments to these Restated Articles of Incorporation. In the event that a proposed change is not accepted by The Center's Executive Director, the University Board shall consider and vote upon a change proposed by the corporation following an opportunity for a written and oral presentation to the University Board by the corporation.

At any time and for any reason, the University Board or an authorized designee may propose specific changes to these Restated Articles of Incorporation or may propose a meeting to discuss potential revision. The corporation's Board of Directors may delegate to an officer of the corporation the review and negotiation of changes or amendments to these Restated Articles of Incorporation. The Restated Articles of Incorporation shall be amended as requested by the University Board or an authorized designee upon a majority vote of the corporation's Board of Directors.

Amendments to these Restated Articles of Incorporation take effect only after they have been approved by the corporation's Board of Directors and by the University Board or The Center's Executive Director, and the amendments are filed with the Michigan Department of Licensing and Regulatory Affairs, Bureau of Commercial Services. In addition, the corporation shall file with the amendment a copy of the University Board's or The Center's Executive Director's approval of the amendment.

Upon termination or revocation of the Contract, the Academy may amend its articles of incorporation as necessary to allow the Academy Board to: (a) take action to appoint Academy Board members in order to have a quorum necessary to take Academy Board action; or (b) effectuate a dissolution, provided that the Academy Board may not amend the articles of incorporation with regard to the disposition of assets upon dissolution.

ARTICLE XII

The definitions set forth in the Terms and Conditions incorporated as part of the Contract shall have the same meaning in these Restated Articles of Incorporation.

ADOPTION OF ARTICLES

These Restated Articles of Incorporation were duly adopted on the 9th day of August, 2017, in accordance with the provisions of Section 642 of the Act. These Restated Articles of Incorporation restate, integrate and do further amend the provisions of the Articles of Incorporation and were duly adopted by the directors. The necessary number of votes were cast in favor of these Restated Articles of Incorporation.

Signed this 9th day of August, 2017.

Contract Amendment No. 2

Tab 5

Upon termination or revocation of the Contract, the Academy may amend its Bylaws as necessary to allow the Academy Board to: (a) take action to appoint Academy Board members in order to have a quorum necessary to take Academy Board action; or (b) effectuate a dissolution, provided that the Academy Board may not amend the Bylaws with regard to the disposition of assets upon dissolution.

South Arbor Charter Academy

Contract Amendment No. 2

Tab 6

EDUCATIONAL GOAL AND RELATED MEASURES

Pursuant to Applicable Law and the Terms and Conditions of this Contract, including Article VI, Section 6.2, the Academy shall achieve or demonstrate measurable progress for all groups of pupils toward the achievement of the educational goal identified in this schedule. Although an increase in academic achievement for all groups of pupils as measured by assessments and other objective criteria is the most important factor in determining the Academy's progress toward the achievement of the educational goal, the Center also considers other factors. Upon request, the Academy shall provide the Center with a written report, along with supporting data, assessing the Academy's progress toward achieving this goal. In addition, the University expects the Academy will meet the State of Michigan's accreditation standards pursuant to state and federal law.

Educational Goal to Be Achieved

Prepare students academically for success in college, work and life.

Measures to Assist in Determining Measurable Progress Towards Goal Achievement

To assist in determining whether the Academy is achieving measurable progress toward the achievement of this goal, the Center will annually assess the Academy's performance using the following measures:

Indicator 1: Student Achievement

The academic achievement of all students in grades three through eight, who have been enrolled three or more years at the Academy, will be assessed using the following measures and targets:

Grade(s)	Measure	Achievement Targets
3-8	The percentage of students achieving scaled scores meeting or surpassing national norms on the NWEA MAP reading and math tests administered in the Spring.	At least 50% of eligible students will produce scaled scores that meet or surpass the grade-level nationally normed benchmarks identified in this schedule.

NWEA MAP 2015 National Norms

Grade	Spring Benchmark in Reading ≥RIT score below	Spring Benchmark in Math ≥RIT score below
3	198.6	203.4
4	205.9	213.5
5	211.8	221.4
6	215.8	225.3
7	218.2	228.6
8	220.1	230.9

Indicator 2: Student Growth

The academic growth of all students in grades three through eight at the Academy will be assessed using the following measures and targets:

Grade(s)	Measure	Growth Targets
3-8	The median of student growth percentiles reflecting fall-to-spring scaled score growth on the reading and math NWEA MAP tests.	The median growth percentile will be at or above the 50 th percentile.

AMENDMENT NO. 3

to the
July 1, 2016 Contract to Charter
A School of Excellence and Related Documents

Issued To

SOUTH ARBOR CHARTER ACADEMY
(A SCHOOL OF EXCELLENCE)

By

THE CENTRAL MICHIGAN UNIVERSITY
BOARD OF TRUSTEES
(AUTHORIZING BODY)

CONTRACT AMENDMENT NO. 3

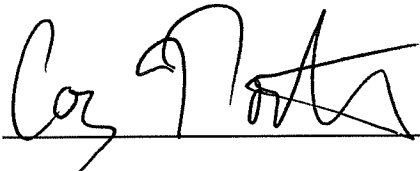

SOUTH ARBOR CHARTER ACADEMY

In accordance with Article IX of the Terms and Conditions of the Contract (the “Contract”), dated July 1, 2016, issued by the CENTRAL MICHIGAN UNIVERSITY BOARD OF TRUSTEES (the “University Board”) to SOUTH ARBOR CHARTER ACADEMY (the “Academy”), as amended, the parties agree to further amend the Contract as follows:

- 1.) Amend Tab A: Reauthorizing Resolution, by replacing the Public School Academy Board of Directors: Method of Selection, Appointment, and Removal contained therein with the Public School Academy Board of Directors: Method of Selection, Appointment and Removal, attached as Tab 1.
- 2.) Amend Section 1.1. Certain Definitions, Section 2.5. Academy Site Is Former Site of Closed Community District School; State School Reform/Redesign Officer Approval Required, Section 3.8. Administrator and Teacher Evaluation Systems, Section 4.4. Incompatible Public Offices and Conflicts of Interest Statutes, Section 4.5. Prohibition of Identified Family Relationships, Section 10.9. Appointment of Conservator/Trustee, and Section 11.7. Special Education, of the Terms and Conditions of Contract by replacing the language contained within these Sections with the corresponding language attached as Tab 2.
- 3.) Amend Article I: Definitions, Article II: Relationship Between the Academy and the University Board, Article VI: Operating Requirements, Article X: Contract Revocation, Termination, and Suspension, and Article XII: General Terms, of the Terms and Conditions of Contract by inserting at the end of these Articles the corresponding language attached as Tab 3.
- 4.) Amend Article III: Role of the University Board as Authorizing Body, of the Terms and Conditions of Contract by removing from this Article Section 3.9. Teacher and Administrator Job Performance Criteria.
- 5.) Amend Article VIII: Contracts, Loans, Checks and Deposits; Special Corporate Acts of the Amended Bylaws by replacing the language contained within Section 6. Contracts Between Corporation and Related Persons, with the language attached as Tab 4.

This space left intentionally blank.

This entire amendment is hereby approved by the University Board and the Academy Board through their authorized designees, and shall have an effective date of July 1, 2018.

Contract Amendment No. 3

Tab 1

Public School Academy Board of Directors: Method of Selection, Appointment and Removal

The Central Michigan University Board of Trustees declares that the method of selection, length of term, and number of board members shall be as follows.

Method of Selection and Appointment

The Central Michigan University Board of Trustees ("University Board") shall prescribe the method of appointment for members of an academy's board of directors. The director of the charter schools office is authorized to develop and administer an academy board selection and appointment process that includes an *Application for Public School Academy Board Appointment* and is in accord with these policies:

- a. The University Board shall appoint the initial and subsequent academy board of directors by resolution, except as prescribed by subparagraphs d and e. The director of the charter schools office shall recommend qualified individuals to the University Board, and ensure that the board of directors includes representation from the local community where the academy is located.
- b. The academy board of directors, by resolution and majority vote, shall nominate its subsequent members, except as provided otherwise. The academy board of directors shall recommend to the director of the charter schools office at least one nominee for each vacancy. Nominees shall submit the *Application for Public School Academy Board Appointment* for review by the charter schools office. The director of the charter schools office may or may not recommend the appointment of a nominee submitted by the academy board. If the director of the charter schools office does not recommend the appointment of a nominee submitted by the academy board, he/she may select and recommend another nominee or may request the academy board submit a new nominee for consideration.
- c. An individual appointed to fill a vacancy created other than by the expiration of a term shall be appointed for the unexpired term of that vacant position.
- d. Under exigent conditions, and with the approval of the University Board's chair and the president, the director of the charter schools office may appoint a qualified individual to an academy's board of directors. All appointments made under this provision must be presented to the University Board for final determination at its next regularly scheduled meeting. The University Board reserves the right to review, rescind, modify, ratify, or approve any appointments made under this provision.
- e. In the event that the health, safety and welfare of an academy's students, property or funds are at risk, the president, after consulting with the University Board's chair, may appoint a person to serve as a conservator for the academy. Upon appointment, the conservator shall have all the powers of the academy's board of directors and shall act in the place and stead of the academy's board of directors. After the President appoints a conservator, the full Board of Trustees shall receive notice of the appointment as soon as possible. The president shall appoint the conservator for a definite term which may be extended in writing. During the conservator's appointment, the academy's board of directors, and all powers of the academy's board of directors, are suspended. The charter contract shall set forth any additional powers granted to the conservator during their appointment. All appointments made under this

Date: 2/15/18

Signature: my Hengar

provision must be presented to the University Board for final determination at its next regularly scheduled meeting.

Length of Term

The director of an academy board shall serve at the pleasure of the University Board. Terms of the initial positions of the academy board of directors shall be staggered in accordance with *The Academy Board of Directors Table of Staggered Terms and Appointments* established and administered by the director of the charter schools office. Subsequent appointments shall be for a term of office not to exceed four (4) years, except as prescribed by *The Academy Board of Directors Table of Staggered Terms and Appointments*.

Removal and Suspension

If the University Board determines that an academy board member's service in office is no longer necessary, then the University Board may remove an academy board member with or without cause and shall specify the date when the academy board member's service ends. An academy board member may also be removed as part of a reconstitution under the charter contract or from office by a two-thirds (2/3) vote of the academy's board of directors for cause.

With the approval of the University Board's chair and the president, the director of the charter schools office may suspend an academy board member's service, if in his/her judgment the person's continued presence would constitute a risk to persons or property, or would seriously impair the operation of the academy. Any suspension made under this provision must be presented to the University Board for final determination at its next regularly scheduled meeting. The University Board reserves the right to review, rescind, modify, ratify, or approve any suspensions made under this provision.

Number of Directors

The number of members of the academy board of directors shall not be less than five (5) nor more than nine (9). If the academy board of directors fails to maintain its full membership by making appropriate and timely nominations, the University Board or its designee may deem that failure an exigent condition.

Qualifications of Academy Board Members

To be qualified to serve on an academy's board of directors, a person shall, among other things: (a) be a citizen of the United States; (b) be a resident of the State of Michigan; (c) submit all materials requested by the charter schools office including, but not limited to, the *Application for Public School Academy Board Appointment* which must include authorization to process a criminal background check; and (d) annually submit a conflict of interest disclosure as prescribed by the charter schools office.

The members of an academy board of directors shall not include: (a) employees of the academy; (b) any director, officer, or employee of an educational management organization or educational management corporation that contracts with the academy; (c) a Central Michigan University official or employee, as a representative of Central Michigan University.

CMU BDT APPROVED

Date: 2/15/18

Signature: m J. Flanagan

Oath of Public Office

All members of the academy board of directors must take the constitutional oath of office and sign the *Oath of Public Office* before beginning their service. No appointment shall be effective prior to the filing of the *Oath of Public Office* with the charter schools office.

Note: These provisions shall be implemented with new charter contracts and shall be phased in as existing charter contracts are reissued or amended. The charter schools office is authorized to negotiate changes in the terms and conditions of charter contracts to fully implement these provisions.

Amended by Board of Trustees: 18-0215

South Arbor Charter Academy

Contract Amendment No. 3

Tab 2

Section 1.1. Certain Definitions.

- (o) "Method of Selection, Appointment, and Removal Resolution" means the policy adopted by resolution of the University Board on September 18, 1998, and amended on February 15, 2018, establishing the standard method of selection and appointment, length of term, removal and suspension, number of directors and qualifications of academy board members for schools of excellence issued a Contract by the University Board.
- (t) "State School Reform/Redesign Office" means the office created within the Michigan Department of Technology Management and Budget by Executive Reorganization Order 2015-02 codified at MCL 18.445, and transferred from the Michigan Department of Technology Management and Budget to the Michigan Department of Education by Executive Reorganization Order 2017-02, codified at MCL 388.1282.

Section 2.5. Academy Site Is Former Site of Closed Community District School; State School Reform/Redesign Officer Approval Required. If the Academy's proposed site is located within the geographical boundaries of a Community District and is a site that was a former site of a Community District school closed by the State School Reform/Redesign Office within the last 3 school years, then the University Board shall not issue the Contract unless (a) the new Academy site has a substantially different leadership structure and curricular offering than the previous Community District school that operated at the site; and (b) the State School Reform/Redesign Officer has approved the Academy's use of the site. A copy of the State School Reform/Redesign Officer's approval shall be provided to the Center.

Section 3.8. Administrator and Teacher Evaluation Systems. The Academy Board shall adopt, implement and maintain a rigorous, transparent, and fair performance evaluation system for its teachers and school administrators that complies with Applicable Law. If the Academy enters into an agreement with an Educational Service Provider, the Academy Board shall ensure that the Educational Service Provider complies with this section.

Section 4.4. Incompatible Public Offices and Conflicts of Interest Statutes. The Academy shall comply with the Incompatible Public Offices statute, being MCL 15.181 et seq. of the Michigan Compiled Laws, and the Contracts of Public Servants with Public Entities statute, being MCL 15.321 et seq. of the Michigan Compiled Laws. The Academy Board shall ensure compliance with Applicable Law relating to conflicts of interest. Notwithstanding any other provision of this Contract, the following shall be deemed prohibited conflicts of interest for purposes of this Contract:

- (a) An individual simultaneously serving as an Academy Board member and an owner, officer, director, employee or consultant of an Educational Service Provider or an employee leasing company that has an agreement with the Academy;
- (b) An individual simultaneously serving as an Academy Board member and an Academy employee;
- (c) An individual simultaneously serving as an Academy Board member and an independent contractor to the Academy;
- (d) An individual simultaneously serving as an Academy Board member and a member of the governing board of another public school;
- (e) An individual simultaneously serving as an Academy Board member and a University official, employee, or paid consultant, as a representative of the University; and
- (f) An individual simultaneously serving as an Academy Board member and having an ownership or financial interest in any school building leased or subleased to the Academy.

Section 4.5. Prohibition of Identified Family Relationships. The Academy Board shall prohibit specifically identified family relationships pursuant to applicable law and the Terms and Conditions of this Contract. Language in this Section controls over section 1203 of the Code. Notwithstanding any other provision of this Contract, the following shall be deemed prohibited familial relationships for the purposes of this Contract:

- (a) No person shall be appointed or reappointed to serve as an Academy Board member if the person's mother, mother-in-law, father, father-in-law, son, son-in-law, daughter, daughter-in-law, sister, sister-in-law, brother, brother-in-law, spouse or same-sex domestic partner:
 - (i) Is employed by the Academy;
 - (ii) Works at or is assigned to the Academy;
 - (iii) Has an ownership, officer, policymaking, managerial, administrative non-clerical, or other significant role with the Academy's Educational Service Provider or employee leasing company; or
 - (iv) Has an ownership or financial interest in any school building lease or sublease agreement with the Academy.
- (b) The Academy Board shall require each individual who works at the Academy to annually disclose any familial relationship with any other individual who works at, or provides services to, the Academy. For purposes of this sub-section, familial relationship means a person's mother, mother-in-law, father, father-in-law, son, son-in-law, daughter, daughter-in-law, sister, sister-in-law, brother, brother-in-law, spouse or same-sex domestic partner.

Section 10.9. Conservator; Appointment By University President. Notwithstanding any other provision of the Contract, in the event that the University President, in his or her sole discretion, determines that the health, safety and welfare of Academy students, property or funds are at risk, the University President, after consulting with the University Board Chairperson, may appoint a person to serve as the Conservator of the Academy. Upon appointment, the Conservator shall have all the powers and authority of the Academy Board under this Contract and Applicable Law. The University President shall appoint the Conservator for a definite term which may be extended in writing at his or her sole discretion. During the appointment, the Academy Board members and their terms in office are suspended and all powers of the Academy Board are suspended. All appointments made under this provision must be presented to the University Board for final determination at its next regularly scheduled meeting. During their appointment, the Conservator shall have the following powers:

- (a) take into his or her possession all Academy property and records, including financial, board, employment and student records;
- (b) institute and defend actions by or on behalf of the Academy;
- (c) continue the business of the Academy including entering into contracts, borrowing money, and pledging, mortgaging, or otherwise encumbering the property of the Academy as security for the repayment of loans. However, the power shall be subject to any provisions and restrictions in any existing credit documents;
- (d) hire, fire and discipline employees of the Academy;
- (e) settle or compromise with any debtor or creditor of the Academy, including any taxing authority;
- (f) review all outstanding agreements to which the Academy is a party and to take those actions which the Academy Board may have exercised to pay, extend, rescind, renegotiate or settle such agreements as needed; and
- (g) perform all acts necessary and appropriate to fulfill the Academy's purposes as set forth under this Contract or Applicable Law.

Section 11.7. Special Education. Pursuant to Section 1701a of the Code, the Academy shall comply with Article III, Part 29 of the Code, MCL 380.1701 et seq., concerning the provision of special education programs and services at the Academy as referenced in Contract Schedule 7c. Upon receipt, the Academy shall notify the Center of any due process or state complaint filed against the Academy.

South Arbor Charter Academy

Contract Amendment No. 3

Tab 3

Section 1.1. Certain Definitions.

- (bb) “Conservator” means an individual appointed by the University President in accordance with Section 10.10 of these Terms and Conditions.

Section 2.7. Community District Accountability Plan. If any part of the Academy's proposed site is located within the geographical boundaries of a Community District, then the Academy shall comply with the Accountability Plan. This provision shall not apply if a statewide accountability system is enacted into law replacing the Accountability Plan.

Section 6.17. Postings of Accreditation Status. The Academy shall post notices to the Academy's homepage of its website disclosing the accreditation status of each school as required by the Code.

Section 10.10 Academy Dissolution Account. If the University Board terminates, revokes or fails to issue a new Contract to the Academy, the Center Director shall notify the Academy that, beginning thirty (30) days after notification of the University Board's decision, the University Board shall direct up to \$10,000 from each subsequent State School Aid Fund payment, not to exceed a combined total of \$30,000, to a separate Academy account ("Academy Dissolution Account") to be used exclusively to pay the costs associated with the wind up and dissolution responsibilities of the Academy. Within five (5) business days of the Center Director's notice, the Academy Board Treasurer shall provide the Center Director, in a form and manner determined by the Center, with account detail information and authorization to direct such funds to the Academy Dissolution Account. The Academy Dissolution Account shall be under the sole care, custody and control of the Academy Board, and such funds shall not be used by the Academy to pay any other Academy debt or obligation until such time as all the wind-up and dissolution expenses have been satisfied.

Section 12.18. Disposition of Academy Assets Upon Termination or Revocation of Contract. Following termination or revocation of the Contract, the Academy shall follow the applicable wind-up and dissolution provisions set forth in the Academy's articles of incorporation and in accordance with the Code.

Section 12.19. Student Privacy. In order to protect the privacy of students enrolled at the Academy, the Academy Board shall not:

- (a) sell or otherwise provide to a for-profit business entity any personally identifiable information that is part of a pupil's education records. This subsection does not apply to any of the following situations:
 - i. for students enrolled in the Academy, providing such information to an ESP that has a contract with the Academy and whose contract has not been disapproved by the University;
 - ii. providing the information as necessary for standardized testing that measures a student's academic progress and achievement; or
 - iii. providing the information as necessary to a person that is providing educational or educational support services to the student under a contract with either the Academy or an educational management organization that has a contract with the Academy and whose contract has not been disapproved by the University.
- (b) The terms "education records" and "personally identifiable information" shall have the same meaning as defined in MCL 380.1136.
 - i. Present the opt-out form to each student's parent or guardian within the first thirty (30) days of the school year and at other times upon request.
 - ii. If an opt-out form is signed and submitted to the Academy by a student's parent or guardian, then the Academy shall not include the student's directory information in any of the Uses that have been opted out of in the opt-out form.
- (c) The terms "directory information" shall have the same meaning as defined in MCL 380.1136.

Section 12.20. Disclosure of Information to Parents and Legal Guardians.

- (a) Within thirty (30) days after receiving a written request from a student's parent or legal guardian, the Academy shall disclose without charge to the student's parent or legal guardian any personally identifiable information concerning the student that is collected or created by the Academy as part of the student's education records.
- (b) Except as otherwise provided in this subsection (b) and within thirty (30) days after receiving a written request from a student's parent or legal guardian, the Academy shall disclose to a student's parent or legal guardian without charge any personally identifiable information provided to any person, agency or organization. The Academy's disclosure shall include the specific information that was disclosed, the name and contact information of each person, agency, or organization to which the information has been disclosed; and the legitimate reason that the person, agency, or organization had in obtaining the information. The parental disclosure requirement does not apply to information that is provided:
 - i. to the Department or CEPI;

- ii. to the student's parent or legal guardian;
 - iii. by the Academy to the University Board, University, Center or to the ESP with which the Academy has a management agreement that has not been disapproved by the University;
 - iv. by the Academy to the Academy's intermediate school district or another intermediate school district providing services to Academy or the Academy's students pursuant to a written agreement;
 - v. to the Academy by the Academy's intermediate school district or another immediate school district providing services to pupils enrolled in the Academy pursuant to a written agreement;
 - vi. to the Academy by the University Board, University, Center;
 - vii. to a person, agency, or organization with written consent from the student's parent or legal guardian, or from the student if the student is 18 years of age;
 - viii. to a person, agency, or organization seeking or receiving records in accordance with an order, subpoena, or ex parte order issued by a court of competent jurisdiction;
 - ix. to a person, agency, or organization as necessary for standardized testing that measures a student's academic progress and achievement; or
 - x. in the absence of, or in compliance with, a properly executed opt-out form, as adopted by the Academy in compliance with section 1136(6) of the Code, pertaining to uses for which the Academy commonly would disclose a pupil's "directory information."
- (c) If the Academy considers it necessary to make redacted copies of all or part of a student's education records in order to protect personally identifiable information of another student, the Academy shall not charge the parent or legal guardian for the cost of those redacted copies.
- (d) The terms "education records," "personally identifiable information," and "directory information" shall have the same meaning as defined in MCL 380.1136.

Section 12.21. List of Uses for Student Directory Information; Opt Out Form; Notice to Student's Parent or Legal Guardian. The Academy shall do all of the following:

- (a) Develop a list of uses (the "Uses") for which the Academy commonly would disclose a student's directory information; and
- (b) Develop an opt-out form that lists all of the Uses and allows a student's parent or guardian to elect not to have the student's directory information disclosed for one (1) or more Uses.

South Arbor Charter Academy

Contract Amendment No. 3

Tab 4

Section 6. Contracts Between Corporation and Related Persons. As required by Applicable Law, any Director, officer or employee of the Academy, who enters into a contract with the Academy, that meets the definition of contract under the statute on Contracts of Public Servants with Public Entities, Act No. 317 of the Public Acts of 1968, being sections 15.321 to 15.330 of the Michigan Compiled Laws, shall comply with the public disclosure requirements set forth in Section 3 of the statute.

The University Board authorizes the Academy Board to employ or contract for personnel according to the position information outlined in Schedule 5. However, the Academy Board shall prohibit any individual from being employed by the Academy, an educational service provider or an employee leasing company involved in the operation of the Academy, in more than one (1) full-time position and simultaneously being compensated at a full-time rate for each of these positions. An employee hired by the Academy shall be an employee of the Academy for all purposes and not an employee of the University for any purpose. With respect to Academy employees, the Academy shall have the power and responsibility to (i) select and engage employees; (ii) pay their wages, benefits, and applicable taxes; (iii) dismiss employees; and (iv) control the employees' conduct, including the method by which the employee carries out his or her work. The Academy Board shall be responsible for carrying workers' compensation insurance and unemployment insurance for its employees. The Academy Board may contract with an educational service provider or an employee leasing company to provide services or to provide personnel to perform services or work at the Academy. Before entering into an agreement with an educational service provider or an employee leasing company to perform services or to provide personnel to perform services or work at the Academy, the Academy Board must first comply with the Educational Service Provider Policies issued by the Center. A copy of the agreement between the Academy Board and the educational service provider or employee leasing company shall be included as part of Schedule 5.

The Academy shall comply with the Incompatible Public Offices statute, Act No. 566 of the Public Acts of 1978, of the Michigan Compiled Laws, and the Contracts of Public Servants With Public Entities statute, Act No. 371 of the Public Acts of 1968, of the Michigan Compiled Laws. The Academy Board shall ensure compliance with Applicable Law relating to conflicts of interest. Language in this Section controls over section 1203 of the Code. The following shall be deemed prohibited conflicts of interest:

- (a) An individual simultaneously serving as an Academy Board member and an owner, officer, director, employee or consultant of an educational service provider or an employee leasing company that has an agreement with the Academy;
- (b) An individual simultaneously serving as an Academy Board member and an Academy employee;
- (c) An individual simultaneously serving as an Academy Board member and an independent contractor to the Academy;
- (d) An individual simultaneously serving as an Academy Board member and a member of the governing board of another public school;
- (e) An individual simultaneously serving as an Academy Board member and a University official, employee, or paid consultant, as a representative of the University; and
- (f) An individual simultaneously serving as an Academy Board member and having an ownership or financial interest in any school building leased or subleased to the Academy.

No person shall be appointed or reappointed to serve as an Academy Board member if the person's mother, mother-in-law, father, father-in-law, son, son-in-law, daughter, daughter-in-law, sister, sister-in-law, brother, brother-in-law, spouse or same-sex domestic partner:

- (a) Is employed by the Academy;
- (b) Works at or is assigned to the Academy;
- (c) Has an ownership, officer, policymaking, managerial, administrative non-clerical or other significant role with the Academy's educational service provider or employee leasing company; and
- (d) Has an ownership or financial interest in any school building lease or sublease agreement with the Academy.

The Academy Board shall require each individual who works at the Academy to annually disclose any familial relationship with any other individual who works at, or provides services to, the Academy. For purposes of this sub-section, familial relationship means a person's mother, mother-in-law, father, father-in-law, son, son-in-law, daughter, daughter-in-law, sister, sister-in-law, brother, brother-in-law, spouse or same-sex domestic partner.

AMENDMENT NO. 4

to the
July 1, 2016 Contract to Charter
A School of Excellence and Related Documents

Issued To

SOUTH ARBOR CHARTER ACADEMY
(A SCHOOL OF EXCELLENCE)

By

THE CENTRAL MICHIGAN UNIVERSITY
BOARD OF TRUSTEES
(AUTHORIZING BODY)

CONTRACT AMENDMENT NO. 4

SOUTH ARBOR CHARTER ACADEMY

In accordance with Article IX of the Terms and Conditions of the Contract (the "Contract"), dated July 1, 2016, issued by the CENTRAL MICHIGAN UNIVERSITY BOARD OF TRUSTEES (the "University Board") to SOUTH ARBOR CHARTER ACADEMY (the "Academy"), as amended, the parties agree to further amend the Contract as follows:

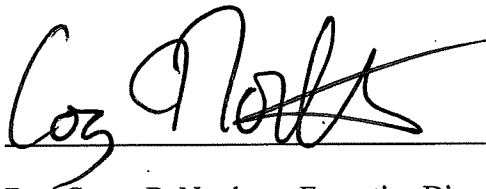

- 1.) Amend Schedule 7, Section c: Educational Programs, by replacing the materials contained therein with the materials attached as Tab 1.
- 2.) Amend Schedule 7, Section d: Curriculum, by replacing the materials contained therein with the materials attached as Tab 2.

The changes identified in Sections 1 and 2 shall have an effective date of September 4, 2018.

- 3.) Amend Schedule 5: Description of Staff Responsibilities, by replacing the Services Agreement contained therein with the Amended and Restated Services Agreement, attached as Tab 3.

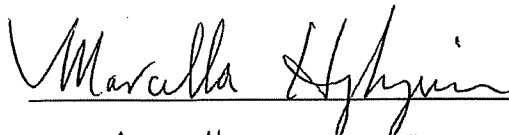

The changes identified in Section 3 shall have an effective date of November 1, 2018.

This entire amendment is hereby approved by the University Board and the Academy Board through their authorized designees.

South Arbor Charter Academy

Contract Amendment No. 4

Tab 1

EDUCATIONAL PROGRAMS

Pursuant to Applicable Law and the Terms and Conditions of this Contract, including Article VI, Section 6.3, the Academy shall implement, deliver, and support the educational programs identified in this schedule.

Mission

The mission of South Arbor Charter Academy (“Academy”) is challenging each child to achieve: Academic Proficiency, Moral Integrity and Personal Responsibility.

Values

The Academy is built on the four pillars of National Heritage Academies’ (“NHA”) model: academic excellence, moral focus, parent partnerships and student responsibility.

- Academic Excellence: A high-quality K-8 education sets the critical foundation for a student's success in high school, college, and beyond. Achievement may look different for each individual, but our goal is to prepare every student for college. This starts by creating a culture focused on high care and high expectations for each student each day.
- Moral Focus: A great school should aim to develop students' hearts as well as their minds. Our moral focus curriculum builds on the virtues of wisdom, courage, compassion, gratitude, respect, encouragement, integrity, self-control, and perseverance. Our students will build and maintain strong personal character and become good citizens as part of our program.
- Parental Partnerships: The Academy is committed to fostering strong partnerships with parents. Our school will actively engage parents in their children's learning, and there will be consistent communication. Included in this effort will be a dedicated parent room specifically to allow ongoing interaction between parents and teachers. The Academy plans to provide opportunities for teachers to share best practices and for parents to learn new tools to support their children.
- Student Responsibility: Children thrive in an environment where they clearly understand what is expected of them, and after putting forth their best effort, they take pride in seeing the results. Students will be taught that their best effort is vital to academic success, and teachers will reinforce the importance of students' accountability for their education and actions.

Curriculum

The Academy’s curriculum is designed to prepare students for a rigorous high school curriculum to provide the best opportunity for college success. The Academy partners with NHA to implement a curriculum built around the Michigan Academic Standards (“MAS”), which aligns with the mission, and prepares students for success in high school, college and beyond.

The curriculum is aligned with the MAS for English language arts (“ELA”), mathematics, science, social studies, art and music and the Physical Education Content Standards and Benchmarks. This approach ensures students are learning the appropriate content for each grade level.

Character development is an explicit and integrated component of the curriculum.¹ Individual responsibility, integrity, personal character and effort are important contributors to success in school and life. In addition, the Academy instills character traits which are highly correlated with college success. With high-quality instruction, solid curricular tools to support instruction and rigorous assessment, the curriculum promotes academic success for students and equips students with the knowledge, understanding and skills needed to meet or exceed MAS and content expectations.

Core Content Areas

ELA

Literacy, which includes reading, writing and speaking, is a critical component of college- and career-readiness. "Low literacy levels often prevent high school students from mastering other subjects," and struggling readers are often excluded from academically challenging courses. More specifically, students who are able to comprehend complex texts are more likely to be successful after high school.² Developing reading proficiency and strong literacy skills in elementary and middle grades is the cornerstone of the ELA curriculum, which upholds the MAS to ensure college- and career-readiness for all students. The ELA curriculum is designed to produce highly literate students who are proficient readers, evaluative writers and collaborative, analytical members of the classroom and future workplaces.

The MAS focus on five strands of literacy: reading, writing, speaking, listening and language. To best prepare students for school and life in the 21st century, each strand emphasizes the integration, critical analysis and production of a variety of media and technology. The reading standards focus on a gradual increase in text complexity to ensure students' readiness "for the demands of college- and career-level reading."³ The writing standards emphasize argument and informational writing "based on substantive claims, sound reasoning, and relevant evidence," as well as research, "both short, focused projects and longer, in-depth research."⁴ By challenging students to speak and listen, the standards require that "students gain, evaluate, and present increasingly complex information, ideas, and evidence" through academic discussion, collaboration and formal presentations. The language standards emphasize students' growth and expansion of vocabulary, appreciation of word nuances and use of formal English in writing and speaking.

- In kindergarten through second grades, the curriculum emphasizes the foundations of reading. These include the ability to decode automatically, read with fluency and gain the capacity to comprehend increasingly complex texts across a range of types and disciplines. Student literacy is emphasized through rich, domain-specific content in a variety of fiction and nonfiction texts, including a true balance of informational and literary genres.
- In third through fifth grades, reading instruction is centered on complex, grade-appropriate texts to prepare students for the complexity of college- and career-ready texts. Reading

⁴ *Ibid.*

instruction emphasizes a balance of informational and literary texts.

- In sixth through eighth grades, teachers of ELA, social studies and science each provide content-specific textual literary experiences. The middle school curriculum includes a blend of literature and substantial exposure to literary non-fiction, including historical and scientific documents.

For students to access grade-level texts with increasing complexity, the curriculum also focuses on the development of strong academic vocabulary. Students are exposed to extensive academic vocabulary through reading instruction, and practice is extended through listening, discussion and writing. Vocabulary instruction accentuates the nuances of word meanings and variances through a wide range of contexts.

Discussion and collaboration are also a focus of the ELA curriculum, as students apply reading skills to develop habits for providing text-based evidence in both conversation and writing. Students' writing emphasizes analysis of complex texts by supporting ideas and arguments with textual evidence and evaluation. Students learn to produce a variety of text types, including argument, informative, narrative and research-based pieces. Collaboration and integration of technology are important aspects of the writing process as students plan, draft, revise, edit and publish a wide range of writing pieces. The ELA curriculum also ensures students demonstrate adequate mastery of the essential conventions and grammar of Standard English in writing and speaking.⁵

Mathematics

If students are to be well-equipped for college and beyond, then students must be prepared through the kindergarten through eighth grade educational program to take Algebra II and other advanced mathematics courses in high school.

"A strong grounding in high school mathematics through Algebra II or higher correlates powerfully with access to college, graduation from college, and earning in the top quartile of income from employment."⁶ The development of a deep understanding of mathematical concepts makes such success possible. The Academy's mathematics curriculum is based on the MAS for mathematics. Through mastery of these standards, students develop a deep understanding of mathematical concepts. Students are also provided the opportunity to accelerate learning in seventh grade and complete Algebra I by eighth grade graduation, thus placing students on a college- and career-readiness trajectory. Research show that students who successfully complete Algebra I prior to entering high school are much more likely to complete other more advanced mathematics in high school and are "more than twice as likely to graduate from college" than students who do not complete Algebra I by eighth grade.⁷

The National Council for Teachers of Mathematics has recognized the importance of the study of algebra in developing mathematical fluency and has also noted the importance of the study of other

⁵ Coleman, David and Susan Pimentel, "Revised Publishers' Criteria for the Common Core State Standards in English Language Arts and Literacy," *Common Core State Standards* (Washington, D.C.: National Governors Association Center for Best Practices, Council of Chief State School Officers, 2012).

⁶ National Mathematics Advisory Panel, *Foundations for Success: The Final Report of the National Mathematics Advisory Panel* (Washington, D.C.: U.S. Department of Education, 2008).

⁷ *Ibid.*

mathematics components such as number sense and operations, measurement, geometry, data analysis and probability and problem-solving. Number sense is developed through a variety of concrete models allowing students to use the area of the brain used for the comprehension of mathematical knowledge. Students are prepared to be fluent in computation using formal algorithms and also learn essential measurement and data analysis skills. In addition, students learn to make connections and apply mathematical knowledge through problem-solving and inquiry.

- In kindergarten through second grades, number sense and computational fluency are the main focus areas of students' learning. Students develop the skills necessary to progress into higher-level mathematics; through open-ended problem-solving, an increase of critical thinking skills and ability to see connections across mathematics as well as other subjects.
- In third through fifth grades, learning will shift from computation to fractional awareness. The ability to compose and decompose numbers, developed in the early grades, leads to a deeper understanding of fractions, percents, decimals and computation. Algebraic skills are developed as students begin working with patterns and equations with missing numbers.
- In sixth through eighth grades, the concentration will shift to the study of algebra and functions. Number sense remains a critical focus area through the study of integers, rational and irrational numbers, exponents and absolute values. Conceptual ideas are integrated through lab activities that provide exploratory opportunities for students to explicitly connect abstract ideas to concrete examples.

The mathematics curriculum also teaches effective mathematical communication by engaging students in thinking, reading and writing about mathematics. This helps students understand the foundational concepts for success in more complex mathematical coursework.

Science

As the Association for the Advancement of Science and the National Council on Science explains, developing college-ready and scientifically literate students involves teaching a mixture of content knowledge, the practices and skills of scientists and information on the nature of science. The MAS were created around the work and philosophy of these organizations and the NHA curriculum aligns to the MAS. The curriculum, which includes study in life science, physical science, earth and space science and engineering, incorporates the use of STEMScopes™, Full Option Science System™ (“FOSS”), Delta Science Modules (“DSM”) and non-fiction readers to give students hands-on opportunities to develop content knowledge about the results of scientific discoveries regarding the natural world. The curriculum and resources also provide students the chance to participate in the scientific process of inquiry and discovery through conducting investigations, using instruments and applying mathematical skills that model the process used by scientists to learn about the universe. It also incorporates the skills required by the MAS for Literacy in Science for sixth through eighth grades, which require students to do high-level thinking and problem solving, incorporating scientific reading, writing, discussing and presenting.

- In kindergarten through second grades, the content of the science curriculum focuses on scientific inquiry and engineering designs primarily through the study of events and phenomena in nature as observed through the five senses. Investigations and design solutions at this level are modeled, simple and structured allowing students to write journals on personal discoveries, create simple pictographs of data and draw conclusions

from observations under the direction of the teacher. The incorporation of non-fiction readers on each topic provide students opportunities to develop grade-level appropriate science vocabulary.

- In third through fifth grades, the curriculum builds on these foundational skills and directs students to begin exploring the science and engineering practices, crosscutting concepts and engineering design solutions by making connections between events (e.g., the sun rises every day and it gets warmer during the day, therefore, the sun provides heat to earth). Investigations and engineering design solutions for students in third through fifth grades will still often be modeled, but the investigations are more complex and involve more detailed measurements, use of a variety of tools such as balances and microscopes and require students to control for multiple variables. Students engage in the practices of scientists and engineers by developing methods and solutions, analyzing and interpreting various representations of data, engage in argumentation, and by completing lab reports in order to communicate results of investigations and engineering designs orally and in writing.
- In sixth through eighth grades, the curriculum includes further exploration of the relationships between science and engineering practices and crosscutting concepts while also connecting knowledge of scientific concepts to real world examples and solidifying congruence between students' understanding of phenomena to that of the scientific community. Investigations are more student-directed, from the guiding question through the scientific procedures, to the organizing, analyzing and reporting of data. Within each unit of instruction, students employ the skills of scientists and engineers by making connections with respect to the content of the unit using the methods of science. The scientific processes are consistently integrated into content units throughout the year and students conduct science investigations and engineering design solutions through closed and open lab investigations in response to posed questions during content studies.

Social Studies

According to the Michigan Department of Education (“MDE”), “the purpose of social studies instruction is to develop social understanding and civic efficacy. The Grade Level Content Expectations (“GLCE”) balance disciplinary content and processes and skills that contribute to responsible citizenship and form a foundation for high school social studies coursework.” The NHA social studies curriculum, which is aligned to the MAS, ensures students are not only prepared for high school and college, but also prepared for life as global citizens. Developing students' understanding in the disciplines of history, geography, civics and government, economics and public discourse ensures readiness for college and responsible citizen involvement. In addition to supporting learning in these areas, the social studies curriculum also incorporates the skills required by the MAS for Literacy in History/Social Studies in sixth through eighth grades, which allow students to develop and utilize critical thinking skills by making connections, inferences and arguments around the content and learned skills. This focus on content, skills and critical thinking produces students who are knowledgeable in social studies and prepared to participate in society as informed citizens.

The curriculum supports the social studies disciplines that best prepare students to be contributing members of society. Students who master the social studies curriculum understand how history, geography, civics and economics interact in a global society. Through exposure to primary and

secondary sources, students develop knowledge of shared national and world history and are able to make connections between the past and present as well as between cultures and government systems.

- In kindergarten through second grades, students learn about the social studies disciplines by developing an understanding of culture and community through the lens of “Myself and Others,” “Families and Schools” and “The Local Community.” In these early grades, students begin to learn about history and culture in the surrounding world. Students study personal history, family history and examine local examples of the community and school to become familiar with basic geography, economy and functions of government.
- In third through fifth grades, students explore the social studies disciplines through the context of Michigan and the United States. Students build on prior social studies knowledge and apply new concepts to the study of the state of Michigan, the regions of the United States and the early history of the United States. By fifth grade, students apply the concepts of social studies to the history of pre-European America through the adoption of the Bill of Rights in 1791.
- In sixth through eighth grades, students regularly practice how to make connections between historical events in the United States, the world and current events. Students also develop knowledge of the relationship between geography, history, economics and culture. In sixth and seventh grades, students apply social studies concepts to the study of the Western and Eastern Hemispheres during ancient and modern times. In eighth grade, students continue the study of United States history from the writing of the Constitution through Reconstruction. The middle school curriculum gives students opportunities to extend this basic knowledge to gather more complex information, describe concepts in more detail and deepen the understanding of the relationship between geography, economics and civics.

Co-curricular areas

The Academy nurtures high-achieving, well-rounded students. The Academy offers the following co-curricular areas: art, music, library and educational technology and character development.

Art

The study of art allows students to understand and appreciate the subject while understanding the significant role art plays in the expression of ideas throughout history. Students in lower grades learn to recognize and describe art forms from a variety of historical eras and places, while learning that art takes many forms and has many purposes. Students study and reproduce styles and techniques used by artists and discuss art by examining and critiquing the work of artists. Students in upper elementary and middle school grades focus on comparing and contrasting artwork from different time periods, cultures, artists and mediums. Historical and contemporary art is studied as students create a variety of original works using appropriate styles and mediums to express themes, tone, mood and images.

Music

Students study the basics of music theory, music appreciation and the work of great composers. Students first learn to identify basic music forms and patterns, describe elements of music using appropriate music vocabulary and sing and play basic instruments. By listening to a variety of

music, students compare and contrast music from different composers, historical periods, cultures, styles and genres. Students continue to refine musical knowledge and skills by singing, playing, improvising and composing. In addition, students learn to identify and use key signature, meter signature, notation, bass and treble clef, tempo and dynamic markings as well as learn to perform and respond to a conductor's cues and make necessary adjustments.

Physical Education

Physical education includes a sequence of developmental experiences through which children learn by moving. Students first learn and practice basic movement skills and manipulate objects by throwing, catching, striking, pushing, pulling and climbing. Students take part in a variety of individual and group activities, games to increase body awareness, practice new skills and learn to move safely with respect to other people. Students also begin to learn about the physical and mental benefits of a healthy lifestyle characterized by physical activity. Students will then use movement skills in more complex ways by learning the concepts of fairness, positive attitude, teamwork and sportsmanship. Students learn to recognize the correlation between practice and mastery of skill and complete various types of drills to increase abilities. Students ultimately refine all the simple and complex skills necessary for physical activity of various types and focus on healthy lifestyles through nutrition and fitness.

Library and Educational Technology

The Library and Educational Technology Program is designed to expose students to a wide variety of classic and contemporary literature, instill a life-long love of reading and develop information literacy skills. The library collections contain specific materials that support the curriculum and provide students with a variety of high-quality literature and technological resources. The program has been crafted to reflect expectations of students set forth in several authoritative sources, including:

- The *Big6* model for teaching information skills created by Mike Eisenberg and Bob Berkowitz (1998),
- Information Literacy Standards developed by the American Association of School Librarians (“AASL”),
- The Association for Educational Communications and Technology (“AECT”).

Technology also plays a supporting role in the core academic curriculum. Classroom teachers plan lessons that leverage technology and provide technology resources for students. Students use technology to research, compose and present information related to topics of study. The Academy has a designated area to serve as the library and computer lab, enabling students to access technology needed to support the technology program. Moreover, students have access to a computer in the classroom to promote the integrated use of technology to support learning.

Character Development

To foster the desired culture, the Academy emphasizes strong personal character and accountability. Many schools offer character development programs, but the Academy melds character education throughout instruction and challenges the Academy community to model the desired traits. In this way, students develop a strong character while learning about virtues and different types of character. This approach to character development creates a culture within the Academy conducive to teaching and learning, and it makes parents and educators true

collaborators in the learning process.

The Academy implements the character development curriculum to promote college readiness, create an environment that is conducive to teaching and learning and support the academic goals of the Academy.

During each month of the school year, the Academy focuses on a monthly virtue: wisdom, respect, gratitude, self-control, perseverance, courage, encouragement, compassion and integrity. Students develop and practice the virtues that, in time, become ingrained habits.

Students are encouraged to develop moral character, show performance character and interact well with others through social character. Character is both taught and caught; in other words, students acquire the behaviors that are modeled. The Academy will ensure school staff continually model moral, performance and social character in formal and informal settings. Students also participate in character development assemblies, where staff and other students speak on the monthly virtue and share how the virtue is implemented. Students are encouraged to share experiences and progress is recognized.

The Academy believes this innovative piece of the Educational Program prepares students for success academically and in life.

Special Education

When making educational placement decisions for students with disabilities, the Academy will ensure that parents are contributing members of the Individualized Educational Program (“IEP”) team, and together the team will make decisions that are subject to requirements regarding provision of the least-restrictive environment. When determining how services will be delivered to students with disabilities, the Academy will follow all Special Education Rules as issued by the Michigan Department of Education. If a child with a current IEP enrolls in the Academy, the Academy will implement the existing IEP to the extent possible or will provide an interim IEP and review with parents until a new IEP can be developed. IEPs will be developed, revised and implemented in accordance with the Individuals with Disabilities Education Improvement Act (“IDEIA”) and state law and regulations.

The Academy will fully comply with federal laws and regulations governing children with disabilities as follows:

1. The Academy is responsible for providing a free, appropriate public education to children with disabilities enrolled in the Academy that have been determined through an IEP to require Special Education programs and services.
2. The Academy will ensure that children who are suspected of having disabilities are properly evaluated by a multidisciplinary team, as defined in the Michigan Special Education Rules, and that children who have already been identified are re-evaluated by the multidisciplinary team at least every three years.
3. When a multidisciplinary team determines that a special education student requires Special Education programs and services, the Academy will ensure that the IEP is fully

implemented in accordance with IDEIA and reviewed on an annual basis or more frequently as determined by the IEP team.

If a student is not able to access the general education curriculum through Special Education services and accommodations, the IEP team will review the student's learning needs. When determined appropriate by the IEP team, the curricular tools may be modified to best allow the student to make progress in the curriculum.

Educational Development Plan ("EDP")

As per P.A. 141 of 2007, the Academy provides students with the opportunity to develop EDPs in grade seven. These EDPs include students' personal information, career goals, assessment results, educational/training goals, plans of action for high school and post-secondary and post-school options, in accordance with the requirements of the law. EDPs are reviewed by parents as appropriate.

Assessments

The Academy has a robust and purposeful formative assessment process embedded into the instructional approach, using measurements of academic growth and proficiency beyond those required by state law. One of these assessments is a nationally normed assessment administered multiple times each year to measure individual student progress over time, provide a national peer-group comparison point and evaluate grade and school level achievement and growth. The Academy begins the assessment program in the early grades with diagnostic assessments that provide teachers with key individualized student information. This helps teachers differentiate instruction and modify teaching approaches to meet specific needs as early as possible in a student's career. The Academy also administers lesson and unit-level assessments to check understanding and to measure grade level content knowledge. The Academy uses common interim assessments, shared across all schools partnering with NHA, to drive forward the instructional program by learning from other schools. The common interim assessment results in ELA and math are used as an indicator of proficiency on the state assessment for students in grades 3 through 8.

Nationally-Normed Assessments

A nationally-normed assessment is administered multiple times each year in reading and mathematics to allow teachers, deans and the Academy leader to continually gauge student progress, make changes in instruction where necessary and measure the effectiveness of those changes. Typically, NHA-partner schools have used the Northwest Evaluation Association's™ Measures of Academic Progress® Growth assessment ("NWEA™-MAP®" Growth, Grades 2+, or NWEA for short). Under the NWEA program, each student takes a personalized assessment using a computer-adaptive exam. The assessment zeroes-in on the student's instructional level, sets individualized goals for student achievement and provides teachers with a robust tool that articulates the skills a student has acquired, the skills a student needs to solidify and the skills a student will be ready to learn next. NWEA assessments are dynamically developed as the test is being administered: the program instantly analyzes a student's response to each test item and determines the appropriate difficulty level to present throughout the remainder of the test. This type of adaptive test makes the results more accurate and individually actionable.

Fall assessments provide formative information, both as baseline data for the current year and comparative data to the previous school year. End-of-year assessments provide summative growth

data. The tests are delivered and immediately scored electronically to measure growth for individual students, classrooms and the school as a whole.

The MAP Growth K-2 (formerly “MAP for Primary Grades”) version of the NWEA assessment has been used in other NHA-partner schools and administered to all kindergarten and first-grade students as a computer-adaptive, norm-referenced test designed to assess achievement levels in reading and math in these early grades. The key content areas covered are:

- Reading: Phonics, Phonological Awareness, Concepts of Print, Vocabulary and Word Structure, Comprehension, and Writing.
- Mathematics: Problem Solving, Number Sense, Computation, Measurement and Geometry, Statistics and Probability, and Algebra.

With the MAP Growth K-2 assessment, teachers are provided numerous reports and resources to help teachers identify areas of strengths and weaknesses in individual students and allow them to differentiate instruction accordingly.

Program Evaluation

Formative Assessment Process

The education scholar W. James Popham defines the formative assessment approach embraced by NHA schools as follows: “Formative assessment is a planned process in which assessment-elicited evidence of students’ status is used by teachers to adjust their ongoing instructional procedures or by students to adjust their current learning tactics.”⁸ The Academy’s process provides assessment-based feedback to both teachers and students, occurs throughout the instructional periods of the school day and is purposefully designed to help teachers modify instructional techniques to help students achieve individual educational objectives. The steps of the formative assessment process include: 1) identifying objectives and determining end-of-instruction assessments; 2) developing building blocks; 3) analyzing evidence; 4) responding to evidence; and 5) daily planning. These are described further below.

Identifying objectives and determining end-of-instruction assessments: During the formative assessment process, teachers first identify the objectives for units of instruction based on the year-long plan. Teachers then use end-of-instruction assessments to gauge students’ status at the end of each unit. Assessment methods are selected based on the learning goal and sound assessment design. This “assessment-influenced” approach is important, for through it teachers “exemplify the curricular aim or aims being sought ...and ultimately decide what mastery of those aims looks like.”

Developing building blocks: After the educational objectives are reviewed and appropriate end-of-instruction assessments are determined, grade-level teams identify building blocks of instruction that scaffold student learning toward mastery of each educational objective. These building blocks are used to construct a variety of formative assessments that are woven into daily instruction and serve as check points during the learning process. Grade-level teams utilize building block assessments across the classrooms. Both teachers and students track student progress over time.

⁸ James W. Popham, *Instruction that Measures Up* (Alexandria, VA: ASCD, 2009).

Analyzing evidence: Whether gathered through building block assessments or end-of-instruction assessments, teachers analyze evidence at the student and classroom level. The specificity of the building block assessments enables teachers to determine exactly what knowledge or skills need further development for particular students. As teachers meet to examine student work, they gauge the effectiveness of instruction and determine students' degree of mastery of the educational objectives. Teachers analyze evidence to discover student misconceptions and to identify knowledge or skill gaps that may inhibit student learning success. Grade-level teams also analyze end-of-instruction assessments to ensure that the curriculum is coherent across classrooms within the school.

Responding to evidence: As units are prepared, teachers identify opportunities for planned instructional adjustments in case students do not learn as expected. Teachers may then make these adjustments during the course of unit instruction, as prompted by evidence from the building block assessments or end-of-instruction assessments. If learning progresses more quickly than expected, then instruction will move at an accelerated rate through the unit plan. If learning progresses more slowly than expected, then more time will be spent delivering instruction within the unit. Because students play a role in tracking individual progress, students know precisely where focus is needed to improve learning. Teachers consider end-of-instruction assessment evidence to develop subsequent units of instruction.

Daily planning: Daily planning allows teachers to connect educational objectives with instructional resources, effective teaching strategies and instructional methods that best support student learning. It also allows teachers to develop strategies to check for understanding on an ongoing basis and determine if learning activities are providing intellectual engagement for each student. Teachers work backwards from the unit plan to structure instruction in the way that will best lead to mastery of educational objectives. In addition, the teacher's daily instructional objectives are presented in student-friendly language through "I Can" statements. These "I Can" statements are incorporated into lessons so that students know precisely what the learning goal is and can articulate it in their own terms. The Academy may also use "I Can" statements for English Learners to ensure students are presented with proper proficiency standards and can articulate individual progress in acquiring English.

The formative assessment process plays a central role in the Academy's overall academic assessment system, as it provides teachers and Academy leadership with regular access to relevant information pertaining to students' mastery of learning goals.

South Arbor Charter Academy

Contract Amendment No. 4

Tab 2

CURRICULUM

Pursuant to Applicable Law and the Terms and Conditions of this Contract, including Article VI, Section 6.4, the Academy shall implement, deliver, and support the curriculum identified in this schedule.

The Academy has adopted the National Heritage Academies curriculum. The curriculum for all core subjects has been received, reviewed and approved by the Center.

Elementary

The following subjects/courses are offered at the Academy.*

Course	K	1	2	3	4	5	6	7	8
English Language Arts	X	X	X	X	X	X	X	X	X
Mathematics	X	X	X	X	X	X	X	X	X
Science	X	X	X	X	X	X	X	X	X
Social Studies	X	X	X	X	X	X	X	X	X
Health (<i>included in science</i>)	X	X	X	X	X	X	X	X	X
Physical Education	X	X	X	X	X	X	X	X	X

* The Academy updates course offerings each school year based on the needs and interests of students as well as teacher certification. As a result some courses are rotated and are not offered each year. All core subjects are taught every year and high school students are required to meet the requirements of the Michigan Merit Curriculum.

South Arbor Charter Academy

Contract Amendment No. 4

Tab 3

AMENDED AND RESTATED SERVICES AGREEMENT

THIS AMENDED AND RESTATED SERVICES AGREEMENT (“**Agreement**”) by and between National Heritage Academies, Inc., a Michigan corporation (“**NHA**”), and South Arbor Charter Academy, a body corporate and school of excellence (the “**School**”) is effective November 1, 2018 (the “**Effective Date**”). This Agreement amends and restates the prior Services Agreement between NHA and the School dated as of July 1, 2016 (the “**Prior Agreement**”). For purposes of this Agreement, NHA and the School shall be referred to collectively as the “**Parties**.”

RECITALS

WHEREAS, the School was issued a Charter Contract by the Central Michigan University Board of Trustees (the “**Authorizer**”) to operate a school of excellence pursuant to the Michigan Revised School Code (the “**Code**”); and

WHEREAS, the Parties desire to continue to work together to promote educational excellence and innovation based on NHA’s school design, comprehensive educational program and management principles; and

WHEREAS, the Parties desire to set forth the terms and conditions of such a relationship in this Agreement; and

NOW, THEREFORE, for good and valuable consideration, including the mutual promises and benefits contained in this Agreement, the receipt and sufficiency of which are hereby acknowledged, the Parties agree as follows:

ARTICLE I

CONTRACTING RELATIONSHIP

A. Services. Subject to the terms and conditions of this Agreement, and as permitted by applicable law, the School hereby contracts with NHA for the provision of certain educational, business administration, facility, and management services, including without limitation, all labor, equipment, and materials necessary for the provision of the same, as set forth herein (collectively, the “**Services**”).

B. Charter. This Agreement shall: (i) be subject to and comply with the terms and conditions of the Charter Contract and the School’s Charter Application (collectively, the “**Charter**”); and (ii) not be construed to interfere with the constitutional, statutory, or fiduciary duties of the School’s Board of Directors (the “**Board**”). NHA agrees to perform its duties and responsibilities under this Agreement in a manner that is consistent with the School’s obligations under the Charter issued by the Authorizer. The provisions of the School’s Charter shall supersede any competing or conflicting provisions contained in this Agreement.

C. Independent Contractor. NHA shall provide the Services as an independent contractor, and not as an employee, partner, agent, or associate of the School. This independent

C. Independent Contractor. NHA shall provide the Services as an independent contractor, and not as an employee, partner, agent, or associate of the School. This independent contractor relationship shall extend to the officers, directors, employees, and representatives of NHA. Consistent with the status of an independent contractor, NHA reserves to itself the right to designate the means and methods of accomplishing the objectives and purposes of this Agreement consistent with Board policy, applicable law and the Charter. NHA shall be solely responsible for its acts and the acts of its agents, employees and subcontractors. The relationship between the Parties is based solely on the terms and conditions of this Agreement, and the terms and conditions of any other written agreement between the Parties.

D. Designations and Appointments.

1. The Board shall by Board resolution appoint the Board Treasurer, or such other officer as determined by the Board, to serve as the chief administrative officer of the School (the “CAO”) under the Uniform Budgeting and Accounting Act, MCL 141.421 *et seq.* (the “**Budgeting and Accounting Act**”) Notwithstanding any other provision of the Agreement to the contrary, the Board resolution shall designate NHA’s chief financial officer, or such other NHA officer or employee as is mutually agreed upon by NHA and the School, as the designated agent of the CAO to assist the CAO with the performance of the CAO’s duties under the Budgeting and Accounting Act.

2. NHA, including its directors, officers, and employees are hereby designated as “School Officials” for purposes of the Family Educational Right and Privacy Act, and its implementing regulations, 20 U.S.C. §1232g *et seq.* (FERPA); 34 CFR § 99.31(a)(1)(i)(B).

3. NHA, its directors, officers, and employees may be designated by the School for other purposes by a written resolution of the Board.

E. Certain Prohibitive Conduct Regarding Personally Identifiable Information. Except as permitted under the Code, NHA shall not sell or otherwise provide to a for-profit business entity any personally identifiable information that is part of an Academy Student’s education records.

F. Certain Prohibitive Conduct Regarding Academy Student Records. If NHA receives information that is part of an Academy Student’s education records, NHA shall not sell or otherwise provide the information to any other person except as permitted under the Code.

For purposes of Paragraphs E and F above, the terms “education records” and “personally identifiable information” shall have the same meaning as those terms in section 1136 of the Code, MCL 380.1136.

ARTICLE II

TERM & TERMINATION

A. Term. This Agreement shall commence on the Effective Date, and unless terminated as set forth herein, shall continue until the revocation, termination or expiration of the Charter currently in effect expiring June 30, 2026 (the “**Term**”). The parties acknowledge that the Authorizer, as part of any reauthorization or renewal, may require that the School and NHA submit an amended or restated Agreement for review by the Authorizer. The first school year of this Agreement shall commence July 1, 2016 to June 30, 2017, and each school year thereafter shall commence on July 1 and end on June 30 of the following year.

B. Termination.

1. By NHA. NHA may terminate this Agreement prior to the end of the Term if the Board fails to remedy a material breach of this Agreement within thirty (30) days after receiving a notice from NHA of such breach. For purposes of this Subsection, a material breach (which for the sake of clarity is a default hereunder) includes, but is not limited to: (i) NHA’s failure to timely receive any compensation or reimbursement required by this Agreement; or (ii) a suspension, termination, reconstitution, revocation, or non-renewal of the Charter.

2. By the School. The School may terminate this Agreement prior to the end of the Term if NHA fails to remedy a material breach of this Agreement within (30) days after receiving notice from the School of such breach. For purposes of this Subsection, a material breach includes, but is not limited to: (i) NHA’s failure to account for expenditures or pay operating costs pursuant to the Budget (as defined below); (ii) NHA’s failure to follow policies, procedures, rules, regulations or curriculum adopted by the Board, provided they do not violate the Charter, applicable law, or this Agreement; (iii) a receipt by the Board of an unsatisfactory report from NHA or an independent education consultant retained by the Board regarding the Services or the School’s performance, provided the unsatisfactory performance cannot be adequately corrected or explained; (iv) a determination that this Agreement or its implementation would serve as grounds for suspension, termination, revocation, or non-renewal of the Charter; (v) a determination that this Agreement or its implementation would jeopardize material tax exemptions of the School or its non-profit status; or (vi) any action or inaction by NHA that places the Charter in jeopardy of termination, suspension or revocation.

3. By Either Party. Either party may terminate this Agreement prior to the end of the Term, with or without cause, by providing the other party with at least ninety (90) days’ prior written notice.

4. Revocation or Termination of Charter. If the School’s Charter issued by the Authorizer is revoked, terminated or a new Charter is not issued to the School after expiration of the School’s Charter, this Agreement shall automatically terminate on the same date as the School’s Charter is revoked, terminated or expires without further action of the parties.

5. Amendment Caused By Academy Site Closure or Reconstitution. In the event that the Academy is required (i) to close an Academy site pursuant to a notice issued by the State School Reform/Redesign Officer under Section 507 of the Code, MCL 380.507; or (ii) to undergo a reconstitution pursuant to Section 507 of the Code, MCL 380.507, and Section 10.7 of the Contract Terms and Conditions, and such closure of an Academy site or reconstitution causes an amendment to or termination of this Agreement, the parties agree that this Agreement shall be

amended or terminated to implement the Academy site closure or reconstitution, with no cost or penalty to the Academy, and NHA shall have no recourse against the Academy or the Authorizer for implementing such site closure or reconstitution.

6. If this Agreement is terminated prior to the end of the Term other than as provided for in Article II(B)(4) of this Agreement, and unless otherwise agreed by the Parties, such termination will not become effective until the end of the then-current school year.

C. Effect of Termination. Upon the effective date of termination or expiration of this Agreement:

1. Subject to any provisions contained in a lease between the Parties, the Parties shall have the right to remove from the School any equipment or other assets owned or leased by the respective Party;

2. The School shall pay or reimburse NHA through the Fee (as defined below) for the prepaid portion of any expenses or liabilities incurred by NHA pursuant to the Budget as of the date of such termination or expiration, provided NHA supplies the School with documentation of all such expenses and liabilities;

3. Subject to the Charter and Authorizer's Educational Service Provider Policies ("ESP Policies"). NHA agree to assist the School for a reasonable amount of time, not to exceed ninety (90) days with (i) the School's transition to another administrative, managerial, or services arrangement; (ii) the School in the execution of a closure and dissolution plan and cooperate in the closure and dissolution process, including without limitation, in any audits and court or other proceedings related thereto; and

4. The party to whom Confidential Information (as defined below) has been disclosed shall, upon request and at the direction of the disclosing party: (i) return such Confidential Information within thirty (30) days, including any copies thereof, and cease its use; or (ii) destroy such Confidential Information and certify such destruction to the disclosing party, except for a single copy thereof which may be retained for the sole purpose of determining the scope of any obligations incurred under this Agreement, and except where disclosure or retention is required by applicable law.

ARTICLE III

OBLIGATIONS OF NHA

A. Manager at Risk. NHA shall be responsible and accountable to the Board for providing the Services. During the Term, NHA shall provide the Services regardless of whether actual revenue meets the level projected in the Budget, and NHA hereby assumes the risk of funding shortfalls during the Term. Notwithstanding the foregoing, NHA shall not be required to expend funds on Services in excess of the amount set forth in the Budget.

B. Comprehensive Educational Program. The School has determined to adopt NHA's proprietary educational and academic programs and goals, as set forth in the Charter (the "**Educational Program**"). Subject to the oversight of the Board, NHA shall implement and administer the Educational Program. In the event that NHA reasonably determines that it is necessary or advisable to make material changes to the Educational Program, NHA shall inform the Board of the proposed changes and obtain the Board's approval before making such changes, as well as the Authorizer's approval if required by the Charter or applicable law. The Parties acknowledge and agree that an essential principle of the Educational Program is its flexibility, adaptability and capacity to change in the interest of continuous improvement and efficiency. Not less than annually or as reasonably requested by the Board, NHA shall provide the Board with a report detailing progress made on each of the educational goals set forth in the Educational Program. The school year calendar and the school day schedule shall be approved by the Board as required under the Charter.

C. All Children Welcome. NHA places a high value on diversity, and the School shall welcome students of all races, ethnicity, religion, gender and economic backgrounds.

D. Services to Students with Disabilities. NHA welcomes students with disabilities at the School. NHA shall provide special education and related services, in conformity with the requirements of the Charter and applicable law, to students who attend the School.

E. Educational and Administrative Services. Subject to the oversight of the Board, NHA shall implement operational practices and procedures that are consistent with Board policy, the Charter and applicable law. Such practices and procedures shall include, but are not limited to:

1. Student recruitment and student admissions.
2. Student assessments, including testing, promotion, and retention.
3. The acquisition of instructional materials, equipment and supplies, and the administration of any and all extra-curricular and co-curricular activities and programs approved by the Board and NHA.
4. Employment of personnel working at the School and management of all personnel functions, as set forth herein.
5. All aspects of the School's business administration.
6. All aspects of the School's accounting operation, including general ledger management, financial reporting, payroll, employee benefits and payroll tax compliance.
7. Food service and transportation approved by the Board and NHA.
8. All aspects of facilities administration and maintenance.
9. Student behavior management and discipline.

F. Location of Services. Other than instruction, and unless prohibited by the Charter or applicable law, NHA may provide the Services, including but not limited to, purchasing, professional development and administrative services, off-site.

G. Subcontracts. NHA reserves the right to subcontract any and all aspects of the Services. NHA shall not subcontract the oversight of the Educational Program, except as specifically permitted in this Agreement or with prior written approval of the Board. Notwithstanding the foregoing, the Board specifically acknowledges and agrees that from time to time NHA may use third parties or independent contractors to assist in the creation and development of Educational Materials (as defined below) that may be used as a part of the Educational Program.

H. Pupil Performance Standards and Evaluation. NHA shall implement pupil performance evaluations that permit evaluation of the academic progress of each School student. NHA shall be responsible and accountable to the Board for the academic performance of students who are enrolled at the School. NHA shall utilize assessment strategies required by the Charter and applicable law. The Board and NHA shall cooperate in good faith to identify academic goals and methods to assess such academic performance. NHA shall provide the Board with timely reports regarding student performance.

I. Unusual Events. NHA shall timely notify the Board and the Administrator (as defined below) of any anticipated or known material: (i) health or safety issues, including all mandatory reporting required by applicable law; (ii) labor, employee or funding issues; or (iii) other issues that may reasonably and adversely impact the School's ability to comply with the Charter, applicable law or this Agreement.

J. School Records. The financial and education records pertaining to the School (collectively, the "**School Records**"), are property of the School. Except as may be prohibited or limited by the Charter or applicable law, the School Records shall be available to the Board and the Authorizer for their review, and are subject to inspection and copying to the same extent that records of public schools are subject to inspection and copying pursuant to applicable law. All School Records shall be physically or electronically available at the School's physical facility upon request made by the Board or the Authorizer. NHA shall provide the Board on a timely basis all information that is required to be disclosed under section 22f of the State School Aid Act of 1979, MCL 388.1622f.

On an annual basis, NHA agrees to provide the Board the same information that a school district is required to disclose under section 18(2) of the State School Aid Act of 1979, MCL 388.1618, for the most recent school fiscal year for which the information is available. Within thirty (30) days of receipt of this information, the Board shall make the information available on the School's website homepage, in a form and manner prescribed by the Michigan Department of Education. The defined terms in section 503c of the Code, MCL 380.503c, whichever is applicable, shall have the same meaning in this Agreement.

NHA shall make information concerning the operation and management of the School, including without limitation the information described in the Charter, available to the School as

deemed necessary by the Board in order to enable the School to fully satisfy its obligations under the Charter. Additionally:

(1) NHA agrees that it shall observe Board policies and applicable law regarding the confidentiality of Covered Data and Information. Covered Data and Information (“CDI”) includes paper and electronic student education record information and includes, without limitation, “education records” as defined under FERPA, 34 CFR § 99.1. CDI also includes any new records created and maintained by NHA under this Agreement using CDI.

(2) NHA shall not use or disclose CDI received from or on behalf of the School except as permitted or required by this Agreement and/or applicable law.

(3) Upon termination or other conclusion of this Agreement, NHA shall return all CDI to the School.

(4) NHA shall develop, implement, maintain and use appropriate administrative, technical and physical security measures to preserve the confidentiality, integrity and availability of all CDI received from, or on behalf of, the School or its students. These measures will be extended by contract to include subcontractors used by the NHA.

(5) NHA, within two business days of discovery, shall report to the Board any use or disclosure of CDI not authorized by this Agreement. NHA’s report shall identify: (i) the nature of the unauthorized use or disclosure, (ii) the CDI used or disclosed, (iii) who made the unauthorized use or received the unauthorized disclosure, (iv) what NHA has done or shall do to mitigate any deleterious effect of the unauthorized use or disclosure, and (v) what corrective action NHA has taken or shall take to prevent future similar unauthorized use or disclosure. NHA shall provide such other information, including a written report, as reasonably requested by the Board.

K. Facility. NHA shall use reasonable efforts to secure a facility to be leased or otherwise provided to the School on terms mutually agreeable to NHA and the Board. Obligations of the Board created under the terms of such lease are to be fulfilled by NHA unless otherwise agreed to in writing by NHA and the Board. The facility shall comply with the requirements of the Charter and applicable law. NHA shall also use reasonable efforts to cause the facility to be furnished with equipment and technology as is reasonably necessary to implement the Educational Program.

L. Legal Compliance. NHA will implement and enforce rules, regulations and procedures applicable to the School that are consistent with adopted Board policy, if any, and the Educational Program in accordance with the Charter and applicable law, including without limitation, rules, regulations, and policies regarding non-discrimination, discipline, special education, confidentiality and access to records.

M. Rules and Procedures. NHA will recommend to the Board reasonable rules, regulations, policies and/or procedures applicable to the School. The Board hereby authorizes and directs NHA to enforce such rules, regulations and procedures consistent with Board policy.

N. Assistance to the Board. NHA shall cooperate with the Board and, to the extent consistent with the Charter and applicable law, timely furnish the Board with all documents and information necessary for the Board to properly perform its responsibilities under this Agreement.

ARTICLE IV

OBLIGATIONS OF THE BOARD

A. Board Policies. The Board shall be responsible for the fiscal and academic policies of the School. The Board shall exercise good faith in considering the recommendations of NHA, including but not limited to, NHA's recommendations regarding policies, rules, regulations and the Budget (as defined below).

B. Academy Budget. The Board is responsible for establishing, approving and amending the Budget in accordance with the Budgeting and Accounting Act.

C. Governance Oversight. The Board shall provide governance level oversight of the School in accordance with the Charter and applicable law. The Board shall cooperate with NHA and, to the extent consistent with applicable law, timely furnish NHA all documents and information necessary for NHA to properly perform its responsibilities under this Agreement.

D. Unusual Events. The Board shall timely notify NHA of any anticipated or known material: (i) health or safety issues; (ii) labor, employee or funding issues; or (iii) other issues that may reasonably and adversely impact NHA's ability to comply with the Charter, applicable law, or this Agreement.

E. Office Space. The Board shall provide NHA with suitable office space at the School, provided the requested space is: (i) available and can be provided without materially prejudicing the Educational Program; and (ii) used only for activities related to the School. The space shall be provided at no cost to NHA.

F. Retained Authority. The Board shall retain the authority to adopt reasonable policies in accordance with applicable law relative to anything necessary for the proper establishment, maintenance, management, and operation of the School.

ARTICLE V

INTELLECTUAL PROPERTY

A. Definitions.

1. "Educational Materials" means all curriculum, print and electronic textbooks, instructional materials, lesson plans, teacher guides, workbooks, tests, and other curriculum-related materials licensed, developed or otherwise owned by the School or NHA.

2. **“Confidential Information”** means any confidential and non-public trade, technical or business knowledge, information and materials regarding the School or NHA (or their respective affiliates), which is given by one party to the other, or any of their respective representatives, in any form, whether printed, written, oral, visual, electronic or in any other media or manner. Confidential Information includes, but is not limited to, research, operations and procedures, financial projections, pricing, sales, expansion plans and strategies, services data, trade secrets and other intellectual property, or the results of any mediation or private adjudication, as well as information with respect to each party’s or its affiliates’ plans for market expansion, except for information which a party can show by contemporaneous written records was developed or formulated independently of work or services performed for, or in connection with performance of, this Agreement. Notwithstanding the foregoing, the disclosure of the other party’s Confidential Information as required to be disclosed by law, rule or regulation or by reason of subpoena, court order or government action shall not constitute a breach of this Agreement; however, in such event the party required to disclose such information will reasonably cooperate with the party whose information is required to be disclosed in order to obtain a protective order applicable to such disclosure. All Confidential Information will remain the sole property of the party disclosing such information or data.

B. School Materials. The School shall own all right, title and interest in and to Educational Materials that are: (i) licensed or owned by the School as of the Effective Date; or (ii) licensed, developed, characterized, conceived, derived, generated, identified, or otherwise made by the School during the Term, provided such materials do not reference the NHA Materials (as defined below), or incorporate any Confidential Information of NHA (collectively, the **“School Materials”**). The School Materials shall include all intellectual property rights associated therewith.

C. NHA Materials. NHA shall own all right, title and interest in and to Educational Materials that are: (i) licensed or owned by NHA as of the Effective Date; (ii) licensed, developed, characterized, conceived, derived, generated, identified, or otherwise made by NHA during the Term, provided such materials do not reference School Materials or incorporate any Confidential Information of the School; and (iii) any and all Educational Materials and non-curriculum materials provided to the School by NHA relating to the Educational Program, including all changes and derivatives thereof (collectively, the **“NHA Materials”**).

D. Derivative Works. The Parties acknowledge that to the extent any Educational Materials created by the School are derivative of the NHA Materials, use of such derivative materials during the Term is subject to the license granted herein, and the license to use such derivative materials shall cease as of the date of expiration or termination of this Agreement.

E. No Transfer or Sale. The School acknowledges and agrees that NHA is not transferring or selling, and the School is not receiving, purchasing or acquiring, any intellectual property or proprietary rights in or to the NHA Materials.

F. Licenses. NHA hereby grants the School a non-exclusive, non-transferable license (without the right to sublicense) to use the NHA Materials, and any Educational Materials created by the School which are derivative of the NHA Materials, solely in furtherance of the Educational

Program during the Term, including without limitation, the right to reproduce, publicly display, distribute and create derivative works of the same, in hard copy format or electronically, within the United States. The School represents and warrants that during the Term, and following the expiration or termination of this Agreement, the School will not exploit or assist any third party to exploit any of the NHA Materials for commercial purposes. Subject to applicable law, the School grants NHA a non-exclusive, non-transferable license (without the right to sublicense) to use the School Materials, solely in furtherance of the Educational Program during the Term, including without limitation, the right to reproduce, publicly display, distribute and create derivative works of the same, in hard copy format or electronically, within the United States.

G. NHA Marks. During the Term, NHA grants the School a non-exclusive, revocable, non-transferable license (without the right to sublicense) to use NHA's trade name(s) and NHA's trademark(s) (the "**NHA Marks**") solely for the purposes of promoting and advertising the School. NHA shall have the opportunity to review and approve all artwork, copy or other materials utilizing the NHA Marks prior to any production or distribution thereof. All uses of the NHA Marks require NHA's prior written permission. The School shall acquire no rights in or to the NHA Marks, and all goodwill associated with the NHA Marks shall inure to the benefit of and remain with NHA. Upon expiration or termination of this Agreement, the School shall immediately discontinue use of the NHA Marks and shall remove the NHA Marks from its locations, vehicles, websites, telephone directory listings and all other written or electronic promotional materials.

H. Assignment. Each party shall, and hereby does assign to the other, with full title guarantee and without additional compensation, such right, title and interest in and to any intellectual property as is necessary to fully affect the ownership provisions set out herein, and any accrued rights of action in respect thereof. Each party shall, if so requested by the other, execute all such documents and do all such other acts and things as may be reasonably required to comply with this Agreement to vest in the appropriate party all rights in the relevant intellectual property and shall procure execution by any named inventor of all such documents as may reasonably be required by the other party in connection with any related patent application.

ARTICLE VI

SOLICITATION AND USE OF PRIVATE FUNDS

NHA shall seek the Board's approval prior to soliciting any non-governmental grants, donations or contributions on behalf of the School. Any such funds received shall be used solely in accordance with the purpose for which they were solicited, applicable donor restrictions, or as otherwise approved by the Board. Subject to applicable donor restrictions, the Board shall determine the allocation of any such funds subject to this Article that remain unexpended following completion of the project or purpose for which they were originally designated.

ARTICLE VII

FINANCIAL ARRANGEMENTS

A. Revenues. Except as provided herein, all monies received by the School shall be deposited in the School's depository account within three (3) business days with a financial institution acceptable to the Board; provided, however, that upon receipt of a notice from NHA, the School shall pay all such funds owing under this Agreement directly to the account or party specified in such notice. The signatories on the School Board's accounts shall solely be Board members or properly designated Board employees (if any). Interest income earned on the School's accounts shall accrue to the School. Except as specifically excluded by this Agreement, the term "**Revenues**" shall include all funds received by or on behalf of the School, including but not limited to:

1. Funding for public school students enrolled at the School.
2. Special education funding provided by the federal and/or state government that is directly allocable to special education students enrolled at the School.
3. Gifted and talented funding provided by the federal and/or state government that is directly allocable to gifted and talented students enrolled at the School.
4. At-risk funding provided by the federal and/or state government that is directly allocable to at-risk students enrolled at the School.
5. Funding provided by the federal and/or state government that is directly allocable to students enrolled at the School with limited English proficiency.
6. All other federal and/or state grant sources, including, but not limited to, Title I funding allocable to the School.
7. Grants and donations received by the School to support or carry out programs at the School (except to the extent NHA is not required or involved in soliciting, administering or managing the contribution and/or donation, in which case such funds shall be deposited in the Board Spending Account (as defined below)).
8. Fees charged to students as permitted by law for extra services provided by NHA as approved by the Board.

The expenditure of any Revenues received from governmental entities shall be consistent with all applicable regulations and policies. The expenditure of any Revenues received from non-governmental grants, contributions and donations shall be made consistent with the provisions of Article VI.

B. Budget. NHA shall provide the Board with an annual proposed Budget prepared and maintained in accordance with the Charter, the Michigan Budgeting and Accounting Act, and applicable law (the "**Budget**"). The Budget shall include all of the School's projected revenues and expenses at the object level as described in the Michigan Department of Education's Michigan School Accounting Manual. For the School's first school year, the Budget shall be submitted prior

to the beginning of the school year. Thereafter, the Budget shall be submitted to the Board prior to June 1 for the next school year.

C. Review and Approval of Budget. The Board shall be responsible for reviewing and approving the Budget in accordance with the Charter and applicable law. At the direction of either NHA or the Board, with the approval of the Board, the Budget shall be amended from time to time as necessary.

D. Board Spending Account. Notwithstanding any other provision of this Agreement to the contrary, each school year during the Term, NHA shall allocate to an account controlled by the Board an amount equal to the lesser of: (i) 2% of state per pupil aid reflected in the Budget for that respective school year, or (ii) \$35,000 (the "**Board Spending Account**"). The aforesaid amount shall be deposited by NHA into the Board Spending Account pro-rata during the course of the School's school year as Revenues are received. All funds in the Board Spending Account are the property of the School and may be used by the School at the discretion of the Board. Funds in the Board Spending Account that are not spent by the School during the school year shall carryover annually. Items purchased by NHA for the School and paid for by the School with funds from the Board Spending Account, such as non-proprietary instructional and/or curriculum materials, books, supplies and equipment, shall be the property of the School. The property of the School excludes items leased, financed or purchased by NHA with the Fee (as defined below). NHA agrees not to add any fees or charges to the cost of equipment, materials or supplies purchased by NHA at the request of or on behalf of the School with funds from the Board Spending Account. NHA, in making such purchases for the School pursuant to this subsection, shall comply with Sections 1267 and 1274 of the Code, as if the School were making such purchases itself from a third party, and shall provide the Board, upon request, available documentation evidencing the costs associated with such purchases. NHA shall maintain a listing of all assets owned by the School and shall provide the list to the Board annually upon request.

E. Fee. NHA shall receive all Revenues as its services fee (the "**Fee**"), from which it shall pay all operating costs of the School as detailed in the Budget. NHA and the Board acknowledge that operating costs includes an administrative fee payable to the Authorizer as set forth in the Charter. Payment of the Fee shall be made on the same frequency that the School receives its Revenues. NHA shall be entitled to retain as compensation for the Services the difference, if any, between the Fee and the amount actually expended by NHA in operation and/or management of the School during the School's fiscal year. NHA agrees not to add any fees or charges to the cost of equipment, materials or supplies purchased by NHA at the request of or on behalf of the School.

F. No Loans. NHA shall not make or extend loans to the Board.

G. Other Schools. The School acknowledges that NHA has entered into similar services agreements with other schools. NHA shall maintain separate accounts for expenses incurred in the operation of the School and other schools assisted by NHA, and shall reflect in the School's financial records only those expenses incurred in the operation of the School. If NHA incurs expenses that are for both the benefit of the School and other schools assisted by NHA, then NHA shall allocate, to the extent permitted by law, such expenses among all such affected schools, including the School, on a prorated basis based upon the number of enrolled students, the number

of classrooms, or the number of teachers at the affected schools, or on such other equitable basis as is reasonably determined by NHA. In no event shall marketing and development costs incurred solely for the benefit of NHA (and not the School) be allocated to the School. Costs shall be allocated to, or reimbursed by, the School and reported by NHA in accordance with applicable law.

H. Financial Reporting. NHA shall provide the Board with:

1. At least annually, the Budget as required by this Agreement.
2. Monthly, financial statements no more than forty-five (45) days in arrears and at least one week prior to each Board meeting. These financial statements will include a Balance Sheet, Statement of Revenues, Expenditures and Changes in Fund Balance at object level detail with a comparison of budget to actual revenue and expenditures and explanations of variances and cash flow statement.
3. Quarterly, or as reasonably requested by the Board, a report on School operations and student performance.
4. As reasonably requested, other information to enable the Board to: (i) evaluate the quality of the Services; and (ii) timely provide all reports and information that are required by the Charter and applicable law.

I. Access to Financial Records. NHA shall keep accurate financial records pertaining to its operation of the School, together with all School financial records prepared by or in possession of NHA, and shall retain all of the aforereferenced records according to the Charter and applicable law to which such books, accounts, and records relate. NHA and the Board shall maintain the proper confidentiality of personnel, students, and other records as required by law. All records shall be kept in accordance with applicable state and federal requirements.

J. Accounting Standards; Annual Audit.

1. The School shall at all times comply with generally accepted public sector accounting principles, accounting system requirements of the State School Aid Act of 1979, as amended, applicable Michigan Department of Education rules, and applicable law.
2. The Board shall select and retain an independent auditor to conduct an annual audit of the School's financial matters in accordance with the Charter and applicable law.
3. Subject to applicable law, all records in the possession or control of NHA that relate to the School, including but not limited to, financial records of the School, shall be made available to the School and the School's independent auditor and Authorizer upon request. The expense of the annual audit shall be included in the Budget.

K. Contributions; Repayment.

NHA shall make contributions to the School in the event School expenses for the Services exceed Revenues (the “**Contributions**”). The Contributions, if any, shall be in amounts acceptable to the Parties and, once made, shall be included in the Budget. The School shall not be legally obligated to repay NHA for Contributions. NHA’s agreement to make such Contributions shall not be deemed to negate or mitigate the need for the School to apply for or solicit state or federal start-up funds, grants or sub-grants which the School, as a public school, may be eligible to receive.

ARTICLE VIII

PERSONNEL & TRAINING

A. Qualified Personnel. NHA shall select and hire qualified personnel to perform the Services. NHA shall have the responsibility and authority, subject to this Article, to select, hire, evaluate, assign, discipline, transfer, and terminate personnel consistent with the Budget, the Charter and applicable law. Personnel working at the School shall be employees of NHA unless otherwise expressly agreed by NHA and the Board. NHA and the Board each shall be responsible for their respective employees. However, the compensation of all employees working at the School shall be included in the Budget. Upon Board request, NHA shall disclose to the Board the level of compensation and fringe benefits provided by NHA to NHA employees working at the School. A criminal background check and unprofessional conduct search in compliance with applicable law shall be conditions for the hiring of or services provided by any person assigned by NHA under this Agreement to regularly and continuously work in any of the School’s facilities or at program sites where the School delivers Services. NHA shall pay all salaries, wages, benefits, payroll and other taxes to or on account of its employees. The Academy shall not be liable for the payment of any such salaries, wages, benefits, payroll or taxes thereon for or on behalf of any NHA employee, contractor or agent. NHA acknowledges and agrees that it is the sole and exclusive responsibility of NHA to make the requisite tax filings, deductions and payments to the appropriate federal, state and local tax authorities for and on behalf of all persons employed or engaged by NHA to provide Services under this Agreement. As applicable, NHA shall conduct employee evaluations consistent with Section 1249 and 1250 of the Code.

B. School Administrator. The School administrator (the “**Administrator**”) shall be an employee of NHA and not the Board. The duties and terms of the Administrator’s employment shall be determined by NHA. The Administrator shall work with NHA in the operation and management of the School. The Administrator shall attend meetings of the Board and shall provide reports to the Board. The accountability of NHA to the School is an essential foundation of this Agreement. NHA shall have the authority, consistent with this Article, to select, hire, evaluate, assign, discipline, transfer and terminate the Administrator, and to hold the Administrator accountable for the performance of the School. Without limiting the foregoing, NHA shall consult with the Board prior to the placement and/or removal of the Administrator. Absent compelling circumstances, the consultation shall commence at least ninety (90) days prior to NHA placing

and/or removing the Administrator. NHA shall give due consideration to the input of the Board or the Board's designated representative prior to making a final decision regarding placement and/or removal of the Administrator. NHA shall remove the Administrator if the Board is reasonably dissatisfied with the Administrator's performance. Absent compelling circumstances, however, the Board shall give NHA and the Administrator six (6) months to correct the basis for the Board's reasonable dissatisfaction. The parties agree that the purpose of the above provisions is not to deny the Administrator the opportunity for growth and/or promotion within NHA. Notwithstanding any of the foregoing, the placement of the initial Administrator for the School in its first year of operation shall be made by NHA.

As the employer, NHA shall be solely responsible for the performance evaluation of the Administrator. NHA shall seek feedback from the Board prior to completing an annual Administrator performance evaluation.

C. Teachers. NHA shall, consistent with this Article, assign to perform Services at the School, teachers qualified to teach their assigned subjects and grade level. The curriculum taught by the teachers shall be consistent with the Educational Program. The teachers may, at the discretion of NHA, be assigned to work at the School on a full or part time basis. If assigned to work at the School on a part time basis, the teacher(s) may also be assigned to work at other schools for which NHA provides services. The cost for such teacher(s) shall be shared proportionately among the schools at which NHA has assigned the teacher(s) to work. Each teacher assigned to work at the School shall hold a valid teaching certificate issued by the state board of education or applicable state agency to the extent required by the Authorizing Law.

D. Support Staff. NHA shall, consistent with this Article, assign to perform Services at the School, qualified support staff as needed for NHA to operate the School in an efficient manner. The support staff may, at the discretion of NHA, be assigned to work at the School on a full or part time basis. If assigned to work at the School on a part time basis, the support staff may be assigned to work at other schools for which NHA provides services. The cost for such support staff shall be shared proportionately among the schools at which NHA has assigned the support staff to work. An individual assigned to work at the School that is not teaching, but for which a license is required under applicable law, shall have the appropriate license.

E. Training. NHA shall provide or procure training in its methods, curriculum, program, and technology to all teaching personnel on a regular basis. Instructional personnel shall be required to obtain at least the minimum hours of professional development as required by applicable law. Non-instructional personnel shall receive training as NHA determines reasonable and necessary under the circumstances.

F. Background Checks and Qualifications. NHA shall comply with applicable law regarding background checks, unprofessional conduct searches and certification/licensure, as applicable, for all persons working in the School, the costs of which shall be included in the Budget.

G. Terms of Employment. No member of the staff at the School shall be subject to any covenant not to compete or other employment restriction as part of the terms of his or her employment with NHA for the Services.

H. Limitations on Discretion. All decisions made by NHA, and any discretion exercised by NHA, in its selection, hiring, evaluation, assignment, discipline, transfer, and termination of personnel, shall be consistent with the Budget, the Charter, the parameters adopted and included in the Educational Program, and applicable law.

ARTICLE IX

INDEMNIFICATION

A. Indemnification of Parties. To the extent not prohibited by the Charter or applicable law, the Parties hereby agree to indemnify, defend, and hold the other (the “**Indemnified Party**”), harmless from and against any and all third-party claims, actions, damages, expenses, losses or awards which arise out of (i) the negligence or intentional misconduct of the indemnifying party, (ii) any action taken or not taken by the indemnifying party, or (iii) any noncompliance or breach by the indemnifying party of any of the terms, conditions, warranties, representations, or undertakings contained in or made pursuant to this Agreement. As used herein, Indemnified Party shall include the party’s trustees, directors, officers, employees, agents, representatives and attorneys. The Parties may purchase general liability, property, or other insurance policies. Notwithstanding anything in this Agreement to the contrary, the Board shall not be precluded by the terms of this Agreement from asserting or declining to assert a claim of governmental immunity.

B. Indemnification of Authorizer. The Parties acknowledge and agree that the Authorizer, its Board of Trustees, and its members, officers, employees, agents or representatives (collectively “**University**”) are deemed to be third party beneficiaries for purposes of this Agreement. As third party beneficiaries, NHA hereby promises to indemnify, defend and hold harmless the University from and against all demands, claims, actions, suits, causes of action, losses, judgments, liabilities, damages, fines, penalties, demands, forfeitures, or any other liabilities or losses of any kind whatsoever, including costs and expenses (not limited to reasonable attorney fees, expert and other professional fees) of settlement and prosecution imposed upon or incurred by the University, and not caused by the sole negligence of the University, which arise out of or are in any manner connected with the University Board’s approval of the School’s Charter Application, the University Board’s consideration of or issuance of a Charter, NHA’s preparation for or operation of the School, or which are incurred as a result of the reliance by the University upon information supplied by NHA, or which arise out of NHA’s failure to comply with the Charter or applicable law. The Parties expressly acknowledge and agree that the University may commence legal action against NHA to enforce its rights as set forth in this section of the Agreement.

ARTICLE X

INSURANCE

A. Insurance Coverage. NHA shall maintain such policies of insurance as required by the Charter, the Michigan Universities Self-Insurance Corporation ("M.U.S.I.C."), and applicable law. Each party shall, upon request, present evidence to the other and the Authorizer that it maintains the requisite insurance in compliance with the provisions of this Article. In the event that the Authorizer or M.U.S.I.C. requests any change in coverage, NHA agrees to comply with any change in the type and amount of coverage, as requested, within thirty (30) days after notice of the insurance coverage change is provided to NHA. Each party shall comply with any information or reporting requirements required by the other party's insurer(s), to the extent reasonably practicable.

B. Workers' Compensation Insurance. Each party shall maintain workers' compensation insurance as required by law, covering their respective employees.

ARTICLE XI

REPRESENTATIONS & WARRANTIES

A. Board and School. The Board represents and warrants, for itself and on behalf of the School, that: (i) it is legally vested with all power and authority necessary to operate a charter school under the Authorizing Law; (ii) it is legally vested with all power and authority necessary to execute, deliver and perform this Agreement, including without limitation, the power and authority to contract with a private entity for the provision of educational, business administration and management services; (iii) its actions have been duly and validly authorized, and it has adopted any and all resolutions or expenditure approvals required for the execution of this Agreement; and (iv) there are no pending actions, claims, suits or proceedings, or, to its knowledge, threatened or reasonably anticipated against or affecting either the Board or the School, which if adversely determined, would have a material adverse effect on its ability to perform under this Agreement.

B. NHA. NHA represents and warrants that: (i) it is a corporation in good standing and is authorized to conduct business in the State of Michigan; (ii) it is legally vested with all power and authority necessary to execute, deliver and perform this Agreement; (iii) there are no pending actions, claims, suits or proceedings, or, to its knowledge, threatened or reasonably anticipated against or affecting NHA, which if adversely determined, would have a material adverse effect on its ability to perform its obligations under this Agreement; and (iv) it will comply with all registration and licensing requirements relating to conducting business under this Agreement, which the Board agrees to assist NHA in applying for such licenses and permits and in obtaining such approvals and consents.

ARTICLE XII

MISCELLANEOUS

A. Entire Agreement. This Agreement and any attachments hereto shall constitute the entire agreement of the Parties on the subject matter set forth herein. This Agreement supersedes and replaces any and all prior agreements and understandings regarding the subject matter set forth herein between the School and NHA.

B. Force Majeure. Except for payment obligations, and notwithstanding any other provisions of this Agreement, neither party shall be liable for any delay in performance or inability to perform due to acts of God, war, riot, embargo, fire, explosion, sabotage, flood, accident, labor strike, or other acts beyond its reasonable control; provided either party may terminate this Agreement in accordance with provisions contained herein if sufficient grounds exist as provided in the Article governing termination.

C. State Governing Law; Waiver of Jury Trial. This Agreement shall be construed, interpreted, governed and enforced pursuant to the laws of the State of Michigan, without regard to its conflict-of-laws principles. The Parties hereby waive the right to a jury trial in any action, proceeding or counterclaim brought by either NHA or the School against the other.

D. Notices. All notices and other communications required by this Agreement shall be in writing and sent to the Parties at the facsimile number or address set forth below. Notice may be given by: (i) facsimile with written evidence of confirmed receipt by the receiving party of the entire notice; (ii) certified or registered mail, postage prepaid, return receipt requested; or (iii) personal delivery. Notice shall be deemed to have been given on the date of transmittal if given by facsimile, upon the date of postmark if sent by certified or registered mail, or upon the date of delivery if given by personal delivery. For purposes of the foregoing, "**personal delivery**" shall include delivery by nationally recognized overnight courier (such as FedEx), if signed for by the recipient or a delegate thereof. Notices to the School shall be sent to the current address of the then current Board President, with a copy to the then current Board attorney. The addresses of the Parties for the purposes aforesaid, including the address of the initial Board President, are as follows:

The School:	South Arbor Charter Academy Attn: President, Board of Directors 8200 Carpenter Road Ypsilanti, Michigan 48197 Telephone: (734) 528-2821 Facsimile: (734) 528-2829

E. Assignment. NHA may assign this Agreement with the prior written approval of the Board and in a manner consistent with the Authorizer's policies; provided, however, this Agreement shall not be assignable without prior written notification to Authorizer.

F. Amendment. This Agreement shall not be altered, amended, modified or supplemented except by memorandum approved by the Board and signed by both an authorized officer of the School and NHA and in manner consistent with the Authorizer's policies.

G. Waiver. No waiver of any provision of this Agreement shall be deemed or shall constitute a waiver of any other provision. Nor shall such waiver constitute a continuing waiver unless otherwise expressly stated.

H. Costs and Expenses. If any Party commences an action against another Party as a result of a breach or alleged breach of this Agreement, the prevailing Party shall be entitled to have and recover from the losing Party reasonable attorneys' fees and costs of suit.

I. Severability. If any term or provision of this Agreement is held by a court of competent jurisdiction to be invalid, void or unenforceable, the remainder of the terms and provisions set forth herein shall remain in full force and effect and shall in no way be affected, impaired or invalidated, and the Parties shall use their best efforts to find and employ an alternative means to achieve the same or substantially the same result as that contemplated by such term or provision.

J. Delegation of Authority. Nothing in this Agreement shall be construed as delegating to NHA powers or authority of the Board which are not subject to delegation by the Board under the Charter or applicable law.

K. Compliance with Law. Each party will comply with the Charter and laws applicable to the performance of such party's obligations hereunder.

L. Time of Essence. The Parties understand and agree that time is of the essence in performing their respective responsibilities under this Agreement.

AMENDMENT NO. 5

to the
July 1, 2016 Contract to Charter
A School of Excellence and Related Documents

Issued To

SOUTH ARBOR CHARTER ACADEMY
(A SCHOOL OF EXCELLENCE)

By

THE CENTRAL MICHIGAN UNIVERSITY
BOARD OF TRUSTEES
(AUTHORIZING BODY)

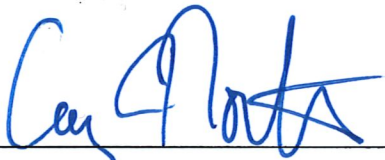

CONTRACT AMENDMENT NO. 5

SOUTH ARBOR CHARTER ACADEMY

In accordance with Article IX of the Terms and Conditions of the Contract (the "Contract"), dated July 1, 2016, issued by the CENTRAL MICHIGAN UNIVERSITY BOARD OF TRUSTEES (the "University Board") to SOUTH ARBOR CHARTER ACADEMY (the "Academy"), as amended, the parties agree to further amend the Contract as follows:

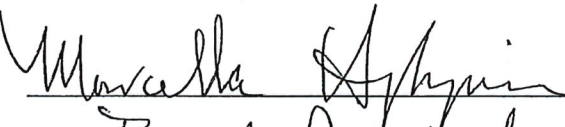

- 1.) Amend the Terms and Conditions of Contract by replacing the language contained within the Preamble; Article I: Definitions; Article II: Relationship Between the Academy and the University Board; Article III, Section 3.6. Authorization to Employ or Contract and Section 3.7. Teacher Certification and Teaching Methods; Article IV, Section 4.2. Other Permitted Activities and Section 4.5. Prohibition of Identified Family Relationships; Article VI, Section 6.5. Methods of Pupil Assessment and Section 6.16. Matriculation Agreements; Article VII: Tuition Prohibited; Article VIII: Compliance with State and Federal Laws; Article X: Contract Revocation, Termination, and Suspension; Article XI: Provisions Relating to Public School Academies; and Article XII: General Terms, with the corresponding language attached as Tab 1.
- 2.) Amend Schedule 7, Section b: Educational Goal and Related Measures, by replacing the materials contained therein with the materials attached as Tab 2.

This entire amendment is hereby approved by the University Board and the Academy Board through their authorized designees, and shall have an effective date of July 1, 2019.

By: Corey R. Northrop, Executive Director
The Governor John Engler Center for Charter Schools
Designee of the University Board

By: Board President
South Arbor Charter Academy
Designee of the Academy Board

Dated: 11 Sep 2019

South Arbor Charter Academy

Contract Amendment No. 5

Tab 1

Preamble:

WHEREAS, the People of Michigan through their Constitution have provided that schools and the means of education shall forever be encouraged and have authorized the Legislature to maintain and support a system of free public elementary and secondary schools; and

WHEREAS, all public schools are subject to the leadership and general supervision of the State Board of Education; and

WHEREAS, the Legislature has authorized an alternative form of public school designated a "public school academy" to be created to serve the educational needs of pupils and has provided that pupils attending these schools shall be eligible for support from the State School Aid Fund; and

WHEREAS, the Legislature has delegated to the governing boards of state public universities, community college boards, intermediate school district boards and local school district boards, the responsibility for authorizing the establishment of public school academies; and

WHEREAS, the Central Michigan University Board of Trustees ("University Board") has considered and has approved the issuance of a contract to South Arbor Charter Academy ("the Academy");

NOW, THEREFORE, pursuant to the Revised School Code, the University Board issues a contract conferring certain rights, franchises, privileges, and obligations and confirms the Academy's status as a school of excellence. In addition, the parties agree that the issuance of this Contract is subject to the following terms and conditions:

ARTICLE I DEFINITIONS

Section 1.1. Certain Definitions. For purposes of this Contract, and in addition to the terms defined throughout this Contract, each of the following words or expressions, whenever initially capitalized, shall have the meaning set forth in this section:

- (a) "Academy" means the Michigan nonprofit corporation named South Arbor Charter Academy which is established as a school of excellence pursuant to this Contract.
- (b) "Academy Board" means the Board of Directors of the Academy.
- (c) "Applicable Law" means all state and federal law applicable to a school of excellence.
- (d) "Application" means the school of excellence application and supporting documentation submitted to the University for the establishment of the Academy.
- (e) "Code" means the Revised School Code, Act No. 451 of the Public Acts of 1976, as amended, being Sections 380.1 to 380.1852 of the Michigan Compiled Laws.
- (f) "Community District" means a community school district created under part 5B of the Code, MCL 380.381 et seq.
- (g) "Conservator" means an individual appointed by the University President in accordance with Section 10.8 of these Terms and Conditions.
- (h) "Contract" means, in addition to the definition set forth in the Code, these Terms and Conditions, the Reauthorizing Resolution, the Method of Selection, Appointment, and Removal Resolution, the Schedules, the Educational Service Provider Policies, the Master Calendar and the Application.
- (i) "Department" means the Michigan Department of Education.
- (j) "Director" means a person who is a member of the Academy Board of Directors.
- (k) "Educational Service Provider" or "ESP" means an educational management organization, or employee leasing company, as defined under section 503c of the Code, MCL 380.503c, that has entered into a contract or agreement with the Academy Board for operation or management of the Academy, which contract has been submitted to the Center for review and has not been disapproved by the Center Director, and is consistent with the Educational Service Provider Policies, as they may be amended from time to time, and Applicable Law.
- (l) "Educational Service Provider Policies" or "ESP Policies" means the Educational Service Provider Policies, adopted by The Governor John Engler Center for Charter Schools at Central Michigan University that apply to a Management Agreement. The Educational Service Provider Policies may be amended from time to time. Upon amendment, changes to the ESP Policies shall automatically be incorporated into this Contract and shall be exempt from the amendment procedures under Article IX of these Terms and Conditions.

- (m) "Fund Balance Deficit" means the Academy has more liabilities than assets at the end of any given school fiscal year, and includes any fiscal year where the Academy would have had a budget deficit but for a financial borrowing by the Academy or a monetary contribution by an Educational Service Provider or other person or entity to the Academy. If the Academy receives a gift or grant of money or financial support from an Educational Service Provider or other person or entity that does not require repayment by the Academy, and is not conditioned upon the action or inactions of the Academy Board, then such gift or grant shall not constitute a borrowing or contribution for purposes of determining a Fund Balance Deficit.
- (n) "Management Agreement" or "ESP Agreement" means an agreement as defined under section 503c of the Code, MCL 380.503c, that has been entered into between an ESP and the Academy Board for the operation and/or management of the Academy which has been submitted to the Center for review and has not been disapproved by the Center Director.
- (o) "Master Calendar" means the Master Calendar of Reporting Requirements as annually issued by The Governor John Engler Center for Charter Schools setting forth reporting and document submission requirements for the Academy.
- (p) "Method of Selection, Appointment, and Removal Resolution" means the policy adopted by resolution of the University Board on September 18, 1998, and amended on February 15, 2018, establishing the standard method of selection and appointment, length of term, removal and suspension, number of directors and qualifications of academy board members for public school academies issued a Contract by the University Board.
- (q) "Reauthorizing Resolution" means the resolution adopted by the University Board on December 17, 2015, approving the issuance of a Contract to the Academy.
- (r) "Schedules" means the following Contract documents of the Academy: Schedule 1: Restated Articles of Incorporation, Schedule 2: Amended Bylaws, Schedule 3: Fiscal Agent Agreement, Schedule 4: Oversight, Compliance and Reporting Agreement, Schedule 5: Description of Staff Responsibilities, Schedule 6: Physical Plant Description, Schedule 7: Required Information for School Of Excellence, and Schedule 8: Information Available to the Public and the Center.
- (s) "State Board" means the State Board of Education, established pursuant to Article 8, Section 3 of the 1963 Michigan Constitution and MCL 388.1001 et seq.
- (t) "State School Aid Fund" means the State School Aid Fund established pursuant to Article IX, Section 11 of the Michigan Constitution of 1963, as amended.
- (u) "State School Reform/Redesign Office" means the office created within the Michigan Department of Technology Management and Budget by Executive Reorganization Order 2015-02 codified at MCL 18.445, and transferred from the Michigan Department of Technology Management and Budget to the Michigan Department of Education by Executive Reorganization Order 2017-02, codified at MCL 388.1282.
- (v) "Superintendent" means the Michigan Superintendent of Public Instruction.
- (w) "Terms and Conditions" means this document entitled "Terms and Conditions of Contract, Dated July 1, 2016, Issued by the Central Michigan University Board of Trustees Confirming the Status of South Arbor Charter Academy as a School Of Excellence."

- (x) "The Governor John Engler Center for Charter Schools" or "The Center" means the office designated by the University Board as the initial point of contact for school of excellence applicants and schools of excellence authorized by the University Board. The Center is also responsible for administering the University Board's responsibilities with respect to the Contract.
- (y) "The Governor John Engler Center for Charter Schools Director" or "The Center Director" means the person designated at the University to administer the operations of the Center.
- (z) "University" means Central Michigan University, established pursuant to Article 8, sections 4 and 6 of the 1963 Michigan Constitution and MCL 390.551 et seq.
- (aa) "University Board" means the Central Michigan University Board of Trustees.
- (bb) "University Charter Schools Hearing Panel" or "Hearing Panel" means such persons as designated by the University President.
- (cc) "University President" means the President of Central Michigan University or his or her designee. In section 1.1(bb) above, "University President" means the President of Central Michigan University.

Section 1.2. Captions. The captions and headings used in this Contract are for convenience only and shall not be used in construing the provisions of this Contract.

Section 1.3. Gender and Number. The use of any gender in this Contract shall be deemed to be or include the other genders, including neuter, and the use of the singular shall be deemed to include the plural (and vice versa) wherever applicable.

Section 1.4. Statutory Definitions. Statutory terms defined in the Code shall have the same meaning in this Contract.

Section 1.5. Schedules. All Schedules to this Contract are incorporated into, and made part of, this Contract.

Section 1.6. Application. The Application submitted to the University Board for the establishment of the Academy is incorporated into, and made part of, this Contract. To the extent there is a difference between the Contract and the Application, the Contract shall control.

Section 1.7. Conflicting Contract Provisions. In the event that there is a conflict between language contained in the provisions of this Contract, the Contract shall be interpreted as follows: (i) The Method of Selection, Appointment, and Removal Resolution shall control over any other conflicting language in the Contract; (ii) the Reauthorizing Resolution shall control over any other conflicting language in the Contract with the exception of language in The Method of Selection, Appointment, and Removal Resolution; (iii) the Terms and Conditions shall control over any other conflicting language in the Contract with the exception of language in The Method of Selection, Appointment, and Removal Resolution and the Reauthorizing Resolution; and (iv) the Restated Articles of Incorporation shall control over any other conflicting language in the Contract with the exception of language in the Method of Selection, Appointment, and Removal Resolution, Reauthorizing Resolution and these Terms and Conditions.

ARTICLE II

RELATIONSHIP BETWEEN THE ACADEMY AND THE UNIVERSITY BOARD

Section 2.1. Constitutional Status of Central Michigan University. Central Michigan University is a constitutionally established body corporate operating as a state public university. The University Board is an authorizing body as defined by the Code. In approving this Contract, the University Board voluntarily exercises additional powers given to the University under the Code. Nothing in this Contract shall be deemed to be any waiver of Central Michigan University's powers or independent status and the Academy shall not be deemed to be a part of Central Michigan University. If applicable, the University Board has provided to the Department the accreditation notice required under the Code.

Section 2.2. Independent Status of the Academy. The Academy is a body corporate and governmental entity authorized by the Code. It is organized and shall operate as a school of excellence and a nonprofit corporation. It is not a division or part of Central Michigan University. The relationship between the Academy and the University Board is based solely on the applicable provisions of the Code and the terms of this Contract or other agreements between the University Board and the Academy.

Section 2.3. Financial Obligations of the Academy Are Separate From the State of Michigan, University Board and the University. Any contract, mortgage, loan or other instrument of indebtedness entered into by the Academy and a third party shall not in any way constitute an obligation, either general, special, or moral, of the State of Michigan, the University Board, or the University. Neither the full faith and credit nor the taxing power of the State of Michigan or any agency of the State, nor the full faith and credit of the University Board or the University shall ever be pledged for the payment of any Academy contract, mortgage, loan or other instrument of indebtedness.

Section 2.4. Academy Has No Power To Obligate or Bind the State of Michigan, the University Board or the University. The Academy has no authority whatsoever to enter into any contract or other agreement that would financially obligate the State of Michigan, the University Board or the University, nor does the Academy have any authority whatsoever to make any representations to lenders or third parties, that the State of Michigan, the University Board or the University in any way guarantee, are financially obligated, or are in any way responsible for any contract, mortgage, loan or other instrument of indebtedness entered into by the Academy.

Section 2.5. New Public School Academies Located Within the Boundaries of a Community District. If the circumstances listed below in (a) or (b) apply to the Academy's site, the Academy represents to the University Board, intending that the University Board rely on such representation as a precondition to issuing a contract for a new school of excellence, that the Academy will have a substantially different governance, leadership and curriculum than the public school previously operating at the site:

- (a) The Academy's proposed site is the same location as a public school that (i) is currently on the list under Section 1280c(1), MCL 380.1280c(1) or Section 1280g(3), MCL 380.1280g(3) of the Code, as applicable; or (ii) has been on the list under Section 1280c(1) or 1280g(3) of the Code, as applicable, during the immediately preceding 3 school years.
- (b) The Academy's proposed site is the same location of another public school academy, urban high school academy, school of excellence or strict discipline academy whose contract was revoked or terminated by an authorizing body.

ARTICLE III

ROLE OF THE UNIVERSITY BOARD AS AUTHORIZING BODY

Section 3.6. Authorization to Employ or Contract. The University Board authorizes the Academy Board to employ or contract for personnel according to the position information outlined in Schedule 5. The Academy Board shall prohibit any individual from being employed by the Academy or an Educational Service Provider, in more than one (1) full-time position and simultaneously being compensated at a full-time rate for each of these positions. An employee hired by the Academy shall be an employee of the Academy for all purposes and not an employee of the University for any purpose. With respect to Academy employees, the Academy shall have the power and responsibility to (i) select and engage employees; (ii) pay their wages, benefits, and applicable taxes; (iii) dismiss employees; and (iv) control the employees' conduct, including the method by which the employee carries out his or her work. The Academy Board shall be responsible for carrying workers' compensation insurance and unemployment insurance for its employees.

The Academy Board may contract with an Educational Service Provider to provide comprehensive educational, administrative, management, or instructional services or staff to the Academy. Before entering into a Management Agreement with an Educational Service Provider, the Academy Board shall first comply with the Educational Service Provider Policies issued by the Center. Any Management Agreement entered into by the Academy shall also comply with Section 11.2 and 12.10 of these Terms and Conditions. A copy of the Management Agreement between the Academy Board and the Educational Service Provider shall be incorporated into this Contract under Schedule 5. Any changes to the Management Agreement shall be incorporated into this Contract by amendment in accordance with Article IX, as applicable.

Section 3.7. Teacher Certification. Except as otherwise provided by law, the Academy shall use certificated teachers according to State Board rule.

ARTICLE IV
REQUIREMENT THAT THE ACADEMY ACT SOLELY AS GOVERNMENTAL ENTITY

Section 4.2. Other Permitted Activities.

- (a) Nothing in this Contract shall prohibit the Academy from engaging in other lawful activities that are not in derogation of the Academy's status as a public school or that would not jeopardize the eligibility of the Academy for state school aid funds. Except as provided for the agreements identified below in Section 4.2(b), the Academy may enter into agreements with other public schools, governmental units, businesses, community and nonprofit organizations where such agreements contribute to the effectiveness of the Academy or advance education in this state.
- (b) The Academy shall submit to the Center for prior review the following agreements:
 - (i) In accordance with the Educational Service Provider Policies, a draft copy of any ESP Agreement and any subsequent amendments;
 - (ii) In accordance with the Master Calendar, a draft copy of any Academy deed or lease, amendments to existing leases or any new leasing agreements for any Academy facility; and
 - (iii) In accordance with the Master Calendar, draft long-term or short-term financing closing documents and intercept requests.

Section 4.5. Prohibition of Identified Family Relationships. The Academy Board shall prohibit specifically identified family relationships pursuant to applicable law and the Terms and Conditions of this Contract. Language in this Section controls over section 1203 of the Code. Notwithstanding any other provision of this Contract, the following shall be deemed prohibited familial relationships for the purposes of this Contract:

- (a) No person shall be appointed or reappointed to serve as an Academy Board member if the person's mother, mother-in-law, father, father-in-law, son, son-in-law, daughter, daughter-in-law, sister, sister-in-law, brother, brother-in-law, spouse or same-sex domestic partner:
 - (i) Is employed by the Academy;
 - (ii) Works at or is assigned to the Academy;
 - (iii) Has an ownership, officer, policymaking, managerial, administrative non-clerical, or other significant role with the Academy's Educational Service Provider or employee leasing company;
 - (iv) Has an ownership or financial interest in any school building lease or sublease agreement with the Academy; or
 - (v) Is a current Academy Board member.
- (b) The Academy Board shall require each individual who works at the Academy to annually disclose any familial relationship with any other individual who works at, or provides services to, the Academy. For purposes of this sub-section, familial relationship means a person's mother, mother-in-law, father, father-in-law, son, son-in-law, daughter, daughter-in-law, sister, sister-in-law, brother, brother-in-law, spouse or same-sex domestic partner.

ARTICLE VI OPERATING REQUIREMENTS

Section 6.5. Methods of Pupil Assessment. The Academy shall properly administer the academic assessments identified in Schedule 7e and in accordance with the requirements detailed in the Master Calendar. The Academy shall provide the Center direct access to the results of these assessments, along with any other measures of academic achievement reasonably requested by the Center.

Section 6.16. Matriculation Agreements. Before the Academy Board approves a matriculation agreement with another public school, the Academy shall provide a draft copy of the agreement to the Center for review. Any matriculation agreement entered into by the Academy shall be added to Schedule 7f through a contract amendment approved in accordance with the Contract. Until the matriculation agreement is incorporated into the Contract, the Academy is prohibited from granting an enrollment priority to any student pursuant to that matriculation agreement.

ARTICLE VII
TUITION PROHIBITED

Section 7.1. Tuition Prohibited; Fees and Expenses. The Academy shall not charge tuition. The Academy may impose fees and require payment of expenses for activities of the Academy where such fees and payments are not prohibited by Applicable Law.

ARTICLE VIII
COMPLIANCE WITH APPLICABLE LAWS

Section 8.1. Compliance with Applicable Law. The Academy shall comply with all applicable state and federal laws. Nothing in this Contract shall be deemed to apply any other state or federal law to the Academy.

ARTICLE X
CONTRACT REVOCATION, TERMINATION, AND SUSPENSION

Section 10.1. Statutory Grounds for Revocation. In addition to the other grounds for revocation in Section 10.2 and the automatic revocation in Section 10.3 of these Terms and Conditions, the University Board may revoke this Contract, pursuant to the procedures set forth in Section 10.6, upon a determination that one or more of the following has occurred:

- (a) Failure of the Academy to demonstrate improved pupil academic achievement for all groups of pupils or abide by and meet the educational goal and related measures set forth in this Contract;
- (b) Failure of the Academy to comply with all Applicable Law;
- (c) Failure of the Academy to meet generally accepted public sector accounting principles and to demonstrate sound fiscal stewardship; or
- (d) The existence of one or more other grounds for revocation as specified in this Contract.

Section 10.2. Other Grounds for Revocation. In addition to the statutory grounds for revocation set forth in Section 10.1 and the grounds for an automatic revocation set forth in Section 10.3, the University Board may revoke this Contract, pursuant to the procedures set forth in Section 10.6, upon a determination that one or more of the following has occurred:

- (a) The Academy fails to achieve or demonstrate measurable progress toward achieving the educational goal and related measures identified in this Contract;
- (b) The Academy fails to properly implement, consistently deliver, and support the educational programs or curriculum identified in this Contract;
- (c) The Academy is insolvent, has been adjudged bankrupt, or has operated for two or more school fiscal years with a fund balance deficit;
- (d) The Academy has insufficient enrollment to successfully operate a school of excellence, or the Academy has lost more than fifty percent (50%) of its student enrollment from the previous school year;
- (e) The Academy fails to fulfill the compliance and reporting requirements or defaults in any of the terms, conditions, promises or representations contained in or incorporated into this Contract or, during the term of this Contract, it is discovered by the Center that the Academy failed to fulfill the compliance and reporting requirements or there was a violation of a prior Contract issued by the University Board;
- (f) The Academy files amendments to its Articles of Incorporation with the Michigan Department of Licensing and Regulatory Affairs, Bureau of Commercial Services without first obtaining the Center's approval;
- (g) The Center Director discovers grossly negligent, fraudulent or criminal conduct by the Academy's applicant(s), directors, officers, employees or agents in relation to their performance under this Contract; or

- (h) The Academy's applicant(s), directors, officers, employees or agents have provided false or misleading information or documentation to the Center in connection with the University Board's approval of the Application, the issuance of this Contract, or the Academy's reporting requirements under this Contract or Applicable Law.

Section 10.3. Automatic Amendment Of Contract; Automatic Termination of Contract If All Academy Sites Closed; Economic Hardship Termination. Except as otherwise provided in this Section 10.3, if the University Board is notified by the Department that an Academy site is subject to closure under section 507 of the Code, MCL 380.507 ("State's Automatic Closure Notice"), then this Contract shall automatically be amended to eliminate the Academy's authority to operate certain age and grade levels at the site or sites identified in the State's Automatic Closure Notice. If the State's Automatic Closure Notice includes all of the Academy's existing sites, then this Contract shall automatically be terminated at the end of the current school year in which either the State's Automatic Closure Notice is received without any further action of the University Board or the Academy.

Following receipt of the State's Automatic Closure Notice, the Center Director shall forward a copy of the notice to the Academy Board and request a meeting with the Academy Board representatives to discuss the Academy's plans and procedures for the elimination of certain age or grade levels at the identified site or sites, or if all of the Academy's existing sites are included in that notice, then wind-up and dissolution of the Academy corporation at the end of the current school year. All Academy inquiries and requests for reconsideration of the State's Automatic Closure Notice, including the granting of any hardship exemption by the Department rescinding the State's Automatic Closure Notice ("Pupil Hardship Exemption"), shall be directed to the Department, in a form and manner determined by the Department.

If the Department rescinds the State's Automatic Closure Notice for an Academy site or sites by granting a Pupil Hardship Exemption, the Academy is not required to close the identified site(s), but shall present to the Center a proposed Contract amendment incorporating the Department's school improvement plan, if applicable, for the identified site(s).

If the Department elects not to issue a Pupil Hardship Exemption and the Center Director determines, in his or her discretion, that the closure of one or more sites as directed by the Department creates a significant economic hardship for the Academy as a going concern or the possibility of a mid-year school closure, then the Center Director may recommend to the University Board that the Contract be terminated at the end of the current school year (hereinafter "Economic Hardship Termination"). If the University Board approves the Economic Hardship Termination recommendation, then this Contract shall terminate at the end of the current school year without any further action of the parties.

The University Board's revocation procedures set forth in Section 10.6 do not apply to an automatic termination initiated by the State's Automatic Closure Notice or an Economic Hardship Termination under this Section 10.3.

Section 10.4. Grounds and Procedures for Academy Termination of Contract. The Academy Board, by majority vote of its Directors, may, at any time and for any reason, request termination of this Contract. The Academy Board's request for termination shall be made to the Center Director not less than six (6) calendar months in advance of the Academy's proposed effective date of termination. Upon receipt of an Academy request for termination, the Center Director shall present the Academy Board's request for termination to the University Board. A copy of the Academy Board's resolution approving of the Contract termination, including a summary of the reasons for terminating the Contract, shall be included with the Academy Board's request for termination. Upon receipt of the Academy Board's request for termination,

the University Board shall consider and vote on the proposed termination request. The University Board may, in its sole discretion, waive the six (6) month advance notice requirement for terminating this Contract.

Section 10.5. Grounds and Procedures for University Termination of Contract. The University Board, in its sole discretion, reserves the right to terminate the Contract (i) for any reason or for no reason provided that such termination shall not take place less than six (6) months from the date of the University Board's action; or (ii) if there is a change in Applicable Law that the University Board, in its sole discretion, determines impairs its rights and obligations under the Contract or requires the University Board to make changes in the Contract that are not in the best interest of the University Board or the University, then such termination shall take effect at the end of the current Academy fiscal year. Following University Board approval, the Center Director shall provide notice of the termination to the Academy. If during the period between the University Board action to terminate and the effective date of termination, the Academy has violated the Contract or Applicable Law, the Contract may be revoked or suspended sooner pursuant to this Article X. If this Contract is terminated pursuant to this Section 10.5, the revocation procedures in Section 10.6 shall not apply.

Section 10.6. University Board Procedures for Revoking Contract. Except for the automatic revocation and procedures initiated by the State of Michigan set forth in Section 10.3, the University Board's process for revoking the Contract is as follows:

- (a) Notice of Intent to Revoke. The Center Director, upon reasonable belief that grounds for revocation of the Contract exist, shall notify the Academy Board of such grounds by issuing the Academy Board a Notice of Intent to Revoke for non-compliance with the Contract or Applicable Law. The Notice of Intent to Revoke shall be in writing and shall set forth in sufficient detail the alleged grounds for revocation.
- (b) Academy Board's Response. Within thirty (30) days of receipt of the Notice of Intent to Revoke, the Academy Board shall respond in writing to the alleged grounds for revocation. The Academy Board's response shall be addressed to the Center Director, and shall either admit or deny the allegations of non-compliance. If the Academy's response includes admissions of non-compliance with the Contract or Applicable Law, the Academy Board's response must also contain a description of the Academy Board's plan and time line for correcting the non-compliance with the Contract or Applicable Law. If the Academy's response includes a denial of non-compliance with the Contract or Applicable Law, the Academy's response shall include sufficient documentation or other evidence to support a denial of non-compliance with the Contract or Applicable Law. A response not in compliance with this Section shall be deemed to be non-responsive. As part of its response, the Academy Board may request that a meeting be scheduled with the Center Director prior to a review of the Academy Board's response.
- (c) Plan of Correction. Within fifteen (15) days of receipt of the Academy Board's response or after a meeting with Academy Board representatives, the Center Director shall review the Academy Board's response and determine whether a reasonable plan for correcting the deficiencies can be formulated. If the Center Director determines that a reasonable plan for correcting the deficiencies set forth in the Notice of Intent to Revoke can be formulated, the Center Director shall develop a plan for correcting the non-compliance ("Plan of Correction") which may include Reconstitution pursuant to 10.6(d) of these Terms and Conditions. In developing a Plan of Correction, the Center Director is permitted to adopt, modify or reject some or all of the Academy Board's response for correcting the deficiencies outlined in the Notice of Intent to Revoke. The Notice of Intent to Revoke shall be closed if the Center Director determines any of the following: (i) the Academy Board's denial of non-compliance is persuasive; (ii) the non-compliance set forth in the Notice of

Intent to Revoke has been corrected by the Academy Board; or (iii) the Academy Board has successfully completed the Plan of Correction.

- (d) University Board's Contract Reconstitution Provision. The Center Director may reconstitute the Academy in an effort to improve student educational performance or to avoid interruption of the educational process. Reconstitution may include, but is not limited to, one of the following actions: (i) removal of 1 or more members of the Academy Board; (ii) termination of at-will board appointments of 1 or more Academy Board members in accordance with The Method of Selection, Appointment and Removal Resolution; (iii) withdrawing approval of a contract under Section 506 of the Code; or (iv) the appointment of a new Academy Board of Directors or a Conservator to take over operations of the Academy.

Except as otherwise provided in this subsection, reconstitution of the Academy does not prohibit the Department from issuing an order under section 507 of the Code, MCL 380.507, directing the automatic closure of the Academy's site(s).

- (e) Request for Revocation Hearing. The Center Director may initiate a revocation hearing before the University Charter Schools Hearing Panel if the Center Director determines that any of the following has occurred:

- (i) the Academy Board has failed to respond to the Notice of Intent to Revoke as set forth in Section 10.6(b);
- (ii) the Academy Board's response to the Notice of Intent to Revoke is non-responsive;
- (iii) the Academy Board's response admits violations of the Contract or Applicable Law which the Center Director deems cannot be remedied or cannot be remedied in an appropriate period of time, or for which the Center Director determines that a Plan of Correction cannot be formulated;
- (iv) the Academy Board's response contains denials that are not supported by sufficient documentation or other evidence showing compliance with the Contract or Applicable Law;
- (v) the Academy Board has not complied with part or all of a Plan of Correction established in Section 10.6(c);
- (vi) the Academy Board has engaged in actions that jeopardize the financial or educational integrity of the Academy; or
- (vii) the Academy Board has been issued multiple or repeated Notices of Intent to Revoke.

The Center Director shall send a copy of the request for revocation hearing to the Academy Board at the same time the request is sent to the Hearing Panel. The request for revocation shall identify the reasons for revoking the Contract.

- (f) Hearing before the University Charter Schools Hearing Panel. Within thirty (30) days of receipt of a request for revocation hearing, the Hearing Panel shall convene a revocation hearing. The Hearing Panel shall provide a copy of the notice of hearing to the Center and the Academy Board at least ten (10) days before the hearing. The purpose of the Hearing Panel is to gather facts surrounding the Center Director's request for Contract revocation, and to make a recommendation to the University Board on whether the Contract should be revoked. The revocation hearing shall be held at a location, date and time as determined by the Center Director and shall not last more than three hours. The hearing shall be transcribed and the cost shall be divided equally between the University and the Academy. The Center Director or his or her designee, and the Academy Board or its designee, shall each have equal time to make their presentation to the Hearing Panel. Although each party is permitted to submit affidavits and exhibits in support of their positions, the

Hearing Panel will not hear testimony from any witnesses for either side. The Hearing Panel may, however, question the Center Director and the Academy Board. Within thirty (30) days of the revocation hearing, the Hearing Panel shall make a recommendation to the University Board concerning the revocation of the Contract. For good cause, the Hearing Panel may extend any time deadline set forth in this subsection. A copy of the Hearing Panel's recommendation shall be provided to the Center and the Academy Board at the same time that the recommendation is sent to the University Board.

- (g) University Board Decision. If the Hearing Panel's recommendation is submitted to the University Board at least fourteen (14) days before the University Board's next regular meeting, the University Board shall consider the Hearing Panel's recommendation at its next regular meeting and vote on whether to revoke the Contract. The University Board reserves the right to modify, reject or approve all or any part of the Hearing Panel's recommendation. The University Board shall have available to it copies of the Hearing Panel's recommendation and the transcript from the hearing. The University Board may waive the fourteen (14) day submission requirement or hold a special board meeting to consider the Hearing Panel's recommendation. A copy of the University Board's decision shall be provided to the Center, the Academy Board and the Department.
- (h) Effective Date of Revocation. If the University Board votes to revoke the Contract, the revocation shall be effective on the date of the University Board's act of revocation, or at a later date as determined by the University Board.
- (i) Disposition of State School Aid Funds. Notwithstanding any other provision of the Contract, any state school aid funds received by the University Board after a recommendation is made by the Hearing Panel to revoke the Contract, or a decision by the University Board to revoke the Contract, may be withheld by the University Board or returned to the Michigan Department of Treasury upon request.

Section 10.7. Contract Suspension. The University Board's process for suspending the Contract is as follows:

- (a) The Center Director Action. If the Center Director determines, in his or her sole discretion, that certain conditions or circumstances exist such that the Academy Board:
 - (i) has placed staff or students at risk;
 - (ii) is not properly exercising its fiduciary obligations to protect and preserve the Academy's public funds and property;
 - (iii) has lost its right to occupancy of the physical facilities described in Schedule 6, and cannot find another suitable physical facility for the Academy prior to the expiration or termination of its right to occupy its existing physical facilities;
 - (iv) has failed to secure or has lost the necessary fire, health, and safety approvals as required by Schedule 6;
 - (v) has willfully or intentionally violated this Contract or Applicable Law; or
 - (vi) has violated Section 10.2(g) or (h), then the Center Director may immediately suspend the Contract, pending completion of the procedures set forth in Section 10.6. A copy of the suspension notice, setting forth the grounds for suspension, shall be sent to the Academy Board and to the Hearing Panel. If this subsection is implemented, the notice and hearing procedures set forth in Section 10.6 shall be expedited as much as possible.
- (b) Disposition of State School Aid Funds. Notwithstanding any other provision of the Contract, any state school aid funds received by the University Board after a decision by the Center Director to

suspend the Contract, shall be retained by the University Board for the Academy until the Contract is reinstated, or shall be returned to the Michigan Department of Treasury upon the State's request.

- (c) Immediate Revocation Proceeding. If the Academy Board, after receiving a notice of Contract suspension from the Center Director, continues to engage in conduct or activities that are covered by the suspension notice, the Hearing Panel may immediately convene a revocation hearing in accordance with the procedures set forth in section 10.6(e) of this Contract. The Hearing Panel has the authority to accelerate the time line for revoking the Contract, provided that notice of the revocation hearing shall be provided to the Center and the Academy Board at least five (5) days before the hearing. If the Hearing Panel determines that the Academy Board has continued to engage in conduct or activities that are covered by the suspension notice, the Hearing Panel may recommend revocation of the Contract. The University Board shall proceed to consider the Hearing Panel's recommendation in accordance with sections 10.6(f) through (h).

Section 10.8. Conservator; Appointment By University President. Notwithstanding any other provision of the Contract, in the event that the University President, in his or her sole discretion, determines that the health, safety and welfare of Academy students, property or funds are at risk, the University President, after consulting with the University Board Chairperson, may appoint a person to serve as the Conservator of the Academy. Upon appointment, the Conservator shall have all the powers and authority of the Academy Board under this Contract and Applicable Law and shall act in the place and stead of the Academy Board. The University President shall appoint the Conservator for a definite term which may be extended in writing at his or her sole discretion. During the appointment, the Academy Board members and their terms in office are suspended and all powers of the Academy Board are suspended. All appointments made under this provision must be presented to the University Board for final determination at its next regularly scheduled meeting. During their appointment, the Conservator shall have the following powers:

- (a) take into his or her possession all Academy property and records, including financial, board, employment and student records;
- (b) institute and defend actions by or on behalf of the Academy;
- (c) continue the business of the Academy including entering into contracts, borrowing money, and pledging, mortgaging, or otherwise encumbering the property of the Academy as security for the repayment of loans. However, the power shall be subject to any provisions and restrictions in any existing credit documents;
- (d) hire, fire and discipline employees of the Academy;
- (e) settle or compromise with any debtor or creditor of the Academy, including any taxing authority;
- (f) review all outstanding agreements to which the Academy is a party and to take those actions which the Academy Board may have exercised to pay, extend, rescind, renegotiate or settle such agreements as needed; and
- (g) perform all acts necessary and appropriate to fulfill the Academy's purposes as set forth under this Contract or Applicable Law.

Section 10.9. Academy Dissolution Account. If the University Board terminates, revokes or fails to issue a new Contract to the Academy, the Center Director shall notify the Academy that, beginning thirty (30) days after notification of the University Board's decision, the University Board may direct up to \$10,000 from each subsequent State School Aid Fund payment, not to exceed a combined total of \$30,000,

to a separate Academy account (“Academy Dissolution Account”) to be used exclusively to pay the costs associated with the wind-up and dissolution responsibilities of the Academy. Within five (5) business days of the Center Director’s notice, the Academy Board Treasurer shall provide the Center Director, in a form and manner determined by the Center, with account detail information and authorization to direct such funds to the Academy Dissolution Account. The Academy Dissolution Account shall be under the sole care, custody and control of the Academy Board, and such funds shall not be used by the Academy to pay any other Academy debt or obligation until such time as all the wind-up and dissolution expenses have been satisfied.

ARTICLE XI
PROVISIONS RELATING TO PUBLIC SCHOOL ACADEMIES

Section 11.1. The Academy Budget; Transmittal of Budgetary Assumptions; Budget Deficit; Enhanced Deficit Elimination Plan. The Academy agrees to comply with all of the following:

- (a) The Academy Board is responsible for establishing, approving, and amending an annual budget in accordance with the Uniform Budgeting and Accounting Act, MCL 141.421, et seq. The Academy Board shall submit to the Center a copy of its annual budget for the upcoming fiscal year in accordance with the Master Calendar. The budget must detail budgeted expenditures at the object level as described in the Department's Michigan School Accounting Manual. In addition, the Academy Board is responsible for approving all revisions and amendments to the annual budget. In accordance with the Master Calendar, revisions or amendments to the Academy's budget shall be submitted to the Center following Academy Board approval.
- (b) Unless exempted from transmitting under section 1219 of the Code, MCL 380.1219, the Academy, on or before July 7th of each school fiscal year, shall transmit to the Center for Educational Performance and Information ("CEPI") the budgetary assumptions used when adopting its annual budget pursuant to the Uniform Budgeting and Accounting Act, MCL 141.421 et seq.
- (c) The Academy shall not adopt or operate under a deficit budget, or incur an operating deficit in a fund during any fiscal year. At any time during the term of this Contract, the Academy shall not have an existing deficit fund balance, incur a deficit fund balance, or adopts a current year budget that projects a deficit fund balance. If the Academy has an existing deficit fund balance, incurs a deficit fund balance in the most recently completed school fiscal year, or adopts a current year budget that projects a deficit fund balance, all of the following apply:
 - i. The Academy shall notify the Superintendent and the State Treasurer immediately upon the occurrence of the circumstance, and provide a copy of the notice to the Center.
 - ii. Within 30 days after making notification under subdivision (i), the Academy shall submit to the Superintendent in the form and manner prescribed by the Department an amended budget for the current school fiscal year and a deficit elimination plan approved by the Academy Board, with a copy to the State Treasurer. The Academy shall transmit a copy of the amended budget and the deficit elimination plan to the Center.
 - iii. After the Superintendent approves Academy's deficit elimination plan, the Academy shall post the deficit elimination plan on the Academy's website.
- (d) If the Academy is required by the State Treasurer to submit an enhanced deficit elimination plan under section 1220 of the Code, MCL 380.1220, the Academy shall do all of the following:
 - i. The enhanced deficit elimination plan shall be approved by the Academy Board before submission.
 - ii. After the State Treasurer approves an enhanced deficit elimination plan for the Academy, the Academy shall post the enhanced deficit elimination plan on the Academy's website.
 - iii. As required, submit to the Superintendent and State Treasurer an enhanced monthly monitoring reports in a form and manner prescribed by the State Treasurer and post such monthly reports on the Academy's website.

Section 11.2. Insurance. The Academy Board shall secure and maintain in its own name, as the "first named insured," insurance coverage as required by the University's insurance carrier.

The insurance must be obtained from a licensed mutual, stock, or other responsible company licensed to do business in the State of Michigan. The Academy may join with other public school academies to obtain insurance if the Academy Board finds that such an association provides economic advantages to the Academy, provided that each Academy maintains its identity as first named insured. The Academy shall list the University on the insurance policies as an additional insured as required by the University's insurance carrier. The coverage provided to the University as an additional covered person or organization will be primary and non-contributory with the University's insurance carrier. The Academy shall have a provision included in all policies requiring notice to the University, at least thirty (30) days in advance, upon termination or non-renewal of the policy for any reason other than nonpayment which would require a ten (10) day advance notice to the University. In addition, the Academy shall provide the Center copies of all insurance policies required by this Contract.

When changing insurance programs or carriers, the Academy must provide copies of the proposed policies to the Center at least thirty (30) days prior to the proposed change. The Academy shall not cancel or change its existing carrier without the prior review of the Center.

The University's insurance carrier periodically reviews the types and amounts of insurance coverage that the Academy must secure in order for the University to maintain insurance coverage for the authorization and oversight of the Academy. In the event that the University's insurance carrier requests additional changes in coverage identified in this Section 11.2, the Academy agrees to comply with any additional changes in the types and amounts of coverage requested by the University's insurance carrier within thirty (30) days after notice of the insurance coverage change.

The Academy may expend funds for payment of the cost of participation in an accident or medical insurance program to insure protection for pupils while attending school or participating in a school program or activity. Other insurance policies and higher minimums may be required depending upon academic offerings and program requirements.

Pursuant to Section 3.6 of these Terms and Conditions, the University requires that any Educational Service Provider or employee leasing company that enters into a contract with the Academy must obtain insurance coverage similar to the insurance coverage that is currently required for the Academy. Accordingly, any agreement between the Academy and an Educational Service Provider or employee leasing company shall contain a provision requiring the Educational Service Provider or employee leasing company to comply with the coverage requirements recommended by the University's insurance carrier. Furthermore, the agreement between the Educational Service Provider or employee leasing company and the Academy shall contain a provision stating that "in the event that the University's insurance carrier recommends any change in coverage by the Educational Service Provider or employee leasing company, the Educational Service Provider or employee leasing company agrees to comply with any changes in the type and amount of coverage as requested by the University or the University's insurance carrier within thirty (30) days after notice of the insurance coverage change."

Section 11.3. Legal Liabilities and Covenant Against Suit. The Academy acknowledges and agrees that it has no authority to extend the faith and credit of the University or to enter into a contract that would bind the University. The Academy also is limited in its authority to contract by the amount of funds obtained from the state school aid fund, as provided hereunder, or from other independent sources. The Academy hereby covenants not to sue the University Board, the University or any of its Trustees, officers, employees, agents or representatives for any matters that arise under this Contract. The University does not assume any obligation with respect to any director, employee, agent, parent, guardian, student, or independent contractor of the Academy, and no such person shall have the right or standing to bring suit against the University Board, the University or any of its Trustees, employees, agents, or independent

contractors as a result of the issuance, non-issuance, oversight, revocation, termination or suspension of this Contract.

Section 11.4. Lease or Deed for Proposed Site. The Academy shall provide to the Center copies of its proposed lease or deed for the premises in which the Academy shall operate. Following the Center's review, a copy of the Academy's lease or deed shall be incorporated into this Contract under Schedule 6 and in accordance with Article IX, as applicable.

Section 11.5. Certificate(s) of Use and Occupancy. The Academy Board shall: (i) ensure that the Academy's physical facilities comply with all fire, health and safety standards applicable to schools; and (ii) possess the necessary occupancy certificates for the Academy's physical facilities. The Academy Board shall not occupy or use any facility until approved for occupancy by the Michigan Department of Licensing and Regulatory Affairs, Bureau of Construction Codes. Copies of these Certificate(s) of Use and Occupancy shall be incorporated into this Contract under Schedule 6 and in accordance with Article IX, as applicable.

Section 11.6. New Building Construction or Renovations. The Academy shall not commence construction on a new school building or the major renovation of an existing school building unless the Academy consults on the plans of the construction or major renovation regarding school safety issues with the law enforcement agency that is or will be the first responder for that school building. School building includes either a building intended to be used to provide pupil instruction or a recreational or athletic structure or field used by pupils.

Section 11.7. Criminal Background and History Checks; Disclosure of Unprofessional Conduct. The Academy shall comply with section 1230 and 1230a of the Code concerning criminal background and criminal history checks for its teachers, school administrator(s), and for any other position requiring State Board approval. In addition, the Academy shall comply with section 1230b of the Code concerning the disclosure of unprofessional conduct by persons applying for Academy employment. This Section 11.7 shall apply to such persons irrespective of whether they are employed by the Academy or employed by another entity contracting with the Academy.

Section 11.8. Special Education. Pursuant to Section 1701a of the Code, the Academy shall comply with Article III, Part 29 of the Code, MCL 380.1701 et seq., concerning the provision of special education programs and services at the Academy as referenced in Contract Schedule 7c. Upon receipt, the Academy shall notify the Center of any due process or state complaint filed against the Academy or notice of state audit.

Section 11.9. Information Available to the Public and the Center.

- (a) Information to be provided by the Academy. In accordance with Applicable Law, the Academy shall make information concerning its operation and management, including without limitation information in Schedule 8, available to the public and the Center.
- (b) Information to be provided by Educational Service Provider. The agreement between the Academy and the Educational Service Provider shall contain a provision requiring the Educational Service Provider to make information concerning the operation and management of the Academy, including the information in Schedule 8, available to the Academy as deemed necessary by the Academy Board in order to enable the Academy to fully satisfy its obligations under paragraph 11.9 (a) above.

Section 11.10. Deposit of Public Funds by the Academy. The Academy Board agrees to comply with Section 1221 of the Revised School Code, being MCL 380.1221, regarding the deposit of all public

or private funds received by the Academy. Such deposit shall be made within three (3) days after receipt of the funds by the Academy. Only Academy Board members or designated Academy Board employees may be a signatory on any Academy bank account.

ARTICLE XII GENERAL TERMS

Section 12.1. Notices. Any and all notices permitted or required to be given hereunder shall be deemed duly given: (i) upon actual delivery, if delivery is by hand; or (ii) upon receipt by the transmitting party of confirmation or answer back if delivery is by facsimile or electronic mail; or (iii) upon delivery into United States mail if delivery is by postage paid first class mail. Each such notice shall be sent to the respective party at the address indicated below or to any other address or person as the respective party may designate by notice delivered pursuant hereto:

If to the University Board:	The Governor John Engler Center for Charter Schools Attn: Executive Director Central Michigan University EHS 200 Mt. Pleasant, MI 48859
General Counsel:	General Counsel Central Michigan University Mt. Pleasant, MI 48859
Chief Financial Officer:	Vice President Finance & Admin. Services Central Michigan University Mt. Pleasant, MI 48859
If to the Academy:	Academy Board President South Arbor Charter Academy 8200 Carpenter Road Ypsilanti, MI 48197

Section 12.2. Severability. If any provision in this Contract is held to be invalid or unenforceable, it shall be ineffective only to the extent of the invalidity, without affecting or impairing the validity and enforceability of the remainder of the provision or the remaining provisions of this Contract. If any provision of this Contract shall be or become in violation of any local, state or federal law, such provision shall be considered null and void, and all other provisions shall remain in full force and effect.

Section 12.3. Successors and Assigns. The terms and provisions of this Contract are binding on and shall inure to the benefit of the parties and their respective successors and permitted assigns.

Section 12.4. Entire Contract. Except as specifically provided in this Contract, this Contract sets forth the entire agreement between the University Board and the Academy with respect to the subject matter of this Contract. All prior contracts, representations, statements, negotiations, understandings, and undertakings are superseded by this Contract.

Section 12.5. Assignment. This Contract is not assignable by the Academy.

Section 12.6. Non-Waiver. Except as provided herein, no term or provision of this Contract shall be deemed waived and no breach or default shall be deemed excused, unless such waiver or consent shall be in writing and signed by the party claimed to have waived or consented. No consent by any party to, or waiver of, a breach or default by the other, whether expressed or implied, shall constitute consent to, waiver of, or excuse for any different or subsequent breach or default.

Section 12.7. Governing Law. This Contract shall be governed and controlled by the laws of the State of Michigan as to interpretation, enforcement, validity, construction, and effect, and in all other respects.

Section 12.8. Counterparts. This Contract may be executed in any number of counterparts. Each counterpart so executed shall be deemed an original, but all such counterparts shall together constitute one and the same instrument.

Section 12.9. Term of Contract. This Contract is for a fixed term and shall terminate at the end of the Contract term without any further action of either the University Board or the Academy. This Contract shall commence on the date first set forth above and shall remain in full force and effect for a period of ten (10) academic years and shall terminate on June 30, 2026, unless sooner revoked, terminated, or suspended pursuant to Article X of these Terms and Conditions. Pursuant to University Board policy, the standards by which the Academy may be considered for the issuance of a new contract will be guided by the following core questions:

Is the Academy's academic program successful?

Is the Academy's organization viable?

Is the Academy demonstrating good faith in following the terms of its charter and applicable law?

The Center shall establish the process and timeline for the issuance of a new contract. The standards for the issuance of a new contract shall include increases in academic achievement for all groups of pupils as measured by assessments and other objective criteria established by the University Board as the most important factor of whether to issue or not issue a new contract. Consistent with the Code, the University Board in its sole discretion may elect to issue or not issue a new contract to the Academy.

Section 12.10. Indemnification of University. As a condition to receiving a grant of authority from the University Board to operate a public school pursuant to the Terms and Conditions of this Contract, the Academy agrees to indemnify, defend and hold harmless the University Board, the University and its officers, employees, agents or representatives from and against all demands, claims, actions, suits, causes of action, losses, judgments, liabilities, damages, fines, penalties, forfeitures, or any other liabilities or losses of any kind whatsoever, including costs and expenses (not limited to reasonable attorney fees, expert and other professional fees) settlement and prosecution imposed upon or incurred by the University, and not caused by the sole negligence of the University, which arise out of or are in any manner connected with the University Board's approval of the school of excellence application, the University Board's consideration of or issuance of a Contract, the Academy's preparation for or operation of a public school, or which are incurred as a result of the reliance by the University Board, the University and its officers, employees, agents or representatives upon information supplied by the Academy, or which arise out of the Academy's failure to comply with this Contract or Applicable Law. The foregoing provision shall not be deemed a relinquishment or waiver of any kind of Section 7 of the Governmental Liability for Negligence Act, being Act No. 170, Public Acts of Michigan, 1964.

Section 12.11. Construction. This Contract shall be construed fairly as to both parties and not in favor of or against either party, regardless of which party prepared the Contract.

Section 12.12. Force Majeure. If any circumstances occur which are beyond the control of the parties, which delay or render impossible the obligations of one or both of the parties, the parties' obligations to perform such services shall be postponed for an equivalent period of time or shall be canceled, if such performance has been rendered impossible by such circumstances.

Section 12.13. No Third Party Rights. This Contract is made for the sole benefit of the Academy and the University Board. Except as otherwise expressly provided, nothing in this Contract shall create or be deemed to create a relationship between the parties hereto, or either of them, and any third person, including a relationship in the nature of a third party beneficiary or fiduciary.

Section 12.14. Non-agency. It is understood that the Academy is not the agent of the University.

Section 12.15. University Board or the Center's General Policies on Public School Academies Shall Apply. Notwithstanding any provision of this Contract to the contrary, and with the exception of existing University Board or the Center policies regarding public school academies which shall apply immediately, University Board or the Center general policies clarifying procedure and requirements applicable to public school academies under this Contract, as from time to time adopted or amended, will automatically apply to the Academy, provided they are not inconsistent with provisions of this Contract. Before issuing general policies under this section, the University Board or the Center shall provide a draft of the proposed policies to the Academy Board. The Academy Board shall have at least thirty (30) days to provide comment to the Center on the proposed policies before such policies shall become effective.

Section 12.16. Survival of Provisions. The terms, provisions, and representations contained in Section 11.2, Section 11.3, Section 11.9, Section 12.10, Section 12.13 and any other provisions of this Contract that by their sense and context are intended to survive termination of this Contract shall survive.

Section 12.17. Termination of Responsibilities. Upon termination or revocation of the Contract, the University Board or its designee shall have no further obligations or responsibilities under this Contract to the Academy or any other person or persons in connection with this Contract. Upon termination or revocation of the Contract, the Academy may amend its articles of incorporation or bylaws as necessary to allow the Academy Board to: (a) take action to appoint Academy Board members in order to have a quorum necessary to take Academy Board action; or (b) effectuate a dissolution, provided that the Academy Board may not amend the articles of incorporation with regard to the disposition of assets upon dissolution.

Section 12.18. Disposition of Academy Assets Upon Termination or Revocation of Contract. Following termination or revocation of the Contract, the Academy shall follow the applicable wind-up and dissolution provisions set forth in the Academy's articles of incorporation and in accordance with the Code.

Section 12.19. Student Privacy. In order to protect the privacy of students enrolled at the Academy, the Academy Board shall not:

- (a) sell or otherwise provide to a for-profit business entity any personally identifiable information that is part of a pupil's education records. This subsection does not apply to any of the following situations:
 - i. for students enrolled in the Academy, providing such information to an ESP that has a contract with the Academy and whose contract has not been disapproved by the University;
 - ii. providing the information as necessary for standardized testing that measures a student's academic progress and achievement; or
 - iii. providing the information as necessary to a person that is providing educational or educational support services to the student under a contract with either the Academy or an educational management organization that has a contract with the Academy and whose contract has not been disapproved by the University.
- (b) The terms "education records" and "personally identifiable information" shall have the same meaning as defined in MCL 380.1136.

Section 12.20. Disclosure of Information to Parents and Legal Guardians.

- (a) Within thirty (30) days after receiving a written request from a student's parent or legal guardian, the Academy shall disclose without charge to the student's parent or legal guardian any personally identifiable information concerning the student that is collected or created by the Academy as part of the student's education records.
- (b) Except as otherwise provided in this subsection (b) and within thirty (30) days after receiving a written request from a student's parent or legal guardian, the Academy shall disclose to a student's parent or legal guardian without charge any personally identifiable information provided to any person, agency or organization. The Academy's disclosure shall include the specific information that was disclosed, the name and contact information of each person, agency, or organization to which the information has been disclosed; and the legitimate reason that the person, agency, or organization had in obtaining the information. The parental disclosure requirement does not apply to information that is provided:
 - i. to the Department or CEPI;
 - ii. to the student's parent or legal guardian;
 - iii. by the Academy to the University Board, University, Center or to the ESP with which the Academy has a Management Agreement that has not been disapproved by the Center Director;
 - iv. by the Academy to the Academy's intermediate school district or another intermediate school district providing services to Academy or the Academy's students pursuant to a written agreement;
 - v. to the Academy by the Academy's intermediate school district or another immediate school district providing services to pupils enrolled in the Academy pursuant to a written agreement;
 - vi. to the Academy by the University Board, University, Center;
 - vii. to a person, agency, or organization with written consent from the student's parent or legal guardian, or from the student if the student is 18 years of age;
 - viii. to a person, agency, or organization seeking or receiving records in accordance with an order, subpoena, or ex parte order issued by a court of competent jurisdiction;
 - ix. to a person, agency, or organization as necessary for standardized testing that measures a student's academic progress and achievement; or
 - x. in the absence of, or in compliance with, a properly executed opt-out form, as adopted by the Academy in compliance with section 1136(6) of the Code, pertaining to uses for which the Academy commonly would disclose a pupil's "directory information."
- (c) If the Academy considers it necessary to make redacted copies of all or part of a student's education records in order to protect personally identifiable information of another student, the Academy shall not charge the parent or legal guardian for the cost of those redacted copies.
- (d) The terms "education records," "personally identifiable information," and "directory information" shall have the same meaning as defined in MCL 380.1136.

Section 12.21. List of Uses for Student Directory Information; Opt Out Form; Notice to Student's Parent or Legal Guardian.

- (a) The Academy shall do all of the following:
 - i. Develop a list of uses (the "Uses") for which the Academy commonly would disclose a

- student's directory information.
- ii. Develop an opt-out form that lists all of the Uses and allows a student's parent or guardian to elect not to have the student's directory information disclosed for one (1) or more Uses.
 - iii. Present the opt-out form to each student's parents or guardian within the first thirty (30) days of the school year and at other times upon request.
 - iv. If an opt-out form is signed and submitted to the Academy by a student's parent or guardian, then the Academy shall not include the student's directory information in any of the Uses that have been opted out of in the opt-out form.

(b) The terms "directory information" shall have the same meaning as defined in MCL 380.1136.

Section 12.22. Partnership Agreement. If the Department and State Reform Office impose a partnership agreement on the Academy, the Academy shall work collaboratively with the Department, the State Reform Office and other partners to implement the partnership agreement. In the event that a provision in the partnership agreement is inconsistent with a provision in this Contract, this Contract shall control.

South Arbor Charter Academy

Contract Amendment No. 5

Tab 2

EDUCATIONAL GOAL AND RELATED MEASURES

Pursuant to Applicable Law and the Terms and Conditions of this Contract, including Article VI, Section 6.2, the Academy shall achieve or demonstrate measurable progress for all groups of pupils toward the achievement of the educational goal identified in this schedule. Although an increase in academic achievement for all groups of pupils as measured by assessments and other objective criteria is the most important factor in determining the Academy's progress toward the achievement of the educational goal, the Center also considers other factors. Upon request, the Academy shall provide the Center with a written report, along with supporting data, assessing the Academy's progress toward achieving this goal. In addition, the University expects the Academy will meet the State of Michigan's accreditation standards pursuant to state and federal law.

Educational Goal to be Achieved

Prepare students academically for success in college, work and life.

Measures to Assist In Determining Measurable Progress Toward Goal Achievement

To assist in determining whether the Academy is achieving measurable progress toward the achievement of this goal, the Center will annually assess the Academy's performance using the following measures.

Measure 1: Student Achievement

The academic achievement of **all students who have been at the academy for one or more years¹** in grades 3-8 will be assessed using the following measures and targets:

Sub Indicator	Measure	Metric	Target
Against a Standard:	The percentage of students meeting or surpassing grade-level national norms on the NWEA MAP reading and math tests administered in the spring.	Distribution (which will be in the form of percentages): Exceeds $\geq 70.0\%$ Meets $\geq 50.0\%$ Approaching $\geq 30.0\%$ Does not meet $< 30.0\%$	50%
In the event that performance against the standard falls below these required expectations, "measurable progress towards the achievement of this goal" will be defined using the following measures and targets:			
Over Time:	The percentage of students meeting or surpassing grade-level national norms over time (CY-AVG(PY1+PY2+PY3)).	Trend score (which will be in the form of $-x$ to $+x$): Exceeds $\geq 6.0\%$ Meets $\geq 3.0\%$ Approaching $\geq 1.0\%$ Does not meet $< 1.0\%$	3.0%
Comparison Measure:	The percentage of students categorized as proficient or advanced on the most recent state assessment will surpass the school's Composite Resident District (CRD) percentage.	Portfolio Distribution (which will be in the form of $-x$ to $+x$): Exceeds $\geq 10.0\%$ Meets $\geq 5.0\%$ Approaching $\geq 0.0\%$ Does not meet $< 0.0\%$	5.0%

¹ One or more years students (also called 1+ students) are students who are enrolled in the academy on or before count day and are still enrolled at the end of a given academic year.

Grade	MAP National Norms	
	Reading	Math
3	198.6	203.4
4	205.9	213.5
5	211.8	221.4
6	215.8	225.3
7	218.2	228.6
8	220.1	230.9

Measure 2: Student Growth

The academic growth of all students in grades 3-8 at the Academy will be assessed using the following measures and targets:

Sub Indicator	Measure	Metric	Target
Against a Standard:	The median of student growth percentiles (MGP) reflecting fall-to-spring scaled score growth on the reading and math NWEA MAP tests.	MGP: Exceeds ≥ 65 th Meets ≥ 50 th Approaching ≥ 45 th Does not meet < 45 th	Reading: 50 Math: 50
In the event that performance against the standard falls below these required expectations, “measurable progress towards the achievement of this goal” will be defined using the following measures and targets:			
Over Time:	The percentage of students making at least one year’s growth over time (CY-AVG(PY1+PY2+PY3)).	Trend score (which will be in the form of $-x$ to $+x$): Exceeds $\geq 6.0\%$ Meets $\geq 3.0\%$ Approaching $\geq 1.0\%$ Does not meet $< 1.0\%$	3.0%
Comparison Measure:	The MGP reflecting growth on the two most recent state assessments will surpass the school’s Composite Resident District.	Portfolio Distribution (which will be in the form of $-x$ to $+x$): Exceeds $\geq 10.0\%$ Meets $\geq 5.0\%$ Approaching $\geq 0.0\%$ Does not meet $< 0.0\%$	5.0%

Re: Approval of Continuity of Learning and COVID-19 Response Plan ("Plan")

Dear Ms. Bondy:

I am pleased to inform you that the Plan for South Arbor Charter Academy ("Academy") has been approved by The Governor John Engler Center for Charter Schools at Central Michigan University and will be transmitted by our office to the State Superintendent of Public Instruction and the State Treasurer. The Plan is effective as of the date indicated in the Plan. You may proceed with Plan implementation for the remainder of the 2019-2020 school year and, if applicable, other elements that affect the 2020-2021 school year.

Please also proceed with the following next steps:

- To fulfill one of the required assurances, immediately add a copy of the approved Plan, assurances document, and budget outline to the Academy's website. An approved copy of the Plan is attached and can be found in Epicenter.
- Present the Plan to the Academy's Board of Directors ("Academy Board") at its next scheduled meeting. At that meeting the Academy Board should approve any necessary amendments to the Academy's 2019-2020 budget or other relevant agreements needed to implement the Plan. In accordance with the Terms and Conditions of the Academy's charter contract ("Contract"), the approved Plan shall constitute a Contract amendment to the Contract upon approval by the Academy Board. This Contract amendment will remain in effect as long as the Plan remains in effect. Attached please find a draft resolution for the Academy Board to use in approving the Plan and Contract amendment.

If the Academy requires an amendment to the Plan, please contact Amy Densmore, Director of Charter Accountability, at (989) 506-0355 or via email at avanatten@thecenterforcharters.org to initiate that process.

Thank you for all your efforts to keep student learning moving forward in these trying times. If you have any further questions or need additional support, please do not hesitate to contact us.

Sincerely,

A handwritten signature in black ink that reads "Corey Northrop". The signature is fluid and cursive, with the first name "Corey" and last name "Northrop" clearly legible.

Academy Board Resolution

**RESOLUTION APPROVING THE CONTINUITY OF LEARNING AND COVID-19
RESPONSE PLAN (“PLAN”), BUDGET AMENDMENT RELATED TO PLAN AND
OTHER AGREEMENTS REFERENCED IN PLAN, AND APPROVAL OF CHARTER
CONTRACT AMENDMENT**

SOUTH ARBOR CHARTER ACADEMY (the “Academy”)

A regular meeting of the Academy Board of Directors was held on the 13th day of May, 2020, at 8:30 a.m.

The meeting was called to order at 8:38 a.m. p.m.] by Board Member Marcella Haghgoie :

Present: Marcella Haghgoie, Stacy Peterson, Sarah Camp, JaVonda Palmer, John Morrison

Absent: N/A

The following preamble and resolution were offered by Board Member Sarah Camp and supported by Board Member JaVonda Palmer :

BACKGROUND

On April 2, 2020, in response to the novel coronavirus (COVID-19) pandemic affecting our state, Governor Gretchen Whitmer issued Executive Order 2020-35 (the “Order”) that, except as provided in section III of the Order, suspends in-person instruction for pupils in kindergarten through grade 12 (“K-12”) for the remainder of the 2019-2020 school year and requires that school buildings used for the provision of K-12 education remain closed for the purpose of providing K-12 education in person for the remainder of the 2019-2020 school year, unless restrictions on public gatherings and use of school buildings are lifted before the end of the 2019-2020 school year.

In order to receive continued state school aid funding for the remainder of the 2019-2020 school year, the Order suspends certain state law provisions that, as reflected in the Order, are associated with in-person instruction, requires that public school academies continue to provide alternative modes of instructions for all pupils, as reflected in a Plan, for the remainder of the 2019-2020 school year, and requires that each public school academy submit their Plan to their authorizing body for approval.

On April 24, 2020, the Academy submitted its Plan to South Arbor Charter Academy (“Authorizer”) for approval.

On April 24, 2020, Authorizer approved the Academy’s Plan as reflected in the attached letter (“Authorizer Approval Letter”). As set forth in the Authorizer Approval Letter, the Academy Board of Directors (“Academy Board”) is required to approve the Academy’s Plan and approve the Academy’s Plan as a charter contract (“Contract”) amendment at its next scheduled board meeting.

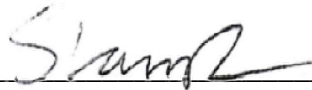

THE ACADEMY BOARD THEREFORE RESOLVES THAT:

1. The actions taken by Academy representatives to prepare and submit the Academy's Plan to Authorizer are ratified.
2. The Academy's Plan approved by Authorizer is approved.
3. The Plan is approved by the Academy Board as the COVID-19 Learning Plan Amendment to the Contract. This Contract amendment shall remain in effect as long as the Plan remains in effect.
4. All resolutions and parts of resolutions insofar as they conflict with the provisions of this resolution be and the same hereby are rescinded.
5. The Academy will deliver from time to time such information regarding the implementation of the Academy's Plan as the Authorizer or Michigan Department of Education may reasonably request.
6. Any Board policies or provision of Board policies that prohibit or impede the Academy's compliance with the Plan or Executive Order 2020-35 are temporarily waived, suspended or altered.
7. Any actions or actions taken by authorized Academy representatives in the development, submission and implementation of the Plan are (to the extent such actions or actions are not inconsistent with the delegation of authority provided under this resolution) ratified and confirmed in all respects.
8. This Resolution shall take immediate effect and continue through the end of the state of emergency and disaster declared in Executive Order 2020-33 or any other state of emergency or disaster declared in response to COVID-19 during the remainder of the 2019-2020 school year.

Contract Amendment No. 7

Tab 1

FIRST AMENDMENT TO LEASE AGREEMENT

THIS LEASE AMENDMENT, dated March 11, 2020, is entered into by and between NATIONAL HERITAGE ACADEMIES, INC., a Michigan corporation ("**Landlord**"), and SOUTH ARBOR CHARTER ACADEMY, a school of excellence chartered under the laws of the State of Michigan ("**Tenant**"), to be effective July 1, 2016.

RECITALS

A. Landlord and Tenant entered into a real estate lease dated July 1, 2016, (the "**Lease**") whereby Tenant leased real estate and improvements from Landlord.

B. A scrivener's error defining annual rent was discovered in the Lease after execution thereof and the parties thereto desire to correct such error.

C. NOW, THEREFORE the Tenant and Landlord now desire to amend the Lease upon the following terms and conditions.

The parties agree as follows:

1. **Rental.** Paragraph 3.1 of the Lease is hereby deleted in its entirety and wholly replaced as follows:

3.1 **Annual Rent.** Tenant hereby leases said Premises for the Term above stated and agrees to pay Landlord annual rent of One Million Sixty-One Thousand Four Hundred Forty and No/100 Dollars (\$1,061,440.00), ("**Annual Rent**") in twelve (12) equal monthly installments of Eighty-Eight Thousand Four Hundred Fifty-Three and 33/100 Dollars (\$88,453.33) (each, a "**Monthly Installment**") each payable to Landlord (or to such other "Person" (defined in Section 22.9) or agent as Landlord may specify by written notice to Tenant) in advance on the first day of each calendar month during the Term. The term "**Lease Year**" is defined to mean any twelve month period from July 1 to June 30 of the following year, during the Term. If the Term ends before the end of a Lease Year, Annual Rent shall be prorated on a daily basis and paid in advance by Tenant on the first day of the last calendar month during the Term. Annual Rent may be adjusted upon determination of final costs for acquisition and construction of the Premises.

2. **Survival.** Except as expressly set forth above, all of the remaining terms and conditions of the Lease shall continue in full force and effect.

CONTRACT AMENDMENT NO. 8

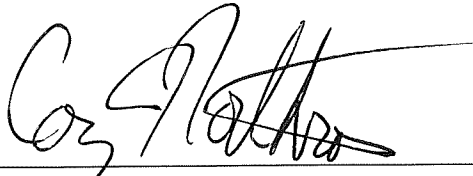

SOUTH ARBOR CHARTER ACADEMY

In accordance with Article IX of the Terms and Conditions of the Contract (the “Contract”), dated July 1, 2016, issued by the CENTRAL MICHIGAN UNIVERSITY BOARD OF TRUSTEES (the “University Board”) to SOUTH ARBOR CHARTER ACADEMY (the “Academy”), as amended, the parties agree to further amend the Contract as follows:

- 1.) Amend the Terms and Conditions of Contract by replacing the language contained within Article III, Section 3.6. Authorization to Employ or Contract; Article IV, Section 4.1. Limitations on Actions in Performance of Governmental Functions, Section 4.3. Academy Board Members Serve In Their Individual Capacity, Section 4.4. Incompatible Public Offices and Conflicts of Interest Statutes, and Section 4.5. Prohibition of Identified Family Relationships; Article VI, Section 6.11. Annual Financial Statement Audit and Section 6.16. Matriculation Agreements; Article X, Section 10.6(i). Disposition of State School Aid Funds, Section 10.8. Conservator; Appointment By University President, and Section 10.9. Academy Dissolution Account, with the corresponding language attached as Tab 1.
- 2.) Further amend the Terms and Conditions of Contract by inserting at the end of Article IV: Requirement That the Academy Act Solely as Governmental Entity and Article XI: Provisions Relating to Schools of Excellence, the corresponding language attached as Tab 2.
- 3.) Amend Schedule 2: Amended Bylaws, by replacing the language contained within Article VIII, Section 6. Contracts Between Corporation and Related Persons, with the language attached as Tab 3.
- 4.) Amend Schedule 3: Fiscal Agent Agreement, by replacing the language contained within Article II, Section 2.04. Academy Board Requests for Direct Intercept of State School Aid Payments, Article III: State Duties, and Article IV, Section 4.05. Repayment of Overpayment, with the corresponding language attached as Tab 4.
- 5.) Amend Schedule 4: Oversight, Compliance and Reporting Agreement, by replacing the language contained within Article II, Section 2.1(n) with the following:

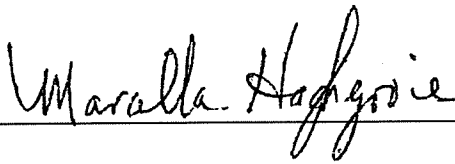

“Initiate action pursuant to the Terms and Conditions of Contract to amend, revoke, reconstitute, terminate or suspend the Contract.”
- 6.) Further amend Schedule 4: Oversight, Compliance and Reporting Agreement, by inserting at the end of Article IV: Miscellaneous, the language attached as Tab 5.
- 7.) Amend Schedule 7, Section f: Application and Enrollment of Students, by replacing the Matriculation Agreement section contained therein with the materials attached as Tab 6.

This entire amendment is hereby approved by the University Board and the Academy Board through their authorized designees, and shall have an effective date of July 1, 2020.

South Arbor Charter Academy

Contract Amendment No. 8

Tab 1

Section 3.6. Authorization to Employ or Contract. The University Board authorizes the Academy Board to employ or contract for personnel according to the position information outlined in Schedule 5. The Academy Board shall prohibit any individual from being employed by the Academy or an Educational Service Provider, in more than one (1) full-time position and simultaneously being compensated at a full-time rate for each of these positions. An employee hired by the Academy shall be an employee of the Academy for all purposes and not an employee of the University for any purpose. With respect to Academy employees, the Academy shall have the power and responsibility to (i) recruit, select and engage employees; (ii) pay their wages, benefits, and applicable taxes; (iii) evaluate performance; (iv) discipline and dismiss employees; and control the employees' conduct, including the method by which the employee carries out his or her work. The Academy Board shall be responsible for carrying workers' compensation insurance and unemployment insurance for its employees.

The Academy Board may contract with an Educational Service Provider to provide comprehensive educational, administrative, management, or instructional services or staff to the Academy. Before entering into a Management Agreement with an Educational Service Provider, the Academy Board shall first comply with the Educational Service Provider Policies issued by the Center. Any Management Agreement entered into by the Academy shall also comply with Section 11.2 and 12.10 of these Terms and Conditions. A copy of the Management Agreement between the Academy Board and the Educational Service Provider shall be incorporated into this Contract under Schedule 5. Any changes to the Management Agreement shall be incorporated into this Contract by amendment in accordance with Article IX, as applicable.

Section 4.1. Limitation on Actions in Performance of Governmental Functions. The Academy shall act exclusively as a governmental entity and shall not undertake any action inconsistent with its status as a governmental entity authorized to receive state school aid funds pursuant to Section 11 of Article IX of the State Constitution of 1963.

Section 4.3. Academy Board Members Serve In Their Individual Capacity. All Directors of the Academy Board shall serve in their individual capacity, and not as a representative or designee of any other person or entity. A person who does not serve in their individual capacity, or who serves as a representative or designee of another person or entity, shall be deemed ineligible to continue to serve as a Director of the Academy Board. A Director who violates this section shall be removed from office, in accordance with the removal provisions found in the Method of Selection, Appointment and Removal Resolution and Contract Schedule 2: Amended Bylaws. As set forth in the Resolution, a Director serves at the pleasure of the University Board, and may be removed with or without cause at any time.

Section 4.4. Incompatible Public Offices and Conflicts of Interest Statutes. The Academy shall comply with the Incompatible Public Offices statute, being MCL 15.181 et seq. of the Michigan Compiled Laws, and the Contracts of Public Servants with Public Entities statute, being MCL 15.321 et seq. of the Michigan Compiled Laws. The Academy Board shall ensure compliance with Applicable Law relating to conflicts of interest. Notwithstanding any other provision of this Contract, the following shall be deemed prohibited conflicts of interest for purposes of this Contract:

- (a) An individual simultaneously serving as an Academy Board member and an owner, officer, director, employee or consultant of an Educational Service Provider or an employee leasing company, or a subcontractor to an Educational Service Provider or an employee leasing company that has an ESP Agreement with the Academy;
- (b) An individual simultaneously serving as an Academy Board member and an Academy employee;
- (c) An individual simultaneously serving as an Academy Board member and an independent contractor to the Academy;
- (d) An individual simultaneously serving as an Academy Board member and a member of the governing board of another public school;
- (e) An individual simultaneously serving as an Academy Board member and a University official, employee, or paid consultant, as a representative of the University; and
- (f) An individual simultaneously serving as an Academy Board member and having an ownership or financial interest in any real or personal property leased or subleased to the Academy.

Section 4.5. Prohibition of Identified Family Relationships. The Academy Board shall prohibit specifically identified family relationships pursuant to applicable law and the Terms and Conditions of this Contract. Language in this Section controls over section 1203 of the Code. Notwithstanding any other provision of this Contract, the following shall be deemed prohibited familial relationships for the purposes of this Contract:

- (a) No person shall be appointed or reappointed to serve as an Academy Board member if the person's mother, mother-in-law, father, father-in-law, son, son-in-law, daughter, daughter-in-law, sister, sister-in-law, brother, brother-in-law, spouse or same-sex domestic partner:
 - (i) Is employed by the Academy;
 - (ii) Works at or is assigned to work at the Academy;
 - (iii) Has an ownership, officer, policymaking, managerial, administrative non-clerical, or other significant role with the Academy's Educational Service Provider or employee leasing company;
 - (iv) Has an ownership or financial interest in any school building lease or sublease agreement with the Academy; or
 - (v) Is a current Academy Board member.
- (b) The Academy Board shall require each individual who works at the Academy to annually disclose any familial relationship with any other individual who works at, or provides services to, the Academy. For purposes of this subsection, familial relationship means a person's mother, mother-in-law, father, father-in-law, son, son-in-law, daughter, daughter-in-law, sister, sister-in-law, brother, brother-in-law, spouse or same-sex domestic partner.

Section 6.11. Annual Financial Statement Audit. The Academy shall conduct an annual financial statement audit prepared and reviewed by an independent certified public accountant. The Academy Board shall select, retain and pay the Academy's independent auditor. The Academy Board shall not approve the retention of any independent auditor if that independent auditor or auditor's firm is also performing accounting and/or auditing services for the Academy's Educational Service Provider, if applicable. The Academy shall submit the annual financial statement audit and auditor's management letter to the Center in accordance with the Master Calendar. The Academy Board shall provide to the Center a copy of any responses to the auditor's management letter in accordance with the Master Calendar.

Section 6.16. Matriculation Agreements. Before the Academy Board approves a matriculation agreement with another public school, the Academy shall provide a draft copy of the agreement to the Center for review. Any matriculation agreement entered into by the Academy shall be added to Schedule 7f through a contract amendment approved in accordance with the Contract.

Section 10.6. University Board Procedures for Revoking Contract.

- (i) Disposition of State School Aid Funds. Notwithstanding any other provision of the Contract, any state school aid funds received by the University Board after a recommendation is made by the Hearing Panel to revoke the Contract, or a decision by the University Board to revoke the Contract, may be withheld by the University Board or returned to the Michigan Department of Treasury upon request. The University Board may also direct that a portion of the Academy's state school aid funds be directed to fund the Academy's Dissolution account established under Section 10.9 of these Terms and Conditions.

Section 10.8. Conservator; Appointment By University President. Notwithstanding any other provision of the Contract, in the event that the University President, in his or her sole discretion, determines that the health, safety and welfare of Academy students, property or funds are at risk, the University President, after consulting with the University Board Chairperson, may appoint a person to serve as the Conservator of the Academy. Upon appointment, the Conservator shall have all the powers and authority of the Academy Board under this Contract and Applicable Law and shall act in the place and stead of the Academy Board. The University President shall appoint the Conservator for a definite term which may be extended in writing at his or her sole discretion. During the appointment, the Academy Board members and their terms in office are suspended and all powers of the Academy Board are suspended. All appointments made under this provision must be presented to the University Board for final determination at its next regularly scheduled meeting. During their appointment, the Conservator shall have the following powers:

- (a) take into his or her possession all Academy property and records, including financial, board, employment and student records;
- (b) institute and defend actions by or on behalf of the Academy;
- (c) continue the business of the Academy including entering into contracts, borrowing money, and pledging, mortgaging, or otherwise encumbering the property of the Academy as security for the repayment of loans. However, the power shall be subject to any provisions and restrictions in any existing credit documents;
- (d) hire, fire, evaluate and discipline employees of the Academy;
- (e) settle or compromise with any debtor or creditor of the Academy, including any governmental or taxing authority;
- (f) review all outstanding agreements to which the Academy is a party and to take those actions which the Academy Board may have exercised to pay, extend, rescind, renegotiate or settle such agreements as needed; and
- (g) perform all acts necessary and appropriate to fulfill the Academy's purposes as set forth under this Contract or Applicable Law.

Section 10.9. Academy Dissolution Account. If the University Board terminates, revokes or fails to issue a new Contract to the Academy, the Center Director shall notify the Academy that, beginning thirty (30) days after notification of the University Board's decision, the University Board may direct up to \$10,000 from each subsequent State School Aid Fund payment, not to exceed a combined total of \$30,000, to a separate Academy account ("Academy Dissolution Account") to be used exclusively to pay the costs

associated with the wind-up and dissolution responsibilities of the Academy. Within five (5) business days of the Center Director's notice, the Academy Board Treasurer shall provide the Center Director, in a form and manner determined by the Center, with account detail information and authorization to direct such funds to the Academy Dissolution Account. The Academy Dissolution Account shall be under the sole care, custody and control of the Academy Board, and such funds shall not be used by the Academy to pay any other Academy debt or obligation until such time as all the wind-up and dissolution expenses have been satisfied. An intercept agreement entered into by the Academy and a third-party lender or trustee shall include language that the third party lender or trustee acknowledges and consents to the funding of the Academy's dissolution account in accordance with this Contract. Any unspent funds remaining in the Academy's dissolution account after payment of all wind-up and dissolution expenses shall be returned to the Academy.

Contract Amendment No. 8

Tab 2

Section 4.7. Academy Counsel. The Academy Board shall select, retain and pay legal counsel to represent the Academy. The Academy shall not retain any attorney to represent the Academy if the attorney or the attorney's law firm also represents the Academy's Educational Service Provider or any person or entity leasing real property to the Academy, if any.

Section 11.11. Nonessential Elective Course. If the Academy Board elects to provide nonessential elective courses to part-time pupils at a nonpublic school building, the Academy shall comply with Section 166b of the State School Aid Act of 1979, as amended, MCL 388.166b. Prior to providing instruction, the Academy Board shall ensure that the Academy has sufficient documentation to qualify for part-time pupil funding under the State School Aid Act. The provision of nonessential elective courses by the Academy shall be incorporated into Schedule 7c of this Contract by amendment pursuant to Article IX of these Terms and Conditions.

South Arbor Charter Academy

Contract Amendment No. 8

Tab 3

Section 6. Contracts Between Corporation and Related Persons. As required by Applicable Law, any Director, officer or employee of the Academy, who enters into a contract with the Academy, that meets the definition of contract under the statute on Contracts of Public Servants with Public Entities, Act No. 317 of the Public Acts of 1968, being sections 15.321 to 15.330 of the Michigan Compiled Laws, shall comply with the public disclosure requirements set forth in Section 3 of the statute.

The University Board authorizes the Academy Board to employ or contract for personnel according to the position information outlined in Schedule 5. However, the Academy Board shall prohibit any individual from being employed by the Academy, an educational service provider or an employee leasing company involved in the operation of the Academy, in more than one (1) full-time position and simultaneously being compensated at a full-time rate for each of these positions. An employee hired by the Academy shall be an employee of the Academy for all purposes and not an employee of the University for any purpose. With respect to Academy employees, the Academy shall have the power and responsibility to (i) select and engage employees; (ii) pay their wages, benefits, and applicable taxes; (iii) dismiss employees; and (iv) control the employees' conduct, including the method by which the employee carries out his or her work. The Academy Board shall be responsible for carrying workers' compensation insurance and unemployment insurance for its employees. The Academy Board may contract with an educational service provider or an employee leasing company to provide services or to provide personnel to perform services or work at the Academy. Before entering into an agreement with an educational service provider or an employee leasing company to perform services or to provide personnel to perform services or work at the Academy, the Academy Board must first comply with the Educational Service Provider Policies issued by the Center. A copy of the agreement between the Academy Board and the educational service provider or employee leasing company shall be included as part of Schedule 5.

The Academy shall comply with the Incompatible Public Offices statute, Act No. 566 of the Public Acts of 1978, of the Michigan Compiled Laws, and the Contracts of Public Servants With Public Entities statute, Act No. 371 of the Public Acts of 1968, of the Michigan Compiled Laws. The Academy Board shall ensure compliance with Applicable Law relating to conflicts of interest. Language in this Section controls over section 1203 of the Code. The following shall be deemed prohibited conflicts of interest:

- (a) An individual simultaneously serving as an Academy Board member and an owner, officer, director, employee or consultant of an educational service provider or an employee leasing company, or a subcontractor to an Educational Service Provider or an employee leasing company that has an ESP Agreement with the Academy;
- (b) An individual simultaneously serving as an Academy Board member and an Academy employee;
- (c) An individual simultaneously serving as an Academy Board member and an independent contractor to the Academy;
- (d) An individual simultaneously serving as an Academy Board member and a member of the governing board of another public school;
- (e) An individual simultaneously serving as an Academy Board member and a University official, employee, or paid consultant, as a representative of the University; and
- (f) An individual simultaneously serving as an Academy Board member and having an ownership or financial interest in any real or personal property leased or subleased to the Academy.

No person shall be appointed or reappointed to serve as an Academy Board member if the person's mother, mother-in-law, father, father-in-law, son, son-in-law, daughter, daughter-in-law, sister, sister-in-law, brother, brother-in-law, spouse or same-sex domestic partner:

- (a) Is employed by the Academy;
- (b) Works at or is assigned to work at the Academy;
- (c) Has an ownership, officer, policymaking, managerial, administrative non-clerical or other significant role with the Academy's educational service provider or employee leasing company; and
- (d) Has an ownership or financial interest in any school building lease or sublease agreement with the Academy.

The Academy Board shall require each individual who works at the Academy to annually disclose any familial relationship with any other individual who works at, or provides services to, the Academy. For purposes of this sub-section, familial relationship means a person's mother, mother-in-law, father, father-in-law, son, son-in-law, daughter, daughter-in-law, sister, sister-in-law, brother, brother-in-law, spouse or same-sex domestic partner.

South Arbor Charter Academy

Contract Amendment No. 8

Tab 4

Section 2.04. Academy Board Requests for Direct Intercept of State School Aid Payments. If the Academy Board (i) authorizes a direct intercept of a portion of its State School Aid Payments from the State to a third party account for the payment of Academy debts and liabilities; or (ii) assigns or directs that a portion of its State School Aid Payments be forwarded by the Fiscal Agent to a third party account for the payment of Academy debts and liabilities, then Academy shall submit to The Governor John Engler Center for Charter Schools at Central Michigan University for review and consideration: (i) a copy of the Academy Board's resolution authorizing the direct intercept or the assignment or direction of State School Aid Payments; (ii) a State School Aid Payment Agreement and Direction document that is in a form and content acceptable to the Fiscal Agent; and (iii) other documents as required. The Center reserves the right to not acknowledge in writing any State School Aid Payment Agreement and Direction that is not in a form and content acceptable to the Fiscal Agent. The State School Aid Payment and Direction document shall include language that the third party lender or trustee acknowledges and consents to the transfer of State School Aid Payments into the Academy's dissolution account, as set forth in Article X of the Terms and Conditions. Any unspent funds remaining in the Academy dissolution account after payment of all wind-up and dissolution expenses shall be returned to the Academy.

ARTICLE III

STATE DUTIES

Section 3.01 Eligibility for State School Aid Payments. The State, through its Department of Education, has sole responsibility for determining the eligibility of the Academy to receive State School Aid Payments. The State, through its Department of Education, has sole responsibility for determining the amount of State School Aid Payments, if any, the Academy shall be entitled to receive.

Section 3.02. State School Aid Payment Overpayments and Penalties. The State, through its Department of Education, has sole responsibility for determining State School Aid Payment overpayments to the Academy and the method and time period for repayment by the Academy. The State, through its Department of Education, has sole responsibility for assessing State School Aid penalties against the Academy for noncompliance with the Code and the State School Aid Act of 1979, as amended.

Section 3.03. Method of Payment. Each State School Aid Payment for the Academy will be made to the Fiscal Agent by the State Treasurer by issuing a warrant and delivering the warrant to the Fiscal Agent by electronic funds transfer into an account specified by the Fiscal Agent, or by such other means deemed acceptable to the Fiscal Agent. The State shall make State School Aid Payments at the times specified in the State School Aid Act of 1979, as amended.

Section 4.05. Repayment of Overpayment. The Academy shall be directly responsible for reimbursing the State for any overpayment of State School Aid Payments or any State School Aid penalties. At its option, the State may reduce subsequent State School Aid Payments by the amount of the overpayment or penalty or seek collection of the overpayment or penalty from the Academy.

South Arbor Charter Academy

Contract Amendment No. 8

Tab 5

Section 4.3. Audit and Evaluation. The Academy:

- a. Hereby authorizes the Center to perform audit and evaluation studies using Academy data including, but not limited to, personally identifiable information about the Academy's students and staff submitted by the Academy to agencies including, but not limited to, Center for Educational Performance and Information ("CEPI"), Office of Educational Assessment and Accountability ("OEAA") and the Michigan Department of Education ("MDE"). Pursuant to this authorization, the Center shall abide by regulations that govern the use of student data within the Family Educational Rights and Privacy Act ("FERPA"), the Michigan Identity Theft Protection Act of 2004 and the Privacy Act of 1974.
- b. Shall upon request, provide the Center with copies or view access to data, documents or information submitted to the Michigan Department of Education, the Superintendent of Public Instruction, the State Board of Education, the Center for Educational Performance and Information, the Michigan DataHub or any other state or federal agency.

Section 4.4. Fiscal Stress Notification from State Treasurer. If the State Treasurer notifies the Academy that the State Treasurer has declared the potential for Academy financial stress exists, the Academy shall provide a copy of the notice to the Center. Within fifteen (15) days of receipt of the notification from the Academy, the Center Director shall notify the Academy whether the Center is interested in entering into a contract to perform an administrative review for the Academy. The parties shall consult with the Department of Treasury on the development of the contract and the contract for administrative review shall comply with the Code. If the Center is not interested in performing an administrative review or if the parties are unable to reach agreement on an administrative review, the Academy shall consider entering into a contract for an administrative review with an intermediate school district. Nothing in this Section 4.4 shall prohibit the Academy for electing to enter into a contract for an administrative review with an intermediate school district. Nothing in this Section 4.4 shall require the Academy to elect to enter or not enter into a contract for an administrative review with the Center or an intermediate school district.

South Arbor Charter Academy

Contract Amendment No. 8

Tab 6

Matriculation Agreement

- The Academy Board may enter into a matriculation agreement with another public school pursuant to section 504(4) of the Code.
- However, before the Academy Board approves a matriculation agreement, the Academy shall provide a draft copy of the agreement to the Center for review.
- Any matriculation agreement entered into by the Academy shall be added to this Schedule 7f through a contract amendment approved in accordance with Article IX in the Terms and Conditions of this Contract.

CONTRACT AMENDMENT NO. 9

SOUTH ARBOR CHARTER ACADEMY

In accordance with Article IX of the Terms and Conditions of the Contract (the “Contract”), dated July 1, 2016, issued by the CENTRAL MICHIGAN UNIVERSITY BOARD OF TRUSTEES (the “University Board”) to SOUTH ARBOR CHARTER ACADEMY (the “Academy”), as amended, the parties agree to further amend the Contract as follows:

- 1.) The Preparedness Plan, approved by the Academy Board, is incorporated into the Contract by reference.
- 2.) Any updates to the Preparedness Plan, approved by the Academy Board, shall automatically be incorporated into the Contract and shall be exempt from the amendment procedures under Article IX of the Terms and Conditions of Contract.
- 3.) This Contract amendment shall remain in effect until the earlier of (i) the end of the 2020-2021 school fiscal year or (ii) the rescission of Executive Order 2020-142, including any successor executive order authorizing a Preparedness Plan.

This Contract amendment is hereby approved by the University Board and the Academy Board through their authorized designees and shall have an effective date of August 17, 2020.

Re: Approval of COVID-19 Preparedness and Response Plan ("Plan")

Dear Ms. Bondy:

I am pleased to inform you that the Plan for South Arbor Charter Academy ("Academy") has been approved by The Governor John Engler Center for Charter Schools at Central Michigan University and has been transmitted by our office to the State Superintendent of Public Instruction and the State Treasurer. The Plan is effective as of the date indicated in the Plan.

To fulfill one of the required assurances, immediately add a copy of the approved Plan to the Academy's Home Page of its website. An approved copy of the Plan is attached and can be found in Epicenter. The approved Plan constitutes a Charter Contract amendment and remains in effect as long as the Plan remains in effect.

If the Academy requires an amendment to the Plan, please contact Amy Densmore, Director of Charter Accountability, at (989) 506-0355 or via email at avanatten@thecenterforcharters.org to initiate that process. Thank you for all your efforts to keep student learning moving forward in these trying times. If you have any further questions or need additional support, please do not hesitate to contact us.

Sincerely,

A handwritten signature in black ink that reads "Corey Northrop". The signature is fluid and cursive, with the first name "Corey" and last name "Northrop" clearly distinguishable.

Approved COVID-19 Preparedness and Response Plan

**RESOLUTION APPROVING THE COVID-19 PREPAREDNESS AND RESPONSE
PLAN (“PREPAREDNESS PLAN”) AND APPROVAL OF CHARTER CONTRACT
AMENDMENT**

SOUTH ARBOR CHARTER ACADEMY (the “Academy”)

A regular meeting of the Academy Board of Directors was held on the 12th day of August, 2020, at 8:30 a.m.

The meeting was called to order at 8:33 a.m. p.m.] by Board Member Marcella Haghgooie :

Present: Marcella Haghgooie, Sarah Camp, JaVonda Palmer

Absent: Stacy Peterson, John Morrison

The following preamble and resolution were offered by Board Member Sarah Camp and supported by Board Member JaVonda Palmer :

BACKGROUND

On June 30, 2020, in response to the novel coronavirus (COVID-19) pandemic affecting our state, Governor Gretchen Whitmer issued Executive Order 2020-142 (the “Order”) that, provides a structure to support all schools in Michigan as they plan for a return of preK-12 education in the fall. Under the order, all schools must adopt a COVID-19 Preparedness and Response Plan (“Preparedness Plan”) laying out how they will cope with the disease across the various phases of the Michigan Safe Start Plan. Under the Order and the Michigan Safe Schools: Michigan’s 2020-2021 Return to School Roadmap developed by the COVID-19 Task Force on Education Return to School Advisory Council (“Return to School Roadmap”), Schools retain flexibility to tailor their instruction to their particular needs and to the disease conditions present in their regions.

Acting under the Michigan Constitution of 1963 and Michigan law, the Order and the Return to School Roadmap state:

1. Coronavirus relief funds under the Coronavirus Aid, Relief, and Economic Security Act will be provided and may be used to aid in developing, adopting, and following a COVID-19 Preparedness Plan under section 2 of the Order.
2. Every school must develop and adopt a Preparedness Plan that is informed by the Return to School Roadmap.
3. By August 15, 2020 or seven days before the start of the school year for students, whichever comes first: the Academy Board must approve its Preparedness Plan.
4. By August 17, 2020, the Academy’s authorizing body, Central Michigan University, must collect the Preparedness Plan and transmit such plan to the Superintendent and to the State Treasurer.
5. By August 17, 2020, the Academy must prominently post its approved Preparedness Plan on the Academy’s website home page.

The Academy submitted its Preparedness Plan to Central Michigan University (“Authorizer”) for review and approval.

The Academy Board of Directors (“Academy Board”) is required to approve the Academy’s Preparedness Plan by August 15, 2020 or seven days before the start of the school year for students, whichever comes first, and is required to approve the Academy’s Preparedness Plan as a charter contract (“Contract”) amendment.

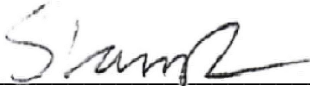

THE ACADEMY BOARD THEREFORE RESOLVES THAT:

1. The actions taken by Academy representatives to prepare and submit the Academy’s Preparedness Plan to Authorizer are ratified.
2. The Preparedness Plan, as approved by the Authorizer, is approved by the Academy Board as the COVID-19 Preparedness Plan and as the COVID-19 Preparedness Plan Amendment to the Contract. This Contract Amendment shall remain in effect as long as The Preparedness Plan remains in effect. The Board President is authorized to sign and submit the Contract amendment to the Authorizer for approval.
3. All resolutions and parts of resolutions insofar as they conflict with the provisions of this resolution be and the same hereby are rescinded.
4. The Academy will deliver from time to time such information regarding the implementation of the Academy’s Preparedness Plan as the Authorizer or Michigan Department of Education may reasonably request.
5. Any Board policies or provision of Board policies that prohibit or impede the Academy’s compliance with The Preparedness Plan or Executive Order 2020-142 are temporarily waived, suspended or altered.
6. Any actions or actions taken by authorized Academy representatives in the development, submission and implementation of The Preparedness Plan are (to the extent such actions or actions are not inconsistent with the delegation of authority provided under this resolution) ratified and confirmed in all respects.
7. This Resolution shall take immediate effect and continue through the end of the state of emergency and disaster declared in Executive Order 2020-127 and any subsequent executive order declaring a state of emergency or disaster in response to COVID-19 or the end of the 2020-2021 school year, whichever is sooner.

CONTRACT AMENDMENT NO. 10

SOUTH ARBOR CHARTER ACADEMY

In accordance with Article IX of the Terms and Conditions of the Contract (the “Contract”), dated July 1, 2016, issued by the CENTRAL MICHIGAN UNIVERSITY BOARD OF TRUSTEES (the “University Board”) to SOUTH ARBOR CHARTER ACADEMY (the “Academy”), as amended, the parties agree to further amend the Contract as follows:

- 1.) The Extended COVID-19 Learning Plan (“ECLP”), approved by the Academy Board, is incorporated into the Contract by reference. The parties agree to suspend the following Contract provisions for the 2020-2021 school year:

Schedule 7, Section b: Educational Goal and Related Measures

Schedule 7, Section c: Educational Programs

Schedule 7, Section d: Curriculum

Schedule 7, Section e: Methods of Pupil Assessment

- 2.) Any revisions or changes to the ECLP, approved by the Academy Board, shall automatically be incorporated into the Contract by reference and shall be exempt from the amendment procedures under Article IX of the Terms and Conditions of Contract.
- 3.) This Contract amendment shall remain in effect until the end of the 2020-2021 school fiscal year.
- 4.) In the event there is a perceived conflict between the ECLP and the Academy’s Preparedness Plan, prepared in compliance with Executive Order 2020-142, the parties agree to discuss implementation of both the ECLP and the Preparedness Plan to ensure that the Academy will meet all of its obligations under applicable law.

This Contract amendment is hereby approved by the University Board and the Academy Board through their authorized designees and shall have an effective date of the Academy’s first day of school for the 2020-2021 school year.

Re: Approval of Extended COVID-19 Learning Plan ("Extended Learning Plan")

Dear Ms. Bondy:

I am pleased to inform you that the Extended Learning Plan for South Arbor Charter Academy ("Academy") has been approved by The Governor John Engler Center for Charter Schools at Central Michigan University. The Center will transmit the Extended Learning Plan to the State as soon as an appropriate mechanism to do so is made available. The Extended Learning Plan is effective as of the date indicated in the document.

To fulfill one of the required assurances, immediately add a copy of the approved Extended Learning Plan to the Academy's Transparency Page of its website. An approved copy of the Extended Learning Plan is attached and can be found in Epicenter. The approved Extended Learning Plan constitutes a Charter Contract amendment and remains in effect as long as the Extended Learning Plan remains in effect.

Thank you for all your efforts to keep student learning moving forward in these trying times. If you have any further questions or need additional support, please do not hesitate to contact us.

Sincerely,

Approved Extended COVID-19 Learning Plan

RESOLUTION APPROVING THE EXTENDED COVID-19 LEARNING PLANS ("ECLP") AND APPROVAL OF CHARTER CONTRACT AMENDMENT

South Arbor Charter Academy (the "Academy")

A special meeting of the Academy Board of Directors was held on the 17th day of September, 2020, at 8:30 a.m.

The meeting was called to order at 8:31 a.m. by Board Member Marcella Haghgooie:

Present: Marcella Haghgooie, Sarah Camp, JaVonda Palmer, John Morrison

Absent: Stacy Peterson

The following preamble and resolution were offered by Board Member John Morrison and supported by Board Member Sarah Camp:

BACKGROUND

On August 20, 2020, in response to the novel coronavirus (COVID-19) pandemic affecting our state, Governor Whitmer signed into law certain amendments to the State School Aid Act of 1979, as amended, MCL 388.1601 et seq. ("Back to School Laws"). The Back to School Laws include additional requirements for all Michigan schools as they plan for a return of preK-12 education for the 2020-2021 school year. Under the Back to School Laws, a public school academy must provide for instruction under an extended COVID-19 learning plan ("ECLP") that is approved by its authorizing body ("Authorizer"). ECLPs includes many of the same subject matters addressed in a public school academy's charter contract, including measurable educational goals to be achieved by all subgroups in the school, measurement of those educational goals by one or more benchmark assessments, a description of how the educational program, including instruction, will be delivered, a description of the school's curricula and specific reporting requirements for the 2020-2021 school year. Under the Back to School Laws, schools retain the flexibility to tailor and adjust their ECLPs to meet the needs of their students and the community they serve.

The Back to School Laws require, among other things, that each public school academy do the following:

- (1) Establish educational goals required to be included in the ECLP no later than September 15, 2020.
- (2) Approve an ECLP and submit it to their respective authorizing body ("Authorizer") for approval by October 1, 2020. If approved by the Authorizer, the ECLP is transmitted by the Authorizer to the Superintendent of Public Instruction and the State Treasurer.
- (3) Make an ECLP accessible through the transparency reporting link on the school's website by October 1, 2020.
- (4) Within the first nine weeks of the 2020-2021 school year, administer 1 or more benchmark assessments from the list approved by the Michigan Department of Education (MDE)¹, a benchmark assessment provided by MDE, or local benchmark assessments, or a combination of the above, to pupils in grades K-8 to measure math and reading proficiency. In addition, by the last day of the 2020-2021 school year, administer another benchmark assessment to pupils in K-8 to measure proficiency in the same subject matter. The Back to School Laws require schools to use the same benchmark assessment(s) used in the 2019-2020 school year, if applicable.
- (5) Provide each pupil's data from the benchmark assessment or benchmark assessments, as available, to the pupil's parent or legal guardian within 30 days of administering the benchmark assessment(s).

¹ MDE has approved four providers of benchmark assessments and continues to assess additional providers. See [https://www.michigan.gov/documents/mde/Benchmark assessments 700077 7.pdf](https://www.michigan.gov/documents/mde/Benchmark_assessments_700077_7.pdf)

- (6) Not later than February 1, 2021, create a report that addresses the progress made in meeting the educational goals in the ECLP that the academy expected would be achieved by the middle of the school year and make the report available on the transparency reporting link on a public school academy's website.
- (7) Not later than the last day of the 2020-2021 school year, create a report concerning progress made in meeting the educational goals in the ECLP and make the report available on the transparency reporting link on a public school academy's website.
- (8) No later than June 30, 2021, send the aggregate academy-level data from a benchmark assessment(s), excluding data from a local benchmark assessment or local benchmark assessments, to a regional data hub that is part of the Michigan data hub network that shall compile the data and send it to the Center for Educational Performance and Information (CEPI).
- (9) Thirty days after approval of the ECLP, the Board shall meet monthly to re-confirm how pupil instruction is being delivered at the school and whether it is consistent with the ECLP and to ensure that 2 2-way interaction, as defined in the Act, is occurring between students and teachers each week of the school year for at least 75% of students enrolled in the school. At each meeting, the Board shall: (a) publicly announce its weekly interaction rates of 2 2-way interaction since its last meeting; (b) allow for public comment on the ECLP; and (c) discuss whether changes to the method of delivery for pupil instruction under the ECLP are necessary.

THE ACADEMY BOARD THEREFORE RESOLVES THAT:

1. The actions taken by Academy representatives to prepare and submit the Academy's ECLP to Authorizer are ratified.
2. The ECLP, as approved by the Authorizer, is approved by the Academy Board as the ECLP and as the ECLP Amendment to the Contract.
3. All resolutions and parts of resolutions insofar as they conflict with the provisions of this resolution be and the same hereby are rescinded.
4. The Academy will deliver from time to time such information regarding the implementation of the Academy's ECLP as the Authorizer or Michigan Department of Education may reasonably request.
5. Any Board policies or provision of Board policies that prohibit or impede the Academy's compliance with ECLP are temporarily waived, suspended or altered.
6. This Resolution shall take immediate effect and continue through the end of the 2020-2021 school year. If the Back to School Laws are amended, and such amendments requires additional Board action relative to the ECLP, the Board may take such action to comply with existing law.

CONTRACT AMENDMENT NO. 12

SOUTH ARBOR CHARTER ACADEMY

In accordance with Article IX of the Terms and Conditions of the Contract (the "Contract"), dated July 1, 2016, issued by the CENTRAL MICHIGAN UNIVERSITY BOARD OF TRUSTEES (the "University Board") to SOUTH ARBOR CHARTER ACADEMY (the "Academy"), as amended, the parties agree to further amend the Contract as follows:

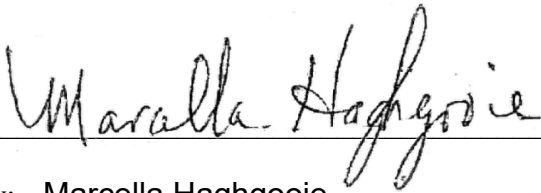

- 1.) Amend Schedule 7, Section b: Educational Goal and Related Measures by replacing the materials contained therein with the materials attached as Tab 1.

This entire amendment is hereby approved by the University Board and the Academy Board through their authorized designees, and shall have an effective date of July 1, 2021.

Dated: 06/10/2021

Contract Amendment No. 12

Tab 1

EDUCATIONAL GOAL AND RELATED MEASURES

Pursuant to Applicable Law and the Terms and Conditions of this Contract, including Article VI, Section 6.2, the Academy shall achieve or demonstrate measurable progress for all groups of pupils toward the achievement of the educational goal identified in this schedule. Although an increase in academic achievement for all groups of pupils as measured by assessments and other objective criteria is the most important factor in determining the Academy's progress toward the achievement of the educational goal, the Center also considers other factors. Upon request, the Academy shall provide the Center with a written report, along with supporting data, assessing the Academy's progress toward achieving this goal. In addition, the University expects the Academy will meet the State of Michigan's accreditation standards pursuant to state and federal law.

Educational Goal to be Achieved

Prepare students academically for success in college, work and life.

Measures to Assist In Determining Measurable Progress Toward Goal Achievement

To assist in determining whether the Academy is achieving measurable progress toward the achievement of this goal, the Center will annually assess the Academy's performance using the following measures.

Measure 1: Student Achievement

The academic achievement of **all students who have been at the academy for one or more years¹** in grades 3-8 will be assessed using the following measures and targets:

Sub Indicator	Measure	Metric	Target
Against a Standard:	The percentage of students meeting or surpassing the current, spring, grade-level national norms ² on the NWEA Growth reading and math tests administered in the spring.	Distribution (which will be in the form of percentages): Exceeds $\geq 70.0\%$ Meets $\geq 50.0\%$ Approaching $\geq 30.0\%$ Does not meet $< 30.0\%$	50%
In the event that performance against the standard falls below these required expectations, "measurable progress towards the achievement of this goal" will be defined using the following measures and targets:			
Over Time:	The percentage of students meeting or surpassing spring grade-level national norms over time (CY-AVG(PY1+PY2+PY3)).	Trend score (which will be in the form of $-x$ to $+x$): Exceeds $\geq 6.0\%$ Meets $\geq 3.0\%$ Approaching $\geq 1.0\%$ Does not meet $< 1.0\%$	3.0%
Comparison Measure:	The percentage of students categorized as proficient or advanced on the most recent state assessment will surpass the school's Composite Resident District (CRD) percentage.	Portfolio Distribution (which will be in the form of $-x$ to $+x$): Exceeds $\geq 10.0\%$ Meets $\geq 5.0\%$ Approaching $\geq 0.0\%$ Does not meet $< 0.0\%$	5.0%

¹ One or more years students (also called 1+ students) are students who are enrolled in the academy on or before count day and are still enrolled at the end of a given academic year.

² Grade level national norms are updated periodically by NWEA following comprehensive norming studies. The Center will use the most updated national norms published by NWEA and will inform the Academy when they are updated and how the updated norms may impact analysis and performance reporting.

Measure 2: Student Growth

The academic growth of all students in grades 3-8 at the Academy will be assessed using the following measures and targets:

Sub Indicator	Measure	Metric	Target
Against a Standard:	The median of student growth percentiles (MGP) reflecting fall-to-spring scaled score growth on the reading and math NWEA Growth tests.	MGP: Exceeds $\geq 65^{\text{th}}$ Meets $\geq 50^{\text{th}}$ Approaching $\geq 45^{\text{th}}$ Does not meet $< 45^{\text{th}}$	Reading: 50 Math: 50
In the event that performance against the standard falls below these required expectations, “measurable progress towards the achievement of this goal” will be defined using the following measures and targets:			
Over Time:	The percentage of students making at least one year’s growth over time (CY-AVG(PY1+PY2+PY3)).	Trend score (which will be in the form of $-x$ to $+x$): Exceeds $\geq 6.0\%$ Meets $\geq 3.0\%$ Approaching $\geq 1.0\%$ Does not meet $< 1.0\%$	3.0%
Comparison Measure:	The mean student growth percentile reflecting growth on the two most recent state assessments will surpass the school’s Composite Resident District.	Portfolio Distribution (which will be in the form of $-x$ to $+x$): Exceeds $\geq 10.0\%$ Meets $\geq 5.0\%$ Approaching $\geq 0.0\%$ Does not meet $< 0.0\%$	5.0%

CONTRACT AMENDMENT NO. 13

SOUTH ARBOR CHARTER ACADEMY

In accordance with Article IX of the Terms and Conditions of the Contract (the "Contract"), dated July 1, 2016, issued by the CENTRAL MICHIGAN UNIVERSITY BOARD OF TRUSTEES (the "University Board") to SOUTH ARBOR CHARTER ACADEMY (the "Academy"), as amended, the parties agree to further amend the Contract as follows:

- 1.) Amend Schedule 7, Section f: Application and Enrollment of Students, by inserting at the end of this Section the Matriculation Agreement, attached as Tab 1.

This entire amendment is hereby approved by the University Board and the Academy Board through their authorized designees, and shall have an effective date of November 10, 2021.

South Arbor Charter Academy

Contract Amendment No. 13

Tab 1

Matriculation Agreement

This Matriculation Agreement (“Agreement”) is entered into as of the 10th day of November, 2021, between South Arbor Charter Academy, a body corporate and public school academy (“Receiving School”) and PrepNet Virtual Academy, a body corporate and public school academy (“Sending School”) (both parties referred to as “Schools”).

Both the Sending School and the Receiving School are separate and independent public school academies, organized as such under the Michigan Revised School Code (the “Code”). Both schools hold separate charters from valid authorizing bodies, pursuant to their respective charter contracts. Both schools operate independent of the other.

Because certain students transferred from Receiving School to attend Sending School for the 2021-22 school year due to its virtual program offerings during the pandemic, and Receiving School desires to provide an enrollment preference for such students who seek to return to Receiving School for the 2022-23 school year, the parties desire to establish this arrangement for matriculation of qualifying students from the Sending School to the Receiving School.

Michigan law permits any pupil who was enrolled at any time during elementary school in either the Sending School or Receiving School and who was not expelled from such School to have an enrollment priority in the Receiving School provided the Schools have a matriculation agreement. MCL 380.504(4)(b).

Therefore, for good and valuable consideration, the receipt of which is hereby acknowledged, it is mutually agreed as follows:

1. **Term.** This Agreement shall be effective as of November 10, 2021, provided that it has been approved by each School’s governing board and their respective authorizing bodies. The Term of this Contract shall be one (1) school year, and shall expire on June 30 at the end of the current school year. The Term of this Contract may be renewed on an annual basis by written agreement of the parties.
2. **Qualifying Students.** Students who meet all of the following requirements are deemed to be “Qualifying Students” for enrollment priority under this Agreement:
 - a. the student was enrolled in and attended either the Sending School or Receiving School at any time during elementary school;
 - b. the student was not expelled from the Sending School nor the Receiving School;
 - c. the student has completed the grade prior to the grade he/she is applying for in the Receiving School, from any school, including home school; and
 - d. the student is eligible to enroll in a public school in Michigan.
3. **Application for matriculation.** Qualifying Students who desire an enrollment priority in the Receiving School must complete the Receiving School’s application for the applicable

school year and submit it to the Receiving School during its Open Enrollment Period as set forth in the Receiving School's Admission and Enrollment Practices and Procedures incorporated as Exhibit A to this Agreement.

4. **Enrollment Priority.** The enrollment priority of Qualifying Students shall be determined according to the Receiving School's Admission and Enrollment Policy and the Admission and Enrollment Practices and Procedures incorporated as Exhibit A to this Agreement. If the enrollment priority is modified, the Receiving School shall provide notice of such modifications to the Sending School.
5. **Enrollment.** Qualifying Students must attend school at the Receiving School on the first day of school in order to be enrolled. Any Qualifying Student who does not attend the first day of school and who does not obtain an excused absence from the Receiving School before the end of that school day, shall forfeit his or her priority to enroll in the Receiving School.
6. **Record Transfer.** Upon receipt of a properly completed records release form from the Receiving School and parent of the student, the Sending School shall transfer all student records of Qualifying Students to the Receiving School no later than 30 days after receipt of the request for transfer of records from the Receiving School.
7. **Termination.** This Agreement may be terminated by either party at any time for any reason upon providing ninety (90) days' written notice. If such notice is given more than ninety (90) days before the end of the Open Enrollment Period, there shall be no enrollment priority for Qualifying Students for the subsequent school year. If the notice is given any time thereafter, the Qualifying Students who applied for enrollment priority at the Receiving School shall receive the priority for the subsequent school year pursuant to the terms of this Agreement. This Agreement shall be terminated automatically if the Charter Contract for either the Sending School or the Receiving School is terminated or revoked.
8. **Effective Date.** As to each School, this Agreement shall be effective on the date this Agreement is incorporated into the School's Charter Contract by amendment.
9. **Conditional Upon Approval by Authorizing Bodies.** This Agreement shall become effective only if it is incorporated into the Sending School's and the Receiving School's contracts with their respective authorizing bodies, as contemplated by Section 6.16 of such contracts.
10. **Notices.** All notices and other communications required or permitted under this Agreement will be in writing and will be deemed given when delivered personally or by registered or certified mail, return receipt requested, addressed as follows (or any other address that is specified in writing by either party):

If to Sending School:

Board President
PrepNet Virtual Academy
3850 Broadmoor Ave SE
Grand Rapids, MI 49512

If to Receiving School:

Board President
South Arbor Charter Academy
8200 Carpenter Rd.
Ypsilanti, MI 48197

11. **No Waiver.** A party's failure to exercise a right or remedy, or its acceptance of a partial or delinquent payment, will not operate as a waiver of any of that party's rights or remedies under this Agreement and will not constitute a waiver of the party's right to declare an immediate or a subsequent default.
12. **Severability.** If one or more provisions of this Agreement shall be invalid, illegal, or unenforceable in any respect under any applicable law or decision, the validity, legality, and enforceability of the remaining provisions shall not be affected or impaired in any way. Each party shall, in any such event, execute such additional documents as the other party may reasonably request to give valid, legal, and enforceable effect to any provision of this Agreement that is determined to be invalid, illegal, or unenforceable as written in this Agreement.
13. **Amendments.** This Agreement may only be amended, modified, or supplemented by an agreement in writing signed by an authorized representative of each party.
14. **Assignment.** No party may assign any of its rights or delegate any of its obligations under this Agreement without the prior written consent of the other parties. Any purported assignment in violation of this Section shall be void.
15. **Counterparts.** This Agreement may be executed in counterparts, each of which shall be deemed an original, but all of which together shall be deemed to be one and the same agreement. A signed copy of this Agreement delivered by facsimile, e-mail, or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signed copy of this Agreement.
16. **No Third Party Beneficiaries.** This Agreement is for the sole benefit of the parties and their respective successors and permitted assigns, and nothing in this Agreement, express or implied, is intended to or shall confer on any other person or entity any legal or equitable right, benefit, or remedy of any nature whatsoever under or by reason of this Agreement.
17. **Entire Agreement.** This Agreement constitutes the entire agreement and understanding of the parties and there are no other promises, assurances or terms of agreement among the parties other than those written herein. Nothing in this Agreement shall give rights to any other person. This agreement shall not be modified except in writing and signed by each of the parties.

IN WITNESS WHEREOF, the parties have executed this Agreement on the date shown

below. **Receiving School: South Arbor Charter Academy**

By: Maralla Hughes

Date: November 10, 2021

Sending School: PrepNet Virtual Academy

Date: Jan 27, 2021

PREPNET VIRTUAL ACADEMY

Admission and Enrollment Policy

Admission to the School shall be open to all age-appropriate children for grade levels offered in accordance with the School's charter contract without charge for tuition and without discrimination on the basis of intellectual or athletic abilities, measures of achievement or aptitude, disability, status as a handicapped person, homeless status, English proficiency, religion, creed, race, sex, color, national origin or any other basis that would be illegal for an existing school district. Admission shall comply with all applicable federal and state laws. Admission shall be limited to those students who are residents of the state, except a foreign exchange student. The Academy may choose not to accept a student who has been suspended, expelled, or otherwise released or excluded from his or her previous school for disciplinary reasons. The School Leader shall make the decision based on the circumstances involved.

The School will remove barriers to the enrollment and retention in school of children and youth experiencing homelessness by developing and implementing practices and procedures consistent with the McKinney-Vento Homeless Education Assistance Act and applicable state law. The school will ensure that all identified homeless children and unaccompanied youth receive a free and appropriate education and are given meaningful opportunities to succeed in the school.

It is the policy of the School Board that its educational service provider develop and implement practices and procedures that control the admission and enrollment of students, including public notice, lottery and random selection drawing to be used when the number of applicants exceed the number of available spaces for grades offered. Detailed application, lottery and admission practices and procedures shall be available to parents and the general public at the school office. The School Board will annually approve offered seats and maximum class size of the School.

Admissions and Enrollment Practices & Procedures Homeless Child Practices & Procedures

Adopted: August 14, 2020

PRACTICES AND PROCEDURES: ADMISSIONS AND ENROLLMENT (MI K-12 Schools)

The school will comply with all applicable federal and state laws related to admissions and enrollment.

Non-Discrimination

A charter school shall not discriminate against or limit the admission of any student on any unlawful basis, including on the basis of ethnicity, national origin, color, need for special education services, sex, gender, disability, intellectual ability, measures of achievement or aptitude, athletic ability, race, creed, religion, or ancestry. A school may not require any action by a student or family (such as an admissions test, interview, essay, attendance at an information session, etc.) in order for an applicant to either receive or submit an application for admission to that school.

Enrollment Eligibility

All student applicants must be residents of Michigan at the time of enrollment. At the time of enrollment, families must provide proof of residency, which includes: a valid Michigan driver's license or a state-issued photo identification card, mortgage and rent payment receipts, or lease agreement, or voter registration card, or gas, water, electric bill, or bank statement. Students in temporary housing, as defined by McKinney-Vento, are not required to submit proof of residency documentation.

All students who enroll in kindergarten must turn five by September 1st of that school year. Parents whose child's birthdate falls between 9/1 and 12/1 may opt to enroll their child early into the school's kindergarten program.

Open Enrollment Period and Notice

The "**Open Enrollment Period**" for the first year of operation will be determined prior to June 30 by the NHA Enrollment Department and included in the notice of Open Enrollment. In all subsequent years, the Open Enrollment Period is from the first day of school of the current school year until 5:00 p.m. (school's local time) of the last business day in November in the current school year. Notice of the Open Enrollment Period and application process will be designed to inform the persons most likely to be interested in the school.

National Heritage Academies (NHA) and/or the school will provide notice of Open Enrollment on its website and by (a) printing a legal notice of the enrollment period in a local newspaper of general circulation; (b) posting a written notice of the Open Enrollment Period at the school. In addition, notice may also be provided by airing a public service announcement on local television.

Application Procedures

Interested parties may obtain applications at:

- The school's website
- The offices of the school
- The service center of NHA at 3850 Broadmoor SE, Suite 201, Grand Rapids, MI 49512 or by calling 866-NHA-ENROLL from 8:00 a.m. to 5:00 p.m. EST.

Applications will be mailed, emailed or faxed to anyone requesting an application by telephone.

Applications for the current school year will be accepted until the end of the current school year and available seats will be filled. Applications for the subsequent school year are received during and after the Open Enrollment Period. If applications received during the Open Enrollment Period exceed offered seats in any grade level a random selection process will take place for all affected grade levels. If applications received are fewer than offered seats in each and every grade level all eligible applicants will be accepted, and a random selection process will not be conducted.

All applications received after the Open Enrollment Period ("late applications") will not be eligible to participate in the random selection process. If seats are available, late applications will be added to

PRACTICES AND PROCEDURES: ADMISSIONS AND ENROLLMENT (MI K-12 Schools)

the end of the accepted list in the order received. If no seats are available, the late application will be added to the end of the waiting list or, if the late application is entitled to preference, inserted in the waiting list immediately before all applicants on the waiting list with a lower enrollment preference category.

Currently Enrolled Students

Every student who is enrolled in the current school year and remains enrolled on the last day of the current school year is eligible to re-enroll for the subsequent year without participating in the random selection process. Enrolled students do not have to submit an application for the subsequent year; however, they will be requested to complete a re-enrollment form during the school year showing intent to re-enroll for the subsequent school year.

Random Selection Process

The random selection process shall be made public, shall be announced at least one week prior to the date of the lottery, and the school will notify all applicants of the time and place. A neutral third-party person will witness the random selection process. This person will not be related to any student, staff member, board member, anyone applying to the school, or an NHA employee.

Students will be randomly selected until all offered seats have been filled. Any remaining students will be randomly selected to establish waiting list priority used to fill available offered seats prior to and during the school year for which the student applied. After all eligible students have been randomly selected, the school will add the names of applicants who submitted applications after the Open Enrollment Period in the order in which they were received.

The random selection process will be video recorded. In the event of any discrepancy, the video recording will be the official record of placement of students.

Procedural Steps for the Random Selection Process

Step 1: Setup

A list with the name of each student who submitted an eligible application during the Open Enrollment Period will be created. The list will include, but not be limited to, the student's name, birth date, grade level to which the student is applying, street address, and names and grade levels of any siblings who are also applying for admission to the school.

Step 2: Admission of Applicants

A neutral third-party person (as previously described) will witness the electronically random selection of the names of each applicant. Any grades that will not be filled to capacity in the lottery will be considered before other grades in descending order. After all these grades have been identified, the order of the grades that will be filled to capacity in the lottery will be randomly selected.

Once the grade order has been established, randomly selected students will be placed in available seats or on the waiting list in the applying grade if an offered seat is not available. If the selected student is accepted and has siblings who are also applying for admission, the siblings will be accepted if there are offered seats available or placed on the waiting list with sibling preference if offered seats are not available. If the selected student is placed on the waiting list and has siblings who are also applying, the siblings' names will not be selected at this time or granted sibling preference but will wait until their grade level is selected.

Other preferences will be incorporated as detailed in Enrollment Preferences.

PRACTICES AND PROCEDURES: ADMISSIONS AND ENROLLMENT (MI K-12 Schools)

Step 3: Waiting List Priority

Students will continue to be randomly selected until all are selected. After a grade level's seats are full, all remaining students will be placed on the waiting list in the order in which they are selected. Applications received after the Open Enrollment Period will be added to the end of the waiting list for the appropriate grade in the order in which they were received.

Class Size and Offered Seats

Class size and offered seats will be recommended by NHA and submitted to the school Board for approval. In order to make provision for student attrition (reenrolling students who indicate that they are coming back but do not return on the first day of school) and erosion (new students who have been accepted for offered seats but are absent without excuse on the first day of school), the school may over-subscribe grades. The number of students to be over-subscribed will be determined based on historical and forecasted attrition and erosion.

In addition, the number of classrooms may fluctuate in the event the number of students enrolled warrants the increase or decrease in number of classrooms. The number of students in any particular grade and/or the number of students within a class may vary for the purpose of accommodating staffing exigencies and attrition patterns.

In no event will over-subscription, fluctuations in the number of classrooms or variations in the number of students in a grade or class result in a violation of any provision or limit contained within the school's charter contract or applicable law.

The school's openings by grade level change daily and will be posted at the lottery. Parents can contact the school registrar to obtain updates.

Enrollment Preferences

Enrollment preference is first given to currently enrolled students. Next preference is given to the following ordered categories of applicants: siblings of currently enrolled students, qualifying students pursuant to matriculation agreements (if applicable), siblings of qualifying students (if applicable), siblings of students selected in the random selection process, children of staff members (at least .5 FTE) or current board members, all remaining applicants.

If permitted by law, other enrollment preferences may be granted.

Siblings are defined as a student who is a sibling of an Accepted or Enrolled student who has at least one common parent/legal guardian and is living in the same household at least 50% of the time. If a student is selected for a grade level that still has offered seats available and the student has a sibling applying for a grade that no longer has offered seats available, the student will be accepted for his/her grade level and the student's sibling will be placed on the waiting list for his/her grade level with sibling preference. Therefore, while sibling preference applies, siblings are not guaranteed a seat.

Accepting a Seat

Prior to the start of school, accepted students must confirm their intent to attend the school within two weeks of acceptance by returning certain initial forms, including an Admissions Form, Official Release of Records Form, and proof of residency documentation (individual schools may choose to offer a defined grace period). One month prior and throughout the school year, the process will be accelerated and families will have 24 business hours to verbally accept the seat.

The school will send a reminder to all parents/guardians that if the student does not attend the first day of school or call in to request an excused absence by the date and time indicated, the student will forfeit his/her registered status in the school and will not be enrolled. The school may attempt to

PRACTICES AND PROCEDURES: ADMISSIONS AND ENROLLMENT (MI K-12 Schools)

contact all applicants who have not responded to inquire whether the applicant is still planning to attend. If families do not respond within the deadline specified in the acceptance letter or decline the seat by contacting the school, the seat will be filled by the next person on the waiting list. The declining family will need to reapply if they change their mind.

Waiting List Policy

The school will keep accurate records of their waiting list containing the names home addresses, telephone numbers and grade levels of students. All applicants on a waiting list must re-submit an application for the following school year beginning in the next Open Enrollment Period.

When a seat becomes available in a particular grade due to attrition, erosion, or other event, if that particular grade has a waiting list, that available seat will be filled by the first student on the waiting list. If a waiting list does not exist for that particular grade, but exists for another grade, the school may (subject to applicable enrollment limits and board approved offered seats) fill the available seat using the first student on the waiting list in a different grade, the grade deemed most beneficial to student and school considering class size, teacher capacity, and other school operational factors.

Communication Prior to the First Day

As part of the enrollment process, the school staff will communicate or meet with families, parents/guardians, and students prior to the first day of school. The school will send all applicants a reminder communication to inform parents/guardians of the importance of being present on the first day of school. If the student does not attend the first week of school or call in to request excused absences by the date and time indicated on the reminder, the student will forfeit his/her accepted or registered status in the school and will not be enrolled. The school may attempt to call all applicants who have not responded to inquire whether the applicant is still planning to attend.

Re-Enrolling No Shows

If a student does not attend and the student's family does not respond to communication from the school during this period of absence, the student shall be removed from the student list. The school will make every effort to reach absent students during the first few weeks of school and will fill vacant seats in accordance with the process outlined above.

Withdrawal Process

Students may be withdrawn from the school at any time in accordance with the procedure outlined below. Only the enrolling custodial parent/guardian may withdraw a student.

1. The school will verify that the withdrawing parent/guardian is the custodial parent/guardian.
2. The withdrawing parent/guardian must complete a withdrawal form and provide a signature to confirm the withdrawal decision.
3. The school will confirm receipt of the completed withdrawal form and signature and may follow up with the parent to further discuss the nature of the withdrawal. If resolution is not made as a result of the follow up conversation, the school will remove the student from the school's roster.

Appeals

Any parent or guardian may contest or appeal the random selection process, in writing, to the school's board of directors within 30 days of the lottery date. The bases for an appeal include the violation of law or written policy or material error in the application of the Enrollment and Admission policy. Following receipt of the parent's/guardian's written appeal, a school board designee will contact the parent/guardian to discuss the nature of the concern or objection. Final decisions will be made by the school board or its designee.

Name:	Owner/Dept:	Date Last Updated:
McKinney-Vento Child Practices & Procedures	Sarah Vogel Curriculum & Instruction	June 17, 2020

1. PURPOSE

To remove barriers to the enrollment and retention in school of children and youth experiencing homelessness in compliance with the McKinney-Vento Homeless Education Assistance Act (42 U.S.C. §11301 et seq.) ("McKinney-Vento Act").

2. PRACTICE

The school will adhere to the provisions of the McKinney-Vento Act and applicable state requirements to ensure that all identified Homeless Children and Unaccompanied Youth enrolled in or being considered for enrollment in the district receive a free and appropriate education and meaningful opportunities to succeed in the school. This includes identified Homeless children eligible for pre-kindergarten programming.

Definitions

“Homeless Child” - a child who does not have a fixed, regular, and adequate nighttime residence or whose primary nighttime location is in a public or private shelter designated to provide temporary living accommodations, or a place not designed for, or ordinarily used as regular sleeping accommodations for human beings. This definition includes a child who is:

- sharing the housing of other persons due to loss of housing, economic hardship or similar reason (sometimes referred to as double-up);
- living in motels, hotels, trailer parks, or camping grounds due to the lack of alternative adequate accommodations;
- living in a car, park, public space, abandoned building, substandard housing, bus or train stations or similar settings;
- abandoned in hospitals;
- a migratory child who qualifies as homeless because he or she is living in circumstances described above; or
- an Unaccompanied Youth.

“School of Origin” – the public school, including a preschool or a charter school, the child attended when permanently housed or the school in which the child was last enrolled. When the child completes the final grade, level served by the School of Origin, this definition shall include the designated receiving school at the next grade level.

“Unaccompanied Youth” - a youth not in the physical custody of a parent or guardian who meets the definition of homeless.

3. APPLICABILITY

This document applies to all National Heritage Academies (NHA) schools.

4. RESPONSIBILITY

- 4.1 The school principal will designate a local homeless Liaison (“Liaison”). The Liaison’s name and role will be posted in the front office and updated as necessary.

Name:	Owner/Dept:	Date Last Updated:
McKinney-Vento Child Practices & Procedures	Sarah Vogel Curriculum & Instruction	June 17, 2020

4.2 The Liaison will serve as one of the primary contacts between homeless families and school staff, district personnel, shelter workers, state coordinators for Homeless Children, public and private service providers in the community, housing and placement agencies, and other service providers.

4.3 The Liaison will ensure that:

- Homeless Children are identified by school personnel and through coordination activities with other entities and agencies;
- Ensure that Homeless Children are immediately enrolled in and have full and equal opportunities to succeed in the school;
- Ensure that Homeless Children and their families receive eligible educational services;
- Make referrals to housing, health, mental health, dental, and other services;
- Inform parents/guardians of educational and related opportunities available to their children;
- Inform Unaccompanied Youths of their status as independent students under section 480 of the Higher Education Act of 1965 and their right to receive verification of this status;
- Provide parents/guardians with meaningful opportunities to participate in their child's education;
- Inform parents/ guardians and Homeless Children of all transportation services, and assist them in accessing these services;
- Clearly communicate all required information in a form, manner, and language that is understandable;
- Ensure proper mediation of enrollment disputes according to the McKinney-Vento Act and complaint procedures;
- Assist the requestor in commencing an appeal pursuant to applicable law;
- Disseminate public notice of the educational rights of Homeless Children;
- Conduct annual training for school personnel on possible indicators of homelessness, sensitivity in identifying Homeless Children, and procedures for reporting to the Liaison; and
- Record *myNHA* information in coordinator with the registrar;

5. PROCEDURES

5.1 Identification

The school has an affirmative obligation to identify students in temporary housing. The Liaison, in collaboration with school personnel and community organizations, will identify Homeless Children, both in and out of school. Community organizations may include family and youth shelters, soup kitchens, motels, campgrounds, drop-in centers, welfare departments and other social service agencies, street outreach teams, faith-based organizations, truancy and attendance officers, local homeless coalitions, and legal services.

The Liaison must use the Student Residency Questionnaire ("SRQ") upon enrollment of any student and all students whose address changes during the school year, and the provided response must clearly describe current living arrangements of the child to determine whether the child meets the definition of a Homeless Child. Upon the receipt of an SRQ indicating potential homelessness, the Liaison will implement this practices and procedures document and ensure adherence with federal, state and NHA requirements.

Name:	Owner/Dept:	Date Last Updated:
McKinney-Vento Child Practices & Procedures	Sarah Vogel Curriculum & Instruction	June 17, 2020

New York schools only: Upon determination of appropriate school selection, the parent (or Liaison if no parent is available) will complete the New York STAC-202 form, following the instructions contained therein. Upon receipt of the STAC-202 form, the Liaison will forward the form to the New York Office of STAC & Special Aids Unit (New York State Education Department, Room 415, Education Building, Albany, NY 12234), Intervention Services at the NHA Service Center, and keep a copy in the school's records.

5.2 School Selection

Homeless Children have the right to remain at their School of Origin or to attend any school in the attendance area in which students are actually living. After a child becomes permanently housed, the child has the right to remain enrolled in, and continue receiving transportation to the school of origin for the duration of homelessness, through the remainder of the school year in which the student becomes permanently housed, and possibly an additional year if it is the student's terminal grade;

If the parent/guardian agrees, Homeless Children will remain at their School of Origin to the extent it aligns with the best interests of the child. Homeless Children may remain at their School of Origin the entire time they are in transition and until the end of any academic year in which they become permanently housed. The same applies if they lose their housing between academic years.

Best interest of the child is a child-centered determination, based on the needs and interests of the particular child and the parent/guardian or child's wishes. It must be presumed that keeping the child in the School of Origin is in the child's best interest, except when doing so is contrary to the request of the child or parent/guardian. Services that are required to be provided, including transportation and services under federal and other programs, shall not be considered in determining best interest. Best interest of the child considerations may include the impact of mobility on:

- Achievement
- Education
- Health
- Safety

If, after weighing these considerations, the liaison determines it is not in the Homeless Child's best interest to attend their School of Origin, the Liaison must provide the parent, guardian, or Unaccompanied Youth with a written explanation of the reasons for its determination and outlining the right to appeal.

The written explanation should include:

- A description of the action proposed or refused by the school;
- An explanation of why the action is proposed or refused;
- The reasons why any other options were rejected;
- A description of any other factors relevant to the school's decision and information related to the eligibility or best interest determination including the facts, witnesses, and evidence relied upon and their sources;
- Appropriate timelines to ensure any relevant deadlines are not missed including notice that families and students have 30 days to appeal; and
- Contact information for the local liaison and State Coordinator, and a brief description of the roles.

Name:	Owner/Dept:	Date Last Updated:
McKinney-Vento Child Practices & Procedures	Sarah Vogel Curriculum & Instruction	June 17, 2020

5.3 Enrollment

The school selected for enrollment must immediately enroll any Homeless Child. Unaccompanied Youth may either enroll themselves or be enrolled by a parent, non-parent caretaker, older sibling, or the Liaison. Enrollment may not be denied or delayed due to the lack of any document normally required for enrollment, (i.e. previous academic records, records of immunization, proof of residency, proof of guardianship, birth certificates), any unpaid school fees, lack of uniforms or clothing that conforms to the school's dress code or any factor related to the child's living situation.

The school will coordinate the transfer of school records with other districts and contact the child's previous school to obtain school records. Initial placement of a child whose records are not immediately available will be made based on the child's age and information gathered from the child, parent, and previous schools or teachers. Student will receive full or partial credit based on the information provided from the previous school or for coursework completed, as appropriate. If no immunization records are available, the school office will refer students to the Liaison to assist with obtaining these records from state registries and/or community-based clinics.

The school will excuse any tardiness or absence related to a Homeless Child's living situation when applying any school policy regarding tardiness or absences.

5.4 Services

The school must provide Homeless Children services, for which they meet the relevant criteria, comparable to services offered to other students in the school, including but not limited to:

- Transportation;
- Title I;
- Educational services for which the student meets eligibility criteria, including special education and related services and programs for English language learners;
- School nutrition programs (the school will provide free meals to the Homeless Child as all Homeless Children are automatically eligible for free meals);
- Vocational and technical education programs;
- Gifted and talented programs;
- Before- and after-school programs; and
- Other extra-curricular activities

Transportation

The Liaison will coordinate transportation arrangements, which may include arrangements with the social service district. The school must provide the transportation for the entire time the child has a right to attend that school, as defined above, including during pending disputes. The length of the commute will only be considered when making the *best interest of the child* determination in regards to potential harm to the child (New York Only: or up to 50 miles each way, even if such services are not available to student who are permanently housed).

Prior to selection of a school, the Liaison will inform the parent/guardian or Unaccompanied Youth of this right to transportation. Transportation disputes will not result in a Homeless Child

Name:	Owner/Dept:	Date Last Updated:
McKinney-Vento Child Practices & Procedures	Sarah Vogel Curriculum & Instruction	June 17, 2020

missing school. If such a dispute arises, the school will arrange transportation and immediately bring the matter to the attention of the state authorities following the appropriate complaint procedures as detailed in this document.

Transportation is provided at a parent/guardian's or Unaccompanied Youth's request to the school of origin for students who are homeless, including preschool students if applicable, for the duration of homelessness, through the remainder of the school year in which the student becomes permanently housed, and possibly an additional year if it is the student's terminal grade.

Transportation is provided for students who are homeless to participate in extra-curricular activities and summer school if the lack of transportation poses a barrier.

Title I

Homeless Children are automatically eligible for Title I services and remain eligible after becoming permanently housed for the remainder of the school year. The school will reserve the necessary funds to provide services comparable to those provided to Title I students attending non-participating schools, including education related support services and removing barriers that prevent attendance as necessary through the provision of additional reasonable services after other funding sources have been exhausted. The Liaison and the Title I director at the NHA Service Center will develop the formula (based upon the per-pupil Title I expenditures) to use for determining the necessary funds to reserve.

The Title I director and the Liaison will ensure coordination between the Title I plan and the McKinney-Vento Act, including the academic assessment, reporting and accountability systems required by federal law and the U.S. Department of Education.

Educational Services

The school shall give evaluations of Homeless Children suspected of having a disability priority and coordinate the evaluation with the student's prior and subsequent schools, as necessary, to ensure timely completion of a full evaluation. When necessary, the school will expeditiously designate a surrogate parent for Unaccompanied Youth suspected of having a disability. The school will immediately implement the child's Individualized Education Program (IEP), if available, and promptly conduct any necessary IEP meetings or re-evaluations. If complete records are not available, IEP teams will use good judgment in choosing the best course of action, balancing procedural requirements and the provision of services in an attempt to avoid any disruption in services.

Beginning in the 2017-2018 school year, and continuing thereafter, each NHA school's annual report card must include information on student achievement regarding State assessments, disaggregated by student status, to include students who are homeless, in foster care, and students with parents serving on active duty within the armed forces (ESEA Section 1111(h)(1)(C)(ii).

5.5 Complaint and Dispute Resolution

The following steps and procedures should take place in resolving disputes regarding enrollment, school placement, or services.

Complaints & Appeals

Name:	Owner/Dept:	Date Last Updated:
McKinney-Vento Child Practices & Procedures	Sarah Vogel Curriculum & Instruction	June 17, 2020

- A complaint is either an oral or written and signed statement alleging the violation of a federal or state law, rule, or, regulation. The complaint must allege a violation that occurred not more than one (1) year prior to the date that the complaint is received, unless a longer period is reasonable because the violation is considered systemic or ongoing.
- Parents, teachers, administrators, or other concerned individuals or organizations may file a complaint (“Complainant”). Faculty and staff with knowledge of a complaint must refer the Complainant to the Liaison.
- The Complainant may submit the complaint in writing to the Liaison, using the attached Complaint Resolution Initiation Form. The Complainant may choose to initiate the complaint orally. Submission of complaints may take place at the Liaison’s office, the front office, or the principal’s office.
- An appeal is an oral or written and signed statement requesting a review of a previously submitted complaint. If the Complainant is not satisfied with the final resolution from the district regarding a complaint, s/he has the right to notify the school within two (2) school business days of his/her intent to appeal the decision with the principal using the Request to Appeal form which shall be attached to the Written Notification of Decision form.
- The final decision regarding a second appeal lies with the principal. Upon receiving the principal’s decision, if the Complainant is not satisfied with the proposed resolution, an appeal may be made in accordance with the state’s designated appeal process, as outlined below.

Role of School

- Immediately enroll the child in the school preferred by the person(s) bringing the complaint.
- Provide all educational services the child is eligible for, pending resolution of the dispute.

Role of Liaison

- After receipt of the complaint, the Liaison must immediately notify the principal and other necessary parties that the dispute process has been initiated.
- Within one (1) school business day of a complaint being filed, the Liaison shall provide a printed copy of a Complainant’s rights, including the right to appeal.
- Upon receipt of a complaint, the Liaison must provide a written explanation of the school placement decision and/or provided services to the Complainant using the attached Written Notification of Decision form and discuss the complaint with the Complainant and the Complainant’s right to appeal the decision.
- . The Liaison must provide a written proposed resolution or a plan of action to the Complainant within five (5) days of receipt of the complaint, or within seven (7) business days of notification of dispute (Georgia only).
- If the Liaison does not resolve the dispute, the Complainant has the right to submit a written or verbal appeal to the school principal regarding the decision, using the attached Request to Appeal form. The Principal and Liaison must provide a written resolution to the parties within five (5) days of the discussion with the principal, or within ten (10) business days of the second dispute (Georgia only). The Complainant has a right to obtain assistance from advocates or attorneys in addressing a complaint.

Name:	Owner/Dept:	Date Last Updated:
McKinney-Vento Child Practices & Procedures	Sarah Vogel Curriculum & Instruction	June 17, 2020

- The Liaison will carry out the dispute resolution in an expeditious manner and will provide the Complainant these written procedures, including the appeal procedures outlined below upon initiation of a complaint or appeal.
- In the event the school is unable to resolve the complaint, the Complainant may pursue the applicable appeal procedure(s) with the State Homeless Coordinator.

Appeal Procedures – Colorado

If the dispute is not resolved at the school level, the Liaison will assist the Complainant in contacting a mediator from the Colorado Mediator Resource Network (services at no charge to the Complainant) or may direct the Complainant to the Colorado Department of Education (CDE).

Address the complaint to the following address:

- State Coordinator for the Education of Homeless Children and Youth, Colorado Department of Education, State Office Building, 201 East Colfax Avenue, Denver, Colorado 80203-1799.

Use the Colorado Dispute Resolution Form during the appeal process.

The complaint should include:

- the name, address, and telephone number of the person filing the appeal;
- the relationship or connection of the person to the child in question;
- the name and age of the child involved;
- the name of the school and school personnel involved in the complaint;
- a description of how the School violated the McKinney-Vento Act;
- the date on which the violation occurred;
- the federal requirement alleged to have been violated;
- a description of the situation that prompted the complaint;
- a description of the attempts that were made to solve the issue;
- contact information for the Liaison and potential witnesses;
- supporting documentation; and
- the relief the person is seeking.

If the State Coordinator is unable to resolve the complaint within 15 business days, the Complainant may file a written complaint to the State Coordinator who, with a team, will review the complaint with the mandates of the Title X law. Within 15 days of receipt of the complaint, the Coordinator will issue a written decision to the parties via mail.

Appeal Procedures – Georgia

If the dispute is not resolved at the school level, the Complainant may direct the complaint to the Georgia Department of Education state homeless coordinator. The Liaison may assist the Complainant in contacting the Department. The complaint may be made either in writing or submitted electronically through the Department's online complaint process.

Name:	Owner/Dept:	Date Last Updated:
McKinney-Vento Child Practices & Procedures	Sarah Vogel Curriculum & Instruction	June 17, 2020

Address the complaint to the following address:

- Georgia Department of Education, Legal Services Division,
2052 Twin Towers East, 205 Jesse Hill, Jr. Drive, SE, Atlanta, Georgia 30334

The complaint should include:

- the name, address, and telephone number of the person filing the appeal;
- the relationship or connection of the person to the child in question;
- the name and age of the child involved;
- the name of the school and school personnel involved in the complaint;
- a description of how the School violated the McKinney-Vento Act;
- the date on which the violation occurred;
- the federal requirement alleged to have been violated;
- a description of the situation that prompted the complaint;
- a description of the attempts that were made to solve the issue;
- contact information for the Liaison and potential witnesses;
- supporting documentation; and
- the relief the person is seeking.

Appeal Procedures – Indiana

If the dispute is not resolved at the school level, the Complainant may direct the complaint to the Indiana Department of Education (IDOE). Complaints made under this process must be in writing and signed by the Complainant.

If the complaint involves enrollment or school placement of homeless children, address the complaint to the following address:

- Indiana McKinney-Vento Homeless Education State Coordinator, Indiana Department of Education, 115 W. Washington Street South Tower, Suite 600, Indianapolis, Indiana 46204.

The complaint should include:

- the name, address, and telephone number of the person filing the appeal;
- the relationship or connection of the person to the child in question;
- the name and age of the child involved;
- the name of the school and school personnel involved in the complaint;
- the federal requirement alleged to have been violated;
- a description of the situation that prompted the complaint;
- a description of the attempts that were made to solve the issue;
- supporting documentation; and
- the relief the person is seeking.

The IDOE will issue a letter of acknowledgement to the Complainant and the Liaison containing, among other things, the IDOE's commitment to issue a resolution in the form of a *Letter of Findings*.

Name:	Owner/Dept:	Date Last Updated:
McKinney-Vento Child Practices & Procedures	Sarah Vogel Curriculum & Instruction	June 17, 2020

An IDOE complaint investigator will conduct an independent review of all relevant information and issue the *Letter of Findings* to the Complainant within thirty (30) days of receipt of a complaint, absent exceptional circumstances.

Appeal Procedures – Louisiana

If the dispute is not resolved at the school level, the Liaison will assist the Complainant in contacting the local (EBR) Liaison for assistance with the appeal process. In the event the dispute is not resolved at the (EBR) Liaison level, the Complainant may contact the State Coordinator to hear an appeal of the Local (EBR) Liaison's decision.

Address the complaint to the following address:

- State Coordinator – Homeless Education, Louisiana Department of Education, Office of School & Community Support, P.O. Box 94064, Baton Rouge, Louisiana 70804.

The complaint should include:

- the name, address, and telephone number of the person filing the appeal;
- the relationship or connection of the person to the child in question;
- the name and age of the child involved;
- the name of the school and school personnel involved in the complaint;
- the federal requirement alleged to have been violated;
- a description of the situation that prompted the complaint;
- a description of the attempts that were made to solve the issue;
- supporting documentation; and
- the relief the person is seeking.

The DOE will acknowledge receipt of the complaint in writing to the Complainant and provide written resolution of the complaint within 60 days of the date the DOE receives the complaint. The decision will include a breakdown of the findings, the reasons for the final decision, and the Complainants right to request the Secretary of the U.S. Department of Education to review the final decision of the DOE, at the Secretary's discretion.

Appeal Procedures – Michigan

If the dispute is not resolved at the school level, the Complainant may direct the complaint to the Michigan Department of Education. Complaints made under this process must be in writing and signed by the Complainant. The complaint may be submitted electronically or mailed to the address listed out below.

Address the complaint to the following address:

- State Coordinator for Homeless Education, Michigan Department of Education, Office of Field Services, Special Populations Unit, P.O. Box 30008, Lansing, MI 48909.

Name:	Owner/Dept:	Date Last Updated:
McKinney-Vento Child Practices & Procedures	Sarah Vogel Curriculum & Instruction	June 17, 2020

- The complaint should include:
 - the name, address, and telephone number of the person filing the appeal;
 - the relationship or connection of the person to the child in question;
 - the name and age of the child involved;
 - the name of the school and school personnel involved in the complaint;
 - the federal requirement alleged to have been violated;
 - a description of the situation that prompted the complaint;
 - a description of the attempts that were made to solve the issue;
 - supporting documentation; and
 - the relief the person is seeking.

The State Homeless Coordinator will gather needed information from statements of the parties involved and will forward the information within five (5) school days to three regional McKinney-Vento staff.

Within five (5) school days the regional staff will review the documentation and use the MDE Dispute Review Form to submit a summary, concerns, and recommendations to the State Coordinator.

Within two (2) school days of receiving the regional reviews, the State Coordinator will render a decision and notify the Complainant.

If the complaint is not resolved in a satisfactory manner by the State Coordinator, the final appeal shall be directed to the OFS Special Populations Manager by the Complainant. Appeals under this process must be made in writing and signed by the Complainant.

Within five (5) school days after receiving the regional reviews, the OFS Special Populations Manager will render a final decision and notify the Complainant. There are no federal level appeals for McKinney-Vento disputes through USDOE.

Appeal Procedures – North Carolina

The local Liaison shall expeditiously carry out the dispute resolution process within 15 school business dates, or 30 calendar days, whichever is less. If the dispute is not resolved at the school level, the Complainant may direct the complaint, orally or written, to the North Carolina Department of Public Instruction within three (3) school business days of the school's final decision.

Address the complaint to the following address:

- State Coordinator for Homeless Education, National Center for Homeless Education, SERVE Center at UNCG, 5900 Summit Avenue, Ste. 201, Browns Summit, NC 27214.

Name:	Owner/Dept:	Date Last Updated:
McKinney-Vento Child Practices & Procedures	Sarah Vogel Curriculum & Instruction	June 17, 2020

The complaint should include:

- the name, address, and telephone number of the person filing the appeal;
- the relationship or connection of the person to the child in question;
- the name and age of the child involved;
- the name of the school and school personnel involved in the complaint;
- the federal requirement alleged to have been violated;
- how the requirement has been violated;
- supporting documentation; and
- the relief the person is seeking.

If the State Coordinator receives an appeal that is not complete, the Coordinator shall contact the person making the appeal and the local liaison, explain the deficiency, and offer the person the opportunity to complete the appeal.

The Liaison will provide the State Homeless Coordinator with any information that the State Homeless Coordinator requests regarding the issues presented in the appeal.

The State Homeless Coordinator will provide the school and the Complainant the opportunity to respond to any decision made and to provide any additional evidence the Complainant deems relevant within three (3) school business days.

Within 10 school business days following receipt of the complete appeal, the State Coordinator shall issue a final written decision to the school and the Complainant.

Appeal Procedures – New York

DISPUTE RESOLUTION PROCESS

The school has established the following procedures for the prompt resolution of disputes regarding school selection or enrollment of a homeless child or youth:

- The school will provide a written explanation, including a statement regarding the right to appeal, to the parent or guardian of a student in temporary housing, or to an unaccompanied youth if the school determines that the school is not required to either enroll and/or transport such child or youth to the school of origin or a school requested by the parent or guardian or unaccompanied youth, or if there is a disagreement about a child's or youth's status as a homeless child or unaccompanied youth. The written explanation will be in a manner and form understandable to such parent, guardian, or unaccompanied youth and will include a statement regarding the McKinney-Vento liaison's availability to help the parent, guardian, or unaccompanied youth with any appeal and the contact information for the liaison.
- The school will immediately enroll the student in the school in which enrollment is sought by the parent or guardian or unaccompanied youth, provide transportation to the school, and will delay for 30 days the implementation of a final determination to decline to either enroll in and/or transport the student in temporary housing to the school of origin or a school requested by the parent or guardian or unaccompanied youth

Name:	Owner/Dept:	Date Last Updated:
McKinney-Vento Child Practices & Procedures	Sarah Vogel Curriculum & Instruction	June 17, 2020

- If the parent or guardian of a student in temporary housing or unaccompanied youth commences an appeal to the Commissioner within 30 days of such final determination, the student will be permitted to continue to attend the school he or she is enrolled in at the time of the appeal and/or receive transportation to that school pending the resolution of all available appeals.

MCKINNEY-VENTO LIAISON'S DISPUTE RESOLUTION RESPONSIBILITIES

The school's McKinney-Vento liaison must assist the student in temporary housing's parent or guardian or unaccompanied youth in bringing an appeal to the Commissioner under Education Law §310 of a final school district decision regarding enrollment, school selection and/or transportation. In the event of a dispute regarding eligibility, enrollment, school selection, and/or transportation, the school's McKinney-Vento liaison will:

- provide the parent or guardian or unaccompanied youth with a copy of the form petition, which is available at: <http://www.counsel.nysed.gov/appeals/homelessForms>;
- assist the parent or guardian or unaccompanied youth in completing the form petition;
- arrange for the copying of the form petition and supporting documents for the parent or guardian or unaccompanied youth, without cost to the parent or guardian or unaccompanied youth;
- accept service of the form petition and supporting papers on behalf of any school district employee or officer named as a party or the school district if it is named as a party or arrange for service by mail by mailing the form petition and supporting documents to any school district employee or officer named as a party and, if the school district is named as a party, to a person in the office of the superintendent who has been designated by the board of education to accept service on behalf of the school district;
- provide the parent or guardian or unaccompanied youth with a signed and dated acknowledgment verifying that the McKinney-Vento liaison has received the form petition and supporting documents and will either accept service of these documents on behalf of the school district employee or officer or school district or effect service by mail by mailing the form petition and supporting documents to any school district employee or officer named as a party and, if the school district is named as a party, to a person in the office of the superintendent who has been designated by the board of education to accept service on behalf of the school district;
- transmit on behalf of the parent or guardian or unaccompanied youth, within five days after the service of, the form petition or any pleading or paper to the Office of Counsel, New York State Education Department, State Education Building, Albany, New York 12234;
- provide the parent or guardian or unaccompanied youth with a signed and dated acknowledgement verifying that the McKinney-Vento liaison has received the form petition and supporting documents and will transmit these documents on behalf of the parent, guardian or unaccompanied youth to the Office of Counsel, New York State Education Department, State Education Building, Albany, New York 12234;
- accept service of any subsequent pleadings or papers, including any correspondence related to the appeal, if the parent or guardian or unaccompanied youth so elects. The liaison must also make such correspondence available to the parent or guardian or unaccompanied youth; and

Name:	Owner/Dept:	Date Last Updated:
McKinney-Vento Child Practices & Procedures	Sarah Vogel Curriculum & Instruction	June 17, 2020

- maintain a record of all appeals of enrollment, school selection, and transportation determinations.

Appeal Procedures – Ohio

If the dispute is not resolved at the school level, the Complainant may direct the complaint to the Ohio Department of Education. Complaints made under this process must be in writing and signed by the Complainant.

Address the complaint to the following address:

- Homeless Education Coordinator, Ohio Department of Education, 25 S. Front Street, Mail Stop 404, Columbus, Ohio 43215.

The complaint should include:

- the name, address, and telephone number of the person filing the appeal;
- the relationship or connection of the person to the child in question;
- the name and age of the child involved;
- the name of the school and school personnel involved in the complaint;
- the federal requirement alleged to have been violated;
- a description of the situation that prompted the complaint;
- a description of the attempts that were made to solve the issue;
- supporting documentation; and the relief the person is seeking.
- The Homeless Education Coordinator will recommend a decision to the Complainant and the Liaison. If unresolved, the Complainant may file a final appeal to the State Superintendent of Public Instruction for review and disposition.

Written Notification of Decision

This form is to be completed by the school when a disagreement arises between the school and a parent, guardian, or unaccompanied youth over McKinney-Vento eligibility, school selection, or enrollment in a school.

July 13, 2020

Name of school: _____

In compliance with 42 U.S. C. § 11432(g)(3)(E) of the McKinney-Vento Homeless Assistance Act, the following written notification is provided to:

Name of Parent(s)/Guardian(s): _____

Name of Student(s): _____

After reviewing your request regarding eligibility, school selection, or enrollment in a school for the student(s) listed above, the request is denied. This determination was based upon:

You have the right to appeal this decision by completing the attachment of this form or by contacting the school district's local homeless education liaison. You must notify the Local Liaison of your intent to submit an appeal within two (2) school business days of the date posted on this notification.

Local Liaison:

Phone:

Email:

Address:

Role: Responsible for ensuring the district fully implements the McKinney-Vento Act; including proper mediation of disputes in accordance with state guidance and NHA complaint procedures.

State Coordinator:

Phone:

Email:

Address:

Role: Ensures effective implementation of and compliance with the McKinney-Vento Homeless Assistance Act in public schools throughout the state. Includes resolving appeals brought to the state for review.

In addition:

- The student listed above has the right to enroll immediately and participate fully in all school activities at the requested school pending the resolution of the dispute. If enrolled in the local attendance area school or the school of origin, the student has the right to receive free transportation pending resolution of the dispute.
- You may provide written or verbal communication(s) to support your position regarding the student's enrollment in the requested school. You may use the form attached to this notification.
- You may seek the assistance of advocates or an attorney.

Name:	Owner/Dept:	Date Last Updated:
McKinney-Vento Child Practices & Procedures	Sarah Vogel Curriculum & Instruction	June 17, 2020

- You may contact the State Coordinator for Homeless Education if further help is needed or desired.
- If you are not satisfied with the final decision regarding enrollment, you may appeal the decision, within three school business days after the final decision, to the State Coordinator through an oral or written appeal to the State Coordinator, including:
 - your name, physical address if available, e-mail address, and telephone number;
 - your relationship or connection to the child in question;
 - the name of the school system and the specific school in question;
 - the federal requirement alleged to have been violated;
 - how the requirement has been violated; and
 - the relief you are seeking.

Relation to student(s): _____

I may be contacted at (phone or e-mail): _____

I wish to the appeal the enrollment decision made by: _____

Name of School: _____

I have been provided with (please check all that apply):

_____ A written explanation of the school's decision.

_____ The contact information of the school district's local homeless liaison.

_____ A copy of the state's dispute resolution process for students experiencing homelessness.

_____ A copy of the state's appeal process for students experiencing homelessness.

_____ A copy of the district's Dispute Resolution Process which includes the timeline for making an initial appeal.

Optional: You may include a written explanation in the space below to support your appeal or you may provide your explanation verbally.

Yes, the school provided me with a copy of this form when I submitted it. _____ (Initial/date)

AMENDMENT NO. 14

to the
July 1, 2016 Contract to Charter
A School of Excellence and Related Documents

Issued To

SOUTH ARBOR CHARTER ACADEMY
(A SCHOOL OF EXCELLENCE)

By

THE CENTRAL MICHIGAN UNIVERSITY
BOARD OF TRUSTEES
(AUTHORIZING BODY)

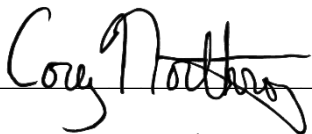

CONTRACT AMENDMENT NO. 14

SOUTH ARBOR CHARTER ACADEMY

In accordance with Article IX of the Terms and Conditions of the Contract (the "Contract"), dated July 1, 2016, issued by the CENTRAL MICHIGAN UNIVERSITY BOARD OF TRUSTEES (the "University Board") to SOUTH ARBOR CHARTER ACADEMY (the "Academy"), as amended, the parties agree to further amend the Contract as follows:

- 1.) Amend the Terms and Conditions of Contract by replacing the language contained within Article X, Section 10.4. Grounds and Procedures for Academy Termination of Contract and Section 10.5. Grounds and Procedures for University Termination of Contract, with the corresponding language attached as Tab 1.
- 2.) Amend Schedule 2: Amended Bylaws, by replacing the language contained within Article XIII, Section 6. Contracts Between Corporation and Related Persons, with the language attached as Tab 2.

This entire amendment is hereby approved by the University Board and the Academy Board through their authorized designees, and shall have an effective date of July 1, 2024.

Dated: 06/20/2024

By: Corey R. Northrop, Executive Director
The Governor John Engler Center for Charter Schools
Designee of the University Board

South Arbor Charter Academy

Contract Amendment No. 14

Tab 1

Section 10.4. Grounds and Procedures for Academy Termination of Contract. The Academy Board, by majority vote of its Directors, may, at any time and for any reason, request termination of this Contract. The Academy Board's request for termination shall be made to the Center Director not less than six (6) calendar months in advance of the Academy's proposed effective date of termination. Upon receipt of an Academy request for termination, the Center Director shall present the Academy Board's request for termination to the University Board. A copy of the Academy Board's resolution approving of the Contract termination, including a summary of the reasons for terminating the Contract, shall be included with the Academy Board's request for termination. After receipt of the Academy Board's request for termination, the University Board shall consider the Academy's request no later than its next regularly scheduled meeting. The University Board shall make a final determination and vote on the proposed termination request within 90 days of receipt of the request from the Academy. The University Board may, in its sole discretion, waive the six (6) month advance notice requirement for terminating this Contract.

Section 10.5. Grounds and Procedures for University Termination of Contract. The University Board, in its sole discretion, reserves the right to terminate the Contract (i) for any reason or for no reason provided that such termination shall not take place less than six (6) months from the date of the University Board's action; (ii) if there is a change in Applicable Law that the University Board, in its sole discretion, determines impairs its rights and obligations under the Contract or requires the University Board to make changes in the Contract that are not in the best interest of the University Board or the University; or (iii) if exigent circumstances exist that the University Board determines, in its sole discretion, that termination of this Contract is required to protect the health, safety, or welfare of the Academy students, property, or funds that cannot be cured in a reasonable period as determined solely by the University Board, then such termination shall take effect at the end of the current Academy fiscal year. Following University Board approval, the Center Director shall provide notice of the termination to the Academy. If during the period between the University Board action to terminate and the effective date of termination, the Academy has violated the Contract or Applicable Law, the Contract may be revoked or suspended sooner pursuant to this Article X. If this Contract is terminated pursuant to this Section 10.5, the revocation procedures in Section 10.6 shall not apply.

South Arbor Charter Academy

Contract Amendment No. 14

Tab 2

Section 6. Contracts Between Corporation and Related Persons. As required by Applicable Law, any Director, officer or employee of the Academy, who enters into a contract with the Academy, that meets the definition of contract under the statute on Contracts of Public Servants with Public Entities, Act No. 317 of the Public Acts of 1968, being sections 15.321 to 15.330 of the Michigan Compiled Laws, shall comply with the public disclosure requirements set forth in Section 3 of the statute.

The University Board authorizes the Academy Board to employ or contract for personnel according to the position information outlined in Schedule 5. However, the Academy Board shall prohibit any individual from being employed by the Academy, an Educational Service Provider or an employee leasing company involved in the operation of the Academy, in more than one (1) full-time position and simultaneously being compensated at a full-time rate for each of these positions. An employee hired by the Academy Board shall be an employee of the Academy for all purposes and not an employee of the University for any purpose. With respect to Academy Board employees, the Academy shall have the power and responsibility to (i) select and engage employees; (ii) pay their wages, benefits, and applicable taxes; (iii) dismiss employees; and (iv) control the employees' conduct, including the method by which the employee carries out his or her work. The Academy Board shall be responsible for carrying workers' compensation insurance and unemployment insurance for its employees. The Academy Board may contract with an Educational Service Provider or an employee leasing company to provide services or to provide personnel to perform services or work at the Academy. Before entering into an agreement with an Educational Service Provider or an employee leasing company to perform services or to provide personnel to perform services or work at the Academy, the Academy Board must first comply with the Educational Service Provider Policies issued by the Center. A copy of the agreement between the Academy Board and the Educational Service Provider or employee leasing company shall be included as part of Schedule 5.

The Academy shall comply with the Incompatible Public Offices statute, Act No. 566 of the Public Acts of 1978, of the Michigan Compiled Laws, and the Contracts of Public Servants With Public Entities statute, Act No. 371 of the Public Acts of 1968, of the Michigan Compiled Laws. The Academy Board shall ensure compliance with Applicable Law relating to conflicts of interest. Language in this Section controls over section 1203 of the Code. The following shall be deemed prohibited conflicts of interest:

- (a) An individual simultaneously serving as an Academy Board member and an owner, officer, director, employee or consultant of an Educational Service Provider or an employee leasing company, or a subcontractor to an Educational Service Provider or an employee leasing company that has an ESP Agreement with the Academy;
- (b) An individual simultaneously serving as an Academy Board member and an Academy Board employee;
- (c) An individual simultaneously serving as an Academy Board member and an independent contractor to the Academy;
- (d) An individual simultaneously serving as an Academy Board member and a member of the governing board of another public school;
- (e) An individual simultaneously serving as an Academy Board member and a University official, employee, or paid consultant, as a representative of the University; and
- (f) An individual simultaneously serving as an Academy Board member and having an ownership or financial interest in any real or personal property leased or subleased to the Academy.

No person shall be appointed or reappointed to serve as an Academy Board member if the person's mother, mother-in-law, father, father-in-law, son, son-in-law, daughter, daughter-in-law, sister, sister-in-law, brother, brother-in-law, spouse or domestic partner:

- (a) Is employed by the Academy Board;
- (b) Works at or is assigned to work at the Academy;
- (c) Has an ownership, officer, policymaking, managerial, administrative non-clerical or other significant role with the Academy's Educational Service Provider or employee leasing company; and
- (d) Has an ownership or financial interest in any school building lease or sublease agreement with the Academy.
- (e) Is a current Academy Board member.

The Academy Board shall require each individual who works at the Academy to annually disclose any familial relationship with any other individual who works at, or provides services to, the Academy. For purposes of this sub-section, familial relationship means a person's mother, mother-in-law, father, father-in-law, son, son-in-law, daughter, daughter-in-law, sister, sister-in-law, brother, brother-in-law, spouse or domestic partner.

AMENDMENT NO. 15

to the
July 1, 2016 Contract to Charter
A School of Excellence and Related Documents

Issued To

SOUTH ARBOR CHARTER ACADEMY
(A SCHOOL OF EXCELLENCE)

By

THE CENTRAL MICHIGAN UNIVERSITY
BOARD OF TRUSTEES
(AUTHORIZING BODY)

CONTRACT AMENDMENT NO. 15

SOUTH ARBOR CHARTER ACADEMY

In accordance with Article IX of the Terms and Conditions of the Contract (the "Contract"), dated July 1, 2016, issued by the CENTRAL MICHIGAN UNIVERSITY BOARD OF TRUSTEES (the "University Board") to SOUTH ARBOR CHARTER ACADEMY (the "Academy"), as amended, the parties agree to further amend the Contract as follows:

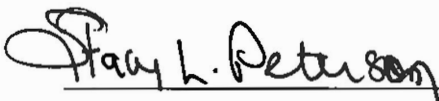

- 1.) Amend Schedule 6: Physical Plant Description, by replacing the Physical Plant Description Narrative and the Floor Plan contained therein with the Physical Plant Description Narrative and the Floor Plan, both attached as Tab 1.
- 2.) Further amend Schedule 6: Physical Plant Description, by inserting at the end of this Schedule the Certificate of Use and Occupancy, attached as Tab 2.

This entire amendment is hereby approved by the University Board and the Academy Board through their authorized designees, and shall have an effective date of August 13, 2024.

South Arbor Charter Academy

Contract Amendment No. 15

Tab 1

1. Applicable Law requires that a school of excellence application and contract must contain a description of and the address for the proposed physical plant in which the school of excellence will be located. See MCL 380.552(7)(i) and 380.553(5)(f);

2. The address and a description of the site and physical plant (the "Site") of South Arbor Charter Academy (the "Academy") is as follows:

Address: 8200 Carpenter Rd.
Ypsilanti, MI 48197

Description: The Site contains a one-story, 53,428 square foot facility. The exterior of the facility is brick and vinyl construction. The initial building was constructed in 2000 and was then expanded in 2001, 2007 and 2012. The facility contains 30 classrooms, 11 restrooms, a gymnasium, library, media center, music room, art room, conference room and various offices. The Site contains an outdoor play area and ample parking.

Configuration of Grade Levels: Kindergarten through Eighth Grade.

Term of Use: Term of Contract.

Name of School District and Intermediate School District:

Local: Milan Area Schools
ISD: Washtenaw

3. It is acknowledged and agreed that the information identified below, about this Site, is provided on the following pages, or must be provided to the satisfaction of the University Board or its designee, before the Academy may operate as a public school in this state.

- A. Narrative description of physical facility
- B. Size of building
- C. Scaled floor plan
- D. Copy of executed lease or purchase agreement

4. In addition, the Academy and the University Board hereby acknowledge and agree that this Contract is being issued to the Academy with the understanding that the Academy cannot conduct classes as a school of excellence in this state until it has obtained the necessary fire, health and safety approvals for the above-described physical facility. These approvals must be provided and be acceptable to the University Board or its designee prior to the Academy operating as a public school. In cases of disagreement, the Academy may not begin operations without the consent of the University Board or its designee.

5. If the Site described above is not used as the physical facilities for the Academy, then Schedule 6 of this Contract between the Academy and the University Board must be amended pursuant to Article IX of the Terms and Conditions of Contract, to designate, describe, and agree

upon the Academy's physical facilities. The Academy must submit to the University Board or its designee complete information about the new site to be actually used. This information includes that described in paragraphs 2, 3 and 4 of this Schedule 6. It is acknowledged and agreed that the school of excellence cannot conduct classes as a public school in this state until it has submitted all the information described above, to the satisfaction of the University Board or its designee, and the amendment regarding the new site has been executed.

6. Any change in the configuration of grade levels at the Site requires an amendment to this Schedule 6 pursuant to Article IX of the Terms and Conditions of Contract set forth above.

CONTRACT AMENDMENT NO. 16

SOUTH ARBOR CHARTER ACADEMY

In accordance with Article IX of the Terms and Conditions of the Contract (the "Contract"), dated July 1, 2016, issued by the CENTRAL MICHIGAN UNIVERSITY BOARD OF TRUSTEES (the "University Board") to SOUTH ARBOR CHARTER ACADEMY (the "Academy"), as amended, the parties agree to further amend the Contract as follows:

- 1.) Amend the Terms and Conditions of Contract by replacing the language contained within Article IV, Section 4.5. Prohibition of Identified Family Relationships, subsection (b), with the language attached as Tab 1.
- 2.) Further amend the Terms and Conditions of Contract by inserting at the end of Article XII: General Terms, the language attached as Tab 2.
- 3.) Amend Schedule 2: Amended Bylaws, by replacing the language contained within Article XIII, Section 6. Contracts Between Corporation and Related Persons and Article IX: Indemnification, with the corresponding language attached as Tab 3.
- 4.) Amend Schedule 4: Oversight, Compliance and Reporting Agreement, by inserting at the end of Article II, Section 2.2. Compliance and Reporting Duties, the language attached as Tab 4.

This entire amendment is hereby approved by the University Board and the Academy Board through their authorized designees, and shall become effective upon execution by the Designee of the University Board.

Contract Amendment No. 16

Tab 1

Terms and Conditions: Article IV, Section 4.5(b)

- (b) The Academy Board shall require each individual who works at the Academy to annually disclose any familial relationship with any other individual who works at, or provides services to, the Academy. If an Academy Board member discloses any prohibited familial relationships in the annual disclosure, or if the University finds that an Academy Board member has failed to disclose a prohibited familial relationship, that Academy Board member shall be removed from office, in accordance with the removal provisions found in the Resolution or Schedule 2: Amended Bylaws. For purposes of this subsection, familial relationship means a person's mother, mother-in-law, father, father-in-law, son, son-in-law, daughter, daughter-in-law, sister, sister-in-law, brother, brother-in-law, spouse or domestic partner.

South Arbor Charter Academy

Contract Amendment No. 16

Tab 2

Terms and Conditions: Article XII, Section 12.24

Section 12.24. Required Statutory Disclosures. The Academy shall ensure that the names of Central Michigan University Board of Trustees and the primary educational management organization, if applicable, must appear and be verbally provided, as applicable, on all of the following:

- (a) Unless prohibited by a local ordinance or local zoning authority, signage that is on the Academy's property and is erected, repaired, or installed on or after April 2, 2025;
- (b) Promotional material that is created, modified, or distributed on or after April 2, 2025;
- (c) The footer of the Academy's website pages; and
- (d) The student application that is required to be enrolled in the Academy.

For purposes of this section, "primary educational management organization" shall have the same meaning as defined in MCL 380.553.

South Arbor Charter Academy

Contract Amendment No. 16

Tab 3

Amended Bylaws: Article VIII, Section 6

Section 6. Contracts Between Corporation and Related Persons. As required by Applicable Law, any Director, officer or employee of the Academy, who enters into a contract with the Academy, that meets the definition of contract under the statute on Contracts of Public Servants with Public Entities, Act No. 317 of the Public Acts of 1968, being sections 15.321 to 15.330 of the Michigan Compiled Laws, shall comply with the public disclosure requirements set forth in Section 3 of the statute.

The University Board authorizes the Academy Board to employ or contract for personnel according to the position information outlined in Schedule 5. However, the Academy Board shall prohibit any individual from being employed by the Academy, an Educational Service Provider or an employee leasing company involved in the operation of the Academy, in more than one (1) full-time position and simultaneously being compensated at a full-time rate for each of these positions. An employee hired by the Academy Board shall be an employee of the Academy for all purposes and not an employee of the University for any purpose. With respect to Academy Board employees, the Academy shall have the power and responsibility to (i) select and engage employees; (ii) pay their wages, benefits, and applicable taxes; (iii) dismiss employees; and (iv) control the employees' conduct, including the method by which the employee carries out his or her work. The Academy Board shall be responsible for carrying workers' compensation insurance and unemployment insurance for its employees. The Academy Board may contract with an Educational Service Provider or an employee leasing company to provide services or to provide personnel to perform services or work at the Academy. Before entering into an agreement with an Educational Service Provider or an employee leasing company to perform services or to provide personnel to perform services or work at the Academy, the Academy Board must first comply with the Educational Service Provider Policies issued by the Center. A copy of the agreement between the Academy Board and the Educational Service Provider or employee leasing company shall be included as part of Schedule 5.

The Academy shall comply with the Incompatible Public Offices statute, Act No. 566 of the Public Acts of 1978, of the Michigan Compiled Laws, and the Contracts of Public Servants With Public Entities statute, Act No. 371 of the Public Acts of 1968, of the Michigan Compiled Laws. The Academy Board shall ensure compliance with Applicable Law relating to conflicts of interest. Language in this Section controls over section 1203 of the Code. The following shall be deemed prohibited conflicts of interest:

- (a) An individual simultaneously serving as an Academy Board member and an owner, officer, director, employee or consultant of an Educational Service Provider or an employee leasing company, or a subcontractor to an Educational Service Provider or an employee leasing company that has an ESP Agreement with the Academy;
- (b) An individual simultaneously serving as an Academy Board member and an Academy Board employee;
- (c) An individual simultaneously serving as an Academy Board member and an independent contractor to the Academy;
- (d) An individual simultaneously serving as an Academy Board member and a member of the governing board of another public school;
- (e) An individual simultaneously serving as an Academy Board member and a University official, employee, or paid consultant, as a representative of the University; and

- (f) An individual simultaneously serving as an Academy Board member and having an ownership or financial interest in any real or personal property leased or subleased to the Academy.

No person shall be appointed or reappointed to serve as an Academy Board member if the person's mother, mother-in-law, father, father-in-law, son, son-in-law, daughter, daughter-in-law, sister, sister-in-law, brother, brother-in-law, spouse or domestic partner:

- (a) Is employed by the Academy Board;
- (b) Works at or is assigned to work at the Academy;
- (c) Has an ownership, officer, policymaking, managerial, administrative non-clerical or other significant role with the Academy's Educational Service Provider or employee leasing company; and
- (d) Has an ownership or financial interest in any school building lease or sublease agreement with the Academy.
- (e) Is a current Academy Board member.

The Academy Board shall require each individual who works at the Academy to annually disclose any familial relationship with any other individual who works at, or provides services to, the Academy. If an Academy Board member discloses any prohibited familial relationships in the annual disclosure, or if the University finds that an Academy Board member has failed to disclose a prohibited familial relationship, that Academy Board member shall be removed from office, in accordance with the removal provisions found in the Resolution or these Amended Bylaws. For purposes of this sub-section, familial relationship means a person's mother, mother-in-law, father, father-in-law, son, son-in-law, daughter, daughter-in-law, sister, sister-in-law, brother, brother-in-law, spouse or domestic partner.

Amended Bylaws: Article IX

ARTICLE IX INDEMNIFICATION

To the extent permitted by Applicable Law, each person who is or was a Director, officer or member of a committee of the Academy and each person who serves or has served at the request of the Academy as a trustee, director, officer, partner, employee or agent of any other corporation, partnership, joint venture, trust or other enterprise, may be indemnified by the Academy. The corporation may purchase and maintain insurance on behalf of any such person against any liability asserted against and incurred by such person in any such capacity or arising out of his status as such, whether or not the corporation would have power to indemnify such person against such liability under the preceding sentence. The corporation may, to the extent authorized from time to time by the Academy Board, grant rights to indemnification to any employee or agent of the corporation. The indemnification shall not include any circumstances in which a person who is or was a director, officer or member of a committee of the Academy and each person who serves or has served at the request of the Academy as a trustee, director, officer, partner, employee or agent of any other corporation, partnership, joint venture, trust or other enterprise is grossly negligent or criminally liable for the indemnified act.

South Arbor Charter Academy

Contract Amendment No. 16

Tab 4

Oversight, Compliance and Reporting Agreement: Section 2.2(m)

- m. The Academy shall ensure that the names of Central Michigan University Board of Trustees and the primary educational management organization, if applicable, must appear and be verbally provided, as applicable, on all of the following:
 - i. Unless prohibited by a local ordinance or local zoning authority, signage that is on the Academy's property and is erected, repaired, or installed on or after April 2, 2025;
 - ii. Promotional material that is created, modified, or distributed on or after April 2, 2025;
 - iii. The footer of the Academy's website pages; and
 - iv. The school application that a student must submit to enroll in the Academy.

For purposes of this section, "primary educational management organization" shall have the same meaning as defined in MCL 380.553.
