

Educator Institute PLC

Become a community with a shared vision of using inquiry and equity to teach science and math.

Virtual meeting May 7, in-person June 17 & 18, August 4

Develop your own practices for teaching inquiry-based and equity-focused math and science while also contributing to pre-service teachers' development. This PLC (Professional Learning Community) may develop opportunities for pre-service teachers (and participants) that include: classroom reflection and observation tools, classroom materials, pedagogy support, and in-person classroom experiences.

There will also be opportunities for groups of educators in grade level, building or district to receive coaching support from workshop presenters. Coaching will focus on equitable inquiry-based instruction in math and science. Please let us know if this is something your school or district is interested in - some fees may apply for this service.

Institute participants will receive:

- up to \$600 stipend for time (May – August) for teachers in Gratiot, Isabella, Bay, Arenac, Saginaw, Midland, Clare, and Gladwin Counties.
- academic year coaching support,
